

APRIL 27-29 & MAY 1, 2016 | CSNS | CHICAGO

U.S. Coins

Featuring: A Selection from the Bob R. Simpson Collection • The Pellegrini Collection, Part II
The Paul Denby Collection of U.S. Gold Commemoratives • The Indian Rocks Collection
The Paul H. Gerrie Collection • The Somerset Collection • The Lenny Reiner Collection, Part IV

April 27-29 & May 1, 2016 | Chicago

Signature® Floor Sessions 1-5

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Renaissance Schaumburg Convention Center
Utopia Ballroom C
1551 North Thoreau Drive • Schaumburg, IL 60173

Session 1

Wednesday, April 27 • 6:00 PM CT • Lots 3001–3732

Session 2

Thursday, April 28 • 1:00 PM CT • Lots 3733–4434

Session 3 - PLATINUM NIGHT (see separate catalog)

Thursday, April 28 • 6:00 PM CT • Lots 4501–4893

Session 4

Friday, April 29 • 1:00 PM CT • Lots 4894–5600

Session 5

Friday, April 29 • 6:00 PM CT • Lots 5601–6342

Signature® Internet Session 6

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 6

Sunday, May 1 • 10:00 AM CT • Lots 7001–9413

LOT SETTLEMENT AND PICK-UP

Thursday, April 28 • 10:00 AM – 1:00 PM CT

Friday, April 29 • 10:00 AM – 1:00 PM CT

Saturday, April 30 • 9:00 AM – 12:00 PM CT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

This auction is subject to a Buyer's Premium of 17.5% (minimum \$14).

Dear Bidder:

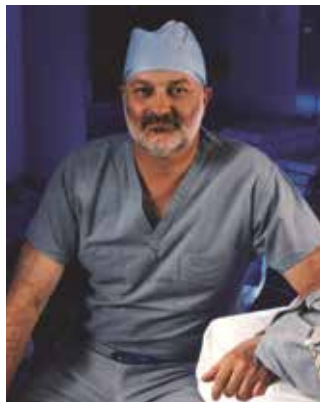

Schaumburg, Illinois is the place to be for the Central States Numismatic Society annual convention – always one of the year's premier events for dealers and collectors alike. The CSNS show continues to evolve into an important numismatic venue. The convention is known for drawing dealers and collectors nationwide with its large, sold-out bourse. Heritage Auctions is proud to serve as Official Auctioneer, with five action-packed Floor Sessions plus an Online Signature® Session on Sunday, May 1.

Please take a moment to read about our Featured Collections:

A SELECTION FROM THE BOB R. SIMPSON COLLECTION

Co-owner of the Texas Rangers baseball team and a lifelong Texas energy executive, Bob Simpson is a passionate collector and numismatist. He has consigned a single coin to this auction, and not surprisingly it is one of the most notable lots in the sale: an early pattern of historical importance and rarity. The Mint Act of 1792 provided authorization for the fledgling U.S. Mint to establish a viable system of national currency. Patterns were struck for the half cent, cent, half dime, dime, and quarter. Among the earliest patterns, there are only two dozen 1792 dimes known today in all formats (copper or silver). The Garrett-Simpson copper dime is the finest-known Judd-10 pattern copper dime, graded SP64 Brown PCGS Secure, certainly a highlight coin of the Platinum Night Session.

THE PELLEGRINI COLLECTION, PART II

Longtime Heritage client and consignors Dr. John L. Pellegrini brings a second installment of his exceptional silver dollar collection to Central States with a complete run of proof Morgan silver dollars, starting with both the 7 and 8 Tailfeather varieties from 1878 through a rare "Chapman proof" 1921 Morgan (only about 30 pieces struck). The 1895 proof is a particularly nice example of the King of Morgan dollars, graded PR63 Cameo NGC.

Dr. Pellegrini finished his surgery residency at Brown University and Harvard University in 1978, and soon began a surgery practice in Whitesburg, Kentucky. There, he started collecting coins in 1980, with special emphasis on silver dollars, although he has assembled other fine collections including Walking Liberty halves, selections of which also make up part of the current consignment.

THE PAUL DENBY COLLECTION OF U.S. GOLD COMMEMORATIVES

A dedicated section at the start of the gold commemoratives is reserved for The Paul Denby Collection of U.S. Gold Commemoratives, the #1 Current and All-Time Finest Gold Commemoratives PCGS Registry Set in circulation strike format. To say that this is a remarkable collection is an understatement, since – incredibly – eight of the coins out of 13 are the finest-known examples, and three other coins show just one finer certified example. PCGS gives the set a high 66.43 rating. The collection was formed over about a dozen years starting in 2003, with the sole desire to locate the best coin with outstanding eye appeal. Mr. Denby simply says, “If the coin looked right, I’d buy it.”

Each coin in the set is of standout quality and visually superb. The Pan-Pac gold issues are especially nice, including the fifty dollar pieces in round and octagonal in the high grades of MS64 PCGS and MS65 PCGS Secure CAC respectively. Collectors of Pan-Pac exonomia and ephemera will want to pay particular attention to two lots – lot 4876, consisting of four different, original box-type holders plus the Shreve & Co. hammered copper frame and glass with its inserts, screws, and velvet interior intact – one of approximately 30 such frames known. Lot 4877 is a set of four receipts for delivery of Panama-Pacific commemorative coins, hand written, including one for receipt of 309 round gold fifties – the lion’s share of the 483 pieces sold to the Anglo-California Trust Company.

A wonderful group of proof commemorative gold accompanies the circulation strikes, headed by the sole finest 1916 McKinley proof gold dollar, PR64 Cameo PCGS CAC. Other finest-knowns include the 1903 McKinley graded PR66+ Cameo PCGS CAC, and the 1903 Jefferson certified PR66 Cameo PCGS CAC. The rare 1925 Norse gold medal, Ex: Bass, in PR66 PCGS CAC is the centerpiece of the Norse medals that are offered, including a 1925 silver die trial on a burnished oversized planchet, a seldom-seen 1925 Norse medal in Large Format (silvered), and impeccable Thick and Thin planchet variants struck in silver.

Mr. Denby has also assembled one of the all-time finest complete PCGS Registry Sets of the classic silver commemorative 50-Piece type set, ranked #3 among the current finest sets and #6 among the all-time finest sets, which is offered for sale (intact as a set) by private treaty.

THE INDIAN ROCKS COLLECTION

This interesting and eclectic consignment includes several elite Platinum Night coins including an amazing 1776 Continental dollar – a semiprooflike coin that is bright and lustrous despite being struck in pewter. Other Platinum Night coins from The Indian Rocks Collection include a 1916 Buffalo nickel with the doubled die obverse. Seldom offered in Mint State (MS61 NGC), it is a famous *Guide Book* and *Cherrypickers’* variety in strong demand by Buffalo nickel collectors. Another famous nickel, the extremely rare Judd-1950 pattern 1913, is Ex: Farouk and one of just a few pieces known in private hands. Other high-grade Buffalo nickels, Indian Head gold, High Relief gold, and key pattern issues (many with Indian Princess motifs) appear throughout the Central States Floor Sessions.

THE PAUL H. GERRIE COLLECTION

The Gerrie name appears on other fine collections formed in the past, including a notable collection of ancients, but the current consignment focuses exclusively on circulation strike Morgan dollars and Peace dollars. The Paul H. Gerrie Collection is represented in Platinum Night by several key and semikey Morgan dollars, including an impressive 1889-CC in MS63 Deep Mirror Prooflike PCGS with CAC. An 1884-S graded MS63+ PCGS CAC is sure to draw many bids, as is the 1893-S in XF45 PCGS with CAC recognition. Other examples from the collection will cross the block in Floor Session 4 (Friday afternoon), while still others will provide ample bidding opportunities in the Sunday Online Signature Session.

THE SOMERSET COLLECTION

Our consignor began collecting coins at age eight, when he helped his father form a collection of Indian Head and Lincoln cents from the family's coin-operated laundromat locations. Soon, he was collecting the still-circulating "classics" of the early 20th century: Buffalo nickels, Mercury dimes, Standing Liberty quarters, and Walking Liberty halves. A local branch bank – just a short bicycle ride away – allowed the young collector to search rolls of coins without having to pay for them (on the honor system, from a time well-remembered but long past!). Later, after the financially lean years of high school and college, our consignor frequented local coin stores and bid boards. The advent of third-party grading led to collecting only certified type, and by the mid-1990s a certified set of Standing Liberty quarters was the goal, drawn by the aesthetic beauty of the design and the collectability of the series. The result is The Somerset Collection, PCGS-certified in high Mint State grades with exceptional eye appeal, absent only the 1918-S 8/7 overdate.

THE LENNY REINER COLLECTION, PART IV

GSA silver dollars in their original packaging keep emerging from the "Reiner hoard." The Central States offering includes 49 specially selected GSA dollar lots, divided between Floor Session 4 on Friday afternoon and the Sunday Online Signature Session. The Reiner Collection of GSA dollars was assembled on the advice of Pat Johnson at the Houston Numismatic Exchange, who advised Lenny to "buy them and hold them." Lenny accumulated many GSA dollars – adding and adding – and later, with the assistance of Pat's son Jay Johnson, assembled the balance of the collection. Lenny Reiner would like to dedicate the appearance of his GSA dollars to the memory of Pat Johnson.

Central States is on every dealer's calendar and an event that continues to grow year after year. We sincerely hope you will join us in Schaumburg for the 2016 Central States event and stop by our booth on the bourse to say hello.

For those who cannot attend, Heritage makes it easy and safe to place your bids either before or during the auction. Our live telephone bidding and interactive online bids through HERITAGE Live!® are second to none in the auction industry. Real-time mobile or computer bidding from anywhere in the world is equally dependable. Our well-trained staff is always happy to accept your bids via e-mail, fax, or regular mail before the auction, and to answer any questions you may have.

Good luck with your bids and please accept our sincere thanks for your participation.

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

SESSION ONE

COLONIALS

3001 1652 Oak Tree Threepence, No IN on Obverse — Plugged — NGC Details. VF. Noe-28.5, W-310, Salmon 6-B, R.7. Weak lower obverse, as is diagnostic of this rare variety. The reverse is evenly struck and boldly defined. A crudely plugged hole appears at the obverse 10 o'clock, and a deep crease cuts most of the way through the planchet on each side. A few other small marks and abrasions are not unusual for the issue. Suitable for the budget-conscious collector. Listed on page 39 of the 2016 *Guide Book*.

3002 1652 Oak Tree Sixpence, IN on Obverse, Fine 12 PCGS. Noe-22, W-400, Salmon 2b-B, R.5. Struck from a misaligned obverse die. The obverse has the appearance of a 25% off center strike toward 5:30. The tree is softly struck, and TS IN MA are off the flan. The reverse is well centered, and is bold aside from the W in NEW. The tops of GLA and ANO are off the flan. Slightly wavy, as usual for the Oak Tree series. Listed on page 39 of the 2016 *Guide Book*. NGC ID# 2ARJ, PCGS# 45360

3003 1652 Oak Tree Shilling, IN at Bottom, Noe-5, W-470, Salmon 3-D, R.2 — Plugged — ANACS. Fine-12 Details. The date, legend, and denomination on the obverse are bold, with pleasing pearl-gray and amber surfaces, but the reverse is off-center and only part of the legend is legible. A few details of the tree can be discerned on close inspection, but most of the central reverse design has been worn away. The noted damage is evident between A and T on the reverse. Listed on page 39 of the 2016 *Guide Book*. NGC ID# 2ARL, PCGS# 45362 Base PCGS# 20

1652 Pine Tree Threepence, VF30
Noe-36, Salmon 2-B

3004 1652 Pine Tree Threepence VF30 PCGS. Noe-36, W-640, Salmon 2-B, R.4. No pellets at the trunk. This pleasing dove-gray specimen features a well-centered reverse, but the obverse is struck off-center to the southeast, causing much of the legend to run off the flan. The surfaces are lightly abraded, but show some waves, due to the rocker press method of manufacture. The reverse is much sharper than the obverse. Listed on page 39 of the 2016 *Guide Book*. NGC ID# 2ARY, PCGS# 21

1652 Pine Tree Shilling, XF45
Large Planchet, Noe-1, Salmon 1-A

3005 1652 Pine Tree Shilling, Large Planchet, Pellets at Trunk, Noe-1, W-690, Salmon 1-A, R.2, XF45 PCGS. Noe-1 is easily identified by the Large Planchet, with pellets on either side of the tree trunk and the colon punctuation on the reverse. The irregular shape of the planchet was due to the method of manufacture, where the coins were struck on a rocker press from strips of planchet stock and individual pieces were cut from the strip with heavy cutting shears. This lightly worn, slightly off-center Choice XF example is free of large or distracting abrasions and retains traces of original mint luster. From a late state of the dies, with a bisecting die crack and cuds on the reverse. Listed on page 39 of the 2016 *Guide Book*. NGC ID# 2ARU, PCGS# 45369 Base PCGS# 23

1652 Pine Tree Shilling, XF40
Small Planchet, Noe-16

3006 1652 Pine Tree Shilling, Small Planchet, XF40 PCGS. Noe-16, W-835, Salmon 2-B, R.2. 56.02 grains. The typical weight for Noe-16 is approximately 70 grains. The legends are intact except for the tops of SET. The lower reverse is mildly granular, but neither side shows any detrimental marks. A relatively early die state despite moderate crumbling on the left-side tree branches. Listed on page 39 of the 2016 *Guide Book*. NGC ID# 2ARZ, PCGS# 24

**1723 Rosa Americana Penny
MS63 Brown, M. 2.7-Eb.3**

- 3007** 1723 Rosa Americana Penny MS63 Brown NGC. M. 2.7-Eb.3, W-1278, R.4. Dusky peach-gold and steel-blue toning alternates across this splendid Select Rosa Americana penny. The repunched As in GRATIA provide the pick-up point for the Sydney Martin die variety. Well struck and devoid of marks or planchet issues. Listed on page 43 of the 2016 *Guide Book*. NGC ID# 2ASR, PCGS# 125

- 3008** 1779 Rhode Island Ship Token, No Wreath, Copper — Damage — PCGS Genuine. AU Details. Betts-562, W-1730, R.3. VLUGTENDE Removed, No Wreath. A group of shallow pinscratches exist in the exergue above the area where VLUGTENDE was removed shortly after mintage. The scratches appear unrelated to the removal of the politically unsafe word, the remnants of the letters still visible below the ship near the bottom obverse rim. This is a lovely Rhode Island token in all other regards, crisply struck and defined, with fawn-gold luster remaining around the intricate details of the ship and among the devices surrounding Conanicut Island on the reverse. Rich, bluish-brown patina blankets both sides, with surfaces that are smooth and appealing apart from the localized damage. Listed on page 50 of the 2016 *Guide Book*.

**1778-1779 Rhode Island Ship Token, MS63 Brown
W-1730, No Wreath, Copper Planchet
Among the Finest of the Type**

- 3009** 1779 Rhode Island Ship Token, No Wreath, Copper MS63 Brown PCGS. Betts-562, W-1730, R.3. Much brassy-gold color remains among the olive-brown fields and motifs of this Select Uncirculated Rhode Island ship token (also described by many numismatists as a medal). The surfaces appear virtually without fault and the eye appeal is exceptional. While there lacks complete agreement about the origin of the Rhode Island pieces as well as their intended purpose, they were seemingly struck either by — or for — the Dutch to foment opinion against the American cause. The word VLUGTENDE (fleeing) was effaced on most examples shortly after mintage, likely from fear of reprisal by the British government since the word was positioned directly beneath Admiral Howe's flagship. Vestiges of VLUGTENDE remain visible beneath the ship. The reverse shows American forces retreating from the British fleet in 1778. This example offers a convincing strike and exceptional eye appeal. Listed on page 50 of the 2016 *Guide Book*. Population: 6 in 63 Brown, 1 finer (2/16). NGC ID# 2AUL, PCGS# 579

**1776 Continental Dollar, AU Details
Early State Newman 1-C**

- 3010** 1776 Continental Dollar, CURRENCY, Pewter — Bent — Genuine PCGS. AU Details. Newman 1-C, W-8445, R.3. This early die state has a crack joining the tops of GI in FUGIO, but no evidence of the die break that eventually forms over those letters. This light to medium gray example has slight roughness on the high points with minor scratches on the reverse. A vertical bend from 6 o'clock on the obverse corresponds with a surface crack on the reverse. Listed on page 85 of the 2016 *Guide Book*.

**1787 Massachusetts Half Cent
Ryder 5-A, MS64+ Brown**

- 3011** 1787 Massachusetts Half Cent MS64+ Brown PCGS. Ryder 5-A, W-5960, R.3. The varieties designated as Ryder 2-A, 4-C, and 5-A are the three most plentiful 1787 half cents, and they are excellent choices for type collectors. This Choice Mint State piece has fully lustrous olive and golden-brown surfaces with great overall eye appeal. Hints of faded mint red are visible with careful examination. Listed on page 59 of the 2016 *Guide Book*. NGC ID# 2B22, PCGS# 296
- 3012** 1788 Massachusetts Cent, Period, XF45 PCGS. Ryder 3-E, W-6220, R.4. A tan-brown example with hints of apple-green and lavender toning. Marks are absent aside from slight reverse rim nicks at 3 o'clock and 4:30. Flan imperfections are confined to a small lamination above the right (facing) wing. Listed on page 59 of the 2016 *Guide Book*. NGC ID# 2WNJ, PCGS# 311
- 3013** 1785 Connecticut Copper, Bust Right XF45 NGC. M. 3.1-L, W-2325, High R.4. An unabraded medium brown example with moderate flan flaws and even wear. No verdigris is present. A better Miller variety, promptly attributed by the diagonal die lines between the 17 in the date. Listed on page 61 of the 2016 *Guide Book*. NGC ID# 3788, PCGS# 316

**1786 Hercules Head Connecticut Copper
Choice XF, Late Dies Miller 5.3-N**

3014 1786 Connecticut Copper, Hercules Head XF45 PCGS. M. 5.3-N, W-2575, R.2. This Choice Hercules Head copper ranks highly among the finest PCGS-certified specimens. A pleasing, medium-brown example, the coin is especially interesting for its dramatic late die state. The reverse die has sunken, which causes the field to rise and consume a portion of the seated effigy. AUCTORI is boldly die clashed onto the reverse. Struck slightly off center toward 4:30. Listed on page 61 of the 2016 *Guide Book*. Population: 2 in 45, 1 finer (3/16). NGC ID# 2B2H, PCGS# 334

3015 1787 Connecticut Copper, Mailed Bust Left Connecticut Copper, M. 15-F, W-2900, R.3, AU55 NGC. This is a challenging variety, but not out of reach for most pursuers of Connecticut coppers. This piece is well-detailed on the devices and shows consistent reddish-brown surfaces with a few areas of minor granularity near the borders. Planchet laminations occur on the obverse, first along the lower-right border, then at 9 o'clock, and two more on the portrait's forehead and chin, respectively. Aside from the upper-right reverse, which is weak, all peripheral legends are discernible. Listed on page 61 of the 2016 *Guide Book*. NGC ID# 2B2P, PCGS# 349

3016 1787 Connecticut Copper, Draped Bust Left — Environmental Damage, Repaired — NGC Details. VF M. 24-FE, W-3080, Low R.7. An evenly granular deep steel-gray example of this rarely encountered die marriage. A linear depression affects the lower right reverse border. Accompanied by a J.R. Grellman grading card that describes the piece as "uneven strike, minor verdigris, VF25 / VF20." Listed on page 62 of the 2016 *Guide Book*.

3017 1786 New Jersey Copper, Straight Plow Beam, AU53 PCGS. M. 14-J, W-4810, R.1. A chocolate-brown example with exceptional definition. No marks are apparent, but the surfaces display distributed minor flan flaws, and the obverse is lightly hairlined. Denoted as Wide Shield on the PCGS holder, but we believe that only the M and N reverses merit that designation. Listed on page 69 of the 2016 *Guide Book*. NGC ID# AUKJ, PCGS# 45423

3018 1786 New Jersey Copper, Narrow Shield, Curved Beam — Rim Damage — PCGS Genuine. VF Details. M. 23-R, W-4945, R.3. An edge knock on the reverse at 12 o'clock confirms the PCGS designation, and we also note a vertical mark through the E in E PLURIBUS UNUM. Nonetheless, a collectible chocolate-brown representative of this first-year variety. Listed on page 69 of the 2016 *Guide Book*. NGC ID# AUKK, PCGS# 45424

3019 1787 New Jersey Copper, No Sprig Above Plow — Rim Damage — PCGS Genuine. Fine Details. M. 23-T, W-5100, R.2. The edge is thicker and straight near 2:30 and 8 o'clock, relative to the obverse. A moderately granular example with walnut-brown fields and steel-gray devices. A slender and minor lamination traverses the shield. Listed on page 70 of the 2016 *Guide Book*. NGC ID# AUL8, PCGS# 506

3020 1787 New Jersey Copper, No Sprig Above Plow, XF45 NGC. M. 43-Y, W-5220, R.4. A charming tan-brown and sea-green example with attractive surfaces. The strike is consistent aside from minor incompleteness on the center of the shield. Listed on page 70 of the 2016 *Guide Book*. NGC ID# AUL8, PCGS# 506

3021 1787 New Jersey Copper, No Sprig Above Plow, XF45 NGC. M. 39-a, W-5195, R.2. An attractive walnut-brown representative with distributed minute flan flaws, as made. A small, straight clip is noted at 2:30. The NGC holder lists the variety as "Small Planchet, Plain Shield," a confusing nomenclature abandoned by the *Guide Book* in recent years. Listed on page 70 of the 2016 *Guide Book*. NGC ID# AUL8, PCGS# 506

3022 1787 New Jersey Copper, No Sprig Above Plow, AU53 PCGS. M. 48-g, W-5275, R.1. A pleasing tan-brown state copper with lightly clashed but unmarked surfaces. Scattered minor granularity does not deny the eye appeal. Designated as an Outlined Shield variety by PCGS, which is correct but does not conform to its listing on page 70 of the 2016 *Guide Book*. NGC ID# AUL8, PCGS# 506

**1785 Vermont Landscape, XF40
VERMONTIS, Ryder-4, Whitman-2015**

3023 1785 Vermont Copper, Landscape, VERMONTIS XF40 PCGS. RR-4, Bressett 3-C, W-2015, R.4. Ex: Newman. The eye is inverted, with the eyebrow below, an engraving characteristic first noted by Anthony Terranova. The reverse legend, STELLA QUARTA DECIMA, translates to 'the 14th star' and refers to Vermont's aspiration to become the 14th state. Six years passed before Vermont was admitted in 1791. The obverse of this late-state RR-4 copper has a distinct central bulge forming a raised ring within the legend. The die sinking is especially prominent above the mountain scene. Both sides of this splendid, well-centered Vermont copper have smooth surfaces with intermingled chestnut, mahogany, and olive-brown. Listed on page 72 of the 2016 *Guide Book*. Ex: The Eric P. Newman Numismatic Education Society (*Heritage*, 5/2014 as XF40 NGC), lot 30022. NGC ID# 2B56, PCGS# 542

3024 1786 Vermont Copper, VERMONTENSIMUM, VF25 PCGS. RR-8, Bressett 6-E, W-2030, R.4. RR-8 is rarest among the three VERMONTENSIMUM varieties. This steel-gray example is richly detailed for the designated grade. The surfaces are lightly granular and exhibit several small to moderate planchet flaws, as coined. Listed on page 72 of the 2016 *Guide Book*. NGC ID# 2B57, PCGS# 545

3025 1783 Nova Constellation Copper, Pointed Rays, Small US, AU55 PCGS. Crosby 2-B, W-1865, R.2. A walnut-brown Choice AU example from the first year of Nova Constellatio coinage. A few small flan flaws are scattered, but no marks are remotely relevant. The all-seeing eye displays moderate wear. Listed on page 54 of the 2016 *Guide Book*. Population: 14 in 55, 17 finer (3/16). NGC ID# 2AYX, PCGS# 801

**1785 Nova Constellatio Copper
Crosby 2-A, Unc Details**

- 3026** 1785 Nova Constellatio Copper, Pointed Rays, Small Date — Obverse Tooled — NGC Details. Unc. Crosby 2-A, W-1885, High R.4. This is the scarcest 1785 Nova Constellatio variety as enumerated in the Crosby reference. That work, published 140 years ago, remains surprisingly accurate as only one additional variety has been discovered in the intervening years. Slight central weakness is typical of this issue, with trivial tooling evidence on the lustrous light brown surfaces. Listed on page 54 of the 2016 *Guide Book*.

**1787 Fugio Cent, MS63 Brown
N. 11-X, Pointed Rays
Rotated Double Struck**

- 3027** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays — Close Overlap Double Struck — MS63 Brown PCGS. N. 11-X, W-6790, R.4. Substantial mint red illuminates recessed regions, while the open fields and high points are brown. Unabraded, but several minor planchet striations are distributed. The dies rotated slightly counter-clockwise (relative to the obverse) between strikes. The doubling is strongest on the central reverse legends. Listed on page 87 of the 2016 *Guide Book*. NGC ID# AX5E, PCGS# 883

**1787 N. 11-X Fugio Cent, MS64 Brown
STATES UNITED Reverse**

- 3028** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS64 Brown PCGS. N. 11-X, W-6790, R.4. Reverse X was the workhorse die of the Fugio series, mated with seven different obverse dies, and many of those varieties were included in the Bank of New York hoard. As a result, these pieces are often encountered in Mint State grades, and they make excellent type pieces. This example, with extremely heavy obverse clash marks, exhibits lustrous chocolate-brown surfaces and hints of orange mint color. No planchet laminations are evident on either side of this well-made example. Listed on page 87 of the 2016 *Guide Book*. NGC ID# AX5E, PCGS# 883

**Bar Copper, Choice VF
W-8520, Original Circa-1785 Issue**

- 3029** (1785) Bar Copper VF35 PCGS. CAC. Breen-1145, W-8520, R.4. Attractive chestnut-brown patina blankets each side of this Choice VF Bar copper, an iconic colonial-period issue that began appearing in circulation in New York in the mid-1780s. This piece is problem-free and evenly worn. The CAC green label affirms its quality and eye appeal. Listed on page 74 of the 2016 *Guide Book*. Population: 2 in 35, 85 finer (3/16). NGC ID# 2B5J, PCGS# 599

**Undated Bar Copper, XF Details
W-8520, Circa 1785**

- 3030** (1785) Bar Copper — Damage — PCGS Genuine. XF Details. Breen-1145, W-8520, R.4. The Bar copper made its first appearance in print in a 1785 issue of the *New Jersey Gazette*, providing an estimate of its production date. Despite myriad scratches on both sides of this piece, it exhibits lovely golden-tan and olive-brown surfaces. Listed on page 74 of the 2016 *Guide Book*. NGC ID# 2B5J, PCGS# 599

- 3031 WASHINGTON** Washington Liberty & Security Penny MS63 Brown PCGS. Baker-30, W-11050, R.2. The lettered edge variety is presumed, since the green label holder does not allow examination of the edge. This deep mahogany-brown and olive-green example is free from blemishes. The strike is good, although the high-relief curls above the ear show minor blending. Baker-30 is among the many Conder tokens issued in England during the late 18th century. Listed on page 84 of the 2016 *Guide Book*. NGC ID# 2B7V, PCGS# 767

HALF CENTS

1793 C-4, B-4 Half Cent, VG8 Appealing First-Year Type

- 3032 1793 C-4, B-4, Low R.3, VG8 NGC. CAC.** The small 7 in the date and the low L in LIBERTY identify the obverse die, while the reverse diagnostic is the beginning U and ending A in the legend being distant from the stems. This medium-brown Very Good example shows some darker patina around the device edges. LIBERTY and the date are clear on the obverse, and the well-detailed reverse shows all legends readable, although AMERICA is faint. One minor rim bump appears on the reverse. An appealing example of this first-year type. Our EAC grade Good 5. NGC ID# 2222, PCGS# 35012 Base PCGS# 1000

1793 C-4 Half Cent, VF Details Well-Detailed First-Year Type Coin

- 3033 1793 C-4, B-4, Low R.3 — Corrosion — NGC Details. VF.** First-year cents and half cents are always in demand, but pieces with any degree of detail remaining are typically out of reach for budget-restricted collectors. This finely granular, medium brown example may prove to be more affordable. It shows a bold, even strike with little wear. All legends are clear, and the border beading is virtually complete. There is an old mark in the lower-left reverse margin and there are a few small ticks on Liberty's cheek. Our EAC grade VG7.

1794 C-1a, B-1a Half Cent, XF40 High Head, Large Edge Letters

- 3034 1794 Normal Head, C-1a, B-1a, R.3, XF40 PCGS Secure.** Manley Die State 3, the usual die state for the variety. The obverse has the head of Liberty high in the field, distant from the date and close to LIBERTY. Mostly light golden-tan surfaces exhibit splashes of steel and maroon patina. A pleasing piece for a type, date, or variety collector. Our EAC grade VF25. NGC ID# 2223, PCGS# 35018 Base PCGS# 1003

1794 C-1a, B-1a Half Cent, XF45 Head High in the Field

- 3035 1794 Normal Head, C-1a, B-1a, R.3, XF45 NGC.** The only variety usually encountered with Large Edge Letters. This variety has two immediately recognizable characteristics. The first is the doubled date with the original date crowded along the border, and the second date about 50% above the first. The entire bust was entered high in the obverse field, and the top of the head is close to LIBERTY, and the bust line is far above the date. This attractive piece has minor handling marks expected for the grade, with pleasing olive and dark brown surfaces. Our EAC grade VF25. NGC ID# 2223, PCGS# 35018 Base PCGS# 1003

- 3036 1800 C-1, B-1, R.1, AU55 NGC.** Manley Die State 3.0, "very scarce." A deep brown example with satin luster and only a hint of wear on Liberty's shoulder. Mildly granular at the top of the portrait, and the fields exhibit a few thin marks. Certified in a prior generation holder. Our EAC grade XF40. NGC ID# 222B, PCGS# 35119 Base PCGS# 1051

1802 C-2, B-2 Half Cent, Fine 12 Reverse of 1802

- 3037 1802/0 Reverse of 1802, C-2, B-2, R.3, Fine 12 PCGS.** The 1802 half cent is the key issue in a date set of the Draped Bust design issued from 1800 to 1808. The central reverse is typically weak on this example, but the steel-brown surfaces are smoother than normally encountered. Our EAC grade VG7. NGC ID# 222D, PCGS# 35125 Base PCGS# 1057

3038 1804 Spiked Chin, C-8, B-7, R.1, MS61 Brown NGC. Manley Die State 6.0 with the full retained cud joining LIBE and reaching the left top of the R. This is the important late die state, and seldom encountered in Mint State grades. This piece has lovely golden-brown luster with minimal marks aside from a short nick on Liberty's neck. Our EAC grade AU55. NGC ID# 222G, PCGS# 35167 Base PCGS# 1075

3039 1804 Plain 4, No Stems, C-13, B-10, R.1, MS62 Brown NGC. Although the upper leaves on the reverse are flat, this Mint State piece is sharper than most. The lovely light brown surfaces exhibit delicate gold and pale blue overtones. An attractive example for a date collection or copper type set. Our EAC grade MS60. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

3040 1805 No Stems, C-1, B-1, R.1, MS62 Brown NGC. Manley Die State 2.0. The lack of stems allows immediate attribution. A medium brown representative with glimpses of golden-brown in protected areas. A few light marks are apparent near the H in HALF, but this nicely struck example will please most observers. Our EAC grade AU50. NGC ID# 222H, PCGS# 35179 Base PCGS# 1081

3041 1806 Small 6, No Stems, C-1, B-3, R.1, MS61 Brown PCGS. A lovely chocolate-brown and tan example. The coruscating surfaces show only inconsequential contact. No Stems half cents are known dated 1804, 1805, and 1806, all struck from the same uncompleted reverse die. Our EAC grade AU50. NGC ID# 222J, PCGS# 35191 Base PCGS# 1093

3042 1806 Small 6, No Stems, C-1, B-3, R.1, MS63 Brown PCGS. A sharply struck medium brown example of the popular No Stems variety. Highly attractive for the third-party grade. The sole apparent imperfections are minor strike-throughs near the H in HALF, delicate field contact near the chin, and a slight reverse rim nick at 5 o'clock. Encapsulated in a green label holder. Our EAC grade MS60. NGC ID# 222J, PCGS# 35191 Base PCGS# 1093

1809 C-3, B-4 Half Cent, MS65 Brown Early-Intermediate Die State

3043 1809 C-3, B-4, R.1, MS65 Brown NGC. Manley Die State 1.0 or slightly later. Most of the border detail is visible on both sides of this certified Gem, with a faint die crack through the outer points of stars 1 to 4. Splendid chestnut-brown obverse surfaces exhibit hints of lighter tan through the stars, while the reverse is darker brown. Our EAC grade MS60. NGC ID# 222P, PCGS# 35224 Base PCGS# 1123

3044 1809/6 9 Over Inverted 9, C-5, B-5, R.1, MS62 Brown NGC. Manley Die State 3.0. Probably not a true overdate, as it is more likely that the 9 in the date was initially entered inverted. A crisply struck Half Cent with deep mahogany color. Tiny abrasions above UNITED and a few flecks on the left obverse field limit the grade. Seldom encountered in Mint State grades. Our EAC grade AU50. Ex: *Portland Signature (Heritage, 3/2004), lot 26.* NGC ID# 222N, PCGS# 35233 Base PCGS# 1126

3045 1828 12 Stars, C-2, B-3, R.2, MS63 Brown PCGS. Manley Die State 2.0. Deep forest-green and gunmetal toning embraces the portrait and left obverse field. The rest of the coin displays lighter golden-brown and sea-green shades. Satiny and nicely struck. No marks are readily apparent. Our EAC grade AU55. NGC ID# 222W, PCGS# 35264 Base PCGS# 1150

3046 1828 12 Stars, C-2, B-3, R.2, MS63 Brown PCGS. Manley Die State 1.0. An attractive mahogany-brown and olive-green example. Unabraded aside from a small mark behind Liberty's mouth. The Mint engraver neglected to enter star 13, the only such error for a copper denomination. Certified in a green label holder. Our EAC grade AU55. NGC ID# 222W, PCGS# 35264 Base PCGS# 1150

3047 1828 13 Stars, C-3, B-2, R.1, MS64 Brown PCGS. Problem-free surfaces are highly lustrous and somewhat prooflike on the reverse of this medium red-brown piece. One small fleck shows below the F in OF on the reverse. Our EAC grade MS62. Population: 74 in 64 Red and Brown, 5 finer (3/16). Ex: *Long Beach Signature (Heritage, 6/2001), lot 7474.* NGC ID# 222V, PCGS# 35261 Base PCGS# 1147

3048 1828 13 Stars, C-3, B-2, R.1, MS64 Red and Brown NGC. Manley Die State 1.0, "very scarce." Orange-red dominates the reverse, although toning is apparent near the CA in AMERICA. The obverse displays pockets of fire-red. The obverse field and portrait are generally brown. Neither side shows marks. Certified in a former generation holder. Our EAC grade MS63. PCGS# 35262 Base PCGS# 1148

1832 C-2, B-2 Half Cent, MS65 Brown Lustrous, Fully Struck, and Attractive

3049 1832 C-2, B-2, R.1, MS65 Brown PCGS. Manley Die State 1.0. This medium nut-brown Gem shows glossy surfaces with a slight bluish tinge when tilted at an angle to the light. A few scattered ticks show on Liberty's chin, along with a couple of minor dark flecks in the fields, all of little import. A fully struck and lustrous example, quite attractive overall. Our EAC grade MS62. Population: 7 in 65 Brown, 0 finer (2/16). NGC ID# 222Y, PCGS# 35276 Base PCGS# 1159

3050 1833 C-1, B-1, R.1, MS66 Brown NGC. Manley Die State 2.0. The sole dies for the date. A well struck and virtually unabraded golden-brown Premium Gem. Carbon is trivial and requires a loupe to locate. Triple-clashed at the H in HALF, usual for the variety. Encased in a former generation holder. Our EAC grade MS60. NGC ID# 222Z, PCGS# 35282 Base PCGS# 1162

3051 1835 C-1, B-1, R.1, MS64+ Brown PCGS. CAC. Manley Die State 1.0. A sharply struck, unabraded, and coruscating near-Gem. Peach-gold visits the obverse margin and occupies the reverse border. The portrait is olive-brown. Last of the readily collected Classic Head dates. Our EAC grade MS62. NGC ID# 2233, PCGS# 35288 Base PCGS# 1168

1835 C-1, B-1 Half Cent, MS65 Red and Brown
Late State with Clashed Dies

- 3052** 1835 C-1, B-1, R.1, MS65 Red and Brown PCGS. Manley Die State 2.0 with prominent obverse and reverse clash marks. This lovely Gem exhibits about half of the original mint red, here slightly mellowed. Both sides exhibit full cartwheel luster with no marks or spots of any consequence. Our EAC grade MS63. NGC ID# 2233, PCGS# 35289 Base PCGS# 1169

1835 Half Cent, C-1, MS65 Red and Brown
Luminous Surfaces

- 3053** 1835 C-1, B-1, R.1, MS65 Red and Brown PCGS. CAC. Manley Die State 1. This is a sharp, evenly struck Gem Red and Brown 1835 half cent. The surfaces are unabraded and reveal no mentionable carbon spotting. Glowing luster illuminates the fields, revealing blue-tinted burgundy overtones that define the Red and Brown designation. Eye appeal is excellent. Our EAC grade MS63. Population (all varieties included): 25 in 65 Red and Brown, 0 finer (3/16). NGC ID# 2233, PCGS# 35289 Base PCGS# 1169

LARGE CENTS

1793 Chain Cent, S-3, VG10

- 3054** 1793 Chain, AMERICA, S-3, B-4, Low R.3, VG10 ANACS. The Chain cent of 1793 is an iconic must-have for type collectors. Sheldon-3 is an available AMERICA variety. This piece is well-centered on the planchet and evenly worn. Uniform granularity in the fields softens the clarity of the peripheral legends, although the central devices are boldly outlined. Medium brown color characterizes each side. Housed in an old, small size white ANACS holder. Our EAC grade Good 4. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

1793 S-4, B-5 Chain Cent, AG3
Periods Obverse

- 3055** 1793 Chain, AMERICA, Periods, S-4, B-5, R.3, AG3 PCGS. Despite its well-worn state that lacks a visible date, this piece has a fully visible LIBERTY, along with the following period that is sufficient for variety identification. The olive-brown surfaces have traces of greenish patina on both sides with moderate nicks that are expected at this grade level. Our EAC grade Fair 2. NGC ID# 223F, PCGS# 35444 Base PCGS# 91341

1793 Chain Cent, Fine Details
Periods, S-4

- 3056** 1793 Chain, AMERICA, Periods, S-4, B-5, R.3 — Environmental Damage — NGC Details. Fine. The periods after the date and AMERICA are both visible. All legends are bold, and the portrait is well outlined. The sole mentionable mark is a thin line beneath the ICA in AMERICA. The apple-green and lavender surfaces are moderately granular, but acceptable to many collectors. Our EAC grade Good 6.

1793 Wreath Cent, VG8
Medium Brown S-8, B-13 Variety

- 3057** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VG8 PCGS. Medium brown with hints of olive-gray and tan-gold toning. All legends are fully legible except CENT, although many letters and digits are worn near the rim. Each side has a couple of thin marks, none of which distract. Essentially free from verdigris, unusual for the type and grade. Our EAC grade Good 4.
Ex: *Central States Signature* (Heritage, 4/2008), lot 65, which brought \$3,738. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

3058 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — **Rim Damage** — PCGS **Genuine. Good Details.** Several rim disturbances are visible on both sides including a more-severe ding between OF and AMERICA on the reverse. The medium-brown surfaces show porosity and light encrustation in addition to wear that is moderate for the grade. 179 of the date is weak but visible, although the 3 is a ghost. Our EAC grade AG3. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

1793 S-9, B-12 Wreath Cent, XF Details
Horizontal Obverse Stem

3059 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — **Corrosion** — NGC **Details. XF Details.** Each side of this medium olive-brown Wreath cent displays myriad pits over the entire surface. This is the horizontal-stem variety, referring to the stem to the leaf sprig over the date. Our EAC grade Fine 15.

3060 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — **Scratched** — ANACS. **VG8 Details.** Minor scratches cross the center of the reverse, and they are mostly blended into the otherwise smooth olive and medium brown surfaces of this lettered edge Wreath cent. A small obverse rim bruise at 8 o'clock and a few other minor blemishes are evident. The strike is a trifle off-center toward 9 o'clock with border beads in the right obverse field, and AMERICA well away from the reverse border. Our EAC grade AG3. NGC ID# 223J, PCGS# 35477 Base PCGS# 1350

1793 Liberty Cap Cent, AG3
S-13, Rarest First Year Type

3061 1793 Liberty Cap, S-13, B-20, Low R.4, AG3 PCGS. **CAC.** L of LIBERTY almost touches the beads above, while two beads above R and wide spacing at TY help confirm the Sheldon-13 variety. A smoothly worn, chocolate-brown example with partial or full visibility of the devices. A small depression near the right stem on the reverse may be a planchet void, but it is of little importance at this well-worn About Good level. Otherwise, essentially problem-free for the grade. The Liberty Cap design is the scarcest of the three major 1793 cent types. Our EAC grade Fair 2. NGC ID# 223L, PCGS# 35489 Base PCGS# 1359

3062 1794 Head of 1794, S-63, B-37, R.2 — **Rim Damage** — NGC **Details. AU.** Breen Die State II, clashed. The so-called "Fallen 4" variety, which shows the 4 in the date positioned significantly lower than the rest of the numerals. The entire date is recut on this variety. This piece is boldly and evenly struck, with sharp devices and prominent rims. Pleasing chestnut-brown color blankets each side. There are no distractions in the interior, but scattered rim bumps and nicks preclude a numeric grade from NGC. Our EAC grade VF25.

3063 1794 Head of 1794, S-65, B-51, R.1, VF25 PCGS. Breen Die State VI, heavily cracked. Both sides display medium brown surfaces with no environmental damage. Scattered marks are present, and several old scratches appear in Liberty's hair. The central reverse shows weakness from the collapsing die. The obverse is struck minutely off-center toward 12:30. Our EAC grade Fine 15. NGC ID# 223P, PCGS# 35654 Base PCGS# 901374

1795 S-78, B-8 Cent, MS61 Brown
Plain Edge

3064 1795 Plain Edge, S-78, B-8, R.1, MS61 Brown NGC. Breen Die State V, with a small die chip under the jaw, and with the clash marks of earlier states polished away when the dies were resurfaced. This example has attractive chestnut-brown surfaces with trivial marks on each side. Our EAC grade AU50. NGC ID# 223T, PCGS# 35729 Base PCGS# 1380

1796 S-83, B-4 Cent, XF Details
Rotated Double Strike

3065 1796 Liberty Cap, S-83, B-4, R.4 — **Environmental Damage** — PCGS **Genuine. XF Details.** **Double Struck and Rotated in Collar.** This impressive cent has considerable doubled detail on both sides, including two dates on the obverse. Although the surfaces exhibit slight roughness, the overall appearance is excellent, with sharp details on the olive-brown and mahogany surfaces. An important early mint error for the advanced collector. Our EAC grade VF20. PCGS# 35756 Base PCGS# 1392

3066 1796 Reverse of 1795, S-92, B-28, R.3, Fine 15 NGC. This walnut-brown representative has evenly microgranular surfaces, and is unabraded aside from a few faint thin marks on the left obverse field. All legends are readable. UNITED and ONE CENT are bold. The curls behind Liberty's neck are well detailed. NGC ID# 223W, PCGS# 35813 Base PCGS# 1401

**1796 Cent, S-93, VF30
Reverse of 1795**

3067 1796 Reverse of 1795, S-93, B-34, R.3, VF30 NGC. Breen Die State VI, severely cracked around the lower-right portion of the reverse. Corresponding weakness is seen along the upper obverse border, where LIBERTY fades into the rim. The central devices are sharp for the grade, and the surfaces display deep brown color without environmental corrosion. A few stray marks do not hinder the eye appeal. Our EAC grade VF20. NGC ID# 223W, PCGS# 35816 Base PCGS# 1401

3068 1797 Reverse of 1797, Stems, S-126, B-16, R.3, VF20 NGC. Breen Die State V, an early stage. This is a strikingly problem-free midgrade example with a bold, even, well-centered strike and light high-point wear. Full dentils surround the borders, and the obverse portrait is boldly defined. There is no environmental damage, although a loupe reveals a couple of old, hair-thin lines in the left obverse field. The fields have deep brown color that contrasts with the lighter chestnut hue of the relief elements. Our EAC grade VF20. NGC ID# 2242, PCGS# 35918 Base PCGS# 1422

**1799 S-189 Cent, Good 4
Evenly Worn With Pleasing Color**

3069 1799 S-189, B-3, R.2, Good 4 PCGS. Sheldon-189 is the most frequently seen of the three 1799 larger cent varieties, and most representatives are well-worn, as is the present piece. The budget-conscious collector will consider this piece as a representative of this elusive date. Wear is even over deep chocolate-brown surfaces. The rims are indistinct around much of each side, but all legends are readable, and the central devices are bold. Scattered small marks are not unusual for the grade and issue. Our EAC grade AG3. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

3070 1800 S-197, B-12, R.1, VF30 PCGS. Breen Die State II. The distinctive "Q" variety with die chips at the date and a tornado-shaped break between the IB in LIBERTY. An evenly microgranular steel-gray example. Abrasions are minor overall, though a light diagonal line passes near the eye and a narrow mark is concealed in the hair below the ribbon. Our EAC grade Fine 12. NGC ID# 2248, PCGS# 36179 Base PCGS# 1449

3071 1800 S-203, B-29, R.3 PCGS Genuine. Breen Die State III. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a AU specimen that has been corroded. Strong die clashing at TES of STATES and areas of light corrosion on both sides are visible, yet the deep-brown surfaces are otherwise smooth and well-defined. Our EAC grade VF20. NGC ID# 2248, PCGS# 36197 Base PCGS# 1449

3072 1801 S-213, B-1, R.2, XF40 PCGS Secure. Breen Die State VIII. Four parallel and heavy die cracks on the upper right obverse identify S-213. This medium brown example displays luster throughout Liberty's well-defined curls. A lens reveals scattered moderate marks and a couple of small spots. Our EAC grade VF20. NGC ID# 224B, PCGS# 36236 Base PCGS# 1458

**1802 S-237, B-10 Cent, MS62 Brown
Likely Condition Census**

3073 1802 S-237, B-10, R.2, MS62 Brown PCGS. The reverse has an arcing die crack from the N of UNITED to the lower left branch of the wreath and the bottom of the ribbon bows. This lovely cent has lustrous olive-brown surfaces with traces of orange color on the reverse. Del Bland records two AU55 examples that are tied for fifth place in his Condition Census. Our EAC grade AU55. NGC ID# 224E, PCGS# 36320 Base PCGS# 1470

**1803 Small Date Cent, AU50
S-245, Small Fraction**

3074 1803 Small Date, Small Fraction, S-245, B-2, R.3, AU50 PCGS. Breen Die State II. Heavy clash marks below the chin and a die line from the left wreath stem help identify the Sheldon marriage. A smooth medium brown representative. The legends and curls shimmer with luster, and the eye appeal is excellent for the third party grade. Our EAC grade XF40. NGC ID# 224G, PCGS# 36353 Base PCGS# 1482

**1804 S-266 Large Cent, VG8
Collector-Grade Example**

3075 1804 S-266, B-1, R.2, VG8 PCGS. CAC. The popular key-date 1804 large cent in the usually seen Breen Die State IV, exhibiting large die cuds above RTY on the obverse and MERIC on the reverse. The surfaces show deep, consistent mahogany color, and a few marks and ticks on the obverse are not out of character with the grade. The tops of ITED STATES are faint but legible. This is a great collector-grade example of this issue, certified in a green-label holder with the CAC green bean. Our EAC grade Good 6. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

3076 1804 S-266c, B-1, R.2 — Environmental Damage — NGC Details. Fine. Breen Die State IV. Cuds above RTY and MERI confirm the late die state. The sole dies for this widely pursued key date. A deep brown example with evenly granular surfaces. STATES OF is faint but the other legends are bold. Our EAC grade Good 5.

3077 1804 Restrike MS64 Brown NGC. Breen Die State II. Privately made circa-1860 from severely rusted but genuine dies sold as scrap metal by the U.S. Mint. The obverse is that of S-261 with the date altered on the die from 1803 to 1804. The reverse previously coined 1820 N-12. A lustrous and well preserved golden-brown example with the usual bold die breaks on the lower left obverse. In a former generation holder. Our EAC grade MS60. NGC ID# 224J, PCGS# 45344

3078 1810/09 S-281, B-1, R.1, XF40 NGC. The sole overdated 1810 Sheldon variety. The outline of the underdigit 0 and the base of the 9 are obvious. Toned rich gunmetal-blue with glimpses of golden-brown in design recesses. Traces of luster are prevalent and there are no distracting marks. Our EAC grade VF30. NGC ID# 224T, PCGS# 36469 Base PCGS# 1552

**1810 S-285 Cent, XF45+
Partial Luster, Late Die State**

3079 1810 S-285, B-2, R.2, XF45+ NGC. Breen Die State III. This chocolate-brown Classic type coin exhibits considerable satin luster, although the curls and leaves display moderate wear. Marks are absent, and a small obverse rim flaw at 2:30 provides the sole identifier. Struck from late-in-life dies, with an orange-peel texture (as coined) throughout the fields. Our EAC grade VF30. NGC ID# 224S, PCGS# 36484 Base PCGS# 1549

**1812 Cent, MS61 Brown
Small Date, S-288, B-3**

3080 1812 Large Date, S-288, B-3, R.2, MS61 Brown NGC. Breen Die State II. The Large Date is defined by the 8 in the date, which is the script 8 style (thick center stroke) as opposed to the Small Date that features a block 8. LIB of LIBERTY is noticeably repunched. The strike is incomplete on some of the star centers and on certain high points of Liberty's hair. The lack of dentils and merging of a few letters into the rim is a function of die state rather than weakness of strike. Attractive deep, chocolate-brown surfaces are generally smooth and unbothered, although a short scrape is noted through UNI of UNITED. Our EAC grade XF40. NGC ID# 224W, PCGS# 36505 Base PCGS# 1564

3081 1812 Small Date, S-290, B-2, R.1, VF35 PCGS. Breen Die State III with clash marks inside the wreath and the tops of TES OF merged into the border. Lovely light brown surfaces exhibits splashes of reddish-tan and minor verdigris on the reverse. Our EAC grade VF20. NGC ID# 224W, PCGS# 36499 Base PCGS# 1561

1813 S-292 Cent, MS62 Brown

3082 1813 S-292, B-2, R.2, MS62 Brown PCGS. Breen Die State V. An unabraded ebony-brown Classic Head type coin. The coruscating surfaces are flowlined due to the late die state. The obverse is lightly granular near stars 4 and 11. The reverse is moderately granular. The strike is intricate on the major devices. Our EAC grade AU55. NGC ID# 224X, PCGS# 36511 Base PCGS# 1570

3083 1818 N-10, R.1, MS65 Brown NGC. CAC. Die cracks connect all the stars on this plentiful die marriage that was a significant component of the Randall Hoard of 1816 to 1820 large cents. This example is has flashy cartwheel luster on beautiful medium brown surfaces with trivial splashes of steel toning. Our EAC grade MS62. NGC ID# 2253, PCGS# 36628 Base PCGS# 1600

3084 1820 Large Date, N-13, R.1, MS64 Brown NGC. The central detail is incredibly bold on this Choice Mint State 1820 large cent, a coin formerly in the famed Gene Gardner Collection. Both sides show full cartwheel luster beneath splendid greenish golden-brown toning. A series of die cracks connecting all of the stars is the hallmark of the 1820 N-13 Randall Hoard cent. This is the ideal issue for type collectors seeking a single Coronet Head large cent. Our EAC grade MS60.

Ex: Bowers and Merena (6/1996), lot 135; Gene Gardner; Gardner Collection, Part III (Heritage, 5/2015), lot 98031, which brought \$1,410. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

3085 1820 Large Date, N-13, R.1, MS64 Brown PCGS. CAC. A satiny walnut-brown Choice representative. The stars show incompleteness but the portrait and wreath are well impressed. Marks are limited to a tick on the cheekbone. N-13 is prevalent in nice Mint State courtesy of the Randall Hoard. Our EAC grade AU55. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

3086 1820 Large Date, N-13, R.1, MS65 Red and Brown PCGS. CAC. Both sides display ample orange-red, although the high points and open fields are gunmetal-gray. Lustrous and spot-free with only incidental marks. The 1820 N-13 is the most encountered Randall Hoard variety, in demand as a high grade representative of the Matron Head design. Our EAC grade MS62. NGC ID# 2256, PCGS# 36674 Base PCGS# 1616

1821 N-2 Cent, AU58
Glossy Surfaces

- 3087 1821 N-2, R.1, AU58 PCGS.** The 1821 is a better date in high grade. This near-Mint example retains some luster in the fields amid glossy, burgundy-brown patina overall. The strike is bold and even, and most stars are well-defined. A brush of friction over the high points of the portrait and wreath precludes Mint State classification, while a lone hit on Liberty's neck and scattered hairlines in the fields are the only mentionable imperfections. Our EAC grade AU50. NGC ID# 2258, PCGS# 36709 Base PCGS# 1621

1826 N-5 Cent, MS64 Brown
Intermediate Die State

- 3088 1826 N-5, R.2, MS64 Brown PCGS. CAC.** This intermediate die state has intermittent rim crumbling over stars 5 through 7. The variety is relatively plentiful, but it is usually encountered in lower grades. This impressive piece has frosty brown surfaces, full cartwheel luster, tinges of mint red, and pale blue overtones. Our EAC grade MS62. NGC ID# 225G, PCGS# 36823 Base PCGS# 1645
- 3089 1837 Plain Cords, Medium Letters, N-7, N-8, R.1, MS65 Brown PCGS.** A lengthy die crack runs from the left reverse rim through STATES to the center OF, to the rim over A. Elsewhere, a bold dot between EN of CENT is diagnostic. The lack of die scratches above MERIC suggest the N-7 designation, a late state of the dies. Delightful chestnut-brown color covers both sides of this glossy Gem, which is sharply struck with excellent eye appeal. Our EAC grade MS60. NGC ID# 225U, PCGS# 37162 Base PCGS# 1735
- 3090 1839 Petite Head of 1840, N-8, R.1, MS63 Brown PCGS.** A first-year type coin, with beaded hair cords on Liberty's bun and the shoulder surrounded by small curls. The point of the bust sits over the 8 in the date. The N-8 variety is the sole representative of the Head of 1840 for the year, representing Christian Gobrecht's new design. This Select Uncirculated example is smooth and glossy cent with deep chocolate-brown toning and only nominal marks. Sharp and attractive. Our EAC grade AU55. Population: 8 in 63 Brown, 22 finer (3/16). NGC ID# 2265, PCGS# 37265 Base PCGS# 1817
- 3091 1839 Silly Head, N-9, R.2, MS62 Brown PCGS.** A late die state with obverse rim breaks. N-9 is best attributed by the bisecting die crack across the portrait. This medium brown example has smooth surfaces and good luster. A retained lamination (as made) at the forehead. Our EAC grade AU55. NGC ID# 225Y, PCGS# 37234 Base PCGS# 1748

- 3092 1843 Petite Head, Small Letters, N-11, R.2, MS64 Brown PCGS. CAC.** Grellman Die State d. The bisecting reverse crack between 4 and 10 o'clock confirms the Newcomb variety. An exemplary chocolate-brown near-Gem. The strike is bold, and marks are chiefly confined to a small tick on Liberty's nose. Our EAC grade MS60. PCGS# 405860 Base PCGS# 1844

1846 N-1 Small Date Cent, MS64 Red and Brown
Intermediate Die State

- 3093 1846 Small Date, N-1, R.1, MS64 Red and Brown PCGS. CAC.** Grellman Die State c, with extensive obverse and reverse die cracks through the peripheral devices. This splendid piece exhibits considerable light orange mint luster, interspersed with olive-brown and pale blue patina. Our EAC grade MS63. PCGS# 397609
- 3094 1846 Small Date, N-8, R.1, MS65 Brown PCGS. CAC.** Grellman Die State a. The heavy date and parallel die lines beneath the chin allow ready attribution. A chocolate-brown Gem with myriad glimpses of mint Red lingering in design crevices. Marks are nearly absent. The strike is generally good, though the shoulder curl and the opposite portion of the wreath are incomplete. Our EAC grade MS62. PCGS# 403874 Base PCGS# 1865
- 3095 1846 Tall Date, N-12, R.1, MS63 Brown PCGS.** Grellman Die State b. Plentiful pockets of Red outline the wreath and reverse letters, but the remainder of this satiny example is olive-green with hints of golden-brown. Some of the stars are softly defined. A loupe shows only trivial marks and carbon. Our EAC grade MS60. NGC ID# 226C, PCGS# 403886 Base PCGS# 1871
- 3096 1850 N-7, R.2, MS65+ Red and Brown PCGS. CAC.** Grellman Die State b. The date position is the best method to attribute N-7, although the tiny die lump below the jaw can be seen on the present Gem. Fire-red outlines the stars and letters, while the high points and open fields are Brown. Marks are absent and carbon is relatively minor. Our EAC grade MS62. NGC ID# 226G, PCGS# 405881 Base PCGS# 1890
- 3097 1853 N-13, R.1, MS64 Red PCGS.** Grellman Die State b. STATES has low relief due to a rising nearby field. The base of the 1 is repunched. Splendid pumpkin-gold luster dominates both sides of this high grade cent. Marks are minimal though we note a spot above the right top of the E in STATES. Housed in a first-generation PCGS holder. Our EAC grade MS65.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 231; Adam Mervis Collection (Heritage, 1/2014), lot 2367, which realized \$2,232.50. PCGS# 403930 Base PCGS# 1903
- 3098 1853 N-16, R.1, MS66 Brown PCGS.** Grellman Die State a. A high grade sea-green Premium Gem. Fully struck and semiprooflike with a pristine reverse and delicate contact on the portrait. The surfaces have a slight matte texture, as made. Certified in a green label holder. Our EAC grade MS62. PCGS# 406015 Base PCGS# 1901
- 3099 1853 N-25, R.1, MS65 Red and Brown PCGS.** Die State b, as usual — likely among the many Mint State coins that originated in a large hoard. This piece has sharp central devices but shows weakness on the peripheral stars. Rich copper-red luster glows in the fields, accented by soft auburn overtones. A few tiny specks appear around the first S in STATES. Our EAC grade MS64. NGC ID# 226K, PCGS# 403926 Base PCGS# 1902

**1853 Cent, N-25, MS65+ Red
Outstanding Original Luster**

3100 1853 N-25, R.1, MS65+ Red PCGS. Newcomb-25 is the most frequently encountered 1853 large cent variety. Die markers include a die gouge in the dentils between stars 1 and 2, and a horizontal line beneath the base of the 1 in the date. This high-end Red Gem displays bold interior motifs with weakness on the stars and dentils. The surfaces have excellent coppery-red frost and are unabraded. Faint, scattered pepper specks are not bothersome. Our EAC grade MS65. Population (all varieties included): 67 in 65 (2 in 65+) Red, 15 finer (3/16). NGC ID# 226K, PCGS# 403925 Base PCGS# 1903

3101 1856 Upright 5, N-7, R.2, MS65 Red and Brown PCGS. CAC. Grellman Die State b. This impressive piece exhibits about one-third original red with lovely bluish overtones on its lustrous brown surfaces. This is only the fifth example of this variety that we have handled in certified MS65 or finer grades, and the first of those designated Red and Brown. Our EAC grade MS63. PCGS# 406183 Base PCGS# 1920

3102 1857 Large Date, N-1, R.1, MS64 Red and Brown PCGS. CAC. Grellman Die State a. The obverse is principally brick-red, and the reverse is Red and Brown with gunmetal-blue freckles on the right margin. Satiny and unabraded. Well struck except on the last few stars. Our EAC grade MS62. NGC ID# 226P, PCGS# 389635 Base PCGS# 1929

3103 1857 Small Date, N-4, R.1, MS63 Red and Brown PCGS. CAC. Grellman Die State a, "scarce." Fire-red outlines the letters, stars, and wreath. The high points and open fields are steel-gray. The stars show softness but the major motifs are nicely struck. An impressive example from the twilight of the large cent. Our EAC grade MS62. PCGS# 403970 Base PCGS# 1932

TWO CENT PIECES

3104 1864 Small Motto, FS-401 (formerly FS-000.5), MS65 Brown NGC. After the key-date 1872, the 1864 Small Motto two cent piece is the only true stopper in the series. This piece is sharp and satiny. Burgundy, amber, brown, and olive hues encompass each side. The reverse die is shattered, showing a network of thin cracks throughout the margins. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

1864 Small Motto Two Cent, MS64 Red

3105 1864 Small Motto, FS-401, MS64 Red PCGS. The Small Motto is the scarcer of the two *Guide Book* varieties for this popular first-year two cent issue. The lustrous surfaces of this attractive Choice coin are a light golden-tan. A few flecks are scattered about, the most noticeable being located in the lower right part of the shield; still, a pleasing piece. Population: 17 in 64 (1 in 64+) Red, 23 finer (3/16). PCGS# 38234 Base PCGS# 3581

**1864 Small Motto Two Cent
MS64+ Red, Bold Strike**

3106 1864 Small Motto, FS-401, MS64+ Red PCGS Secure. A fire-red near-Gem with blushes of olive-green across the fields and glimpses of lilac on the high points. Crisply struck and lustrous with minimal contact and one small spot northwest of the large 2. The initial Small Motto subtype was promptly replaced by its Large Motto successor. PCGS# 38234 Base PCGS# 3581

**1864 Large Motto Two Cent, MS66+
Sole Finest Red and Brown Coin at PCGS**

3107 1864 Large Motto MS66+ Red and Brown PCGS. CAC. This Plus-graded, CAC-endorsed 1864 Large Motto two cent piece is the single finest Red and Brown coin at PCGS. The strike is full, and the preservation is superb. Rich coppery-orange luster glows beneath a dusting of burgundy and auburn toning. The cartwheel effect is mesmerizing. Population: 20 in 66 (1 in 66+) Red and Brown, 0 finer; CAC: 18 in 66, 0 finer (3/16). NGC ID# 22N9, PCGS# 3577

3108 1864 Large Motto MS65 Red PCGS. This Gem Red Large Motto 1864 two cent piece displays vibrant, frosty copper-pink luster and sharp design elements. Scattered small specks are particularly bothersome. The obverse was struck minutely off-centered toward 9 o'clock, making that rim unusually wide and the 3 o'clock rim nearly nonexistent. NGC ID# 22N9, PCGS# 3578

- 3109 1864 Large Motto MS65 Red PCGS.** An attractive Gem Red example of the more available Large Motto two cent variant of 1864, this well-detailed coin displays lustrous original red surfaces with only minor signs of contact. No carbon appears anywhere, creating excellent eye appeal in conjunction with the bold strike and good color.
Ex: New York Signature (Heritage, 11/2013), lot 3147. NGC ID# 22N9, PCGS# 3578

- 3110 1864 Large Motto MS65 Red PCGS. CAC. KF-L22-TPD.** The date is lightly repunched north, a variety listed in the Kevin Flynn reference to the series but absent from the *Cherrypickers' Guide*. This well struck Gem is lustrous and virtually void of marks. The peach and lemon surfaces display only minor carbon along with infrequent tiny ocean-blue freckles. NGC ID# 22N9, PCGS# 3578

**1865 Two Cent, MS66 Red
Tied for the Finest Certified**

- 3111 1865 Plain 5 MS66 Red PCGS.** Plain 5. The 18 in the date is repunched north. Well struck except for the second A in AMERICA. The bright copper-gold surfaces are lustrous and essentially free from carbon. Seemingly pristine aside from trivial contact near the upper portion of the second vertical shield stripe. A great type coin that boasts fully Red surfaces. Population: 2 in 66 Red, 0 finer (3/16). PCGS# 38249 Base PCGS# 3584

- 3112 1865 Fancy 5 MS66 Red and Brown PCGS.** This Fancy 5 1865 two cent piece is boldly struck with satin luster that combines auburn-brown and copper-orange hues. A heavy retained cud appears at the upper-right obverse border. Free of bothersome abrasions and tied for the finest Fancy 5 at PCGS. Population: 2 in 66 Red and Brown, 0 finer (3/16). NGC ID# 8HFV, PCGS# 38257 Base PCGS# 3583

- 3113 1865 Fancy 5 MS66 Red and Brown NGC.** Splendid apple-green and plum-red shades invigorate this coruscating and crisply struck Premium Gem. Study beneath a lens fails to locate any marks or spots. Certified in a prior generation holder. NGC ID# 8HFV, PCGS# 38257 Base PCGS# 3583

**1865 Two Cent Piece, MS66 Red
Strong Registry Set Contender**

- 3114 1865 Fancy 5 MS66 Red PCGS.** A spectacular Premium Gem from the second year of the denomination, this remarkable piece exhibits sharply detailed design elements, with a few spidery die cracks in the lower obverse field. The original red surfaces are impeccably preserved and radiate vibrant mint luster. Population: 2 in 66 Red, 1 finer (3/16). NGC ID# 22NA, PCGS# 38258 Base PCGS# 3584

**1866 Two Cent Piece, MS66 Red
Unmellowed Surfaces**

- 3115 1866 MS66 Red PCGS. CAC.** This lustrous peach-gold Premium Gem Red 1866 two cent piece exhibits sharply struck motifs and is devoid of mentionable abrasions. With a loupe, the determined observer can detect the infrequent tiny carbon fleck, but none are obtrusive. An exemplary, frosty coin overall, housed in an old green-label holder.

The first two years of the two cent piece saw hefty mintages (nearly 20 million in 1864 and more than 13 million in 1865), largely resulting from the Civil War coin shortage. After the war, fewer banks called for this denomination and mintages began to dwindle. Slightly more than 3.1 million pieces were coined in 1866, and this issue is scarce in full Red condition today.

Ex: Dallas Signature (Heritage, 10/2006), lot 373; FUN Signature (Heritage, 1/2011), lot 5450; purchased from Legend Numismatics (2/2011); Eugene H. Gardner (Heritage, 5/2015), lot 98093. NGC ID# 274R, PCGS# 3590

**1867 Two Cent, MS65 Red
Flowing Orange-Red Luster**

- 3116 1867 MS65 Red PCGS.** Flowing orange-red luster glows like molten lava on this fiery Gem Red two cent piece. The lighter colors occupy the fields, complementing reddish devices that veer only momentarily out of Red territory on a couple of high points on the left-side obverse. A boldly struck and essentially unimprovable specimen of this early date. Population: 25 in 65 (2 in 65+) Red, 1 finer (3/16). NGC ID# 22NB, PCGS# 3593

**1867 Two Cent Piece, MS64 Red and Brown
Sought-After *Guide Book* Doubled Die Obverse**

- 3117 1867 Doubled Die Obverse MS64 Red and Brown PCGS. FS-101.** An attractive Choice example of the strongest doubled die in the two cent series, this specimen shows dramatic doubling on many obverse design elements, especially the letters in the motto IN GOD WE TRUST. The original red surfaces of this specimen have mellowed to light brown in some areas, but only minor signs of contact are evident. Vibrant mint luster complements the well-detailed design elements. Population: 9 in 64 Red and Brown, 1 finer (3/16). NGC ID# 22NB, PCGS# 3595

1868 Two Cent, Well-Preserved MS66 Red

- 3118 1868 MS66 Red PCGS.** Although the 1868 two cent issue is a plentiful one of more than 2.8 million circulation strikes from early in the series' history, precious few survive so fine as the present Premium Gem Red example. PCGS reports only a half-dozen submissions at this grade level and none finer (3/16). A lustrous glow emits from both sides amid golden-orange fields with reddish-orange device high points. A few trivial flecks are confined to the reverse. The left ribbon border enclosing IN GOD is weak, likely from die lapping. NGC ID# 22NC, PCGS# 3599

**1869 Two Cent, MS65 Red
Conditionally Scarce**

- 3119 1869 MS65 Red PCGS.** The obverse of this piece is a ruddy tan-orange with somewhat muted luster while the reverse is a lighter (and brighter) orange-gold. Some of the letters in IN GOD WE TRUST are indistinctly struck up, and a single small fleck appears in the central reverse. The other details are well-impressed. There are few survivors in finer grades. Population: 27 in 65 (1 in 65+) Red, 3 finer (3/16). NGC ID# 22ND, PCGS# 3605

**1870 Two Cent Piece, MS65 Red
None Numerically Finer at PCGS or NGC**

- 3120 1870 MS65 Red PCGS.** This is an exceptional example of this late-series entry in the two cent series. PCGS shows only 15 submissions in this grade and none are finer — not even a single Plus coin — and NGC shows eight with none finer (4/14). This lovely Gem Red example exhibits appealing golden-orange color along with strong luster and a pleasing wealth of design definition. Ex: *Stack's* (10/2007), lot 4779; *Eugene H. Gardner* (*Heritage*, 6/2014), lot 30104. NGC ID# 22NE, PCGS# 3608

**1871 Two Cent Piece, MS65 Red
One Numerically Finer at PCGS**

- 3121 1871 MS65 Red PCGS.** The popularity of the two cent piece was definitely in decline in 1871, as evidenced by the modest mintage of 721,250 pieces. This impressive Gem offers well-preserved original red surfaces, with vibrant mint luster and sharply detailed design elements. Some interesting die cracks are evident in the legends on the reverse. Population: 15 in 65 (1 in 65+) Red, 1 finer (3/16). NGC ID# 22NE, PCGS# 3611

**1872 Two Cent Piece, MS62 Brown
Only 65,000 Pieces Struck for Circulation**

- 3122 1872 MS62 Brown PCGS.** The mintage of circulation-strike two cent pieces consistently dwindled each year, until by 1872 only 65,000 coins were struck. Proofs are much easier to locate than higher grade business strikes of this date. This is an unquestioned business strike. The fields do not show any of the reflectivity expected from a proof. The strike details are well-defined, and there is a noticeable reddish glow beneath the brown patina that covers each side. A shallow planchet flaw can be seen on the right (facing) side of the shield. Population: 10 in 62 Brown, 34 finer (3/16). NGC ID# 22NG, PCGS# 3612

**1872 Two Cent, MS64 Red and Brown
Doubled Die Obverse, FS-101**

- 3123** 1872 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. The doubled die adds value to an already scarce and exciting coin. Luminous surfaces are primarily light copper-orange at the outer zones, although the interiors show a degree of mellowing toward mahogany and sea-green. A scarce variety, with the doubling visible at the upper portion of the obverse, increasing in spread from left to right most obviously at the Motto. Population (for the variety): 3 in 64 Red and Brown, 3 finer (3/16). NGC ID# 22NG, PCGS# 38293 Base PCGS# 3613

**1872 FS-101 Two Cent Piece
MS65 Red and Brown
Doubled Die Obverse**

- 3124** 1872 Doubled Die Obverse, FS-101, MS65 Red and Brown PCGS. TRUST is die doubled toward the rim. Given the low business mintage of 65,000 pieces, much of the mintage may be the present *Cherrypickers'* variety. Splendid orange-gold, lilac-red, and apple-green toning graces this coruscating and unabraded Gem. Only infrequent and minute obverse carbon limits the grade. NGC ID# 22NG, PCGS# 38293 Base PCGS# 3613

PROOF TWO CENT PIECES

**1864 Two Cent, PR65 Red and Brown
Sharp Large Motto Proof**

- 3125** 1864 Large Motto PR65 Red and Brown PCGS. CAC. Most proof 1864 two cent pieces feature the Large Motto obverse. This Gem Red and Brown example is conditionally elusive and boasts the seldom seen CAC endorsement. The strike is tack-sharp, and the frosty design elements are set against highly reflective fields. Much of each side is copper-orange, although burgundy overtones in select areas define the Red and Brown designation. Both sides show considerable cameo contrast. Population: 39 in 65 Red and Brown, 12 finer; CAC: 19 in 65, 4 finer (3/16). NGC ID# 274T, PCGS# 3622

**1864 Large Motto Two Cent, PR64 Red
Attractive Color, Green Label Holder**

- 3126** 1864 Large Motto PR64 Red PCGS. Cherry-red and copper-orange hues blend over each side of this Choice Red proof Large Motto 1864 two cent piece. The strike is razor-sharp, and the fields are deeply reflective. A few small specks are not detracting. This first-year proof is rare in the upper Red grade range. The present coin is housed in a green label holder. Population: 5 in 64 Red, 17 finer (3/16). NGC ID# 274T, PCGS# 3623
- 3127** 1865 PR64 Red and Brown PCGS. Plain 5. Exquisite lime-green and butter-gold toning endows this fully struck and flashy Choice proof. A lens reveals minor carbon and a small strike-through (as issued) above the C in CENTS. Encapsulated in an old green label holder. NGC ID# 274U, PCGS# 3628

**1866 Two Cent, PR65 Red Cameo
Flashy and Contrasted**

- 3128 1866 PR65 Red Cameo PCGS.** This Gem features woodgrain toning over copper-gold surfaces that have a surprising degree of flash in the fields and contrast. A couple of microscopic contact marks are apparent under a glass. Minor proof coin mintages went unrecorded until 1873, but it is estimated that 725 proof two cent pieces were struck in 1866. Specimens are accessible in most grades and across color designations, but Cameo examples will give even well-heeled specialists a run for their money. PCGS reports nine Red Cameo submissions between PR64 and PR66, and no Red Deep Cameo proofs. Population: 3 in 65 Red Cameo, 4 finer (3/16). NGC ID# 274V, PCGS# 83632

- 3129 1867 PR65 Red and Brown PCGS. CAC.** A razor-sharp Red and Brown proof with reflective fields and unmarked surfaces. Each side has a tan-gold appearance. The 1867 proof two cent has a recorded mintage of 625 pieces that were distributed as part of silver proof sets, although an unknown number of additional pieces were sold in minor proof sets, which were not necessitated by law to be recorded. Population: 53 in 65 (1 in 65+) Red and Brown, 9 finer (3/16). NGC ID# 274W, PCGS# 3634

- 3130 1868 PR65 Red and Brown NGC.** An attractive Gem proof, this piece exhibits subdued mint red on both sides, tending toward delicate lilac. An impressive piece with sharp details and good eye appeal. Census: 39 in 65 Red and Brown, 28 finer (3/16). NGC ID# 274X, PCGS# 3637

**1868 Two Cent, PR66 Red
Original Red Surfaces**

- 3131 1868 PR66 Red NGC.** The Mint reportedly struck 600 or so two cent proofs in 1868. Breen wrote in 1988: "Proofs have serif of D restored by hand to working rev.; ornament below WE weak." Blushes of rose-violet accent the copper-orange surfaces of this Premium Gem proof. Each side is seemingly pristine, and the devices are predictably pinpoint-sharp, save for the previously mentioned softness on the ornament. Minimal carbon appears on the reverse. Census: 7 in 66 Red, 2 finer (3/16). NGC ID# 274X, PCGS# 3638

- 3132 1871 PR66 Red and Brown PCGS. CAC.** Die doubling is strongest on the motto, a characteristic of all proof 1871 two cent pieces and most easily seen on TRUST. Areas of red are prominent on the obverse with blue overtones on the shield and leaves. The reverse is two-toned with red and blue toning in equal measure, the blue strongest at the center, while red rules the margins. A nicely reflective proof, CAC endorsed, tied for finest at PCGS. Population: 19 in 66 Red and Brown, 0 finer (3/16). NGC ID# 22NH, PCGS# 3646

**1871 Two Cent, PR66 Red and Brown
Wonderfully Preserved and Flashy**

- 3133 1871 FS-102, PR66 Red and Brown PCGS. CAC.** Die doubled obverse, as usual. Walter Breen's *Complete Encyclopedia* explains that a new hub was introduced in 1871 with smaller berries distinct from the stems, a redesigned ornament, and repositioned motto letters. Splashes of gunmetal-blue and cherry-red accent the golden-amber color that dominates each side. Wonderfully preserved and flashy. From a mintage of 960 proofs. Population: 19 in 66 Red and Brown, 0 finer (3/16). NGC ID# 22NH, PCGS# 3646

- 3134 1872 PR66 Red and Brown PCGS.** Due to the rarity of high-end circulation strikes, many collectors acquire proof 1872 two cent pieces for their date sets. This Premium Gem Red and Brown proof displays sharp motifs and mirrored fields, but the primary visual attribute is vivid plum, violet, tangerine, and electric-blue toning that engulfs each side. NGC ID# 2752, PCGS# 3649

THREE CENT SILVER

- 3135 1851-O MS64 PCGS.** This is a great collector-grade example of this outlier three cent issue, the sole New Orleans strike in the entire series. Appealing russet rim patina complements silver centers on well-struck surfaces that are equally free of clash marks and other distractions. Gem examples of this date are considerably more expensive, although available. NGC ID# 22YY, PCGS# 3665

- 3136 1851-O MS64 PCGS.** The surfaces of this near-Gem are incredibly lustrous and untuned silver-white with a satiny texture and abundant eye appeal. A few tiny contact marks appear only under magnification and do nothing to defeat the eye appeal. The 1851-O is extremely popular as a one-off issue, the sole New Orleans entry in the three cent silvers.
Ex: FUN Signature (Heritage, 1/2015), lot 9390, which brought \$1,469. NGC ID# 22YY, PCGS# 3665

**1853 Silver Three Cent, MS67
Exceptional Preservation**

- 3137 1853 MS67 NGC. CAC.** The 1853 is the final Type One silver three cent issue and is the scarcest of the three Philadelphia Type One productions in Superb Gem condition. This piece is among the finest certified. Well-struck from worn dies with frosty silver luster. A tinge of iridescence is seen on the upper-right obverse. Census: 12 in 67 (1 in 67+), 0 finer (2/16). NGC ID# 22Z2, PCGS# 3667

- 3138 1854 Repunched Date, FS-301, MS65 PCGS. CAC.** Remnants of a secondary 8 and 5 are visible far west of the primary digits, and the 4 is recut north. Radial die cracks near O in OF and M of AMERICA are typical of this FS-301 repunched date variety, the most dramatic of the entire three cent silver series. Golden overtones alternate with lilac shades. CAC endorsed and seldom seen finer regardless of the variety. PCGS reports just 12 finer coins for the 1854 issue (3/16). NGC ID# 4JNT, PCGS# 38579 Base PCGS# 3670

**1857 Silver Three Cent, MS66
Conditionally Rare**

- 3139 1857 MS66 PCGS. CAC.** Struck from clashed and lapped dies, this Premium Gem 1857 silver three cent piece displays minor weakness on the obverse shield and reverse stars. Nonetheless, the surfaces are well-preserved and display frosty luster. The obverse is brilliant, and the reverse has soft olive and lavender-gold toning. This issue is occasionally seen in Gem condition, but MS66 and finer coins are rare. Population: 12 in 66 (1 in 66+), 2 finer; CAC: 8 in 66, 1 finer (3/16). NGC ID# 22Z6, PCGS# 3673

**1857 Three Cent Silver, MS66
Vivid Multicolor Patina**

- 3140 1857 MS66 PCGS. CAC.** A melange of lime-green, lavender-gray, blue, and russet patina resides over the lustrous surfaces of this Premium Gem. The shield and the two star outlines exhibit strong definition, although UNIT, the lower date digits, and some of the reverse star centers are a touch soft. Uneven strikes are a typical characteristic of the Type Two design type. Carefully preserved. Population: 12 in 66 (1 in 66+), 2 finer (3/16).
Ex: *Rarities Sale (Bowers and Merena, 8/1998)*, lot 55; *Eugene H. Gardner Collection, Part IV (Heritage, 10/2015)*, as MS66 NGC with CAC approval, lot 98044. NGC ID# 22Z6, PCGS# 3673

- 3141 1859 MS66 PCGS. CAC.** The 1859 begins a downward trend in three cent silver production that ends in a proof-only issue at the series' end in 1873. From a mintage of 364,200 coins, this CAC-endorsed Premium Gem is conditionally scarce. Some strike weakness is seen on the central shield high points, but the reverse is well-defined. Satiny luster delivers champagne, olive, russet, and purple-blue toning. Population: 19 in 66 (1 in 66+), 4 finer (3/16). NGC ID# 22Z8, PCGS# 3677

- 3142 1862/1 MS66 PCGS. CAC.** Seemingly many pieces were preserved during the Civil War, when all silver coinage was hoarded and disappeared from circulation. This lustrous Premium Gem example of the overdate is sharp and attractive with a hint of gold toning over pearlescent silver surfaces. Housed in a green label holder with CAC endorsement. Population: 80 in 66 (3 in 66+), 16 finer (3/16). NGC ID# CBR7, PCGS# 3681

**1862 Three Cent Silver, MS67
Tied for the Finest Certified**

- 3143 1862 MS67 PCGS. CAC.** Orange, violet, and cobalt-blue toning appear over the entire obverse and reverse surfaces of this impressive Superb Gem. Slight central weakness is evident although the strike is above average for this issue. Both sides exhibit light clash marks. Population: 18 in 67, 0 finer (3/16). NGC ID# 22ZB, PCGS# 3680

**1864 Three Cent Silver, Near-Pristine MS66
Only 12,000 Coins Minted**

- 3144 1864 MS66 PCGS. CAC.** Output of three cent silver coins plunged to just 12,000 pieces in 1864. Choice Uncirculated is the most frequently awarded grade at PCGS and NGC, and Premium Gems such as this are conditionally rare. The shield is well-defined, and only a few of the olive leaves and stars display mild strike softness. Each side is richly toned in olive and violet-gray patina with semiprooflike fields, the surfaces practically pristine save for a few tiny flecks. Bold clash marks occur throughout.
Ex: *W.R. Walling Collection (Stack's, 3/1996)*, lot 190. NGC ID# 22ZE, PCGS# 3684

**1868 Three Cent Silver, MS64
Sought-After, Low-Mintage Issue**

- 3145 1868 MS64 PCGS. CAC.** An attractive Choice specimen from a mintage of just 3,500 pieces, this coin exhibits sharply detailed design elements and well-preserved lustrous surfaces, under shades of pale gold and cerulean-blue toning. Eye appeal is terrific and the issue is always in demand. Population: 12 in 64, 8 finer (3/16). NGC ID# 22ZJ, PCGS# 3688

PROOF THREE CENT SILVER

- 3146 1859 PR65 PCGS.** The Mint struck 800 three cent silver proofs in 1859. This richly toned Gem boasts a blanket of iridescent blue, green, and rose patina that shrouds each side. Striking characteristics are full, as one would expect. Population: 22 in 65, 7 finer (2/16). NGC ID# 27C6, PCGS# 3708
- 3147 1859 PR66 NGC.** The proof 1859 silver three cent had a mintage of 800 pieces and was distributed in silver proof sets. This Premium Gem example displays a full strike and mirrored fields with rose-gold, mint-green, blue, violet, and amber-orange toning. Census: 11 in 66, 2 finer (3/16). NGC ID# 27C6, PCGS# 3708
- 3148 1866 PR66 PCGS.** A lovely Premium Gem proof with excellent eye appeal that results from the rich blue, magenta, and gold toning over deeply mirrored fields. Although undesignated due to that toning, there is obvious cameo contrast between the fields and devices of this example. Population: 19 in 66, 2 finer (3/16). NGC ID# 27CC, PCGS# 3716
- 3149 1867 PR65 Cameo NGC.** The sharply detailed, frosty design elements of this impressive Gem proof stand out in bold cameo contrast with the deeply mirrored fields. A few hints of greenish-gold and lavender toning add to the outstanding eye appeal. Census: 10 in 65 Cameo, 15 finer (3/16). NGC ID# 27CD, PCGS# 83717
- 3150 1869 PR66 PCGS.** Light field-to-device contrast is evident on this Premium Gem proof, although there is no designation, due to the intense gold and iridescent toning that is especially vibrant on the obverse. Population: 22 in 66 (1 in 66+), 2 finer (3/16). NGC ID# 22ZR, PCGS# 3719
- 3151 1870 PR64 Cameo PCGS. CAC.** Central silvery-white patina and frosty-white devices cede to marvelous iridescent toning nearer the rims on this near-Gem Cameo proof three cent silver. Jade, orange, and pale blue in abundance offset the nicely mirrored fields that create ample contrast. Population: 16 in 64 Cameo, 20 finer. CAC: 8 in 64 Cameo, 15 finer (3/16). NGC ID# 27CF, PCGS# 83721
- 3152 1872 PR65 Cameo PCGS. CAC.** A seldom seen Gem Cameo example of this late-series proof, showing sharp design elements and stark field-motif contrast. Both sides are cast in beautiful rainbow toning, with the reverse slightly more vivid. Population: 11 in 65 (1 in 65+) Cameo, 11 finer (3/16). NGC ID# 27CH, PCGS# 83723
- 3153 1873 PR61 Cameo NGC.** Closed 3. A boldly impressed example of this final proof-only three cent silver issue. Nicely mirrored but with a number of minor contact marks and delicate hairlines beneath the pale gold and peach toning, with blue accents at the borders. Sharply contrasted motifs. The sole NGC Cameo proof at the MS61 level (2/16). NGC ID# 27CJ, PCGS# 83724

THREE CENT NICKELS

- 3154 1865 MS66 PCGS. CAC.** A conditionally scarce Premium Gem example of this debut three cent nickel, showing frosty luster and iridescent toning. Portions of the reverse Roman numeral are weak, but the obverse is bold. Population: 48 in 66 (3 in 66+), 2 finer; CAC: 14 in 66, 2 finer (3/16). NGC ID# 22NJ, PCGS# 3731
- 3155 1869 MS66 PCGS. CAC.** Among the finest certified of this otherwise available three cent nickel issue, showing a bold strike and frosty, champagne-tinged luster. There are no discernible abrasions, and eye appeal is excellent. Population: 25 in 66, 0 finer; CAC: 13 in 66, 0 finer (3/16). NGC ID# 22NL, PCGS# 3735
- 3156 1876 MS66 PCGS. CAC.** Just a tinge of iridescent ice-blue toning accents the frosty nickel-gray surface of this conditionally rare three cent nickel. The left-hand numeral in the denomination is not fully brought up, but the strike is otherwise sharp. Only a few minor grazes on Liberty's cheek preclude an even finer grade from PCGS. Population: 12 in 66, 0 finer (1/16). NGC ID# 275A, PCGS# 3744

1876 Three Cent Nickel, MS66+ Sole Finest at Both Services

- 3157 1876 MS66+ PCGS. CAC.** A total of 162,000 three cent nickels were manufactured for circulation in 1876. The top certified survivors are 16 Premium Gems, 12 at PCGS and four at NGC (3/16). This particular example has the distinction of being the only Plus-designated representative among them, laying claim to the title of sole finest 1876 three cent nickel. The CAC approval sticker affirms its undeniable quality. Each side is fully frosted and brilliant with slight powder-blue elements. The strike shows complete detail on the wreath elements and columns. NGC ID# 275A, PCGS# 3744

1885 Three Cent Nickel, MS64 Lowest Mintage of the Series

- 3158 1885 MS64 PCGS.** The Mint made only a token effort of 1,000 three cent nickels for circulation in 1885, with most collectors satisfied with a proof of the date. The proof mintage outnumbered business strikes more than 3 to 1. This softly lustrous near-Gem is obviously a circulation strike, with thick mint frost and lilac-gray toning and some deep-gray freckles. Sharply struck and nicely preserved, such pieces are scarce and highly-sought by specialists in the series. Population: 16 in 64, 30 finer (3/16). NGC ID# 275G, PCGS# 3753

PROOF THREE CENT NICKELS

1866 Three Cent Nickel, PR66 Brilliant Ultra Cameo Example

- 3159 1866 PR66 Ultra Cameo NGC.** Profoundly mirrored fields surround frosted, fully struck devices throughout this Premium Gem three cent nickel proof. The resulting contrast gives each side a wonderful visual quality and accounts for the Ultra Cameo designation awarded by NGC. A couple of minuscule flecks preclude an even higher grade, but they are virtually imperceptible without magnification. From a reported mintage of 725 proofs. Census: 6 in 66 Ultra Cameo (2 in 66 ★ Ultra Cameo), 6 finer (3/16). NGC ID# 275L, PCGS# 93762

- 3160 1867 PR66 Cameo PCGS.** From a limited mintage of 625 pieces, this delightful Premium Gem displays sharply detailed design elements and deeply reflective fields that create bold cameo contrast with the frosty devices. Population: 36 in 66 (3 in 66+) Cameo, 3 finer (3/16). NGC ID# 275M, PCGS# 83763

1867 Three Cent Nickel, PR67 Cameo Outstanding Registry Set Contender

- 3161 1867 PR67 Cameo PCGS.** The impeccably preserved surfaces of this spectacular Superb Gem display delicate hints of greenish-gold toning, with deeply reflective fields that contrast boldly with the sharply detailed frosty design elements. We expect intense competition from Registry Set enthusiasts and series specialists when this lot is called. Population: 3 in 67 Cameo, 0 finer (3/16). NGC ID# 275M, PCGS# 83763

- 3162 1867 PR65 Ultra Cameo NGC.** This spectacular Gem exhibits profound cameo contrast between the sharply detailed, frosty design elements and the deeply mirrored fields. A few hints of greenish-gold toning add to the terrific eye appeal. Census: 1 in 65 Ultra Cameo, 3 finer (3/16). NGC ID# 275M, PCGS# 93763

- 3163 1869 PR66+ Cameo PCGS. CAC.** A pleasing high-end Premium Gem example of the 1869 proof, showing cameo contrast amid nickel-gray and light golden toning. Some iridescence appears near the borders. Seldom seen finer. Population: 17 in 66 (1 in 66+) Cameo, 5 finer (3/16). NGC ID# 275P, PCGS# 83765

- 3164 1870 PR66 Cameo PCGS. CAC.** Deeply contrasted surfaces on both sides are delimited from an even finer grade by tiny pecks on Liberty's cheek amounting to little. One small strike-through shows in the hair, but this is a sharply struck and appealing proof for the grade. Population: 11 in 66 Cameo, 1 finer. CAC: 13 in 66 Cameo, 1 finer (2/16). NGC ID# 275W, PCGS# 83766

- 3165 1872 PR66 Cameo NGC.** Attractive cameo example with dynamically frosted devices (although slightly grainy), and attractive mirrors that hold expectedly few problems. Devoid of marks, this Premium Gem example is untuned and vibrant — scarcely seen any finer. Census: 26 in 66 Cameo (1 in 66+ Cameo), 3 finer (3/16). NGC ID# 26JT, PCGS# 83768

- 3166 1877 PR63 PCGS. CAC.** Coming from a limited 900-coin mintage, the proof 1877 three cent nickel is an essential acquisition to complete the series date set. This is a collector-grade example with nickel-gray color and reflective fields. Microscopic russet specks appear over each side. NGC ID# 275X, PCGS# 3773

1877 Nickel Three Cent, PR65 Some Field-Device Contrast

- 3167 1877 PR65 PCGS.** This proof-only issue comes from a mintage of 900 pieces, among the lower recorded production totals of the proof three cent nickel series. This Gem example displays sharp design elements and nickel-gray luster that show hints of champagne toning. The fields are modestly contrasted. NGC ID# 275X, PCGS# 3773

- 3168 1878 PR67 PCGS. CAC.** This impressive Superb Gem offers well-detailed design elements and moderately reflective surfaces with no mentionable imperfections. Overall eye appeal is outstanding. Population: 17 in 67 (1 in 67+), 1 finer (3/16). NGC ID# 275Y, PCGS# 3774

- 3169 1878 PR66 Cameo PCGS. CAC.** As a proof-only issue, the 1878 three cent pieces were saved to a greater extent than the preceding regular production issues. Still, Premium Gem examples with cameo contrast are scarce. The satiny, lilac-gray surfaces of this example reveal pleasing brightness in the fields at direct angles and a whisper of gold at the rims. The crisp devices exhibit razor-sharp detail in all areas. There are no blemishes of note. NGC ID# 275Y, PCGS# 83774

1884 Three Cent Nickel, PR66 Deep Cameo One of Two Examples in This Format

- 3170 1884 PR66 Deep Cameo PCGS.** Nearly 4,000 proof three cent nickel pieces were minted in 1884, and more than 1,400 examples have been certified by PCGS. Merely two specimens have been designated Deep Cameo by that service, this Premium Gem and a PR67 (3/16). Both sides are clearly contrasted with only hints of blue and gold-rose color in the fields. A small semicircular planchet depression on Liberty's cheek does not distract. Ex: *Houston Signature* (Heritage, 12/2013), lot 3534. NGC ID# 2766, PCGS# 93780

**1887/(6) Three Cent Nickel, PR67
Sole Superb Gem Proof at PCGS**

- 3171 1887/(6) PR67 PCGS. CAC.** The curious parenthetical expression, reflected on the PCGS insert, reflects the late die state showing virtually little remainder of the original underdigit 6. This is nonetheless technically an overdate, and most of the proof survivors are from this obverse die, in whatever state — but the examples showing a full 6 are quite rare, as clashing and subsequent lapping effaced it on most coins. The golden-gray surfaces on this Superb Gem proof are distraction-free and nicely preserved. Although Premium Gem proofs are plentiful, this is the sole PR67 at PCGS. Population: 1 in 67, 0 finer. CAC: 4 in 67, 0 finer (3/16). NGC ID# 276A, PCGS# 3783

EARLY HALF DIMES

- 3172 1797 15 Stars, V-2, LM-1, R.3, Good 6 NGC.** Deep multicolor toning blankets both sides of this lower-grade collector coin, a pleasing Small Eagle type representative. The reverse shows a boldly outlined eagle and complete rims; the obverse has a clear portrait but with the upper-left border worn smooth. LIBERTY is only partially visible, but the date is bold. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258
- 3173 1797 15 Stars, V-2, LM-1, R.3 — Repaired — PCGS Genuine. VF Details.** 15 Stars. Arms-length appeal remains, although the surfaces of this LM-1 half dime show areas of attempted improvement to minimize obverse adjustment marks and to make other surface imperfections less obvious. Deep gray toning at the margins yields to light silver-gray central color. Typical weakness at Liberty's hair behind the neck is of little concern on this net-graded piece, which otherwise retains strong definition on most of the devices.
- 3174 1797 16 Stars, V-4, LM-2, R.4 — Improperly Cleaned — NGC Details. Fine.** This Small Eagle type coin is evenly struck with bold rims and sharply outlined central devices. The obverse portrait shows some hair detail. The surfaces are unnaturally bright from cleaning, but a warm tan-gray and reddish-gold patina blankets each side. NGC ID# 22ZZ, PCGS# 38598 Base PCGS# 4259

**1797 Half Dime, Fine 15
V-1, LM-4, Rare 13 Stars Variety**

- 3175 1797 13 Stars, V-1, LM-4, R.5, Fine 15 NGC.** Counting the stars identifies the LM-4 variety, the sole 1797 variety with 13 stars, and arguably the rarest of all the die pairs for the issue. Smooth wear determines the grade of this example, although all of the motifs are reasonably sharp and the rims are complete (although weak in spots). Rainbow toning covers both sides, with turquoise, amber-gold, forest-green, and magenta hues surrounding silver centers. Light abrasions visit the portrait and adjacent fields, with a spot of dark toning near stars 10 and 11. NGC ID# 36PT, PCGS# 38600 Base PCGS# 4260

**1800 V-1, LM-1, Half Dime, VF35
Choice Midgrade Type**

- 3176 1800 V-1, LM-1, R.3, VF35 PCGS.** As the most readily available die pair among the 1800 varieties, LM-1 is always a preferred selection for type and date collectors alike. This original and pleasing example displays old-silver toning with well-defined devices. A few light marks and shallow abrasions are noted near the neck and in the adjacent field. Choice eye appeal remains. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

**1800 Half Dime, XF40
V-2, LM-3, LIBEKTY**

- 3177 1800 LIBEKTY, V-2, LM-3, R.4, XF40 PCGS.** The famous LIBEKTY *Guide Book* variety that shows a broken upper loop on the R in LIBERTY. The present example displays a bold, even strike and even wear, with the usual die bulge visible to the left of the eagle's head. Olive-gray and gunmetal toning blanket each side. The reverse has an old, linear depression horizontally across the shield. NGC ID# 2326, PCGS# 38603 Base PCGS# 4265

- 3178** 1801 V-1, LM-2, R.4, VG10 NGC. Well-detailed interiors complement bright steel-gray surfaces. Wear is even over each side, although the upper obverse and lower reverse rims are not distinct. The number of 1801 half dimes certified is surprisingly low compared to the mintage of 27,760 pieces. Census: 1 in 10, 23 finer (2/16). NGC ID# 2327, PCGS# 38606 Base PCGS# 4267

**1801 Half Dime, XF40
V-2, LM-2, Late Die State**

- 3179** 1801 V-2, LM-2, R.4, XF40 PCGS. The late die state with wedge-shaped cuds over the 8 in the date and the LIB in LIBERTY. These cuds diverted metal flow during the strike, and as a result the A in STATES and the reverse border from 6 to 8 o'clock are lightly brought up. Nonetheless, the eagle and portrait are richly detailed. The gunmetal-gray surfaces are unblemished and attractive. NGC ID# 2327, PCGS# 38606 Base PCGS# 4267

- 3180** 1803 Large 8, V-1, LM-2, R.4, Fine 12 NGC. This evenly struck, moderately worn Draped Bust, Heraldic Eagle type coin displays gunmetal-gray surfaces with vivid multicolor overtones. The high points of the devices contrast with light gray patina. The reverse rim is ill-defined, but the peripheral legend is visible. NGC ID# 2329, PCGS# 38608 Base PCGS# 4269

BUST HALF DIMES

- 3181** 1829 V-6, LM-5, R.1, MS64 PCGS. CAC. The top of the 1 shows repunching. A ring of deeper mottled violet-gray patina surrounds lightly toned centers. The stars are crisp, as are the talons and fletchings. The centers display a hint of softness. The 1829 half dime was struck to the extent of 1.2 million coins, and scarcely are survivors found this well-preserved. PCGS# 38616 Base PCGS# 4276
- 3182** 1830 V-8, LM-3, R.2, MS64 NGC. The obverse is cracked through the lower points of star 1 to the bust. Delicate peripheral gold toning appears on both sides of this otherwise brilliant example with frosty silver luster. NGC ID# 232C, PCGS# 38640 Base PCGS# 4277
- 3183** 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS64 PCGS. A Choice Uncirculated example of the readily available LM-10 die pair, the Small Date, Small 5C is a "go to" variety for Capped Bust type. Richly toned in variegated shades of gunmetal-blue, ruby-red, and peach-gold, this near-Gem coin shows only a few minor marks and some die flow lines in the field opposite Liberty's face. Population (all Small Date, Small 5C varieties): 27 in 64, 26 finer (2/16). NGC ID# 232H, PCGS# 38719 Base PCGS# 4285

**1836 Small 5C Half Dime, MS66
V-2, LM-4, Sharp Strike**

- 3184** 1836 Small 5C, V-2, LM-4, R.2, MS66 NGC. Several stars and the O in OF are repunched, sufficient to confirm the die pairing. Sea-green and rose-red endow this crisply struck and coruscating high-grade representative. No marks are apparent on either side. A search of our auction archives indicates that we have sold only a single higher-graded example, an MS67 NGC more than four years ago. PCGS# 38727 Base PCGS# 4288

PROOF BUST HALF DIMES

**1831 Half Dime, PR62
V-1, LM-6, Rare in Proof Format**

- 3185** 1831 PR62 ANACS. V-1, LM-6, R.8 as a proof. Heritage has auctioned two different proof 1831 half dimes over the past 15 years. Both are V-1, identified by a repunched star 3 and a repunched flag on the 5 in 5C. The other proof, certified as PR67 by NGC, appeared in our 2007 Houston Signature and 2014 January FUN Signature. The present specimen, housed in an old small-sized ANACS holder, is fully struck with noticeable field reflectivity. The peach-gold and forest-green toning contributes further to the eye appeal. Ex: Long Beach Signature (Heritage, 2/2003), lot 6151. NGC ID# 27D3, PCGS# 4295

SEATED HALF DIMES

- 3186** 1837 No Stars, Large Date (Curl Top 1) MS65 NGC. V-1. The noticeable, widespread repunching on the bottom of all date digits attributes this as the V-1 die pairing. The rose-gray surfaces show splashes of blue and gold amid good preservation. A couple of die cracks run through the wreath on the reverse. Ex: Long Beach Signature (Heritage, 9/2015), lot 3361, which realized \$1,528. NGC ID# 232M, PCGS# 4311
- 3187** 1838-O No Stars XF40 PCGS. A still-luminous No Stars half dime from the first New Orleans issue, toned blue and green-gold overall with gray at the worn high points. A pleasing survivor with an austere design. The 1838-O is a famous key date among early Seated half dimes. Population: 11 in 40, 28 finer (3/16). NGC ID# 232N, PCGS# 4314

**1855 Arrows Half Dime, Toned MS66
Tied for Finest at PCGS**

3188 1855 Arrows MS66 PCGS. Delightful tones of aquamarine surround bronze-gold centers of this richly toned, Premium Gem half dime. A deeply frosted texture captures the light and returns it in waves of vibrant luster. The strike is sharp for the final-year Arrows type, with full details on the star centers and little evidence of the roller marks that often accompany high-grade specimens of the issue. There are no singular abrasions or marks to mention. Struck from clashed dies, as often seen for the denomination. PCGS reports no finer examples. Population: 17 in 66, 0 finer (2/16). NGC ID# 2344, PCGS# 4360

3189 1856 MS66 PCGS. This attractive Premium Gem displays well-detailed design elements, with just a touch of softness on the lefthand stars. Satiny mint luster shines through shades of greenish-gold and lavender-gray toning. Population: 11 in 66 (2 in 66+), 1 finer (3/16). NGC ID# 233P, PCGS# 4363

3190 1860 MS66+ PCGS. An unabraded high-end Premium Gem example of this plentiful pre-Civil War Seated half dime issue, showing satiny luster and gray-gold and aquamarine toning. Some minor strike weakness is seen on the upper-left portion of the wreath and the corresponding lower-left rock base, as usual on this type. NGC ID# 2347, PCGS# 4377

3191 1860 MS67 PCGS. CAC. Repunched 1. The 1 in the date shows narrow repunching south of the flag. Bright mint luster shines through lilac, aquamarine, and gold accents on this lightly toned Superb Gem. A sharply struck example, with minor incompleteness at the bowknot and to a lesser extent on Liberty's head. Popular as the first year of the Legend Obverse type. Few pieces are finer at either service. Population: 45 in 67 (4 in 67+), 4 finer (3/16). NGC ID# 2347, PCGS# 4377

3192 1862 MS67 PCGS. CAC. A frosty and unabraded example of this conditionally scarce issue, showing untuned surfaces and well-struck design elements. The CAC endorsement heightens the eye appeal. Finer coins are rare. Population: 75 in 67 (7 in 67+), 4 finer; CAC: 29 in 67, 3 finer (3/16). NGC ID# 234B, PCGS# 4381

3193 1872-S Mintmark Below Bow MS67 PCGS. The typically seen Mintmark Below Bow variety. This issue is rare in MS67 and almost unknown finer. The present piece displays sharp relief detail and vibrant luster. Light champagne toning adds a degree of warmth and eye appeal to this outstanding late-series half dime. Population: 8 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 2352, PCGS# 4401

PROOF SEATED HALF DIMES

**1859 Half Dime, Toned PR65
Ex: Gene Gardner**

3194 1859 PR65 NGC. V-1, having the date high and showing repunching with the 9 noticeably lower than the 5. This lovely Gem proof, one of 800 struck, reveals shades of blue-green over the reflective obverse, with burgundy and russet featured in the central figure. The mirrorlike reverse is similarly toned. The strike is full, with well-delineated dentils and clear definition in Liberty's.

This year represents the first usage of a new obverse hub for Seated half dimes, an interpretation by Mint assistant engraver Anthony C. Paquet. The Liberty figure is more upright, the star points are hollow, LIBERTY on the shield ribbon is larger, and the base extends past the right (facing) foot. Census: 47 in 65, 25 finer (2/16).

Ex: *Stack's* (3/1998), lot 353; *Gene Gardner*; *Gardner Collection, Part IV* (*Heritage*, 10/2015), lot 98200. NGC ID# 235P, PCGS# 4438

**1861 Half Dime, PR66
Vividly Toned, Modestly Contrasted**

3195 1861 PR66 PCGS Secure. CAC. A conditionally rare Premium Gem example of this Civil War-era proof half dime issue. The strike is bold, and modest cameo contrast emerges from beneath deep aquamarine and lavender-gold toning. There are no mentionable abrasions. Population: 6 in 66, 2 finer; CAC: 6 in 66, 1 finer (2/16). NGC ID# 5LL5, PCGS# 4444

3196 1865 PR65 Cameo NGC. This spectacular Gem exhibits sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices. The well-preserved surfaces show attractive highlights of pale gold toning. Census: 14 in 65 Cameo (1 in 65+★ Cameo), 6 finer (3/16). NGC ID# 2362, PCGS# 84448

3197 1867 PR66 Cameo PCGS. CAC. This intensely contrasted Premium Gem proof is spectacularly patinated in shades of cobalt-blue and greenish-gold, with sharply detailed design elements and well-preserved deeply reflective surfaces. Eye appeal is terrific. Population: 10 in 66 (2 in 66+) Cameo, 1 finer (2/16). NGC ID# 2364, PCGS# 84450

EARLY DIMES

1796 Dime, JR-2, VF Details

- 3198 1796 JR-2, R.4 — Environmental Damage — NGC Details. VF.** Evenly struck but with moderate weakness over the central reverse. This first-year Draped Bust dime is well-detailed on the obverse portrait but extensive corrosion on each side prevents a numeric designation. Tan-gray and pewter hues are the dominant colors on this affordable 1796 dime. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

- 3199 1796 JR-3, R.5 — Improperly Cleaned — NGC Details. Fine.** An affordable first-year Small Eagle dime, showing mottled olive and steel-gray color with moderately well-detailed central devices. The rims grow slightly weak along the upper obverse and lower reverse, denoting slightly misaligned dies. NGC ID# 236B, PCGS# 38744 Base PCGS# 4461

1796 Dime, JR-4, XF Details

- 3200 1796 JR-4, R.4 — Damage — PCGS Genuine. XF Details.** A well-detailed, deeply patinated first-year type coin with gunmetal-gray and blue-green coloration. The portrait and eagle are well-defined, although the lower reverse border is weak and appears carefully tooled. No other damage is immediately obvious. To the unaided eye, this is a pleasing and affordable 1796 Small Eagle dime. NGC ID# 236B, PCGS# 38745 Base PCGS# 4461

1796 Dime, JR-6, VF25 Late-State Obverse Die Cracks

- 3201 1796 JR-6, R.3, VF25 PCGS.** This is a midgrade circulated example of this popular first-year issue, showing powder-gray patina amid silvery areas remaining. The obverse die state is quite advanced, however, seemingly close to shattering. The usual “hyphenated date” die crack to star 1 is evident, but so are others vertically through the 9 and bust to star 8, and one further right from the rim upward to the midbust area. A few scrapes and a couple of dotlike planchet indents are not overly troublesome for the grade. The reverse displays a die crack between S and T in STATES down through the eagle’s left wing and neck. Another, larger planchet indent shows on the top-left leaf triplet. Certified in a green-label holder. NGC ID# 236B, PCGS# 38747 Base PCGS# 4461

- 3202 1798/97 16 Stars Reverse, JR-1, R.3, Good 6 NGC.** Mottled multicolor toning blankets the fields of this well-worn overdate example, while the relief elements show lighter tan-gray coloration. The rims are ill-defined, but the legends and devices are clear. Eye appeal is pleasing for the grade. NGC ID# 236F, PCGS# 38750 Base PCGS# 4468

- 3203 1798 Large 8, JR-4, R.3, VF30 NGC.** The 7 is small, the 8 is large, and the 1 shows a flat top with complete serifs at the base to confirm the JR-4 Large 8 variety. The reverse die features 5 berries, also diagnostic for the JR-4 dime. Struck from a double denomination die pair, since the 1798 BD-2 quarter eagles employed the reverse die before it was used to strike the dimes. This VF example shows scattered marks but pleasing definition on the devices and attractive, reddish-brown toning. Census (Large 8 variety): 2 in 30, 32 finer (3/16). NGC ID# 236E, PCGS# 38753 Base PCGS# 4466

- 3204 1801 JR-1, R.4, VG10 PCGS. CAC.** A single obverse die and two reverse dies were used to strike a reported 34,640 1801 dimes. JR-1 has a wide A in STATES and is marginally more available than JR-2, though both are very scarce. Attractive cream-gray surfaces display strong detail and blatant originality. Perfect for type purposes. NGC ID# 236J, PCGS# 38756 Base PCGS# 4471

- 3205 1805 5 Berries, JR-1, R.3, VG10 PCGS. CAC.** Just two die pairs were required to strike 120,780 dimes in 1805. The 5 Berries JR-1 is slightly scarcer than the 4 Berries JR-2 based on grading events. This example displays moderate wear but retains nice detail for the assigned grade. A circulation cameo with deeply toned fields contrasting with lightly toned devices, the coin exhibits honest wear but no important distractions. CAC endorsed. PCGS# 38768 Base PCGS# 4478

- 3206 1805 4 Berries, JR-2, R.2, VF30 PCGS.** An ideal selection for a circulated type set, this JR-2 example is confirmed by four berries on the olive branch, two on the outside and two inside the stem. Strong definition remains on the central motifs, with the Heraldic Eagle reverse showing bold field stars, a fully readable motto on the scroll, and only slight wingtip wear. Liberty’s lower hair tresses are sharply defined amid attractive lilac-gold toning. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

**1805 Bust Dime, AU58
Four Berries, JR-2**

- 3207 1805 4 Berries, JR-2, R.2, AU58 NGC.** Both 1805 die marriages merit separate *Guide Book* listings, due to different berry counts on the olive branch. The present unmarked Borderline Uncirculated representative is sea-green and plum-red with the deeper toning on the reverse. The devices offer a wealth of detail, and luster exudes from the motifs. The holder has a small chip absent at the lower left corner.
Ex: Dallas Signature (Heritage, 10/2009), lot 345. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

**1807 JR-1 Dime, MS62
Usual Late Die State**

- 3208 1807 JR-1, R.2, MS62 NGC.** Nearly all survivors from the 165,000 coin mintage exhibit heavy obverse clash marks and significant signs of die wear. This piece is no exception. The surfaces are brilliant and highly lustrous with frosty mint surfaces and outstanding eye appeal. Census: 29 in 62 (1 in 62+), 63 finer (3/16). NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIMES

- 3209 1814 STATESOF, JR-5, R.3, XF40 PCGS.** *Ex: Gorman.* The engraver laid out the reverse legend with overly wide spacing throughout UNITED STATES, and was obliged to crowd OF AMERI to fit in the remainder of the legend. An evenly circulated steel-gray and forest-green example with a few thin marks on both sides. NGC ID# 236W, PCGS# 38777 Base PCGS# 4490
- 3210 1822 JR-1, R.4, Good 6 PCGS.** Battleship-gray fields surround reddish-tan devices on this rare, smooth and evenly worn 1822 dime. According to the recent estimate by Zack, Scuderi, and Sherrill's Bust dime reference, just 200 to 250 pieces remain from a reported mintage of 100,000 pieces. It is possible the "official" mintage is as much as four times too high. PCGS and NGC combined report just 151 coins in all grades. Population: 13 in 6, 47 finer (3/16). NGC ID# 236Z, PCGS# 38801 Base PCGS# 4497

- 3211 1823/2 Large E's, JR-3, R.2, AU58 PCGS. CAC.** A pair of 1822 obverse dies (leftover from the small 1822 mintage) were repunched at the date for 1823. Two reverse dies — one with abnormally large Es — were paired with the obverses. This JR-3 example is a bit of rub away from full Mint State. The dove-gray portrait is framed by a sun-gold and rose-red obverse border. The reverse displays a gunmetal eagle, a navy-blue field, and a golden-brown periphery. The surfaces are glossy but unabraded save for faint obverse hairlines and a small area of mint-made granularity above the 82 in the date. NGC ID# 2372, PCGS# 38804 Base PCGS# 4499

- 3212 1824/2 Flat Top 1, JR-1, R.3, AU58 PCGS.** The later die state with a gouge from the denticils near star 6. Delicate lime-green and caramel-gold toning visits this partially lustrous and minimally marked overdated Bust dime. NGC ID# 2373, PCGS# 38805 Base PCGS# 4502

1825 JR-4 Dime, MS62

- 3213 1825 JR-4, R.2, MS62 NGC.** Bands of ruby-red and forest-green endow this satiny and suitably struck representative. A lens is required to locate the few minor abrasions. The buckled field west of the date is the quickest identifier for the JR-4 variety. A second pick-up point is the denticle crumbling between stars 2 and 3. PCGS# 38810 Base PCGS# 4503

**1829 JR-2 Dime, MS66
Large 10C**

- 3214 1829 Large 10C, JR-2, R.2, MS66 NGC.** An exceptional Premium Gem, this 1829 dime features frosty silver luster, untuned mint brilliance, and bold design definition. Only the JR-1 and JR-2 die pairs feature the Large 10C reverse, and the JR-2 is the only readily available variety in high grades. Census: 9 in 66 (1 in 66+), 1 finer (3/16), for all 1829 varieties. PCGS# 38840 Base PCGS# 94511

- 3215 1830 Medium 10C, JR-8, R.3, MS64 NGC.** This sharply struck Choice Bust dime is blended pearl-gray and chestnut-tan with apple-green freckles near the margin and glimpses of steel-blue on the portrait high points. Both sides are undisturbed aside from one brief thin mark beneath the right (facing) wing. For all 1830 dimes, regardless of die variety, the combined NGC Census is 34 in 64, 12 finer (3/16).
Ex: FUN Signature (Heritage, 1/2012), lot 5440, which realized \$2,185. NGC ID# 4FA4, PCGS# 38845 Base PCGS# 4516

- 3216 1833 JR-4, R.1, MS62 NGC.** Sea-green margins encompass deep golden-brown and gunmetal-gray centers. The surfaces are well-struck, with the sole exception of the right (facing) claw. Faint marks on the left obverse decide the grade.
Ex: FUN Signature (Heritage, 1/2010), lot 3902. PCGS# 38865 Base PCGS# 4522

**1833 Dime, Last 3 High, JR-5, MS65
Spectacular Ex: Newman Coin**

- 3217 1833 Last 3 High, JR-5, R.1, MS65 NGC.** The last 3 in the date is placed high and the first A in AMERICA is above the M at the base, indicating the JR-5 variety. The JR-5 is easy to locate in circulated grades, but examples in Gem condition are rare. This spectacular Gem is sharply detailed and lustrous under attractive bluish-gray and champagne-gold toning. Outstanding eye appeal complements the high technical grade. Census: 1 in 65, 1 finer (3/16).
Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2015), lot 33093, realized \$6,463. NGC ID# 237D, PCGS# 38870 Base PCGS# 4523

**1835 JR-3 Dime, MS65
Needle-Sharp Detail**

- 3218 1835 JR-3, R.2 MS65 PCGS.** A Fancy 8 in the date and the positioning of the D in UNITED relative to the scroll confirm the JR-3 attribution. Along with JR-1 and JR-2, this represents the first time the Fancy 8 style was employed for use on dimes. Brilliant surfaces exhibit hints of pale golden patina and radiate shimmering mint frost, illuminating devices that show a near-full strike. Free of mentionable marks. Population (all varieties): 17 in 65 (1 in 65+), 2 finer (2/16). PCGS# 38881 Base PCGS# 4527

**1835 JR-5 Dime, MS64
Outstanding Quality**

- 3219 1835 JR-5, R.1, MS64 NGC.** A lustrous, Choice example of the JR-5 dime, nicely toned with blue and amber-gold toning over sharply struck surfaces. Both the eye appeal and technical quality of this near-Gem example make it perfect for a high-end date or type set. A glass reveals essentially no marks on the smooth, colorful fields and well-defined central motifs. NGC reports just 28 pieces in a finer numeric grade for all 1835 varieties (2/16). NGC ID# 4D5N, PCGS# 38883 Base PCGS# 4527

- 3220 1836 JR-1, R.3, MS62 PCGS.** Light honey-gold toning visits this predominantly pearl-gray Capped Bust dime. The strike is precise and the lustrous surfaces are pleasing despite a pair of hair-thin lines below the left scroll end. NGC ID# 4DEF, PCGS# 38888 Base PCGS# 4528

SEATED DIMES

- 3221 1837 No Stars, Large Date, F-101a, R.2, MS62 NGC.** An attractive MS62 example from the first year of the Seated Liberty design, this coin offers sharply detailed design elements and lightly marked surfaces that retain much original mint luster. Traces of prooflike reflectivity are evident in selected areas. NGC ID# 237R, PCGS# 537635 Base PCGS# 4561
- 3222 1837 No Stars, Small Date, F-102, R.3, MS63 NGC.** Deep sea-green and caramel-gold toning encompasses this well struck and satiny representative. Apparent marks are confined to the field near Liberty's head. Encapsulated in a pre-hologram holder. PCGS# 537638 Base PCGS# 4562
- 3223 1838 No Drapery, Large Stars, F-110, R.4, MS64 PCGS. CAC.** The obverse of this lovely near-Gem shows star 1 just about touching the rock, and a die crack proceeds from the right side of the shield on through the rock underneath Liberty's foot/sandal and thence to the rim. The reverse shows a late state of die clashing upward from the E in DIME and right of the E in ONE. Choice eye appeal is the hallmark of this coin, showing creamy-white and pale-blue surfaces with almond accents on both sides and few mentionable signs of contact. PCGS# 537665 Base PCGS# 4568

**1839-O Dime, MS64
No Drapery, Fortin-106**

- 3224 1839-O No Drapery, Large O, F-106, R.3, MS64 PCGS.** Numerous reverse die cracks are evident on this piece, although it is not the terminal die state of the variety. This example is far finer than the XF45 that Gerry Fortin uses to illustrate the variety. Both sides are fully lustrous beneath pastel gold and blue toning. Population: 5 in 64, 10 finer (3/16). PCGS# 537689 Base PCGS# 4572

**1841-O Large O Dime, Very Fine
Rare Closed Bud Variety, F-101, FS-902**

3225 1841-O Closed Bud, Large O, F-101, FS-902, R.6, VF20 PCGS. CAC. The 1841-O Closed Bud is a transitional variety. Two leftover reverse dies from the previous year, one with a Large O mintmark and another (F-102, FS-901) with a Small O mintmark, struck limited numbers of 1841-O dimes with an obsolete Closed Bud design. Fortin suggests a 5,000 to 8,000 percent premium for F-101. This lightly abraded and minimally granular example has a bold LIBERTY. The devices are cream-gray, while the obverse field and reverse borders are sea-green. NGC ID# 2385, PCGS# 145487 Base PCGS# 4580

3226 1843 MS64 PCGS. CAC. The 1843 Seated dime is among the more available dates of the period in Mint State, although MS64 coins are nonetheless rare. This piece is boldly struck with satiny luster and original toning. Each side has glistening mint-gold, lilac, and champagne-gray hues. CAC-approved in an old green label holder. Population: 17 in 64, 7 finer; CAC: 4 in 64, 3 finer (3/16). NGC ID# 2388, PCGS# 4583

**1846 Seated Dime, XF40
High Level Date**

3227 1846 F-101, R.4, XF40 PCGS. CAC. The date is high and level on circulation strikes of this key date, and slants down to the right on proof strikes. This example is a circulation strike with light wear and trivial handling marks. The pewter-gray fields and light gray devices are consistent with original examples of the type from the 1840s. Population: 7 in 40, 28 finer (3/16). PCGS# 537837 Base PCGS# 4588

**1852 Dime, Eye-Appealing MS67
Condition Census**

3228 1852 F-101, R.3, MS67 PCGS. CAC. One of the most plentiful pre-Arrows Seated dime issues, ideal for type purposes. This glistening and lightly toned Superb Gem is extremely rare, among the finest certified. The strike is bold, and the untouched surfaces yield soft lavender-gold and champagne toning. Eye appeal is outstanding. Population: 4 in 67 (1 in 67+), 0 finer; CAC: 4 in 67, 0 finer (3/16). PCGS# 537913 Base PCGS# 4597

3229 1853-O Arrows, F-101, R.3, AU58 PCGS. CAC. Light to medium chestnut-gold and gunmetal toning adorns the obverse, while the reverse exhibits deeper shades of orange and russet. The wreath exhibits light wear, but luster outlines design elements. The surfaces are problem-free. PCGS# 537998 Base PCGS# 4604

**1854 Arrows Dime, MS66+
Few Seen Finer**

3230 1854 Arrows MS66+ PCGS. CAC. Fortin-Unlisted. The date has the Closed 54 and is positioned high. The 1 is centered above two dentils. The obverse is lightly clashed but uncracked; the reverse shows faint cracks around STATES. Some strike weakness is seen on the upper portion of the wreath, and the frosty surfaces display lovely champagne toning. Population: 13 in 66 (1 in 66+), 1 finer (3/16). NGC ID# 239A, PCGS# 4605

3231 1856 Large Date, F-101, R.3, MS63 PCGS. Fortin estimates a mintage of 150,000 pieces for the better Large Date variety, which he calls "rare in Mint State." This is a pleasing autumn-brown and jade-green example with satin luster and unmarked surfaces. PCGS# 538072 Base PCGS# 4610

**1859 Stars Obverse Dime, MS67+
Exceptionally Preserved**

- 3232** 1859 F-106, R.4, MS67+ NGC. The variety has a medium, downward sloping date and a die scratch above the head and cap. One of the last Stars Obverse dime issues, the 1859 saw a sizable six-figure mintage but is a distinct rarity at the Superb Gem level. This well-defined and radiantly lustrous example has obverse toning that comprises cerulean-blue at the margins and peach-gold over the interior. Pale gold color adorns the reverse borders, fading to brilliant centers. Census (all varieties): 17 in 67 (1 in 67+, 1 in 67 ★), 1 finer (3/16).
Ex: *Central States Signature (Heritage, 4/2012)*, lot 3778. NGC ID# 2394, PCGS# 538137 Base PCGS# 4619

- 3233** 1860-S F-102, High R.4, AU55 PCGS. Generous luster peeks out from under a light layer of field chatter amid minimally worn design elements. The surfaces are largely light-gray, retaining a modicum of satin luster still evident and few surface blemishes. Gerry Fortin's website, *SeatedDimeVarieties.com*, notes that the 1860-S is "consistently scarce in the lower circulated grades and becomes very scarce in EF. This date is rare in Mint State." Population: 6 in 55, 14 finer (2/16).
Ex: *Dallas Signature (Heritage, 4/2007)*, lot 523, which realized \$1,495. PCGS# 538147 Base PCGS# 4622

- 3234** 1864 F-102a, R.5, MS63 PCGS. Well-struck from clashed dies, with prooflike fields and a hint of champagne toning over each side. No major abrasions are present. The 1864 Seated dime is a scarce date with a mintage of only 11,000 pieces. Uncirculated survivors are scarce and are rare in Gem condition. This Select example, housed in an old green label holder, remains within the grasp of budget-restricted collectors. Population: 5 in 63, 26 finer (2/16). PCGS# 538202 Base PCGS# 4639

- 3235** 1871 F-102a, R.3, MS65 PCGS. Dappled golden-brown toning embraces the obverse. The reverse is close to brilliant. A sharply struck, satiny, and unabraded Gem. The left-side obverse periphery exhibits intermittent granularity. PCGS# 538256 Base PCGS# 4653

**1873 Open 3 No Arrows Dime, MS64
Attractive Border Toning**

- 3236** 1873 Open 3, No Arrows, F-102, R.3, MS64 PCGS. This variety is most easily attributed by the short die lines in the lower right (facing) portion of the wreath and the die scratch at 3 o' clock near the reverse rim. The Open 3 1873 Seated dime is rare in Mint State. Only 60,000 pieces were struck, and few escaped attrition. This Choice example offers well-struck motifs and satiny luster. Natural progressions of toning begin with aquamarine, amber, and gold at the borders and lighten to champagne-gray in the centers. A few small abrasions limit the grade but pose little distraction for the MS64 level. NGC ID# 23AB, PCGS# 538296 Base PCGS# 4660

**1873 Open 3 No Arrows Dime, MS64
Rarely Seen This Fine**

- 3237** 1873 Open 3, No Arrows, F-102, R.3, MS64 NGC. Only 60,000 pieces were struck of the Open 3 dime before the weight change later in the year. This example is well defined with subdued luster and a light amount of silver-gray patina overall. There are no mentionable marks on either side. Conditionally rare. Census: 5 in 64, 0 finer (2/16).
Ex: *Long Beach Signature (Heritage, 9/2005)*, lot 2358. NGC ID# 23AB, PCGS# 538296 Base PCGS# 4660

- 3238** 1873-CC Arrows, F-101, R.4, Good 4 PCGS. An accessible collector-grade example of this key Seated dime Carson City issue, showing tan-gray surfaces and a few old marks. Wear is even, and all peripheral legends are clear. Seldom seen in any grade, let alone at an affordable, problem-free level. Population: 6 in 4, 71 finer (3/16). NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

**1873-CC Arrows Dime, VF25
Problem-Free Collector Coin**

3239 1873-CC Arrows, F-101, R.4, VF25 PCGS. The 1873-CC Arrows dime is a key date in all grades, typically seen well-worn and/or with various impairments. This midgrade circulated example is above average for the issue and an ideal collector coin. The obverse displays lavender-gray patina, the reverse steel-gray. Grade-consistent wear is evenly distributed. Population: 4 in 25, 21 finer (3/16). NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

3240 1876-CC F-103, R.4, MS65 PCGS. Gunmetal-blue toning embraces this fully struck, unabraded, and coruscating Gem. The Es in ONE DIME are nicely die doubled, although less spectacularly than seen on F-108. Population: 37 in 65, 22 finer (3/16).
Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 618, which realized \$1,265. PCGS# 538492 Base PCGS# 4680

3241 1876-CC F-131, R.4, MS64 PCGS. CAC. A satiny, evenly struck, and impressively unabraded steel-gray near-Gem. Fortin-131 is interesting for its extreme die rust throughout both sides. Unlike most '76-CC dimes, ONE DIME shows no evidence of die doubling. PCGS# 538525 Base PCGS# 4680

3242 1876-S Type One Reverse, F-103, R.3, MS65 NGC. Despite a mintage exceeding 10 million coins, the 1876-S Seated dime is elusive in the upper Mint State grades. This Gem example is rare. The strike is bold, and each side displays glistening ocean-blue, violet, and sun-gold toning. Census: 15 in 65 (1 in 65+), 7 finer (2/16). PCGS# 538535 Base PCGS# 4681

3243 1876-S Type One Reverse, F-118, R.4, MS66 PCGS. Early Die State. Turquoise and mauve toning meet in irregular-shaped patches over both sides of this interesting Seated dime. The strike is sharp on Liberty's portrait and equally so on the cereal wreath. Struck from seemingly perfect dies, with few distinguishing characteristics matching the Fortin variety reference. Mint luster glows beneath the unusual patina. A coin of high technical merit and a fascinating toning scheme. Population: 11 in 66, 0 finer (3/16). PCGS# 538553 Base PCGS# 4681

1877-S F-109 Dime, MS66

3244 1877-S F-109, R.4, MS66 PCGS. Butter-gold toning graces the central obverse. Blushes of lavender and forest-green embrace the borders. A lustrous and well struck San Francisco example. Delicate field marks are noted on the obverse and above the N in ONE. F-109 is chiefly attributed by its date and mintmark location. PCGS# 538618 Base PCGS# 4684

**1881 Seated Dime, MS67+ ★
24,000 Coins Struck, Amazing Color**

3245 1881 F-101a, R.4, MS67+ ★ NGC. The 1881 dime is part of a string of "afterthought" Philadelphia issues from 1879 to 1881, all with five-figure mintages — 24,000 coins in this case. The rarity of these dates often goes unrecognized, especially at this amazing level. Each side is beautifully toned with primarily blue and green hues, illuminated by radiant frost that emanates from beneath the patina. Flickers of rose appear in the central obverse, while a daub of orange color graces the left reverse. Magnificently preserved. Census (all varieties): 6 in 67 (1 in 67+, 1 in 67+ ★), 1 finer (3/16).
Ex: Portland Signature (Heritage, 3/2004), lot 5523; Eugene H. Gardner Collection, Part III (Heritage, 5/2015, as MS67 NGC), lot 98254; Houston Signature (Heritage, 12/2015), lot 3104. NGC ID# 23AU, PCGS# 538646 Base PCGS# 4689

**1885-S Dime, AU53
Pleasing Original Toning**

3246 1885-S F-101, R.3, AU53 PCGS. A moderately toned example of this popular better-date Seated dime that boasts an original mintage of just 43,690 pieces. Excellent definition remains with some medium lilac-gray patina over each side. Splashes of crimson and blue lurk in the most protected areas. A lateral mark is noted in the upper right obverse field. Population: 3 in 53, 20 finer (2/16).
Ex: FUN Signature (Heritage, 1/2006), lot 1759. PCGS# 538701 Base PCGS# 4695

3247 1887-S F-110, R.3, MS66 PCGS. CAC. Attractive shades of powder-blue and champagne-gold toning blanket the well-preserved surfaces of this delightful Premium Gem, with vibrant mint luster underneath. The design elements are well-detailed and eye appeal is outstanding. Population: 10 in 66, 1 finer (3/16). PCGS# 538749 Base PCGS# 4699

3248 1888 MS66+ PCGS. CAC. A Fortin-unlisted variety, it resembles F-112 but the cracks and date position slightly differ. A die line through the left shield border is the variety identifier. A lustrous and well struck Premium Gem with peripheral golden-brown patina and essentially immaculate preservation. NGC ID# 23B7, PCGS# 4700

3249 1890 MS66 PCGS. The 1890 Seated Liberty dime is a plentiful type-coin issue, although Premium Gem and finer examples are elusive. This lustrous, champagne-tinged MS66 piece displays sharp motifs and unabraded surfaces. Faint peripheral die cracks appear on each side. Population: 50 in 66 (2 in 66+), 6 finer (3/16). NGC ID# 23BB, PCGS# 4704

PROOF SEATED DIMES

3250 1859 F-101, R.4, PR64 PCGS. CAC. One of two proof dies known for the issue of 800 coins; the Fortin-101 shows a slightly upward-sloping date on dies that are essentially perfect. This lovely near-Gem proof boasts deep, natural patina that is heavier near the rims. A few light marks, none overt, nestle under the color. Ample field-device contrast shines through, despite the toning. For the date, Population: 13 in 64 Cameo, 14 finer. CAC: 2 in 64 Cameo, 11 finer (3/16). NGC ID# 23CD, PCGS# 538999 Base PCGS# 4748

3251 1860 Doubled Die Reverse, F-101, R.3, PR65+ PCGS. CAC. The only Plus-graded Gem Cameo at PCGS, this proof 1860 Seated dime displays a full strike and well-preserved surfaces. Hints of gold and bluish toning in the fields accentuate the contrast with the frost-white devices. Population: 7 in 65 (1 in 65+) Cameo, 14 finer; CAC: 2 in 65 Cameo, 10 finer (3/16). NGC ID# 23CJ, PCGS# 539007 Base PCGS# 4753

1863 Seated Dime, PR66 Cameo Important Civil War Issue

3252 1863 PR66 Cameo PCGS. Most of the high grade survivors from the Civil War period are proof strikes, as circulation strikes are quite rare. This example is one of a handful of Premium Gem Cameo proofs that have been certified. Rich gold and delicate blue toning appear over the mirrored fields and lustrous silver devices of this exceptional piece. Population: 6 in 66 (1 in 66+) Cameo, 1 finer (3/16). NGC ID# 23BS, PCGS# 84756

3253 1868 F-104, R.3, PR66 PCGS. CAC. Ocean-blue, peach, and olive-gold toning illuminates this well struck and attractive specimen. The glossy surfaces are free from contact, though we note a curly lint mark (as made) near the 1 in the date. A meager 600 proofs were produced. NGC ID# 23CS, PCGS# 539020 Base PCGS# 4761

1869 Seated Dime, PR66 Cameo Among the Finest-Known Examples

3254 1869 PR66 Cameo PCGS Secure. CAC. F-105, R.3. The obverse of this Premium Gem Cameo proof exhibits peripheral blue, sea-green, lavender, and gold toning. The reverse is mostly brilliant with a trace of gold at the border. A beautiful, fully struck specimen with tremendously reflective fields and nicely frosted devices. Free of contact marks or any other surface distractions. Population: 4 in 66 (1 in 66+) Cameo, 1 finer (2/16). Ex: ANA Signature (Heritage, 8/2011), lot 3575. NGC ID# 23CT, PCGS# 84762

1870 Seated Dime, PR66 Cameo Tied for the Finest at PCGS

3255 1870 PR66 Cameo PCGS. PCGS has certified four 1870 dimes in PR66 Cameo and two non-Cameo examples in PR67, and those are the finest that service has examined (3/16). They have never graded a Deep Cameo proof of this issue. Both sides of this impressive Premium Gem are fully brilliant with deeply mirrored fields and lustrous devices, all inside a golden toned frame. NGC ID# 59UM, PCGS# 84763

3256 1873 Closed 3, No Arrows, F-101, R.3, PR66 PCGS. CAC. The 1873 No Arrows proof dime had a mintage of 600 coins, all of the Closed 3 date type. This CAC-endorsed Premium Gem example is a conditional rarity. The strike is bold, and the fields are reflective. Golden-gray and dusky lavender toning blankets much of each side, yielding to greenish peripheral hues. Population: 7 in 66, 2 finer (3/16). PCGS# 539032 Base PCGS# 4766

1873 Arrows Dime, Impeccable PR66

3257 1873 Arrows, F-102, R.4, PR66 NGC. The tiny die lumps or defects visible on Liberty's left (facing) thigh, just right of the shield corner, attribute the Fortin-102 die pair, used both for proofs (to the extent of 800 pieces) and circulation strikes (some portion of the nearly 2.4 million coins struck). This Premium Gem proof boasts impeccable preservation on sharply struck, lightly toned surfaces. The strong eye appeal makes this a great potential type coin. Census: 10 in 66, 4 finer (3/16). PCGS# 539033 Base PCGS# 4769

3258 1874 Arrows, F-101, R.3, PR64 NGC. An attractive Choice example from a proof mintage of just 700 pieces, this coin exhibits sharply detailed design elements and deeply mirrored fields, with a diagnostic die flaw above the center of Liberty's neckline. Census: 77 in 64 (1 in 64+★), 28 finer (3/16). NGC ID# 23DJ, PCGS# 539034 Base PCGS# 4770

**1876 Dime, PR67 Cameo
Moderately Toned**

- 3259 1876 PR67 Cameo PCGS. F-102, R.4.** The cameo contrast is overt despite the presence of moderate orange-rose patina, accented with blue, enriching the surfaces on both sides of this nicely preserved Superb Gem proof. These are the Fortin-102 dies, showing a strong IM in DIME (it is weak on the Fortin-101 proof reverse) and a Large Knob 6 in the downward-sloping date. Population: 1 in 67 Cameo, 0 finer (3/16). NGC ID# 23CZ, PCGS# 84773

- 3260 1877 Type Two Reverse, F-101, R.4, PR66 PCGS. CAC.** The proof die pair of 1877 shows bold doubling of the ME in DIME and the lower-right portion of the wreath. This boldly struck Premium Gem displays gleaming fields and old-time lavender, blue, and mint-green toning. Population: 8 in 66, 0 finer (2/16). PCGS# 539040 Base PCGS# 4774

- 3261 1879 PR65 Cameo PCGS. F-101, R.5.** The motifs and legends are frosty, and contrast with the glassy fields. An essentially brilliant Gem with a solitary contact mark below the E in ONE. The reverse periphery has a textured appearance from subtle retained laminations, as made. Population: 17 in 65 Cameo, 11 finer (3/16). NGC ID# 23D4, PCGS# 84776

**1882 Seated Dime, PR67
Richly Toned Throughout**

- 3262 1882 F-101, R.3, PR67 PCGS Secure. CAC.** A ring of fiery-orange toning surrounds an icy, blue-aqua center on the obverse of this exquisitely patinated proof dime; the reverse is a bit more subtle, but when viewed at the proper angle, it also displays rich aqua and blue coloration, but with golden margins. The fields of this Superb Gem proof are deeply liquid and reflective. The devices show soft mint frost and provide subtle cameo contrast, although the holder does not indicate so. Population: 10 in 67, 3 finer (2/16). NGC ID# 23D7, PCGS# 539052 Base PCGS# 4779

**1884 Dime, PR67 Cameo
Profound Eye Appeal**

- 3263 1884 PR67 Cameo PCGS. CAC. F-101, R.3.** A boldly struck, deeply contrasted Cameo, this Superb Gem 1884 proof dime offers profound eye appeal that includes lavender-gold toning in the centers and vivid ocean-blue around the borders. A ribbon of blue crosses the reverse margin from 9 to 6 o'clock. The preservation is outstanding. Population: 22 in 67 (1 in 67+) Cameo, 0 finer. CAC: 21 in 67 Cameo, 1 finer (3/16). NGC ID# 23D9, PCGS# 84781

**1884 Seated Liberty Dime, PR67+
Elusive Cameo Example**

- 3264 1884 PR67+ Cameo NGC. CAC. F-101, R.3.** The proof 1884 Seated Liberty dime claims a mintage of 875 pieces and this Plus-graded Superb Gem is among the finest survivors. The sharply detailed design elements exhibit a rich coat of mint frost that contrasts boldly with the deeply mirrored fields and the virtually pristine surfaces add to the incredible eye appeal. Census: 22 in 67 Cameo (3 in 67+ Cameo, 2 in 67 ★ Cameo), 5 finer (2/16). NGC ID# 23D9, PCGS# 84781

- 3265 1885 PR66+ Cameo PCGS. CAC. F-101, R.3.** This otherwise plentiful proof Seated dime issue is scarce in Cameo grades. The present high-end Premium Gem yields stark field-motif contrast on each side. The interiors have soft champagne color, while the borders display vivid amber-orange and electric-blue. Boldly struck and well-preserved. Population: 19 in 66 (1 in 66+) Cameo, 14 finer (2/16). NGC ID# 23DA, PCGS# 84782

- 3266 1891 PR66 Cameo PCGS Secure. CAC. F-130, R.3.** The deeply mirrored fields of this Premium Gem accentuate the devices, all of which are sharply struck. Light blue-green patination runs over the obverse, while the reverse takes on lavender, reddish-gold, and forest-green coloration. This coin yields marvelous technical quality and aesthetic appeal. Population: 10 in 66 Cameo, 11 finer (2/16). NGC ID# 23DG, PCGS# 84788

BARBER DIMES

1892 Barber Dime, MS67 Outstanding First-Year Type Coin

3267 1892 MS67 PCGS. CAC. Even a design that is not particularly popular usually enjoys a first-year bump in availability as examples were saved by the curious. Even so, the 1892 Barber dime is a rarity in Superb Gem Mint State. This example is attractively toned in cool hues ranging from rose-violet to sapphire-blue with hints of sea-green. Population: 17 in 67 (1 in 67+), 0 finer (2/16). NGC ID# 23DK, PCGS# 4796

3268 1895-O VF25 PCGS. A pleasing midgrade example of this popular Barber dime key date, showing a full LIBERTY on the headband and good detail throughout the wreaths on both sides. A single mark appears at the bridge of Liberty's nose. NGC ID# C4KL, PCGS# 4807

1895-O Dime, Choice XF Outstanding Coloration

3269 1895-O XF45 PCGS. The 1895-O is the key to the Barber dime series and is particularly elusive in the upper circulated grades. This Choice XF example displays pleasing detail for the grade, with original olive, russet, amber, and lavender-gray patina. An outstanding coin for the grade. This issue had a small mintage of only 440,000 pieces and is the only true "stopper" in the series in all grades. NGC ID# C4KL, PCGS# 4807

1895-S Barber Dime, MS65+ Unheralded Condition Rarity

3270 1895-S MS65+ PCGS. CAC. Ex: Lily Nicole Collection. The 1895-S Barber dime saw a moderate mintage of more than 1.1 million coins, but Gem examples or finer are seldom seen. Jeff Ambio, in his useful *Collecting & Investing Strategies for Barber Dimes* (2009), ranks the issue [excluding the uncollectible 1894-S, of course] in MS65 or higher as the rarest S-mint Barber dime and rarest of the series after the 1894-O. This lovely example boasts rose and pale blue patina throughout both sides with some light toning striations. There are no marks of consequence, and the strike is decently executed if not absolute. An extremely attractive example of this unheralded condition rarity. Population: 8 in 65 (1 in 65+), 2 finer (2/16). NGC ID# 23DX, PCGS# 4808

1896-S Barber Dime, MS66+ Strong Registry Set Candidate

3271 1896-S MS66+ PCGS. Pinpoint definition is evident on all design features of this spectacular Plus-graded Premium Gem, from a mintage of 575,056 pieces. The impeccably preserved surfaces radiate vibrant mint luster, under shades of lavender-gray and greenish-gold toning. Eye appeal is terrific. Population: 18 in 66 (3 in 66+), 0 finer (2/16). NGC ID# 23E2, PCGS# 4811

3272 1897 MS66+ PCGS. CAC. A gorgeous Premium Gem, this 1897 Barber dime is an important Philadelphia Mint issue in the series. Both sides exhibit bluish-ivory luster with intense peripheral iridescence mostly on the obverse. Population: 39 in 66 (3 in 66+), 5 finer (3/16). NGC ID# 23E3, PCGS# 4812

1897 Dime, Sharp MS67

- 3273 1897 MS67 PCGS.** Strong mint luster rolls across the frosted surfaces of this Superb Gem dime, one of just a dozen examples of the issue to achieve the grade at both services combined. Reddish-orange luster highlights the obverse margins, while teal, lilac, and silver-rose toning blankets the reverse. The strike is razor-sharp, and the surfaces are nearly unmarked except for a shallow scrape above E of ONE. Population: 5 in 67 (2 in 67+), 0 finer (3/16). NGC ID# 23E3, PCGS# 4812

- 3274 1897-S MS64 PCGS.** Faint almond-gold toning is more prominent near the rims. This lustrous Choice Barber dime has an intricate strike and clean surfaces. A better date in all grades. Population: 38 in 64 (1 in 64+), 20 finer (2/16).
Ex: *Beverly Hills Signature* (Heritage, 11/2011), lot 3270. NGC ID# 23E5, PCGS# 4814

- 3275 1898-O MS64 PCGS.** The 1898-O Barber dime poses a challenge in Mint State where it is scarce at all levels. This Choice representative displays bold relief detail and satiny, golden-toned luster. Population: 14 in 64, 14 finer (2/16). NGC ID# 23E7, PCGS# 4816

1898-S Barber Dime, MS66 One Numerically Finer at PCGS

- 3276 1898-S MS66 PCGS.** CAC. Ex: Lily Nicole Collection. Variegated autumn-gold and forest-green toning blankets this intricately struck and lustrous high-grade Barber dime. The fields are pristine, and the portrait displays only minuscule marks. Although commonplace in well-circulated grades, the 1898-S is scarce in Mint State, and decidedly rare as a Premium Gem. Population: 8 in 66 (1 in 66+), 1 finer (3/16).
Ex: *Summer FUN Signature* (Heritage, 7/2011), lot 3436; *Lily Nicole Collection / Central States Signature* (Heritage, 4/2015), lot 3915. NGC ID# 23E8, PCGS# 4817

- 3277 1902-O MS64+ PCGS.** CAC. The mintage of 4.5 million pieces is deceiving because few 1902-O dimes survive in upper Mint State grades. The Bowers reference estimates no more than 200 pieces exist in any Uncirculated condition, and Gem coins are decidedly rare. This high-end near-Gem example radiates soft satin luster from beneath grayish-blue and gold toning. The surfaces show only minor contact, although the strike is slightly incomplete at the wreath top. CAC endorsed, one of the dozen or so finest at PCGS. Population: 36 in 64 (2 in 64+), 9 finer (2/16). NGC ID# 23EK, PCGS# 4828

- 3278 1907 MS66+ PCGS.** CAC. Even though the 1907 has the largest mintage of the entire Barber dime series (more than 22 million pieces struck), MS66 examples are seldom seen and finer coins are virtually nonexistent. This frosty, Plus-graded Premium Gem is needle-sharp on both sides with deep olive-gray toning at the margins and subtle iridescence around the central motifs. Mint luster flows over the mark-free surfaces. Population: 40 in 66 (13 in 66+), 1 finer (3/16). NGC ID# 23F3, PCGS# 4842

- 3279 1907-D MS65 NGC.** A sleeper in the Barber dime series, this Denver issue is notably scarce in MS65 or finer grades. The Gem surfaces display icy-white, untuned brilliance with deep-seated mint luster glowing from beneath the thick mint frost. Boldly struck except for the upper reaches of the wreath. Marks are limited to a few scattered, high point ticks. Census: 13 in 65, 8 finer (2/16). NGC ID# 23F4, PCGS# 4843

- 3280 1907-S MS64 PCGS.** With the lowest mintage among the 1907 branch mint dimes, the 1907-S is scarce in any Mint State grade. This brilliant, stone-white example glows with frosty silver luster and displays a full strike throughout. A few light marks on the obverse account for the near-Gem grade assignment, although the eye appeal suggests an even higher level. NGC ID# 23F6, PCGS# 4845

1908-D Dime, MS67 Colorful and Fully Struck

- 3281 1908-D MS67 NGC.** CAC. Jade-green and plum-red intermingle across this fully struck and coruscating Superb Gem. Pristine aside from trivial contact on Liberty's neck. A small strike-through separates the bases of the NE in ONE. The 1908-D dime is rare this well-preserved. Census: 4 in 67, 0 finer (3/16). NGC ID# 23F8, PCGS# 4847

1910-S Barber Dime, MS66 Elusive in Gem or Finer Grades

- 3282 1910-S MS66 PCGS.** An important Barber dime issue, this Premium Gem is near the top of the grading charts. PCGS and NGC have certified a combined 14 examples with just six finer (3/16). Both sides exhibit light magenta, gold, and sea-green toning over frosty mint luster. The design elements are sharper than usual for the issue. Population: 11 in 66 (1 in 66+), 3 finer (3/16). NGC ID# 23FH, PCGS# 4856

1911-D Dime, MS67+
Popular D-Mint Type Issue
Sole Finest at PCGS, Ex: Gardner

- 3283 1911-D MS67+ PCGS. CAC.** This well-produced issue from the Denver Mint is highly popular with mintmark type collectors. It is actually the most common of all D-mint Barber dimes in grades of MS65 and finer. But Superb Gems such as this example are understandably rare. This lovely 1911-D dime displays the highest degree of technical merit possible for the type. Both sides are essentially untoned, contrasting against ice-blue accents in the fields. The strike is sharp, and the intensely lustrous surfaces show smooth, exquisite preservation throughout. Population: 11 in 67 (1 in 67+), 0 finer (3/16).

Ex: Purchased by Eugene Gardner from David Lawrence Rare Coins (12/2002); Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98325. NGC ID# 23FK, PCGS# 4858

1913-S Barber Dime, MS66
Low Mintage, High Survival Rate

- 3284 1913-S MS66 PCGS.** The 1913-S Barber dime claims a low mintage of 510,000 pieces, but it has a better-than-average survival rate, as the issue was saved by contemporary collectors. This delightful Premium Gem displays sharply detailed design elements and well-preserved surfaces, with vibrant mint luster throughout. Population: 21 in 66 (2 in 66+), 6 finer (3/16). NGC ID# 23FS, PCGS# 4864

- 3285 1915-S MS65 PCGS. CAC.** Only 960,000 Barber dimes were struck at the San Francisco Mint in 1915 and the issue is seldom seen in high grade. This attractive Gem is sharply detailed and lustrous, under shades of champagne-gold and lavender toning. Population: 25 in 65 (1 in 65+), 11 finer (3/16). NGC ID# BLAS, PCGS# 4869

PROOF BARBER DIMES

- 3286 1894 PR65 PCGS. CAC.** From a nominal proof mintage of 972 pieces, this attractive Gem offers sharply detailed design elements and deeply reflective fields, under vivid shades of greenish-gold and cerulean-blue toning. Population: 75 in 65, 64 finer (3/16). NGC ID# 23G6, PCGS# 4878

1899 Barber Dime, PR67+
Only One Finer Coin at PCGS

- 3287 1899 PR67+ PCGS. CAC.** A nominal mintage of 846 proof Barber dimes was accomplished in 1899 and this Plus-graded Superb Gem is among the finest survivors. The design elements are sharply detailed and the surfaces are deeply reflective, under attractive shades of greenish-gold, cerulean-blue, and lavender-gray toning. Population: 30 in 67 (2 in 67+), 1 finer (2/16). NGC ID# 23GC, PCGS# 4883

- 3288 1910 PR65+ Cameo PCGS. CAC. Ex: Larry Shapiro.** Wonderful toning and eye appeal are the hallmarks of this high-end Gem Cameo proof, showing rose patina prevailing on the obverse amid glints of canary-yellow blue, with the reverse showing vivid sunset-orange against some central ivory-white remaining. Despite the intense color, there is sufficient field-device contrast for a Cameo designation. No mentionable surface distractions impair the broad appeal. Population: 12 in 65 (1 in 65+) Cameo, 14 finer. CAC: 6 in 65 Cameo, 11 finer (2/16). NGC ID# AEVD, PCGS# 84894

1911 Dime, Lightly Toned PR65 Deep Cameo

- 3289 1911 PR65 Deep Cameo PCGS.** A slight golden cast is scarcely perceptible on this Gem proof 1911 Barber dime, but the reflective fields and lavishly frosted devices produce contrast that is on the blatant side. One small mark appears in the right obverse field near Liberty's mouth and a tiny dark fleck left of the date, but this piece still appears close to a higher numeric grade. Population: 1 in 65 Deep Cameo, 1 finer (3/16). NGC ID# 23GS, PCGS# 94895

- 3290 1914 PR66 PCGS.** The 1914 is the penultimate proof in the Barber dime series and records the lowest mintage: 425 pieces. Deep russet and lavender patination bathes the surfaces of this Premium Gem, and the design features are sharply impressed. Both sides have been very well cared for. Population: 22 in 66 (3 in 66+), 11 finer (3/16). NGC ID# 23GV, PCGS# 4898

TWENTY CENT PIECES

1875 Twenty Cent Piece, MS65 Low-Mintage Odd Denomination Representative

3291 1875 MS65 PCGS. BF-1, R.1. A delightful Gem representative of this popular odd-denomination, with sharply detailed design elements and well-preserved surfaces that show vibrant mint luster throughout, with some prooflike reflectivity in selected areas. Highlights of greenish-gold and lavender toning enhance the considerable visual appeal. From a small mintage of 38,500 pieces. Population: 20 in 65 (1 in 65+), 9 finer (2/16). NGC ID# 23R5, PCGS# 5296

3292 1875-CC VF30 PCGS Secure. Deeply toned in original gunmetal and olive-gray colors, this midgrade 1875-CC twenty cent piece is also well-detailed. An old, toned-over scratch in the right obverse field is the only notable surface anomaly. Suitable for collectors who appreciate old-time patina. NGC ID# 23R6, PCGS# 5297

3293 1875-CC AU58 PCGS. BF-2, R.1. Rich autumn-brown and forest-green toning embraces the obverse periphery. The reverse border displays light tan patina, and the remainder of the coin is brilliant. This momentarily circulated example is smooth except for a mark above the eagle's left (facing) shoulder. NGC ID# 23R6, PCGS# 5297

3294 1875-CC MS62 PCGS. The right side of the 1 is beneath the shield point, while the first C of the mintmark nearly touches the arrow feather. This example is frosty and softly lustrous with creamy reddish-gold toning faintly visible at the margins. The strike is sharp except for the usual weakness at the eagle's left (facing) wing shoulder. Light abrasions account for the grade, yet the eye appeal easily exceeds the assigned level. NGC ID# 23R6, PCGS# 5297

1875-CC Twenty Cent Piece, MS63 Only Collectible Carson City Issue

3295 1875-CC MS63 NGC. This is a lustrous, bright silver example of the second highest-mintage business strike twenty cent piece. A few surface marks are evident, in line with the grade. A bit of high-point strike weakness is noted on Liberty's torso and the eagle's breast, as usual, but the often weak left (facing) wing is blessed with detail that is much better than average. NGC ID# 23R6, PCGS# 5297

1875-CC Twenty Cent Piece, MS64 Popular CC-Mint Issue

3296 1875-CC MS64 PCGS. The short-lived twenty cent denomination was only struck for two years at the Carson City Mint, although proofs were produced in Philadelphia for another two years. The 1876-CC is one of the great rarities in U.S. coinage, making the 1875-CC the only collectible issue from the famous Western facility. This well-detailed Choice example is well-preserved and lustrous, with hints of lavender-gray and pale gold toning. PCGS has graded 37 numerically finer examples (3/16). NGC ID# 23R6, PCGS# 5297

3297 1875-S MS63 NGC. This attractive Select specimen exhibits well-detailed design elements, with a touch of softness showing on Liberty's head and some star centers. The lustrous surfaces show scattered, minor contact marks with some medium-intensity lavender-gray toning. NGC ID# 23R7, PCGS# 5298

3298 1875-S MS64 NGC. BF-5, R.2. Die cracks near the U in UNITED attribute the marriage. Splashes of peach-gold, forest-green, and dove-gray overlie lustrous stone-white surfaces. The strike is good despite blending on the right-side stars. Impressively devoid of abrasions, and encapsulated in a former generation holder. NGC ID# 23R7, PCGS# 5298

3299 1875-S MS64+ PCGS. BF-9, R.2. A die chip between dentils below the 8 in the date is the chief identifier for the Brunner-Frost variety. This lustrous and crisply struck near-Gem is bathed in aquamarine, cherry-red, and butter-gold toning. Marks are limited to a bright area between stars 4 and 5. NGC ID# 23R7, PCGS# 5298

3300 1875-S MS64+ NGC. CAC. BF-5, R.2. This variety is attributed by: a long, curved, horizontal die line in the lower gown to the right of the shield; a horizontal die crack between the U in UNITED and the star; another from the lower part of the last S in STATES to O in OF; and one from the lower beak to the wing. Lustrous surfaces display orange-gold, lavender, and blue-green peripheral toning along with sharply struck design elements.

Ex: *Houston Money Show Signature* (Heritage, 12/2015), lot 4266. NGC ID# 23R7, PCGS# 5298

1875-S Twenty Cent, Splendid MS66

3301 1875-S MS66 PCGS. BF-15, R.3. A misplaced 5 appears in the denticles beneath the 7 in the date, and repunching shows as "notching" on the top-right serif of the S mintmark on the reverse, as identified in the new Brunner-Frost *Doubled Dimes* reference. This splendid Premium Gem shows cream-gray patina with faint hints of mauve and ineffably pale blue, nicely struck with minimal abrasions. Population: 62 in 66 (3 in 66+), 5 finer (3/16). Ex: *Long Beach Signature* (Heritage, 6/2015), lot 3885, which brought \$6,463. NGC ID# 23R7, PCGS# 5298

**1875-S Twenty Cent, MS66
Green Label Holder**

- 3302 1875-S MS66 PCGS. CAC. BF-15R, R.3.** A silver-gray type coin with glimpses of wheat-gold and powder-blue patina. Lustrous and essentially unabraded. A few diagonal mint-made roller marks cross Liberty's lower drapery, and the eagle shows occasional inexactness of strike. BF-15R is the re-marriage of BF-15, struck after BF-16. Housed in a green label holder. Population: 62 in 66 (3 in 66+), 5 finer (3/16). NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECES

- 3303 1875 PR62 PCGS.** From a generous first-year proof mintage of 1,200 pieces, this attractive PR62 specimen exhibits sharply detailed design elements and lightly marked surfaces, with slightly hazy reflective fields. NGC ID# 27GZ, PCGS# 5303

**1876 Twenty Cent
Toned Select Proof**

- 3304 1876 PR63 PCGS.** A glass reveals a few Mint-related planchet issues that result in faint lines across Liberty's cheek and hair as well as at the top-reverse legend and in the adjacent field. Other marks are visible at Liberty's foot and in the nearby right field. Still, the fields are nicely mirrored, allowing attractive blue and rose toning to disguise the planchet issues. 1,500 proofs were struck — the most proofs in any year of the short-lived series. NGC ID# 27H3, PCGS# 5304

1876 Twenty Cent, Patinated PR66

- 3305 1876 PR66 NGC.** The brightly reflective fields of this Premium Gem proof twenty cent piece shine through mottled green and blue patina, creating strong eye appeal. The strike is sharp throughout both sides. The 1876 Philadelphia issue is the only one of the year that can be obtained in any format, given the great rarity of the 1876-CC twenties. Census: 6 in 66, 5 finer (3/16).
Ex: Long Beach Signature (Heritage, 9/2010), lot 3896; Long Beach Signature (Heritage, 2/2012), lot 3434. NGC ID# 27H3, PCGS# 5304

**1876 Twenty Cent Piece, PR66
Outstanding Registry Set Candidate**

- 3306 1876 PR66 PCGS.** The general public disliked the twenty cent piece, because of its similarity to the contemporary Seated Liberty quarter, which led to confusion and frequent short changing in everyday transactions. The coin was somewhat popular with collectors, however, and a generous mintage of 1,500 proof twenty cent pieces was accomplished in 1876. This spectacular Premium Gem exhibits sharply detailed design elements and deeply reflective fields under vivid shades of cerulean-blue and greenish-gold toning. Population: 14 in 66, 0 finer (3/16). NGC ID# 27H3, PCGS# 5304

**1877 Twenty Cent, PR63
Modest Field-Motif Contrast**

- 3307 1877 PR63 PCGS. BF-1, R.3.** Walter Breen, in his proof *Encyclopedia*, speculated on a 3:5 ratio of surviving 1877 to 1878 twenty cent pieces, respectively. This figure remains fairly consistent with population data from PCGS and NGC, which show the 1877 to be the slightly scarcer date. This piece offers brilliant silver-gold fields with the luster a bit muted and lightly hairlined. The contrast is nearly sufficient for a Cameo designation.
Ex: Denver Signature (Heritage, 8/2006), lot 1058. NGC ID# 27H4, PCGS# 5305

EARLY QUARTERS

1804 Quarter, B-1, Fine Details Evenly Worn and Well-Detailed

- 3308 1804 B-1, R.3 — Whizzed — NGC Details. Fine.** Tompkins Die State 2/2. The 1804 is a key date among Draped Bust quarters, second only to the 1796 Small Eagle issue. This piece is evenly worn with complete rims and pleasing detail on the central devices. Both sides display mottled grayish toning. The surfaces have a pickled/granular appearance under a loupe, which NGC recognizes as the result of whizzing. NGC ID# 379C, PCGS# 38921 Base PCGS# 5312

1804 B-1 Quarter, Fine 12 'Circulated Cameo' Appearance

- 3309 1804 B-1, R.3, Fine 12 PCGS.** Tompkins Obverse Die State 2, showing a "collar" die clash before Liberty's bust and a small rectangle under the chin. This is an evenly circulated coin-gray example of this date, the first year of the Draped Bust, Heraldic Eagle design among the quarter denomination. There are no bothersome marks, and the lighter-colored devices on both sides give this coin a great "circulated cameo" appearance." This is about a typical grade for certified survivors. This piece is encapsulated in a green-label holder. NGC ID# 379C, PCGS# 38921 Base PCGS# 5312

- 3310 1805 B-1, R.4 — Scratch — PCGS Genuine. AU Details.** Quarters were produced in substantial numbers for the first time in 1805, with a reported mintage of 121,394 pieces struck. Five die varieties are known for the date. This attractive specimen represents the very scarce B-1 variety, with the flag of the 5 touching the bust and the upright of the E in STATES just right of the cloud break. Dentils were added to the obverse master die for the first time in 1805, rather than being punched into the working die, but this innovation was not fully integrated into the hubbing process until the 1830s.

The present coin shows just a trace of actual wear on the high points of the design elements, which were strongly impressed in most areas, with just a touch of the usual softness on the central reverse stars. The pleasing blue-steel and dove-gray surfaces are lightly abraded, aside from the noted scratches, one in the right obverse field and the other from the 1 in the date to the rim. The B-1 variety is especially elusive in high grade.

Ex: Harlan Page Smith; Byron Reed; City of Omaha, Nebraska; Durham Western Heritage Museum; Byron Reed Collection (Spink America/Christie's, 10/1996), lot 304; present consignor. NGC ID# 4DEZ, PCGS# 38923 Base PCGS# 5313

- 3311 1805 B-3, R.1 — Cleaning — PCGS Genuine. AU Details.** Tompkins Die State 5/3. A richly detailed pearl-gray representative with minimally abraded but moderately glossy surfaces. The dies were slightly misaligned, such that the E in LIBERTY and the tail feathers are incompletely brought up. The remainder of the strike is good. NGC ID# 23RC, PCGS# 38925 Base PCGS# 5313

1805 Quarter, B-3, AU50 Attractive, Original Coloration

- 3312 1805 B-3, R.1, AU50 NGC. CAC.** Tompkins Die State 5, terminal. Severely clashed and cracked. B-3 is an available variety, suitable for type purposes. Nonetheless, CAC-endorsed, original AU examples such as this are seldom seen. The strike is even and well-centered, with the only mentionable weakness observed on the peripheral stars. Lavender-gray toning blankets satiny luster on both sides, while tinges of russet, gold, and amber also appear in the protected areas. An outstanding Draped Bust type coin. NGC ID# 23RC, PCGS# 38925 Base PCGS# 5313

- 3313 1806 B-3, R.1, Fine 15 PCGS.** Tompkins Die State 2/2. A silver-gray Draped Bust type representative. The centers are lightly brought up but the wings are well defined for the Choice Fine grade. Free from any consequential abrasions. NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

- 3314 1806 B-3, R.1, VF35 PCGS. CAC.** Tompkins Die State 3/4. Rich walnut-brown toning embraces this minimally marked and moderately circulated Draped Bust type coin. The centers are lightly brought up, customary for the variety. NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

- 3315 1806 B-5, High R.4, VF30 NGC.** Tompkins Die State 4/5, although most of the reverse die cracks are faint. This important quarter is rare and always in demand. Both sides exhibit delicate steel, gold, and orange toning on the ivory surfaces. Trivial imperfections on each side are consistent with the grade. PCGS# 38931 Base PCGS# 5314

1806 B-9 Quarter, XF40 Late Die State, Minimal Marks

- 3316 1806 B-9, R.1, XF40 PCGS.** Tompkins Die State 6/5. A pleasing and nicely defined cream-gray and steel-blue representative. The only noticeable mark is a thin line on the shield. The central reverse is lightly brought up, as usual for B-9. A late die state with cuds, clashes, and a bisecting obverse crack. NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

- 3317** 1807 B-2, R.3, VF20 NGC. Light caramel-gold toning visits this nicely detailed and unblemished Draped Bust quarter. The usual die state with a “collar” clash on the bust and a radial crack at 8 o’clock on the reverse. A smooth, problem-free example with considerable appeal for the grade.
Ex: Mid-Winter ANA (*Heritage*, 2/1984), lot 939; New York Signature (*Heritage*, 3/2012), lot 3309.. NGC ID# 23RF, PCGS# 38941 Base PCGS# 5316

BUST QUARTERS

1818 B-9 Quarter, VF20 Rare Die Variety

- 3318** 1818 B-9, High R.5, VF20 PCGS. CAC. The 1818 B-9 quarter is a middling rarity within this high-mintage date, the first issued since 1815 and one of 10 die varieties known for the year. The obverse of this variety is easily identified by three dentils beneath the first 1 being quite close together, as well as by the spur from star 2. A double dentil appears on the reverse (a die shared with the 1818 B-7) below the C in the denomination, whose 25 leans rightward. This is an earlier die state than the famous late stage where bold arrow die clashes show above Liberty’s head. The surfaces of this midgrade circulated coin show gray-blue patina outlining the rose-gray devices, creating an attractive “circulated cameo” appearance. Minor scrapes and bumps are consistent with the grade but none in themselves overt. A hefty vertical die crack runs though the left upright of the N in UNITED. An exceedingly attractive example of this rare variety. For the B-9, Population: 1 in 20, 1 finer. For the date, CAC reports 11 in VF20 and about six dozen finer (3/16). NGC ID# 23RH, PCGS# 38950 Base PCGS# 5322

- 3319** 1819 Large 9, B-2, R.3 — Cleaning — PCGS Genuine. AU Details. Tompkins Die State 4/1. Browning-2 is an elusive issue in AU or finer grades. The present coin is an attractive specimen, with just the slightest touch of actual wear on the well-detailed design elements. We note an obverse rim nick at 9:30. The pleasing slate-gray surfaces are lightly abraded, but the luster is muted by a light cleaning sometime in the past. NGC ID# 23RK, PCGS# 38957 Base PCGS# 5326

1824/2 Quarter, B-1, XF45 Well-Detailed, Lightly Patinated

- 3320** 1824/2 B-1, R.3, XF45 PCGS. The fields have a glossy texture, while the relief elements show minor high-point wear but retain bold detail. This Choice XF 1824/2 quarter displays mottled gray-gold toning with tinges of teal around the reverse periphery. The overdate feature is present on all 1824 quarters, as only one die pairing was employed for coinage. NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

1824/2 Quarter, B-1, AU55 Conditionally Elusive

- 3321** 1824/2 B-1, R.3, AU55 NGC. B-1 is the only die variety for the 1824 quarter, employing an overdated obverse with an underlying 2 evident in the recesses of the 4. The 1824/2 quarter is a recognized scarcity in all grades, but is sometimes available in lower circulated levels; cleaned or otherwise damaged pieces in this grade range are seemingly abundant. In XF, this issue becomes distinctly rare, and AU coins are exceedingly so; only five Mint State pieces are reported by NGC and PCGS combined, the finest a sole Gem example at NGC, possibly the same as the Eliasberg Gem, formerly from the John G. Mills Collection.

This piece shows hints of luster in the peripheral recesses, with pale lavender-gray toning that shows the occasional splash of amber-gold, olive, and aquamarine color. The strike is even and the devices exhibit just slight high-point wear. A pleasing, upper-end example of this conditionally rare issue. NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

1824/2 B-1 Quarter, Near-Mint

- 3322** 1824/2 B-1, R.3, AU58 NGC. Rich cobalt-blue and apple-green toning blankets this briefly circulated better date Bust quarter. The borders exhibit luster, and the strike is sharp except on the claws. The fields exhibit only incidental contact. The sole 1824-dated marriage, and an underappreciated scarcity overshadowed by the rare 1823 and 1827 dates. Census: 4 in 58, 3 finer (3/16). NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

**1831 Quarter, B-2, MS64
First-Year Type Coin**

- 3323 1831 Small Letters, B-2, R.2, MS64 NGC.** Tompkins Die State 1/3. The Capped Bust quarter design was slightly modified in 1831, reworked for a planchet 2.7 mm smaller in diameter. The motto E PLURIBUS UNUM and its ribbon were also removed from the reverse. This piece is boldly struck with satin luster. Much of each side is light golden in color, although the right obverse margin has violet, gold, and gunmetal-blue toning. There are no major abrasions, although some light slide marks are visible with a loupe. NGC ID# 23RW, PCGS# 38981 Base PCGS# 5348

**1834 B-4 Quarter, Toned MS64
Appealing Type Coin**

- 3326 1834 B-4, R.1, MS64 PCGS.** Tompkins Die State II. Star 1 is relatively close to the bust while OF is distant from AMERICA on the reverse of this available variety — making this near-Gem a perfect type coin to represent the series-ending years. Star 10 is repunched, and some die cracks show at STATES OF and on many of the lower reverse elements. Appealing silver, gray, and green patina alternates to good effect on surfaces free of all but scattered light marks. NGC ID# 23RZ, PCGS# 38995 Base PCGS# 5353

**1831 Small Letters Quarter, MS64
Rare Browning-3 Variety**

- 3324 1831 Small Letters, B-3, R.5, MS64 PCGS. CAC.** B-3 is a rare die variety, and it is very rare in Uncirculated grades. The 2008 Tompkins reference lists a Condition Census topped by a unconfirmed MS62 example and a scratched and tooled Uncirculated details specimen. In September 2015, Heritage auctioned an NGC MS65 Prooflike example, and a PCGS MS65 appeared in our March 2013 Signature, but the present well preserved piece could qualify as the third-finest known for the B-3 marriage. It is fully struck and satiny with dappled tan-brown and gunmetal-blue toning. NGC ID# 23RW, PCGS# 38982 Base PCGS# 5348

**1836 B-3 Quarter, MS62
Advanced Die State**

- 3327 1836 B-3, R.1, MS62 PCGS.** Tompkins Die State 5/4, nearly terminal — both dies are shattered, although the obverse is known in a slightly later stage before this pairing was retired. This Mint State Capped Bust type coin displays subtle luster beneath champagne and amber toning. The right-hand stars are weak, but the central devices display bold definition. Scattered abrasions limit the grade. Population: 10 in 62, 17 finer (3/16). NGC ID# 23S3, PCGS# 39007 Base PCGS# 5355

1832 Capped Bust Quarter, B-2, MS63

- 3325 1832 B-2, R.2, MS63 NGC.** The 1832 Capped Bust quarter is seldom encountered in high grade. This attractive Select specimen exhibits well-detailed design elements with the reverse slightly sharper than the obverse. The surfaces are lightly marked and the original mint luster is somewhat subdued by shades of lavender, gray, cerulean-blue, and greenish-gold toning. Census: 9 in 63, 20 finer (3/16). NGC ID# 23RX, PCGS# 38988 Base PCGS# 5351

- 3328 1838 B-1, R.1, AU58 NGC.** A lovely autumn-brown and dove-gray Borderline Uncirculated final-year Capped Bust type coin. The strike is crisp except on the upper left stars, and the satiny surfaces lack consequential contact. NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

1838 B-1 Quarter, Well-Preserved MS64

- 3329 1838 B-1, R.1, MS64 PCGS.** The obverse shows a point of star 7 aimed at Liberty's lower hair curl, while the reverse displays the 25 low at the bottom, with the 2 larger than the 5 and no tongue on the eagle. This reverse was also employed on the B-2 variety of 1837, but these dies are the sole die pair known for 1838. This near-Gem example boasts lightly toned ivory-gray surfaces on the reverse while the obverse is more extensively patinated in central rose-gold and peripheral ice-blue. Excellent preservation prevails throughout both sides. The central strike is decent, although most of the stars are soft on the obverse and the lower olive leaves weak on the reverse. For the variety and date combined, Population: 19 in 64, 9 finer (3/16). The last example we offered in this exact grade and service was in our Houston Money Show Signature (Heritage, 12/2015), lot 1227, which brought \$5,405. NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357
-

SEATED QUARTERS

- 3330 1838 No Drapery AU58 NGC.** An attractive, sharp example of the debut Seated Liberty quarter issue, showing the slender No Drapery figure of Liberty. Some original luster remains in the protected regions of the fields amid olive-gold toning, while the interiors have lighter champagne color. There are no mentionable abrasions. NGC ID# 23SE, PCGS# 5391
- 3331 1839 No Drapery, Very Long Claws, AU53 PCGS.** The Very Long Claws reverse is a very rare variety, especially in high grade. Larry Briggs knew of only a single example in 1991, but a few more have surfaced since, although none have been certified as such by either of the leading grading services. An MS63-graded example sold for \$2,937 in 2014. This attractive AU53 specimen is lightly worn and lightly abraded with pleasing surfaces that show highlights of greenish-gold and lavender toning. NGC ID# 23SF, PCGS# 5392
- 3332 1840-O Drapery MS61 NGC. Briggs 2-C.** From a low mintage of 43,000 pieces, this attractive Mint State example shows a die crack in the obverse shield and the Small O mintmark is centered over the R in QUAR. The design elements are sharply detailed and the surfaces show fewer contact marks than expected from the grade. Census: 6 in 61, 20 finer (3/16). NGC ID# 23SJ, PCGS# 5398
- 3333 1844-O AU58 PCGS. CAC. Briggs 1-A, Flynn RPD-001.** The 4s in the date are repunched below the crossbars. A well struck and unblemished near-Mint New Orleans quarter. The silver-gray surfaces exhibit a few flecks and freckles. The '44-O is surprisingly scarce in the present quality, although well-worn examples are fairly plentiful. NGC ID# 23SU, PCGS# 5407
- 3334 1853 Arrows and Rays MS62 ANACS.** A well-struck Arrows and Rays type coin with satiny luster that displays blended gold, lavender, and green-gray toning over each side. A small reed mark in the right obverse field is the only singular abrasion, although light chatter appears on the figure of Liberty. Housed in an old, small size white ANACS holder. NGC ID# 23U4, PCGS# 5426

1853 Arrows and Rays Quarter, MS64 Appealing for the Grade

- 3335 1853 Arrows and Rays MS64 PCGS.** The 1853 Arrows and Rays quarter is inherently popular as a one-year type-coin issue, although pieces grading finer than MS64 are rare. This collectible Choice example displays satiny luster and bold design elements. There are no obvious abrasions, although a few faint lines preclude Gem classification. PCGS lists 29 finer submissions (3/16). NGC ID# 23U4, PCGS# 5426
-

1853 Seated Liberty Quarter, MS64+ Short-Lived Arrows and Rays Type

- 3336 1853 Arrows and Rays MS64+ PCGS.** The popular Arrows and Rays design was instituted in 1853 to signify a weight change. This high-end Choice specimen displays sharply detailed design elements, with an interesting die crack through the bottom of the date and another from the rim at 4 o'clock, past Liberty's toe, and through the arrow head. The lustrous surfaces show hints of lavender-gray and golden-brown toning. PCGS has graded 29 numerically finer examples (2/16). NGC ID# 23U4, PCGS# 5426
- 3337 1854 Arrows MS64 PCGS.** Medium plum-red and apple-green toning graces the margins of this boldly struck and coruscating near-Gem. The centers are stone-gray, and both sides are unblemished. Briggs' "compass point" reverse with a small circular area absent from the shield atop the first stripe. NGC ID# 23U6, PCGS# 5432
- 3338 1854-O Huge O, Briggs 1-A, FS-501, VF20 PCGS.** An unusually attractive example of this iconic variety, showing an abnormally large and misshapen mintmark that was likely cut into the die by hand. Gunmetal-gray toning characterizes the fields, while the relief elements offer a "circulation cameo" effect with lighter hues. A problem-free coin. Population: 6 in 20, 33 finer (3/16). NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

1857 Seated Quarter, Rim-Toned MS66
Ex: Gene Gardner

- 3339 1857 MS66 PCGS. CAC.** The large mintage of 1857 Seated quarters may be partially explainable by the withdrawal of the “old copper” cents and large cents beginning in February-March 1857, via legislation that also introduced nickel as a coinage material; but every Seated silver denomination, save the silver dollar, saw large mintages in this year. This lovely Premium Gem boasts untuned silver-white centers bounded by rose-cinnamon and blue-green rim toning on surfaces that are well-struck and nicely preserved for the grade. A great type-coin representative of this relatively available date. Population: 40 in 66 (5 in 66+), 9 finer. CAC: 11 in 66, 10 finer (2/16).

Ex: Bowers and Merena (3/2002), lot 2246; Gene Gardner; Gardner Collection, Part IV (Heritage, 10/2015), lot 98435, as MS66 NGC, brought \$3,995. NGC ID# 23TE, PCGS# 5442

- 3340 1859 MS64 PCGS. CAC.** This sharply detailed Choice example shows an extensive network of die cracks between letters in the reverse legend and the arrowheads. The lustrous surfaces are lightly marked and blanketed in dusky shades of greenish-gold and magenta toning. Population: 45 in 64 (1 in 64+), 13 finer (3/16). NGC ID# 23TL, PCGS# 5448

- 3341 1859 MS64 PCGS. CAC.** Type One Obverse and Reverse. Deep gunmetal-gray and sea-green toning encompasses this coruscating and boldly struck near-Gem. The surfaces are refreshingly free from detractors. The obverse matches Briggs-3 but the reverse lacks the die cracks of Briggs-c. NGC ID# 23TL, PCGS# 5448

1859 Seated Quarter, Sharp MS65
Struck From the Proof Dies

- 3342 1859 MS65 NGC. Briggs 1-A,** the proof dies, showing the ball of 5 centered between dentils and various unfinished details in the shield lines on the reverse. This is a luminous example of one of the few No Motto quarter issues to be available in Gem condition, albeit as a rarity. The surfaces are well-defined all around, even on those obverse stars that are typically found weak. A few old marks are covered over in charming silver-blue, slate, and rose-gray patina. Census: 9 in 65 (1 in 65+), 1 finer (3/16). NGC ID# 23TL, PCGS# 5448

1860-S Seated Quarter, VF25
Series Key Date, Exceptional Example

- 3343 1860-S VF25 PCGS. CAC.** With a mintage of just 56,000 pieces, this San Francisco issue is an unquestioned key to the series in all grades and seldom available in original, unimpaired condition. This VF25 example earns CAC endorsement for its overall surface quality and exceptional eye appeal. Abrasions are softened by moderate wear, but the raised elements remain remarkably bold including the dentils and undisturbed rims. Warm-gray patina harbors deep-gray toning in the recesses. The reverse legend and denomination are complete. It is hard to imagine a finer 1860-S for the grade. Population: 5 in 25, 17 finer (2/16). NGC ID# 442R, PCGS# 5453

- 3344 1863 MS64 PCGS. Briggs-Unlisted,** although the notching or die-doubling on QUAR on the lower reverse identifies the proof die — but the date is in a slightly different position from the 4-D proof die marriage. At any rate, this near-Gem shows a nice sharp strike on untuned silver-white surfaces. Some light die clashing shows in the fields on both sides, along with scattered, grade-defining ticks. Population: 15 in 64, 29 finer (3/16). NGC ID# 23TX, PCGS# 5458

1870-CC Quarter, AG3
Collectible Carson City Rarity

- 3345 1870-CC AG3 PCGS. Briggs 1-A.** With a mintage of just 8,340 pieces, the 1870-CC Seated quarter is one of those key dates from the series that is often impossible for budget-conscious collectors to acquire. Here is a low-end example that may be just right for the casual series collector or Carson City enthusiast. The upper obverse and lower reverse rims are worn, resulting in the sub-Good grade, but all peripheral lettering is readable, and the BER in LIBERTY remains visible. The surfaces have original steel-gray patina with deeper gunmetal hues in the fields. A loupe reveals scattered old, worn scratches in the fields, which do not affect the About Good 3 designation. Population: 7 in 3, 45 finer (3/16). NGC ID# 23UL, PCGS# 5477

**1870-CC Quarter, VF Details
Key Carson City Issue**

- 3346 1870-CC — Cleaning — PCGS Genuine. VF Details. Briggs 1-A.** The 1870-CC quarter is a key-date rarity in all grades, and only a single Mint State coin is known. This VF-level example will appeal to a range of budget-conscious collectors. Both sides display deep gunmetal-gray toning, but beneath the patina are scattered hairlines that denote an old cleaning. The Carson City Mint struck only 8,340 quarter dollars in its first year of operation, and most were lost to attrition — not unusual for early CC-mint issues of any denomination. NGC ID# 23UL, PCGS# 5477

**1873 No Arrows, Closed 3 Quarter, AU55
Elusive Melt Rarity**

- 3347 1873 No Arrows, Closed 3 AU55 PCGS. Briggs 2-B,** showing the date sloping downward left to right and a prominent die lump below the shield, in the tail feathers. After the early strikings of 1873 coinage made the 3 in the date look like another 8, another Open 3 logotype was produced and implemented. (This problem recurred 50 years later with the Peace dollar, but no such change was made, much to the regret of collectors with weak eyesight.) The coin on offer is a Closed 3 1873 quarter with just a touch of wear on silver-blue surfaces that retain largely intact luster. Even with the low mintage of 40,000 pieces the issue is far more elusive still, as most were melted at the Mint when the Arrows motif was reintroduced. Population: 4 in 55, 5 finer (3/16).
Ex: FUN Signature (Heritage, 1/2015), lot 4574, which brought \$5,405. NGC ID# 23UU, PCGS# 5484

- 3348 1873 Arrows MS64 PCGS.** Well-struck and satiny, with dusky olive-gray toning over lustrous fields. There are no singularly mentionable abrasions. The 1873 Arrows quarter is scarce this fine and rare at the Gem level. Population: 38 in 64, 27 finer (2/16). NGC ID# BZMG, PCGS# 5491

**1873 Arrows Quarter, MS66+
Only One Finer Coin at PCGS**

- 3349 1873 Arrows MS66+ PCGS. Briggs 3-B.** The popular Arrows design lasted only two years (1873-1874), when a change in the weight of U.S. subsidiary silver coins was instituted to discourage hoarding and return coinage to circulation. This high-end Premium Gem offers well-detailed design elements and well-preserved surfaces with vibrant mint luster on both sides. Population: 14 in 66 (2 in 66+), 1 finer (2/16). NGC ID# BZMG, PCGS# 5491

- 3350 1874-S Arrows MS64+ NGC. CAC. Briggs 1-A.** Faint almond-gold toning accompanies lustrous and unblemished surfaces. A splendid Arrows, Motto branch mint type coin. The strike is sharp except for star 8. CAC Population: 6 in MS64, 10 finer. NGC ID# 23VY, PCGS# 5495

**1876-CC Quarter Dollar, MS66
Attractive Peripheral Color**

- 3351 1876-CC MS66 NGC.** After the limited Carson City quarter dollar mintages of the first few years, production spiked substantially upward, with numerous high-grade survivors. Beginning in 1875, most Carson City coins are much more plentiful than earlier-dated issues. This beautiful Premium Gem is fully lustrous with bold design details and satin surfaces, enhanced by gold, blue, and iridescent toning. Census: 11 in 66, 2 finer (3/16).
Ex: Long Beach Signature (Heritage, 9/2008), lot 1863. NGC ID# 23V3, PCGS# 5502

- 3352 1877 MS65 PCGS.** Glowing sunset-orange and pale yellow-green toning makes it appear as though the sun is setting behind Liberty on the obverse of this gorgeously toned Gem 1877 quarter. Other areas feature dove-gray, pale almond, and ice-blue patina amid excellent strike sharpness and minimal marks. An interesting die crack encircles much of the reverse periphery. NGC ID# 23V5, PCGS# 5504

- 3353 1877-CC MS65 NGC.** Gleaming, untuned, silver-white surfaces boast prodigious luster and a nice sharp strike on this well-preserved Seated quarter. The Carson City Mint pumped out more than 4.1 million examples of this date during the salad days of its existence (and not coincidentally overlapping the peak production years of the nearby Comstock Lode, lasting through about 1878). The surfaces are quite well-struck and enormously appealing throughout. Census: 39 in 65 (1 in 65+), 22 finer (2/16). NGC ID# 23V6, PCGS# 5505

**1878 Quarter, Premium Gem
Delicately Toned Registry Candidate**

- 3354 1878 MS66 PCGS.** Each side of this Premium Gem progresses from pale gold and lavender-gray interiors to sea-green and aqua-blue peripheries. Better-defined at the centers than the margins, though the all-around eye appeal is uniform. PCGS and NGC have yet to examine a Superb Gem example of the issue. Population: 11 in 66 (3 in 66+), 0 finer (3/16).
Ex: *Central States Signature* (Heritage, 4/2012), lot 3966. NGC ID# 23V8, PCGS# 5508

- 3355 1878-CC MS63 PCGS. Briggs 2-B.** Sharply struck and lustrous with a trace of straw-gold toning on each side. A small spot is west of the cap. Unabraded aside from delicate horizontal obverse hairlines.
Ex: *New York Signature* (Heritage, 3/2012), lot 3330, which realized \$1,437.50. NGC ID# 23V9, PCGS# 5509

**1887 Quarter, Toned MS67
Glowing Mint Luster**

- 3356 1887 MS67 PCGS. Briggs 1-A.** This glowing Superb Gem displays frosty and undisturbed luster, accented by blended olive-gray, lavender, and bluish-gold toning on each side. The strike is bold on the reverse, but several obverse stars lack full radials. The 1887 quarter was a low-production 10,000-coin issue. Population: 19 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 23VK, PCGS# 5519

- 3357 1888-S MS65 NGC.** The 1888-S quarter was the sole respite from a decade-long run of tiny quarter mintages that stretched from 1879 to 1889. More than 1.2 million pieces were struck and, apparently, they were sorely needed in commerce because few high-grade coins survive. This semiprooflike representative displays areas of cerulean-blue and peach-gold toning and a sharp strike on the raised elements. LIBERTY is bold, unlike some examples of the issue. Census: 13 in 65, 6 finer (3/16). NGC ID# 23VN, PCGS# 5521

- 3358 1891-S MS65 PCGS. CAC.** An outstanding San Francisco Mint Seated Liberty quarter from the final year of the design, this Gem exhibits frosty silver luster that shines through the gorgeous pastel toning that is reminiscent of old-time collections. Population: 19 in 65, 7 finer (3/16). NGC ID# 23VT, PCGS# 5526

PROOF SEATED QUARTERS

1857 Quarter, Brightly Reflective PR66

- 3359 1857 PR66 NGC.** Deeply reflective fields shine brightly through reddish-golden central toning that turns faintly blue around the margins. As expected of this Premium Gem proof, all of the devices are fully brought up. CoinFacts estimates that perhaps 30 to 40 proof 1857 quarters survive. This is the last issue before the Mint began striking minor and silver proof coinage in larger quantities in 1858. This example is tied with three other PR66 coins at NGC, while PCGS also reports four coins at the PR65 level. There are no finer submissions at either service (3/16).
Ex: *FUN Signature* (Heritage, 1/2013), lot 5763; *Central States Signature* (Heritage, 4/2013), lot 4229; *Chicago Signature* (Heritage, 8/2013), lot 5595. NGC ID# 23WJ, PCGS# 5553

- 3360 1862 PR63 PCGS.** The 1862 is one of several low-mintage proof quarters issued during the Civil War, in this case with a production of 550 pieces. Survivors are elusive in high grade and hardly exist with cameo contrast. This Select example is boldly rendered with modest field-device contrast that falls just shy of warranting a designation. The interiors are brilliant, and the borders show light golden toning. NGC ID# 23WP, PCGS# 5558

**1862 Quarter, PR66
Tied for Finest, Ex: Gardner**

- 3361 1862 PR66 PCGS.** Breen (1988) writes that 550 proofs were struck for sets. Somewhat more than 430 pieces were sold, and the rest melted. A medley of cobalt-blue, lavender, violet, and gold-brown patination adorns the obverse of this Premium Gem proof, while soft sky-blue fields accent violet hues over the central reverse. Razor-sharp design detail and impeccable preservation round out the delightful eye appeal. Certified in a green-label holder. Population: 6 in 66, 0 finer (3/16).
Ex: *Larry Whitlow to Gene Gardner* (5/2008); *Eugene H. Gardner Collection, Part III* (Heritage, 5/2015), lot 98382. NGC ID# 23WP, PCGS# 5558

**1863 Quarter, Colorful PR66+
A Top-Graded Proof at PCGS**

- 3362 1863 PR66+ PCGS.** In the midst of the Civil War, the Mint only struck 191,600 circulation-strike quarters in 1863 plus 460 proofs. The mintage is the second lowest among commercially produced Seated Liberty quarter proofs after the first-year 1858. This wonderfully toned Premium Gem proof features lavender-rose interiors that turn to shades of violet and blue at the margins. The patina inhibits field-device contrast to a degree, but the visual quality is no less impressive. Population: 10 in 66 (2 in 66+), 0 finer (3/16). NGC ID# 23WR, PCGS# 5559

1867 Seated Quarter, PR65 Cameo

- 3363 1867 PR65 Cameo PCGS.** Delicate champagne toning graces the obverse and reverse surfaces of this Gem Cameo proof. The sharply defined devices are frosty and lustrous, and they contrast nicely with the deeply mirrored fields of this beauty. Population: 8 in 65 Cameo, 7 finer (3/16). NGC ID# 23WY, PCGS# 85566
- 3364 1870 PR65 Cameo NGC.** Very lightly toned with a hint of lemon color. The strike is razor-sharp, and the fields are extremely well-preserved. There is a minor planchet flaw (as struck) above the olive leaves. The frosty devices have irrefutable cameo contrast with the dark, reflective fields. Although 1,000 proof 1870 Quarters were struck, the low PCGS and NGC populations imply that the majority of the production has not survived. Most proofs of this issue are in PR62 to PR64 grades. Cameo Gems are very rare. Census: 9 in 65 Cameo, 6 finer (3/16). NGC ID# 29XD, PCGS# 85569
- 3365 1873 Arrows PR64 PCGS. Briggs 5-D.** Sky-blue, fire-red, sun-gold, and jade-green encompass the obverse. The eye-catching reverse has a brilliant field and eagle, bounded by narrow peripheral bands of lavender-red and cobalt-blue. The Arrows and Motto subtype was struck for only two years, and proofs of that design are scarce. NGC ID# 23XR, PCGS# 5574

**1873 Arrows Quarter, PR65
Beautiful Multicolor Toning**

- 3366 1873 Arrows PR65 PCGS.** The With Arrows 1873 proof quarter is rare in Gem condition. This piece displays sharp detail and reflective fields with significant cameo contrast penetrating the deep toning on each side. Vivid lavender-gray, sun-orange, blue, and mint-green paint the surfaces. Eye appeal is exceptional. Population: 12 in 65, 4 finer (2/16). NGC ID# 23XR, PCGS# 5574

**1877 Seated Liberty Quarter, PR66 Cameo
Deeply Reflective Fields, Strong Contrast**

- 3367 1877 PR66 Cameo PCGS. Briggs 1-B.** Conditionally rare in PR66 Cameo, this brilliant example displays thickly frosted central devices on glassy, deeply mirrored fields for strong white-on-black contrast. A pinpoint-sharp strike attends lightly rusted dies that were employed on both sides, with faint die cracks in and among the reverse legend, denomination, olive leaves, and arrow points. Few proofs are finer with the Cameo designation. Population: 3 in 66 Cameo, 4 finer (2/16). NGC ID# 23X9, PCGS# 85578
- 3368 1880 PR64 Cameo PCGS. CAC.** The surfaces of this near-Gem proof show a few hairlines but are well-contrasted and completely untuned, accenting the thick device frost and nicely mirrored fields. The business strikes of this year saw only 13,600 pieces coined plus a complement of 1,355 proofs. A sharply struck and pleasing coin. Population: 27 in 64 (1 in 64+) Cameo, 41 finer. CAC: 6 in 64 Cameo, 19 finer (2/16). NGC ID# 23XC, PCGS# 85581
- 3369 1880 PR65 Cameo PCGS.** Bright proof surfaces are lightly toned on the obverse. A toning spot is noted on the reverse shield. The design elements are crisply impressed, and the surfaces are lovingly preserved. Population: 6 in 65 Cameo, 35 finer (3/16). Ex: FUN Signature (Heritage, 1/2005), lot 6469. NGC ID# 23XC, PCGS# 85581
- 3370 1881 PR65 PCGS. Briggs 2-B.** Both 8s in the date are repunched within the loops. The same obverse die struck all 975 proofs. A fully struck specimen bathed in iridescent ruby-red, apple-green, and lemon-gold patina. Undisturbed, unabraded, and desirable. NGC ID# 23XD, PCGS# 5582

1882 Seated Liberty Quarter, PR66 Cameo
Rarely Seen Finer

- 3371 1882 PR66 Cameo PCGS. Briggs 2-B.** A spectacular Premium Gem representative, from a proof mintage of 1,100 pieces, this coin exhibits sharply detailed design elements with a rich coat of mint frost that contrasts boldly with the deeply mirrored fields to create a dramatic cameo effect. Well-preserved brilliant surfaces add to the outstanding eye appeal. Population: 17 in 66 (6 in 66+) Cameo, 4 finer (2/16). NGC ID# 23XE, PCGS# 85583

- 3372 1884 PR66 PCGS. Briggs 2-B.** Ocean-blue, plum-red, orange, and stone-gray occupy this satiny and precisely struck Premium Gem. An undisturbed and desirable representative of the proof production of 875 pieces. NGC ID# 3TWH, PCGS# 5585

1886 Quarter, PR66 Cameo
Conditionally Elusive

- 3373 1886 PR66 Cameo PCGS. CAC. Briggs 2-B.** A sharp Premium Gem proof with reflective fields and frosty, contrast devices. Both sides are light golden in color with the patina deepening toward the borders. There are no mentionable marks or hairlines. Due to the scarcity of the circulation-strike 1886 quarter in high grade, this proof example presents a more affordable alternative for the date collector. NGC ID# 23XJ, PCGS# 85587

BARBER QUARTERS

- 3374 1892 MS66+ NGC.** A sharp strike and vibrant luster adorn this high-end first-year Barber type coin, displaying smooth surfaces and uniform toning. Both sides show aquamarine, lavender-gray, and pale champagne patina. NGC lists 30 finer submissions (2/16). NGC ID# 23XT, PCGS# 5601

1893 Barber Quarter, MS66
Only One Numerically Finer at PCGS

- 3375 1893 MS66 PCGS. CAC.** The 1893 Barber quarter is a rare issue at the MS66 grade level, and finer examples are virtually unobtainable. This spectacular Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved, lustrous surfaces are blanketed in attractive shades of lavender-gray toning, with hints of pale gold at the rims. Population: 16 in 66 (2 in 66+), 1 finer (2/16). NGC ID# 23XW, PCGS# 5604

- 3376 1895 MS65 PCGS.** This frosty and sharply struck Gem example of this early Barber quarter issue exhibits brilliant silver luster beneath delicate gold toning on the obverse, and rich reddish-gold toning on the reverse. A lovely coin, somewhat more elusive than generally realized. Population: 40 in 65 (1 in 65+), 28 finer (3/16). NGC ID# 23Y4, PCGS# 5610

1896 Barber Quarter, MS66
Sharply Detailed, Lustrous Example

- 3377 1896 MS66 PCGS. CAC.** This delightful Premium Gem representative exhibits sharply detailed design elements throughout and vibrant mint luster radiates from both sides, under attractive shades of lavender-gray and pale gold toning. The well-preserved surfaces add to the outstanding visual appeal. Population: 17 in 66 (3 in 66+), 5 finer (2/16). NGC ID# 23Y7, PCGS# 5613

- 3378 1896-S Fine 12 PCGS.** Famously among the three big keys of the Barber quarter series, the 1896-S is elusive in the middle circulated grades. This piece displays battleship-gray surfaces that deepen slightly in the fields. LIBERTY is mostly clear. An old, thin scratch on the upper-right obverse is not significant. NGC ID# 23Y9, PCGS# 5615

1896-S Quarter, VF25
Attractive Collector Coin

- 3379 1896-S VF25 PCGS.** The 1896-S is one of the three big key dates in the Barber quarter series, boasting a mintage of only 188,039 pieces. This midgrade circulated example displays original olive-gold and tan-gray toning over smooth, problem-free surfaces. Wear is even over each side. Eye appeal surpasses expectations for the issue. NGC ID# 23Y9, PCGS# 5615

1896-S Quarter, Patinated XF40
Appealing Collector Coin

- 3380 1896-S XF40 PCGS.** Most surviving 1896-S quarters grade VF or lower, making this XF coin elusive and highly sought-after. The strike is bold and wear is slight. Both sides display natural gunmetal-blue and steel-gray color with the deeper hues painting the fields. This key San Francisco issue boasts a small mintage of 188,039 pieces — only those of the 1901-S and 1913-S are lower. NGC ID# 23Y9, PCGS# 5615

1897-O Quarter, Elusive Toned Gem

- 3381 1897-O MS65 PCGS.** Lovely orange-rose patina prevails on the obverse with a pale complementary crescent of sky-blue, while the lighter-toned reverse is ivory-white save for scattered golden accents on the device interiors. The strike is far superior to most Mint State survivors of this issue including on the upper-right shield corner, even though a couple of the star centers on the obverse are less than sharp. An elusive date within the Barber quarter series despite a healthy mintage exceeding 1.4 million pieces. Population: 13 in 65, 20 finer (2/16). NGC ID# 23YB, PCGS# 5617

1898 Barber Quarter, MS68
Vivid Toning, Vibrant Luster
Tied for Finest Certified, Ex: Gardner

- 3382 1898 MS68 NGC.** The 1898 Barber quarter boasts a huge mintage exceeding 11 million pieces, but the issue is more difficult to locate in high grade than some other dates from later in the series. In itself, the bold strike and satiny luster combined with virtually no visible imperfections would easily qualify this 1898 Barber quarter as an MS68. Add the magnificent toning hues to the recipe, and you end up with one of the 1898 quarters we have ever seen. Amazing shades of bright-teal and magenta appear on the obverse. The reverse shows the same teal-blue about the periphery, gently fading to magenta, then mostly brilliant in the center. Only three other coins are this fine at NGC (one in MS68 ★), and there is just one MS68 at PCGS (3/16).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 6549; Eugene H. Gardner Collection (Heritage, 6/2014), lot 30423. NGC ID# 23YD, PCGS# 5619

1899-S Quarter, MS65
Razor-Sharp and Frosty

- 3383 1899-S MS65 PCGS.** The flashy, bright silver-white surfaces reveal splendid cartwheel effects in the fields. Other than a trivial nick or two on each side, this Gem example is well-preserved and certainly free of distractions. Most of the 708,000 quarters from this issue went directly into circulation, where they were either lost or worn into less desirable condition. Population: 7 in 65, 19 finer (3/16).
Ex: Long Beach Signature (Heritage, 5/2008), lot 382. NGC ID# 23YJ, PCGS# 5624

- 3384 1901 MS66 PCGS.** A spectacular Premium Gem example, with well-detailed design elements and satiny mint luster under vivid shades of greenish-gold, lavender-gray, and violet toning. The well-preserved surfaces add to the considerable eye appeal. Population: 15 in 66 (1 in 66+), 2 finer (3/16). NGC ID# 23YN, PCGS# 5628

**1901-O Barber Quarter, MS64
Underrated New Orleans Issue**

- 3385 1901-O MS64 PCGS.** This important New Orleans Mint Barber quarter is overshadowed by the famous 1901-S issue. However, the 1901-O has is only slightly more populous in Mint State grades. This Choice example has rich golden-brown and iridescent toning over the entire obverse and reverse. A typical strike lacks bold peripheral details, but the surfaces are exceptional for the grade. Population: 14 in 64, 12 finer (3/16). NGC ID# 23YP, PCGS# 5629

**1901-S Quarter, Good 4
Collector-Grade Example**

- 3386 1901-S Good 4 PCGS.** An evenly worn, tan-gray example of this key Barber quarter issue. Other than a couple of amber toning spots on the upper portion of the portrait, the surfaces are uniform in color and tone. The obverse has a sharp rim, while the reverse border is weak in spots. The eagle and Liberty portrait are boldly outlined. NGC ID# 23YR, PCGS# 5630

**1904-O Quarter, MS65
Scarce This Well-Preserved**

- 3387 1904-O MS65 PCGS. CAC.** The 1904-O is a slightly better date among Barber quarters, particularly in high grade. This Gem CAC coin displays frosty luster and unusually well-struck design elements. Most of each side is champagne-tinged, although amber-red overtones emerge in the peripheral portions of the fields. A few trivial grazes on Liberty's cheek are all that limit the grade. Population: 12 in 65, 16 finer (3/16). NGC ID# 23YZ, PCGS# 5638

- 3388 1905 MS66 PCGS.** Pale blue-gray and russet patina complements areas with a light dusting of cinnamon over silver-gray color on this attractive and sharply struck Premium Gem quarter. The strike is quite well brought up on both sides, close to full, and the high points are free of all but minuscule ticks. Population: 19 in 66 (1 in 66+), 1 finer (3/16). NGC ID# 23Z2, PCGS# 5639

**1905-O Barber Quarter, MS65
Rich Iridescent Toning**

- 3389 1905-O MS65 PCGS.** Deep navy-blue and plum-red highlights frame the lighter tan centers of this extraordinary '05-O quarter. The strike is above average throughout and evidence of contact is limited to trivial grazes on the neck. Not only is this issue difficult to find well struck, but coins in the higher circulated grades are equally as scarce as Mint State survivors. Population: 11 in 65 (3 in 65+), 12 finer (3/16). NGC ID# 23Z3, PCGS# 5640

**1906 Quarter, MS66+
Original, Unmarked Surfaces
Ex: Gardner**

- 3390 1906 MS66+ PCGS. CAC.** Quarter dollar production dwindled to 3.6 million coins on the East Coast in 1906, continuing a four-year downward trend. The issue is accessible through Gem condition and becomes rare at the Premium Gem level. Glistening mint luster combines with a thin layer of violet patina and splashes of olive iridescence on this Premium Gem example. The obverse is a shade deeper in tone than the nearly brilliant reverse. Stars 11 to 13 lack full centers, but the portrait is well-defined. A touch of high-point incompleteness occurs over the eagle. A virtually pristine representative. Population: 27 in 66 (2 in 66+), 2 finer (3/16).
Ex: Purchased by Eugene Gardner from David Lawrence Rare Coins (10/2003); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98580. NGC ID# 23Z5, PCGS# 5642

- 3391 1907 MS66 NGC.** A brilliant and beautiful Premium Gem with exemplary luster and nearly immaculate, silver-white surfaces. Crisply struck and exceptional in all regards. Census: 13 in 66 (5 in 66 ★), 3 finer (2/16).
Ex: Southwest Collection (Heritage, 2/2008), lot 427; Beverly Hills Signature (Heritage, 11/2011), lot 3359. NGC ID# 23Z8, PCGS# 5645

**1907-S Quarter, MS65
Elusive S-Mint Issue**

- 3392 1907-S MS65 PCGS.** Faint roller lines remain from planchet preparation, visible diagonally across the obverse. This important Gem 1907-S quarter has a bold strike and lustrous silver surfaces with delicate golden toning. Following the earthquake of 1906, San Francisco Mint coinage in 1907 was minimal, and examples are rare in high grade today. Population: 12 in 65, 11 finer (2/16).
Ex: FUN Signature (Heritage, 1/2012), lot 5769. NGC ID# 23ZB, PCGS# 5648

- 3393 1908-D MS65 PCGS. CAC.** Shades of sea-green and lavender-gray toning blanket the well-preserved lustrous surfaces of this impressive Gem, with well-detailed design elements underneath. Population: 21 in 65 (1 in 65+), 20 finer (3/16). NGC ID# 23ZD, PCGS# 5650

- 3394 1908-D MS66 NGC.** The Denver facility produced 5.7 million quarters in its third year of operation. Examples are rarely encountered in MS66. Dramatic russet and slate-gray toning covers the obverse, and radiant mint brilliance illuminates the reverse. Several stars show strike softness, but the usually weak right shield corner is bold. Census: 4 in 66, 5 finer (3/16). NGC ID# 23ZD, PCGS# 5650

**1913 Quarter, MS65
Conditionally Elusive**

- 3395 1913 MS65 PCGS. CAC.** The 1913 Barber quarter is a slightly better date, particularly elusive in Mint State. This Gem CAC-endorsed example displays well-struck design elements with satiny luster and an overlay of tan-gray toning. There are no significant abrasions, and eye appeal is pleasing for the grade. Finer coins are rarely seen. Population: 33 in 65 (2 in 65+), 10 finer (3/16). NGC ID# 23ZU, PCGS# 5664

- 3396 1913-S VG8 PCGS.** One of the "Big Three" in the Barber quarter series, the 1913-S boasts a scant mintage of 40,000 coins and is proportionately scarce in all grades. This VG example is evenly circulated and original with soft tan-gray color — ideal for date set purposes. The LI and TY in LIBERTY are clear, and the B is partially visible. NGC ID# 23ZW, PCGS# 5666

- 3397 1913-S VG10 PCGS.** A well-worn example of this low-mintage key, with all major design elements complete in outline, but most interior detail worn smooth. The pleasing dove-gray surfaces show no large or distracting abrasions. NGC ID# 23ZW, PCGS# 5666

- 3398 1913-S — Damage — PCGS Genuine. VF Details.** The design elements of this popular key Barber quarter retain most of their interior detail and all letters in LIBERTY remain legible. The surfaces are free of large or distracting abrasions, aside from a dent in the reverse surface at the rim, near the first S in States. NGC ID# 23ZW, PCGS# 5666

- 3399 1914-S MS61 NGC.** Gold, peach, and navy overlays generally are translucent on this later-date S-mint quarter from an issue of just 264,000 pieces. A shallow pinscratch is visible on Liberty's neck only at certain angles, yet it largely accounts for the grade. Census: 6 in 61, 43 finer (2/16).

Ex: Philadelphia Signature (Heritage, 8/2012), lot 3328. NGC ID# 23ZZ, PCGS# 5669

- 3400 1915 MS66 PCGS.** Barber half dollar output took a backseat to quarter dollar production at Philadelphia in 1915 (3.5 million quarters struck). This attractive Premium Gem offers flashes of brilliance amid variegated steel-blue, russet, and olive toning. Crisply detailed and expectedly clean. Population: 23 in 66 (1 in 66+), 0 finer (3/16). NGC ID# 2422, PCGS# 5670

- 3401 1915-S MS66 PCGS.** The 1915-S Barber quarter claims a low mintage of 704,000 pieces. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved surfaces, with vibrant mint luster and hints of prooflike reflectivity in some areas. Vivid shades of greenish-gold and lavender toning enhance the outstanding eye appeal. Population: 19 in 66 (1 in 66+), 3 finer (3/16). NGC ID# 2424, PCGS# 5672

PROOF BARBER QUARTERS

**1897 Barber Quarter, PR67+ Cameo
Only 731 Pieces Struck**

- 3402 1897 PR67+ Cameo NGC. CAC.** From a meager mintage of 731 pieces, this delightful Plus-graded Superb Gem proof exhibits razor-sharp definition on all design elements, and the deeply mirrored fields contrast boldly with the richly frosted devices. The impeccably preserved surfaces show delicate hints of pale gold toning, with incredible eye appeal. Census: 10 in 67 Cameo (1 in 67+ Cameo, 2 in 67 ★ Cameo), 9 finer (2/16). NGC ID# 242C, PCGS# 85683

- 3403 1902 PR66 PCGS.** A conditionally elusive Premium Gem example of this early 20th century proof quarter. This piece is fully struck, and modest field-device contrast is seen on each side — unusual and desirable for proofs of this period. The obverse shows vivid multicolor peripheral toning around a soft champagne interior, while the reverse a much more dominating rose, gold, and sea-green palette. Population: 28 in 66 (3 in 66+), 7 finer (2/16). NGC ID# 242H, PCGS# 5688

**1903 Barber Quarter, PR67 Cameo
Unusual Toned Example With Contrast**

- 3404 1903 PR67 Cameo PCGS. CAC.** The Philadelphia Mint switched to an all-brilliant finish for proof coins in 1902, making specimens with cameo contrast elusive after that date. This sharply detailed Superb Gem displays unusually frosty design elements that contrast boldly with the deeply mirrored fields. The well-preserved surfaces are blanketed in shades of golden-brown, sea-green, and cerulean-blue toning. Population: 15 in 67 (2 in 67+) Cameo, 6 finer (3/16). NGC ID# 242J, PCGS# 85689

- 3405 1904 PR66+ NGC.** A pleasingly toned specimen with variegated iridescent hues of lilac, lavender, rust-gold and sea-green noted over clean, mark-free surfaces. Fully struck with highly reflective fields and gorgeous eye appeal. Census: 36 in 66 (1 in 66+, 1 in 66 ★), 39 finer (2/16). NGC ID# 242K, PCGS# 5690

**1907 Barber Quarter, PR66 Cameo
Only 575 Proofs Coined**

- 3406 1907 PR66 Cameo PCGS.** Sharply detailed in most areas, this impressive Premium Gem proof Barber quarter shows a touch of the typical softness on the eagle's claw. The brilliant surfaces are deeply reflective and contrast dramatically with the frosty devices. Seldom seen this fine. Population: 18 in 66 (1 in 66+) Cameo, 9 finer (2/16).
Ex: FUN Signature (Heritage, 1/2009), lot 2610; Summer FUN Signature (Heritage, 7/2009), lot 516; Central States Signature (Heritage, 4/2012), lot 4049. NGC ID# 242N, PCGS# 85693

- 3407 1908 PR66 PCGS.** A virtually snow-white specimen with flashy fields and a crisp strike. Both sides demonstrate modest white-on-black contrast, though the coin is undesignated as Cameo. A narrow diagonal line above the eagle's head is of mint origin. NGC ID# 242P, PCGS# 5694

**1910 Quarter, PR67+ Ultra Cameo
A Registry-Grade Example**

- 3408 1910 PR67+ Ultra Cameo NGC. CAC.** Ultra Cameo examples of the proof 1910 Barber quarter are rare. This Plus-designated Superb Gem is a magnificent coin, showcasing fully rendered motifs and deep, watery fields. The cameo contrast is exceptional, and the preservation is comparably impressive. A hint of light golden toning is seen around the outer peripheries. Census: 3 in 67 Ultra Cameo (1 in 67+ Ultra Cameo), 5 finer; CAC: 1 in 67 Ultra Cameo, 1 finer (3/16). NGC ID# 242S, PCGS# 95696

**1912 Quarter, PR68 Cameo
Top-Grade Registry Coin**

- 3409 1912 PR68 Cameo NGC.** With only a single Ultra/Deep Cameo known, high-end Cameo examples of the proof 1912 Barber quarter are typically what Registry collectors pursue. This piece is an extremely rare top-grade Cameo example. The strike is lacking a trifle on the eagle's right (facing) talons and the fletchings, but the obverse is sharp. Field-device contrast is nearly strong enough to warrant an Ultra Cameo designation. Hints of light golden toning appear around the outer peripheries. Census: 4 in 68 Cameo (3 in 68 ★ Cameo), 0 finer (3/16). NGC ID# 242U, PCGS# 85698

- 3410 1914 PR65 PCGS.** A delectable Gem proof that is deeply reflective beneath rose-gold and violet patina. The devices exhibit strong detail, and the overall eye appeal is remarkable. A mere 380 proofs were struck. Population: 18 in 65, 39 finer (2/16).
Ex: Dallas Signature (Heritage, 10/2006), lot 992; Long Beach Signature (Heritage, 5/2008), lot 447. NGC ID# 242W, PCGS# 5700

- 3411 1915 PR65 PCGS.** An intriguing Gem proof, the obverse exhibits dark steel and iridescent toning with a diagonal silver band, while the reverse is mostly brilliant and untuned with a crescent of gold and lilac inside the lower right border. Population: 16 in 65, 29 finer (3/16). NGC ID# 242X, PCGS# 5701

**1915 Quarter, PR66+
Magnificent Multicolor Patina**

- 3412** 1915 PR66+ PCGS. CAC. Magnificent multicolor patina includes dusky violet-gray, greenish-gold, and peach-orange tones, covering each side and providing this high-end Premium Gem proof with spectacular aesthetic appeal. The 1915 has the second-lowest proof mintage in the series (450 specimens), and it is the most challenging issue in high grades. Population: 13 in 66 (2 in 66+), 16 finer (3/16). NGC ID# 242X, PCGS# 5701

EARLY HALF DOLLARS

**1795 Flowing Hair Half Dollar, VF20
O-116, Smooth and Glossy Surfaces**

- 3413** 1795 2 Leaves, O-116, T-11, R.4, VF20 PCGS. Tompkins Die State 2/2. UNITED is die clashed beneath star 8 and LIBE of LIBERTY on the obverse, while the milling is incused above UNITED on the reverse. Berries 7 left, 9 right on the reverse, with a prominent die break that originates beneath star 1 on the obverse and continues to star 3. Pleasing gunmetal-gray patina covers both sides, with smooth wear minimizing most of the marks and abrasions. Nice original appeal for this solid VF Flowing Hair half. NGC ID# 24E7, PCGS# 39232 Base PCGS# 6052

**1795 2 Leaves O-117 Half, VF30
Appealing Midgrade Example**

- 3414** 1795 2 Leaves, O-117, T-3, R.4, VF30 PCGS. The berries are arranged 9 and 8 and there are two berries on the outside right. Star 1 intersects the lowest curl, which shows only two wispy lines concluding the curl after the point. The unfinished field below the chin is clearly visible even on this midgrade circulated example. The coin-gray surfaces show only light patina and no major abrasions. A VF30 PCGS example of this variety sold in Bowers and Merena's March 2010 auction, lot 804, for \$4,548. NGC ID# 24E7, PCGS# 39233 Base PCGS# 6052

**1795 O-117a Half Dollar, XF40
Album-Toned, Some Luster Remains**

- 3415** 1795 2 Leaves, O-117a, T-3, R.4, XF40 ANACS. Planchet adjustment marks are noted on the ANACS holder, criss-crossing the hair and the lower part of Liberty's portrait. There are no other significant, non-Mint factors, and the coin displays colorful album toning with sharp definition for the grade. Sea-green and gunmetal-blue shades embrace the borders, while reddish-gold toning covers the centers. A diagnostic die crack travels from the rim to the lower bust tip to identify the late die state of O-117a. Bold feather details remain on both wings of this attractive, midgrade Flowing Hair half. NGC ID# 24E7, PCGS# 39234 Base PCGS# 6052

**1795 Half Dollar, XF45
O-125, T-13, Sharp Album-Toned Example**

- 3416** 1795 2 Leaves, O-125, T-13, R.4, XF45 PCGS. Tompkins Die State 2/2. Areas of deep blue-gray toning at the margins surround the silver-gray centers of this Choice XF Flowing Hair half. The O-125 is often weak below and to the left of the date area, but other than slight flatness on the stars, this example is sharply struck. Minor die clashing shows on both sides. A few light lines and small marks do not distract from this appeal of this crisply struck early half. There are no adjustment marks on either side. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

**1795 Small Head Half, Fine 12
O-128, Condition Census Example**

3417 1795 2 Leaves, Small Head, O-128, T-18, High R.5, Fine 12 NGC. Tompkins Die State 1/3. Struck from a new master die, the O-128 Small Head half is both an absolute and condition scarcity in the Flowing Hair series. Always weakly struck, the finest known example is a VF coin. Not surprisingly, Overton, Tompkins, and Herrman all list Fine 12 coins at the low-end of their Condition Census. Three Small Head varieties exist among the 31 1795 varieties, yet none of the Small Head portraits are exactly alike. O-126, O-127, and O-128 make up the trio. Of the three, only O-128 has a unique obverse paired with a unique 9 berries left, 9 berries right reverse. This example is delightfully smooth and exceptional for the grade, with faint blue overtones that embellish the old-silver patina. The rims and dentils are strong for the assigned grade. A glass reveals only tiny marks and insignificant abrasions. The feather detail on the wings approaches an even finer grade. NGC ID# 24E7, PCGS# 39251 Base PCGS# 6054

3418 1801 O-101, T-2, R.3, VG8 NGC. CAC. Just heavy, even wear characterizes this evenly colored Very Good 1801 Bust half. The date and stars are large, star 1 close to the curls and star 13 close to the bust tip. A small nick below the fletchings is the only mentionable contact. One straight dark toning line appears on the obverse. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1801 Half Dollar, O-101, VF25
Minimally Abraded Obverse**

3419 1801 O-101, T-2, R.3, VF25 PCGS. The O-101 variety of 1801 half can be attributed at arm's length, diagnosed by the die breaks above the arrowheads. This is a pearl-gray example of this early and scarce Heraldic Eagle date. All letters in E PLURIBUS UNUM are readable, and most are bold. The obverse is minimally abraded; the reverse displays moderate marks near the uppermost clouds and AMERICA. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1801 Half Dollar, VF25
Appealing O-101 Example**

3420 1801 O-101, T-2, R.3, VF25 PCGS. The numerous die lumps on the reverse, including one below the N in UNITED, easily attribute the O-101 die, one of only two reverses for the year combined with the single 1801-dated obverse die. This midgrade circulated coin shows deep steel-gray patina with deeper color near the rims. A couple of noticeable contact marks include one below star 6 and a thin, straight scrape from the rear neck to the bustline. Considerable eye appeal still remains on both sides. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1801 Half Dollar, O-101, VF25
Scarce Variety in Any Grade**

3421 1801 O-101, T-2, R.3, VF25 PCGS. Both the 1801 and 1802 Draped Bust half dollars are scarce, low-mintage dates sought by series specialists in all conditions. Original, attractively toned pieces command a premium — something this VF25 example certainly deserves. Silver luster remains around the peripheral stars and numerals on the obverse before ceding to pleasing lilac-gold and warm-gray toning. The reverse displays a slightly deeper patina, with battleship-gray fields and lighter, golden-tan toning on the raised elements. A few adjustment marks on the neck and hair are minimized by the rich coloration. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1801 Draped Bust Half, O-102, VF25
Challenging Early Issue**

- 3422** 1801 O-102, T-1, High R.4, VF25 NGC. The left foot of the first A in AMERICA is embedded into the third and fourth wing feathers, just one of several diagnostics to identify the O-102 (T-1) variety. Overton had the emission sequence for the two 1801 die pairs reversed, with O-102 struck before the more-available O-101 variety. This attractive VF25 example is glossy with reddish-brown toning, blue overtones, and bold definition remaining on Liberty's hair strands, drapery folds, and the eagle's wing feathers. Marks are minimal and eye appeal is strong. Just 30,289 pieces were struck of this challenging early Draped Bust date, the first to use the Heraldic Eagle reverse in the series. NGC ID# 24ED, PCGS# 39268 Base PCGS# 6064

**1802 Half Dollar, XF Details
O-101, The Only Dies**

- 3423** 1802 O-101, T-1, R.3 — Scratched — PCGS Genuine. XF Details. A trio of long, shallow scratches run from stars 3 and 4 to Liberty's hair. Less distracting than adjustment marks, they are not of Mint origin and therefore properly noted by the PCGS net grade. Otherwise, the surfaces of this sharply defined 1802 half are natural and attractive. Gunmetal-gray fields surround silver-gray motifs for two-toned appeal. Only minor wear visits the high points. A small mintage of 29,890 pieces make the 1802 challenging in any condition.

- 3424** 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, XF40 NGC. The Large 3 in the date and the Large Stars on the reverse confirm the die pair, which is somewhat scarcer than the Large 3 with Small Reverse Stars varieties. Sharp definition remains on Liberty's hair strands, drapery folds, and on the eagle's breast and wing feathers for the grade. E PLURIBUS UNUM and the banner edges are sharp. Rich brownish-gray toning blankets both sides. NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066

**1803 Draped Bust Half Dollar, AU58
O-104, Scarce Small 3 Variant**

- 3425** 1803 Small 3, Large Reverse Stars, O-104, T-4, R.3, AU58 NGC. The sole die pair for 1803 with a Small 3 in the date, easily identified for the lack of a top serif on the 3. This is a minimally worn example, with extremely sharp hair detail and only slight wear on the eagle. Feather detail above the shield is bold for the grade. Iridescent shades form a rich patina on both sides, revealing aquamarine, gunmetal, and lavender hues. Mint luster remains plentiful beneath the toning. Only minor ticks and marks exist from contact or circulation. As normally seen for the Small 3 variety, die clashing is prominent above the date and to a lesser extent on the reverse. NGC ID# 24EF, PCGS# 39274 Base PCGS# 6067

**1805 Half Dollar, AU50
Very Scarce Overton-108**

- 3426** 1805 O-108, T-9, High R.4, AU50 PCGS. CAC. Splendid cherry-red, apple-green, and cream-gray toning endows this luminous and lightly abraded better variety half dollar. The pick-up point for O-108 are two narrow clash marks below the BU in PLURIBUS. This lightly circulated and colorful example is certain to command bidder interest. NGC ID# 24EG, PCGS# 39281 Base PCGS# 6069

**1806/5 Draped Bust Half, AU53
O-102, Luster Remaining**

3427 1806/5 O-102, T-7, High R.3, AU53 NGC. The top of the underdigit 5 is visible near the top of the 6. The stars are large, and star 12 is recut with a broken tip near the highest point of star 13. The 0 in the date shows recutting. The reverse shows a bold die line running right from the shield border. The lowest purported berry of the six, "without a stem," is unseen on this piece due to die clashing. AME are all joined solidly at their bases. Ample luster is visible in the recesses of this AU53 specimen, and light tan patina concentrates at the margins. The design elements are well-defined, and a few minor obverse circulation marks do not distract. A nice, problem-free Draped Bust half.

Ex: R. Cohen, MD (2/1997); *Bayside New York Collection / Baltimore ANA Signature (Heritage, 7-8/2008)*, lot 432, which brought \$4,025. NGC ID# 24EK, PCGS# 39298 Base PCGS# 6077

3428 1806 Pointed 6, No Stem, O-109, T-15, R.1, XF40 PCGS. Tompkins Die Stage 1/1. A splendid collector-grade example of this Draped Bust type coin, the sole variety for the Pointed 6 obverse with the No Stem reverse. Struck from a perfect state of the dies, free of die clashing and die cracks. Soft luster remains beneath a sprinkling of cinnamon-gold toning. Sharp definition still exists on the motifs, where the stars and reverse legend are not drawn to edge as in later die states. The reverse approaches AU quality, while the obverse shows minor wear and a shallow mark at the end of the lower-most ribbon. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

3429 1806 Pointed 6, No Stem, O-109a, T-15, R.3, XF40 NGC. The relatively scarce late die state with a radial crack from star 12 toward the bust. Struck from rusted dies. The No Stem *Guide Book* variety is a Mint engraving blunder, since the branch stem was never entered into the reverse die. This is a darkly toned and richly detailed example without any consequential marks. NGC ID# 24EJ, PCGS# 39311 Base PCGS# 6073

3430 1806 Pointed 6, Stem, O-115, T-17, R.1, VF35 PCGS. A charming silver-gray Choice VF representative of this distinctive variety. The T in LIBERTY is widely recut, and the IC in AMERICA is widely spaced. The surfaces are clashed and the obverse margin shows a crack near the date. Marks are surprisingly absent aside from a slight rim ding at 4:30 on the reverse. NGC ID# 24EJ, PCGS# 39317 Base PCGS# 6071

3431 1806 Pointed 6, Stem, O-120, T-28, R.3, VF35 PCGS. Lavender, straw-gold, and sea-green toning encompass this unblemished and attractive Choice VF Draped Bust half. 30 die pairs are known for the 1806, and several are extremely rare. O-120 is merely scarce, but seen less often than O-109 and O-115. NGC ID# 24EJ, PCGS# 39325 Base PCGS# 6071

**1806 Pointed 6 Half Dollar, Good 6
Very Rare Overton-127a**

3432 1806 Pointed 6, Stem, O-127a, T-9, High R.6, Good 6 PCGS. The radial die crack through star 6 is the chief identifier for the rare O-127a. This deep gunmetal-gray representative has a bold date. LIBERTY, UNITED, and AMERICA are also sharp. STATES OF displays uneven wear, as do the inner points of the obverse stars. Lightly abraded aside from an oval mark on a leaf tip. PCGS# 39335 Base PCGS# 6071

3433 1807 Draped Bust, O-110a, T-3, R.2, VF30 NGC. CAC. Designated on the holder as O-110b by NGC, the only such piece that firm has certified. Neither the Overton reference nor the latest Herrman revision list an O-110b variety. The NGC designation is likely based upon an apparent cud near the C in AMERICA, opposite a slight edge bruise on the obverse at 2 o'clock. This is a pleasing and unblemished example bathed in rich golden-brown and aquamarine toning. NGC ID# 24EM, PCGS# 39352 Base PCGS# 6079

**1807 Draped Bust Half Dollar
O-110a, Choice AU**

3434 1807 Draped Bust, O-110a, T-3, R.2, AU55 NGC. Most would regard the present lot as brilliant, but the obverse margin offers subtle steel-gray toning, and the reverse periphery displays hints of butter-gold patina. Substantial cartwheel luster illuminates both sides. A good strike except for the stars near the beak. Smooth aside from unobtrusive thin marks on the cheek and the lower left obverse field. NGC ID# 24EM, PCGS# 39352 Base PCGS# 6079

**1807 Draped Bust Half Dollar, MS62
O-110a, Exceptional Multicolor Toning**

- 3435** 1807 Draped Bust, O-110a, T-3, R.2, MS62 NGC. Tompkins Die State 3/3. Struck from a late state of both the obverse and reverse dies, this multicolor Draped Bust half displays hues from both ends of the spectrum, ranging from lilac, blue and green shades to vivid orange and red highlights. Golden mint luster radiates from both sides. Numerous die cracks encircle the obverse, while radial cracks and die clashing suggest an advanced stage of the reverse die as well. Well-struck save for slight incompleteness at some of the reverse field stars and the eagle's head, and blending at Liberty's temple. Census (all Draped Bust varieties): 23 in 62 (2 in 62+), 40 finer (2/16). NGC ID# 24EM, PCGS# 39352 Base PCGS# 6079

BUST HALF DOLLARS

- 3436** 1807 Capped Bust, Large Stars, 50 Over 20, O-111a, R.5 — **Rim Damage** — PCGS Genuine. VF Details. An intermediate die state of the famous "Bearded Goddess" variety. The die crack from chin to chest is present, but delicate compared to Overton-111b. This example has a few small edge nicks on the reverse, but the olive-green and almond-gold surfaces are only moderately abraded. NGC ID# 357A, PCGS# 39355 Base PCGS# 6086
- 3437** 1807 Capped Bust, Small Stars, O-113a, R.3 — **Cleaning** — PCGS Genuine. AU Details. Glossy and lightly hairlined from the cleaning, this Small Stars half shows remnants of its original olive-gray patina at the margins. A small grease streak near the eye is of little concern. Struck from the late state of the dies, with die cracks that encircle the reverse legend. A scarce and popular type — the only Small Stars Capped Bust die marriage.
- 3438** 1808 O-102a, R.2, AU53 NGC. Ex: Hilt Collection. Die cracks at the left scroll end and the 0 in the date allow rapid attribution. A late die state with the stars and UNITED drawn toward the rim. A lightly circulated stone-gray half dollar that boasts a problem-free appearance. NGC ID# 24EP, PCGS# 39363 Base PCGS# 6090
- 3439** 1809 Normal Edge, O-105, R.2, AU58 NGC. A substantial tine between the inner points of star 5 help identify the O-105 obverse, while an angled die line joins the lowest olive leaf to the rim to the left of 5 in the denomination to confirm the reverse die. Nice mint luster remains beneath pale-gold toning on both sides of this minimally circulated half. Weakness at Liberty's chin and on the opposing left (facing) wing are characteristic of the variety, which is otherwise sharply struck. NGC ID# 24ES, PCGS# 39394 Base PCGS# 6092

**1809 Half Dollar, Near-Mint
O-107, III Edge**

- 3440** 1809 III Edge, O-107, R.3, AU58 PCGS. Splashes of golden-brown, lavender, and navy-blue toning envelop this satiny and nearly unabraded early half dollar. Light wear is apparent on the drapery near the clasp, but luster encompasses design elements. The XXX Edge and III Edge were used in 1809 only. Their purpose is unknown. NGC ID# 24ES, PCGS# 39383 Base PCGS# 6094

- 3441** 1809 III Edge, O-109a, R.2, AU53 NGC. The beginning stages of a die break through AMERICA on the reverse identify the middle die state of the O-109 marriage. This AU coin displays light golden-gray patina with hints of luster and amber toning in the protected peripheral fields. The strike is bold and even, and the central devices show little high-point wear. NGC ID# 24ES, PCGS# 39387 Base PCGS# 6094

**1809 O-109a Bust Half, AU55
Choice Original Surfaces**

- 3442** 1809 III Edge, O-109a, R.2, AU55 PCGS. CAC. XXX Edge. A Choice About Uncirculated example of an advanced die state of this popular variety, although not the latest state since there are no large broken patches at the arrowheads. A strong die crack runs through the middle of AMERICA and Liberty's top forecurl is clear of the headband. Soft mint luster remains beneath attractive lilac-gray toning, with high-point wear visible on the eagle's left wing shoulder, head, and the portrait. Only a few light marks exist anywhere on the coin. CAC endorsed with great eye appeal. NGC ID# 24ES, PCGS# 39387 Base PCGS# 6094
- 3443** 1810 O-101, R.1, AU58 PCGS. Light almond-gold toning visits this briefly circulated and partly lustrous representative. Marks are absent save for a thin line near the left (facing) wingtip. Clashed multiple times, with letters from LIBERTY readable beneath the eagle's right wing. NGC ID# 24ET, PCGS# 39404 Base PCGS# 6095
- 3444** 1811/10 O-101, R.1, AU53 PCGS. A pearl-white representative with noticeable luster and only minor wear on the curls. Marks are relegated to a field graze near star 3. A popular *Guide Book* variety that commands a strong premium over the regular 1811 half dollar. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

**1811 Half Dollar, Lightly Toned AU58
O-106, Small 8 Variety**

- 3445** 1811 Small 8, O-106, R.3, AU58 PCGS. CAC. Small 8. Largely untoned save for a narrow band of gray-gold toning at the rims, this near-Mint Capped Bust half shows few signs of actual circulation. Nearly full cartwheel luster remains on both sides. Sharply struck from lightly clashed dies, with slight blending on Liberty's highest curls and the obverse stars drawn to the edge and weak milling (as always for the O-106 variety). CAC endorsed and high-end for the grade. NGC ID# 24EU, PCGS# 39429 Base PCGS# 6097

**1812/1 Small 8 Half Dollar, AU58
O-102a, Exceptional Rainbow Toning**

- 3446** 1812/1 Small 8, O-102a, R.2, AU58 PCGS. Ex: Frank McCarthy Collection. O-102a, R.2. The sole Small 8 overdate variety for the date. O-101 is also an overdate but has a large 8. Sea-green, orange, olive, golden-brown, and lavender toning embraces this partially lustrous and unblemished near-Mint half. PLURIBUS is clashed above the date, determining the late die state. Population: 17 in 58 (1 in 58+), 18 finer (2/16).
Ex: *West Palm Beach (Summer FUN) Signature (Heritage, 7/2009)*, lot 588. NGC ID# 24EY, PCGS# 39444 Base PCGS# 6101

- 3447** 1813 O-107a, R.1, AU58 PCGS. Both the obverse and reverse are extensively die clashed and cracked to represent the late die state of this still-lustrous, near-Mint half. Brief appearances of gunmetal-blue and reddish-gold toning at the margins surround the silver centers. A nearly full strike remains to complete the outstanding eye appeal. NGC ID# 24EZ, PCGS# 39468 Base PCGS# 6103

- 3448** 1814/3 O-101a, R.2, XF45 PCGS. Advanced die cracks and die clashing surround the central motifs of this silver-gray overdated half. Choice XF definition covers the devices, while abrasions are few and the surfaces are largely untoned except for a few brief areas of orange-gold and gray patina. Intermediate and late O-101a die states (such as the present coin) make up the vast majority of offerings, since unclashed examples of the 1814/3 variety are extremely rare. NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

**1814 O-108a Half Dollar, AU58
E Over A in STATES Mint Blunder**

- 3449** 1814 E Over A in STATES, O-108a, R.1, AU58 PCGS. Magnificent for the near-Mint level, this essentially unabraded half dollar offers pleasing deep cream-gray and straw-gold surfaces. The right-side stars and the eagle's neck are lightly brought up. An early die state of O-108a, without the bold clashmarks and peripheral erosion often encountered on examples. NGC ID# 24F3, PCGS# 39490 Base PCGS# 6107

**1817 Half Dollar, Choice AU
O-103, Punctuated Date**

- 3450** 1817 181.7, O-103, R.2, AU55 PCGS. CAC. Overton's "punctuated date" variety with a fairly large die dot between the 17 in the date. This lightly circulated example is draped in medium golden-brown and dove-gray shades with blushes of magenta and navy-blue near the rims. Luster illuminates peripheral elements, and marks are confined to a bright area below the right scroll end. NGC ID# 24F6, PCGS# 39510 Base PCGS# 6110

- 3451** 1817 O-106, R.2, AU55 PCGS. The thick die line from the rim to Liberty's cap provides an immediate identifier for Overton-106. This lightly circulated example is generally toned powder-blue but exhibits ruby-red and caramel-gold across the margins. The surfaces are clashed but without any apparent abrasions. NGC ID# 4DPL, PCGS# 39498 Base PCGS# 6109

**1819/8 Bust Half, MS62
O-101, Small 9
Green Label Holder**

- 3452** 1819/8 Small 9, O-101, R.1, MS62 PCGS. CAC. The sole Small 9 Overton variety. Traces of the underdigit are obvious near the lower curve of the 9. A lustrous stone-gray half dollar with few marks and a consistently sharp strike. The reverse border displays lengthy cracks, usual for O-101. Certified in a green label holder. NGC ID# 24FC, PCGS# 39555 Base PCGS# 6118

3453 1819 O-107, R.4, AU58 PCGS Secure. Ex: Link. The vertical stand of the 5 in the denomination is recut. A mere suggestion of rub on the eagle's brow and wing tops determine the grade of this scarce, early die state Overton-107 half. The obverse shows virtually no wear or marks — sharply struck, with a richly mottled olive-gray and steel-blue patina that confirms the original surfaces. Golden mint luster remains beneath the natural toning on both sides. An attractive R.4 variety, exceedingly sharp for the grade. NGC ID# 4FLD, PCGS# 39542 Base PCGS# 6117

3454 1819 O-108, R.3, AU58 NGC. The 5 in 50 C is clearly repunched, and the wide date provides a further confirmation of O-108. Dusky ruby-red, apple-green, and caramel-gold toning drapes this satiny and originally toned example. Smooth aside from unobtrusive field marks near the profile. NGC ID# 4FLF, PCGS# 39544 Base PCGS# 6117

3455 1819 O-112, R.3, AU58 PCGS. The reverse of this somewhat scarce variety is distinguished by TE in STATES joining at the top but not the bottom, due to an extra die-line connector. On the obverse, star 1 is quite close to the drapery and point between two dentils. This still-lustrous near-Mint State example displays splendid honey-gold and blue rim patina with silvery centers that are lightly hairlined but retain much eye appeal. NGC ID# 4FXD, PCGS# 39550 Base PCGS# 6117

**1820/19 Half Dollar, MS61
O-102, Curl Base 2, Sharp Overdate**

3456 1820/19 Curl Base 2, O-102, R.1, MS61 NGC. A sharp strike exists on both sides of this Curl Base 2 overdated half, with the underdigits crystal clear and the star centers complete, although slightly drawn to the edge. Rich, reddish-gray toning thickly covers both sides, with sea-green shades at the margins. Soft mint luster glows beneath the attractive, original toning. O-102 is the sole Curl Base 2 variety with the overdate. Census: 6 in 61, 13 finer (3/16). NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

3457 1823 O-104, R.3, AU58 PCGS. A lustrous and lovely near-Mint representative. Only incidental contact is present. The surfaces display medium chestnut-gold toning with glimpses of deeper steel-gray throughout the borders. Liberty's profile is strike doubled. NGC ID# 24FJ, PCGS# 39607 Base PCGS# 6131

3458 1823 O-106, R.3, AU58 PCGS. The large, well-formed 3 in the date is larger than 182, and star 1 points to the lower half of a dentil. The 1 in PLURIBUS is centered under the second T in STATES, and RI in AMERICA nearly touch. This silver-white, lightly circulated coin bears only a whisper of circulation wear and shows light patina, extremely attractive, an example of the 1823 Normal Date *Guide Book* variety. Much brilliant mint luster remains, despite a light dusting of color on the obverse. PCGS# 39609 Base PCGS# 6131

3459 1823 O-106a, R.2, AU58 PCGS. Ex: Pedram Collection. The later Overton subvariety with a Mint-modified 3 in the date, known as the "Tampered 3" among Bust half devotees. This momentarily circulated representative displays colorful peach-red and jade-green toning throughout the margins. Sharp aside from an indistinct area atop the eagle's leg. NGC ID# 47HP, PCGS# 39610 Base PCGS# 6131

3460 1823 O-107, R.2, MS63 NGC. A die defect "bar" between the upper talons of the right (facing) claw resembles a disconnected arrow shaft, the pick-up point for the variety. AM of AMERICA are joined at the bottom. This Select Uncirculated example displays attractive lilac-gray and gold toning with semireflective fields surrounding the sharply struck motifs. From a late die state, with die clashing and a prominent die crack originating beneath the 5 of the denomination through UNITED STATES. NGC ID# 47HY, PCGS# 39611 Base PCGS# 6131

**1824/4 Half Dollar, O-110, MS64+
Lightly Toned and Lustrous**

3461 1824/4 O-110, R.2, MS64+ NGC. CAC. The underlying 4 shows to the left of the primary 4, and a die lump occurs in the reverse field below UNUM. This Plus-graded near-Gem displays softly frosted surfaces with dusky lavender-gray and gold toning. The eagle's right (facing) talon and a few obverse stars are incompletely defined, but the overall sharpness is crisp. Void of major abrasions that detract from the eye appeal. Census (all 1824/4 varieties): 7 in 64 (1 in 64+), 9 finer (2/16). NGC ID# 47PA, PCGS# 39644 Base PCGS# 6140

3462 1824 O-113, R.1, MS62 PCGS. This is the prime die state of the collectible O-113 variety with a die line crossing the interior of the 2, unmentioned by Overton. The so-called "worm" die break above the left shoulder (where the eagle "dropped" it) is faint but readily apparent with a glass. This lustrous, delicately toned half is well-struck with a bit of softness over the wing edges and lower leaves. NGC ID# 24FK, PCGS# 39634 Base PCGS# 6137

**1824 O-115 Half Dollar, MS64
Lustrous, Silver-Gray Toning**

3463 1824 O-115, R.2, MS64 PCGS. Dusky silver-gray, forest-green, and walnut-brown toning embrace this lustrous and lovely Choice half dollar. The strike shows incompleteness on the RIB in PLURIBUS and the fletchings, but the stars are fully impressed. Refreshingly unabraded. A small die lump between the left scroll end and the eagle's wing provides the pick-up point for Overton-115. At the lower end of Steve Herrman's Condition Census. NGC ID# 24FK, PCGS# 39637 Base PCGS# 6137

1825 O-105 Half Dollar, MS65
Likely Tied Atop the Condition Census
Ex: Kennywood Coin

- 3464 1825 O-105, R.2, MS65 PCGS.** A notable conditional rarity at this level. The proximity of stars 8 and 13 to the rear of the cap and front of the bust make this an easy obverse to attribute. The connections of ITE at the top and ED at the bottom on the reverse are also easy markers. This Gem is toned with a layer of even yellow-gold on the obverse; the reverse is similarly toned with some darker streaks. Traces of darker blue appear on the dentils. The strike is sharp on the upper obverse, but a couple of the lower obverse stars are not fully brought up at their centers. The reverse shows weakness on the scroll in the area opposing Liberty's bust. The surfaces are clean overall. This piece is a scarce issue in Gem condition, and likely tied for the top spot in the Condition Census. This piece, the ANR ex: Kennywood Collection coin, is a reappearance of this example at Heritage from nearly 10 years ago, and the intervening years have seen no other Gem offerings of this seemingly common variety.

Ex: Kennywood Collection (*American Numismatic Rarities*, 1/2005), lot 515; *Long Beach Signature* (Heritage, 9/2005), lot 3181. NGC ID# 24FL, PCGS# 39651 Base PCGS# 6142

1825 O-108 Half Dollar, MS64
Outstanding Eye Appeal

- 3465 1825 O-108, R.3, MS64 PCGS. CAC.** Ocean-blue, golden-brown, and violet-red borders encompass lightly toned centers. This lustrous near-Gem appears unabraded aside from a solitary minor mark on the shield. Liberty's profile is strike doubled. Condition Census quality for the variety, with the Herrman Autumn 2015 listings topped by two prior auction appearances of the present coin.

Ex: *Long Beach Signature* (Heritage, 9/2013), lot 3775; *11th Sale* (Legend, 2/2015), lot 104, which realized \$5,288. NGC ID# 24FL, PCGS# 39655 Base PCGS# 6142

- 3466 1825 O-112, R.3, MS62 PCGS.** The 2 in the date is clearly repunched, promptly identifying the variety. The present example has a wide triple profile, adding interest for specialists. A lovely Mint State piece with satin cartwheel luster throughout dappled dove-gray, aquamarine, and lavender toning. NGC ID# 24FL, PCGS# 39659 Base PCGS# 6142

1825 Half Dollar, MS64, O-115
Lustrous and Well-Preserved

- 3467 1825 O-115, R.3, MS64 PCGS.** This variety features a small bar near the right base of 1 in the date. On the reverse, the third line of the fourth stripe in the eagle's shield extends to the second crossbar. Strong, shimmering luster illuminates the clean, well-preserved surfaces of this near-Gem. Natural silver-gray toning in the fields and centers yields to pleasing gold-tan and golden-brown accents on each side, primarily near the borders. NGC ID# 24FL, PCGS# 39662 Base PCGS# 6142

1826 O-108a Half Dollar, MS64
Lustrous and Well-Struck

- 3468 1826 O-108a, R.1, MS64 PCGS.** Actually in between O-108 and O-108a, since the die crack through OF fades out near the AM in AMERICA. Rich olive-gold, lilac-red, and powder-blue patina endows this lustrous and precisely struck Choice half dollar. The reverse appears pristine, as does the left obverse field, while the right obverse field and Liberty's neck display only faint marks.

Ex: *Long Beach Signature* (Heritage, 9/2013), lot 3780. NGC ID# 24FM, PCGS# 39677 Base PCGS# 6143

1826 Half Dollar, MS65
Finest Certified O-114'

- 3469 1826 O-114', R.7, MS65 NGC.** The rare early die state of O-114 without a die break above the diagonal of the N in UNITED. Dr. Glenn Peterson's two pick-up points for O-114 are both present; a die line inside the shield near its upper left end, and a nearby die dot between the third and fourth horizontal stripes. A nicely struck and satiny Gem draped in autumn-brown and sea-green shades. We note a drop of translucent residue to the west of the eagle's beak. Even with a die break inside the N, O-114 is very scarce, listed as High R.4. The Autumn 2015 Stephen J. Herrman census is topped by an MS65 NGC O-114, a different coin, while his O-114' census lists a single VF20 example. NGC ID# 24FM, PCGS# 39685 Base PCGS# 6143

**1827 O-113a Half Dollar, MS63
Strong Original Appeal**

3470 1827 Square Base 2, O-113a, Low R.4, MS63 PCGS. Three 1827 varieties — the O-112, O-113, and the rare O-149 — share the distinctive reverse with a bold die line across the apex of the central shield point. This example is the late die state of O-113, confirmed by diagonal “wavy” lines left of Liberty’s cap near the border. Beneath the 7, a pair of “erupting dentils” project curved die lines into the field. A diagnostic, arcing die crack from below 2 of the date, through 7 and stars 13 and 12 to the back of the cap confirms the late die state. Bluish-gray toning deepens at the rims with reddish highlights and strong silver luster. Minor marks and abrasions are infrequent and require a glass to view, but they determine the Select Uncirculated grade. A uniformly sharp strike covers both sides. PCGS# 39708 Base PCGS# 6144

3471 1828 Curl Base 2, Knob, O-107, R.2, AU58 PCGS. CAC. A lovely near-Mint Capped Bust type coin with dove-gray devices, wheat-gold fields, and gunmetal borders. Devoid of consequential marks, and the strike is sharp aside from a few left-side stars. NGC ID# 24FR, PCGS# 39760 Base PCGS# 6149

3472 1828 Square Base 2, Large 8s, O-108, R.3, AU58 PCGS. Freckles of autumn-brown and sea-green toning visit the margins of this predominantly pearl-gray representative. Marks are virtually absent, and the strike is crisp except on the uppermost stars. NGC ID# 24FR, PCGS# 39762 Base PCGS# 6150

3473 1828 Square Base 2, Small 8s, Large Letters, O-118, R.3, AU58 PCGS. CAC. The D and S are too close, crowding the words to resemble UNITEDSTATES. The upright of D of UNITED is left of the upright of E in E PLURIBUS UNUM. Attractive, faint silver-gray patina covers the centers of this otherwise brilliant near-Mint State half. Much mint luster remains. The sole mark of note is a small bit of struck-in grease above the eagle’s left wing. NGC ID# 24FR, PCGS# 39773 Base PCGS# 6151

**1828 O-118a Half Dollar, MS65
Large Letters, Square Base 2**

3474 1828 Square Base 2, Small 8s, Large Letters, O-118a, R.4, MS65 PCGS. Rich forest-green and rose-gold toning blends throughout this coruscating and unabraded Gem. The strike is full aside from slight softness on the upper left star. Among the finest examples of O-118a, and in fact the present coin is the first two listed auction appearances for the subvariety in Herrman’s Autumn 2015 revision.

Ex: Chicago ANA Signature (Heritage, 8/2014), lot 4415; Pre-Long Beach Sale (Ira & Larry Goldberg, 1/2015), lot 1382, which realized \$8,225. PCGS# 39774 Base PCGS# 6151

3475 1828 Square Base 2, Small 8s, Large Letters, O-122, R.3, MS61 PCGS. An essentially brilliant half dollar whose vibrant luster and unmarked surfaces exude exemplary eye appeal. The portrait and eagle are sharply struck, while peripheral elements show selected softness. NGC ID# 24FR, PCGS# 39778 Base PCGS# 6151

**1829 O-114 Bust Half, MS65
Finest Known of This Scarce Variety**

3476 1829 Small Letters, O-114, R.3, MS65 PCGS. Previously, the finest O-114 half to appear in one of our auctions was the former Queller coin, which certified as MS64 NGC, and that was more than 13 years ago. Here is a coin that is a full grade point finer, and most likely the finest known for the variety.

The O-114 is scarce (rated R.3), and in our experience it is perhaps more challenging than that. The variety is most often identified by two “filled A’s” in AMERICA — as shown on this coin — but early die states may lack this feature. A more reliable diagnostic for the die pair are shield stripes that pierce the crossbar in multiple locations while showing unusual, V-shaped gaps at the top of gules 4, 5, and 6. The C in the denomination is large and close to the stem. The flag on the 5 is short and curls upward at the tip.

Sharply struck, the present coin displays a pleasant silver-gray patina (more silver than gray) with lilac and rose-red accents. There are no marks or distractions of any significance to be seen on the softly lustrous, frosted surfaces. NGC ID# 24FS, PCGS# 39799 Base PCGS# 6154

3477 1830 Small O, O-116, R.2, MS63 PCGS. Rich dove-gray and autumn-brown patina encompasses this satiny and nicely struck Select Bust half. Nicely struck and minimally marked. A late die state with the stars drawn to the rim. NGC ID# 24FU, PCGS# 39827 Base PCGS# 6156

**1831 O-104 Half Dollar, MS64+
Condition Census Quality**

3478 1831 O-104, R.1, MS64+ PCGS. The undisturbed dove-gray surfaces are overlaid with blushes of forest-green and lavender toning. A Condition Census example that boasts vibrant cartwheel sheen and unabraded surfaces. The major devices are well struck, though a few stars are soft. A later die state with the stars and peripheral legends partly drawn toward the rim. NGC ID# 24FV, PCGS# 39840 Base PCGS# 6159

**1831 O-109 Half Dollar, MS64
Outstanding Bust Type Coin**

- 3479** 1831 O-109, R.1, MS64 PCGS. Light to medium wheat-gray toning visits this lustrous and splendidly smooth Capped Bust type coin. Portions of the borders lack a full impression, but the major devices are bold. Condition Census quality for the variety. A late die state with peripheral elements drawn toward the rim, especially UNITED and ICA. NGC ID# 24FV, PCGS# 39845 Base PCGS# 6159

- 3480** 1832 Small Letters, O-113a, R.3, MS63 PCGS. CAC. Light to medium gunmetal-gray toning enriches this satiny Select half dollar. Marks are absent aside from inconsequential contact on Liberty's face and neck. The late die state with missing dentils and peripheral elements drawn toward the rim.
Ex: Orlando FUN Signature (Heritage, 1/2014), lot 4459, which realized \$2,115. NGC ID# 4E9N, PCGS# 39872 Base PCGS# 6160

**1832 Bust Half, MS64
O-118, Small Letters, 'Laced Lips'**

- 3481** 1832 Small Letters, O-118, R.1, MS64 PCGS. A sharp near-Gem half, with lustrous, iridescent surfaces that display shades of lemon-gold, tan, and pistachio-green across both sides. This is the "Straight Laced Lips" variety, one of three 1832 die pairs with tiny die lines through the lower lip of Liberty to the chin. The reverse die is confirmed by a double corner on the upper left shield point. Only a few minor marks are visible with a glass, widely distributed over the smooth fields and crisply struck devices. This coin ranks near the top of the Condition Census for the variety according to the Autumn 2015 Stephen Herrman report. NGC ID# 24FW, PCGS# 39877 Base PCGS# 6160

- 3482** 1833 O-105, R.2, MS62 PCGS. The obverse dentilation shows a small gap just below the point of star 12 nearest the rim. The distinctive reverse shows a notched flag atop the 5 and a repunched last S in STATES, the first punch too low and too far right. Rose-gray, charcoal, and pale blue prevail on this Mint State coin, with die fatigue evident on both sides and some lightly struck areas notable near the reverse periphery. NGC ID# 24FX, PCGS# 39892 Base PCGS# 6163

- 3483** 1834 Large Date, Large Letters, O-101, R.1, MS65 NGC. Despite a few old toning lines in the left obverse field, this Capped Bust half dollar has excellent eye appeal with frosty silver luster that shines through lovely gold, gray, and iridescent toning. NGC ID# 24FY, PCGS# 39905 Base PCGS# 6164

- 3484** 1834 Large Date, Small Letters, O-104, R.2, MS63 PCGS Secure. Deep dove-gray, walnut-brown, and forest-green toning dominates this original and unabraded Bust half dollar. The strike is typical but the eye appeal is impressive.
Ex: Rosemont Signature (Heritage, 8/2013), lot 3900, which realized \$1,762.50. NGC ID# 24FY, PCGS# 39908 Base PCGS# 6165

**1834 O-106 Half Dollar, MS65
Large Date, Small Letters, 4 Over 4**

- 3485** 1834 Large Date, Small Letters, O-106, R.1, MS65 NGC. Rainbow iridescence is most dramatic at the margins on both sides of this exceptional Large Date, Small Letters half, merging into dusky tan-brown shades at the centers. Protected areas exhibit aquamarine and rose-red hues. The O-106 variety shows the 1 and 4 much taller than the 8 and 3, with the crosslet of a smaller 4 beneath the primary 4 and with recutting on the other digits as well. A set of twin segments in the dentils between stars 6 and 7 confirms the obverse. The M in AMERICA is misshapen, where the left leg is curved and recut, then joined to the center at the base. The strike is mostly sharp although slightly weak at the denomination. Abrasions are virtually nonexistent. Tied for third in the Condition Census according to both Stephen Herrman and the Parsley reference. NGC ID# 24FY, PCGS# 39910 Base PCGS# 6165

- 3486** 1834 Large Date, Small Letters, O-107, R.1, MS62 NGC. A boldly struck Capped Bust type coin, showing satiny luster beneath olive-gray and champagne toning. There are no singular abrasions on this lower-end Mint State coin, although trivial chatter on the cheek limits the grade. Struck during a late die state, showing the stars and peripheral legends with flowlines toward the rims. NGC ID# 24FY, PCGS# 39911 Base PCGS# 6165

- 3487** 1834 Small Date, Small Letters, O-111, R.1, MS63 PCGS. CAC. Stars 6 and 7 are recut, and the A in STATES is high; the O-111 die markers noted in Dr. Glenn Peterson's reference. A satiny and nicely struck sea-green, chestnut-gold, and lilac half dollar. Marks are confined to wispy abrasions on the field above the eagle's head. A tiny spot is below the M in AMERICA. NGC ID# 24FY, PCGS# 39915 Base PCGS# 6166

- 3488** 1836 50/00, Lettered Edge, O-116, R.2, AU55 PCGS. The final Mint blunder in the Lettered Edge Bust half series. The denomination was initially entered as 00, then the first 0 was partially lapped away, and a 5 entered in its place. This lightly abraded wheat-gold and dove-gray example has a spot on the rim near star 6 and a small granular area near the left scroll end. NGC ID# 24G2, PCGS# 39964 Base PCGS# 6170

1836 O-116 Half Dollar, MS62
Lettered Edge, 5 Over 0 in 50

- 3489** 1836 50/00, Lettered Edge, O-116, R.2, MS62 NGC. Among the most distinctive 1836 Overton varieties. Stars 7, 12, and 13 are recut, the 5 in the denomination is blundered, the middle arrowhead is repunched south, and the upper arrowhead has line extensions from the back ends. In addition, the upper reverse field exhibits die rust. The present piece is highly lustrous and virtually brilliant. The preservation is exceptional for the designated grade. NGC ID# 24G2, PCGS# 39964 Base PCGS# 6170

REEDED EDGE HALF DOLLARS

- 3490** 1836 Reeded Edge, GR-1, R.2 — Cleaning — PCGS Genuine. VF Details. The actual mintage of 1836 Reeded Edge halves is debatable, but its importance as the first year for a new design struck on the new steam-powered coin press is unquestionable. Some cloudiness and light hairlines are visible on this example, yet gold accents at the margins and sharp remaining detail enhance the generally smooth surfaces. An affordable alternative for the issue, which always receives strong demand regardless of grade.

- 3491** 1837 GR-11, R.5, AU58 NGC. A near-Mint R.5 variety — close to the top of the Condition Census for the GR-11, and conceivably the finest example of this scarce die pair. All of the diagnostics are present: a radial die crack through star 7 to the cap, and another through the M of AMERICA to the eagle's neck. A small die chip exists in the top right corner of the M, and a die lump near the right wing beneath CA confirms the variety. A lightly toned golden-gray coin, which retains mint luster at the margins. A small rim bump beneath EN of CENTS and a short mark on Liberty's neck are the sole identifying markers. NGC ID# 24G4, PCGS# 531057 Base PCGS# 6176

1837 Reeded Edge Half, MS65
GR-18, Late Die State

- 3492** 1837 GR-18, R.1, MS65 NGC. Hints of aquamarine and wheat-gold toning adorn this thoroughly lustrous silver-gray half dollar. The strike is full on the central devices, and there are no noticeable abrasions on either side of this splendid Gem. Reverse dentilation is indistinct, customary for the variety. Lengthy die cracks on both sides and a series of die chips within the shield allow prompt attribution. For all 1837 varieties, Census: 45 in 65 (1 in 65+, 3 in 65 ★), 12 finer (3/16).

Ex: Long Beach Signature (Heritage, 9/2008), lot 2157; Boston ANA Signature (Heritage, 8/2010), lot 3158. NGC ID# 24G4, PCGS# 531065 Base PCGS# 6176

1837 GR-22 Half Dollar, MS65
Briefly Issued 50 CENTS Design

- 3493** 1837 GR-22, R.2, MS65 NGC. Medium dove-gray and sea-green toning blankets both sides, with glimpses of lilac-red and almond-gold patina near the rims. Lustrous and carefully preserved. The major devices are sharply struck, although the uppermost stars are lightly brought up. For all varieties, Census: 45 in 65 (1 in 65+, 3 in 65 ★), 12 finer (3/16). NGC ID# 24G4, PCGS# 531071 Base PCGS# 6176

SEATED HALF DOLLARS

- 3494** 1839 With Drapery, WB-102, MS61 NGC. The 1839 With Drapery variety is underrated by collectors especially in Mint State, where attractive examples are nearly as rare as their No Drapery counterpart. This example displays frosty gold luster throughout both sides that deepens at the borders to a rich, amber-gold and blue shades. Sharply struck throughout, a solitary hair-thin abrasion in the right obverse field defines the assigned grade. From the Dick Osburn collection. Census: 11 in 61, 42 finer (3/16). NGC ID# 24GL, PCGS# 572001 Base PCGS# 6232

1842 WB-101 Small Date Half Dollar, MS64
Large Letters, Reverse of 1842

- 3495** 1842 Small Date, Large Letters, WB-101, MS64 PCGS. Attractive multicolor toning blankets both sides of this near-Gem 1842 half, which exhibits a Small Date obverse paired with a Large Letters reverse of 1842. The rarity of high Mint State pieces from the 1840s is well-known by Seated half specialists but the true scarcity is often unrecognized by the wider collecting public. This piece is likely tied for a spot within the Condition Census for the type, with sharply struck motifs and natural color that ranges from gunmetal-blue and sea-green hues to ruby-red and straw-gold toning. A few of the right-hand stars lack some definition, but overall the coin is Choice with eye appeal that suggests an even higher grade. Population: 6 in 64, 2 finer (3/16). NGC ID# 24GT, PCGS# 572011 Base PCGS# 6240

**1842 Medium Date Seated Half, MS64
WB-105, FS-301, Tripled Date**

- 3496** 1842 Medium Date, Large Letters, Repunched Date, WB-105, FS-301, MS64 NGC. The date shows repunching north, widely on the 8, with multiple punchings of the 42 visible with a glass. A rare variety in Choice Mint State, this *Cherrypickers'* Guide variety is clearly the most popular of the Medium Date die pairs — always in demand for type as well as for the repunched date. Rich, iridescent shades include deep-blue, lavender, and ruby-red hues over sharply struck surfaces. Mint luster glows beneath the comprehensive toning. Census (all Medium Date varieties): 5 in 64 (2 in 64+), 5 finer (3/16). NGC ID# 24GU, PCGS# 413710 Base PCGS# 6239

**1842-O WB-101 Half Dollar, AU50
Rare Small Date, Small Letters Variant**

- 3497** 1842-O Small Date, Small Letters, WB-101, Die Pair 2, R.5, AU50 ANACS. WB-101. Small Date, Small Letters. The lack of a crosslet on the 4 in the date confirms the variety, as do the beginnings of a die crack on the reverse between A and L in HALF. Curiously, the same Small Letters reverse was also used for some 1841-O Seated halves, but the die crack on the 1841-O is more advanced, confirming that they were struck *after* the 1842-Os. Seated half dollar expert Bill Bugert writes of this issue, “The first two months mintage, January and February, are generally accepted to include the Small Date varieties although the initial 1842 delivery of those coins on February 28, 1842 included some coins dated 1841.” Mint luster remains on the silver-gold surfaces while coppery patina surrounds the peripheral devices of this lightly worn and abraded example, which ranks near the lower end of the Condition Census for the 1842-O Small Date, Small Letters type. Ex: *ANA Signature (Heritage, 8/2007)*, lot 836. NGC ID# 24GV, PCGS# 572015 Base PCGS# 6238

- 3498** 1843-O WB-101, Die Pair 1, R.4, MS61 PCGS. Radial die cracks at star 1 and star 11 confirm the late state of the obverse die, which also displays repunching on the top crossbar of the 3 in the date. Light, reddish-gold toning covers both sides with bold and frosty mint luster shining through. A few deeper blue accents at the rim confirm the original and attractive surfaces. The few minor abrasions do not distract, and the strike is consistently sharp in all areas except at the eagle's left leg and talon, suggesting an even higher grade is possible. From the Dick Osburn collection. Population: 3 in 61, 29 finer (3/16). PCGS# 572023 Base PCGS# 6244

**1844-O WB-103 Doubled Date Half Dollar, MS61
Broadly Doubled All Four Digits
Rare Mint State Example**

- 3499** 1844-O Doubled Date, WB-103, Die Pair 22, R.4, FS-301, MS61 PCGS. Arguably the “crown jewel” among all Doubled Date Mint blunders, the 1844-O WB-103 variety is so dramatic it borders on the unbelievable. All four digits of the date were entered far too high (one-fourth in the rock support, three-fourths out) and then repunched in a more correct position with only a halfhearted attempt to efface the wayward numbers.

While a number of circulated examples are known (Wiley-Bugert estimate an R.4 rarity rating), the WB-103 variety is extremely rare in Mint State. This is only the second Mint State coin we can identify as appearing at auction at any time, the other being an MS64 coin, which we sold in May 2015 as part of the fantastic Eugene H. Gardner Collection. Two previous appearances of that same coin appear in the auction archives.

The present example displays slightly prooflike fields and is struck from an early die state. The errant digits are bolder than many examples, most evident at the final 4. The obverse shield outline and vertical stripes show slight doubling near the scroll. The fields are faintly iridescent with predominant shades of olive-brown plus gold and blue overtones. As typical for this New Orleans issue, the strike is a trifle weak on some of the star centers and the eagle's left talon. A small dig and a pair of shallow scrapes in the right obverse field serve as hallmarks to identify this attractive, softly lustrous Seated half.

The grading services report three Mint State examples at PCGS and a single Mint State coin at NGC for a total of four Uncirculated pieces certified, although we believe two of the coins may be resubmissions. It is safe to say another opportunity to acquire a Mint State example of this popular variety may not be repeated for many years to come. Population: 1 in 61, 2 finer (3/16). NGC ID# 24H2, PCGS# 145817 Base PCGS# 6247

- 3500** 1845-O O Over Horizontal O, WB-103, Die Pair 6, R.3, FS-501, AU58 PCGS. Ex: Dick Osburn Collection. Elements on both sides of this interesting New Orleans variety are distinctly repunched, with the 1 in the date repunched north and the Medium O mintmark punched over an underlying horizontal O, visible within the primary mintmark. Semiprooflike surfaces retain golden mint luster while brief circulation accounts for minor high point wear and light field chatter. Gunmetal-blue toning at the rims adds to the awesome eye appeal of this near-Mint *Cherrypickers'* example. NGC ID# 24H4, PCGS# 409887 Base PCGS# 6249

- 3501** 1846 6 Over Horizontal 6, WB-104, FS-301, AU50 PCGS. A remarkable blundered date variety that has achieved a separate *Guide Book* listing and a wide following among half dollar and major variety collectors. This untuned and sharp representative is lightly abraded yet retains ample luster on the motifs and legends. Population: 6 in 50, 20 finer (3/16). Ex: *Long Beach Signature (Heritage, 9/2013)*, lot 3824. NGC ID# 24H6, PCGS# 409888 Base PCGS# 6254

3502 1847 WB-101 MS63 NGC. CAC. Ex: "Col." E.H.R. Green. Preserved for decades in a kraft envelope, this attractive Select example shows areas of bright, semi-reflective fields commingled with rich, cobalt-blue toning. Die polish in the fields still flashes strongly through the color. Sharply struck throughout, a few small marks determine the grade, yet the originality of the surfaces and the eye appeal are outstanding. CAC endorsed, housed in a special-labeled NGC holder with the E.H.R. Green/Eric P. Newman pedigree. Census (all varieties): 7 in 63, 11 finer (3/16).
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Numismatic Education Society. PCGS# 572054 Base PCGS# 6257

3503 1848 WB-101 MS61 PCGS. Azure-blue and peach-gold toning imbue the slightly reflective surfaces of this attractive 1848 half. Struck with a Normal Date, the issue joins other Seated halves from the 1840s as scarce and underrated in all Mint State grades. This example is particularly well-struck for the issue with full star centers and sharp central definition on the motifs. A few light lines hide in the toning. Population (all varieties): 4 in 61, 25 finer (3/16). PCGS# 572062 Base PCGS# 6260

1849-O WB-101 Seated Half, MS64 Just Two Examples Finer at PCGS

3504 1849-O WB-101, Die Pair 6, R.3, MS64 PCGS. The obverse die shows heavy rust lumps on the portrait and shield. Bright silver luster dominates some streaky tan-gold toning that courses across the obverse, yet the fields are reflective and a sharp strike defines the star centers and Liberty's hair strands. The reverse is equally well-struck and deeply toned in a more prevalent distribution of the same toning, with gunmetal-blue shades added to the mix. Only a few tiny marks account for the near-Gem designation. Population (all varieties): 8 in 64, 2 finer (2/16). PCGS# 572073 Base PCGS# 6263

1850 WB-101 Half Dollar, MS62 Very Scarce in Mint State

3505 1850 WB-101 MS62 NGC. The 1850 to 1852 issues from the Philadelphia Mint form a scarce trio in the Seated half series, when the Mint coped with the fluctuating value of silver in relation to gold. Only 227,000 Seated half dollars were minted in Philadelphia in 1850 and examples are infrequently seen in the marketplace. This sharply struck, pleasing coin displays reflective, nearly prooflike surfaces with light-gold toning on both sides. It is the Normal Date variety — no recutting on the 0 — with short die lines from Liberty's foot to the border and a few minor marks. From the Dick Osburn collection. Census: 7 in 62 (1 in 62+), 19 finer (3/16). PCGS# 572074 Base PCGS# 6264

1850 Half Dollar, Toned MS64 High-Attrition Semikey

3506 1850 WB-101 MS64 PCGS. The 1850 Seated Liberty half dollar (227,000 pieces struck) was minted at a time when silver traded at a premium, and coins were widely hoarded, exported, and melted. All examples, let alone Choice Mint State representatives like this, are exceedingly elusive. Each side of this nearly impossible-to-upgrade Seated half shows blended violet and blue patina over generally sharply struck motifs. The upper obverse is a tad soft, as is the eagle's left (facing) talon. Frosty luster radiates from the underlying minimally marked surfaces. Population: 22 in 64, 2 finer (3/16). PCGS# 572074 Base PCGS# 6264

1851 WB-102 Seated Half, MS60 Challenging Philadelphia Issue

3507 1851 Repunched Date, WB-102, MS60 PCGS. Icy blue overtones complement creamy gold luster on the obverse of this scarce Philadelphia issue, one of 200,750 pieces struck in 1851 when the silver-to-gold ratio was in disarray due to the influx of California gold. Silver coinage disappeared as its face value lagged the intrinsic worth of its silver content. This seemingly conservatively graded half shows a razor-sharp strike with virtually no marks of consequence and great eye appeal. The 18 of the date (and the 5, to a lesser degree) are recut south. Housed in a green label holder from the Dick Osburn collection. Population (all varieties): 2 in 60, 42 finer (3/16). NGC ID# 24HJ, PCGS# 572079 Base PCGS# 6266

3508 1854 Arrows, WB-101, MS63 NGC. Nearly 3 million pieces were struck by the Philadelphia Mint in 1854, with many of the dies pushed to their limits. This example shows sharp definition on the elements and slight reflectivity in the fields despite multiple die cracks and minor die clashing on both sides. Deeply iridescent toning features gold and lilac-gray hues amid strong amid plentiful mint luster beneath the rich patina. Census: 33 in 63 (2 in 63+), 44 finer (2/16). NGC ID# 24JL, PCGS# 572087 Base PCGS# 6279

3509 1855-O Arrows, WB-101, Die Pair 15, MS63 NGC. Ex: "Col." E.H.R. Green. An attractive Select specimen from the final year of the popular Arrows design, this coin is well-detailed and richly toned in shades of cobalt-blue, slate-gray, and sea-green, with a few hints of silver and lilac. Lot includes Eric Newman's original envelope. Census: 34 in 63, 66 finer (3/16).
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$2.50; Eric P. Newman Numismatic Education Society; Newman Collection, Part II (Heritage, 11/2013), lot 33726. NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

3510 1855-S Arrows, WB-101, Die Pair 4, R.5, VF25 PCGS. The scarcity of this San Francisco is a function of both the small mintage (just 129,950 pieces were struck) and the shortage of circulating small change on the West Coast that saw nearly the entire mintage deployed into the channels of commerce. This silver-gray example retains nice definition despite moderate wear and a few small marks from circulation. Most of the letters in LIBERTY are partially or wholly visible, lacking only the "I." NGC ID# 24JR, PCGS# 572091 Base PCGS# 6284

3511 1855-S Arrows, WB-101 — Tooled — PCGS Genuine. XF Details. After a year of minting gold coins, the new San Francisco Mint struck its first silver issue consisting of 129,500 1855-S half dollars. Scarce-to-rare in all grades, the issue is less available than even its low mintage suggests. This tan and stone-gray example shows smoothing in the fields and somewhat subdued surfaces, although nice definition remains on the motifs..

3512 1856-O WB-101, Die Pair 2, R.4, MS63 PCGS. Bright silver luster shines through a mottled powder-gray patina on the obverse, while the reverse displays steel-blue toning at the rims and rose-gray shades at the center. The strike is pinpoint-sharp on both sides of this attractive, Select Uncirculated example. A high-mintage New Orleans issue with more than 2.6 million pieces produced. Population: 29 in 63 (1 in 63+), 63 finer (3/16). NGC ID# 24HP, PCGS# 572095 Base PCGS# 6288

3513 1856-O Repunched Date, WB-103, Die Pair 14, R.2, MS63+ PCGS. CAC. This is a very early state of the obverse die, clearly showing the remains of a repunched digit 6 at the bottom-right of the subsequent 6, as well as repunching on the top ball of the 6 and its connecting loop. The reverse features a large O mintmark with tiny die lines projecting out from the eagle's left leg just above the topmost olive berry. The underside of the flag of the 5 also shows subtle recutting. Intermingled deep jade-green, sunset-orange, amber-gold, and electric-blue toning adorns both sides of this well-preserved O-mint Seated half. The surfaces are highly lustrous and free of distractions. A coin with stunning eye appeal.
Ex: *Central States Signature* (Heritage, 4/2014), lot 4407, which brought \$1,528. PCGS# 572096 Base PCGS# 6288

1859-S Seated Liberty Half Dollar, MS65 Low-Mintage, Better Date

3514 1859-S Medium S, WB-102, Die Pair 6, R.3, MS65 PCGS. Medium S. The 1859-S Seated Liberty half dollar claims a low mintage of 566,000 pieces and the issue is quite elusive in high grade. This impressive Gem exhibits well-detailed design elements, with just a touch of flatness on some of the stars. The well-preserved, brilliant surfaces radiate vibrant mint luster and eye appeal is terrific. Population: 3 in 65, 3 finer (3/16). NGC ID# 24J2, PCGS# 524239 Base PCGS# 6298

3515 1861 WB-101 MS64 PCGS. Soft mint luster remains throughout both sides of this near-Gem Seated half beneath a blanket of deep blue and olive-gray toning. Glimpses of coppery-gold accents enliven the surfaces, particularly on the reverse. Sharply struck, the coin's technical grade is determined by a few tiny marks well-hidden in the rich patina. NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

1861-O Seated Half, MS63 WB-101, Louisiana Issue

3516 1861-O WB-101, Die Pair 6, R.3, MS63 PCGS. Ex: Dick Osburn Collection. Struck under the authority of the State of Louisiana, this attractive New Orleans half displays bright mint luster and a sharp strike across both sides. The obverse is richly toned in variegated shades of lilac, gunmetal-blue, and lavender while traces of those tones crossover to the golden-gray reverse. A frosty, Select Uncirculated example with very few marks and exceptional eye appeal. Population (all varieties): 38 in 63, 47 finer (3/16). NGC ID# 24J8, PCGS# 572146 Base PCGS# 6303

1861-O Half Dollar, MS64 WB-101, Die Pair 4 Struck Under the State of Louisiana

3517 1861-O WB-101, Die Pair 4, Louisiana Issue, R.2, MS64 PCGS. One of several die pairs that constitute the WB-101 variety, the WB-4 die pair is distinguished by slanting diagonal die cracks running upward from each side of the 1s in the date, and a straight, wispy crack connecting the digit bottoms; the reverse displays a crack connecting STA and other cracks connecting many of the peripheral letters. The authoritative Bill Bugert *Register of Liberty Seated Half Dollar Varieties* places these dies among those employed under the State of Louisiana after it had seceded from the Union on January 26, 1861. This bright, silvery, lustrous example of this available die pairing would admirably fill the hole in a set for this historic issue. The surfaces are relatively unabraded for the grade and show quite a sharp strike throughout, despite some evidence of die lapping showing in the eagle's left (facing) wing. NGC ID# 24J8, PCGS# 572146 Base PCGS# 6303

3518 1861-O CSA Obverse, WB-102, FS-401, Die Pair 11, R.3 — Cleaning — PCGS Genuine. XF Details. This CSA die pair is always in demand as the same obverse used to strike the four known "original" CSA half dollars. Identified by a diagnostic die crack that runs from the right of star 7 to the bridge of Liberty's nose, in later states the die crack continues on through the chin into the shoulder. The present coin was cleaned with cloudy, silver-gray color with some angled hairlines and a few light abrasions. The late-state die crack remains sharply visible.

**1862 Half Dollar, Champagne-Toned Gem
Razor-Sharp Definition**

- 3519** 1862 WB-101 MS65 PCGS. By the summer of 1862 silver had largely been driven out of circulation. Most of the 253,000 P-mint half dollars issued in that year made their way to Canada and Latin America. However, a small contingent was hoarded stateside, accounting for the relative availability of the date in MS62 through MS65. This Gem No Motto half dollar is fully brilliant, and the obverse is fully detailed. Only the reverse shows a touch of incompleteness over the leg feathers. A single mark on Liberty's chest likely prevents an even higher grade. Population: 11 in 65, 5 finer (2/16). PCGS# 572151 Base PCGS# 6307

**1863-S Seated Half Dollar, MS64
One Finer at PCGS, Tied for Finest CAC**

- 3520** 1863-S Small Broken S, WB-102, Die Pair 4, R.3, MS64 PCGS. Struck from an early die state with the Broken S mintmark weak at the top, and nearly separated from the serif. The date is right and runs uphill, positioned lower than any other 1863-S variety. Vibrant, frosty luster dominates both sides for this near-Gem San Francisco half, with sharply impressed devices and attractive gold and steel-blue toning that is deepest at the margins. Light die clashing appears on both sides, but few marks or abrasions disturb the exceptional eye appeal. Population (all varieties): 27 in 64 (2 in 64+), 1 finer (3/16). PCGS# 572157 Base PCGS# 6310

**1865 WB-101 Half Dollar, MS64
Final-Year Philadelphia No Motto Issue**

- 3521** 1865 WB-101 MS64 PCGS. A gorgeous near-Gem from the last year of Philadelphia No Motto half dollar production, modestly toned silver-blue and gold on the obverse with deeper hues and steel elements on the reverse. Unlike many pieces, this one offers sharp detail on Liberty's head and the nearby stars. Population: 12 in 64, 21 finer (3/16). NGC ID# 24JF, PCGS# 572164 Base PCGS# 6313

- 3522** 1866-S No Motto, Small Thin S, WB-101, VF25 PCGS. A production of 60,000 No Motto half dollars was struck in San Francisco before new dies arrived with the IN GOD WE TRUST motto added to the reverse. The No Motto coins circulated immediately without regard to their low mintage or numismatic significance. This VF example displays a fully visible LIBERTY on the shield with only slight weakness at the E. Light, even silver-gray toning deepens around the raised devices with muted abrasions and some slight porosity when viewed with a lens. Population: 18 in 25, 86 finer (3/16). PCGS# 572170 Base PCGS# 6315

**1866 Seated Liberty Half, MS65+
Spectacular Multicolor Toning**

- 3523** 1866 Motto, Doubled Die Obverse, WB-104, MS65+ NGC. CAC. This high-end Gem represents the first year of the popular Motto design. The design elements are well-detailed and the well-preserved surfaces radiate vibrant mint luster, under vivid shades of greenish-gold and cerulean-blue toning. Overall eye appeal is terrific. Census: 11 in 65 (1 in 65+), 7 finer (2/16). PCGS# 572173 Base PCGS# 6319

**1869-S Half Dollar, MS65
Rare This Fine**

- 3524** 1869-S WB-101, Die Pair 2, R.3, MS65 PCGS. CAC. The tan-orange peripheral accents on the otherwise pearl-gray obverse deepen and join patches of sage on the lustrous reverse. Strongly struck in the centers with a degree of softness noted only at the obverse stars and a few vertical roller marks. Great eye appeal for this underrated issue, struck from an interesting die pair with the remnants of misplaced digits in Liberty's gown folds and to the left of the shield in the rock. CAC endorsed. Population (all varieties): 2 in 65, 2 finer (3/16). NGC ID# 24JY, PCGS# 572187 Base PCGS# 6326

- 3525** 1870-CC WB-101, Die Pair 2, R.5, Good 4 PCGS. With just 200 pieces or so surviving in all grades, the 1870-CC deserves its status as the key Carson City half dollar. 54,617 pieces were struck, few of which survived the rigors of Old West commerce. This example is heavily worn with the dentils worn smooth, as is the motto within the scroll. The reverse legend blends to the right rim. Natural golden-gray toning covers both sides, with no significant marks or distractions — just honest wear. The date and mintmark retain their sharpness. NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

**1870-CC Half Dollar, XF40
Challenging in All Grades**

- 3526** 1870-CC WB-101, Die Pair 4, R.6, XF40 PCGS. A scarce die pair for the rarest Carson City issue. Attractive silver-gray patina deepens around the devices, with violet and blue toning in the right obverse field. Light lines and small marks are joined by a short depression between star 8 and Liberty's head. Sharp definition remains on the devices, where the letters of LIBERTY are bold on the shield and the eagle's plumage is virtually complete. Just 54,617 pieces were struck, with perhaps 200 pieces surviving in all grades. Population: 17 in 40, 22 finer (3/16). NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

**1873 No Arrows, Closed 3 Half Dollar, MS65
WB-103, Rare in Gem Mint State, Tied for Finest**

- 3527** 1873 No Arrows, Closed 3, Misplaced Date, WB-103, MS65 PCGS. No Arrows, Closed 3. An errant 8 below the primary 8 is visible in the dentils, and the top serif and curve of a misplaced 7 as well, where they are particularly bold on this attractively toned Gem. Tied for finest at either service for the No Arrows, Closed 3 type, the coin displays vivid peripheral bands of royal-blue and deep violet toning surrounding light-gold centers on each side. The strike is generally sharp, though some minor softness shows on the eagle's left (facing) talon and to a lesser degree on the neckline of Liberty's gown. A pair of shallow marks are noted in the right obverse field near stars 12 and 13. The 1873 No Arrows, Closed 3 half dollar is a scarce and seemingly underrated issue in Mint State — few are certified in any Uncirculated grade — and none are known finer than MS65. In that light, the present frosty Gem should draw substantial attention from advanced Seated Liberty specialists. Population (all No Arrows, Closed 3 varieties): 3 in 65, 0 finer (3/16).

Ex: *Carter Numismatics* 7/2008; *The Eugene H. Gardner Collection Part II* (Heritage, 10/2014 as MS65 NGC), lot 98511. PCGS# 572208 Base PCGS# 6336

- 3528** 1873-CC No Arrows, Small CC, WB-101, Die Pair 1, R.3, VF35 PCGS. CAC. Closed 3. A Choice example of the Small CC type without Arrows at the date. The With Arrows (Open 3) varieties outnumber the No Arrows Carson City halves by about 2 to 1 both in mintage and in the number of surviving coins. This silver-gray example shows light abrasions and moderate wear, although all letters of LIBERTY are sharp on the obverse shield except the E, which is about 80% complete. CAC endorsed. Population (all No Arrows varieties): 13 in 35, 51 finer (3/16). PCGS# 572214 Base PCGS# 6338

**1873 WB-106 Seated Half
Brilliant Near-Gem Coin, Large Arrows**

- 3529** 1873 Large Arrows, WB-106, MS64 PCGS. CAC. Open 3, Large Arrows. First year of the two-year Arrows type. Untoned and snow-white, this is a superlative near-Gem that displays thick, frosted mint luster. The strike is sharp except at Liberty's hair strands and the surrounding two stars, which show minor blending. Abrasions are absent from the smooth fields with only a few high point ticks to report on the portrait. Outstanding quality in this popular type coin, seldom finer. Population: 40 in 64 (1 in 64+), 15 finer (2/16). NGC ID# 24L7, PCGS# 572211 Base PCGS# 6343

**1873 Arrows Half Dollar, MS65+
WB-106, Semiprooflike Fields**

- 3530** 1873 Large Arrows, WB-106, MS65+ NGC. All With Arrows 1873 half dollars were struck with the Open 3 logotype in the date, but pieces are known with both large and small arrows flanking the date. The Large Arrows variant is historically more plentiful, but its availability declines significantly in Gem condition. This semiprooflike example displays shades of rose-gold and violet toning in the central regions with deeper aquamarine color around the peripheries. The strike is sharp. Trivial stacking marks on the high points of Liberty limit the grade. Census (all With Arrows varieties): 6 in 65 (1 in 65+), 3 finer (3/16). NGC ID# 24L7, PCGS# 572211 Base PCGS# 6343

- 3531** 1873-CC Arrows XF45 NGC. WB-Unlisted, Die Pair 7. The 1 of the date is repunched slightly south, with a corner of the underdigit 1 showing above the right base. The date is farther right on this variety compared to the WB-103 cross reference, with "haywire die scratches" in the rock support and among Liberty's lower gown folds. It is the With Arrows obverse paired with a Large CC reverse, with the mandated Open 3. This Choice XF example is deeply toned with intense gunmetal-blue toning at the margins surrounding amber-gold centers. Hints of mint luster remain near the central motifs. Slightly more available than the surrounding Carson City dates, yet still challenging even when circulated. Census: 15 in 45, 40 finer (3/16). NGC ID# 24L8, PCGS# 6344 Base PCGS# 6344

- 3532** 1873-CC Arrows, Small CC, WB-102, Die Pair 5, R.6, VF30 PCGS. The date is positioned less to the right than the other Arrows, Small CC varieties, and the right arrowhead shaft points toward the center of the 3. A very scarce variety, called R.6 in the current Bill Bugert reference. Olive-gray toning with deep accents and slight build-up around the devices covers both sides. A few small pits and marks are noted, yet the surfaces appear smooth in-hand and nice definition remains on the motifs. LIBERTY is weak at the E but otherwise sharp. PCGS# 572215 Base PCGS# 6344

**1873-CC WB-103 Arrows Half Dollar, AU50
Evenly Toned, Pleasing Example**

- 3533** 1873-CC Arrows, Large CC, WB-103, Die Pair 6, R.4, AU50 NGC. Large Mintmark. This variety is ranked R.4 in the current Bugert reference. The shaft of the right arrowhead points to the center of the 3, and the upright of 1 is centered over a dentil. A dove-gray, eye-appealing, lightly circulated coin with a crescent of jade toning on each side. One small dark spot appears on the leftmost obverse shield stripes, and the strike is well-impressed. Census (all Large CC varieties): 3 in 50, 37 finer (3/16). NGC ID# 24L8, PCGS# 572216 Base PCGS# 6344

**1874 Arrows Half Dollar, Sharp MS64
Choice, Partially Prooflike Fields**

- 3534** 1874 Large Arrows, WB-102, MS64 PCGS. Light rose and gray patina prevail on each side, with a glimpse of deeper toning near the upper reverse rim. Sharply struck surfaces show a merely a stray tick or two, and iridescent prooflike reflectivity in the fields adds eye appeal to this attractive near-Gem business strike. Much more elusive in finer grades, where the two services combined report fewer than 40 coins (3/16). NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346

- 3535** 1874-CC Arrows, WB-101, Good 6 PCGS. Sharp definition remains for the assigned grade, with full rims and most of the dentilation still in evidence. LIBERTY on the obverse shield is worn smooth, but some letters remain on the motto within the scroll and decent feather detail remains on the wings. The peripheral motifs — stars, date, legends, and denomination — retain their sharp edges. The diagnostic “cowlick” die flaw on the eagle’s head beneath T of TRUST is clear. Scarce in all grades — just 59,000 pieces were struck. NGC ID# 24LB, PCGS# 572221 Base PCGS# 6347

- 3536** 1875-S Very Small S, WB-101, Die Pair 17, R.3, MS64 NGC. CAC. Ex: Newman. Dusky shades of silver-gray and amber toning blanket the lustrous surfaces of this well-detailed Choice specimen. The Wiley-Bugert variety is determined by the very small mintmark above the F in HALF. Census: 59 in 64, 42 finer. CAC: 6 in 64, 22 finer (3/16).

Ex: “Colonel” E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$3.50; Eric P. Newman Numismatic Education Society; Newman Collection, Part II (Heritage, 11/2013), lot 33740. NGC ID# 24KE, PCGS# 572229 Base PCGS# 6351

**1877-CC WB-103 Half Dollar, Lustrous MS64
Fully Struck and Virtually Untoned**

- 3537** 1877-CC Closed Bud, Medium CC, WB-103, Die Pair 13, R.2, MS64 PCGS. Type Two Reverse, Closed Bud. Medium CC, more widely spaced than any other 1877-CC variety. Partially reflective fields contrast with frost-white central motifs for exceptional eye appeal. Struck from an early state of the dies, with razor-sharp stars and hair detail on Liberty and full definition on the eagle’s plumage, talons, and arrow fletchings. Untoned except for fleeting reddish-gold accents in the right obverse and reverse fields, as well as the shield and central elements of the eagle. No sign of die clashing or die cracks confirm the early die state. Population: 56 in 64 (4 in 64+), 25 finer (3/16). PCGS# 572250 Base PCGS# 6356

- 3538** 1877-CC Closed Bud, Medium CC, Repunched Date, WB-104, Die Pair 11, R.4, MS61 NGC. Type Two Reverse (Closed Bud). Light gold overtones grace satiny silver surfaces. A well-defined example that shows numerous wispy abrasions in the fields but no actual wear. Struck from prominently clashed dies on both sides, visible especially on the reverse where the tops of 87 from the obverse appear beneath ES of STATES and above 187 in the date, where the reverse’s scroll appears. The 77 in the date is repunched north and slightly east, visible at bottom of the numerals. PCGS# 572251 Base PCGS# 6356

**1877-CC Seated Half, Vibrant MS64
WB-104, Repunched 77**

- 3539** 1877-CC Closed Bud, Medium CC, Repunched Date, WB-104, Die Pair 12, R.3, MS64 PCGS. Type 2 Reverse Hub (Closed Bud). Flashy silver luster catches the eye from the brilliant-white, frosty surfaces of this near-Gem Carson City half. Both 7s of the date are repunched north, while the vibrant surfaces display an early die state with no evidence of obverse die clashing. In contrast, the reverse is clashed multiple times with numerous die cracks throughout the legend and denomination. A nearly full strike on the star centers, Liberty’s head, and the central motifs adds to the exceptional eye appeal. Housed in a green label holder from the Dick Osburn collection. Population (all varieties): 56 in 64 (4 in 64+), 26 finer (3/16). PCGS# 572251 Base PCGS# 6356

**1877-CC Half Dollar, WB-104, MS64
Repunched 7s, Closed Bud Reverse**

3540 1877-CC Closed Bud, Medium CC, Repunched Date, WB-104, MS64 PCGS. The bases of the 7s in the date are repunched. Type Two (closed bud) reverse. Well struck from a lightly clashed reverse die with intense mint frost that produces a dazzling sheen across the brilliant, ice-white surfaces. Wispy marks in the obverse fields prevent an even finer grade assessment. A scarce issue in Mint State. Population: 56 in 64 (4 in 64+), 26 finer (3/16), for all 1877-CC half dollars. PCGS# 572251 Base PCGS# 6356

3541 1877-S Open Bud, Very Small S, WB-Unlisted, Die Pair 25, R.5, MS62 PCGS. Struck from a transitional reverse for the 1877-S with a very small mintmark perched high and to the left of the feather tip (the only such mintmark position for the date) with an Open Bud (from the Type One hub), paired with the Type Two hub with a raised olive leaf vein on leaf 2. A rare die marriage from this transitional reverse die. Beautifully toned in gunmetal-blue, coppery-gold, and sea-green shades with abundant frosty mint luster throughout. The strike is needle-sharp on both sides. From the Dick Osburn collection. PCGS# 572253 Base PCGS# 6357

**1880 WB-102 Half Dollar, MS66+
Closed Bud Reverse**

3542 1880 Closed Bud, WB-102, MS66+ PCGS. This is the Closed Bud reverse that is apparently common to all circulation strike 1880 Seated half dollars. Approaching the finest certified, this Premium Gem has few peers in the world of Liberty Seated half dollars. Both sides have reflective fields and lustrous devices beneath lovely gold, blue, green, and orange toning. Population: 29 in 66 (2 in 66+), 2 finer (3/16). NGC ID# 24KT, PCGS# 572262 Base PCGS# 6362

**1881 Half Dollar, Toned MS65+
Reflective, Mark-Free Surfaces**

3543 1881 Closed Bud, WB-102, MS65+ NGC. CAC. Partially prooflike fields surround the frosted central devices of this high-end Gem half, one of just 10,000 circulation strikes produced in 1881. Steel-blue overtones cover attractive, lustrous gold base toning on the obverse, with violet shades added to the palette on the reverse. The coin is remarkably free of any marks, lines, or signs of contact. Slight weakness at Liberty's head and the surrounding star centers as well as at the eagle's left talon do not diminish the eye appeal of this impressive, low-mintage coin. Census: 11 in 65 (3 in 65+, 1 in 65 ★), 13 finer (3/16). NGC ID# 24KU, PCGS# 572264 Base PCGS# 6363

**1883 Seated Half, MS66
Beautiful Toning, Semiprooflike**

3544 1883 WB-101 MS66 PCGS. CAC. Quarter and half dollar production was minimal through most of the 1880s, as significant amounts of manpower and silver bullion were absorbed by the demands of the Bland-Allison Act, calling for the coinage of millions of commercially unneeded silver dollars. Half dollars were unneeded, too, and only 8,000 were struck for circulation in 1883. Light mint-green and orange-gold peripheral toning gives way to silvery-blue and peach-gray patina over the centers of this attractive Premium Gem Seated half. The top of Liberty's head and the adjacent stars are a trifle soft, but the design elements are otherwise well-defined, and the advanced collector will appreciate semiprooflike fields and delicately preserved surfaces. Population: 19 in 66 (1 in 66+), 3 finer (3/16). Ex: *The Eugene H. Gardner Collection, Part III* (Heritage, 5/2015), lot 98496. PCGS# 572267 Base PCGS# 6365

3545 1886 WB-101 MS62 PCGS. The silver-white surfaces are completely untoned on this MS62 half dollar of 1886, one of the low-mintage dates that conclude (nearly) the series, this one struck in the amount of 5,000 coins for circulation. The surfaces show mostly light ticks, with a couple of grazes at (HAL)F D(OLLAR) the sole larger marks. Population: 21 in 62, 77 finer (2/16). PCGS# 572271 Base PCGS# 6368

3546 1888 WB-101 AU58 PCGS. One of the late-series, low-mintage Seated halves, this primarily silver-white example is one of 12,001 circulation strikes produced. A few faint hints of gold-gray toning join nearly full mint luster that remains on both sides. Sharply struck from clashed dies, only minor abrasions exist along with minor weakness at stars 7 and 8 and Liberty's head between the stars. NGC ID# 24L3, PCGS# 572273 Base PCGS# 6370

PROOF SEATED HALF DOLLARS

1858 Seated Half, PR65 Only Three Finer Coins at PCGS

- 3547 1858 PR65 PCGS.** The Mint experimented with marketing proofs to the general public in 1858 and increased proof production to handle anticipated demand from a wider audience. While the exact quantity of proofs is still open to debate, the number of grading events suggests the 2016 *Guide Book* mintage of 300 pieces is reasonable. Of these, PCGS estimates no more than 80 to 100 pieces survive in all grades. This sharply detailed Gem displays deeply mirrored fields, under attractive shades of cobalt-blue and sea-green toning. Population: 6 in 65, 3 finer (3/16). NGC ID# 27TH, PCGS# 6412

1859 Half Dollar, PR64 Richly Toned

- 3548 1859 PR64 PCGS.** The reported mintage of 800 proof half dollars in 1859 likely counts an unknown number of coins melted at year's end. PCGS estimates 300 specimens survive. This Choice proof is richly toned in dusky violet, blue, and green patina. The fields become noticeably deep and reflective when tilted under a lamp, producing a moderate degree of contrast against the predictably full design elements. Two tiny contact marks occur under the eagle's beak. Population: 43 in 64, 15 finer (3/16). NGC ID# 27TJ, PCGS# 6413
- 3549 1867 PR63 PCGS. WB-101.** This collector-grade proof 1867 Seated half dollar displays brilliant surfaces and fully rendered motifs with subtle cameo contrast. Scattered hairlines limit the grade, but these are unnoticed by the naked eye. This issue had a small mintage of 625 pieces. Population: 36 in 63, 52 finer (3/16). NGC ID# 27U2, PCGS# 6425
- 3550 1868 PR64 Cameo PCGS. CAC.** Aside from a few delicate lines, the smooth-mirrored fields are undisturbed and well-preserved with contrasting mint frost that blankets the central motifs. The strike is razor-sharp. Pale-gold toning casts a translucent glow over the glassy surfaces, deepening slightly at the rims. A Choice cameo proof, CAC-endorsed. Population: 14 in 64 (1 in 64+) Cameo, 12 finer (2/16). NGC ID# 27U3, PCGS# 86426

1871 Seated Half, PR64 Ultra Cameo Sharp and Well-Preserved

- 3551 1871 PR64 Ultra Cameo NGC.** Light patina fails to impede the blatant contrast between deeply mirrored fields and lighter-colored, nicely frosted devices on this attractive near-Gem proof Seated half. The strike is expectedly sharp on all details, but the grade may be held back a bit by two small dark flecks with milky-white islands surrounding them, both in the obverse fields and not at all overt (and scarcely seen without magnification). Census: 1 in 64 Ultra Cameo, 1 finer (3/16). NGC ID# 27U6, PCGS# 96429

1877 Half Dollar, Nicely Toned PR65 Only 510 Proofs Struck

- 3552 1877 Closed Bud, WB-103, PR65 PCGS.** Type Two Reverse, identified by the closed bud above the H in HALF. A huge number of circulation-strike half dollars were manufactured at Philadelphia in 1877 — an 8.3 million-coin mintage that is the second-highest in the entire Seated half series. By comparison, the production of 510 proofs seems tiny, and the total is also small relative to other Seated half proof issues. This example is generally forest-green and peach-gold in color, with cream-gray and pale red toning added to the mix on the obverse. When rotated under a light, each side further exhibits a medley of ice-blue, magenta, and lavender elements. The glassy fields are devoid of hairlines, and the overall appeal is extraordinary. Population: 12 in 65 (2 in 65+), 3 finer (3/16). NGC ID# 27UC, PCGS# 6438

**1877 Half Dollar, PR64 Cameo
Lightly Toned and Well-Contrasted**

- 3553 1877 PR64 Cameo PCGS. CAC.** Type Two Reverse (Closed Bud). Just 510 proofs were struck for the 1877 half dollars, the lowest proof mintage of the post Civil War years except for 1873, when 500 proofs were made. This nicely contrasted Choice Cameo example displays deep mirrors on both sides with frosted raised devices. The strike is full except at the eagle's left (facing) talon. Lightly toned with a faint translucent reddish-gold tinge, the gleaming silver surfaces are virtually free of marks. A pinpoint planchet flaw near star 10 and a few delicate lines are the sole imperfections, and they are inconsequential. Population: 10 in 64 (2 in 64+) Cameo, 7 finer (3/16). NGC ID# 27UC, PCGS# 86438

**1878 Seated Half, Toned PR66
Challenging Proof in the Highest Grades**

- 3554 1878 PR66 PCGS.** The Closed Bud reverse was employed for business strikes and for nearly all proofs in 1878. This Premium Gem example is nicely mirrored with peach-gold toning surrounding azure-blue centers. The coin is sharply struck except for minor incompleteness on the eagle's left talon and the nearby arrow fletchings. PCGS reports just two finer proofs of this issue, one of which is in Cameo format. Population (non-Cameo): 4 in 66, 1 finer (3/16). NGC ID# 27UD, PCGS# 6439

- 3555 1879 PR63+ NGC.** Deep multicolor toning covers both sides of this high-end Select proof half dollar, one of 1,100 proofs issued at the start of more than a decade of extremely low mintages for the half dollar denomination. Viewed under light, gunmetal-blue, peach-gold, and copper-orange toning reveals its mirrored intensity. The strike is sharp with an absence of any marks save for a few delicate lines beneath the toning. NGC ID# 27UE, PCGS# 6440

**1881 Half Dollar, Attractive PR66
Colorful Iridescent Toning**

- 3556 1881 PR66 PCGS. CAC.** The proof half dollars of 1881 claim a mintage of 975 pieces. Premium Gems such as the present offering are rare and higher-grade examples are nearly unobtainable. Soft cobalt-blue and crimson toning runs over both sides, each of which exhibits sharply struck design elements and is impeccably preserved. The split berry beneath the olive branch distinguishes this proof from prooflike business strikes. Population: 11 in 66, 2 finer (3/16). NGC ID# 27UG, PCGS# 6442

**1882 Half Dollar, PR66
Low Mintage, Great Eye Appeal**

- 3557 1882 PR66 PCGS.** This sought-after date enjoys an ultra-low mintage of 4,400 business strikes, forcing many collectors to turn instead to one of the 1,110 proofs minted. The obverse shows rainbow hues around the margins with dusky gold patina over the interior portions. Peripheral wisps of gold, green, and rose color the otherwise brilliant and remarkably contrasted reverse. The level of preservation, like the visual quality, is exceptional. Population: 20 in 66, 2 finer (3/16). NGC ID# 27UH, PCGS# 6443

- 3558 1883 PR64 Cameo PCGS. CAC.** Attractive multicolor toning decorates the obverse in rainbow shades, while the reverse displays vivid gold toning that deepens at the margins and merges with electric-blue toning at the rims. The scant production of 8,000 business strikes was supplemented by a generous mintage of 1,039 proofs. This contrasted Cameo proof shows a sharp strike with Choice eye appeal. CAC endorsed. Population: 39 in 64 Cameo, 24 finer (3/16). NGC ID# 27UJ, PCGS# 86444

- 3559 1886 PR63 PCGS. WB-101.** A collectible example of this popular late-series proof issue, showing fully rendered design elements and deeply reflective fields. Each side is naturally toned in mottled russet-gray, olive, and lavender-gold hues, although the reverse is slightly lighter than the obverse. NGC ID# 27UM, PCGS# 6447

1888 Seated Half, Needle-Sharp PR66

- 3560 1888 PR66 NGC.** Light, even patina covers both sides of this lovely Premium Gem proof 1888 Seated half, which further exhibits a needle-sharp strike and excellent preservation throughout. The PR66 grade level is the highest in which examples can be located with any regularity. Only 832 proofs accompanied the circulation-strike mintage of 12,001 pieces. Census: 13 in 66 (1 in 66+), 6 finer (3/16). NGC ID# 27UP, PCGS# 6449

BARBER HALF DOLLARS

- 3561 1892 MS64 PCGS.** A boldly struck first-year type coin, this 1892 Barber half dollar displays satiny luster with dusky lavender-gray and mint-gold hues blended over each side. Finer coins are occasionally seen, although this piece is ideal for the budget-conscious collector. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

1892-S Half Dollar, MS65
Few Known So Fine

- 3562 1892-S MS65 NGC.** While most coinage designs receive a "savings" bonus from the first year of issue, the Barber design found few fans, particularly on the West Coast; thus, the 1892-S half is a rarity in Gem condition. The present coin is minimally toned with a mostly crisp strike and lovely preservation — the eagle's right (facing) talons and the fletchings show minor weakness. Census: 9 in 65, 4 finer (3/16).
Ex: FUN Signature (Heritage, 1/2009), lot 2926. NGC ID# 24LJ, PCGS# 6464

1893-S Half Dollar, Brilliant MS64
Conditionally Rare San Francisco Date

- 3563 1893-S MS64 NGC.** The 1893-S is an elusive, low-mintage issue struck to the extent of 740,000 coins. This appealing Choice Barber half offers brilliant surfaces with subtle golden accents, coruscating luster, and a bold strike. A couple of wispy marks on the cheek limit the grade, but this coin is high-end nevertheless. Census: 8 in 64, 4 finer (3/16).
Ex: Long Beach Signature (Heritage, 2/2008), lot 648. NGC ID# 24LM, PCGS# 6467

1893-S Half Dollar, MS64
Reflective Fields

- 3564 1893-S MS64 PCGS. CAC.** The low-mintage 1893-S half (740,000 pieces) had a comparably small survival rate, making Mint State examples highly desirable. Soft golden-tan coloration is joined by sky-blue, apple-green, and lavender around the obverse margins. The design features are sharply impressed except for the often-seen softness on the fletchings and adjacent claw. Trivial marks preclude Gem status. Population: 16 in 64, 8 finer (2/16).
Ex: Central States Signature (Heritage, 4-5/2010), lot 956. NGC ID# 24LM, PCGS# 6467

- 3565 1894 MS64 PCGS.** Pale ivory-gray patina accompanies a hint of pale blue at the extreme rims of this nicely preserved and sharply struck near-Gem Barber half. More than 1.1 million examples of this issue were produced for circulation, but most did just that — circulated extensively, and even the average certified survivor is only Choice XF-AU. The strike on this piece is admirably bold, up to and including the usually problematic upper-right shield corner. Population: 29 in 64 (1 in 64+), 36 finer (2/16). NGC ID# 24LN, PCGS# 6468

- 3566 1894 MS64 PCGS.** Lustrous surfaces show brief appearances of light tan and gray toning, and display impressively-struck design features. A short, squiggly mark is noted between stars 3 and 4 on the obverse. Population: 28 in 64 (1 in 64+), 36 finer (2/16).
Ex: Long Beach Signature (Heritage, 2/2007), lot 3541; Central States Signature (Heritage, 4/2008), lot 1198; Long Beach Signature (Heritage, 6/2012), lot 3862. NGC ID# 24LN, PCGS# 6468

- 3567 1894-O MS64 PCGS.** The New Orleans strike is typically incomplete along the right shield edge, leg, talons, and arrow fletchings, but the exquisite blue and golden-mauve toning adds allure to the reverse while the obverse is mostly white and frosty. A narrow band of blue and gray toning hugs the obverse rim. Strong mint luster radiates from both sides of this conditionally scarce O-Mint coin. Population: 54 in 64, 14 finer (2/16). NGC ID# 24LP, PCGS# 6469

1894-O Half Dollar, MS65
Conditionally Rare New Orleans Issue

- 3568 1894-O MS65 PCGS.** Uncirculated 1894-O half dollars are scarce, and most reside in the MS62-MS64 grade range. This Gem example is conditionally rare, and finer coins are exceedingly so. The strike is above average for a New Orleans issue of this period, although the right wing junction and the eagle's right (facing) talons are a trifle soft. Each side displays satiny luster with amber-gold toning that lightens over the interiors. Population: 8 in 65, 6 finer (3/16). NGC ID# 24LP, PCGS# 6469

1895 Barber Half Dollar, MS66
Spectacular Multicolor Toning

- 3569 1895 MS66 PCGS. CAC.** This sharply defined Premium Gem displays full detail on the usually incomplete reverse shield. Pale lilac-gray centers are surrounded by bursts of olive and golden-russet toning with occasional cobalt-blue accents around the obverse borders. The CAC green approval sticker attests to the visual quality that is immediately apparent. The 1895 is a significant, if not mythic date for many collectors because of its connection to the "King of the Morgan Dollars." The *Mint Director's Report* for that year states that 12,000 Morgan dollars were struck, but researchers now believe that was probably an accounting error. Consequently, the 1.8 million 1895 P-mint Barber halves represent the highest-denomination silver coins struck for circulation at the Mint. The coins circulated extensively, and high-quality Premium Gems such as this are rarely encountered. Population: 6 in 66 (3 in 66+), 1 finer (3/16). NGC ID# 24LS, PCGS# 6471

- 3570 1895-O MS63+ PCGS Secure.** Frosty luster gives this high-end Select 1895-O Barber half dollar unusually ample eye appeal. Rose-gold toning appears around the peripheries, and grade-limiting abrasions are minor. The eagle's right (facing) talons and the fletchings are slightly weak, as usual. Population: 19 in 63 (1 in 63+), 28 finer (2/16). NGC ID# 24LT, PCGS# 6472

- 3571 1895-S MS63 NGC.** An attractive Select specimen, with well-detailed design elements that show a touch of the often-seen softness on the eagle's claw. The lightly marked surfaces display satiny mint luster, under shades of lavender-gray and greenish-gold toning. Census: 22 in 63, 48 finer (3/16). NGC ID# 24LU, PCGS# 6473

1897-O Half Dollar, MS64
Shimmering Luster

- 3572 1897-O MS64 PCGS Secure. CAC.** The 1897-O is a better date overall and rare finer than MS64. Only 623,000 pieces were struck, marking the second-lowest production total of the series up to that point. This Choice example displays shimmering, satiny luster with warm golden toning. Abrasions are almost unimportant. Typical weakness persists on the reverse fletchings, talons, and right-side plumage. Eye appeal is above average for the issue. Population: 16 in 64, 19 finer (2/16). NGC ID# 24LZ, PCGS# 6478

1897-O Barber Half, MS65
Conditionally Elusive

- 3573 1897-O MS65 NGC.** Despite the low mintage of 632,000 coins, Mint State examples of the 1897-O may be had up through Gem and Premium Gem levels for a price. David and John Feigenbaum posit that this is because early dealers such as B. Max Mehl saved nice pieces of the issue near the time of their production — four years after Augustus Heaton's classic *Mint Marks* reference altered the collecting landscape forever.

This alluring Gem offers silvery, lustrous surfaces lightly tinged with gold patina. Both sides are remarkably pristine and distraction-free, but some localized strike softness shows on the reverse in the usual areas. Census: 7 in 65, 4 finer (3/16).

Ex: *Long Beach Signature* (Heritage, 2/2008), lot 660; *Central States Signature* (Heritage, 4-5/2009), lot 799. NGC ID# 24LZ, PCGS# 6478

- 3574 1898 MS64 PCGS.** The surfaces display generous luster throughout both sides and show a sharp strike even up to the right-top shield border and the eagle's claws. This untuned piece may avoid the Gem grade only because of the small die-grease stain on the reverse, an undistracting smudge at that, and a few stray marks on the cheek. The 1898 Barber half dollar, despite a production approaching 3 million coins, is far more elusive than generally realized. Population: 51 in 64 (2 in 64+), 30 finer (2/16). NGC ID# 24M3, PCGS# 6480

**1899 Half Dollar, Sharp MS65
Few Known Finer**

- 3575 1899 MS65 NGC. CAC.** The 1899 is among the more plentiful Barber halves of the 1890s in Mint State, although Gem and finer coins remain highly elusive. This is a rare CAC-endorsed MS65 coin with razor-sharp detail and satiny luster. Both sides display delicate champagne toning and are devoid of bothersome abrasions. Census: 17 in 65 (2 in 65+), 8 finer; CAC: 7 in 65, 6 finer (3/16). NGC ID# 24M6, PCGS# 6483

**1901 Half Dollar, MS65
Lustrous 20th Century Type Coin**

- 3576 1901 MS65 NGC.** A conditionally rare Gem example of this inaugural 20th century Philadelphia half dollar, showing frosty, brilliant luster and sharp design elements. There are no severe abrasions, only a few small lines on the cheek that limit the grade. Finer coins are out of reach for most collectors. Census: 13 in 65 (1 in 65 ★), 3 finer (2/16). NGC ID# 24MC, PCGS# 6489

**1901 Barber Half, MS65
Elusive This Well-Preserved**

- 3577 1901 MS65 PCGS. CAC.** Mottled olive, gold, and pale rose hues grace each side of this well-struck 1901 Barber half. The reverse contributes some smoky hues along with mottled silver areas, but the strike is quite sharp throughout. Despite its status as a relatively high-mintage P-mint issue (more than 4 million pieces struck), the 1901 is elusive in Gem and finer grades. Population: 29 in 65 (9 in 65+), 6 finer (3/16). NGC ID# 24MC, PCGS# 6489

**1901-O Barber Half Dollar, MS63
Underrated Branch Mint Issue**

- 3578 1901-O MS63 PCGS.** Among 1901-dated half dollars, the S-Mint issue receives all the attention while this O-Mint is often overlooked. However, in MS63 or finer grades, the 1901-O actually has a lower PCGS population than does the 1901-S. This Select Mint State piece exhibits brilliant silver surfaces with satin luster and a total absence of toning. Population: 10 in 63, 17 finer (3/16). NGC ID# 24MD, PCGS# 6490

**1901-O Half Dollar, MS64
Natural Golden-Olive Patina**

- 3579 1901-O MS64 PCGS. CAC.** The 1901-O Barber half dollar is a better date, commanding a premium in the upper circulated and Mint State grades. This Choice example displays satiny luster over golden-gray surfaces with overtones of olive and amber-red in portions of the fields. Well-struck on the obverse but weak over the central portion of the eagle on the reverse. Population: 10 in 64 (2 in 64+), 7 finer (3/16). NGC ID# 24MD, PCGS# 6490

- 3580 1901-S XF45 PCGS.** For the collector who contemplates a complete set of Barber half dollars in higher circulated grades, this 1901-S would be a nice place to start. We are only aware of one matched XF45 PCGS set that has ever been assembled. Duplicating that set will give the collector many years of pleasant searching. This has natural gold, lilac, and steel toning on its ivory surfaces with traces of luster in the protected areas. NGC ID# 5EPB, PCGS# 6491

**1902-S Barber Half, Elusive MS65
Underrated Condition Rarity**

- 3581 1902-S MS65 PCGS.** The 1902-S Barber half issue is an unheralded condition rarity within the series, likely overshadowed by its proximity to the even-more-elusive 1901-S and the fabled 1904-S. All of these difficult S-mint Barber halves seem to have inflated population numbers that thereby understate their true rarity in the higher Mint State levels. This Gem 1902-S offers powerful luster on ivory-gray surfaces laced with gold and cream patina. A few thin scrapes on Liberty's cheek and the wreath above define the grade. The strike is adequate, save for momentary weakness in the centers of stars 11 and 12 and trivial incompleteness at the upper-right corner of the shield on the reverse. A similarly graded example was lot 1223 in our ANA Signature (Heritage, 8/2015), where it brought \$5,170. Population: 7 in 65, 14 finer (3/16). NGC ID# 24MH, PCGS# 6494

**1904 Half Dollar, Silver-White MS65
Nicely Frosted**

- 3582 1904 MS65 PCGS.** The surfaces are frosty silver-white on this appealing Gem strike. Even though nearly 3 million examples of this issue were produced, few make the Gem grade. This piece is exceptionally well-struck and might even achieve the Premium Gem grade level, were it not for a single small tick midshield on the reverse, the only noticeable contact. Population: 16 in 65 (2 in 65+), 7 finer (3/16). NGC ID# 5EPG, PCGS# 6498

- 3583 1906-D MS64 NGC.** An attractively toned example that is somewhat elusive at the Choice Mint State level. Moderate silver-gray toning overlays both sides, while mottled reddish-russet toning highlights each side at the borders. An attractive near-Gem, with the "look" that suggests an even finer grade.
Ex: *Long Beach Signature* (Heritage, 9/2004), lot 6723. NGC ID# 24MV, PCGS# 6505

- 3584 1906-S MS64 PCGS.** Lovely milky-white toning covers the resplendent surfaces, with the occasional hint of tan color. Impressive luster shimmers throughout the fields and enhances the eye appeal. The strike is needle-sharp, and there are only a couple of insignificant handling marks. Like most San Francisco Barber halves, the 1906-S is challenging in high grades. Population: 44 in 64 (3 in 64+), 20 finer (2/16).
Ex: *Dallas Signature* (Heritage, 10/2009), lot 731. NGC ID# 24MX, PCGS# 6507

- 3585 1907 MS65 NGC.** Faint wisps of gold toning do little to restrain the powerful silver mint luster that bursts forth from every viewing angle across both sides of this splendid Gem half dollar. More than 2.5 million pieces were struck, making the 1907 a logical selection for high-grade type as well as a likely upgrade in a Gem Barber half set. Census: 21 in 65 (1 in 65+), 3 finer (2/16). NGC ID# 24MY, PCGS# 6508

- 3586 1907-D MS64 PCGS. CAC.** Satin luster shines through a veil of lilac-gray and olive toning, giving this near-Gem Barber half an air of originality for which CAC has awarded a green sticker. The obverse stars are fully brought up, and overall detail is sharp despite incompleteness on the right shield corner and talon, as usual. NGC ID# 24MZ, PCGS# 6509

- 3587 1907-O MS65 NGC.** A subtle sheen of fawn-gold toning visits the satin-silver surfaces of this lustrous Gem New Orleans half. Exceptionally well-preserved, the sharply struck surfaces show no marks worth mention, while outstanding eye appeal radiates from each side. Scarce and underrated in MS65. Census: 17 in 65, 7 finer (2/16). NGC ID# 24N2, PCGS# 6510

**1907-S Half Dollar, Toned MS65
A Scarce Date in Mint Condition**

- 3588 1907-S MS65 PCGS.** David Lawrence, in his *The Complete Guide to Barber Halves*, writes that the 1907-S is "... the scarcest late date of the series in Mint State," and rates the issue in this condition as R.5. Glowing luster emanates from each side of this gorgeous Gem. A coat of low intensity gold-beige and bluish-gray patination enriches well cared for surfaces that reveal a few minor marks that are well within the confines of the grade designation. The design detail is generally sharp, except for minor weakness in the upper right corner of the shield and adjacent feathers. Population: 9 in 65, 9 finer (2/16).
Ex: *ANA Signature* (Heritage, 2007), lot 1697. NGC ID# 24N3, PCGS# 6511

- 3589 1908 MS65+ PCGS. CAC.** A cream-gray Gem overlaid by peripheral freckles of russet toning. A bold strike, vibrant luster, and essentially unabraded surfaces further ensure the eye appeal. Only a slight rim nick over the I in IN denies an even higher grade. Population: 15 in 65 (1 in 65+), 10 finer (3/16). NGC ID# 24N4, PCGS# 6512

**1908-O Half Dollar, MS67
Notable Condition Rarity**

- 3590 1908-O MS67 NGC.** The penultimate New Orleans half dollar issue was struck in quantity (more than 5 million pieces) but is a clear condition rarity in Superb Gem. This MS67 example is well-defined for the issue and has generous luster lighting up predominantly blue-toned surfaces with hints of violet and olive. Census: 4 in 67, 1 finer (3/16). NGC ID# 24N6, PCGS# 6514

1909-O Barber Half Dollar, MS66
One Finer Example at PCGS

- 3591 1909-O MS66 PCGS. CAC.** As one would expect from this final-year New Orleans issue, the mintage is limited. Only 925,400 pieces were produced. Similar to the celebrated Duckor coin, this piece also displays a minute die crack to the right of the point of the truncation of the bust, a crack that is all but invisible along the base of the truncation, and then emerges just left of the left side of the point of the bust. A slight “mumps” effect is also noted. These two die characteristics suggest a common source for both of these high-grade pieces. Only slight high-point softness is seen on each side. The surfaces glow with satiny mint luster, and the centers are brilliant with a slight accent of golden at the margins. Each side is wonderfully free from abrasions, a trait seldom seen on 1909-O halves: Evidence comes in the form of the lack of high-grade examples certified. Population: 3 in 66, 1 finer (3/16). NGC ID# 24N9, PCGS# 6517

1910 Half Dollar, MS65+
Excellent Surfaces

- 3592 1910 MS65+ PCGS. CAC.** Among Philadelphia Mint Barber half dollars, the 1913, 1914, and 1915 issues are known for their low mintage and rarity. However, the 1910 is another elusive issue in all Mint State grades, from a mintage of less than half a million coins. The 418,000-coin production is the fifth lowest of the entire series. This impressive MS65+ piece has satiny luster with reflective fields and attractive iridescence over silver-gray surfaces. Population: 23 in 65 (2 in 65+), 8 finer (3/16).
Ex: New York Signature (Heritage, 12/2011), lot 3663. NGC ID# 24NB, PCGS# 6519

- 3593 1910-S MS63 PCGS. CAC.** The 1910-S Barber half dollar is an elusive issue in high grade. This impressive Select example offers well-detailed design elements and lightly marked surfaces under dusky shades of golden-brown and lavender-gray toning. Population: 10 in 63, 50 finer (3/16). NGC ID# 24NC, PCGS# 6520

- 3594 1911 MS64 NGC.** Vibrant, swirling luster enlivens the faintly toned fields, while the central devices show a hint of satin. Solidly struck with only a few wispy flaws that keep this piece from an even finer designation. Census: 58 in 64, 30 finer (2/16).
Ex: Central States Signature (Heritage, 4/2008), lot 1283. NGC ID# 24ND, PCGS# 6521

- 3595 1911-S MS64 PCGS.** Frosted, well-preserved surfaces display specks of crimson patina near the legends and borders, but otherwise each side is brilliant. Like other 1911-S half dollars, this Choice piece presents a bold overall impression. Population: 26 in 64, 18 finer (3/16). NGC ID# 24NE, PCGS# 6523 Base PCGS# 6523

1912 Barber Half, MS66 ★
Iridescently Toned

- 3596 1912 MS66 ★ NGC.** Iridescent bands of toning cross each side of this near-Gem Barber half, sky-blue, saffron, orange, cherry, violet, and deep cobalt-blue predominating. A loupe reveals a bold strike and a few scattered, light abrasions that preclude an even finer grade, including one straight mark on the cheek and couple of ticks above the eye. A winner for the toning enthusiasts and among the few highest-graded coins at either service. Census: 2 in 66 (1 in 66 ★, 1 in 66+), 0 finer (3/16). NGC ID# 24NG, PCGS# 6524

- 3597 1912-D MS65 PCGS. CAC.** The 1912-D is one of the better produced Barber halves and it is also one of the more available of the late dates. This is a sharply struck example that displays the usual nice luster this issue is known for. Additionally, there are no noticeable abrasions on either side. Originally toned with speckled russet patina over both obverse and reverse. Population: 62 in 65, 17 finer (3/16).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 5812. NGC ID# 24NH, PCGS# 6525

1912-D Barber Half Dollar, MS66
Extremely Rare Any Finer

- 3598 1912-D MS66 PCGS.** The 1912-D Barber half dollar claims a substantial mintage of 2.3 million pieces, making it an available issue in most Mint State grades. The 1912-D is rare in MS66, however, and finer examples are virtually unobtainable. This well-detailed Premium Gem offers well-preserved surfaces with a few hints of golden-tan toning and vibrant satiny mint luster. Population: 16 in 66 (2 in 66+), 1 finer (3/16). NGC ID# 24NH, PCGS# 6525

1912-S Half Dollar, MS65
Seldom Seen This Fine

- 3599 1912-S MS65 PCGS. CAC.** Plentiful in lower grades, the 1912-S Barber half dollar becomes a condition rarity at the Gem level, and finer pieces are exceedingly elusive. This golden-toned CAC coin displays a sharp strike with a few trivial grazes on Liberty's cheek that limit the grade. The eagle's right (facing) wing junction is slightly weak, but the talons and fletchings are bold. Population: 24 in 65, 8 finer (3/16). NGC ID# 24NJ, PCGS# 6526

1913 Half Dollar, AU58
Partially Lustrous Fields

- 3600 1913 AU58 PCGS.** With a small 188,000-coin mintage, the 1913 Barber half dollar is a key issue in all grades. Mint State examples are scarcely seen. This near-Mint coin displays a bold strike and mottled olive-gold patina. Luster remains in the fields. There is little true wear, mostly just light chatter that limits the grade. NGC ID# 24NK, PCGS# 6527

- 3601 1913-D MS64 PCGS.** An attractive near-Gem example of this underrated Barber half issue, a low-mintage emission of 534,000 pieces. The surfaces are largely untuned, offering both an excellent strike and overall good preservation. This issue is seldom found at the Gem grade level. Population: 53 in 64 (1 in 64+), 16 finer (3/16). NGC ID# 24NL, PCGS# 6528

- 3602 1913-D MS64 PCGS. CAC.** The 1913-D is only moderately available in near-Gem or finer grades — a fact that the population reports confirm. This CAC-endorsed example displays lustrous silver mint bloom in the centers surrounded by rainbow iridescence at the borders of both sides. Minimal blending at the shield/wing junction is noted, but overall the coin is extremely sharp and attractive. Population: 53 in 64 (1 in 64+), 16 finer (2/16). NGC ID# 24NL, PCGS# 6528

1913-D Barber Half, MS65
Conditionally Rare Denver Issue

- 3603 1913-D MS65 PCGS.** The 1913-D half dollar is a slightly scarcer date in the Barber series; it can be found with little difficulty in MS63 and MS64, but Gems are rare, and only a few finer coins have been certified by the two leading services. This representative showcases shimmering, frosty luster, with blushes of lime-green and amber-orange color in the fields, primarily on the reverse. The strike is soft on the usual elements (the eagle's talons and shoulders), but the well-preserved surfaces balance the visual appeal. Population: 12 in 65, 4 finer (3/16). NGC ID# 24NL, PCGS# 6528

1913-D Barber Half Dollar, MS65
Often Overlooked in High Grades

- 3604 1913-D MS65 PCGS. CAC.** The 1913-D Barber half is available through the MS64 grade, but finer examples number in the lower double-digits among both services combined. Gem and finer coins with CAC endorsement are scarcer still, where just three coins at the MS65 level have earned the green CAC label. This brilliant example displays amazing mint luster on both sides — a flashy, no questions Gem with a few tiny marks that perhaps limit the grade but eye appeal that suggests a finer level. The strike is typical for the Denver issue, with slight blending on the right-hand stars as well as at the right side of the eagle. Population: 12 in 65, 4 finer (3/16). NGC ID# 24NL, PCGS# 6528

- 3605 1913-S MS64 PCGS.** One of the low-mintage, late series branch mint Barber halves that are all conditionally scarce. The 1913-S shows a production of just 604,000 pieces. This Choice example shows lustrous and frosty surfaces imbued with olive-gold and light-champagne toning. The strike is razor sharp except at the normal reverse problem areas, where slight blending does not distract. A low pop coin at the MS64 grade. Population: 26 in 64, 21 finer (2/16). NGC ID# 24NM, PCGS# 6529

- 3606 1914 MS63 PCGS.** A well struck and attractive Select example of this lowest-mintage Barber half dollar issue. Lustrous gray and gold-orange surfaces appear smooth, though close inspection reveals wispy abrasions on the devices and a few tiny digs. Always near the top of Barber half want lists. Population: 38 in 63, 59 finer (2/16). Ex: *Stamford Coinfest Signature (Heritage, 10/2010), lot 3728.* NGC ID# 24NN, PCGS# 6530

- 3607 1914 MS64 PCGS.** Jade-green, pumpkin-gold, and dove-gray toning encompass satiny and unmarked surfaces. The fletchings and right shield corner confirm a typical strike. A low mintage Philadelphia issue. Population: 47 in 64 (3 in 64+), 12 finer (3/16). NGC ID# 24NN, PCGS# 6530

**1914 Half Dollar, MS64
Smallest Mintage in the Set**

3608 1914 MS64 PCGS. The 1914 is a semikey in the Barber half series with a mintage of 124,230 coins — the lowest production total in the series. Each side of this Choice example is strongly defined with localized softness on stars 1, 3, and 11, and the right shield / wing juncture. A lovely representative that will appeal to those who appreciate a Mint-fresh look. Population: 47 in 64 (3 in 64+), 12 finer (3/16). NGC ID# 24NN, PCGS# 6530

3609 1914-S MS64 NGC. Sandwiched between the scarce, highly valued 1914 and 1915 Philadelphia issues, the 1914-S is somewhat challenging itself in near-Gem and finer grades. Just 992,000 pieces were struck. This brilliant-white example flashes vibrant mint luster with only a few light lines and minor imperfections. The populations at both services are notably low for the 1914-S in the assigned grade. Census: 39 in 64, 20 finer (2/16). NGC ID# 24NP, PCGS# 6531

**1914-S Half Dollar, MS65
Rare CAC-Endorsed Example**

3610 1914-S MS65 PCGS. CAC. Like most issues in the Barber series, the 1914-S half dollar is conditionally scarce in Gem condition and rare any finer. This CAC-endorsed coin displays satiny luster with a hint of champagne toning. The eagle's right (facing) talons and the fletchings are a trifle soft, as usual. Population: 17 in 65 (2 in 65+), 9 finer; CAC: 8 in 65, 9 finer (3/16). NGC ID# 24NP, PCGS# 6531

**1915 Half Dollar, Luminous MS64
Impressive Eye Appeal**

3611 1915 MS64 PCGS Secure. CAC. Ex: Hayes. Faint gold patina visits this well-struck and coruscating near-Gem. No marks are remotely worthy of mention, and the eye appeal is obvious upon first glance. The 1915 has the second-lowest mintage of the series at 138,000 coins, exceeding in production only the 1914. Examples are seldom seen this fine. Population: 25 in 64, 20 finer (2/16). Ex: *Chicago Signature (Heritage, 8/2011)*, lot 4134. NGC ID# 24NR, PCGS# 6532

3612 1915-D MS64 PCGS Secure. CAC. Shimmering luster illuminates light golden toning on this Choice final-year Barber half. Moderate weakness is seen on the eagle, stars, and obverse portrait, as is sometimes encountered on branch mint issues of this type. CAC-approved for its pleasing surfaces. NGC ID# 24NS, PCGS# 6533

**1915-D Barber Half, Satiny MS65
Great Type Candidate**

3613 1915-D MS65 PCGS. The 1915-D Barber half dollar is relatively available in Gem condition for a member of this series, but its very ubiquity makes it ideal for type collectors to snatch up nice examples such as this piece. Both sides display satin luster, the obverse largely untuned (and showing a nice sharp strike) with flecks of charcoal near the rim, the reverse opening up into generous pale sage, charcoal, and silver-ochre patina. The right shield border is solidly struck as well. PCGS reports only 20 numerically finer (3/16). NGC ID# 24NS, PCGS# 6533

3614 1915-S MS65 PCGS. Aside from small daubs of russet patina on each side, the surfaces of this Choice Barber half are brilliant with vibrant mint frost. Minor strike softness occurs on the eagle's neck, right claw, and the right corner of the shield, but the motifs are otherwise boldly detailed. Population: 49 in 65 (2 in 65+), 12 finer (2/16). Ex: *W.R. Walling Collection (Stack's, 3/1996)*, lot 461; *Eugene H. Gardner Collection, Part IV (Heritage, 10/2015)*, as MS64 NGC with CAC approval, lot 98764. NGC ID# 24NT, PCGS# 6534

3615 1915-S MS65 NGC. Deep brass-gold toning encompasses much of the obverse, while the reverse shows the same but in a significantly lighter hue. Trivial weakness on the eagle's right (facing) talons is the only mentionable striking deficiency, and Liberty's cheek is free of distracting abrasions. Census: 45 in 65, 10 finer (3/16). NGC ID# 24NT, PCGS# 6534

3616 1915-S MS65 PCGS. A satiny Gem with bright, untuned luster, this final-year Barber half dollar displays clean fields and only a few faint slide marks on the cheek that limit the grade. The eagle's right (facing) talons and wing junction show the only notable strike weakness, and it is minor. Population: 52 in 65 (2 in 65+), 12 finer (3/16). NGC ID# 24NT, PCGS# 6534

**1915-S Barber Half Dollar, MS67
None Certified in Higher Numeric Grades**

3617 1915-S MS67 NGC. This S-mint issue claims a mintage of 1.6 million coins, and it is far more available than its key date Philadelphia counterpart, which boasts a production less than one-tenth the size. However, the 1915-S becomes a major condition rarity in MS67, where NGC and PCGS have seen only five examples collectively. Occasional faint blushes of golden-tan patina appear over frosty and brilliant surfaces that are virtually without fault. Only star 11 and the arrow fletchings are trivially incomplete. Census: 3 in 67 (1 in 67 ★), 0 finer (3/16). NGC ID# 24NT, PCGS# 6534

PROOF BARBER HALF DOLLARS

3618 1892 PR65 NGC. The debut proof Barber half dollar is popular among type collectors. It is one of the most plentiful issues in the proof series, but its availability declines in Gem and finer grades. This piece is boldly struck, showing frost-white interior motifs surrounded by hints of golden peripheral toning. The fields are deeply mirrored, and modest, undesignated contrast appears on each side. Census: 43 in 65 (2 in 65 ★), 50 finer (2/16). NGC ID# 24NU, PCGS# 6539

**1898 Half Dollar, PR67 Cameo
Pristine, Contrasted Surfaces**

3619 1898 PR67 Cameo NGC. The 1898 proof Barber half dollar (735 pieces) is a collector favorite. Examples can be obtained in high grades and with bold cameo contrast with little searching. Granted, Superb Gem Cameo proofs like the one offered here are decidedly rare and command consistently strong prices when they come up for sale. This black-and-white proof shows seemingly limitless fields and thickly frosted motifs. A few specks of russet patina appear marginally. Census: 17 in 67 Cameo (2 in 67 ★ Cameo), 4 finer (3/16). NGC ID# 24P2, PCGS# 86545

3620 1899 PR65 PCGS. CAC. A fully struck and flashy Gem with orange-gold fields and peripheral bands of powder-blue and lilac-red. An outstanding type representative, and one of only 846 proofs issued that year. NGC ID# 6C4V, PCGS# 6546

3621 1900 PR64 Cameo PCGS. The proof strike throughout both sides appears full on this attractive, nicely contrasted Barber half. The surfaces are largely untuned, save for a slight tinge of rose. A few needle-thin scrapes on Liberty account for the grade, but much eye appeal is present. Population: 24 in 64 (1 in 64+) Cameo, 51 finer (2/16). NGC ID# 24P4, PCGS# 86547

3622 1901 PR65 Cameo NGC. The Mint switched to an all-brilliant finish for proof coins in 1902, so the 1901 issue was the last to include a large number of Cameo specimens. This delightful Gem exhibits razor-sharp definition on all design elements and the deeply reflective fields contrast boldly with the frosty devices. Attractive shades of greenish-gold and cobalt-blue toning enhance the outstanding eye appeal. Census: 7 in 65 Cameo (1 in 65 ★ Cameo), 16 finer (3/16). NGC ID# 24P5, PCGS# 86548

**1902 Barber Half, PR66+
Attractive Border Toning**

3623 1902 PR66+ PCGS. CAC. Rings of russet and electric blue encircle the rims of this attractive Premium Gem proof, which displays considerable one-sided (on the obverse) contrast, despite its origin during the so-called brilliant era of proof coinage at the Mint. Brilliant luster and superlative eye appeal are the chief hallmarks of this high-end piece. Population: 29 in 66 (4 in 66+), 8 finer (2/16). NGC ID# 24P6, PCGS# 6549

1902 Half Dollar, Rim-Toned PR66 Cameo

3624 1902 PR66 Cameo NGC. Rim toning in lovely hues of sky-blue, copper-gold, and lilac complement interiors with some untuned silver-white areas. This gorgeous Premium Gem Cameo proof is relatively unmarked but shows strike weakness on the right shield corner. The obverse and other details are nice and sharp. Census: 3 in 66 Cameo, 1 finer (2/16). NGC ID# 24P6, PCGS# 86549

1906 Barber Half Dollar, PR66
675 Pieces Struck

3625 1906 PR66 NGC. Bright, watery mirrors are completely untuned and even boast a hint of contrast on an issue that normally displays the all-brilliant finish utilized over much of this decade. Examination with a loupe reveals a couple of minor slidemarks on Liberty's cheek. Census: 35 in 66 (1 in 66+, 1 in 66 ★), 24 finer (3/16).
Ex: Long Beach Signature (Heritage, 6/2005), lot 6412. NGC ID# 24PA, PCGS# 6553

3626 1907 PR64 PCGS. CAC. Nicely mirrored fields surround the sharply struck motifs, with only nominal weakness at the right shield/wing junction. The brilliant surfaces are wholly untuned, with a few delicate lines and a brief cloudy patch between stars 9 and 10 where the minor planchet roughness exists. CAC endorsed for quality and eye appeal. NGC ID# 24PB, PCGS# 6554

1908 Half Dollar, Toned PR67

3627 1908 PR67 NGC. Regardless of date, proof Barber half dollars in Superb Gem condition are seldom encountered. This 1908 representative is a pleasing example with gleaming mirrored fields and bold relief elements. Both sides show intermingled shades of violet, blue, and mint-green, with a swath of sung-gold across much of the reverse. Census: 16 in 67, 3 finer (2/16). NGC ID# 24PC, PCGS# 6555

3628 1914 PR63 PCGS. At 380 pieces, the 1914 boasts the lowest mintage in the proof Barber half dollar series. This Select example displays deep mirroring in the fields and a hint of contrast against the satiny devices. Light golden toning over each side helps mask scattered hairlines. NGC ID# 24PJ, PCGS# 6561

1914 Barber Half Dollar, PR65
Low-Mintage Proof Issue

3629 1914 PR65 NGC. With a low mintage of 380 pieces, the 1914 proof Barber half dollar is more available than one might expect, but examples at the Gem level are nonetheless quite scarce. The present coin displays sharp detail, with brilliant reflective fields and a few wisps of greenish-gray toning on the obverse borders. Overall visual appeal is excellent. Census: 33 in 65, 55 finer (2/16).
Ex: Long Beach Signature (Heritage, 6/2010), lot 808. NGC ID# 24PJ, PCGS# 6561

1914 Half Dollar, PR66
Low Total-Mintage Date

3630 1914 PR66 PCGS. Famously, only 124,230 half dollars were struck for circulation at the Philadelphia Mint in 1914. That total was supplemented by a small quantity of 380 proofs. This Premium Gem proof Barber half dollar has fully brilliant surfaces and noticeable field-device contrast on the reverse. Minimal cameo effect on the obverse precludes a formal designation from PCGS, but this specimen is no less appealing for it. Population: 24 in 66 (1 in 66+), 14 finer (3/16). NGC ID# 24PJ, PCGS# 6561

EARLY DOLLARS

3631 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4 — Damage — PCGS Genuine. Fine Details. Bowers-Borckardt Die State I. The famous "hidden star" variety, with star 15 located entirely below the bust. This dark gray example retains all major design elements intact in outline, and the date, legends, and rims remain bold. The surfaces show many minor abrasions and some surface disturbances in the field before Liberty's eye. Some digs on the eagle's breast are the worst features on the reverse. A few highlights of amber and golden-brown toning enhance the overall appeal. NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

**1795 Flowing Hair Dollar, VF Sharpness
B-1, BB-21, Two Leaves Reverse**

- 3632** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Improperly Cleaned — NGC Details. VF. Smoothly worn and evenly circulated, this early dollar shows only faint signs of an old cleaning. The surfaces retain considerable appeal, with silver-gray color that deepens at the borders and nice definition for the VF level. Tiny marks are visible with a glass including a small dig near star 4. The rims are bold and problem-free. The BB-21 variety is the most frequently encountered Two Leaves variety. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

**1795 Flowing Hair Dollar, VF20
B-1, BB-21, Two Leaves Beneath Wings**

- 3633** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF20 PCGS. A two-tone "circulation cameo" example of this readily available Two Leaves reverse Flowing Hair dollar. Slate gray fields surround silver-gray raised devices. Smooth wear accounts for the assigned grade, with a few shallow abrasions in the right obverse field but no heavy marks. Some bands of deep-gray toning angle across both sides. Overall, a smooth and appealing example with bold rims nice definition on the motifs. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

- 3634** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VG8 PCGS. Rich dove-gray and wheat-gold toning encompasses this collectible Flowing Hair type coin. Marks are surprisingly few, and relegated to the field below the chin and a small reverse rim knock at 10:30. The legends are bold aside from fading at the tops of UNITED STATES. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

- 3635** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Scratches — NGC Details. VG. A glossy caramel-gold, steel-blue, and jade-green Flowing Hair type coin. The portrait displays wispy horizontal hairlines, and a thin vertical mark is noted on the field near the chin. The reverse exhibits scratches near the eagle's legs and the final A in AMERICA. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 B-5, BB-27 Silver Dollar, VG10
Flowing Hair, Three Leaves**

- 3636** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VG10 PCGS. The diagonal bar in the upper left obverse field identifies this plentiful variety that is ideal for type or date collections. Faint adjustment marks appear at the lower obverse of this well-worn but pleasing piece. The obverse has deep gold toning and the reverse exhibits steel-gray patina. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Flowing Hair Three Leaves Dollar
B-5, BB-27, Eye-Appealing VF20**

- 3637** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF20 PCGS. Bowers Die State II. Blue and gold accents visit the warm-gray surfaces of this remarkably smooth and appealing Three Leaves dollar. The BB-27 is by far the most-available Flowing Hair variety, but it is seldom seen so pleasing in VF condition. The surfaces show few abrasions or marks of any kind, and the definition on the motifs is sharp for the grade. Slight weakening at the rim is noted below the date and on the reverse above TES in STATES. Nevertheless, both the technical quality and eye appeal are exceptional for an early dollar at the well-circulated grade level. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 B-5, BB-27 Dollar, VF30
Three Leaves Reverse**

- 3638** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF30 NGC. The 1795 B-5 silver dollar is a plentiful variety that is encountered more often than all others combined. This pleasing piece exhibits faint hairlines on both sides, indicative of an ancient cleaning, but it has now toned to light champagne and offers excellent eye appeal. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Draped Bust Dollar, VF20
Off-Center Bust, B-14, BB-51**

- 3639 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF20 ANACS.** A splendid, midgrade example of Robert Scot's and John Eckstein's adaptation of Gilbert Stuart's Draped Bust design. The BB-51 variety shows the bust improperly centered in the die, positioned too far to the left. This example displays smooth, light-gray surfaces and iridescent toning in the fields. Some minor adjustment marks are visible inside the wreath on the reverse. Overall, the Draped Bust dollars are more than twice as scarce as their 1795 Flowing Hair counterparts based on mintage and grading events. The ANACS plastic holder has some stress damage that may show in the photograph, having no effect on the coin.
Ex: Summer FUN Signature (Heritage, 7/2009), lot 739. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1795 Draped Bust Dollar, VF35
B-15, BB-52, Bust Well-Centered**

- 3640 1795 Draped Bust, Centered, B-15, BB-52, R.2, VF35 NGC.** Bowers Die State IV. Star 1 does not touch the curl, and the highest wave of Liberty's hair is centered beneath E of LIBERTY. The oft-seen die break in Liberty's hair progresses toward the back of the head. A sharp example of this Small Eagle type, with smooth fields that display blue and gold accents over pleasing, silver-gray surfaces. A few lines and small nicks are distributed across both sides, but there are no serious blemishes or adjustment marks. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858
- 3641 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Scratch — PCGS Genuine. VF Details.** Bowers Die State I. A scratch on the field below the chin corresponds to the PCGS notation. A pair of less obtrusive marks are noted on Liberty's cleavage. The obverse is hairlined and the motifs exhibit wispy slide marks. Silver-gray centers are framed by cobalt-blue borders. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860
- 3642 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Damage — PCGS Genuine. VF Details.** Bowers Die State I. Three short and thin but relatively deep marks on the eagle conforms to the strictly assessed PCGS designation. This butter-gold, olive-green, and cream-gray early dollar is nicely defined and displays minor adjustment marks (as made) on Liberty's neck. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

**1797 Draped Bust Dollar, XF45
10x6 Stars, B-3, BB-71**

- 3643 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, XF45 NGC.** Bowers-Borckardt Die State III. The BB-71 variety is easily recognized as the only variety with the obverse stars arranged in a 10x6 pattern. Only light wear shows on the well-detailed design elements of this Choice XF specimen and some dramatic clash marks are seen in the right obverse field. The pleasing lavender-gray surfaces are lightly abraded, with some planchet adjustment marks showing on the reverse, at the rims. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1798 Large Eagle, Pointed 9 Dollar, AU53
Wide Date, B-23, BB-105**

- 3644 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, AU53 PCGS.** Bowers Die State II. The wide date with 8 firmly touching the bust and star 13 close to the bust tip help attribute this relatively available die variety. The reverse shows an arrowhead extending to the center of the N in UNITED. Four-line stripes show in the shield (four pale gules if you speak Heraldic), fitting this into the *Guide Book's* Pointed 9, Wide Date category. Star 7 points directly at the lower serif of L in LIBERTY, and star 2 to a space between dentils. Die rust appears above and in several letters of LIBERTY and around star 13. The gray-white surfaces of this lightly circulated dollar show a few scattered marks and darker toning within some of the devices, none of the marks overt save for one nick behind Liberty's ear. NGC ID# 24X6, PCGS# 40022 Base PCGS# 6877
- 3645 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, VF25 PCGS.** Bowers Die State IV. Deep gunmetal-blue, autumn-brown, and lavender toning encompasses this inoffensively abraded Heraldic Eagle dollar. Less than half of E PLURIBUS UNUM is present, but the other legends are bold, and the eagle's wings are well detailed. NGC ID# 24X6, PCGS# 40025 Base PCGS# 6876
- 3646 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2 — Cleaning — PCGS Genuine. XF Details.** Bowers Die State II. Struck from a middle state of the dies, with a faint die crack from the last S of STATES, through OF, and terminating above the first A in AMERICA. Close date, with the 8 much too high and leaning right. Signs of a past cleaning are minimal on this still-appealing early dollar, with light lines visible in the obverse fields but no especially meaningful distractions. Pleasing, medium-gray patina and subtle blue overtones remain. NGC ID# 24X6, PCGS# 40030 Base PCGS# 6873

**1798 Large Eagle Dollar, Sharp AU50
B-27, BB-113, Pointed 9**

- 3647** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, AU50 NGC. BB-113 is among the more plentiful 1798 silver dollar varieties in AU condition, often encountered in type collectors' cabinets. The present coin is sharply and evenly struck, and well-centered on the planchet. The border dentils and obverse stars are bold, and the reverse shows weakness only in a small area above the eagle's head. Pleasing steel-gray and dusky lavender-champagne coloration is seen on each side. NGC ID# 24X6, PCGS# 40030 Base PCGS# 6873

**1798 Large Eagle Dollar, XF40
Very Scarce B-31, BB-115 Variety**

- 3648** 1798 Large Eagle, Pointed 9, Close Date, B-31, BB-115, R.4, XF40 PCGS. Bowers Die State IV. Pointed 9, Line Star Pattern. Digit 8 out of position, high and leaning slightly right; star 12 close to upper and lower beaks but touches neither. This is the usually seen late die state with several reverse die cracks. This better variety example has medium gray and darker gray-brown color with splashes of deeper steel toning. The surfaces are occasionally microgranular and surprisingly unabraded.
Ex: Dallas Signature (Heritage, 11/2006), lot 1067, which realized \$3,450; Long Beach Signature (Heritage, 6/2015), lot 4704, which brought \$3,760. NGC ID# 24X6, PCGS# 40032 Base PCGS# 6873

- 3649** 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4 — **Edge Repair — PCGS Genuine. XF Details.** Bowers Die State IV. The reverse has filed rim knocks at 12:30 and 4 o'clock. The reverse is hairlined, most apparent near the TES in STATES. A sea-green and canary-gold representative. The upper right reverse stars are lightly brought up, usual for this scarcer Bolender variety. NGC ID# 24X6, PCGS# 40037 Base PCGS# 6877

- 3650** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, VG10 NGC. Bowers Die State I. There is no hint of the vertical break below the hair ribbon that is characteristic of BB-125. A wheat-gold and pearl-gray representative with microgranular and moderately abraded surfaces. A small cigar-shaped lamination is noted below obverse star 13. NGC ID# 24X6, PCGS# 40042 Base PCGS# 6873

**1799/8 Draped Bust Dollar, AU50
B-3, BB-141, 'Hidden Stars' Reverse**

- 3651** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, AU50 NGC. Bowers Die State IV. A famous engraver's blunder, with two extra field stars on the reverse awkwardly hidden (except for their lowermost star points) beneath a pair of overstuffed clouds immediately above the wings. An underdigit 8 is imperfectly hidden beneath the second 9 in the date, giving the BB-141 variety the two most interesting anomalies among all Draped Bust dollars. The first 9 is recut as well. This About Uncirculated example displays glimpses of rainbow iridescence with intervening areas of reddish-gold and smoke-gray toning. Traces of silver luster remain among the sharply defined motifs. A pleasingly original early dollar, always in demand. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

- 3652** 1799 7x6 Stars, B-5, BB-157, R.2, Fine 15 NGC. Bowers Die State III. The crack through AMER is faintly apparent but the first T in STATES lacks a vertical crack. Wheat-gold and ice-blue toning embraces this moderately hairlined but minimally bagmarked early dollar. Nicely defined for the Choice VF level. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

**1799 No Berries Bust Dollar, XF40
B-12, BB-160, Star 1 Distant**

- 3653** 1799 7x6 Stars, B-12, BB-160, R.3, XF40 PCGS. Bowers Die State III. The well-known No Berries variety, where die lapping on the reverse eliminates all traces of the berries except for two faint, vacant stems. The obverse is equally interesting, with multiple die cracks that arc left and right through the fields and around the date. This pleasing early dollar shows minimal abrasions and no adjustment marks. Olive-gold toning mixes with warm-gray fields with sharply defined silver-gray central motifs for nice, original appeal. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

- 3654** 1799 7x6 Stars, B-11, BB-161, R.3 — **Obverse Damage — NGC Details. VF.** Unlisted Bowers Die State "IV" with a die break below the eagle's beak. A mark has affected Liberty's nose, but this dusky silver-gray and autumn-brown silver dollar is otherwise attractive. An area of deeper toning is noted near the right shield corner, and a few thin marks emerge beneath a loupe near the shield borders. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

3655 1799 7x6 Stars, B-10, BB-163, R.2, VF25 PCGS Secure. Bowers Die State III. Rich, bluish-brown patina covers the fields on both sides of this sharply defined early dollar, with light, tan-brown toning on the high points of the main devices. A series of shallow, narrow lines run from between stars 10 and 11 to the bust, with a small dig in the field above the marks. Otherwise, the surfaces are remarkably well-preserved for the assigned grade with substantial eye appeal. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

3656 1799 7x6 Stars, B-9, BB-166, R.1 — Improperly Cleaned — NGC Details. VF. Bowers Die State II, showing a small vertical die crack below the 1 in the date, not yet extending down to the dentils. The lightly toned surfaces show minor hairlines and a few toning streaks but still retain plenty of essential eye appeal, as no major distractions are present. The relative availability of this common variety translates to “more coin for less money” for type collectors. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

3657 1799 7x6 Stars, B-9, BB-166, R.1, VF20 NGC. Bowers Die State III. A light silver-gray example of the “Apostrophe” variety, with a short die flaw after the second S in STATES to earn the nickname. The surfaces show smooth wear with subtle small abrasions muted by circulation. A minor rim bruise at 3 o'clock on the obverse and a small pair of gouges at the rim above the Apostrophe die flaw are noted. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

1799 Bust Dollar, AU53 B-9, BB-166, The Apostrophe Variety

3658 1799 7x6 Stars, B-9, BB-166, R.1, AU53 NGC. Bowers Die State II. Both the obverse and reverse are unique to the 1799 BB-166 variety, with a host of characteristics that confirm the identification. Most obvious is a radial die crack that forms to the right of the second S in STATES (similar to an apostrophe), providing the moniker for the die pair. A small die break develops below the 1 in the date. Despite the availability of the variety in lower circulated grades, XF or finer examples are scarce. This AU example is richly toned in gunmetal-gray and deep-blue shades with sharp definition on the devices. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

3659 1799 7x6 Stars, B-22, BB-168, R.4, Fine 12 PCGS. Bowers Die State IV. BB-168 is a very scarce variety, nearly unobtainable above VF. The present Fine example exhibits the diagnostic heavy bisecting horizontal crack across the reverse, seen on all survivors of the marriage. The cream-gray, caramel-gold, and powder-blue surfaces are mildly glossy. The sole mentionable mark is a reverse rim nick at 4 o'clock. NGC ID# 24X7, PCGS# 40059 Base PCGS# 6878

1800 Draped Bust Dollar, VF35 B-16, BB-187, Problem-Free Surfaces

3660 1800 B-16, BB-187, R.2, VF35 PCGS. Bowers Die State III. Rich, brownish-gray toning assumes lighter tan-brown shades on the high points of the devices, with only tiny marks on either side of this Choice VF early dollar. Sharp definition remains on the motifs for the grade. The BB-187 variety shows recutting on the base of the T in UNITED and a period-like die break near the second S in STATES. NGC ID# 24X9, PCGS# 40073 Base PCGS# 6887

3661 1800 AMERICA!, B-19, BB-192, R.2 — Cleaning — PCGS Genuine. XF Details. The seldom-seen early die state without “wave” clash marks from the clouds above the date. This well-detailed representative displays relatively few marks, although a loupe reveals horizontal obverse hairlines. Powder-blue toning is prevalent except for the silver-white portrait. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

3662 1800 B-13, BB-193, R.3, Fine 12 NGC. Bowers Die State “V” with an arc-shaped die crack from stars 8 to 11. Gunmetal-blue fields contrast with cream-gray high points. The obverse rim displays minor abrasions between 2 and 4 o'clock, but no other marks are consequential. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

1800 Draped Bust Dollar, XF40 B-13, BB-193, ‘Comet’ Die Clashing

3663 1800 B-13, BB-193, R.3, XF40 NGC. Bowers Die State III. A die crack connects the tops of AMERICA and extends into the field, while the obverse lacks the die cracks of a later state. An array of heavy die clashing arcs through the F in OF and extends past the clouds into the field stars. At one time referred to in the Bolender reference as a separate variety — B-18 — it was thought to be rare, but the variety is now known as an available die state of BB-193. Pleasing, gunmetal-gray patina covers both sides of this interesting piece, with a few streaks of darker toning on each side. The minimally marked XF surfaces offer nice original appeal. Ex: Long Beach Signature (Heritage, 9/2008), lot 2412; ANA Signature (Heritage, 8/2010), lot 5117. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

**1800 B-13, BB-193 Dollar, Choice XF
Partial Luster, Smooth Surfaces**

- 3664** 1800 B-13, BB-193, R.3, XF45 NGC. Bowers Die State III. Pockets of luster illuminate the wings, curls, and legends of this stone-gray Heraldic Eagle dollar. All letters in E PLURIBUS UNUM are bold. Surprisingly free from abrasions, with only a small mark on the field near the forehead worthy of comment. BB-193 is a moderately scarce variety best identified by the vertical depression below the upright of the E in STATES. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

**1801 Draped Bust Dollar, XF40
B-3, BB-213 'Wide Date'**

- 3665** 1801 B-3, BB-213, R.3, XF40 PCGS. Bowers Die State III. Traces of reddish-gold luster gather at the central devices of this attractive, better-date 1801 dollar. The obverse stars retain their sharpness, while the fields and motifs show several tiny marks that determine the assigned grade. A field star touches the outside of the beak — as if the eagle bit and missed — and the T's are all missing their bottom-right serif to confirm the BB-213 variety. NGC ID# 24XA, PCGS# 40085 Base PCGS# 6893

- 3666** 1802 Narrow Date, B-6, BB-241, R.1 — Obverse Scratched — NGC Details. XF. The most plentiful variety for 1802, this sharply defined Draped Bust dollar displays pleasing golden-gray and tan toning over both sides. A series of toned-over shallow scratches in the right obverse field account for the NGC net grade. Otherwise, this early dollar is pleasing to the eye and wholesomely original.

**1802 Bust Dollar, XF40
Narrow Date, B-6, BB-241**

- 3667** 1802 Narrow Date, B-6, BB-241, R.1, XF40 PCGS. CAC. Bowers-Borckardt Die State III. The T in LIBERTY has a broken right foot and there is a spur on the third star from the left on the reverse, identifying the popular BB-241 variety. The design elements show only light wear and the pleasing surfaces display only scattered, minor abrasions, with attractive lavender-gray and golden-brown patina. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

**1803 Silver Dollar, Choice VF
Small 3, B-1, BB-251**

- 3668** 1803 Small 3, B-1, BB-251, R.4, VF35 PCGS. CAC. Bowers Die State II. Traces of golden mint luster remain on this attractive, lilac-gray Small 3 early dollar. The fields and motifs are exceptionally Choice for the VF35 grade. Only minor high point wear determines the assigned grade, with a short mark in the left obverse field between stars 5 and 6 a negligible rim nick on the reverse to the right of the second S of STATES. The CAC endorsement is deserved for eye appeal alone, but confirmed by the technical quality of the surfaces as well. A scarce variety, housed in a green label holder. NGC ID# 24XD, PCGS# 40096 Base PCGS# 6900

- 3669** 1803 Small 3, B-5, BB-252, R.3 — Improperly Cleaned — NGC Details. VF. Straw-gold, powder-blue, and lilac toning encompasses this hairlined but evenly circulated early dollar. Minimally abraded aside from a slender field mark near the chin. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

- 3670** 1803 Large 3, B-6, BB-255, R.2, VF25 NGC. Bowers Die State II. Deep olive-gray patina covers surfaces that show much eye appeal and a pleasing wealth of detail for the VF25 grade. The relative availability of this Large 3 variety of 1803 makes this coin a prime potential acquisition for type purposes. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

1803 B-6, BB-255 Dollar, XF45
Large 3, Lightly Toned

- 3671** 1803 Large 3, B-6, BB-255, R.2, XF45 PCGS. Bowers Die State III. A faint, hairline die crack connects the right-hand obverse stars to confirm the late die state. The ball of the 3 in the date is repunched. Always a popular choice for the Large 3 type, BB-255 is more available than any other 1803 variety. This example displays light champagne-gold toning with traces of mint luster at the borders. Scattered light lines and marks visit both sides of this sharply defined, Choice XF early dollar. Population (all Large 3 varieties): 37 in 45, 47 finer (3/16). NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

GOBRECHT DOLLARS

1836 Original Gobrecht Dollar
Judd-60, Die Alignment I

- 3672** 1836 Judd-60 Original, Coin Alignment, Pollock-65, R.1 — PCGS Proof Genuine. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). The straight clash mark is located above the eagle's wing and points toward the AT in STATES. We grade this coin AU Details with fields repaired. The obverse is completely brilliant, while a slight touch of peripheral color is seen on the reverse. Several deep scratches in the left obverse field was the apparent reason for the work done in that area. Even friction is seen over the high points on each side. NGC ID# BLWV, PCGS# 11225

1836 Judd-60 Gobrecht Dollar, Unc Details
Die Alignment IV, Deeply Toned

- 3673** 1836 Judd-60 Original, Medal Alignment — Smoothed — PCGS Proof Genuine. Unc Details. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment IV (head of Liberty opposite OF after a medal turn). According to the DTS Die Stating Guide (available at GobrechtDollars.com), this is State E. It does show the rim nick above the A in STATES. However, the straight, diagonal die clash mark above the eagle's wing (seen on State D) is nowhere to be found, most likely from smoothing. There also is no reflectivity in the fields and both sides are deeply toned. Interestingly, there is no trace of actual friction from circulation over the high points. NGC ID# BLWV, PCGS# 11226

SEATED DOLLARS

- 3674** 1840 AU50 PCGS Secure. OC-4, R.6. Curved die lines below LIBERTY identify the variety. A cream-gray first-year representative with minor inexactness of strike near the eagle's left (facing) shoulder. The surfaces are slightly subdued but lack any consequential abrasions. NGC ID# 24YA, PCGS# 6926
- 3675** 1842 MS61 NGC. OC-4, R.1. Faint peripheral golden toning denies full brilliance. A satiny No Motto Philly type coin with fewer marks than anticipated for the MS61 level. The strike is typical but the eye appeal is undeniable. NGC ID# 24YC, PCGS# 6928

1842 Seated Dollar, MS64
Conditionally Scarce

- 3676** 1842 MS64 PCGS. The 1842 dollar, with a business strike mintage of 184,618 pieces, is plentiful in grades from VF to AU, and is occasionally available in the lower Mint State grades of MS60 to MS63. The issue is scarcer in higher grades; indeed PCGS and NGC have certified fewer than 40 near-Gems and no examples finer. This MS64 displays the usually seen prooflike tendencies in the fields, and light die striations are also evident in the fields. A few minute marks on Liberty's portrait, the reverse shield, and in the right obverse field preclude an even higher grade. Population: 18 in 64 (1 in 64+), 0 finer (2/16).
Ex: Central States Signature (Heritage, 4/2006), lot 2167. NGC ID# 24YC, PCGS# 6928

**1845 Seated Dollar, AU58
Toned No Motto Type Coin**

3677 1845 AU58 PCGS. A slightly better 1840s issue in high grade, boasting a small 24,500-coin mintage. This example is nearly Uncirculated and displays remnants of luster in the fields. Both sides are cast in lavender-gray and gold toning, and a swirling grease mark (as struck) stretches over the upper reverse. The strike is slightly soft on the eagle's left (facing) leg and upper wing edge. Population: 12 in 58, 14 finer (2/16). NGC ID# 24YF, PCGS# 6931

3678 1846 AU58 PCGS. A fair amount of prooflike surface remains in the fields of this near-Mint 1846 dollar. Sharply struck, the surfaces display some patchy olive-gold toning on the obverse and brownish-gold streak on the reverse. Field chatter and small marks visit both sides but no individually serious abrasions stand out. NGC ID# 24YH, PCGS# 6932

3679 1848 XF45 NGC. A boldly detailed steel-gray example of this better No Motto issue, showing hints of olive and amber toning in the protected regions of the fields. The surfaces are generally smooth with few abrasions. A touch of strike softness is seen along the upper edge of the eagle's left (facing) wing. The 1848 boasts a mintage of only 15,000 pieces, the lowest in the series up to that point. NGC ID# 24YK, PCGS# 6935

**1853 Seated Dollar, MS61
Lightly Toned No Motto Type Coin**

3680 1853 MS61 PCGS. Among 1850s Seated dollars, the 1853 is among the most plentiful in Mint State, suitable for type representation. This coin displays satiny luster and light surface chatter but no singular abrasions. Each side shows a glaze of pale champagne toning. Population: 4 in 61, 66 finer (3/16). NGC ID# 24YS, PCGS# 6941

**1856 Seated Dollar, Toned AU50
Seldom-Seen Issue**

3681 1856 AU50 NGC. The influx of gold from California during the 1850s significantly increased the price of silver relative to the yellow metal such that the intrinsic value of a silver dollar exceeded its face value. Coins were widely hoarded, exported, and melted, but few were used in commerce. This lightly circulated 1856 silver dollar, from a low mintage of 63,500 pieces, features lavender-gray and aquamarine toning. The exposed areas show slight rub, and the strike is typically soft on the upper obverse and the eagle's leg. A die crack runs through the lower reverse legends. NGC ID# 24YV, PCGS# 6944

**1856 Seated Liberty Silver Dollar
Richly Toned About Uncirculated**

3682 1856 AU50 NGC. OC-1. Osburn-Cushing Die State b/d. Useful in the China trade as a means of exchange for tea and silk, at least a portion of the 63,500-piece mintage was exported. This About Uncirculated example must have remained in domestic commerce for a period of time before being set aside and preserved. Shades of gunmetal-blue and golden-gray toning cover both sides, somewhat deeper at the margins. Abrasions are minimal for the assigned grade, with a few small marks in the right obverse field softened by wear. An attractive, richly-toned example — a scarce mid-1850s issue. Census: 8 in 50, 35 finer (3/16). NGC ID# 24YV, PCGS# 6944

**1857 Seated Dollar, MS63
Original Luster and Toning**

3683 1857 MS63 NGC. The 1857 is a less often seen date in the Seated dollar series, scarce in all Mint State grades. This Select example is well-struck with satiny luster and a hint of reflectivity in the reverse fields, but the chief attribute is the blatant originality of the toning; both sides show a blanket of warm champagne color with mottled overtones of violet and ocean-blue. Light, scattered abrasions reside beneath the patina but pose little distraction. Census: 13 in 63, 19 finer (3/16). NGC ID# 24YW, PCGS# 6945

3684 1860-O MS61 PCGS. OC-7. Osburn-Cushing Die State a/b. The Treasury released at least 4,000 1860-O Seated dollars in the early 1960s — a paltry number in comparison to the Morgan dollar Treasury releases, but a veritable deluge of Seated dollars, most of which were in brilliant (but bagmarked) Mint State. The toning on this example is an attractive fawn-gold, with minor abrasions including a mark on Liberty's neck. The natural coloration suggests the coin may not have been part of the Treasury hoard, but it is impossible to confirm. Housed in a green label holder. NGC ID# 24Z3, PCGS# 6950

3685 1860-O MS61 PCGS. CAC. Lustrous, well struck, and untoned. This New Orleans No Motto type coin displays scattered minor to moderate marks, but to a lesser degree than anticipated for the MS61 grade. Numismatic legend has it that a sealed bag or two of Uncirculated 1859-O and 1860-O dollars was released by the Treasury at face value during the early 1960s. NGC ID# 24Z3, PCGS# 6950

3686 1860-O MS62 PCGS. The 1860-O was minted in large numbers and as a result, it is the most plentiful Seated dollar in Mint State. This lightly abraded example flashes cartwheel mint luster with a strong central strike, although a few stars lack radial definition. Wisps of golden toning do not diminish the silver brilliance. The fields are busy with small marks, as suggested by the assigned grade. NGC ID# 24Z3, PCGS# 6950

1863 Seated Dollar, MS63 Semiprooflike Fields

3687 1863 MS63 NGC. This Select 1863 dollar possesses numerous die polish marks, especially on the reverse, which is quite typical for the issue (Dave Bowers, 1993). Faint hairlines are interspersed with these die striae, especially on the obverse. Excellent contrast is noted between the frosted, sharply struck design elements and partially prooflike fields. A haze of light golden color overlays both sides. Some minute contact marks are located in the upper-right reverse field. A rather pleasing coin overall. Census: 9 in 63 (1 in 63+), 29 finer (2/16).
Ex: ANA Signature (Heritage, 8/2007), lot 965. NGC ID# 24Z6, PCGS# 6953

1863 Seated Dollar, MS64 Conditionally Rare

3688 1863 MS64 ANACS. The 1863 Seated dollar is a slightly better date, having a low mintage of 27,200 coins. Mint State pieces are occasionally seen but are rare in MS64 or finer. This coin is boldly struck and has a blush of champagne toning. The fields combine satiny luster with subtle reflectivity. Abrasions are minimal, mostly noticed in the upper reverse field where they are still not severe. Housed in an old, small size white ANACS holder. NGC ID# 24Z6, PCGS# 6953

1867 Seated Dollar, Prooflike MS63 Modest Field-Motif Contrast

3689 1867 MS63 PCGS. CAC. Breen-5478, Repunched Date. A conditionally scarce postwar issue with a mintage 46,900 coins. Uncirculated survivors, such as this Select example, are in high demand. The date is repunched, showing what appears to be a smaller underlying logotype. Detail is razor-sharp. The fields display deep reflectivity and showcase warm sun-gold, lavender-gray, and mint-green hues. There are no mentionable abrasions. Population: 10 in 63, 15 finer (2/16). NGC ID# 24ZA, PCGS# 6960

1867 Seated Dollar, Reflective MS64

3690 1867 MS64 PCGS. Most Seated dollars from the 1860s are elusive in high grades, partly a result of limited mintage figures during and immediately after the Civil War. Hoarding and melting took its toll on the population as well, and high-end survivors are widely sought-after. This Choice 1867 representative displays bold devices set against beautiful semiprooflike mirrors. A few small grazes are present but none are individually distracting. Traces of light amber-gold toning grace the peripheral regions. Population: 12 in 64, 3 finer (2/16). NGC ID# 24ZA, PCGS# 6960

3691 1868 AU55 NGC. Considerable luster remains in pearl-gray and golden-tan fields on this Choice AU Seated dollar from the postwar period. Small abrasions are clustered in the right obverse field. Census: 18 in 55, 32 finer (2/16).
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3869. NGC ID# 24ZB, PCGS# 6961

1870-CC Seated Dollar, VF30 Problem-Free Collector Coin

3692 1870-CC VF30 NGC. The 1870-CC is often sought by type collectors seeking a single representative from the famous Nevada mint. This piece shows sharp VF detail and deep golden-gray patina. Pale reddish hues are also seen in the fields. As most CC-mint Seated dollars show unsightly damage or cleaning, the eye appeal of this piece is most refreshing. NGC ID# 24ZE, PCGS# 6964

1870-CC Seated Dollar, XF45
Sharp, Deeply Toned

- 3693 1870-CC XF45 ANACS.** With a mintage of 11,758 pieces, the 1870-CC Seated dollar is the most available Carson City issue of the series, ideal for the collector seeking a single piece from this mint. The present Choice XF example displays sharp, nearly AU detail with smooth surfaces and deep gunmetal-gray toning. NGC ID# 24ZE, PCGS# 6964

1870-CC Seated Dollar, XF45
Introductory Carson City Issue

- 3694 1870-CC XF45 PCGS.** Seated dollars from Carson City are among the scarcest and most sought-after dollars from that branch mint, largely because of their low mintages and correspondingly low survival rates. The 1870-CC was produced to the extent of only 11,758 pieces, still the highest mintage of any Carson City Seated dollar. This Choice XF example shows luminous steel-gray surfaces with hints of lavender-gray and pale gold color visible when tilted beneath a light. Details remain sharp, despite slight high-point wear.
Ex: New York Signature (Heritage, 10/2014), lot 4818. NGC ID# 24ZE, PCGS# 6964

1870-CC Silver Dollar, AU50
Carson City's First Coin

- 3695 1870-CC AU50 NGC.** The monumental Comstock Lode was discovered in the late 1850s, and news reached the public in 1859. Still recognized as Nevada Territory, Congress authorized the Carson City Mint in 1863. Statehood came near the end of the following year, and the Mint facility finally struck their first coins, silver dollars, in February 1870. The present coin has pleasing pewter and light gray surfaces with blue peripheral toning on the obverse. Traces of luster remain visible on this attractive and historic coin. NGC ID# 24ZE, PCGS# 6964

1870-CC Seated Dollar, AU Details
Just 12,462 Pieces Struck

- 3696 1870-CC — Cleaning — PCGS Genuine. AU Details.** Wide CC Mintmark. Mottled bits of blue and gray toning speckle the surfaces of this scarce Carson City Seated dollar. Abrasions and bagmarks share the surface territory, with marks noted on Liberty's head, neck, and lap. The reverse is somewhat less abraded with similar patchy toning. The cleaning is not particularly harsh considering the other surface factors, and traces of luster remain in the most-protected areas on both sides. NGC ID# 24ZE, PCGS# 6964

1871 Seated Dollar, MS63
Moderately Available Date for Type Purposes.

- 3697 1871 MS63 PCGS. OC-1.** The 1871 is one of the more available Seated dollars, undoubtedly because of its mintage of more than 1 million coins. Each side has rich layers of gray-lavender-golden toning, and the strike details are strong throughout. Only held back from a higher grade by a few small abrasions on the lower reverse. Population: 45 in 63, 64 finer (3/16). NGC ID# 5DNV, PCGS# 6966

1871 Seated Dollar, MS64
Attractive Multihued Patina

- 3698 1871 MS64 PCGS. OC-12.** Osburn-Cushing Die State a/b. Beautiful blue, gold, and magenta patina invigorates both sides of this nicely preserved late-series Seated dollar, showing some silver-gray color remaining in the central obverse. The sharp strike complements a relative paucity of abrasions, although some reeding marks appear on Liberty's midsection and scattered smaller abrasions occur elsewhere. An extremely attractive example for type or date-set purposes. Population: 57 in 64 (3 in 64+), 7 finer (3/16). NGC ID# 5DNV, PCGS# 6966

1872-CC Dollar, Sharp VF Details

- 3699 1872-CC — Improperly Cleaned — NGC Details. VF.** This collectible 1872-CC Seated dollar is of typical quality for the issue — lightly circulated and lightly cleaned. The design elements are nonetheless sharp for the VF level, and the pewter-gray patina gives this piece pleasing eye appeal. From a small mintage of 3,150 coins. NGC ID# 24ZK, PCGS# 6969

1872-CC Dollar, XF Details
Pleasing Color

- 3700 1872-CC — Improperly Cleaned — NGC Details. XF.** The surfaces of this lightly circulated 1872-CC Seated dollar are faintly hairlined, suggestive of an old cleaning, although pale olive-gray and light golden toning has since prevailed over each side. The strike is bold, and wear is slight. A still-pleasing, affordable example of this key Carson City issue. NGC ID# 24ZK, PCGS# 6969

1872-CC Seated Dollar, Lightly Circulated AU55

- 3701 1872-CC AU55 PCGS.** A tiny mintage of 3,150 pieces ensures the rarity of the 1872-CC dollar. Collectors of the day lived in the East and ignored mintmarks, and since the 1872 had a mintage of more than 1.1 million pieces, few 1872-CC dollars were saved, likely as local souvenirs. The present steel-gray and olive-gold example displays only light wear on Liberty's curls. Abrasions are minimal, generally limited to a single thin line on the drapery above Liberty's foot. Certified in an old green label holder. Population: 14 in 55, 25 finer (2/16).
Ex: *Pellegrini Collection / FUN Signature (Heritage, 1/2016)*, lot 4384, brought \$9,400. NGC ID# 24ZK, PCGS# 6969

PROOF SEATED DOLLARS

1859 Dollar, Attractively Toned PR64

- 3702 1859 PR64 NGC.** From a reported mintage of 800 proofs, this is a deeply mirrored example that has equally deep toning on each side. Gray-rose toning is the dominant color with sea-green around the margins. The reverse features an area of golden-orange coloration at the center. Pinpoint striking details and the absence of mentionable abrasions further add to the appeal of this near-Gem proof.
Ex: *FUN Signature (Heritage, 1/2005)*, lot 8313. NGC ID# 252D, PCGS# 7002

1859 Seated Dollar, Toned PR64

- 3703 1859 PR64 PCGS.** Pre-Civil War era proof silver dollars are popular issues. The 1859 had a mintage of 800 coins, but many survivors exhibit hairlines and other problems from being cleaned. The present coin is attractively toned in blended lavender-gray and sun-gold hues. The strike is sharp, and the fields are deeply reflective. Any grade-limiting imperfections are hidden beneath the patina. Population: 48 in 64 (1 in 64+), 15 finer (3/16). NGC ID# 252D, PCGS# 7002

1865 Seated Liberty Dollar, PR61 Only 500 Pieces Struck

- 3704 1865 PR61 PCGS.** Only 500 proof Seated Liberty silver dollars were struck in 1865, the last year of the No Motto design. This impressive PR61 example exhibits sharply detailed design elements and deeply reflective fields throughout. The pleasing surfaces show scattered minor contact marks and some faint hairlines that explain the grade. NGC ID# 252K, PCGS# 7008
- 3705 1871 PR60 NGC.** A brilliant lower-end proof example of one of the more plentiful With Motto Seated dollar issues. This 1871 proof displays full detail and reflective fields. Extensive hairlines affect the mirroring and limit the grade. NGC ID# 252T, PCGS# 7019

1872 Seated Dollar, PR62 Virtually Brilliant, Flashy

- 3706 1872 PR62 NGC.** Seateddollarvarieties.com, a new online reference published by Dick Osburn and Brian Cushing, estimates that 575 of the 950 1872 Seated dollar proofs are extant. This PR62 example is virtually all-brilliant aside from the occasional blush of tan-gold color. Scattered, wispy marks do not overly detract. NGC ID# 252U, PCGS# 7020

TRADE DOLLARS

- 3707 1873 AU58 PCGS.** Golden-brown and fire-red toning embraces the reverse periphery, but the majority of the obverse is ice-blue. The coruscating surfaces display the expected number of small abrasions. The upper obverse and the eagle's right (facing) leg show incompleteness of strike. NGC ID# 252W, PCGS# 7031
- 3708 1873 MS61 PCGS.** An attractive Mint State example of this important first-year issue, with well-detailed design elements and satiny mint luster under delicate shades of greenish-gold and lavender-gray toning. The surfaces show fewer marks than expected for the grade, outside of some localized chatter in the lower obverse field. NGC ID# 252W, PCGS# 7031

**1873-S Trade Dollar, MS63
Better Date in Mint State**

- 3709 1873-S MS63 PCGS.** Medium S. Frosty, original luster rolls over minimally abraded surfaces on this Select 1873-S Trade dollar, the debut Trade dollar issue at the San Francisco Mint. The eagle's right (facing) talons and the highest points of Liberty's head show minor weakness, while the remainder of the design elements are sharp. Both sides exhibit lavender-gold toning, while the reverse also has an area of deep olive and russet. The 1873-S Trade dollar is scarce in Mint State and rare finer than MS63. Population: 28 in 63, 32 finer (3/16). NGC ID# 252Y, PCGS# 7033

- 3710 1874-CC AU55 PCGS. Breen-5786.** Micro CC. No period after FINE. Pastel lilac, ice-blue, and almond-gold toning adorns this coruscating and well struck Choice AU Carson City Trade dollar. A minimally abraded and pleasing example.
Ex: Long Beach Signature (Heritage, 6/2011), lot 3886, which realized \$1,840. NGC ID# 2532, PCGS# 7035

**1875-CC Trade Dollar, MS62
Lustrous and Lightly Toned**

- 3711 1875-CC Type One Reverse MS62 PCGS.** Widely spaced mintmark. This lustrous Carson City Trade dollar displays satiny surfaces with dusky tan-gold toning. Grade-limiting abrasions are at a minimum. Most design elements are well-defined save for Liberty's head and the eagle's right (facing) talons. The 1875-CC is among the more plentiful issues in the series from this mint, ideal for collectors seeking a single Carson City type coin. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

- 3712 1876 Type One Obverse, Type Two Reverse, MS63 PCGS.** Vibrant mint luster shines beneath dark layers of golden-brown and blue-steel toning on this attractive Trade dollar. The design elements are well-detailed, and the surfaces show only minor signs of contact. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

**1876 Trade Dollar, MS65
Uncommonly Smooth Surfaces**

- 3713 1876 Type One Obverse, Type Two Reverse, MS65 NGC.** Light autumn-gold patina visits this intricately struck and lustrous Gem Trade dollar type coin. This beautifully lustrous fields are uncommonly devoid of marks, though we note minor granularity near star 13 and the E in TRADE. A remarkable type coin from our Centennial year. Census: 14 in 65, 5 finer (2/16). NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

- 3714 1876-S Type One Obverse, Type Two Reverse, MS62 PCGS.** Minute S. Rich almond-gold and gunmetal-gray toning embraces this well-struck and subdued Trade dollar type coin. Faint obverse field marks preclude a finer grade, although semiprooflike mirroring balances the eye appeal.
Ex: FUN Signature (Heritage, 7/2012), lot 3885. NGC ID# 253B, PCGS# 40115 Base PCGS# 7043

- 3715 1877 MS64 ANACS.** The well-detailed design elements of this attractive Choice example show a touch of the usual softness on the star centers and Liberty's hair. The lightly marked, lustrous surfaces show traces of gray, blue, lavender, and green toning in selected areas. NGC ID# 253C, PCGS# 7044

- 3716 1877-S MS63+ PCGS Secure.** Large S mintmark, as usual. The 1877-S Trade dollar is available in most grades, ideal for type purposes. This Plus-graded Select example is unusually attractive for the grade, showing a bold strike and frosty luster with tinges of olive toning near the borders. There are no significant abrasions, although a few faint lines in the fields limit the grade. NGC ID# 253E, PCGS# 7046

**1877-S Trade Dollar, MS65
Sharply Struck, Exceptional Color**

- 3717 1877-S MS65 PCGS.** Large S. A magnificent Gem type coin. Medium forest-green and rose-gold shades intermingle across the lustrous and exceptionally preserved surfaces. The strike is intricate throughout, uncommon for the series. An unlisted doubled die obverse variety with minor but distinct doubling on the right edge of the obverse banner. Population: 32 in 65 (1 in 65+), 8 finer (3/16). NGC ID# 253E, PCGS# 7046

**1878-CC Trade Dollar, AU Sharpness
Key to the Circulation Strikes**

- 3718 1878-CC — Cleaning — PCGS Genuine. AU Details.** With the lowest mintage of the entire Trade dollar series (just 97,000 pieces, almost half of which were melted in July, 1878), the 1878-CC Trade dollar is the scarcest and most-coveted business strike issue of the series. This example shows finely granular surfaces throughout either from the cleaning or from environmental factors, with subdued golden-gray color. A few sparse tinges of silver luster peek through, but they are confined to the obverse. Still, sharp definition remains and representatives are in demand in all conditions. NGC ID# 253M, PCGS# 7047

PROOF TRADE DOLLARS

- 3719 1874 PR61 PCGS.** This attractive PR61 Trade dollar is sharply defined in most areas, but some incomplete detail is noted on the eagle's right (facing) leg, as often seen on this issue. The reflective fields show some minor hairlines and contact marks that define the grade. Housed in a green label holder. NGC ID# 27YK, PCGS# 7054

1874 Trade Dollar, Lightly Toned PR64 Cameo

- 3720 1874 PR64 Cameo PCGS Secure.** Delicate yellow tints accent the pale silver-gray patina that has settled across much of each side. Prominent contrast is unimpeded by the toning, and while a few stray hairlines are present in the fields, the eye appeal is solid. The proof mintage for this issue was a rather low 700 coins. Population: 21 in 64 Cameo, 5 finer (3/16).
Ex: FUN Signature (Heritage, 1/2011), lot 4033, which brought \$4,600. NGC ID# 27YK, PCGS# 87054

**1875 Trade Dollar, PR64+
Rarely Seen Deep Cameo Contrast**

- 3721 1875 PR64+ Deep Cameo PCGS. CAC.** Type Two Reverse, without the berry under the eagle's claw. A mintage of 700 proofs accompanied the production of 218,200 circulation-strike Trade dollars in 1875. Non-Cameo and Cameo proofs regularly appear at auction, but Deep Cameo specimens are very rare. Jet-black mirrors and thickly frosted relief elements combine to produce the noted contrast. Each side is brilliant, and the only mentionable imperfection is a shallow planchet flaw adjacent to star 11. Population: 6 in 64 (2 in 64+) Deep Cameo, 3 finer (3/16). NGC ID# 56RH, PCGS# 97055

**1876 Trade Dollar, PR58
Rare Type One Obverse and Reverse**

- 3722 1876 PR58 NGC.** Type One Obverse. Type Two Reverse. In 2015, Mark Borckardt studied the type combination of 221 proof 1876 Trade with images in the Heritage online auction archives. 186 specimens were Type One Obverse, Type Two Reverse. Another 18 pieces were the Type Two Obverse and Reverse combination. Only seven proofs paired the Type One Obverse and Reverse. Thus, the die combination is rare on proofs, although found relatively easily among business strikes of the date. A brilliant example with light high point wear and moderate field hairlines. NGC ID# 27YM, PCGS# 7056
- 3723 1876 PR61 Cameo PCGS. CAC.** Type One Obverse. Type Two Reverse. A pleasing lower-end proof Trade dollar, showing brilliant surfaces and modest contrast. Slight strike weakness is seen on Liberty's head, and scattered marks and hairlines limit the grade. Unlike later years when proof Trade dollars can be substituted for Morgan dollars in a date set, in 1876, only the proof Trade dollar was produced. Population: 6 in 61 Cameo, 85 finer (2/16). NGC ID# 27YM, PCGS# 87056

**1877 Trade Dollar, PR63 Cameo
Lightly Toned Contrast**

- 3724 1877 PR63 Cameo PCGS.** Except for the ultra-rare 1884 and 1885, the 1877 has the lowest proof mintage in the Trade dollar series with only 510 pieces produced, although it is a figure that some specialists feel is under-reported. Tinges of lilac toning are seen at the margins of this glassy, well-contrasted specimen. Population: 18 in 63 Cameo, 26 finer (2/16).
Ex: Long Beach Signature (Heritage, 2/2006), lot 1715. NGC ID# 27YN, PCGS# 87057

**1877 Trade Dollar, PR64 Cameo
Attractively Toned**

- 3725 1877 PR64 Cameo PCGS Secure. CAC.** An elusive Cameo example of this otherwise plentiful proof Trade dollar issue, showing rose-gold toning over most of each side but with thin slivers of blue and violet around the extreme outer peripheries. The strike is full, and the contrasted fields show deep mirroring. A few scattered hairlines limit the grade. Population: 19 in 64 (3 in 64+) Cameo, 7 finer (3/16). NGC ID# 27YN, PCGS# 87057

**1878 Trade Dollar, PR65 Cameo
Proof-Only Mintage of 900 Coins**

- 3726 1878 PR65 Cameo PCGS. CAC.** The Philadelphia Mint ceased circulation-strike Trade dollar production in 1877. Between 1878 and 1885, the Mint only manufactured coins in proof format, the last two issues in extremely limited quantities. This impressive Gem proof has delicate champagne toning over each side with frosted devices that stand in stark contrast to the mirrored fields, producing the cameo contrast recognized by PCGS. Population: 5 in 65 (2 in 65+) Cameo, 9 finer (3/16). NGC ID# 27YP, PCGS# 87058

- 3727 1879 PR61 NGC.** A brilliant lower-end proof Trade dollar from a healthy mintage of 1,541 coins. This is the first proof-only date in the series, which may explain the increase in proof coinage over the previous issues. The strike is full, and modest cameo contrast appears despite moderate hairlines in the fields. NGC ID# 27YR, PCGS# 7059

**1879 Trade Dollar, PR64+
Old-Time Patina**

- 3728 1879 PR64+ NGC. CAC.** Aside from the almost unobtainable 1884 and 1885, which were not official issues, the proof Trade dollar series does not contain any real "stoppers," making a complete date set fully pursuable by patient collectors. The 1879 is the second proof-only Philadelphia issue, and production spiked to 1,541 pieces (up from 900 coins in 1878). This is a collectible near-Gem example with deep original toning that displays warm sun-gold color in the centers and deeper violet, lilac, and aquamarine around the peripheries. Sharp design elements further contribute to the visual appeal. NGC ID# 27YR, PCGS# 7059

**1879 Trade Dollar, Sharp PR65+
Richly Toned, Proof-Only Issue**

- 3729 1879 PR65+ NGC.** Moderately deep patina on each side yields to the considerable mint luster combined with a potent strike on this Gem proof 1879 Trade dollar. It requires a loupe to observe the sprinkled light ticks that determine the grade, most of them away from the high points. The 1879 issue was the first entry among the proof-only issues that conclude the Trade dollar series. This is a sharp and attractive representative of the date. Census: 46 in 65 (4 in 65+), 36 finer (3/16). NGC ID# 27YR, PCGS# 7059
- 3730 1880 PR61 PCGS.** The 1880 is the second in a series of five proof-only issues made for collectors (1,987 proofs struck). Both sides of this PR61 Trade dollar are brilliant with splashes of crimson patina within the obverse recesses. Thin, wispy marks appear throughout. NGC ID# 27YS, PCGS# 7060

1880 Trade Dollar, PR63 Cameo
Starkly Contrasted

3731 1880 PR63 Cameo NGC. Eye-catching white-on-black contrast adorns the obverse of this Select proof Cameo, while the reverse shows similar appeal but with a tinge of reddish toning in the center. The strike is sharp, and the mirroring in the fields is exceptional. Only a few minor hairlines preclude a finer grade. NGC ID# 27YS, PCGS# 87060

1880 Trade Dollar, Toned PR65 Cameo

3732 1880 PR65 Cameo PCGS. CAC. Regular Trade dollar coinage ceased in 1878, replaced by the standard Morgan dollar, but proof coinage of the series continued on officially through 1883. This 1880 Gem Cameo proof displays areas of ocean-blue, violet, and gold appearing on most of the mirrored surfaces. Modest contrast is present. Population: 24 in 65 (1 in 65+) Cameo, 23 finer. CAC: 6 in 65 Cameo, 12 finer (3/16). NGC ID# 27YS, PCGS# 87060

End of Session One

THE AMERICAN NUMISMATIST

Published Monthly in the Interest of Coin Collectors.

VOL. I.
PATERSON, N. J., MARCH, 1887.
No. 6.

THE REDEMPTION OF THE TRADE DOLLARS.

Since Congress passed the bill authorizing the redemption of the trade dollars, the professional examiners and counters in the Sub-Treasuries at New York and San Francisco have been kept busy receiving the large sums forwarded from all parts of the country. As the dollars can only be redeemed in these two cities, and as each piece has to be carefully scrutinized to see that it is neither defaced, mutilated, nor stamped, it will probably be five or six months before the work is completed.

It is the common belief that at the time the value of trade dollars fell to eighty-eight cents, large quantities were bought by bullion brokers speculating on a possible raise. If anyone had bought the coins in 1883, at their lowest price, and held them until the passage of the redemption act, he would really have lost money, as the profit on the four years investment would only be twelve cents. A larger profit than this could have been obtained by investing in Government bonds.

The Treasury Department has issued the following statement to holders of trade dollars:—

TREASURY OF THE UNITED STATES, }
WASHINGTON, MARCH 7, 1887. }

Owing to the present inadequate provision for the reception and storage of trade dollars, the redemption of which is provided for under the act of Congress passed Feb. 20, 1887, the following regulations will be observed, in order, so far as practicable, to comply with the terms of the law:

Trade dollars, if not defaced, mutilated, or stamped, will be redeemed or exchanged at the offices of the Treasurers of the United States. Requests for the redemption of these

coins stating the amount held should be forwarded to the above-named officers, who will file applications and notify holders in their turn when presentation may be made and payment obtained. The notification by the holders of trade dollars to the Treasurer or Sub-Treasurers of the United States of the amounts held by them respectively will be held to be a sufficient presentation of the coins within the meaning of the law, and will entitle the holders in the order of reception of such notifications to deposit such coins in the respective Sub-Treasuries when notified that such deposits can be received at those offices. Notifications must be filed with the Sub-Treasurers on or before Aug. 1, 1887. After notifying these officers, and upon receipt of notification from them, such coins may be forwarded by express or otherwise, transportation charges being prepaid, when receipts will be issued for the amounts purporting to be contained in the deposits on their reception. Upon the count and ascertainment of the amount of each deposit payment will be made therefor in standard silver dollars or in fractional silver coin at the option of the holder. Defaced, mutilated, or stamped trade dollars found in deposits will not be redeemed or exchanged by any of the Sub-Treasury officers, but they will be returned to the depositor or purchased as bullion in sums of \$3 or upward by the United States mints at the option of the depositor. C. N. JORDAN, TREASURER UNITED STATES.

Approved: C. S. FAIRCHILD, Acting Secretary of the Treasury.

Most of the dollars presented for redemption are held by banks for large business houses, and, as they were but a short time in circulation, are in very good condition. There is probably not more than one fourth of the original coinage of trade dollars still in this country; the remainder has been exported, principally to China.

SESSION TWO

FLYING EAGLE CENTS

- 3733 1857 MS64 NGC. Snow-12, Tripled Die Obverse.** Missing wing tip hub impression. This is a scarce variety with clear tripling of the peripheral legend visible beneath a loupe. The present MS64 example is high in the Condition Census. The strike is bold, and each side displays satiny rose-gold luster. There are no significant abrasions. NGC ID# 2276, PCGS# 2016

1857 Flying Eagle Cent, Well-Preserved MS65

- 3734 1857 MS65 PCGS.** While Gem condition 1857 Flying Eagle cents are generally obtainable for a price, finer-graded certified coins are not: Between NGC and PCGS, about three dozen submissions — likely not all *different coins* — are in higher grades. The medium-tan surfaces on this Gem PCGS coin are nicely preserved with some orange remaining near the rims. One small planchet indent below the tail feathers is consistent with the grade. PCGS reports 19 in MS66 finer (3/16). NGC ID# 2276, PCGS# 2016
- 3735 1858 Large Letters MS64 NGC.** High Leaves, Closed E. This Choice 1858 Flying Eagle cent type coin displays satiny bronze-gold luster and remarkably well-preserved fields. A planchet lamination above the second S in STATES is the only mentionable strike abnormality. The 1858 Flying Eagle cent is widely collected for type purposes but becomes scarce in Gem condition. NGC ID# 2277, PCGS# 2019
- 3736 1858 Large Letters MS64 NGC. CAC. Snow-4.** High Leaves, Closed E Reverse. AMERICA and the left portion of the eagle are die doubled. This lustrous olive-green and chestnut-gold Flying Eagle cent is remarkably unabrased for the MS64 level. The strike is incomplete on the tailfeathers and the upper-right portion of the wreath. CAC-endorsed in a prior generation holder. NGC ID# 2277, PCGS# 2019

INDIAN CENTS

- 3737 1859 MS64 PCGS.** A pleasing example of the single-year type, this piece displays attractive golden-tan luster on faintly reflective fields. Mellow brown toning appears on the wreath. NGC ID# 227E, PCGS# 2052
- 3738 1859 MS64 PCGS.** The Indian cent was introduced in 1859 and the Laurel Wreath reverse was only used that year, both important considerations for type purposes. This attractive Choice example exhibits well-preserved, lustrous surfaces and sharply detailed design elements throughout. NGC ID# 227E, PCGS# 2052
- 3739 1859 MS64 PCGS.** The popular first-year Indian cent by James Longacre is also a one-year type without the shield at the top of the reverse. This Choice Mint State example has pleasing golden-tan surfaces with full luster and a splash of gold toning at the lower obverse. NGC ID# 227E, PCGS# 2052

- 3740 1859 MS65 PCGS. CAC.** This Gem seemingly has it all: a full strike, vibrant luster, attractive nearly “white” color, and status as a first and single-year type. The CAC endorsement for quality within the grade and eye appeal make it all the more desirable. Each side is undeniably clean for the assessment, the only mark of note being a tick on the E in CENT. NGC ID# 227E, PCGS# 2052

1859 Indian Head Cent, MS66 A Top One-Year Type Example

- 3741 1859 MS66 PCGS. CAC.** The Flying Eagle design presented Mint officials with striking difficulties and was replaced with an Indian Head motif in 1859. The laurel wreath introduced in that year was substituted with an oak wreath and shield design in 1860, creating a popular one-year type in 1859. This Premium Gem cent boasts crisp feather and ribbon detail. Golden-amber surfaces show a handful of scattered ticks, but they are relatively insignificant, as this piece is among the finest survivors from a mintage of 36.4 million coins. Population: 28 in 66 (3 in 66+), 0 finer (3/16). NGC ID# 227E, PCGS# 2052
- 3742 1860 MS65 PCGS. CAC.** This attractive Gem displays well-detailed design elements, with just a touch of softness on the feather tips, and lustrous copper-red surfaces with no mentionable distractions. PCGS has graded 55 numerically finer examples (3/16). NGC ID# 227F, PCGS# 2058
- 3743 1861 MS65 PCGS.** A sharply struck copper-nickel cent, this 1861 exhibits brilliant luster and exceptional surfaces with only a couple trivial spots. The 1861 is the key issue of the short-lived copper-nickel Indian cent series. NGC ID# 227G, PCGS# 2061
- 3744 1861 MS65 PCGS.** A trace of grease adhered to the obverse die when this piece was coined, creating a small low area in the upper left field. Despite a few trivial spots, this Gem exhibits great eye appeal with brilliant golden-tan luster. NGC ID# 227G, PCGS# 2061
- 3745 1861 MS65 PCGS. CAC.** This CAC-endorsed Gem copper-nickel type coin displays luminous bronze-gold luster and sharp design elements. A vertical streak of deeper copper-red color is seen in the right obverse margin. The surfaces are surprisingly clean, even for the MS65 level. NGC ID# 227G, PCGS# 2061
- 3746 1861 MS66 PCGS. CAC.** Beautiful light almond-tan color enlivens both pristine sides of this Premium Gem copper-nickel Indian cent. No spots or overt marks mar the impressive eye appeal created by generous luster along with good color, strike, and preservation. The 1861, at 10 million business strikes, had the lowest mintage of the five-year span for this subtype. Few survive so fine. Population: 76 in 66 (2 in 66+), 13 finer. CAC: 18 in 66, 3 finer (3/16). NGC ID# 227G, PCGS# 2061

**1863 Cent, MS66+
Only One Coin Finer**

3747 1863 MS66+ NGC. CAC. Hints of mint-green and rose appear in the peripheral regions of this high-end Premium Gem 1863 Indian cent. The strike is bold, and the tan-gold surfaces are well-preserved. The 1863 is the most plentiful copper-nickel issue overall, ideal for type representation. Only a single coin is known finer than this piece. Census: 24 in 66 (1 in 66+, 1 in 66 ★), 1 finer (3/16). NGC ID# 229D, PCGS# 2067

3748 1864 L On Ribbon MS65 Red and Brown NGC. Razor-sharp and high-end for the Gem grade level, this Red and Brown L on Ribbon 1864 bronze cent displays glossy luster beneath blended chestnut-brown and coppery-orange coloration. There are no bothersome abrasions. NGC lists 23 finer Red and Brown examples (3/16). NGC ID# 227M, PCGS# 2080

**1865 Fancy 5 Cent, MS65 Red
Seldom Seen With CAC Label**

3749 1865 Fancy 5 MS65 Red PCGS. CAC. A rare CAC-endorsed Gem Red example of the popular Fancy 5 1865 Indian cent, showing a curve in the flag of the 5. This piece is sharp and lustrous with rich coppery-red color. A few minute specks do not overly detract, and there are no bothersome abrasions. Population: 43 in 65 (1 in 65+) Red, 11 finer; CAC: 8 in 65, 4 finer (2/16). NGC ID# 227N, PCGS# 2084

**1865 Fancy 5 Cent, MS63 Red
Snow-2, Doubled Die Reverse**

3750 1865 Fancy 5, Doubled Die Reverse, Snow-2, FS-1801, MS63 Red NGC. Snow-2 shows dramatic doubling on the reverse, visible with the naked eye. This is one of the most interesting varieties in the series. The present Red coin displays a sharp strike, but grease in the recesses of the obverse die at the time of minting caused much of the obverse peripheral legend and date to be ill-defined. Satiny copper-red luster delivers pleasing eye appeal. There are no bothersome abrasions. PCGS# 37422 Base PCGS# 2084

3751 1867/67 Snow-1, FS-301, MS62 Brown PCGS. The tops of the 67 in the date are widely repunched. Jade-green fields accompany tan-brown high points. The shoulder curl exhibits blending of detail, but the strike is generally bold, and the clashed surfaces appear nearly unabraded. NGC ID# 227R, PCGS# 37459 Base PCGS# 92088

3752 1867/67 Snow-1, FS-301, MS63 Red and Brown PCGS. Snow-1 is highly sought-after, showing bold repunching on the 67 of the date that is visible to the unaided eye. This piece is sharply struck, and abrasions are unobtrusive. Each side shows bright coppery-gold luster peering through deep burgundy overtones. Population: 10 in 63 Red and Brown, 26 finer (2/16). PCGS# 37460 Base PCGS# 92089

3753 1868 MS65 Red and Brown PCGS. CAC. Above MS65, the 1868 Indian cent is rare, regardless of how much mint red still shows. This Gem Red and Brown coin is CAC-endorsed and high-end for the grade. It also displays considerably more red than brown color. The strike is sharp, and both sides have a glowing, carbon-free copper-orange appearance. PCGS lists 21 finer Red and Brown coins (2/16). NGC ID# 227S, PCGS# 2092

3754 1869/69 Snow-3, FS-301, MS64 Red and Brown PCGS. CAC. The Snow-3 1869/69 obverse was paired with several tail dies for coinage. The present piece does not show any distinctive reverse diagnostics. This important variety is highly sought-after in all grades and is "a mainstay of the series," in the words of the *Cherrypickers'* reference. This Choice Red and Brown example displays sharp detail and glowing coppery-orange and amber hues. NGC ID# 227T, PCGS# 37475 Base PCGS# 2095

3755 1870 Pick-Axe, Snow-7a, FS-303, MS64 Red and Brown PCGS. Shallow N. A popular *Cherrypickers'* variety that shows pick-axe-shaped die damage at the base of the final headdress feather. Multiple reverses are known paired to this gouged head die. Snow-7a is distinctive from the others for a reverse that gradually rotates throughout its use. The present coin is dramatically rotated approximately 180 degrees. A bean-like planchet lamination is seen on Liberty's neck. The coin is quite well struck and displays glowing coppery-orange luster — a few faint overtones preclude a Red designation. PCGS# 569247 Base PCGS# 2098

3756 1872 MS64 Red and Brown PCGS. Bold N. A crisply struck near-Gem example of this low mintage semikey. Orange-gold and ruby-red dominate the borders but cede to light lilac-brown on the obverse center. Devoid of contact, although a faint fingerprint fragment is seen beneath CENT.
Ex: Long Beach Signature (Heritage, 9/2010), lot 3162. NGC ID# 227W, PCGS# 2104

3757 1873 Doubled LIBERTY, Snow-1, FS-101, VF30 PCGS. CAC. Snow-1 shows LIBERTY boldly die doubled. This is a Closed 3 variety that is in high demand. The present coin displays excellent chocolate-brown surfaces and sharp detail for the grade. CAC-approved in a green label holder. NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

**1873 Cent, Sharp XF45
Snow-1, Doubled LIBERTY**

3758 1873 Doubled LIBERTY, Snow-1, FS-101, XF45 PCGS. A razor-sharp coin for the grade, although the surfaces are a little too deeply toned brown to achieve an AU designation. This Snow-1 representative shows clear doubling of LIBERTY, and has problem-free, medium brown surfaces. A popular variety in all grades and even more important due to its *Guide Book* listing. NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

3759 1877 VF25 PCGS. A problem-free collector-grade coin with chocolate-brown surfaces that show expected light marks. Well-detailed and pleasing for the issue. The 1877 Indian cent is often difficult to acquire in midlevel circulated grades. NGC ID# 2284, PCGS# 2127

3760 1877 VF30 PCGS. LIBERTY shows only slight blending at B and E on the bonnet, with well-detailed devices and only minuscule marks throughout the rest of this key-date coin. Slight bits of build-up at the numerals and legends only confirm the originality of the medium-brown surfaces. A pleasing collector coin in all regards. NGC ID# 2284, PCGS# 2127

3761 1877 VF35 PCGS. A Choice VF specimen of this sought-after, low-mintage key, with pleasing medium brown surfaces that show no large or distracting abrasions. Light, even wear shows on the letters in LIBERTY. NGC ID# 2284, PCGS# 2127

3762 1877 VF35 ANACS. The is a sharp VF example with smooth chocolate-brown surfaces and bits of verdigris in the reverse crevices. Wear is light and evenly distributed, and a shallow corner on the N in ONE authenticates this key-date coin. Housed in an old small size, white ANACS holder. NGC ID# 2284, PCGS# 2127

3763 1877 XF45 PCGS. A Choice XF representative of this low-mintage key, with lightly worn and minimally abraded olive-brown surfaces. The 1877 Indian cent claims a mintage of 872,500 pieces, and collectors prize examples in all grades and conditions. NGC ID# 2284, PCGS# 2127

3764 1877 AU53 PCGS. A briefly circulated chocolate-brown example of this key Indian cent issue. The strike is bold, and light high-point wear accounts for almost all weakness on the devices. A few small marks are consistent with the grade. NGC ID# 2284, PCGS# 2127

3765 1878 Misplaced Date, Snow-2, FS-301, MS65 Red and Brown PCGS. Per *Cherrypickers*, "the tops of three numbers (likely all 8s) are evident protruding from the denticles below the 87 of the date." Sharply struck and semiprooflike with a mark-free appearance and minimal carbon. Presently rare; PCGS has certified just two Mint State examples, with the present lot as the single finest (3/16). PCGS# 37511 Base PCGS# 2131

3766 1883 MS66 Red and Brown PCGS. CAC. The impeccably preserved, mostly red surfaces of this remarkable Premium Gem have mellowed to lilac and crimson in a few areas, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is outstanding. Population: 6 in 66 Red and Brown, 0 finer (3/16). NGC ID# 228A, PCGS# 2146

3767 1887 MS65 Red PCGS. A seldom seen Gem Red 1887 Indian cent with satiny copper-orange surfaces and only a few tiny specks. The upper headdress feathers and the reverse wreath bow are slightly indistinct. Population: 61 in 65 Red, 26 finer (2/16). NGC ID# 228F, PCGS# 2159

**1890 Cent, MS66 Red
Rare, Tied for Finest**

3768 1890 MS66 Red PCGS. Although not a key date in the absolute sense, the 1890 Indian cent does become conditionally rare in the upper Red grades. This Premium Gem is tied with 10 others as the finest in the Red category at PCGS, and none are so fine at NGC (3/16). The strike is bold, and the frosty surfaces yield glowing coppery-orange luster. Eye appeal is superb. A few trivial specks do not detract. NGC ID# 228J, PCGS# 2177

1891 Cent, Pristine MS66 Red

3769 1891 MS66 Red PCGS. Wonderful fire-red surfaces enliven both sides of this Premium Gem Red PCGS 1891 cent, showing top-notch preservation and a razor-sharp strike, even including the forward feather tips. Locating a more-attractive survivor of this issue would be well nigh impossible. The fields are lightly clashed on the reverse. Population: 13 in 66 (2 in 66+) Red, 0 finer (3/16). NGC ID# 228K, PCGS# 2180

3770 1894 MS65 Red PCGS. Generous luster complements attractive medium orange-red surfaces with no signs of spots on this Gem 1894 Indian cent. The strike is well-impressed, showing four diamonds on the ribbon, although some softness on the forward feather tips is nearly inevitable. Seldom seen finer. Population: 78 in 65 (4 in 65+) Red, 32 finer (3/16). NGC ID# 228N, PCGS# 2189

3771 1894 MS65+ Red PCGS. CAC. A highly lustrous peach-red Gem. Contact is confined to a solitary small tick on the upper neck. Minor obverse carbon decides the grade. Population: 78 in 65 (4 in 65+) Red, 32 finer (3/16). NGC ID# 228N, PCGS# 2189

**1896 Indian Cent, Stunning MS66+
Unsurpassed Red and Brown Example**

- 3772 1896 MS66+ Red and Brown PCGS. CAC.** In hand, the coloration of this high-end Premium Gem cent is outstanding, with shades of blaze-orange and red framed by blue borders and stately olive-gold shades on the raised central devices. With a glass, the toning is even more spectacular. The vivid red glow at the margins blends with fuchsia-pink hues and amazonite-green accents. Mango-orange luster gleams brightly from all angles. Neither PCGS nor NGC report a finer example in Red and Brown. CAC endorsed, the sole MS66 to be so-honored, with the sole PCGS Plus for exceptional quality and appeal. Population: 2 in 66 (1 in 66+) Red and Brown, 0 finer (3/16). NGC ID# 228R, PCGS# 2194

**1899 Indian Cent, MS67 Red
Conditionally Rare**

- 3773 1899 MS67 Red PCGS.** This highly lustrous Superb Gem features fiery orange mint frost and exceptional design definition. Like many of the later date Indian cents, this piece is rarely seen at the top grades with full Red luster. Population: 18 in 67 (2 in 67+) Red, 2 finer (3/16). NGC ID# 228U, PCGS# 2204
- 3774 1903 MS66 Red PCGS. 30th Anniversary Green Label Holder.** This impressive Premium Gem offers well-detailed design elements, with just a trace of softness on the feather tips. The original red surfaces radiate vibrant mint luster and eye appeal is outstanding. Population: 80 in 66 (5 in 66+) Red, 8 finer (3/16). NGC ID# 228Y, PCGS# 2216
- 3775 1905 MS66 Red PCGS.** A splendid lime-green and pumpkin-gold Premium Gem. The strike is sharp and contact is virtually absent. A strong lens reveals pinpoint obverse flecks. A formidable rarity any finer. Population: 60 in 66 (7 in 66+) Red, 1 finer (3/16). NGC ID# 2292, PCGS# 2222
- 3776 1905 MS66 Red NGC. CAC.** This otherwise plentiful type-coin issue becomes elusive in Premium Gem Red condition. The present coin boasts sharp relief detail amid glowing copper-orange luster that has some mint-green tints here and there. A small russet speck near the C in CENT is the only mentionable imperfection. Census: 58 in 66 (1 in 66+) Red, 4 finer (2/16). NGC ID# 2292, PCGS# 2222
- 3777 1906 MS66 Red PCGS. 30th Anniversary Green Label Holder.** The original red surfaces of this delightful Premium Gem show a few microscopic specks of carbon, but no mentionable distractions are evident. The design elements are well-detailed, with vibrant mint luster on both sides. Population: 30 in 66 (1 in 66+) Red, 2 finer (3/16). NGC ID# 2293, PCGS# 2225

- 3778 1907 MS66 Red PCGS.** A sharply detailed Premium Gem, the orange-red surfaces are brightly lustrous, with a few microscopic flecks of carbon. Sharply struck with pleasing, original color. Population: 33 in 66 (1 in 66+) Red, 5 finer (2/16). Ex: *The Mile High City Collection, Chicago Signature (Heritage, 8/2011), lot 3151.* NGC ID# 2294, PCGS# 2228

- 3779 1908 MS66 Red PCGS. CAC.** Frosty mint luster glows beneath fiery copper-orange toning on each side of this well-struck Premium Gem type coin. A couple marks in the left obverse field and a peppering of tiny specks near the lower reverse border appear to be all that keep this piece from an even finer grade. Population: 71 in 66 (8 in 66+) Red, 2 finer (3/16). NGC ID# 2295, PCGS# 2231

- 3780 1908-S MS65 Red and Brown PCGS. CAC.** A mostly red Gem example of this semikey San Francisco issue, showing largely abraded surfaces and satiny copper-orange luster. The upper headdress feathertips are slightly weak, as expected. A few wispy brown overtones denote the Red and Brown color designation. NGC ID# 2296, PCGS# 2233

- 3781 1908-S MS64 Red NGC.** The first minor coinage issue of the San Francisco Mint, the 1908-S Indian cent had a production of slightly more than 1 million pieces. This frosty Choice Mint State representative exhibits brilliant pinkish-orange luster and sharp details. NGC ID# 2296, PCGS# 2234

- 3782 1909-S MS63 Red and Brown PCGS. CAC.** Tinges of rose color appear throughout the copper-gold and bronze surfaces of this Select Red and Brown 1909-S Indian cent. The strike is typical of the issue, showing minor weakness on the top three headdress feathers. Minimally abraded surfaces achieve the CAC green label. NGC ID# 2298, PCGS# 2239

- 3783 1909-S MS64 Red and Brown PCGS. CAC.** Peach and mahogany hues mingle on the obverse, while the reverse is paler copper-gold with several stark diagonal streaks of dark amber. A solidly appealing near-Gem from the end of the Indian cent series. NGC ID# 2298, PCGS# 2239

**1909-S Indian Cent, MS65 Red
Lustrous and Attractive**

- 3784 1909-S MS65 Red ANACS.** A few faint wisps of amber toning give the obverse of this copper-gold Gem Red cent a subtle woodgrain pattern. The strike is generally sharp, save for the top three headdress feathers that are always weak on the 1909-S, and were it not for a few faint lines on Liberty's cheek, a finer grade might have been achieved. A pleasing key-date Indian cent. Housed in an old, small size white ANACS holder. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

- 3785 1864 Copper Nickel PR64 Cameo NGC.** Delightful reddish-khaki hues cover the mirrored surfaces, while the frosted central devices display a sandy-tan coloration that contrasts boldly with the glassy fields. Cameo examples of the 1864 copper-nickel cents are in the minority among the proofs, and those with minimal carbon (such as this sharp, near-Gem proof) bring a well-deserved premium. NGC ID# 229E, PCGS# 82265

**1874 Indian Cent, PR66 Cameo
Red and Brown**

- 3786 1874 PR66 Red and Brown Cameo NGC.** NGC has only assigned the Cameo designation to 12 Indian cents of this date, and that total includes this piece, the only PR66 Red and Brown Cameo, along with a single PR66 Red Cameo. This example is almost entirely full red, with slight mellowing of the original mint color along the borders. An attractive cent. NGC ID# 229T, PCGS# 82311

Key 1877 Indian Cent, PR65 Brown

- 3787 1877 PR65 Brown NGC.** The key-date Indian cent, the 1877 enjoys strong demand in all grades, including circulation strikes and proofs. This example features a bold strike as expected, and exhibits considerable deep orange mint color despite the Brown designation. Delicate blue overtones add to the eye appeal. Census: 13 in 65 Brown, 1 finer (3/16). NGC ID# 229W, PCGS# 2318

**1877 Cent, PR64 Red and Brown
Sharp and Appealing**

- 3788 1877 PR64 Red and Brown PCGS.** The readily collectible proof version of the famous 1877 Indian cent key, suitable for the budget-conscious enthusiast seeking a high-grade example of this date. Reflective fields, sharp motifs, and a bold N in ONE differ from the often poorly struck circulation issue. This Choice example displays rich copper-orange color beneath soft amber-brown overtones. The surfaces are pleasantly eye-appealing with subtle cameo contrast. NGC ID# 229W, PCGS# 2319

**1877 Indian Cent, PR64 Red and Brown
Key-Date Proof Alternative**

- 3789 1877 PR64 Red and Brown PCGS. CAC.** For collectors who find high-end 1877 circulation-strike Indian cents to be out of reach, this Choice Red and Brown proof offers a more affordable date option. The strike is full, and the fields are reflective. Deep burgundy-brown overtones allow coppery-orange luster to emerge on portions of each side. NGC ID# 229W, PCGS# 2319

**1877 Cent, PR65+ Red and Brown
In-Demand Capstone Date**

- 3790 1877 PR65+ Red and Brown PCGS.** The 1877 Indian cent is the key to the series with a small mintage of 852,500 coins. Circulation strikes are sought after in all grades, but especially in the upper tiers of Mint State. Collectors seeking a high-grade example without a five-figure price tag often opt for one of the 900 proofs struck that year. This PR65+ Red and Brown example displays mostly copper-orange color with elements of cherry-red and gunmetal-blue. The relief elements are expectedly bold, and evidence of contact is minimal. NGC ID# 229W, PCGS# 2319

- 3791 1879 PR66 Red and Brown NGC.** Glasslike mirroring in the fields backlights the sharp, satiny motifs of this Premium Gem proof 1879 Indian cent. Both sides display coppery-orange color with faint burgundy overtones that define the Red and Brown designation. Eye appeal is outstanding. Census: 34 in 66 (2 in 66 ★) Red and Brown, 2 finer (2/16). NGC ID# 229Y, PCGS# 2325

**1880 Cent, PR67 Red and Brown
Registry-Grade Example**

- 3792 1880 PR67 Red and Brown PCGS.** Superb Gem 1880 proof Indian cents are rare regardless of color assignment. This Red and Brown coin is fully struck and deeply mirrored with olive-green and reddish-gold patina over pristine surfaces. Significant cameo contrast emerges from beneath the patina on each side, delivering outstanding eye appeal. Population: 5 in 67 (1 in 67+) Red and Brown, 1 finer (3/16). NGC ID# 229Z, PCGS# 2328

3793 1880 PR66 Red NGC. Razor-sharp details, highly reflective fields, deep orange-red color, and nearly mark-free surfaces are all attributes of this exceptional Premium Gem Red proof. A single, tiny, pinpoint-sized mark in the left obverse field is the only apparent flaw. A beautiful specimen. Census: 11 in 66 Red, 1 finer (3/16). Ex: *New York Signature (Heritage, 11/2003)*, lot 5254. NGC ID# 229Z, PCGS# 2329

3794 1881 PR66 Red and Brown PCGS. CAC. Splendid sea-green and orange shades compete for territory across this coruscating and fully struck specimen. In terms of eye appeal, the present lot would be nearly impossible to surpass. NGC ID# 22A2, PCGS# 2331

**1885 Indian Cent, PR67 Brown
Tied for the Finest PCGS Brown Proof**

3795 1885 PR67 Brown PCGS. This beautiful Superb Gem proof has outstanding mahogany-brown surfaces that change to brilliant sky-blue and violet under certain light angles. The lower obverse and upper reverse are a trifle indistinct, with all other details boldly rendered. Population: 31 in 67 (4 in 67+) Brown, 0 finer (3/16). NGC ID# 22A6, PCGS# 2342

3796 1886 Variety 2 PR66+ Brown PCGS. CAC. Distinctive lilac and blue toning appears on both sides of this Premium Gem proof Indian cent. Both sides exhibit bold design definition. A wide range of appearances fall into the simple "Brown" category, and many, such as this piece, are extraordinarily attractive. Population: 9 in 66 (2 in 66+) Brown, 3 finer (3/16). NGC ID# 22A8, PCGS# 92345

3797 1904 PR65 Red Cameo PCGS. A razor-sharp, deeply mirrored Gem proof with frosty, starkly contrasted devices. Sun-gold surfaces reveal large areas of violet and amber-red overtones. Proofs of this period were rarely produced with cameo contrast, making this piece a rarity. Population: 7 in 65 Cameo, 3 finer (3/16). NGC ID# 22AT, PCGS# 82401

3798 1905 PR66 Red and Brown PCGS. The obverse is predominantly radiant orange-gold, though the upper field displays a blush of forest-green and mauve toning. The reverse has a ruby-red center and an electric-blue lower margin. The upper reverse border exhibits peach iridescence. Sharply struck and mark-free. NGC ID# 22AU, PCGS# 2403

3799 1907 PR66 Red and Brown PCGS. The yellow-gold surfaces of this Premium Gem proof display splashes of deep, reddish-orange color with minimal carbon. The overall appearance suggests a full Red designation would not be surprising. Sharply struck save for a hint of softness at the tips of the first two headdress feathers. Excellent visual appeal. Population: 20 in 66 Red and Brown, 4 finer (2/16). Ex: *Dallas Signature (Heritage, 11/2007)*, lot 120; *FUN Signature (Heritage, 1/2008)*, lot 430; *Long Beach Signature (Heritage, 2/2012)*, lot 3206. NGC ID# 22AW, PCGS# 2409

LINCOLN CENTS

3800 1909-S VDB AU55 PCGS. CAC. An attractive Choice AU specimen of this sought-after key, with just a touch of wear on the well-detailed design elements. The pleasing olive-brown surfaces are lightly abraded and the designer's initials are bold. NGC ID# BYKW, PCGS# 2426

3801 1909-S VDB PCGS Genuine. The PCGS number ending in .91 suggests Questionable Color as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Uncirculated specimen that has coloration of uncertain origin. Interesting mint-green, rose, amber-gold, and bluish hues encompass much of each side. The strike is sharp, and there are no singularly bothersome abrasions. A small carbon speck appears to the left of the C in CENT. NGC ID# BYKW, PCGS# 2426

3802 1909-S VDB MS62 Brown NGC. A pleasing, affordable Mint State example of this key issue, showing glossy chocolate-brown surfaces and bold relief elements. A few minor abrasions limit the grade but none are individually significant. NGC ID# BYKW, PCGS# 2426

3803 1909-S VDB MS64 Brown PCGS. CAC. Original red and light brown hues are about evenly distributed over the well-preserved surfaces of this attractive Choice key. Satiny mint luster shines through the patina and the well-detailed design elements include a bold VDB. NGC ID# BYKW, PCGS# 2426

3804 1909-S VDB MS63 Red and Brown PCGS. Coppery-gold luster resides beneath mottled chestnut-brown overtones on this Select 1909-S VDB Lincoln cent. The strike is sharp, and there are no disruptive abrasions. The MS63 Red and Brown grade is popular among collectors for a balance of eye appeal and affordability. NGC ID# 22B2, PCGS# 2427

3805 1909-S VDB MS64 Red and Brown PCGS Secure. Radiant satin luster illuminates surprisingly clean surfaces on this Choice Red and Brown 1909-S VDB cent, showing primarily lemon-gold color. Faint amber overtones and a few scattered specks appear upon close study. This piece is well-struck and attractive. NGC ID# 22B2, PCGS# 2427

3806 1909-S VDB MS64 Red and Brown PCGS Secure. Soft, satiny luster gives this Choice 1909-S VDB Lincoln cent medium chestnut-brown color with a luminous backlight. There are no significant abrasions, although we note minor softness of strike on the obverse portrait when compared to many other examples of this key issue — likely due to die fatigue. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Lincoln Cent, MS66 Red and Brown
Only One Finer at PCGS**

3807 1909-S VDB MS66 Red and Brown PCGS. A spectacular Premium Gem representative of this sought-after, first-year key, with mostly red surfaces that have mellowed to light brown in a few areas. The design elements are sharply detailed and the designer's initials are bold. Vibrant mint luster adds to the outstanding eye appeal. Population: 49 in 66 Red and Brown, 1 finer (2/16). NGC ID# 22B2, PCGS# 2427

- 3808 1909-S VDB MS64 Red PCGS.** The design elements of this sought-after first-year key are sharply detailed throughout and the well-preserved original red surfaces radiate vibrant mint luster. The designer's initials are bold and eye appeal is outstanding. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS66 Red
Rich Luster and Color**

- 3809 1909-S VDB MS66 Red PCGS.** Glistening, frosty mint luster adorns each side of this boldly struck 1909-S VDB Lincoln cent, while close study with a loupe fails to reveal any meaningful flaws. Olive and amber overtones deepen the border regions, leaving the interiors copper-orange. The rarity of higher-grade pieces puts them far out of reach for most collectors. This is an attractive compromise of quality and affordability. PCGS lists only 13 Superb Gem Red coins finer (3/16).
From The Indian Rocks Collection. NGC ID# 22B2, PCGS# 2428

- 3810 1909-S Lincoln MS65 Red PCGS.** Bright and lustrous, this Gem possesses radiant mint color that includes small areas of deeper orange and hints of red. The surfaces are virtually pristine and only a few tiny carbon spots are present. This coin displays a high degree of eye appeal.
Ex: Baltimore Signature (Heritage, 7/2003), lot 5591; Dallas Bullet Sale (Heritage, 11/2003), lot 175, which realized \$977.50; Long Beach Signature (Heritage, 5/2013), lot 3703. NGC ID# 22B4, PCGS# 2434

- 3811 1909-S Lincoln MS65 Red NGC. CAC.** A splendidly well-preserved bronze-gold example of this semikey San Francisco issue. The strike is bold, and the satiny surfaces are free of abrasions. Finer examples are infrequently seen. Eye appeal is pleasing. NGC ID# 22B4, PCGS# 2434

1909-S Lincoln Cent, MS66+ Red

- 3812 1909-S Lincoln MS66+ Red PCGS. CAC.** Although the San Francisco Mint began operations more than 50 years earlier, the first copper coins struck there were the 1908-S and 1909-S Indian cents, followed by the 1909-S V.D.B. Lincoln cents, and finally the 1909-S Lincoln cents. One of the latter is this Premium Gem that is virtually flawless with brilliant golden-orange mint luster. A small mark at the center of the reverse is the grade-limiting factor. PCGS has only certified six finer examples (3/16). NGC ID# 22B4, PCGS# 2434

- 3813 1910-S MS66 Red PCGS.** Frosty orange-gold luster glows over each side of this Premium Gem Red 1910-S Lincoln cent. The strike is well-executed, and a mark in the field above the 1 in the date is the only noticeable abrasion. A few tiny pepper specks in the left reverse field are not bothersome. Population: 89 in 66 (3 in 66+) Red, 4 finer (3/16). NGC ID# 22B6, PCGS# 2440

- 3814 1910-S MS66 Red PCGS.** This remarkable Premium Gem offers well-preserved original red surfaces, with vibrant mint luster and no mentionable distractions. The design elements are sharply detailed and overall eye appeal is unsurpassed. Population: 89 in 66 (3 in 66+) Red, 4 finer (3/16). NGC ID# 22B6, PCGS# 2440

**1911 Lincoln Cent, MS66+ Red
Conditionally Elusive**

- 3815 1911 MS66+ Red PCGS. CAC.** This sharply defined Premium Gem ranks high in the population charts at PCGS and NGC. Both sides have brilliant pinkish-orange mint luster that exhibit a few trivial, grade-limiting carbon flecks and marks. PCGS has only certified 13 finer examples (3/16). NGC ID# 22B7, PCGS# 2443

- 3816 1911-D MS65 Red PCGS. CAC.** While the mintmark is indistinct, all other design elements on this lovely Gem are sharply defined. Both sides have rich orange mint luster with frosty surfaces and a hint of bluish toning at the lower obverse. PCGS has only certified 45 finer Red examples. NGC ID# 22B8, PCGS# 2446

**1911-D Cent, MS66 Red
Early D-Mint Condition Rarity**

- 3817 1911-D MS66 Red PCGS.** David W. Lange observes that most 1911-D cents with original mint red color have softer striking characteristics than those mint condition coins with brown surfaces: "It appears that the smoother surfaces of softly struck cents actually imparted some preservative quality to them which is lacking in the more textured coins with fuller strikes." This MS66 Red cent exhibits well-detailed devices with softness near the margins. Deep reddish-orange color dominates each side with accents of amber and rose-violet. Population: 44 in 66 (5 in 66+) Red, 1 finer (3/16). NGC ID# 22B8, PCGS# 2446

**1911-D Lincoln Cent, MS66 Red
Carbon-Free Example**

3818 1911-D MS66 Red PCGS. CAC. The surfaces are largely brick-red with a wash of pale lilac on the reverse. Carbon is completely absent, although one smallish brown toning fleck appears on the obverse. The obverse die shows some evidence of fatigue in the form of die crumbling, and the reverse die is noticeably rotated with respect to the obverse. This pristine Premium Gem Red 1911-D is tied for virtually the finest obtainable, as PCGS has certified a lone MS67 Red. Population: 45 in 66 (5 in 66+) Red, 1 finer. CAC: 10 in 66 Red, 0 finer (3/16). NGC ID# 22B8, PCGS# 2446

3819 1911-S MS65 Red PCGS. A crisply struck peach-red early branch mint cent. The borders exhibit blushes of apple-green, and the reverse displays moderate carbon. Lustrous and virtually unabraded. Certified in a green label holder. Population: 61 in 65 (1 in 65+) Red, 13 finer (3/16). NGC ID# 22B9, PCGS# 2449

3820 1912-S MS65 Red PCGS. Struck from heavily worn dies, as is often seen, showing weakness on the design elements and flow lines in the fields. This copper-pink Gem 1912-S cent is free of significant abrasions, although a few trivial pepper specks are seen with a loupe. PCGS has seen only three finer Red coins (3/16). NGC ID# 22BC, PCGS# 2458

3821 1913-D MS65+ Red PCGS. This high-end Gem displays satiny copper-red luster and is free of major abrasions. The strike is weak on the O in ONE, as expected for this issue. The 1913-D in Red is scarce in MS65 and rare finer. PCGS lists 18 higher-grade Red coins (3/16). NGC ID# 22BE, PCGS# 2464

3822 1913-S MS65 Red and Brown PCGS. CAC. This Gem Red and Brown 1913-S Lincoln cent is notably well-preserved, although it having been struck from worn dies, the coin shows considerable weakness and flow lines. There is no overt carbon spotting. Each side displays deep amber color, neither red nor truly brown. Population: 37 in 65 Red and Brown, 0 finer (3/16). NGC ID# 22BF, PCGS# 2466

3823 1914-D AU50 PCGS. The 1914-D is an important low-mintage key to the Lincoln cent series. This attractive AU specimen shows light wear on the well-detailed design elements and the pleasing olive-brown surfaces are lightly abraded. NGC ID# 84BX, PCGS# 2471

3824 1914-D AU55 PCGS. An attractive, problem-free AU example of this key Denver issue, showing medium brown surfaces that have reddish undertones when tilted beneath a light. The strike is bold, and slight high-point wear reveals itself with light olive patina. NGC ID# 84BX, PCGS# 2471

**1914-D Cent, MS63 Brown
Silvery-Brown Luster**

3825 1914-D MS63 Brown NGC. Chocolate-brown dominates the right obverse, while the left field is silvery mint-green. The reverse is lighter in color and displays chestnut and lime tints. Lustrous and meticulously struck with pleasing surfaces. A famous low-mintage key date, less saved than its 1909-S VDB predecessor and 1931-S successor.
Ex: *Dallas Signature* (Heritage, 10/2009), lot 153. NGC ID# 84BX, PCGS# 2471

1915-S Lincoln Cent, Elusive MS65 Red

3826 1915-S MS65 Red PCGS. A copper-rose glow emanates from the luster on each side of this Gem Red 1915-S Lincoln cent. The strike is bold on surfaces showing no mentionable abrasions. A few tiny flecks are negligible. The 1915-S is among the more difficult S-mint Lincoln cent issues to locate in full Red color, and such coins are rare so fine. Population: 30 in 65 (1 in 65+) Red, 5 finer (3/16). NGC ID# 22BM, PCGS# 2485

3827 1917 Doubled Die Obverse, FS-101, AU53 PCGS. A popular early Lincoln cent variety most often seen in lower grades. This AU example is boldly detailed with glossy brown and amber-gold surfaces that retain hints of luster in the fields. Minor die erosion is observed in the fields, as usual. The die doubling on the date and peripheral legend is clear. NGC ID# 22BS, PCGS# 37673 Base PCGS# 92495

3828 1918 MS66+ Red PCGS. CAC. A splendidly preserved example of this early Lincoln cent issue, showing unimpeded mint luster and lovely orange-red obverse and almond-tan reverse. PCGS has only certified 31 finer examples (3/16). NGC ID# 22BV, PCGS# 2506

3829 1918 MS66+ Red PCGS. CAC. Although a trifle softly defined, both sides of this Premium Gem exhibit brilliant orange surfaces with frosty mint luster. Population: 22 in 66+ Red, 31 finer (3/16). NGC ID# 22BV, PCGS# 2506

3830 1918-D MS65 Red PCGS. 30th Anniversary Green Label Holder. The original red surfaces of this impressive Premium Gem are well-preserved, with vibrant mint luster throughout. The design elements are sharply detailed and eye appeal is tremendous. Population: 31 in 65 (1 in 65+) Red, 8 finer (3/16). NGC ID# 22BW, PCGS# 2509

3831 1919 MS67 Red PCGS. CAC. Gold-orange toning around the periphery enhances the appearance of this well-struck example displaying fresh luster. The colors are deeper on the obverse. A few tiny carbon flyspecks appear on the obverse. Population: 69 in 67 (7 in 67+) Red, 17 finer (3/16). NGC ID# 22BY, PCGS# 2515

**1923 Cent, MS67 Red
Conditionally Rare Registry Coin**

- 3832 1923 MS67 Red PCGS.** A Registry-grade coin, this Superb Gem Red 1923 Lincoln cent is something of a rarity in such a lofty grade. Only a single piece is finer than the MS67 level at both services combined. This coin is boldly struck with glowing coppery-orange luster and unmarked surfaces. A couple of flecks within the O in ONE are the only mentionable signs of carbon. Population: 17 in 67 (1 in 67+) Red, 1 finer (3/16). NGC ID# 22CA, PCGS# 2545

**1925-S Cent, MS65 Red and Brown
Challenging San Francisco Emission**

- 3833 1925-S MS65 Red and Brown PCGS.** Coppery-orange and golden-brown tones blend over the surfaces of this Gem S-mint cent. Rose-violet accents appear intermittently. Strike detail presents a problem for the issue. Lincoln's beard is typically soft, but the other relief elements, including the legends and wheat ears are bold. The 1925-S has a considerable mintage of 26.3 million coins, but Gems are rare regardless of color designation. Population: 10 in 65 Red and Brown, 0 finer (3/16). NGC ID# 22CH, PCGS# 2565

- 3834 1926 MS67+ Red PCGS. CAC.** Thickly frosted amber-gold surfaces reveal elements of sun-gold, rose, and mint-green. Two ticks occur above O(NE) and on C(ENT). Sharply struck with great eye appeal. From a mintage of 157 million coins, this Superb Gem is tied for finest at both services (3/16). NGC ID# 22CJ, PCGS# 2569

- 3835 1929-D MS66 Red PCGS.** A beautiful peach-red Premium Gem. Boldly struck, lustrous, and unabraded. The reverse is carbon-free, and the obverse shows only infrequent pinpoint flecks. Population: 29 in 66 (1 in 66+) Red, 0 finer (3/16). NGC ID# 22CV, PCGS# 2599

**1931-D Lincoln Cent, MS66 Red
Important Depression-Era Issue**

- 3836 1931-D MS66 Red PCGS. CAC.** Lincoln cents, Mercury dimes, and Saint-Gaudens double eagles were the only coins struck at the Denver Mint in 1931, with a combined production of 5,846,500 coins. At today's modern Denver Mint, that same production can be accomplished in a little over four hours. Struck in the midst of the Great Depression, this piece exhibits a nearly full strike with brilliant orange luster and satin surfaces. A small reverse spot will identify this piece in the future. Population: 39 in 66 (1 in 66+) Red, 1 finer (3/16). NGC ID# 22D3, PCGS# 2617

**1934 Cent, MS68 Red
Virtually Flawless in Every Respect**

- 3837 1934 MS68 Red PCGS.** Lincoln cent production reached 219 million coins in 1934. The issue is correspondingly available through MS67. Only in MS68 does the 1934 become a stopper. Rings of gold, mint-green, and rose-violet encompass fiery-orange centers throughout this top-graded example. The legends and design elements are uniformly bold. Virtually flawless in every respect. Population: 15 in 68 Red, 0 finer (3/16). NGC ID# 22D9, PCGS# 2635

1934 Lincoln Cent, Pristine MS68 Red

- 3838 1934 MS68 Red PCGS.** The brick-red surfaces of this top-notch Superb Gem Red coin are sharply struck, amazingly pristine, and free of any mentionable distractions. After a few years of small Depression-era mintages at the nation's mints, Philadelphia kicked back into high gear in 1934 with an enormous coinage exceeding 219 million pieces. The long, stylized 3 digit on this issue is unique to this year. Population: 15 in 68 Red, 0 finer (3/16). NGC ID# 22D9, PCGS# 2635

- 3839 1936 MS67+ Red PCGS.** This fiery orange Lincoln cent is an amazing example of the issue, with no numerically finer examples examined by the PCGS grading pros (3/16). This piece is boldly detailed with virtually flawless surfaces. NGC ID# 2748, PCGS# 2650

**1936 Doubled Die Obverse Cent
MS66 Red, FS-101**

3840 1936 Doubled Die Obverse, FS-101, MS66 Red PCGS. Strong die doubling throughout the obverse legends ensures *Guide Book* placement for FS-101. A similar variety, FS-102, is also impressive, but more available in Uncirculated grades. This lustrous orange-red and lemon-gold Premium Gem has a fleck on the cheekbone but is otherwise pristine. FS-101 Population: 7 in 66 Red, 1 finer (3/16). PCGS# 37750 Base PCGS# 82650

3841 1936 Doubled Die Obverse, FS-103, MS66 Red PCGS. One of three impressive doubled die obverse varieties of 1936 cents, FS-103 is identified by its spread on the motto instead of the date or LIBERTY, although a few letters of the latter legend reveal die doubling under magnification. Lustrous and carbon-free with bright gold color and a good strike. Population: 8 in 66 Red, 1 finer (3/16).
Ex: Baltimore Signature (Heritage, 7/2003), lot 5667, which realized \$690. NGC ID# 22DE, PCGS# 37756 Base PCGS# 72650

**1936-D Lincoln Cent, MS67+ Red
None Finer at PCGS**

3842 1936-D MS67+ Red PCGS. CAC. The 1936-D Lincoln cent was struck in large numbers and the issue is relatively available in high grade, but PCGS has not graded any coins at the MS68 grade level, with the Red designation (2/16). This well-detailed high-end Superb Gem displays lustrous original red surfaces with no discernable flaws. Eye appeal is outstanding. NGC ID# 22DE, PCGS# 2653

**1937-D Cent, MS67+ Red
Glistening Satin Luster**

3843 1937-D MS67+ Red PCGS. The 1937-D is not nearly as available as its Philadelphia counterpart, but high-grade examples are slightly more accessible than San Francisco cents struck that same year. Glistening satin luster radiates over rich copper-gold surfaces. Lincoln's portrait definition is bold, as are the legends and wheat ears. Tiny nicks and carbon spots are at an absolute minimum. PCGS reports two finer submissions (3/16). NGC ID# 22DJ, PCGS# 2662

3844 1937-D MS67+ Red PCGS. CAC. A Registry-grade 1937-D Cent, this high-end MS67 Red coin displays vibrant copper-red luster and bold design elements. There are no abrasions, and a loupe reveals only a couple of microscopic flecks. Population: 13 in 67+ Red, 2 finer (3/16). NGC ID# 22DJ, PCGS# 2662

3845 1940 MS67+ Red PCGS. CAC. A halo of peach-orange embraces coppery-red luster on the obverse, while the reverse is entirely copper-red with fiery mint luster. A tiny planchet flaw above O in ONE is the sole mark of note, while both sides are entirely free of carbon. The strike is notably sharp with just slight incompleteness at the cheekbone and shoulder. CAC endorsed and a viable Registry Set candidate. Population: 16 in 67+ Red, 5 finer (3/16). NGC ID# 22DT, PCGS# 2686

3846 1941-S MS67+ Red PCGS. Small S. A beautiful orange-gold Superb Gem. The strike is close to full, and the lustrous surfaces exhibit only microscopic imperfections. PCGS has certified 20 as MS67+ Red with none finer (3/16). NGC ID# 22DY, PCGS# 2701

3847 1942 MS67+ Red PCGS. The original red surfaces of this Plus-graded Superb Gem radiate vibrant mint luster and no mentionable flaws are evident, even on close inspection. The design elements are well-detailed and eye appeal is exceptional. PCGS has graded no coins in higher numeric grades (3/16). NGC ID# 22L9, PCGS# 2704

**1942 Cent, MS67+ Red
Glowing Orange Luster**

3848 1942 MS67+ Red PCGS. CAC. Dazzling coppery-orange luster illuminates boldly struck design elements on this carbon-free Superb Gem Red Registry coin. PCGS has seen only nine Plus-graded 1942 cents in MS67 and none finer (3/16). Were it not for a tiny mark on the N in UNITED, this lovely coin might have garnered a full MS68 grade. NGC ID# 22L9, PCGS# 2704

3849 1942-S MS67+ Red PCGS. CAC. One of 23 Plus-graded MS67 Red coins at PCGS, trailing only two MS68 Red pieces that are finer (3/16). This high-end Registry coin displays glowing coppery-orange luster and seemingly flawless surfaces. The strike is bold. NGC ID# 22E3, PCGS# 2710

3850 1942-S MS67+ Red PCGS. CAC. A pristine and thoroughly lustrous orange-red World War II Superb Gem. The strike is intricate, and the technical quality is remarkable. The reverse exhibits minor retained laminations, as produced. NGC ID# 22E3, PCGS# 2710

3851 1944 MS67+ Red PCGS. This Plus-graded Superb Gem displays impeccably preserved original red surfaces, with blazing mint luster and sharply detailed design elements. Overall eye appeal is terrific. PCGS has graded two numerically finer examples (3/16). NGC ID# 22EA, PCGS# 2722

3852 1944 MS67+ Red PCGS. CAC. Shades of rose-read, peach-gold, and blaze-orange vie for attention on this frosty and lustrous cent. With the all-important CAC endorsement and the PCGS Plus designation, this fully struck cent is a prime Registry Set contender. Population: 31 in 67+ Red, 2 finer (3/16). NGC ID# 22EA, PCGS# 2722

3853 1944-D MS67+ Red PCGS. CAC. Sharply detailed design elements and impeccably preserved original red surfaces are the calling cards of this Plus-graded Superb Gem, with vibrant mint luster and outstanding eye appeal. PCGS has graded two numerically finer examples (3/16). NGC ID# 22EC, PCGS# 2725

3854 1944-D MS67+ Red PCGS. CAC. A high-end Superb Gem, with sharply detailed design elements and impeccably preserved original red surfaces that radiate vibrant mint luster. Eye appeal is terrific. PCGS has graded only two numerically finer examples (3/16). NGC ID# 22EC, PCGS# 2725

3855 1945-S MS67+ Red PCGS. CAC. Knob S. A gorgeous orange-red cent whose sole imperfections are a pinpoint flan flaw on the field below the second T in TRUST and a nearly microscopic tick on Lincoln's shoulder. Lustrous and well struck. PCGS has graded 11 pieces as MS67+ Red with none finer (3/16). NGC ID# 856Y, PCGS# 2740

1946-S Cent, MS67+ Red Desirable Registry Set Coin

3856 1946-S MS67+ Red PCGS. Trumpet tail S. A remarkable Superb Gem that shows no trace of carbon across the radiant fire-red surfaces. Lustrous and virtually devoid of contact. As of (3/16), PCGS has certified just two examples as MS67+ Red with none finer. The PCGS Coin Facts page depicts the present lot as the plate coin for the issue. NGC ID# 22EM, PCGS# 2749

3857 1947 Doubled Die Obverse, FS-101, MS67 Red PCGS Secure. CAC. FS-101 exhibits die doubling on TRUST and the date. A splendid orange-red Superb Gem. The sole mentionable imperfection is a faint diagonal mark through the ON in ONE. As of (3/16), PCGS has certified 24 examples, with the present lot as the single finest. NGC ID# 22EN, PCGS# 37849 Base PCGS# 2752

1948 Lincoln Cent, MS67 Red Tied for Finest Certified

3858 1948 MS67 Red PCGS. Despite the extraordinary mintages in the late 1940s and throughout the 1950s, few survivors match the present quality. This piece is fully brilliant, featuring pristine orange mint surfaces, sharp design definition, and an absence of spots or marks. This example is tied for the finest at either PCGS or NGC. Population: 20 in 67 Red, 0 finer (3/16). NGC ID# 22ES, PCGS# 2761

1950-S Lincoln Cent, MS67+ Red Must-Have Registry Coin

3859 1950-S MS67+ Red PCGS. This 1950-S is readily accessible through MS67. However, only four Superb Gems have been awarded a Plus designation by PCGS, making this a must-have coin for the devoted Registry Set builder. Frosty luster swirls over strongly defined and nearly unabraded surfaces. Appealing copper-gold color embraces each side, and a couple of carbon specks occur on the reverse. Population: 89 in 67+ Red, 0 finer (3/16). NGC ID# 22F2, PCGS# 2785

3860 1953-D MS67 Red PCGS. CAC. Tied for the finest known 1953-D Red, this Superb Gem cent flashes colors ranging from copper-red to lime-green depending on the viewing angle. The intense, frosty luster gives this coin incredible vibrancy. A glass reveals a few tiny marks and flecks, yet the eye appeal more than compensates. CAC endorsed. Population: 47 in 67 (2 in 67+) Red, 0 finer (3/16). NGC ID# 22FA, PCGS# 2809

3861 1955 Doubled Die Obverse, FS-101 — Improperly Cleaned — NGC Details. AU. The cleaning noted by NGC has done nothing more than give each side of this doubled die obverse cent a glossy, silvery hue over olive burgundy-brown surfaces. The design elements are well-defined save for slight high-point friction that contributes to the grade. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3862 1955 Doubled Die Obverse, FS-101, AU50 ANACS. This AU example is boldly detailed, showing mostly satin surfaces with deep burgundy-brown color. There is almost no perceptible wear. This *Guide Book* variety is a mainstay of the series and highly sought-after in all grades. Housed in an old white ANACS holder. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3863 1955 Doubled Die Obverse, FS-101 — Reverse Planchet Flaw — NGC Details. AU. A briefly circulated yet satiny example of the highly regarded *Guide Book* variety. The golden-brown surfaces show only trivial marks, although the right reverse displays minor retained laminations, as made. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3864 1955 Doubled Die Obverse, FS-101, AU53 NGC. The 1955 doubled die obverse is arguably the most famous variety in the Lincoln cent series, even if not the rarest. This AU representative displays problem-free burgundy-brown surfaces with bold motifs. Eye appeal is pleasing. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3865 1955 Doubled Die Obverse, FS-101, AU55 NGC. A sharply detailed example with natural medium brown surfaces that show slight high-point wear on the devices. The 1955 doubled die obverse cent is highly sought-after in all grades, and circulated coins find ample demand among budget-conscious collectors. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Doubled Die Cent, MS64 Brown
The Most Popular and Obvious Doubled Die**

3866 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS. Lustrous chocolate-brown surfaces with tinges of lilac. Close examination with a loupe shows a faint outline of original red here and there around the devices. This is, without a doubt, the single most dramatic doubled die variety in all of American numismatics. As a result, it is also arguably the most popular variety in American numismatics.

Ex: *Long Beach Signature* (Heritage, 9/2004), lot 5583. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Cent, MS64 Brown
Doubled Die Obverse
Vividly Colored in Blue and Burgundy**

3867 1955 Doubled Die Obverse, FS-101, MS64 Brown NGC. CAC. This is among the more attractive 1955 doubled die obverse cents this cataloger has seen in recent years. Luster is abundant, and the Brown color designation is solely due to the presence of vibrant steel-blue and auburn toning that delivers this coin's incredible visual appeal. The strike is bold, and the preservation is outstanding. On the obverse, vivid copper-red color surrounds the borders, date, and portrait. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1957 Cent, MS67 Red
Tied for Finest, Rare CAC Example**

3868 1957 MS67 Red PCGS. CAC. A top-graded Registry Set contender, this Superb Gem Red 1957 Lincoln cent displays glowing lemon-gold and rose-orange mint frost over carbon-free surfaces. The strike is sharp, and eye appeal is outstanding. Tied with 12 others as the finest at PCGS and one of only two in this grade with CAC approval (2/16). NGC ID# 22FM, PCGS# 2842

3869 1959 MS67 Red PCGS. This delightful Superb Gem exhibits blazing original red surfaces, with vibrant mint luster and no mentionable distractions. The design elements are well-detailed and eye appeal is terrific. Population: 18 in 67 Red, 0 finer (2/16). NGC ID# 22FS, PCGS# 2854

3870 1959 MS67 Red PCGS. The inaugural Memorial Reverse Philadelphia issue is rare in Superb Gem Red condition. This MS67 coin resides at the top of the PCGS *Population Report*. Unabraded surfaces yield frosty coppery-orange luster and bold design elements. Population: 18 in 67 Red, 0 finer (3/16). NGC ID# 22FS, PCGS# 2854

3871 1960 Large Date MS67 Red PCGS. This is an essential Registry Set contender, tied with several others as the finest Large Date 1960 cent at PCGS. Both sides are vividly illuminated in satiny copper-red luster, and the design elements are sharply impressed. A few tiny specks do not detract. Population: 20 in 67 Red, 0 finer (3/16). NGC ID# 22FW, PCGS# 2860

3872 1962 MS67 Red PCGS. A Registry-grade 1962 Lincoln cent, among the finest at either service. This Superb Gem Red coin displays bold detail and luminous copper-red luster. Free of abrasions with a couple of tiny flecks hidden on the reverse. Population: 26 in 67 (1 in 67+) Red, 0 finer (2/16). NGC ID# 22G3, PCGS# 2878

3873 1970-S Small Date, FS-1401, MS67 Red PCGS. BERT is weak within LIBERTY, the pick-up point for the scarce Small Date variety. A beautiful pumpkin-gold Superb Gem with hints of olive-green across the obverse field. Lustrous, fully struck, and essentially devoid of imperfections. PCGS# 504137 Base PCGS# 2935

3874 1971-S MS67 Red PCGS. Ranking among the finest 1971-S Memorial Reverse Lincoln cents certified, this Registry-grade example exudes ruby-red highlights over peach-gold surfaces with flowing mint luster. A minimum of tiny marks and microscopic freckles are visible with a loupe, but this vibrant coin in hand is stunning. Population: 26 in 67 (4 in 67+) Red, 0 finer (3/16). NGC ID# 22GS, PCGS# 2947

3875 1971-S MS67 Red PCGS. A magnificent pumpkin-gold Superb Gem. Lustrous and virtually immaculate. Certified in a new green label holder. Population: 25 in 67 (3 in 67+) Red, 0 finer (2/16). NGC ID# 22GS, PCGS# 2947

1972 Cent, MS67 Red and Brown
Doubled Die Obverse
Barely a Trace of Toning

- 3876 1972 Doubled Die Obverse, FS-101, MS67 Red and Brown PCGS.** Several doubled die obverses are known for the 1972 Lincoln cent, but FS-101 is by far the most prominent and famous. This Superb Gem example has satiny copper-rose surfaces that some might consider to be full Red, although PCGS conservatively designates them Red and Brown. The strike is sharp, and eye appeal is superb. Population: 3 in 67 Red and Brown, 0 finer (3/16). PCGS# 38012 Base PCGS# 2949

- 3877 1972 Doubled Die Obverse, FS-101, MS66+ Red PCGS.** Rose-pink, copper-red, and amber-orange hues intermingle over each side of this high-end Premium Gem example. The strike is sharply rendered, and the frosty surfaces are free of mentionable abrasions. Eye appeal is exceptional. This *Guide Book* variety is one of the most sought-after in the Lincoln cent series behind the 1955 doubled die. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

1973-D Cent, MS67+ Red
Sole Finest at PCGS

- 3878 1973-D MS67+ Red PCGS.** Memorial reverse designer Frank Gasparro's initials were enlarged in 1973, only to be reduced in 1974. More than 3.5 billion Denver cents were struck bearing the one-year, large initials reverse. Astoundingly, examples are only collectible through MS66 Red, and Superb Gems are very rare. Even more impressive is that this is technically the sole finest representative at PCGS — the only MS67 Red coin awarded a Plus-designation from that service. Deep copper-orange color and satiny mint luster combine over each side. Sharply struck with just a hint of softness over the third to sixth columns. Population: 14 in 67 (1 in 67+) Red, 0 finer (3/16). NGC ID# 22GY, PCGS# 2962

1975-D Cent, MS67+ Red
Tied for Finest Certified

- 3879 1975-D MS67+ Red PCGS.** This Plus-graded Superb Gem Red 1975-D Lincoln cent is tied for the finest certified, nearly half of a grade point finer than the MS67 Red coin in the current highest-rated Registry Set. Mint-green and rose wisps appear throughout vibrant lemon-gold luster. The strike is bold, although the obverse shows numerous die striations (mint-made). A couple of trivial ticks on Lincoln's jacket are the only discernible flaws. Population: 42 in 67 (3 in 67+) Red, 0 finer (3/16). NGC ID# 22H6, PCGS# 2979

- 3880 1978 MS67+ Red PCGS.** A high-end Superb Gem, with well-detailed design elements and blazing original red surfaces that show no mentionable distractions. Overall eye appeal is incredible. Population: 52 in 67 (10 in 67+) Red, 1 finer (3/16). NGC ID# 22HB, PCGS# 2992

1982 Bronze Small Date Cent, MS67+ Red
Uniquely Beautiful Coloration

- 3881 1982 Bronze, Small Date MS67+ Red PCGS.** Although the Registry collector will acquire this piece for its rare, lofty grade, the traditional set assembler will be captivated by the remarkable coloration that envelops each side in swirling rose-red, copper-orange, gold, and mint-green spirals. The strike is bold, and there are no mentionable abrasions. Population: 17 in 67 (5 in 67+) Red, 1 finer (2/16). NGC ID# 3AJG, PCGS# 146020

- 3882 1983 Doubled Die Reverse, FS-801, MS67 Red PCGS.** The famous *Guide Book* variety with remarkably strong die doubling throughout the reverse legends. This lustrous Superb Gem has a bold strike save for softness on STATES. A loupe is required to locate incidental carbon and contact. NGC ID# 22HW, PCGS# 38063 Base PCGS# 3056

PROOF LINCOLN CENTS

- 3883 1909 Lincoln PR65 Red and Brown PCGS.** This lovely Choice proof offers jade-green centers and cherry-red peripheries. Well struck and satiny with exemplary preservation.
Ex: *Central States Bullet* (Heritage, 5/2004), lot 282. NGC ID# 22KS, PCGS# 3304

1911 Lincoln Cent PR65 Red Elusive Brilliant Matte Proof

- 3884 1911 PR65 Red PCGS.** Rich orange mint luster graces the obverse and reverse surfaces of this lovely Gem. Few of the matte proof Lincoln cents have survived with fully brilliant surfaces. This piece features a bold strike with minimal carbon flecks. Population: 23 in 65 Red, 12 finer (3/16). NGC ID# 22KU, PCGS# 3311

- 3885 1913 PR66 Red and Brown PCGS. CAC.** A spectacular Premium Gem, with well-preserved original red surfaces that have mellowed to light brown in some areas. The design elements are sharply rendered and eye appeal is outstanding. Population: 27 in 66 (1 in 66+) Red and Brown, 4 finer (3/16). NGC ID# 22KW, PCGS# 3316

- 3886 1936 Type One — Satin Finish PR65 Red and Brown PCGS. CAC.** The obverse of this satin finish proof is mostly subdued red with splashes of deep blue toning on Lincoln's cheekbone and beard. The reverse is mostly sea-green, interspersed with splashes of faded red mint color. Population: 35 in 65 Red and Brown, 6 finer (3/16). NGC ID# 22L2, PCGS# 3331

- 3887 1936 Type Two — Brilliant Finish PR65 Red ANACS.** Pale silver-pink color adorns each side of this Gem Red brilliant proof cent, showing bold design elements and unmarked surfaces. A dash of crimson appears on the lower-right reverse. Eye appeal is outstanding. NGC ID# 22L3, PCGS# 3335

- 3888 1936 Type Two — Brilliant Finish PR65 Red PCGS.** This Gem Red Type Two 1936 proof Lincoln cent displays uniform copper-orange color with modest field-device contrast on each side. Finer examples are elusive. This coin is housed in an old green label holder. NGC ID# 22L3, PCGS# 3335

- 3889 1936 Type Two — Brilliant Finish PR65 Red NGC.** Coppery-gold and pinkish hues grace the deep mirroring of this Gem Red 1936 proof Lincoln cent. The strike is full, and subtle field-motif contrast is seen at certain angles. This Type Two, brilliant proof is scarce so well-preserved and rare any finer. Census: 48 in 65 (2 in 65 ★) Red, 14 finer (3/16). NGC ID# 22L3, PCGS# 3335

1936 Cent, PR66 Red Type Two, Brilliant Finish

- 3890 1936 Type Two — Brilliant Finish PR66 Red PCGS.** Vivid plum and lavender overtones adorn the borders of this Premium Gem Red proof 1936 cent, leaving the interiors with coppery-orange coloration. The strike is full, and the fields are deeply mirrored. The Type Two 1936 proof cent shares its 5,569-coin mintage with the Type One, satin finish variety. The Type Two variant is rare this well-preserved. Population: 52 in 66 (3 in 66+) Red, 2 finer (3/16). NGC ID# 22L3, PCGS# 3335

- 3891 1937 PR65 Red Cameo PCGS. CAC.** An elusive Red Cameo example of this brilliant proof issue, showing rich copper-red and violet coloration throughout the deeply mirrored fields. There are no unsightly spots or marks. Population: 12 in 65 Cameo, 33 finer (3/16). NGC ID# 22L5, PCGS# 83338

1937 Lincoln Cent, PR65 Red Ultra Cameo One Finer Coin at NGC

- 3892 1937 PR65 Red Ultra Cameo NGC.** An orange-rose Gem that exhibits impressive cameo contrast for a proof from its era. No effort was made at that time by the U.S. Mint to produce cameo proofs, and typically only initial strikes from newly installed dies demonstrated contrast. The fields display occasional minute plum-red freckles. Census: 1 in 65 Ultra Cameo, 1 finer (3/16).
Ex: *FUN Signature* (Heritage, 1/2010), lot 384. NGC ID# 22L4, PCGS# 93338

- 3893 1938 PR66 Red Cameo PCGS.** A scarce Cameo example of this otherwise plentiful proof issue. This Premium Gem 1938 Lincoln cent displays obvious contrast and deep mirroring. A few violet-colored toning specks are seen under magnification. Population: 26 in 66 (2 in 66+) Cameo, 2 finer (2/16). NGC ID# 22L5, PCGS# 83341

- 3894 1942 PR66 Red Cameo PCGS.** The radiant portrait contrasts with the glassy obverse field. A fully struck orange-gold Premium Gem. Small spots above the first T and second S in STATES combine to limit the grade. The final year of World War II proof production. NGC ID# 22L9, PCGS# 83353

- 3895 1950 PR67 Red Ultra Cameo NGC.** This spectacular Superb Gem offers virtually pristine original red surfaces and sharply detailed design elements throughout. The deeply reflective fields contrast profoundly with the frosty devices. Census: 14 in 67 Ultra Cameo, 0 finer (3/16). NGC ID# 22LA, PCGS# 93359

**1951 Lincoln Cent, PR68 Red Cameo
Registry Set Necessity**

- 3896 1951 PR68 Red Cameo PCGS.** This 1951 cent is tied with one other as the finest Cameo at PCGS — a single Deep Cameo at that service falls short at PR67 Red (3/16). This virtually pristine Registry Set coin is boldly struck and starkly contrasted, showing rich copper-orange color and deeply mirrored fields, completely carbon-free.
Ex: New York Signature (Heritage, 10-11/2015), lot 3073, which brought \$5,875. NGC ID# 22LB, PCGS# 83362

**1955 Cent, PR68 Red Deep Cameo
Registry Set Essential**

- 3897 1955 PR68 Red Deep Cameo PCGS.** Deep Cameo examples of the 1955 proof Lincoln cent issue are scarcely seen in any grade and are genuinely rare at this Registry-essential level. Deep mirroring in the fields appears beneath fiery orange patina that overlaps the frosty motifs. A tiny planchet lamination appears near Lincoln's eyebrow, not to be confused with a carbon speck. This coin is essentially spot-free and delivers impressive eye appeal. Population: 8 in 68 Deep Cameo, 1 finer (3/16). NGC ID# 22LF, PCGS# 93374

**Breathtaking 1956 Cent
PR68 Red Deep Cameo**

- 3898 1956 PR68 Red Deep Cameo PCGS.** The mintage of 1956 proof cents (669,384 pieces) was increased significantly over that of previous years. Consequently, proof cents in all grades are readily available. Cameos are more elusive, however, especially Deep/Ultra Cameos in the higher grades.
The satiny motifs of this PR68 Deep Cameo appear to float over deep watery fields. Indeed, both sides yield an orange-gold-on-black appearance from several angles. An attentive strike sharpens the design elements, and close inspection reveals no mentionable flaws. In short, this is a breathtaking coin with superior technical quality and aesthetic appeal. Population: 11 in 68 Deep Cameo, 0 finer (3/16). NGC ID# 22LG, PCGS# 93377

- 3899 1980-S PR70 Red Deep Cameo PCGS.** An essential Registry coin, this Deep Cameo 1980-S proof Lincoln cent is tied with 20 others as the finest at PCGS; none have graded higher than PR69 Ultra Cameo at NGC (3/16). The design elements are fully rendered and exhibit stark contrast with the mirrored coppery-red fields. NGC ID# 22MD, PCGS# 93464

**1990 No S Cent, PR67 Red Deep Cameo
Key Guide Book Variety**

- 3900 1990 No S, FS-101, PR67 Red Deep Cameo PCGS.** Key to a Lincoln Memorial proof set, the 1990 No S cent is often encountered with spots on the rim, caused by moisture trapped within the Mint-issued hard plastic holder. But the present fully struck orange-red Superb Gem is as made aside from a tiny spot on the obverse rim at 2 o'clock. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

SHIELD NICKELS

- 3901 1866/1866 Rays, Repunched Date, FS-301, AU55 PCGS.** One of the most famous and visually impressive repunched date varieties in the Shield nickel series, showing a nearly complete second impression offset high and to the right of the primary. This Choice AU representative is well-detailed and shows pleasing golden-gray surfaces. PCGS# 38314 Base PCGS# 3790
- 3902 1867 No Rays MS66 NGC.** The design of the Shield nickel was modified in 1867 to remove the Rays on the reverse, which were causing striking problems and excessive die wear. This delightful Premium Gem displays sharply detailed design elements and an extensive network of die cracks on both sides. The well-preserved lustrous surfaces are blanketed in shades of champagne-gold toning. Census: 30 in 66 (1 in 66+, 1 in 66 ★), 0 finer (3/16). NGC ID# 22NZ, PCGS# 3794
- 3903 1868 MS66 PCGS.** Fletcher IIa Reverse. A beautifully toned, pristine, and crisply struck representative. The butter-gold obverse center is framed by a lilac and powder-blue border. The reverse is aquamarine and wheat-gold. The present die pair is interesting for its field displacement die cracks at the date and the U in UNITED. Spurs protrude from the letters in STAT, as made. Population: 47 in 66 (5 in 66+), 1 finer (3/16). NGC ID# 22P2, PCGS# 3795
- 3904 1871 MS65 PCGS. CAC.** This Gem 1871 Shield nickel is boldly struck with satin luster and light golden toning. Several peripheral die cracks appear on the obverse, as is typical of this type in general. The 1871 is a slightly better date in Uncirculated condition, rarely seen finer than MS65. Population: 36 in 65, 12 finer (3/16). NGC ID# 22P5, PCGS# 3798
- 3905 1872 MS66+ PCGS. CAC.** The 1872 Shield nickel is a rare issue at the MS66 level, and finer coins are virtually unobtainable. This high-end Premium Gem is sharply detailed throughout and both sides radiate vibrant mint luster. The well-preserved surfaces show delicate shades of pale gold toning. Population: 31 in 66 (4 in 66+), 1 finer (3/16). NGC ID# 22P6, PCGS# 3799

**1873 Open 3 Shield Nickel, MS66+
Vibrant, Frosty Luster**

3906 1873 Open 3 MS66+ PCGS. CAC. Tied for the finest certified, this high-end Premium Gem 1873 Open 3 Shield nickel displays razor-sharp relief detail amid frosty, mint-fresh luster that shows a hint of champagne toning. There are no abrasions, although the obverse displays the usual array of peripheral die cracks. Population: 11 in 66 (3 in 66+), 0 finer (3/16). NGC ID# 22P8, PCGS# 3800

3907 1875 Doubled Die Obverse, FS-101, MS65 PCGS Secure. This is a dramatic doubled die obverse, showing a clear spread on the wreath leaves, annulet, and shield lines. This Gem example is lustrous and toned a light golden hue. The strike is bold, and there are no major abrasions. NGC ID# 22PA, PCGS# 38405 Base PCGS# 3804

**1876 Shield Nickel, MS65+
FS-401, 'The Bleeder'**

3908 1876 The Bleeder, FS-401, MS65+ PCGS. While the 1876 is of moderate availability in lower Mint State grades, Gem or finer coins are scarce-to-rare. The issue is of notable rarity with the engraver error described in the most recent *Cherrypickers'* edition as FS-401 (a.k.a. "The Bleeder"). Vertical extensions of the shield lines cut through the horizontal lines of the shield — the only known variety of its kind in the Shield nickel series. This lustrous, brilliant example has dual appeal of a high numeric grade as well as terrific eye appeal. Sharply struck with numerous bold die cracks on the obverse with sinking in the date area, suggesting that the die pair had a relatively short life. Population (all varieties): 48 in 65 (2 in 65+), 18 finer (3/16). PCGS# 569428 Base PCGS# 3805

**1883/2 Shield Nickel, MS66
Popular FS-302 Overdate**

3909 1883/2 FS-302 MS66 NGC. More than one 1882-dated nickel die was leftover after the end of the year, resulting in several popular overdate varieties in 1883. Remnants of secondary digits are evident inside the loops of the two 8's and slightly left of the 3 on this delightful MS66 specimen. This sharply detailed Premium Gem shows a number of interesting die cracks on both sides, with vibrant mint luster and impeccably preserved surfaces. Census: 3 in 66, 3 finer (3/16). PCGS# 38413 Base PCGS# 3814

3910 1883/2 FS-303 AU55 PCGS. The late die state with a cud connecting the bases of the 18 in the date with the rim. Light wheat-gold and cream-gray toning visits partly lustrous and well defined surfaces. The fields display a few unobtrusive abrasions. PCGS# 38414 Base PCGS# 3814

PROOF SHIELD NICKELS

3911 1866 Rays PR64 Cameo PCGS. The 1866 Rays Shield nickel is doubly popular with type collectors because of its status as the first year of the design and its short-lived design type. This sharply detailed Choice proof example displays deeply mirrored fields and lightly marked surfaces. Population: 13 in 64 Cameo, 70 finer (3/16). NGC ID# 276G, PCGS# 83817

**1866 Shield Nickel, PR65 Cameo
First-Year, Rays Variant**

3912 1866 Rays PR65 Cameo PCGS. A spectacular Gem proof from the first year of the Shield nickel design, this extraordinary specimen exhibits sharply detailed design elements and deeply reflective fields that contrast boldly with the frosty devices. A few hints of greenish-gold and lavender toning enhance the outstanding eye appeal. Population: 33 in 65 Cameo, 37 finer (3/16). NGC ID# 276G, PCGS# 83817

3913 1867 No Rays PR65 Cameo PCGS. A spectacular Gem representative of the first issue without Rays on the reverse, this coin offers sharply detailed, frosty design elements and deeply mirrored fields, with intense cameo contrast. Population: 36 in 65 Cameo, 24 finer (3/16). NGC ID# 5EB6, PCGS# 83821

**1872 Shield Nickel, PR67
None Certified Finer at NGC**

3914 1872 PR67 NGC. The mintage of proof 1872 Shield nickels is estimated at a modest 950 pieces. This delightful Superb Gem is among the finest survivors, with sharply detailed design elements and moderately reflective fields. The impeccably preserved surfaces show highlights of pale gold and lilac toning. Census: 7 in 67, 0 finer (2/16). NGC ID# 22P6, PCGS# 3826

3915 1872 PR66 Cameo PCGS. CAC. Doubled Die Obverse. An elusive Cameo example of this otherwise plentiful proof Shield nickel issue, showing brilliant mirroring and sharp, satiny design elements. Few finer coins are known with field-device contrast. The obverse is boldly die doubled north on this proof marriage. The spread is similar to that of FS-101, although slightly more pronounced. NGC ID# AMU4, PCGS# 83826

**1873 Closed 3 Shield Nickel, PR67
Modest Contrast, Ample Eye Appeal**

3916 1873 Closed 3 PR67 PCGS. CAC. Fletcher-2. All proof 1873 Shield nickels have the Closed 3 logotype. This proof obverse has a recut 1 in the date. The number of pieces known in Superb Gem condition is nine at PCGS and NGC combined, and only three of these are CAC-endorsed (3/16). None are finer. This sharp example shows brilliant mirrors and frost-white design elements. Modest contrast is apparent on each side. Population: 5 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 5KX3, PCGS# 3827

3917 1874 PR66 PCGS. Bold repunching of the 4 in the date is visible north of the primary digit most likely, a characteristic of all 1874 proofs, which had a small mintage estimated at 700+ pieces. This attractive Premium Gem is essentially brilliant with satinlike surfaces and slight contrast on both sides. Sharply struck except for a single star beneath the second A in AMERICA, which may have been struck through grease. Population: 45 in 66 (2 in 66+), 11 finer (2/16). NGC ID# 276R, PCGS# 3828

**1874 Shield Nickel PR66 Deep Cameo
Sole Finest Deep Cameo**

3918 1874 PR66 Deep Cameo PCGS. This is the finer of only two Deep/Ultra Cameo proof 1874 Shield nickels certified, the other being a PR65 Ultra Cameo at NGC (3/16). The design is fully rendered with frosty luster, while the backdrop of glasslike mirroring delivers outstanding contrast. A hint of champagne toning accentuates the eye appeal. PCGS# 93828

3919 1875 PR66 PCGS. This Premium Gem 1875 Shield nickel is conditionally scarce, and finer coins are rare. The obverse displays subtle cameo contrast, and both sides have pleasing nickel-gray color. The strike is sharp. Population: 18 in 66, 1 finer (2/16). NGC ID# 276S, PCGS# 3829

3920 1875 PR66 NGC. Pale reddish color offers an infusion of personality on this strongly reflective Premium Gem proof. Minimally frosted devices lend a modicum of contrast. Census: 25 in 66 (1 in 66 ★), 2 finer (3/16).
Ex: Houston Signature (Heritage, 12/2009), lot 231. NGC ID# 276S, PCGS# 3829

**1876 Shield Nickel, Pristine PR67
American Centennial Issue**

3921 1876 PR67 PCGS. For the doubly patriotic among us, this Shield nickel was struck during the Centennial celebration of America's independence, an issue fraught with symbolism, whether intended or no. The extra proof mintage of 400 or so coins — 1,150 in all, or a shade more — was likely due to said Centennial observances. This is a frosty, well-produced Superb Gem showing no mentionable toning and a nice sharp strike. Tied for finest at PCGS. Population: 2 in 67, 0 finer (3/16). NGC ID# 4S39, PCGS# 3830

1877 Shield Nickel, PR64
Pleasing Date Representative

- 3922 1877 PR64 PCGS.** Deep gray surfaces exhibit faint traces of blue and iridescent toning on both sides of this key proof-only Shield nickel. The surfaces have a slight haze as usual on original proofs. While a high percentage of 1877 nickels have survived, they are also in extreme demand.
Ex: B. Max Mehl (12/23/1927), at \$3.00; *Houston Signature* (Heritage, 12/2009), lot 235. NGC ID# 276U, PCGS# 3831

1877 Shield Nickel, PR66 Cameo
Key Proof-Only Issue

- 3925 1877 PR66 Cameo PCGS.** From a limited proof-only mintage of 900 pieces, this spectacular Premium Gem offers sharply detailed frosty design elements that contrast boldly with the reflective fields. The well-preserved surfaces show highlights of greenish-gold and lilac toning, with outstanding eye appeal. Population: 46 in 66 (3 in 66+) Cameo, 9 finer (2/16). NGC ID# 276U, PCGS# 83831

1877 Nickel, PR67
In-Demand Proof-Only Date

- 3923 1877 PR67 NGC.** The 900 Shield nickel proofs struck in 1877 represented the only production of that denomination for the year. The resulting proof-only issue is the subject of substantial date pressure from collectors needing to fill the hole in their sets. Specimens are often described as "dull," but this Superb Gem proof is flashy with brilliant surfaces that display a faint golden tinge. Expectedly razor-sharp and essentially free of marks. Census: 5 in 67, 0 finer (3/16). NGC ID# 276U, PCGS# 3831

1877 Shield Nickel, PR66 Cameo
Strong Field-Device Contrast

- 3926 1877 PR66 Cameo PCGS. CAC.** High-end Cameo examples of the proof-only 1877 Shield nickel are elusive, although the advancement in eye appeal between a non-Cameo and a Cameo is great enough to make the difficult task of acquiring such a piece well worth the trouble. This Premium Gem CAC coin is brilliant and noticeably contrasted. The strike is sharp. Population: 46 in 66 (3 in 66+) Cameo, 9 finer (3/16). NGC ID# 276U, PCGS# 83831

1877 Shield Nickel, Sharp PR65 Cameo

- 3924 1877 PR65 Cameo PCGS. CAC.** A pleasing Gem example of this proof-only issue, with good contrast between the mirrored fields and the opaque devices. The fields are largely brilliant, although a light overlay of smoke-gray flecks can be seen under a loupe. A single small mark is noted on the fourth shield stripe from the left, for accuracy only. Population: 44 in 65 Cameo, 55 finer (3/16).
Ex: *Long Beach Signature* (Heritage, 6/2006), lot 606. NGC ID# 276U, PCGS# 83831

1877 Shield Nickel, PR66 Deep Cameo
One of Two Deep Cameos at PCGS

- 3927 1877 PR66 Deep Cameo PCGS.** One of only two Deep Cameos at PCGS (both PR66 coins), while NGC has seen Ultra Cameos in PR65 (2), PR66 (1), PR66+ (1), and PR67 (1) (3/16). This example is razor-sharp and deeply mirrored. Light champagne toning is seen over each side. The 1877 is a proof-only issue, boasting a modest mintage of only 900 pieces. NGC ID# 4YTA, PCGS# 93831

- 3928 1878 PR64 NGC.** Although lacking the date appeal of the 1877, this proof-only low mintage issue (2,350 pieces minted) is eagerly sought by Shield nickel collectors. Nickel-gray surfaces display speckles of light milky toning and sharply struck design features. There are no mentionable contact marks, but a couple of flecks are noted over each side.
Ex: Long Beach Signature (Heritage, 6/2005), lot 5524. NGC ID# 276V, PCGS# 3832

LIBERTY NICKELS

- 3929 1883 No Cents MS67 PCGS.** This Superb Gem No Cents Liberty nickel was struck from cracked dies, although the wreath and stars are still well-defined. The satiny surfaces are mostly brilliant and free of abrasions. The No Cents issue was one of three distinct nickel types struck in 1883, all highly sought-after in high grade. Population: 38 in 67, 0 finer (3/16). NGC ID# 2772, PCGS# 3841
- 3930 1883 No Cents MS67 NGC.** This highly lustrous Superb Gem exhibits fully frosty white luster with bold design details. The No Cents nickel represents the first year of the Liberty series in combination with a one-year design type. Census: 73 in 67 (1 in 67+, 4 in 67 ★), 0 finer (3/16).
Ex: Houston Signature (Heritage, 12/2010), lot 3331. NGC ID# 2772, PCGS# 3841
- 3931 1883 With Cents MS66 PCGS.** Pastel olive-green and caramel-gold toning embraces this lustrous and pleasing example. The strike is needle-sharp except on the uppermost star. Only a couple of tiny obverse ticks determine the grade. Population: 66 in 66 (7 in 66+), 6 finer (3/16). NGC ID# 22PH, PCGS# 3844

1883 Liberty Nickel, MS66+ With CENTS Variant

- 3932 1883 With Cents MS66+ PCGS. CAC.** A sharper than usual strike is indicated by the corn kernels that are visible in the left branch of the wreath. That is the key pickup-point for a full strike. This piece has brilliant light gray surfaces with frosty mint luster and excellent eye appeal. Population: 66 in 66 (7 in 66+), 6 finer (3/16). NGC ID# 22PH, PCGS# 3844
- 3933 1884 MS66 PCGS.** Light to medium wheat-gold toning enriches this lustrous and unabraded Premium Gem. Three tiny and subtle areas of gray patina are east of Liberty's ear. The 1 in the date is lightly repunched south. Population: 41 in 66 (11 in 66+), 0 finer (3/16). NGC ID# 22PJ, PCGS# 3845
- 3934 1886 MS63 PCGS. CAC.** The strike is adequate in Liberty's hair and most of the wreath, but several obverse stars lack definition, as does the reverse left ear of corn. Satiny luster prevails throughout amid light khaki-gray coloration. Abrasions are absent on both sides of this Select Mint State nickel. A small, curving die flaw attaches the forward neck to star 1. CAC: 4 in 63, 35 finer (2/16). NGC ID# 277U, PCGS# 3847

1886 Liberty Nickel, MS65 Lower-Mintage Key Date

- 3935 1886 MS65 PCGS.** The 1886 Liberty nickel claims a small mintage of 3.3 million pieces and few high-quality examples were saved by contemporary collectors. This attractive Gem is sharply detailed in most areas, with just a touch of softness on the lower wreath. The well-preserved lustrous surfaces are visited by shades of golden-tan and lavender-gray toning. Population: 46 in 65 (1 in 65+), 8 finer (2/16). NGC ID# 277U, PCGS# 3847

1888 Liberty Nickel, MS66 Among the Finest Certified

- 3936 1888 MS66 PCGS.** This conditionally rare Premium Gem is among the finest 1888 nickels at the two major grading services. Gold-toned surfaces are impressively free of abrasions, showing softly frosted luster that contributes to the pleasing eye appeal. The lower-left portion of the wreath is considerably weak, as is seen to some extent on most examples of this type. Population: 25 in 66 (3 in 66+), 0 finer (3/16). NGC ID# 2774, PCGS# 3849
- 3937 1889 MS66+ PCGS.** Distinctive for its multicolor toning and deeply frosted surfaces, this exceptional nickel resembles a matte proof in texture and in the subtle iridescence of the surfaces. Colors range from chestnut-gold to deep lilac and warm-rose over problem-free fields and devices that are sharply struck throughout. A frosty, attractively toned Premium Gem, well-deserving of the Plus designation and certainly among the finest seen by PCGS. Population: 29 in 66 (4 in 66+), 0 finer (3/16). NGC ID# 2775, PCGS# 3850

**1892 Nickel, MS66+
CAC-Endorsed Registry Coin**

3938 1892 MS66+ PCGS. CAC. This frosty, high-end Premium Gem is unusually well-struck on the lower wreath and obverse stars. Iridescent champagne luster glows on each side, and there are no bothersome abrasions. Tied for the finest certified and an ideal Registry coin as such. Population: 39 in 66 (5 in 66+), 0 finer; CAC: 15 in 66, 0 finer (3/16). NGC ID# 2777, PCGS# 3853

3939 1893 MS66 PCGS. CAC. Lovely lavender, golden-gray, and pistachio-green hues blanket each side of this Premium Gem 1893 nickel. A few obverse stars lack full definition, but the corn ear to the left of the wreath bow is unusually well-defined. Population: 42 in 66 (2 in 66+), 1 finer (3/16). NGC ID# 2778, PCGS# 3854

3940 1894 MS65 PCGS. Intensely frosted luster illuminates Gem-quality surfaces on this 1894 Liberty nickel type coin, showing a few hints of light golden toning. Stars 1 and 2 are weak, but the corn ear to the left of the wreath bow shows slightly above-average definition. Population: 59 in 65 (2 in 65+), 41 finer (2/16). NGC ID# 2779, PCGS# 3855

**1895 Liberty Nickel, MS66+
One Finer Coin at PCGS**

3941 1895 MS66+ PCGS. CAC. This high-end Premium Gem exhibits sharply detailed design elements, with crisp definition on the elements in the lower wreath. The well-preserved, lustrous surfaces are blanketed in subtle shades of lavender-gray and greenish-gold toning, with outstanding eye appeal. Population: 27 in 66 (2 in 66+), 1 finer (3/16). NGC ID# 277A, PCGS# 3856

3942 1896 MS65 PCGS. CAC. The satiny surfaces display pale shades of champagne-gold and subtle lilac, while the strike is sharp except at stars 1 to 3 and at the lower left wreath and bowknot. Only tiny marks at the neck and chin are visible under magnification. CAC endorsed — a popular date, not often seen this nice. Population: 67 in 65 (2 in 65+), 23 finer (3/16). NGC ID# 277B, PCGS# 3857

3943 1897 MS66 PCGS. Sharply detailed in most areas, this delightful Premium Gem shows just a touch of the usual softness on the lower wreath. The virtually pristine surfaces radiate vibrant mint luster, with subtle hints of gold and lavender toning. Population: 22 in 66 (4 in 66+), 1 finer (3/16). NGC ID# 22PN, PCGS# 3858

**1900 Nickel, Sharp MS67
Tied for Finest Certified**

3944 1900 MS67 PCGS. The 1900 Liberty nickel is highly popular as a type coin, and rare Superb Gem examples are especially sought-after. This piece is one of only nine in this grade at PCGS, and none are finer at any service (3/16). Satiny luster displays golden toning over unabraded surfaces. The wreath and stars are boldly rendered. NGC ID# 22PS, PCGS# 3861

**1903 Liberty Nickel, MS67
Tied for Finest at PCGS**

3945 1903 MS67 PCGS. The 1903 Liberty nickel is a very rare issue at the MS67 grade level. This delightful Superb Gem exhibits sharply detailed design elements in most areas, with just a touch of softness on the lower wreath. The impeccably preserved surfaces display vibrant mint luster throughout, with a few hints of pale gold and lavender-gray toning. Population: 4 in 67, 0 finer (3/16). NGC ID# 277E, PCGS# 3864

3946 1904 MS66+ PCGS. CAC. The preservation of this golden-toned 1904 Liberty nickel is almost flawless — only a tiny tick on Liberty's cheek and another near the C in CENT prevent a full Superb Gem grade. The corn ear to the left of the bowknot and several obverse stars show characteristic softness of strike. None are finer at PCGS (3/16). NGC ID# 277F, PCGS# 3865

3947 1904 MS66+ PCGS. CAC. A splash of gold toning appears at the upper right obverse border of this Premium Gem. The design elements are boldly defined, and the surfaces exhibit frosty mint luster. NGC ID# 277F, PCGS# 3865

3948 1905 MS66+ PCGS. CAC. Wisps of tan toning overlie lustrous olive-gray surfaces. A pristine Liberty type representative. Only the left ear of corn lacks a bold strike. Virtually unobtainable any finer. NGC ID# 277G, PCGS# 3866

**1912-S Nickel, MS64+
Key San Francisco Issue**

- 3949 1912-S MS64+ PCGS.** This high-end Choice 1912-S nickel is somewhat better struck than one might expect for the issue, although general softness of the fine details is consistent with the issue's reputation as having been struck from fatigued dies. This coin shows satiny golden-gray luster and is free of major abrasions. NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, MS65
Final-Year, Low-Mintage Issue**

- 3950 1912-S MS65 PCGS.** From a final-year mintage of just 238,000 pieces, the 1912-S Liberty nickel is a key issue in this popular series. This impressive Gem features a better-than-average strike, with crisp detail on the corn ears in the wreath. The well-preserved, lustrous surfaces are blanketed in shades of greenish-gold and lavender-gray toning. PCGS has graded 32 numerically finer examples (2/16). NGC ID# 277R, PCGS# 3875

**1912-S Nickel, MS66
Among the Finest Certified**

- 3951 1912-S MS66 NGC.** The 1912-S Liberty nickel is one of the keys to the series, and a small number of Premium Gems are the finest known. This piece displays the usual glossy luster, with mildly iridescent golden-gray toning. Lightly struck along the right obverse border, as well as on the corn ear to the left of the bowknot, as is typical of this issue. Census: 13 in 66 (1 in 66+, 1 in 66 ★), 0 finer (3/16). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

- 3952 1884 PR67 PCGS.** A magnificent piece, tied with one other as the finest non-Cameo at PCGS (2/16). Even so, perceptible contrast is seen on each side through delicate pastel toning. The strike is bold, even on the corn ear to the left of the wreath bow. NGC ID# 22PV, PCGS# 3882

**1884 Liberty Nickel, PR67 Cameo
Untoned and Starkly Contrasted**

- 3953 1884 PR67 Cameo PCGS.** An important condition rarity, the present Superb Gem is silky-smooth from rim to rim. Razor sharp striking definition characterizes all features, and the warmly frosted devices contrast nicely with the deeply mirrored, glassy fields. Untoned. Population: 16 in 67 (3 in 67+) Cameo, 0 finer (2/16). Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 5877. NGC ID# 22PV, PCGS# 83882

- 3954 1885 PR65 NGC. CAC.** A CAC-approved Gem proof example of this popular issue, bearing the 1885 date, which is a key issue in the circulation strike series. This proof Liberty nickel is a sharp, more affordable alternative for the date collector. Reflective fields show light golden toning. NGC ID# 277T, PCGS# 3883

- 3955 1885 PR66 PCGS.** Due to the scarcity of comparably high-grade circulation strikes, this Premium Gem proof 1885 Liberty nickel will serve well as a date representative. The strike is sharp, and warm golden toning is overlaid atop modest field-motif contrast. PCGS lists 20 finer representatives (3/16). NGC ID# 277T, PCGS# 3883

- 3956 1886 PR66 PCGS. Breen-2542.** The 86 in the date is repunched. Pastel straw-gold toning visits this fully struck and lustrous specimen. Both sides are void of contact, and carbon is virtually absent. An outstanding Premium Gem of this popular low mintage date. NGC ID# 277U, PCGS# 3884

- 3957 1886 PR66 PCGS. CAC. Breen-2542.** The 86 in the date is repunched. Light to medium peach-red toning evenly adorns this flashy and fully struck specimen. A small spot near the L in LIBERTY is the sole imperfection. Minor retained laminations (as made) are noted on the lower right obverse field. Considered a semikey due to the low mintage of the accompanied circulation issue. NGC ID# 277U, PCGS# 3884

- 3958 1886 PR67 NGC. CAC. Breen-2542.** Pastel olive-green, lilac-red, and orange-gold shades enrich this lustrous and intricately struck Superb Gem. Minuscule carbon decides the grade. Housed in a former generation holder. Ex: *Dr. Carl A. Minning, Jr. Collection* (Bowers and Merena, 8/1999), lot 1238; *Eugene H. Gardner Collection, Part IV* (Heritage, 10/2015), lot 98103. NGC ID# 277U, PCGS# 3884

**1893 Nickel, PR67 Cameo
Profoundly Contrasted**

3959 1893 PR67 Cameo PCGS. A hint of bluish color enhances the brilliant surfaces of this dramatically contrasted Superb Gem Cameo proof nickel. The fields display profound mirroring, while an overlay of frost covers the predictably fully struck relief elements. Essentially pristine. The technical quality remains unsurpassed at the leading certification services. Population: 19 in 67 (2 in 67+) Cameo, 0 finer (3/16). NGC ID# 2783, PCGS# 83891

3960 1894 PR66 Cameo PCGS. The 4 in the date is recut north. This is a boldly contrasted proof with deep mirrors and richly frosted devices. The strike is sharp on both sides, with full details evident on the central elements. The coin displays brilliant silverlike color and a mere whisper of gold on the rims. A few milky freckles and a tiny hit on the cheek are the only marks of any note (and they are minor). A beautiful, lustrous Superb Gem nickel. Population: 21 in 66 (2 in 66+) Cameo, 10 finer (3/16). NGC ID# 5EJM, PCGS# 83892

3961 1894 PR66 Cameo PCGS. CAC. An important date in the Liberty nickel series, and this beautiful Premium Gem Cameo proof exhibits excellent field-to-device contrast on its brilliant light gray surfaces. Population: 21 in 66 (2 in 66+) Cameo, 10 finer (3/16). NGC ID# 5EJM, PCGS# 83892

**1894 Nickel, PR67 Cameo
Better-Date Proof**

3962 1894 PR67 Cameo PCGS. Some light toning bands of pale pinkish-gold on the obverse fail to impede the considerable cameo contrast on this Superb Gem, from a proof mintage of 2,632 pieces. The 1894 Liberty nickel is a slightly better date, although the effect on proofs is minor. This piece is well but incompletely struck, with some minor lumpiness in the central obverse from the planchet, as made.
Ex: Central States Signature (Heritage, 4/2011), lot 3096. NGC ID# 5EJM, PCGS# 83892

3963 1895 PR66+ PCGS. CAC. Warm champagne toning graces each side of this high-end Premium Gem Liberty nickel, showing a full strike and seemingly flawless fields. The combination of the Plus designation and the CAC green label is highly appealing, although this coin's modest field-to-device contrast is the cherry on top. Population: 22 in 66 (1 in 66+), 6 finer (2/16). NGC ID# 2785, PCGS# 3893

**1897 Liberty Nickel
PR66 Deep Cameo**

3964 1897 PR66 Deep Cameo PCGS. This Premium Gem Cameo proof Liberty nickel has deeply mirrored fields that frame its frosty and highly lustrous devices. Both sides are nickel-gray with no evidence of toning. This example is virtually as nice as they come. Population: 3 in 66 Deep Cameo, 1 finer (3/16). NGC ID# 2787, PCGS# 93895

**1898 Nickel, PR67 Cameo
Flashy and Brilliant**

3965 1898 PR67 Cameo PCGS. CAC. With 1,785 proofs minted, the 1898 consistently ranks among the most challenging issues in the Liberty Head nickel series. Each side of this Superb Gem Cameo proof features deeply reflective fields that produce dramatic contrast against the frosted motifs. It should come as no surprise that contact marks are essentially non-existent. Population: 9 in 67 (3 in 67+) Cameo, 0 finer (3/16). NGC ID# 2788, PCGS# 83896

**1901 Liberty Nickel, PR68
None Seen in Higher Numeric Grades**

3966 1901 PR68 NGC. This magnificent PR68 specimen is sharply detailed in most areas, with just a trace of softness on the lower stars and lower wreath. The surfaces are virtually pristine, with deeply reflective fields and highlights of greenish-gold toning. Eye appeal is tremendous. Census: 5 in 68 (3 in 68 ★), 0 finer (3/16). NGC ID# 278B, PCGS# 3899

**1903 Nickel, PR68 Cameo
Sharp and Contrasted**

3967 1903 PR68 Cameo NGC. The proof 1903 Liberty nickel is scarce in Cameo grades, and this high-end Superb Gem is tied with two others as the finest at NGC; only two Ultra Cameos are certified at that service, neither of which grades above PR67 (3/16). This piece is needle-sharp and starkly contrasted. A hint of light golden peripheral toning embraces the peripheries. NGC ID# 278D, PCGS# 83901

3968 1905 PR67 PCGS. A well struck and immaculate Superb Gem bathed in pastel rose-red and olive-green shades. Cameo contrast is minimal but the eye appeal is substantial. Population: 15 in 67, 1 finer (3/16). NGC ID# 278F, PCGS# 3903

**1906 Liberty Nickel, PR68 Cameo
Single-Finest Coin at NGC**

3969 1906 PR68 Cameo NGC. From a low mintage of 1,725 pieces, this magnificent proof exhibits razor-sharp definition on all design elements and the deeply mirrored fields set up bold cameo contrast with the frosty devices. The virtually pristine surfaces are visited by delicate shades of ice-blue and greenish-gold toning. Census: 1 in 68 Cameo, 0 finer (3/16). NGC ID# 278G, PCGS# 83904

3970 1907 PR67 PCGS. The hard nickel planchets caused no end of die problems for the Mint when coining both circulation strikes and proofs, yet this untuned Superb Gem proof seems wholly unaffected by such difficulties. The strike is pinpoint sharp, and the reflective fields frame a smooth, unmarked portrait of Liberty. The reverse displays equally reflective surfaces and a frosted wreath, with only slight haziness at the center. Neither PCGS nor NGC reports a coin in finer numerical grade. Population: 20 in 67 (1 in 67+), 0 finer (2/16). NGC ID# 278H, PCGS# 3905

**1907 Nickel, PR67 Cameo
Registry-Grade Proof**

3971 1907 PR67 Cameo NGC. Few proof nickels from this period were struck with any degree of field-device contrast, making Cameo 1907s scarce. This Superb Gem is tied for the finest certified and is rare as such. The strike is fully rendered, and the satiny design elements display soft golden toning. The mirroring in the fields is excellent. Census: 6 in 67 Cameo, 0 finer (3/16). NGC ID# 278H, PCGS# 83905

**1908 Nickel, PR67 Cameo
Multicolor Toning**

3972 1908 PR67 Cameo PCGS. Ex: Groman. A rare Superb Gem Cameo example of this otherwise plentiful proof Liberty nickel issue, showing needle-sharp definition throughout the portrait, stars, and wreath. The interiors exhibit dusky lavender-gray color, surrounded by vivid rainbow toning in the margins. Population: 6 in 67 (2 in 67+) Cameo, 1 finer (2/16). NGC ID# 278J, PCGS# 83906

BUFFALO NICKELS

3973 1913-S Type One MS66 PCGS. CAC. This first-year Premium Gem exhibits razor-sharp definition on all design elements, and the virtually pristine surfaces emit unbroken satiny mint luster, under delicate shades of ice-blue and pale gold toning. PCGS has graded 26 numerically finer examples (3/16). NGC ID# 22PY, PCGS# 3917

3974 1913 Type Two, Doubled Die Obverse, FS-1101, MS64 PCGS. This is a minor Buffalo nickel variety. Doubling is most evident on the date, visible to the south of the primary numerals. This Choice example displays satiny luster with warm golden-gray and lavender toning. The bison's shoulder exhibits trivial weakness. PCGS# 395052 Base PCGS# 3921

1913-S Buffalo Nickel, MS65
Popular Type Two Issue

- 3975** 1913-S Type Two MS65 PCGS. CAC. From a mintage of 1.2 million pieces, the 1913-S Type Two Buffalo nickel is seldom encountered in grades above the MS65 level. This attractive Gem exhibits bold definition on all design elements and the lustrous surfaces show only the most insignificant signs of contact. PCGS has graded 35 numerically finer examples (2/16). NGC ID# 22R3, PCGS# 3923

1913-S Type Two Buffalo Nickel, MS66
Vivid Multicolor Toning

- 3976** 1913-S Type Two MS66 PCGS. CAC. This spectacular Premium Gem features the popular Type Two design, with sharply detailed design elements and vibrant satiny mint luster throughout. The well-preserved surfaces are blanketed in vivid shades of greenish-gold and ice-blue toning, with a few delicate hints of lavender. Eye appeal is terrific. Population: 31 in 66, 4 finer (2/16). NGC ID# 22R3, PCGS# 3923

1913-S Type Two Nickel, MS66
Fully Lustrous and Well-Struck

- 3977** 1913-S Type Two MS66 PCGS. CAC. Fully lustrous with brilliant nickel-gray surfaces and wisps of pale rose toning. The faintest traces of peripheral gold color add to the overall eye appeal of this remarkable nickel. The design elements are well-struck, including the braid and bison's horn and tail. There are no mentionable marks or spots. Well-deserving of the CAC endorsement. Population: 31 in 66, 4 finer (2/16).
Ex: New York Signature (Heritage, 6/2005), lot 5274; Central States Signature (Heritage, 4-5/2009), lot 1470.
From The Indian Rocks Collection. NGC ID# 22R3, PCGS# 3923

- 3978** 1914/3 FS-101 AU58 NGC. CAC. According to the *Cherrypickers' Guide* "the overdate is seen as the straight top bar of an underlying 3 at the top of the 4, and the start of the diagonal of the 3 on the upper right outside of the 4." This pleasing near-Mint example shows just a trace of wear on areas like the bison's shoulder, and the lightly abraded bluish-gray surfaces display traces of satiny mint luster.
From The Indian Rocks Collection. NGC ID# 22R4, PCGS# 147844
 Base PCGS# 93924

1914 Nickel, Glistening MS67
Virtually Unimprovable Luster

- 3979** 1914 MS67 PCGS Secure. Glistening luster and frosty, virtually flawless surfaces denote the lofty Superb Gem grade of this 1914 Buffalo nickel — among the finest certified. Were the design elements a little sharper on their central high points, an MS68 designation or at least a Plus assignment might have been achieved. Some die erosion appears in the recesses, mostly in the reverse fields, which adds to the rugged attractiveness of the design. Glistening and toned in iridescent hues. Population: 28 in 67, 0 finer (3/16). NGC ID# 22R4, PCGS# 3924

- 3980** 1914-S MS65 PCGS. CAC. Well-defined with strong overall luster and hints of gold-to-green patina against a nickel-white base. The obverse fields show marvelous rugged texture. Scarce any finer.
Ex: FUN Signature (Heritage, 1/2007), lot 2248; Central States Signature (Heritage, 4/2007), lot 1586.
From The Indian Rocks Collection. NGC ID# 22R6, PCGS# 3926

1915-S Nickel, Well-Struck MS65

- 3981** 1915-S MS65 PCGS. A conditionally scarce example of this early San Francisco Buffalo, with finer representatives being exceedingly elusive. Mattelike luster illuminates well-preserved surfaces and uncommonly bold relief detail. A hint of lavender-gray toning accents each side. PCGS lists 38 finer 1915-S Buffalo nickels (2/16).
From The Indian Rocks Collection. NGC ID# 22R9, PCGS# 3929

1915-S Nickel, MS66
Rare With CAC Endorsement

- 3982 1915-S MS66 PCGS. CAC.** Premium Gem examples of the 1915-S Buffalo nickel are scarcely seen, and finer coins are extremely rare. However, with CAC-endorsement, this small population plummets even more. This piece is beautifully preserved with iridescent toning over satin surfaces. Trivial strike weakness is seen on the central high points. Population: 35 in 66, 3 finer; CAC: 8 in 66, 1 finer (2/16). *From The Indian Rocks Collection.* NGC ID# 22R9, PCGS# 3929

- 3983 1916 MS66+ PCGS. CAC.** 30th Anniversary Green Label Holder. This Plus-graded Premium Gem exhibits sharply defined design elements and impeccably preserved surfaces, with vibrant mint luster and a few highlights of lavender and pale gold toning. PCGS has graded 22 numerically finer examples (3/16). NGC ID# 22RA, PCGS# 3930

1916 Doubled Die Nickel, VG Details

- 3984 1916 Doubled Die Obverse — Environmental Damage — PCGS Genuine. VG Details.** The deep gray fields and lighter gray devices are moderately corroded on this important variety. However, the date is visible, including the doubling that is key to identification of the variety. NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931

1916-S Nickel, Delicately Toned MS66
Rarely Encountered Finer

- 3985 1916-S MS66 PCGS.** Available through MS64, the 1916-S Buffalo nickel becomes remarkably scarce in finer grades. This Premium Gem is rare, and only a handful of higher-grade coins are known. Some die erosion is seen in the fields, but the strike is nonetheless bold. Warm champagne toning over each side has interior tinges of ice-blue and lavender. Population: 37 in 66 (3 in 66+), 5 finer (2/16). *From The Indian Rocks Collection.* NGC ID# 22RC, PCGS# 3933

- 3986 1917-D MS65 PCGS.** A pleasing golden-toned Gem example, showing well-preserved surfaces and trivial high-point strike softness on the bison's shoulder. Die erosion is minimal over the interiors, although an interesting rim cud is seen on the reverse above OF AM(MERICA). Finer examples of the 1917-D are rare, with just 21 so-graded at PCGS (2/16). NGC ID# 22RE, PCGS# 3935

- 3987 1917-D MS65 NGC.** This Gem 1917-D nickel shows a few indications of isolated strike weakness but is certainly more boldly detailed than many of its counterparts from this poorly produced issue. Shining luster and multicolored pastel iridescence near the peripheries elevates the eye appeal. Well-preserved and free of distracting marks. Census: 51 in 65, 7 finer (2/16). *Ex: FUN Signature (Heritage, 1/2007), lot 2262.* *From The Indian Rocks Collection.* NGC ID# 22RE, PCGS# 3935

1917-D Nickel, Sharp MS65

- 3988 1917-D MS65 PCGS. CAC.** This is an unusually sharp 1917-D Buffalo nickel, displaying satiny luster and light golden toning. The obverse shows minor die erosion in the fields and recesses, but the reverse is from a fresh die and displays the corresponding clarity of detail. The '17-D is elusive in Gem condition, and PCGS has seen only 22 finer examples. CAC: 15 in 65, 3 finer (3/16). *From The Indian Rocks Collection.* NGC ID# 22RE, PCGS# 3935

1917-D Nickel, Colorful MS66
Only One Coin Finer at PCGS

- 3989 1917-D MS66 PCGS.** A splendid Premium Gem example with stunning, original rainbow toning and lustrous, satin-smooth surfaces. Minimal die erosion affects the sharp strike even at the borders, avoiding a common problem with this Denver issue. Gradations of gold, lime-green, and pink colors merge with lavender centers for tremendous eye appeal. Pieces are rarely seen this fine. Population: 21 in 66 (1 in 66+), 1 finer (3/16). NGC ID# 22RE, PCGS# 3935

- 3990 1917-S MS64 PCGS. CAC.** This satiny 1917-S nickel displays pastel champagne and lavender-gray hues over lustrous surfaces. Minor strike weakness on the bison's shoulder and the corresponding portion of the Indian's hair is less than often seen on this branch mint issue. The '17-S is available in this grade but infrequently seen finer. *From The Indian Rocks Collection.* NGC ID# 22RF, PCGS# 3936

- 3991 1917-S MS64 PCGS. CAC.** A boldly struck Choice example of this slightly better San Francisco issue, showing satiny luster and light golden toning. There are no significant abrasions, and eye appeal is pleasing. Finer coins are elusive and out of reach for many collectors. NGC ID# 22RE, PCGS# 3936

3992 1918 MS66 PCGS. CAC. A few faint grazes limit the grade on this champagne-toned 1918 Buffalo nickel. The strike is well-defined, and eye appeal is pleasing. Few examples of this issue are known finer. Population: 67 in 66 (1 in 66+), 9 finer; CAC: 8 in 66, 2 finer (3/16). NGC ID# 22RG, PCGS# 3937

3993 1918/7-D FS-101 VG8 NGC. A die struck from a 1917 hub was impressed a second time with a hub dated 1918, producing one of the most popular varieties in this widely collected series. Golden-olive hues accent silver-gray surfaces that retain much design detail. A collectible example for the specialist on a budget. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

3994 1918/7-D FS-101 VG10 NGC. The 1918/7 overdate is apparent despite considerable blending from circulation. A small diagnostic die crack appears above the tie on the braid. Silver-gray and olive tones color each side. The legends are clear, and the central devices maintain good detail. A lovely key date representative. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

3995 1918/7-D FS-101 Fine 12 PCGS. The crossbar and downstroke of the underdigit 7 is apparent despite 48 points of wear. Light nickel-gray surfaces retain a good amount of detail, and are quite clean for a coin that saw moderate circulation. This popular overdate is one of the keys to the Standing Liberty series. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

3996 1918-D MS64 PCGS. While not as scarce as its sibling the 1918-S Buffalo nickel, the 1918-D is elusive in its own right in higher Mint State grades. This piece shows little evidence of either contact or toning, but there is moderate evidence of die erosion that has produced only a middling strike on the highest points of each side. This is nonetheless an attractive and problem-free coin with a typical appearance for the issue. NGC ID# 22RH, PCGS# 3938

1918-D Buffalo Nickel, Seldom-Seen MS65 Impressive Strike and Luster

3997 1918-D MS65 NGC. A plentiful date in lower grades, the 1918-D Buffalo nickel is very scarce at the Gem level. This impressive MS65 NGC example exhibits well-detailed design elements and satiny mint luster, accompanied by hints of ice-blue toning and no mentionable surface marks. Census: 34 in 65 (1 in 65+, 2 in 65 ★), 5 finer (3/16).

From The Indian Rocks Collection. NGC ID# 22RH, PCGS# 3938

3998 1918-S MS63 NGC. This attractive Select Buffalo nickel exhibits well-detailed design elements with a touch of the usual softness on the hair above the braid and bison's shoulder. The lightly marked surfaces emit intense satiny mint luster. NGC ID# 22RK, PCGS# 3940

1918-S Nickel, MS64 Scarce in High Grades

3999 1918-S MS64 PCGS. Bright quicksilver luster appears under a layer of patina that ranges from sky-blue to gold-green and olive-bronze. The strike is soft at the inner portrait and the bison's shoulder, but the horn is complete. This deceptively challenging San Francisco nickel issue is a condition rarity any better; PCGS has certified 38 coins as MS65 or finer (2/16).

Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3168; Central States Signature (Heritage, 4/2012), lot 3634.

From The Indian Rocks Collection. NGC ID# 22RK, PCGS# 3940

4000 1919 MS66+ PCGS. CAC. Softly frosted luster illuminates warm champagne toning on this high-end Premium Gem 1919 Buffalo nickel. The central high points show trivial softness, but the border regions are bold. PCGS has seen only 18 finer representatives (3/16). NGC ID# 22RL, PCGS# 3941

1919-S Nickel, Pearlescent Near-Gem

4001 1919-S MS64 PCGS. CAC. The obverse is fully struck, while the reverse shows softness on the bison's head, shoulder, and tail — a common occurrence among 1919-S representatives. Softly frosted pearlescent surfaces are minimally marked for the Choice assessment, with small ticks well-hidden within the Indian's hair detail. Glints of rose and lavender appear throughout, furthering the eye appeal. PCGS lists just 34 submissions finer (2/16).

From The Indian Rocks Collection. NGC ID# 22RN, PCGS# 3943

4002 1920-D MS64+ PCGS. This high-end near-Gem exhibits an attractive light gold color on both sides along with scattered pinpoint brown toning. Each side displays small wispy die cracks, with strike doubling at LIBERTY and clash marks and evidence of die erosion appearing near 1 o'clock on the reverse.

From The Indian Rocks Collection. NGC ID# 22RR, PCGS# 3945

1920-S Nickel, MS64
Lovely Toning and Luster

- 4003 1920-S MS64 PCGS.** The rarity of Gem 1920-S Buffalo nickels sends many collectors in pursuit of attractive MS64 coins. This piece is free of noticeable abrasions and displays lovely pastel toning over each side. As is consistent with the issue, some minor softness is seen on the high points of the devices, but the overall eye appeal is outstanding. PCGS has seen only 23 finer submissions (2/16). *From The Indian Rocks Collection.* NGC ID# 22RS, PCGS# 3946

- 4004 1921 MS66+ PCGS.** This is a well-struck and well-preserved coin but with moderate die erosion in the fields and in the recesses of the motifs. Olive-gold toning with hints of peripheral iridescence occupies much of each side, although areas of ice-blue escape in the centers. PCGS lists 27 Superb Gems finer (3/16). NGC ID# 22RT, PCGS# 3947

1921 Nickel, Iridescent MS67
Tied for Finest

- 4005 1921 MS67 PCGS.** This otherwise available Buffalo nickel issue becomes a major rarity in MS67, the finest numeric grade achieved. This PCGS coin is a strong Registry candidate. Sharp detail defines the bison and Indian portrait, and the glistening surfaces are devoid of abrasions. Pastel lavender and ice-blue hues blend together over iridescent luster. Population: 27 in 67, 0 finer (2/16). NGC ID# 22RT, PCGS# 3947

1921-S Buffalo Nickel, MS64
Sharp Central Detail

- 4006 1921-S MS64 PCGS. CAC.** Close study with a lens fails to reveal any noteworthy abrasions on this near-Gem 1921-S Buffalo nickel, while the motifs are boldly rendered and each side displays a lovely blanket of mint-gold, lilac, and pale rose toning. The 1921-S is a recognized semikey date in all grades; pieces grading finer than MS64 and genuinely scarce. *From The Indian Rocks Collection.* NGC ID# 22RU, PCGS# 3948

- 4007 1923-S MS64+ NGC. CAC.** Steel-gray centers have gold-to-peach patina around. Though struck from substantially eroded dies, this piece has just a few more post-striking faults than to be called a Gem, but still glows with substantial appeal. CAC endorsed. NGC ID# 22RW, PCGS# 3950

1923-S Buffalo Nickel, Lightly Toned MS65
Strike and Condition Rarity

- 4008 1923-S MS65 PCGS.** The 1923-S Buffalo nickel is a well-known key and conditional rarity within the series, seldom seen finer than the Gem grade of the present piece and often exhibiting a miserable strike. PCGS reports only three examples in the Premium Gem level and none finer, underlining the importance of this Gem PCGS example. The strike here is actually fairly sharp, a bit more incisive on the obverse than on the reverse. Light patina and good luster complement a paucity of ticks, the sole mentionable one a small hit on the Indian's jawline. Population: 53 in 65 (2 in 65+), 3 finer (2/16). NGC ID# 22RW, PCGS# 3950

1923-S Nickel, MS65
Lightly Toned and Appealing

- 4009 1923-S MS65 PCGS.** The 1923-S is a slightly better Buffalo nickel issue, scarce in Gem condition and rarely seen finer. This coin displays moderately well-struck motifs, despite evidence of significant die erosion in the fields. Light champagne-gray and lavender-gold toning displays iridescent tendencies when tilted beneath a light. Population: 53 in 65 (2 in 65+), 3 finer (3/16). NGC ID# 22RW, PCGS# 3950

1924-S Nickel, MS65
A Challenging Issue in Mint Condition

- 4010 1924-S MS65 NGC.** The 1924-S is among the rarest Buffalo nickels in the finer (VF-AU) circulated grades. Unsurprisingly, Mint State survivors are also elusive. The surfaces are interestingly patinated, and this coin displays medium density rose-tan and ice-blue toning over both sides. The strike is stronger than usually seen on this difficult branch mint issue and there are no reportable abrasions. Census: 19 in 65, 5 finer (2/16).
Ex: Long Beach Signature (Heritage, 2/2003), lot 5975; FUN Signature (Heritage, 1/2011), lot 4446. NGC ID# 22RZ, PCGS# 3953

1924-S Nickel, MS65
Green CAC, Old Green Holder

- 4011 1924-S MS65 PCGS. CAC.** Perhaps even more remarkable than this S-mint nickel's impressive preservation is its strength of strike. In the *Item of the Week* column published in the July 31, 2007 edition of *Numismatic News*, Paul M. Green writes that issues such as the 1924-S "... were horribly made in many cases. The strikes are bad and much of the detail is lacking." This Gem offers a great exception to the rule, with boldness at both the centers and the margins. Luminous mustard and green-gold toning envelops each side but lets the naturally strong luster shine through. Housed in an old green label holder. Population: 40 in 65 (1 in 65+), 3 finer (2/16).
Ex: Central States Signature (Heritage, 4-5/2009), lot 2145. From The Indian Rocks Collection. NGC ID# 22RZ, PCGS# 3953

1925-D Buffalo Nickel, MS65
Exceptionally Sharp and Attractive

- 4012 1925-D MS65 PCGS. CAC.** The surfaces are smooth and satiny with faint shades of gold and lilac, struck from dies that were relatively unworn and not too widely spaced. Only minor weakness on the bison's shoulder is more than offset by the lustrous and unmarked surface quality. PCGS reports just 10 numerically finer coins (2/16). NGC ID# 22S3, PCGS# 3955

1925-D Buffalo Nickel, MS65
Eye-Appealing and Well-Struck

- 4013 1925-D MS65 PCGS. CAC. Ex:** The Dakota Collection. This gleaming Gem boasts a far-finer strike than normally seen on the 1925-D, which can be challenging to find with good appeal and a decent impression. This piece shows little evidence of contact and moderate pinkish accents near the rims. Definitely among the finest survivors. PCGS lists only 10 numerically finer representatives (2/16).
From The Indian Rocks Collection. NGC ID# 22S3, PCGS# 3955

1925-S Nickel, MS64
Seldom Seen Finer

- 4014 1925-S MS64 PCGS. CAC.** One of the key dates in Choice condition among regular issues in the Buffalo series, the 1925-S is also invariably found weakly struck on both sides. On this example, the obverse is a bit sharper than the reverse, with some notable softness on the highpoints but with the horn fully defined. The smooth, satiny luster is overlaid with a light coating of bluish-gray, with hints of golden and rose coloration in the protected areas. PCGS has seen 28 finer submissions (2/16).
Ex: Long Beach Signature (Heritage, 9/2003), lot 6185; Long Beach Signature (Heritage, 9/2004), lot 5975; FUN Signature (Heritage, 1/2005), lot 5896. From The Indian Rocks Collection. NGC ID# 22S4, PCGS# 3956

- 4015 1926 MS67 NGC.** This delightfully well-preserved, softly frosted 1926 Buffalo nickel was struck from two fresh dies and shows the appropriately smooth fields that are usually not seen due to die erosion. The strike is slightly soft on the central high points, but the eye appeal is hardly hindered. Census: 17 in 67 (1 in 67 ★), 1 finer (3/16). NGC ID# 22S5, PCGS# 3957

**1926-D Nickel, MS65+
Sharp and Attractive**

- 4016 1926-D MS65+ PCGS.** Like other denominations of this date and mint, the 1926-D Buffalo nickel is frequently seen with a poor strike. This high-end Gem is an exception to the rule, showing bold detail throughout the relief elements. Satiny luster displays original light golden toning, and there are no abrasions. Eye appeal far surpasses expectations for this issue. PCGS has seen 28 finer submissions (3/16).
From The Indian Rocks Collection. NGC ID# 22S6, PCGS# 3958

- 4017 1926-S AU55 PCGS.** The 1926-S Buffalo nickel is the only issue in the series with a mintage below 1 million pieces (970,000 coins), and is consistently elusive in Mint State. This Choice AU representative is a well-detailed, more affordable alternative. Both sides retain satiny luster beneath rich olive-gold patina. Trivial weakness on the bison's shoulder and the hair above the Indian's braid is from a combination of brief circulation and a mildly insufficient strike. NGC ID# 22S7, PCGS# 3959

**1927-S Nickel, Near-Gem
Elusive Branch Issue**

- 4018 1927-S MS64 NGC.** A collectible Choice example of this San Francisco issue, showing subtle satin luster with deep olive-gray toning. Hints of iridescence appear in the fields upon close examination. This piece is well-struck for the issue, showing moderate sharpness on the central high points. NGC has seen 28 finer submissions (3/16). NGC ID# 22SA, PCGS# 3962

**1927-S Nickel, MS64
Pleasing for the Grade**

- 4019 1927-S MS64 PCGS.** Like many branch mint issues in the Buffalo nickel series, the 1927-S is available in MS64 but decidedly elusive any finer. This piece displays above-average sharpness and smooth, satiny surfaces. Significant die erosion in the fields and evidence on the obverse of die lapping is not unusual for the issue. Both sides show light golden-gray toning. PCGS lists 36 finer representatives (2/16).
From The Indian Rocks Collection. NGC ID# 22SA, PCGS# 3962

1928-S Buffalo Nickel, Elusive MS65

- 4020 1928-S MS65 PCGS.** Light pastel toning including rose, gold, and pale sage enlivens both sides of this well-preserved and sharply struck Gem 1928-S nickel. This is a date that is likely underrated save for series specialists, but higher-graded examples seldom appear. This piece boasts a partial split tail and excellent eye appeal. Population: 80 in 65 (5 in 65+), 11 finer (3/16). NGC ID# 22SD, PCGS# 3965

**1928-S Nickel, Well-Struck MS65
Conditionally Elusive**

- 4021 1928-S MS65 PCGS.** The 1928-S is far scarcer in Gem condition than its mintage of nearly 7 million pieces would suggest. Finer coins are rare. This piece displays well-struck design elements, but the finer details are softened by die fatigue. Ice-blue and champagne toning accent each side. Eye appeal is pleasing. Population: 80 in 65 (5 in 65+), 11 finer (3/16).
From The Indian Rocks Collection. NGC ID# 22SD, PCGS# 3965

**1928-S Nickel, Well-Struck MS65
Elusive in Finer Grades**

- 4022 1928-S MS65 PCGS.** This is a boldly struck Gem 1928-S Buffalo nickel, although significant die erosion affects the reverse fields. Tail dies were frequently overused during the 1920s — particularly at the branch mints — in an effort to keep production costs down, resulting in many coins that show a fresh obverse and an eroded reverse. This piece is toned light golden and is free of major abrasions. Population: 80 in 65 (5 in 65+), 11 finer (3/16). NGC ID# 22SD, PCGS# 3965

- 4023 1930-S MS66+ PCGS.** 30th Anniversary Green Label Holder. This high-end Premium Gem exhibits well-detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show subtle highlights of ice-blue and greenish-gold toning. PCGS has graded six numerically finer examples (3/16). NGC ID# 22SJ, PCGS# 3970

- 4024 1931-S MS66+ PCGS.** This Plus-graded Premium Gem displays well-detailed design elements that show just a trace of the usual softness on the hair and bison's shoulder. The immaculate surfaces are blanketed in shades of ice-blue and champagne-gold toning, with satiny mint luster underneath. PCGS has graded six numerically finer examples (3/16). NGC ID# 22SK, PCGS# 3971

- 4025 1937-D Three-Legged, FS-901, AU58 NGC.** CAC. The highly lustrous surfaces are only lightly toned at the lower reverse and show much eye appeal. A few stray horizontal ticks on the bison appear but are far from overt. The Three-Legged Buffalo is a perennial favorite with collectors of all stripes, and this is an appealing grade for many of them. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 4026 1937-D Three-Legged, FS-901, AU58 PCGS.** CAC. Only a trace of wear shows on the design elements of this sought-after issue, with the bison's foreleg effaced by excessive die polishing. The lightly abraded surfaces retain traces of satiny mint luster, under shades of lavender-gray, ice-blue, and pale gold toning. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 4027 1937-D Three-Legged, FS-901, MS60 NGC.** Vibrant mint luster and delicate shades of ice-blue and champagne-gold toning are the calling cards of this important *Guide Book* and *Cherrypickers* variety. The surfaces show the minimum number of minor contact marks for the grade. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 4028 1937-D Three-Legged, FS-901, MS62 PCGS.** This extremely popular variety was created when excessive die polishing erased portions of the bison's foreleg. The present coin is a well-struck example, with a touch of softness apparent on the bison's shoulder and the Indian's hair. Attractive gold and ice-blue toning enlivens both sides of this pleasing MS62 specimen, with subtle satiny mint luster. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Buffalo Nickel
Attractive MS62**

- 4029 1937-D Three-Legged, FS-901, MS62 PCGS.** CAC. Visually far finer than one might expect for the grade, this 1937-D Three-Legged Buffalo nickel displays richly lustrous satin surfaces with unusually little evidence of contact outside of minor handling marks on the obverse portrait. As is diagnostic of this late-die-state variety, significant die erosion is seen on each side, but the strike shows little weakness. Light lavender-gold toning emerges throughout the surfaces. The CAC green label is fully warranted. From *The Indian Rocks Collection*. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Buffalo Nickel, MS63+
Sought-After Overdate Die Polishing Error**

- 4030 1937-D Three-Legged, FS-901, MS63+ PCGS.** CAC. A high-end Select specimen of this incredibly popular die polishing error, with well-detailed design elements and well-preserved surfaces, under shades of lavender, gray, ice-blue, and greenish-gold toning. Original mint luster shines through the patina. Overall eye appeal is quite strong. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 4031 1938-D Buffalo MS67+ PCGS.** CAC. Glistening luster and delicate lavender, ice-blue, and champagne toning deliver outstanding eye appeal on this high-end final-year Buffalo nickel type coin. Struck from eroded dies but with pleasing detail on the motifs. PCGS has seen 15 finer representatives (3/16). NGC ID# 22T2, PCGS# 3984

**1938-D/S Buffalo Nickel, MS68
Spectacular Multicolor Toning**

- 4032 1938-D/S FS-511 MS68 NGC.** A popular *Cherry-pickers'* variety, available in all grades but rarely as Superb as this impressive MS68 example. Tawny-gold toning merges with rainbow hues on both sides, with lime-green, red-gold, and lilac colors providing exceptional eye appeal. The dual mintmark is multiply punched D/D/D/S with an S initially impressed into the die, then subsequent D punches applied. This is a sharply struck and essentially unimprovable example. Census: 6 in 68 (1 in 68 ★), 0 finer (3/16). NGC ID# 22T3, PCGS# 38476 Base PCGS# 3985

PROOF BUFFALO NICKELS

**1913 Type One Buffalo Nickel, PR66
Sharp CAC-Approved Type Coin**

- 4033 1913 Type One PR66 PCGS. CAC.** A fully struck, seemingly flawless matte proof example of this one-year type, showing James Earle Fraser's original, bold relief Indian and bison design. Rich, matte luster is devoid of marks, and each side displays soft ice-blue and champagne toning. Although moderately plentiful in most grades, this Type One proof issue is highly sought-after in high grade. *From The Indian Rocks Collection.* NGC ID# 278R, PCGS# 3988

- 4034 1913 Type Two PR65 PCGS. CAC.** An exemplary example that offers a good strike and coruscating matte proof surfaces. A curly lint mark (as coined) on the nose provides the sole identifier. Both sides display light steel-gray toning. NGC ID# 278S, PCGS# 3990

**1913 Type Two Buffalo Nickel, PR66
Rich Color, Sharp Detail**

- 4035 1913 Type Two PR66 PCGS. CAC.** An outstanding coin in every respect, this Type Two Premium Gem proof Buffalo nickel displays razor-sharp detail and glistening matte luster. Both sides display ice-blue, champagne, and rich rose toning, with the latter color dominant on the reverse. The Type Two 1913 proof had a mintage similar to that of its Type One counterpart (1,514 pieces) and is comparably scarce in high grade. *From The Indian Rocks Collection.* NGC ID# 278S, PCGS# 3990

**1913 Type Two Buffalo Nickel, PR66
Lovely Strike and Color**

- 4036 1913 Type Two PR66 PCGS. CAC.** The razor-sharp design elements and rich matte luster of this Premium Gem Type Two proof Buffalo nickel deliver impressive eye appeal. Both sides are cast in iridescent champagne and lavender-blue hues. The CAC endorsement denies the intrusion of any bothersome marks. A premium matte proof type coin. NGC ID# 278S, PCGS# 3990

**1913 Type Two Nickel, PR67+
Sharp, Sculpted Appearance**

- 4037 1913 Type Two PR67+ PCGS. CAC.** The thick matte luster and tack-sharp design definition of this high-end Superb Gem proof captivate the eye, while a blush of champagne toning warms unmarked surfaces. The CAC endorsement only heightens the appeal. Few Type Two 1913 proofs survive in Superb Gem condition, and coins grading finer than the present piece are rare. Population: 57 in 67 (4 in 67+), 7 finer; CAC: 22 in 67, 7 finer (3/16). NGC ID# 278S, PCGS# 3990

- 4038 1914 PR66 NGC.** Deep peach patina dominates, but cedes to ice-blue across selected high points. A powerful loupe and a strong light fail to locate any imperfections. Exquisitely struck, and highly desirable in such quality. A mere 1,275 proofs were struck. Certified in a former generation holder.
Ex: *FUN Signature (Heritage, 1/2009)*, lot 880. NGC ID# 278T, PCGS# 3991

**1914 Nickel, Fully Struck PR66
Toned Matte Proof Type Coin**

- 4039 1914 PR66 PCGS. CAC.** The matte proof 1914 Buffalo nickel is a well-made issue, as this Premium Gem showcases. The strike is needle-sharp, and thick matte luster gives each side a medallion appearance. Hints of rose and mint-green intermingle with olive-gold on the surfaces. CAC: 33 in 66, 44 finer (3/16).
From *The Indian Rocks Collection*. NGC ID# 278T, PCGS# 3991

- 4040 1915 PR66 PCGS. CAC.** A pleasing matte proof with full strike definition and wonderfully smooth, untouched fields and devices. Light cream-gray obverse coloration turns to a deeper shade of wheat-gray mingled with pastel golden accents over the reverse.
From *The Indian Rocks Collection*. NGC ID# 278U, PCGS# 3992

**1915 Nickel, PR67
Splendid Iridescent Toning**

- 4041 1915 PR67 PCGS.** The 1915 Buffalo nickel has a mintage of 1,050 proofs, and enough examples survive through PR66 to satisfy the needs of most series specialists. Those who demand a Superb Gem proof will require patience, as the 1915 is very scarce in PR67 and extremely rare any finer. Splendid pale toning covers each side, including lilac, gold, and orange. As expected, design detail is needle-sharp. NGC ID# 278U, PCGS# 3992

**1916 Nickel, Lightly Toned PR67
Only 600 Matte Proofs Struck**

- 4042 1916 PR67 PCGS.** The 1916 is the key to the matte proof Buffalo nickel series, coming from a mintage of only 600 pieces. This Superb Gem survivor is a condition rarity, and finer pieces are exceedingly scarce. Razor-sharp design elements reside amid rich matte luster with a light golden overlay of toning. Population: 31 in 67 (2 in 67+), 7 finer (3/16).
From *The Indian Rocks Collection*. NGC ID# 278V, PCGS# 3993

- 4043 1936 Type One — Satin Finish PR66 PCGS.** The Satin finish proofs were not as popular as their brilliant Type Two counterparts in 1936, but they are better appreciated by present-day collectors. This sharply detailed Premium Gem offers virtually pristine surfaces under shades of greenish-gold and ice-blue toning. NGC ID# 278X, PCGS# 3994

- 4044 1936 Type One — Satin Finish PR67 PCGS. CAC.** Fully struck with reflective fields and satiny relief elements. This Superb Gem satin proof represents the first proof nickel coinage since the failed matte proof experiment of decades earlier. A hint of light golden toning graces each side.
From *The Indian Rocks Collection*. NGC ID# 278X, PCGS# 3994

**1936 Buffalo Nickel, PR68
Satin Finish Proof**

- 4045 1936 Type One — Satin Finish PR68 NGC.** Ex: M.L. Middleton Collection. This amazing Superb Gem represents the early proof strikings of 1936 with the satin finish, before the Mint reverted to the brilliant proof style that was used for much of their earlier (and later) history. This fully defined example is highly lustrous with gorgeous champagne toning on its light gray surfaces. Census: 30 in 68 (2 in 68 ★, 1 in 68+★), 0 finer (3/16). NGC ID# 278X, PCGS# 3994

- 4046 1936 Type Two — Brilliant Finish PR65 PCGS.** A hint of champagne iridescence graces the gleaming surfaces of this boldly rendered Gem brilliant proof. A beautifully preserved type coin from a mintage of just 4,420 proofs. Housed in an old green label holder. NGC ID# 278Y, PCGS# 3995

4047 1936 Type Two — Brilliant Finish PR66 PCGS. CAC. Proof coinage was resumed in 1936 and this delightful Premium Gem represents the Type Two variant, with a brilliant (rather than satiny) finish. The design elements are sharply detailed throughout and the fields are deeply mirrored.
From The Indian Rocks Collection. NGC ID# 278Y, PCGS# 3995

4048 1936 Type Two — Brilliant Finish PR66 PCGS. CAC. A spectacular Type Two proof with chromelike reflectivity and razor-sharp definition on all of the raised elements. An unquestioned Premium Gem, CAC endorsed, with claims to an even finer grade. One of 4,420 pieces struck upon resumption of proof mintages. NGC ID# 278Y, PCGS# 3995

4049 1937 PR66 PCGS. A gleaming silvery-blue example of the final proof Buffalo nickel issue. This Premium Gem is fully struck with pleasing eye appeal. The most plentiful of the three late-series proof issues, suitable for type purposes. NGC ID# 278Z, PCGS# 3996

4050 1937 PR67 PCGS. Mint-green and rose-pink iridescence emerges from beneath dusky lemon-gold toning over each side of this Superb Gem 1937 proof Buffalo. The strike is full, and the preservation is outstanding. PCGS lists 31 finer submissions (2/16). NGC ID# 278Z, PCGS# 3996

4051 1937 PR67 NGC. CAC. Mirrorlike fields give this sharp Superb Gem proof stellar eye appeal, while the near-brilliant surfaces are free of imperfections. This is the final proof issue of the Buffalo nickel series. Finer examples are infrequently available.
From The Indian Rocks Collection. NGC ID# 278Z, PCGS# 3996

4052 1937 PR67 PCGS. CAC. This magnificent Superb Gem exhibits razor-sharp definition on all design elements and the fields are deeply mirrored throughout. The impeccably preserved surfaces show a few highlights of greenish-gold toning. PCGS has graded 31 numerically finer examples (3/16).
From The Indian Rocks Collection. NGC ID# 278Z, PCGS# 3996

**1937 Buffalo Nickel, PR68
Seemingly Unimprovable**

4053 1937 PR68 PCGS. CAC. The second year after the resumption of proof coinage saw the Mint strike 5,769 nickel specimens, examples of which can be found with little searching through PR67. Proofs become rare at this remarkable grade level, where PCGS has seen 30 submissions in PR68 and a single coin finer (3/16). Brilliant surfaces show accents of blue and lack any evidence of contact even under magnification. Good for type. NGC ID# 278Z, PCGS# 3996

**1937 Buffalo Nickel, Brightly Toned PR68
Fresh-From-Mint Preservation**

4054 1937 PR68 PCGS. CAC. A proof mintage of 5,769 Buffalo nickels was well-received in 1937, the second year of modern proof coinage, and the last proof date for this popular design. In spite of the relatively small mintage, the 1937 is still the most available proof Buffalo nickel, as many examples were saved by collectors at the time of issue. Even so, the date is very scarce at the PR68 level. The present coin is a spectacular example, with brightly mirrored fields that illuminate spectacular multicolored iridescent toning. Radiant ice-blue tones yield to vibrant gold highlights and violet undertones. The design elements are fully brought up, and no flaws are visible to the naked eye. The outstanding visual appeal is attested by the CAC endorsement. Population: 30 in 68, 1 finer (2/16).
Ex: Central States Signature (Heritage, 4/2010), lot 2044; FUN Signature (Heritage, 1/2012), lot 5368. NGC ID# 278Z, PCGS# 3996

**1937 Buffalo Nickel, PR66 Cameo
Minimally Toned**

4055 1937 PR66 Cameo PCGS. CAC. Icy frost is evident throughout the Indian and bison of this minimally toned final-year proof Buffalo nickel. Both sides appear immaculate, and the strike is intricate aside from the customary slight incompleteness on the hair above the braid. Population: 5 in 66 Cameo, 7 finer (3/16).
Ex: Brenda John Collection/Summer FUN Signature (Heritage, 7/2010), lot 3408, which brought \$5,463; Orlando Signature (Heritage, 1/2012), realized \$4,169.
From The Indian Rocks Collection. NGC ID# 278Z, PCGS# 83996

JEFFERSON NICKELS

- 4056 1938 MS67 Full Steps PCGS.** This spectacular Superb Gem is sharply detailed throughout, with Full Steps definition on Monticello. The impeccably preserved lustrous surfaces show highlights of lavender-gray, and greenish-gold toning. Population: 22 in 67 (1 in 67+) Full Steps, 0 finer (3/16). NGC ID# 22T4, PCGS# 84000
- 4057 1939 Reverse of 1940 MS67+ Five Full Steps NGC.** A remarkable Superb Gem. The lustrous and lightly toned surfaces are virtually pristine, and strike is close to complete. As of (3/16), NGC has certified four pieces as MS67+ Five Full Steps, and four pieces as MS68 without a Full Steps designation. NGC ID# 22T8, PCGS# 894003

1939-D Nickel, MS67 Full Steps Among the Finest at NGC

- 4058 1939-D Reverse of 1938 MS67 Five Full Steps NGC.** The Reverse of 1938 shows indistinct, wavy steps on Monticello, a design flaw that was corrected on the Reverse of 1940. The 1939-D nickel is known in both varieties, neither particularly more rare than the other. This is a Registry-grade Reverse of '38 example, showing a bold strike and satiny champagne-toned luster. Census: 5 in 67 (1 in 67 ★) Full Steps, 0 finer (3/16). NGC ID# 22T9, PCGS# 84005

1939-D Nickel, MS67 Full Steps Reverse of 1938

- 4059 1939-D Reverse of 1938 MS67 Full Steps PCGS.** The ill-defined, wavy steps on Monticello identify the Reverse of 1938. Both this and the Reverse of 1940 variety are scarce in high-grade Full Steps. This Superb Gem is among the finest at PCGS. A hint of iridescence accents the satiny nickel-gray luster, and the preservation is outstanding — even Jefferson's cheek, which is often lightly marked — is pristine on this example. An exceptional Registry coin. Population: 8 in 67 (1 in 67+) Full Steps, 0 finer (3/16). NGC ID# 22T9, PCGS# 84005

- 4060 1940-D MS67+ Full Steps PCGS.** Although Superb Gems are frequently seen, the 1940-D Jefferson nickel is extremely rare in Plus-designated MS67, which is the finest level achieved and in high demand among Registry collectors. This piece displays a full strike and unabraded, satiny surfaces. Lovely rainbow toning forms concentric bands around each periphery with powder-blue and lavender-gold in the centers. PCGS has seen only three coins in MS67+, none finer (2/16). NGC ID# 22TE, PCGS# 84008

- 4061 1941 MS67+ Full Steps PCGS.** A magnificent Plus-graded Superb Gem, with razor-sharp design elements and Full Steps definition on Monticello. Attractive shades of lavender and greenish-gold toning visit the virtually pristine, lustrous surfaces. Population: 42 in 67 (6 in 67+) Full Steps, 0 finer (3/16). NGC ID# 22TG, PCGS# 84010
- 4062 1942-S MS67 Full Steps PCGS.** A Registry-grade example, among the finest in Full Steps at either service. This Superb Gem 1942-S is sharply struck and shows satiny silver luster with pastel iridescence over each side. The preservation is almost pristine. Population: 28 in 67 Full Steps, 0 finer (2/16). NGC ID# 22TN, PCGS# 84017

1943/2-P Jefferson Nickel, MS66 Full Steps Popular Doubled Die Obverse Overdate

- 4063 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS.** The obverse die was first hubbed with a 1942-dated hub and then rehubbbed with a 1943-dated hub, creating this popular doubled die obverse overdate. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces, with Full Steps definition on Monticello. Struck in wartime silver composition. Population: 41 in 66 (4 in 66+) Full Steps, 5 finer (3/16). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

1943/2-P FS-101 Nickel MS66+ Full Steps

- 4064 1943/2-P Doubled Die Obverse, FS-101, MS66+ Full Steps PCGS.** An outstanding representative of the popular World War II overdate. The strike is intricate and the lustrous surfaces show only a wisp of butter-gold toning. Marks are absent, although the lower reverse field exhibits trivial mint-made laminations. Population: 43 in 66 (4 in 66+) Full Steps, 5 finer (3/16). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

**1944-D Nickel, MS68 Full Steps
Remarkable Top-Tier Registry Coin
Captivating Eye Appeal**

- 4065 1944-D MS68 Six Full Steps NGC.** Tied for the finest 1944-D Jefferson nickel known, this Registry-grade high-end Superb Gem is one of only two MS68 NGC coins with Six Full Steps (one in MS68 ★ Six Full Steps) (2/16). A loupe fails to reveal a single surface flaw. Warm sun-gold toning encompasses the margins, leaving lighter lavender-gray over the interiors. NGC ID# 26NM, PCGS# 74023

- 4066 1945-P MS67+ PCGS.** 30th Anniversary Green Label Holder. The virtually pristine surfaces of this Plus-graded Superb Gem show vivid shades of greenish-gold and lavender toning, with a few specks of amber on the reverse. The design elements are well-detailed and eye appeal is tremendous. Population: 52 in 67 (11 in 67+), 0 finer (3/16). NGC ID# 22TX, PCGS# 4025

**1945-S Nickel, MS67 Full Steps
Tied for Finest Certified**

- 4067 1945-S MS67 Full Steps PCGS.** The San Francisco Mint struck nearly 59 million Jefferson nickels in 1945, and survivors are among the most elusive of the wartime issues with Full Steps. That said, examples can be located in MS65 and MS66 without much difficulty. Superb Gems, however, are very rare and highly sought after by Registry Set builders. This top-graded nickel features glimpses of violet, blue, green, and gold over frosty, largely brilliant surfaces. A few minute ticks are unimportant. Population: 14 in 67 (2 in 67+) Full Steps, 0 finer (3/16). NGC ID# 22TZ, PCGS# 84027

**1945-S Nickel, MS67 Full Steps
Few Known So Fine**

- 4068 1945-S MS67 Full Steps PCGS.** This final silver alloy issue is rare at the Superb Gem Full Steps level. This piece is among the finest certified, displaying frosty luster and a hint of champagne toning. Monticello clearly shows five complete steps. An essential Registry Set acquisition. Population: 13 in 67 (2 in 67+) Full Steps, 0 finer (2/16). NGC ID# 22TZ, PCGS# 84027

**1945-S Nickel, MS67 Full Steps
Among the Finest Certified**

- 4069 1945-S MS67 Full Steps PCGS.** A rare Superb Gem Full Steps example of this final silver-alloy nickel issue. The strike is bold, and the frosty surfaces display a bluish light golden toning. This piece is among the finest certified, an essential acquisition for Registry purposes. Population: 14 in 67 (2 in 67+) Full Steps, 0 finer (3/16). NGC ID# 22TZ, PCGS# 84027

**1945-S Nickel, MS67+ Full Steps
Tied for Finest Certified**

- 4070 1945-S MS67+ Full Steps PCGS.** This Plus-graded Superb Gem 1945-S Jefferson nickel is tied for the finest certified, an essential Registry Set acquisition. It is even finer than the piece in the current highest-rated Registry Set, even if only by the margin of the ever-coveted Plus designation. Both sides are sharp and pristine, showing a bluish of iridescent champagne-gold toning. Population: 14 in 67 (2 in 67+) Full Steps, 0 finer (3/16). NGC ID# 22TZ, PCGS# 84027

**1946-D Over Inverted D Nickel
MS66, FS-501**

- 4071 1946-D D Over Inverted D, FS-501, MS66 PCGS.** Beautifully patinated in alternating swirls of apricot-gold and powder-blue. A thoroughly lustrous and refreshingly unabraded Premium Gem. The strike is sharp and shows only slight blending on the base of the steps. The mintmark was initially entered inverted, and the curve from the first impression is apparent west of the mintmark upright. NGC ID# 22U3, PCGS# 38507 Base PCGS# 94029

**1946-D/D Nickel, MS66+ Full Steps
D Over Inverted D**

- 4072 1946-D/D D Over Inverted D, FS-501, MS66+ Full Steps PCGS.** This popular *Cherrypickers'* variety shows the mintmark repunched over a previous, inverted D. The present coin is tied for the finest FS-501 coin attributed by the grading services. The strike is bold, and the satiny surfaces display warm golden-gray toning. Population: 11 in 66 (3 in 66+) Full Steps, 0 finer (3/16). NGC ID# 22U3, PCGS# 38508 Base PCGS# 894029

**1954-D Nickel, MS66 Full Steps
Tied for Finest Certified**

- 4073 1954-D MS66 Full Steps PCGS.** The 1954-D nickel is scarce in Full Steps, and Gems are particularly elusive. This MS66 coin is tied with one other as the finest at PCGS, an essential Registry Set acquisition (3/16). The strike is sharp, and the satiny surfaces display a hint of champagne and lavender toning. NGC ID# 22UT, PCGS# 84053

**1955-D Nickel, MS65+ Full Steps
Important Registry Offering**

- 4074 1955-D MS65+ Full Steps PCGS.** The 1955-D is widely available through MS66 without Full Steps. However, survivors with Full Steps are surprisingly elusive across the grade spectrum. Gleaming satin luster swirls over the untuned surfaces of this high-end Gem Jefferson nickel. Tiny ticks scattered over each side are minimal, and they fail to diminish the importance of this offering for the dedicated Registry enthusiast. Population: 6 in 65 (1 in 65+) Full Steps, 1 finer (3/16). NGC ID# 22UW, PCGS# 84057

- 4075 1956 MS66+ Full Steps PCGS.** A boldly struck olive-gray and almond-gold representative. The shimmering surfaces are essentially devoid of contact. Housed in a new green label holder. Population: 52 in 66 (2 in 66+) Full Steps, 2 finer (2/16). NGC ID# 22UY, PCGS# 84059

- 4076 1956 MS67 Five Full Steps NGC.** Rose and lime iridescence graces the highly lustrous surfaces of this sharply impressed Superb Gem. A remarkable example with great eye appeal. Census: 3 in 67 Full Steps, 0 finer (3/16). NGC ID# 22UY, PCGS# 84059

**1958 Jefferson Nickel, MS66 Full Steps
Single-Finest Full Steps Example**

- 4077 1958 MS66 Full Steps PCGS.** This magnificent Premium Gem is the single-finest certified 1958 Jefferson nickel with the Full Steps designation at either of the leading grading services (2/16). The design elements are sharply detailed throughout and the immaculate, lustrous surfaces are blanketed in shades of greenish-gold and lavender toning. Eye appeal is tremendous. NGC ID# 22V4, PCGS# 84063

- 4078 1959 MS66+ Full Steps PCGS.** This high-end Premium Gem displays spectacular shades of greenish-gold and magenta toning, with sharply detailed design elements, including Full Steps definition on Monticello. Population: 39 in 66 (2 in 66+) Full Steps, 1 finer (3/16). NGC ID# 22V6, PCGS# 84065

SMS JEFFERSON NICKEL

- 4079 1966 SP67 Deep Cameo PCGS.** Since no proofs were minted from 1965 to 1967, these coins are not described as such, but are called Specimens. However, this piece has every earmark of a proof strike, with excellent contrast between the deeply mirrored fields and lustrous devices. Population: 17 in 67 Deep Cameo, 1 finer (3/16). NGC ID# 27AE, PCGS# 94198

PROOF JEFFERSON NICKELS

1939 Jefferson Nickel, PR67 Popular Reverse of 1940

- 4080** 1939 Reverse of 1940, FS-901, PR67 PCGS. The scarcer Reverse of 1940 is identified by the strengthening of the steps on Monticello at the sides. This spectacular Superb Gem proof exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces show reflective fields with highlights of greenish-gold toning. Population: 53 in 67 (4 in 67+), 1 finer (2/16). NGC ID# 2TR4, PCGS# 38534 Base PCGS# 94176

- 4081** 1940 Reverse of 1938, FS-901, PR67 PCGS. Cherrypickers' refers to the proof "Wavy Steps" 1940 nickel as "an extremely rare variety." It was apparently struck with a leftover reverse die, made prior to the advent of the Straight Steps hub, which occurred circa mid-1939. Brilliant and sharply struck with glassy fields and one or two minute flecks on each side. NGC ID# 279Y, PCGS# 38540 Base PCGS# 94177

1942 Jefferson Nickel, PR68 Among the Finest Type One Examples

- 4082** 1942 Type One PR68 PCGS. The Type One 1942 Jefferson nickel was struck in the older, pre-wartime nickel composition. This virtually pristine PR68 example displays deeply reflective fields and razor-sharp design elements, with attractive highlights of greenish-gold toning at the centers. Visual appeal is tremendous. Population: 18 in 68, 0 finer (2/16). NGC ID# 27A3, PCGS# 4179

1942 Jefferson Nickel, PR68 Type One, None Certified Finer

- 4083** 1942 Type One PR68 PCGS. CAC. Later in the year Jefferson nickels were produced on wartime silver composition planchets, but this coin was struck with the older nickel composition. The immaculate surfaces show just a few hints of greenish-gold toning to set off the sharply detailed design elements and deeply reflective fields. Population: 18 in 68, 0 finer (2/16). NGC ID# 27A3, PCGS# 4179

1942 Type One Jefferson Nickel, PR68 None Finer at PCGS

- 4084** 1942 Type One PR68 PCGS. CAC. This magnificent proof Jefferson nickel was struck in the standard pre-wartime nickel composition. The design elements exhibit razor-sharp definition throughout and the virtually perfect surfaces show a few highlights of greenish-gold toning at the peripheries. The fields are deeply reflective and eye appeal is terrific. Population: 18 in 68, 0 finer (2/16). NGC ID# 27A3, PCGS# 4179

1942-P Type Two Nickel, PR68 Iridescent Patina

- 4085** 1942-P Type Two PR68 PCGS. Iridescent golden-orange, violet, blue, and green patina blankets each side of this amazing wartime Jefferson nickel proof. The resulting eye appeal is tremendous, matching the nearly unimprovable technical quality. The 1942-P was struck to the extent of 27,600 proofs, few of which can equal this Superb Gem. Population: 13 in 68, 1 finer (3/16). NGC ID# 27A4, PCGS# 4180

**1950 Nickel, PR68 Cameo
Tied With One Other for Finest at PCGS**

- 4086 1950 PR68 Cameo PCGS.** The 1950 is the first postwar proof issue in the Jefferson nickel series. High-end Cameos are elusive, and this PR68 coin is tied with only one other as the finest at PCGS (3/16). The strike is full, and contrast is outstanding. Both sides show a light golden hue. A few rare Deep Cameos exist at PCGS, but none have achieved the PR68 numeric level. NGC ID# 27A5, PCGS# 84182

**1954 Nickel, PR68 Deep Cameo
Among the Finest at PCGS**

- 4087 1954 PR68 Deep Cameo PCGS.** The 1954 proof nickel is rarely seen in Deep Cameo, and this PR68 piece is among the finest at PCGS. The untuned, chrome-gray surfaces display stark white-on-black contrast and beautiful preservation. The Registry Set collector would likely be unable to locate a finer example. Population: 10 in 68 (1 in 68+) Deep Cameo, 0 finer (3/16). NGC ID# 27A7, PCGS# 94186

**1956 Jefferson Nickel, PR68 Deep Cameo
Outstanding Registry Set Contender**

- 4088 1956 PR68 Deep Cameo PCGS.** This magnificent Jefferson nickel is just a whisper away from technical perfection, with fully struck design elements and deeply reflective fields that contrast profoundly with the frosty devices. A few delicate hints of pale gold toning enhance the terrific visual appeal. Population: 9 in 68 Deep Cameo, 0 finer (2/16). NGC ID# 22YG, PCGS# 94188

**1956 Jefferson Nickel, PR68 Deep Cameo
Tied for Finest at PCGS**

- 4089 1956 PR68 Deep Cameo PCGS.** PCGS records only two dozen Deep Cameo examples of this proof issue, this piece being one of 10 tied for finest (3/16). The frosty devices showcase razor-sharp detail and contrast starkly with the fully mirrored fields. A couple of wisps of light golden toning across the obverse preclude full brilliance. The surfaces are virtually flawless.
Ex: *New York Signature (Heritage, 10/2015)*, lot 3120, which sold for \$3,525. NGC ID# 22YG, PCGS# 94188

- 4090 1959 PR68 Deep Cameo PCGS.** The 1959 proof Jefferson nickel is seldom encountered with Deep Cameo contrast, but this magnificent PR68 example shows a stunning cameo flash when the coin is tilted in the light. The razor-sharp, frosty design elements are set off dramatically by the flawless, deeply mirrored fields. Population: 19 in 68 Deep Cameo, 1 finer (3/16). NGC ID# 27A9, PCGS# 94191

- 4091 1971 No S, FS-501, PR69 Cameo PCGS.** A fully white and immaculate specimen that boasts icy motifs and glassy fields. A Philadelphia Mint worker failed to enter the mintmark on a single proof 1971 obverse nickel die, and the error was not caught at San Francisco upon delivery, or after production. PCGS# 569931 Base PCGS# 84204

- 4092 1981-S Type Two, FS-501, PR70 Deep Cameo PCGS.** The open loops of the mintmark confirm the scarcer Type Two variety. A pristine and boldly struck specimen with light chestnut-gold toning and blatant cameo contrast. Population: 31 in 70 Deep Cameo, (3/16). PCGS# 571730 Base PCGS# 94216

MERCURY DIMES

- 4093 1916 MS67 Full Bands PCGS.** This Superb Gem Full Bands 1916 Mercury dime was no doubt among the pieces set aside in the year of issue as a novelty representative of the new design. Daubs of aquamarine toning appear around the borders, while the interiors are light golden. The strike is sharp, and luster is vibrant. PCGS lists 11 finer representatives in Full Bands (2/16). NGC ID# 23GX, PCGS# 4905

- 4094 1916-D Fine 12 PCGS. CAC.** A problem-free, attractive 1916-D in the collectible Fine 12 grade. This piece displays battleship-gray surfaces with hints of lavender-gold toning in the fields. The budget-conscious collector will recognize the scarcity of this key issue in the middle circulated grades. CAC-endorsed in a green label holder. NGC ID# 23GY, PCGS# 4906

**1916-D Mercury Dime, VF Details
Still-Pleasing Collector Coin**

4095 1916-D — Cleaning — PCGS Genuine. VF Details. The 1916-D is the only true “stopper” in the Mercury dime series, the one hole in the album that often does not get filled. This lightly cleaned midgrade example is suitable for the average collector of this popular series, particularly if the coin will be placed in a traditional album. The design elements show light wear, and the surfaces exhibit steel-gray patina. Scattered hairlines preclude a numeric grade. NGC ID# 23GY, PCGS# 4906

4096 1916-S MS66 Full Bands PCGS. Light golden toning warms glistening luster on each side of this Premium Gem first-year Mercury dime. The strike is fully rendered, and the preservation is outstanding. PCGS has seen only 22 finer examples of this San Francisco issue (2/16). NGC ID# 23GZ, PCGS# 4909

4097 1917-D MS66 PCGS. Russet and sea-green peripheral hues frame golden interiors on this Premium Gem 1917-D Mercury dime. The obverse is boldly rendered, the reverse slightly soft on the fasces bands. There are no major abrasions. Few examples of this issue are known so fine, with or without a Full Bands designation. Population: 4 in 66, 1 finer (2/16). NGC ID# 23H3, PCGS# 4912

4098 1917-S MS66 Full Bands PCGS. Bold detail is the hallmark of this piece, although the 1917-S dime is also conditionally scarce at the Premium Gem level; finer pieces are rare. This coin displays subtle champagne toning, and there are no significant abrasions. Population: 66 in 66 (1 in 66+) Full Bands, 12 finer (2/16). NGC ID# 23H4, PCGS# 4915

**1917-S Mercury Dime, MS67 Full Bands
Among the Finest Known at PCGS**

4099 1917-S MS67 Full Bands PCGS. The mintage of more than 27.3 million pieces was an all-time record for the single-year production of dimes at the San Francisco Mint that was not surpassed until 1941. As a result, the 1917-S is readily available in circulated grades but gets progressively scarcer in Mint State. This Superb Gem example is tied for numerical finest at PCGS among coins with Full Bands. Lustrous, silver-lilac surfaces show a few faint hints of gold. A sharp and attractive dime, conditionally rare. Population: 12 in 67 Full Bands, 0 finer (2/16). NGC ID# 23H4, PCGS# 4915

4100 1918 MS66 Full Bands PCGS. Particularly attractive, frosty luster rolls over beautifully preserved surfaces on this Premium Gem Full bands 1918 dime, showing rose-tinted golden toning. Some die erosion is seen in the form of flowlines in the fields, but the central devices are nonetheless sharp. Population: 51 in 66 Full Bands, 4 finer (2/16). NGC ID# 23H5, PCGS# 4917

4101 1918-D MS62 Full Bands PCGS. CAC. This early branch mint representative is well struck and exhibits rich gunmetal-gray and chestnut-gold toning. Satiny and unmarked with an interesting obverse radial die crack at 6 o'clock.
Ex: New York Signature (Heritage, 3/2012), lot 3275, which realized \$690. NGC ID# 23H6, PCGS# 4919

4102 1919-D MS62 Full Bands PCGS. This sharply detailed piece exhibits brilliant silver surfaces and frosty luster with splashes of gold and steel toning near the borders. NGC ID# 23H9, PCGS# 4925

4103 1919-D MS63 Full Bands NGC. Boldly struck, despite the obverse die cracking in several places. Mottled olive-gold and rose toning appears over each side, while the underlying surfaces display luminous luster. There are surprisingly few abrasions for the grade. *From The Indian Rocks Collection.* NGC ID# 23H9, PCGS# 4925

4104 1919-D MS63 Full Bands PCGS. Fully brilliant silver surfaces show a trace of delicate gold through the reverse legend on this Select Mint State piece. Both sides have exceptional details, including bold hair detail on the obverse and the full bands of the reverse. NGC ID# 23H9, PCGS# 4925

4105 1920 MS67 Full Bands PCGS. CAC. The central devices are razor-sharp on this top-grade Registry coin, although the lower obverse and upper reverse rims are curiously weak. Blended lavender-gold, sky-blue, and mint-green hues adorn each side amid frosty luster and stellar preservation. Population: 28 in 67 Full Bands, 0 finer (3/16). NGC ID# 23HB, PCGS# 4929

4106 1920-D MS66 NGC. Sharply detailed in most areas, this delightful Premium Gem exhibits a little softness on the center bands of the fasces. The impeccably preserved brilliant surfaces radiate vibrant mint luster throughout. Census: 14 in 66, 2 finer (3/16). *From The Indian Rocks Collection.* NGC ID# 23HC, PCGS# 4930

4107 1920-D MS65 Full Bands PCGS. In Full Bands, the 1920-D Mercury dime becomes conditionally scarce above MS64. This Gem example displays warm golden toning over satiny luster. The central devices are sharp, while the peripheral legends are slightly weak around portions of their outer edges. Population: 50 in 65 Full Bands, 24 finer (2/16). NGC ID# 23HC, PCGS# 4931

4108 1920-S MS63 Full Bands PCGS. A satin-silver representative of this somewhat challenging early mintmarked dime, with a few speckles of light blue-gray toning on the obverse. While the centers display a sharp strike, the peripheral elements are weakly struck in spots, particularly at STATES OF AMERICA on the reverse. Only a few tiny marks exist on this lustrous, Select example. NGC ID# 23HD, PCGS# 4933

4109 1920-S MS64 Full Bands PCGS. Lustrous and splendidly preserved with delicate powder-blue and olive-gold toning. The major devices are crisply struck, though the legends display minor fadeaway near the rims. The fields exhibit vertical die polish lines, most prominent above PLURIBUS. NGC ID# 23HD, PCGS# 4933

**1920-S Mercury Dime, MS65 Full Bands
Rare This Sharp**

- 4110 1920-S MS65 Full Bands PCGS.** The Full Bands designation is a notable feather in the cap for any 1920-S, but the equally sharp portrait of Liberty and a bold strike on all four digits of the date add extra credit. Eye appeal is outstanding, with iridescent colors across the smooth surfaces on both sides enriched by blue, violet, and pale-gold shades. A few tiny nicks on the diagonals and two or three faint lines on the portrait are visible with a lens. The letters of STATES show minor flatness near the rim. Population: 34 in 65 (1 in 65+) Full Bands, 12 finer (2/16). NGC ID# 23HD, PCGS# 4933

**1921 Dime, MS64 Full Bands
Pleasing Luster and Surfaces**

- 4111 1921 MS64 Full Bands PCGS. CAC.** Satiny luster glows beneath warm champagne-gray toning on this Choice Full Bands 1921 Mercury dime. There are no bothersome abrasions, and the eye appeal is pleasing. The 1921 is one of the semikeys of the series, elusive in the finer Full Bands levels. CAC: 11 in 64, 31 finer (3/16). From *The Indian Rocks Collection*. NGC ID# 23HE, PCGS# 4935

**1921 Dime, MS65 Full Bands
Bold Obverse Peripheral Toning**

- 4112 1921 MS65 Full Bands NGC.** A highly appealing Gem with ivory surfaces and frosty luster. The obverse has deep russet and iridescent toning at the periphery, and the reverse is faintly iridescent. A key-date in the series, although not in the same rarity category as the 1916-D issue. Ex: *Long Beach Signature* (Heritage, 6/2006), lot 1191. NGC ID# 23HE, PCGS# 4935

**1921 Dime, MS65 Full Bands
Frosty Luster, Lightly Toned**

- 4113 1921 MS65 Full Bands PCGS.** A Gem Full Bands example of this semikey-date Mercury dime, showing a hint of champagne toning over frosty luster. The interior design elements are bold, although the reverse rims are weak in places. After the 1916-D, the 1921 and '21-D are the only regular issue keys in the series. Examples of the 1921 grading finer than this Gem are scarce. NGC ID# 23HE, PCGS# 4935

**1921-D Dime, MS66 Full Bands
Only Three Coins Finer at NGC**

- 4114 1921-D MS66 Full Bands NGC. CAC.** From a low mintage of just more than 1 million pieces, the 1921-D Mercury dime is very rare in Premium Gem condition with the Full Bands designation. The present coin is a sharply detailed Premium Gem with a touch of softness on some of the peripheral lettering. The lustrous surfaces display wisps of pale green and ice-blue patina, with specks of amber. Census: 14 in 66 Full Bands, 3 finer (3/16). Ex: *Long Beach Signature* (Heritage, 6/2011), lot 3387. NGC ID# 23HE, PCGS# 4937

- 4115 1923-S MS64 Full Bands NGC.** This impressive Choice example displays sharp definition on all design elements, including full split bands on the fasces. The well-preserved, brilliant surfaces radiate vibrant mint luster and eye appeal is terrific. Census: 31 in 64 (1 in 64+) Full Bands, 13 finer (3/16). From *The Indian Rocks Collection*. NGC ID# 23HH, PCGS# 4941

- 4116 1923-S MS64 Full Bands PCGS.** Splashes of light gold toning enhance the lustrous surfaces of this frosty Choice Mint State 1923-S dime. The strike is bold as the Full Bands designation indicates. PCGS has only certified 44 finer Full Bands examples (3/16). NGC ID# 23HH, PCGS# 4941

1923-S Dime, MS65
Challenging S-Mint With Full Bands

4117 1923-S MS65 Full Bands PCGS. A distinctive olive-gold patina blankets the obverse — and to a lesser extent, the reverse — of this Gem 1923-S. A rare S-Mint from the 1920s with Full Bands, the coin shows a consistently sharp strike on all of the raised elements including the date, Liberty's wings and curls, and the reverse legend. Scarce as a date as well as a strike rarity, this San Francisco issue is nearly unobtainable any finer. Lustrous and well-preserved. Population: 39 in 65 (1 in 65+) Full Bands, 5 finer (2/16). NGC ID# 23HH, PCGS# 4941

4118 1924 MS66+ Full Bands PCGS. Although moderately available in MS66, the 1924 dime in Full Bands is seldom seen finer. This Plus-graded example displays lovely gold toning over frosty luster and bold relief elements. The fields are slightly flowlined from die erosion. PCGS lists 37 finer coins (2/16). NGC ID# 23HJ, PCGS# 4943

1924 Dime, MS67 Full Bands
Among the Finest at PCGS

4119 1924 MS67 Full Bands PCGS. The certified population of the 1924 Mercury dime in the Full Bands category declines significantly between MS66 and MS67, and finer pieces are almost uncollectible. This stellar representative exhibits well-struck motifs and clean surfaces. Ice-blue luster shows tinges of lemon-gold near the borders, granting excellent eye appeal. Population: 41 in 67 (1 in 67+) Full Bands, 0 finer (3/16). NGC ID# 23HJ, PCGS# 4943

4120 1924-D MS65 Full Bands PCGS. Gem examples of the 1924-D Mercury dime are far scarcer than their P-mint counterparts, but many times more available than comparable 1924-S coins. The brilliant surfaces of this MS65 Full Bands dime boast bold devices and satiny mint luster. A loupe reveals a couple of grade-limiting ticks well-hidden over the fascies. NGC ID# 23HK, PCGS# 4945

4121 1924-D MS66 Full Bands PCGS. CAC. This 1920s Denver issue is elusive in high-grade Full Bands. The present Premium Gem example is particularly scarce. The strike is full throughout, and the satiny surfaces yield light golden toning. There are no major abrasions. Population: 38 in 66 Full Bands, 9 finer (2/16). NGC ID# 23HK, PCGS# 4945

1924-S Dime, MS64 Full Bands
Excellent Luster, Rare Any Finer

4122 1924-S MS64 Full Bands PCGS. The 1924-S is an elusive Mercury dime issue in Full Bands, and such coins are rare above MS64. This Choice example is boldly rendered on the interior devices and displays vibrant luster with rose-gold toning in the margins. The outer obverse periphery shows minor weakness on the LIB in LIBERTY. Free of major abrasions and pleasing to the eye. PCGS has seen 19 finer Full Bands coins (2/16). From *The Indian Rocks Collection*. NGC ID# 23HL, PCGS# 4947

1924-S Dime, MS64 Full Bands
Sharp and Lustrous

4123 1924-S MS64 Full Bands PCGS. This Choice 1924-S Full Bands dime is boldly struck throughout with satiny luster and essentially brilliant fields. There are no bothersome abrasions. This San Francisco issue is challenging in Full Bands and rare as such in Gem condition. The present MS64 coin will appeal to a range of enthusiasts. PCGS lists 19 finer submissions (3/16). NGC ID# 23HL, PCGS# 4947

1925-D Dime, MS66 Full Bands
Original Patina, Bold Detail

4124 1925-D MS66 Full Bands PCGS. CAC. PCGS CoinFacts estimates that 500 1925-D Full Bands dimes survive from a mintage in excess of 5.1 million coins. Additionally, the issue is among the most challenging to locate with Full Bands in Gem condition or higher. A hint of golden color complements highly lustrous, seemingly pristine surfaces. The bands of the fascies show complete separation. The portrait and reverse legends display above-average detail. Population: 27 in 66 (1 in 66+) Full Bands, 4 finer (3/16). NGC ID# 23HN, PCGS# 4951

**1925-D Dime, MS66 Full Bands
Brilliant Radiance**

4125 1925-D MS66 Full Bands PCGS. CAC. This otherwise plentiful Denver issue is seldom seen in Premium Gem Full Bands, making this CAC-endorsed coin highly important for the Registry collector. The strike is bold, and the surfaces display frosty luster due to metal flow lines in the fields. Neither side displays toning or mentionable abrasions. Population: 27 in 66 (1 in 66+) Full Bands, 4 finer; CAC: 6 in 66, 2 finer (3/16). NGC ID# 23HN, PCGS# 4951

4126 1925-S MS64 Full Bands PCGS. A single trivial toning spot appears in the right obverse field of this brilliant Choice Mint State piece. The frosty surfaces are fully lustrous and the strike is exquisite. NGC ID# 5LX3, PCGS# 4953

**1925-S Dime, MS65 Full Bands
Better Date With Full Bands**

4127 1925-S MS65 Full Bands NGC. Satiny luster displays warm champagne toning over each side of this Gem Full Bands 1925-S Mercury dime, with deeper olive and russet hues seen around the peripheries. Save for slight weakness at the tops of STATES OF, the design elements are boldly defined. The 1925-S is scarce in Gem Full Bands and rarely seen finer. Census: 25 in 65 Full Bands, 13 finer (2/16).
From The Indian Rocks Collection. NGC ID# 5LX3, PCGS# 4953

**1925-S Dime, MS66 Full Bands
Sharp Strike Throughout**

4128 1925-S MS66 Full Bands PCGS. The 1925-S has a sorry reputation as one of the poorly produced issues in the Mercury dime series, but pleasing and well-struck pieces are occasionally available such as the present coin. Frosty and vibrantly lustrous, the coin is essentially brilliant save for a sparse speckling of golden-brown toning. The strike is uniformly sharp including razor-sharp split bands and diagonals on the fascies. Few coins are certified finer of the 1925-S. Population: 26 in 66 (1 in 66+) Full Bands, 4 finer (2/16). NGC ID# 5LX3, PCGS# 4953

4129 1926 MS66 Full Bands PCGS. CAC. An essentially brilliant Premium Gem with vibrant, frosty luster and unabraded surfaces. Finer coins are rare, but even in MS66, this sharp CAC-endorsed representative is a standout example. PCGS lists 24 Superb Gems finer (2/16). NGC ID# 23HR, PCGS# 4955

4130 1926 MS66 Full Bands PCGS. CAC. A diagonal band of brilliance yields to shades of orange, blue, green, and rose above and below on the obverse, while the reverse is uniformly toned in gunmetal-blue patina with speckled orange accents. The resulting eye-appeal is fantastic. Carefully preserved and boldly struck with fully separated bands. Rare any finer. NGC ID# 23HR, PCGS# 4955

4131 1926-D MS65 Full Bands PCGS. This delightful Gem 1926-D dime has a bold strike and excellent eye appeal with wisps of champagne toning over the frosty mint surfaces. PCGS has only certified 52 finer Full Bands examples (3/16). NGC ID# 23HS, PCGS# 4957

4132 1926-D MS65+ Full Bands PCGS. CAC. The 1926-D is elusive above the Gem grade level. This Plus-graded Full Bands piece has pearl-gray surfaces and bright, satiny luster. Just a couple of tiny abrasions are present and those are only visible with magnification. Population: 90 in 65 (2 in 65+) Full Bands, 48 finer (2/16).
Ex: New York Signature (Heritage, 11/2003), lot 6081. NGC ID# 23HS, PCGS# 4957

**1926-S Dime, Brilliant MS65 Full Bands
Elusive Mid-'20s San Francisco Issue**

4133 1926-S MS65 Full Bands PCGS. A strong die crack from Liberty's jawline through the E in LIBERTY to the rim does not hinder the sharp central strike that is present on both the obverse and the reverse. A brilliant Gem, this high-luster Mercury dime exceeds most of its low-mintage counterparts in eye appeal, smoothness of the surfaces, and bold definition on the motifs — a rarity with Full Bands. Population: 24 in 65 Full Bands, 13 finer (2/16). NGC ID# 5LX7, PCGS# 4959

**1927-D Dime, MS65 Full Bands
Seldom Seen So Fine**

4134 1927-D MS65 Full Bands PCGS. In Full Bands, the 1927-D Mercury dime poses a challenge for the collector, particularly at the Gem level. Finer examples are genuinely rare. This lightly toned MS65 coin displays frosty luster amid champagne and ice-blue overtones. The strike is slightly soft along the lower reverse rim. Close study with a loupe reveals a radial die crack on the obverse, extending upward from the rim at 6 o'clock. Population: 32 in 65 (3 in 65+) Full Bands, 13 finer (3/16). NGC ID# 23HV, PCGS# 4963

4135 1927-S MS65 PCGS. A well-detailed Gem specimen of this better date, with satiny mint luster and highlights of greenish-gold and amber toning. Housed in a green label holder. Population: 27 in 65 (1 in 65+), 6 finer (3/16).
From The Indian Rocks Collection. NGC ID# 36XC, PCGS# 4964

4136 1927-S MS64 Full Bands PCGS. An important condition and strike rarity, the 1927-S is elusive in finer grades. This Choice Mint State piece has frosty silver luster under delicate gold toning that is mostly concentrated on the obverse. PCGS has only certified 59 finer examples (3/16). NGC ID# 23HW, PCGS# 4965

1928 Dime, Pastel-Toned MS67 Full Bands

4137 1928 MS67 Full Bands PCGS. CAC. Rainbow pastel iridescent patina near the rims on each side of this Superb Gem Full Bands dime comprises amber-gold, jade, emerald, and sunset-orange in a vivid color display. The strike is nicely brought up throughout, both on the central bands and over the obverse as well. Population: 39 in 67 (3 in 67+) Full Bands, 1 finer. CAC: 13 in 67 Full Bands, 0 finer (3/16). NGC ID# 23HX, PCGS# 4967

**1928-D Mercury Dime, MS66 Full Bands
Rare This Sharp, Low-Mintage Issue**

4138 1928-D MS66 Full Bands PCGS. The satin-smooth surfaces gleam with strong silver luster and the strike is unfailingly sharp throughout this conditionally challenging Denver issue. The date is razor-sharp, as are all of the peripheral reverse elements. The coin is brilliant save for a few tiny, faint violet accents near the neck, and the eye appeal is terrific. Population: 21 in 66 (1 in 66+) Full Bands, 5 finer (2/16). NGC ID# 23HY, PCGS# 4969

4139 1929 MS67 Full Bands PCGS. A conditionally scarce Superb Gem Full Bands example of this otherwise plentiful Philadelphia issue. The surfaces yield beautiful preservation and bold relief detail. Each side is cast in dusky champagne-gray toning that softens the luster. Population: 84 in 67 (6 in 67+) Full Bands, 1 finer (2/16). NGC ID# 23J2, PCGS# 4973

**1930 Dime, MS67 Full Bands
None Finer at PCGS or NGC**

4140 1930 MS67 Full Bands PCGS. The light golden-brown and apricot patina is most evident on the obverse. A lustrous and impressively undisturbed Superb Gem that has a crisp strike and pleasing eye appeal. Other than the 1921 and 1931 issues, the 1930 has the lowest Philadelphia Mint production, and few pieces were saved in the era of "Buddy can you spare a Dime?" Population: 18 in 67 (1 in 67+) Full Bands, 0 finer (2/16). NGC ID# 23J5, PCGS# 4979

4141 1931 MS66+ Full Bands PCGS. CAC. Jade-green, lavender, and butter-gold toning alternates across this lustrous and lower mintage Great Depression dime. A splendidly smooth and evenly struck example. Population: 81 in 66 (4 in 66+) Full Bands, 20 finer (3/16). NGC ID# 5BZ2, PCGS# 4983

1931 Mercury Dime, MS67 Full Bands

- 4142 1931 MS67 Full Bands PCGS.** This lovely Superb Gem exhibits brilliant and frosty silver luster with no toning on either side. Rarely does this Great Depression era coin appear in such extraordinary condition. This piece is tied for the finest certified at PCGS or NGC. Population: 20 in 67 Full Bands, 0 finer (3/16). NGC ID# 5BZ2, PCGS# 4983

1931-S Mercury Dime, MS66 Full Bands Doubled Die Obverse, FS-101

- 4143 1931-S Doubled Die Obverse, FS-101, MS66 Full Bands PCGS.** CAC. Exceptional eye appeal goes hand-in-hand with radiant mint luster across the surfaces of this Premium Gem 1931-S dime. Scarce with Full Bands, this brilliant example is snow-white and satin-smooth. The date is doubled — one of the few doubled dies in the Mercury dime series, and the top loop of the mintmark is filled. An essentially full strike covers all of the devices, and a glass reveals only a few tiny ticks. Just 1,800,000 pieces were struck. Population (all varieties): 47 in 66 (2 in 66+) Full Bands, 8 finer (2/16). PCGS# 145444 Base PCGS# 4987

- 4144 1935-D MS67 Full Bands PCGS.** This brilliant Superb Gem has blazing silver luster with frosty surfaces. There is no evidence of toning on this finest certified example. Population: 31 in 67 Full Bands, 0 finer (3/16). NGC ID# 23JD, PCGS# 4995

- 4145 1936-D MS67+ Full Bands PCGS.** CAC. It is beyond the camera's capability to capture all of the nuances visible with a glass on this delightfully toned high-end Superb Gem dime. Lilac, green, gold, orange, and red hues split into their component shades. Die polish lines capture the light and return it to the eye as glowing mint luster. Sharply struck and uniquely patinated, CAC endorsed. Population: 17 in 67+ Full Bands, 9 finer (3/16). NGC ID# 5C48, PCGS# 5001

- 4146 1939 MS67+ Full Bands PCGS.** This Plus-graded Superb Gem exhibits sharply detailed design elements, with fully split and rounded bands on the fasces. The well-preserved, lustrous surfaces show hints of ice-blue and greenish-gold toning. PCGS has graded 1 numerically finer examples (3/16). NGC ID# 23JR, PCGS# 5017

- 4147 1939 MS67+ Full Bands PCGS.** CAC. Brilliant silver luster dominates both sides of this Plus-graded Superb Gem, with the quality confirmed by CAC endorsement. Untoned to the unassisted eye, a glass reveals faint streaks of olive-gray toning that run radially from the rims but the overwhelming impression is smooth, white near-perfection. Just 11 coins are numerically finer at PCGS (3/16). NGC ID# 23JR, PCGS# 5017

- 4148 1939-D MS68+ Full Bands PCGS.** CAC. Remarkable cherry-red, lemon-gold, and forest-green toning occupies the obverse. The reverse displays blushes of powder-blue and golden-brown. Lustrous and well struck with exemplary preservation. NGC ID# 23JS, PCGS# 5019

- 4149 1939-S MS66+ Full Bands PCGS.** Satin luster illuminates light golden toning over each side of this Plus-designated Premium Gem 1939-S dime. The strike is well-executed, and eye appeal is pleasing. Finer examples of this issue are scarcely seen in the Full Bands category. NGC ID# 23JT, PCGS# 5021

- 4150 1942/1 FS-101 AU53 Full Bands PCGS.** The 1942/1 dime is the most prominent 20th century U.S. overdate, as well as a key to the Mercury dime series. The present stone-white example is minimally abraded and displays luster throughout the legends and devices. PCGS# 145474 Base PCGS# 5037

- 4151 1942/1-D FS-101 AU58 Full Bands PCGS.** The curls near the cheekbone display a hint of wear, but this almond-gold and stone-gray dime possesses substantial luster and shows only negligible marks. Discovered later than its Philadelphia Mint counterpart, this key variety is best identified by the doubled base of the 4 in the date. NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

1942/1-D Dime, MS62 Full Bands Scarce With Full Bands

- 4152 1942/1-D FS-101 MS62 Full Bands PCGS.** This popular *Guide Book* overdate variety is scarce in Full Bands. Only its Philadelphia counterpart, the 1942/1 overdate, is rarer in this category. This Uncirculated piece displays satiny luster and dappled russet toning over champagne surfaces. The strike is bold, and grade-limiting abrasions are not particularly bothersome. NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

- 4153 1944-D MS68 Full Bands PCGS.** A virtually perfect example of this popular issue, with razor-sharp design elements throughout, including Full Bands definition on the fasces. The impeccably preserved brilliant surfaces radiate vibrant mint luster on both sides. Eye appeal is incredible. Population: 89 in 68 (1 in 68+) Full Bands, 0 finer (3/16). NGC ID# 23KC, PCGS# 5053

- 4154 1944-S MS67+ Full Bands PCGS.** CAC. The prevailing silver coloration is dotted with flecks of cinnamon and pale gray amid frosty luster on both sides and excellent preservation. The strike is full throughout both sides. One tiny tick is hidden near the rear of the winged Liberty's face. A Registry Set essential. Population: 14 in 67+ Full Bands, 8 finer. CAC: 27 in 67 Full Bands, 3 finer (2/16). NGC ID# 5A96, PCGS# 5055

4155 1945-S MS67+ Full Bands PCGS. CAC. The final San Francisco issue in the Mercury dime series is occasionally seen in MS67 Full Bands but is rare finer. This Plus-graded CAC coin is a rarity. The strike is sharp, and both sides display frosty luster with dappled teal-blue toning. PCGS has seen four MS68 examples finer in Full Bands (2/16). NGC ID# 23KG, PCGS# 5061

4156 1945-S Micro S, FS-512, MS66 Full Bands PCGS. A brilliant, lustrous, and well struck example of the popular Micro S variety. The fields are pristine, and Liberty's cheek and neck show only infrequent and minor marks. The final entry of the Mercury series, due to Roosevelt's unexpected death that year. NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

4157 1945-S Micro S, FS-512, MS66 Full Bands PCGS. Hints of tan-gold toning near the rims deny full brilliance. The fields are pristine and the cheek shows delicate contact. The strike is crisp at the centers, although the tops of a few letters in LIBERTY are incomplete. NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

PROOF MERCURY DIMES

4158 1936 PR66 PCGS. Wisps of champagne toning are barely evident on the brilliant silver surfaces of this Premium Gem first-year proof Mercury dime. An outstanding example. PCGS has only certified 72 finer examples of this issue (3/16). NGC ID# 27DG, PCGS# 5071

1936 Mercury Dime, Pristine PR67+

4159 1936 PR67+ PCGS. CAC. The obverse of this stunning Superb Gem proof is untuned quicksilver-white, while the reverse shows a light golden cast. What both sides share, however, is a remarkable paucity of distractions of any kind. Seldom do examples of this first-year proof appear in such pristine shape. Population: 3 in 67+, 1 finer. CAC: 30 in 67, 0 finer (3/16). NGC ID# 27DG, PCGS# 5071

1938 Dime, Peripherally Toned PR68

4160 1938 PR68 PCGS. Registry Set enthusiasts will adore the pristine surfaces, deep mirrors, and vivid toning of this high-end proof 1938 Mercury dime. The very central regions are brilliant, but violet, amber-orange, russet, olive, and crimson-red hues surround the peripheries. Among the finest at PCGS. Population: 14 in 68 (1 in 68+), 0 finer (3/16). NGC ID# 27DJ, PCGS# 5073

1938 Dime, Peripheral Toned PR68 None Finer at PCGS

4161 1938 PR68 PCGS. CAC. Among the finest at PCGS, this high-end Superb Gem proof 1938 dime displays full design rendering and reflective fields. Most of each side displays champagne-tinted silver coloration, although crescents of crimson, gold, and forest-green appear along the left obverse and reverse borders. Population: 14 in 68 (1 in 68+), 0 finer (3/16). NGC ID# 27DJ, PCGS# 5073

1942 Dime, Toned PR68+ Only One Coin Finer at PCGS

4162 1942 PR68+ PCGS. CAC. Proof 1942 Mercury dimes are only infrequently offered in PR68, and this Plus-designated piece is all the more enticing. Only a single PR69 coin is finer at PCGS across the entire proof series. This coin displays a full strike and reflective fields. Champagne-gray surfaces yield a tinge of sun-gold and lavender along the upper obverse border and a few wisps of rose over the reverse. Population: 76 in 68 (4 in 68+), 1 finer (3/16). NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIMES

4163 1947 MS67+ Full Bands PCGS. This Plus-graded Registry coin is tied for the finest 1947 Roosevelt dime certified at PCGS in Full Bands. The strike is sharp, and the surfaces showcase frosty luster. Champagne interiors cede to crimson, amber, and forest-green around the borders. Population: 52 in 67 (4 in 67+) Full Bands, 0 finer (3/16). NGC ID# 23KM, PCGS# 85085

**1947-S Dime, MS68 Full Bands
Spectacular Toning and Visual Appeal**

- 4164 1947-S MS68 Full Bands PCGS.** Trumpet Tail S. Dramatic cobalt-blue, lavender-rose, and golden-russet toning graces this lustrous, boldly struck, and pristine San Francisco dime. A virtually unsurpassable entry within the competitive Registry holding, and one with unparalleled eye appeal. Population: 7 in 68 (1 in 68+) Full Bands, 0 finer (3/16). NGC ID# 23KP, PCGS# 85087

**1948-S Dime, MS68 Full Bands
Registry Set Essential**

- 4165 1948-S MS68 Full Bands PCGS.** An almost flawlessly preserved Full Bands Registry coin, tied with two others as the finest at PCGS (2/16). The strike is razor-sharp, and the surfaces yield frosty luster. A crescent of russet and crimson toning graces the lower obverse border and wraps over onto the corresponding portion of the reverse periphery. The remainder of each side shows silvery iridescence. NGC ID# 23KT, PCGS# 85090

**1950-S Dime, MS68 Full Bands
Rare, Tied for Finest**

- 4166 1950-S MS68 Full Bands PCGS.** Tied with three others as the finest at PCGS and equal to the coin in the current highest-rated PCGS Registry Set (3/16). This MS68 Full Bands 1950-S Roosevelt dime displays frosty, dazzling luster and a hint of delicate champagne toning. The obverse has tinges of russet toning around the periphery. NGC ID# 23KZ, PCGS# 85096

- 4167 1964 MS67+ Full Bands PCGS.** Speckles of olive-gray toning yield to a vibrant crescent of magenta and cyan-blue toning at the right obverse rim that gives this Plus-graded Superb Gem distinctive eye appeal. The Full Bands designation acknowledges the sharp strike. Numerous die polish lines are visible on the reverse of this Registry-quality dime. Population: 28 in 67 (3 in 67+) Full Bands, 0 finer (3/16). NGC ID# 23M2, PCGS# 85128

- 4168 1964-D MS67+ Full Bands PCGS.** A magnificently toned Registry coin, effectively tied for second-finest at PCGS. This 1964-D Roosevelt dime displays bold detail and frosty luster. Slightly off-center brilliant interiors call attention to vivid multicolor toning in the margins, making this by far the most attractive '64-D we have ever offered at auction. Population: 23 in 67 (2 in 67+) Full Bands, 1 finer (2/16). NGC ID# 23M3, PCGS# 85129

PROOF ROOSEVELT DIMES

- 4169 1973-S PR70 Deep Cameo PCGS.** Tied with 31 others as the finest at PCGS; NGC has not seen any 1973-S proof dimes finer than PR69 Ultra Cameo (3/16). The design elements are fully rendered, and the untuned surfaces display stark white-on-black contrast. A Registry Set essential. NGC ID# 27KM, PCGS# 95251

**1983 No S Dime, PR70 Ultra Cameo
Rare Example in Perfect Condition**

- 4170 1983 No S PR70 Ultra Cameo NGC.** This popular error variety is a proof 1983 Roosevelt dime struck with dies that lacked the San Francisco mintmark. This champagne-tinted Ultra Cameo is in perfect condition. Only four such coins are certified at NGC, and PCGS contributes only two additional pieces (3/16). The strike is flawless, and the eye appeal is outstanding. NGC ID# 28ZN, PCGS# 95265

STANDING LIBERTY QUARTERS

**1916 Standing Liberty Quarter, VF35
Collector-Grade Example**

- 4171 1916 VF35 NGC.** Light tan toning accents steel-gray surfaces on this Choice VF 1916 Standing Liberty quarter. The figure and eagle are lightly worn, but pleasing detail remains. The surfaces are smooth, and hints of luster can be detected in the reverse fields when rotated beneath a light. J.H. Cline called attention to the fact that, due to its ill-defined details, the 1916 required only brief circulation before its numeric grade dropped significantly. Heavily worn coins are thus abundant, and mid-to-upper-circulated examples such as this high-end VF coin are infrequently seen. NGC ID# 43XR, PCGS# 5704

- 4172 1917 Type One MS66 Full Head PCGS.** This sharp Type One Standing Liberty quarter displays frost-white luster with an original "skin" — an undipped, mint-fresh coin. As such, a few faint grazes are apparent on the high points of Liberty's figure, but none are bothersome. Finer coins are elusive, making this piece ideal for the budget-conscious collector. NGC ID# 242Z, PCGS# 5707

4173 1917 Type One MS66 Full Head PCGS. 30th Anniversary Green Label Holder. This Premium Gem Type One Standing Liberty quarter displays lovely golden luster and unabraded surfaces. The strike is bold, as expected for the issue, save for the leading edge of the eagle's left (facing) wing. Finer coins are elusive. NGC ID# 242Z, PCGS# 5707

4174 1917 Type One MS66 Full Head PCGS. CAC. Razor-sharp detail and glistening, champagne-tinged luster adorn the Premium Gem surfaces of this Full Head 1917 Type One quarter. The CAC green label further heightens the appeal. Whether for type or date purposes, the discerning collector may find this piece to be "just right" for their collection.
From The Somerset Collection. NGC ID# 242Z, PCGS# 5707

4175 1917 Type One MS66+ Full Head PCGS. CAC. An impeccably detailed strike amid untuned ivory-white surfaces amid frosty luster all combine to make this a standout example of this two-year-type issue. Only one or two obscure ticks seem to preclude an even finer grade. This is a great example of the 1917 Type One Philadelphia issue. Population: 29 in 66+ Full Head, 86 finer (2/16). NGC ID# 242Z, PCGS# 5707

4176 1917-D Type One MS65 Full Head PCGS. From the final year of the short-lived Type One design, this sharply detailed Gem exhibits Full Head definition and well-preserved surfaces with radiant mint luster. Hints of champagne-gold toning add to the outstanding eye appeal.
From The Somerset Collection. NGC ID# 2432, PCGS# 5709

4177 1917-D Type One MS66 Full Head PCGS. Soft, satiny luster glows beneath cream-golden toning that blankets much of this Premium Gem Type One Denver coin. Tinges of russet and amber also appear around the borders. The coin is sharply struck throughout the relief elements, and only a single small tick on Liberty's shoulder appears to limit the grade. PCGS has seen 23 Superb Gems finer (2/16). NGC ID# 2432, PCGS# 5709

4178 1917-D Type One MS66 Full Head PCGS. Silver centers with reddish-orange peripheral toning on much of the reverse and reddish-gray outline toning on the obverse. Liberty's head is well-defined, as is most of her shield. PCGS has graded 24 numerically finer examples (3/16). NGC ID# 2432, PCGS# 5709

1917-D Type One Quarter, MS67 Full Head Rarely Seen So Fine

4179 1917-D Type One MS67 Full Head PCGS. The Type One Standing Liberty quarters were typically sharp with many Full Head examples surviving today. However, the 1917-D and -S issues are far rarer in high-grade Full Head than the 1917-P. This Superb Gem has a bold strike with frosty silver luster beneath wispy champagne toning, the reverse almost entirely untuned. Population: 23 in 67 (2 in 67+) Full Head, 1 finer (3/16).
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3936; Houston Signature (Heritage, 11/2012), lot 1177. NGC ID# 2432, PCGS# 5709

4180 1917-S Type One MS65 Full Head PCGS. CAC. A Gem Full Head example, this Type One 1917-S quarter displays frosty mint luster with a hint of iridescence and razor-sharp design elements. A few trivial marks on Liberty's leg are all that preclude an even finer grade. CAC-endorsed in a green label holder.
From The Somerset Collection. NGC ID# 2433, PCGS# 5711

4181 1917 Type Two MS66 Full Head PCGS. CAC. A boldly struck Premium Gem Full Head example of this debut Type Two issue, showing satiny luster and uniform champagne toning. A vertical die crack appears on the eagle's body. Only a few small grazes preclude an even finer grade. Population: 87 in 66 (4 in 66+) Full Head, 13 finer (3/16). NGC ID# 2434, PCGS# 5715

4182 1917-D Type Two MS65 PCGS. CAC. The Type Two 1917-D quarter is elusive in Gem condition, with or without a Full Head designation. This CAC-endorsed example is boldly struck, and the only thing preventing Full Head status is a small point of weakness in Liberty's hair line. Light golden toning blankets satiny luster on each side. Population: 52 in 65 (2 in 65+), 25 finer (3/16).
From The Somerset Collection. NGC ID# 3TWS, PCGS# 5716

4183 1917-S Type Two MS66 PCGS. Boldly struck and lustrous with lovely pale golden-tan toning, slight russet mottling, and no obvious or distracting surface marks. This Type Two 1917-S quarter displays sharp detail on the eagle, stars, and date, although a weak head on Liberty precludes a Full Head designation. Population: 30 in 66 (2 in 66+), 0 finer (3/16).
Ex: New York Signature (Heritage, 11/2003), lot 6283.
From The Somerset Collection. NGC ID# 3TEN, PCGS# 5718

1917-S Type Two Quarter, MS66+ Delightful Toning

4184 1917-S Type Two MS66+ PCGS. 30th Anniversary Green Label Holder. Iridescent champagne interiors cede to more vivid multicolor hues near the borders of this high-end Premium Gem Type Two 1917-S. The surfaces yield frosty luster and are beautifully preserved. As is typical of this issue, strike weakness is seen on Liberty's head, the shield rivets, central gown folds, and the eagle's breast. Nonetheless, eye appeal prevails. Population: 30 in 66 (2 in 66+), 0 finer (3/16). NGC ID# 3TEN, PCGS# 5718

4185 1918-D MS65 PCGS. The 1918-D is a slightly better date, particularly in high grade. Despite what certified population reports might indicate, this Denver issue is less frequently auctioned in non-Full Head MS65 in Full Head. This piece has satiny, untuned luster and minimal abrasions. Minor weakness is seen on the usual design elements, including Liberty's head, the shield rivets, and the eagle's breast. The date is clear. Population: 57 in 65, 25 finer (3/16).
From The Somerset Collection. NGC ID# 2438, PCGS# 5722

4186 1918-D MS66 PCGS. CAC. The 1918-D is scarce in MS66, with or without a Full Head. This Premium Gem example displays mint-fresh luster with a distinctive ice-blue and champagne tint. Typical strike weakness occurs on the head, shield rivets, central torso, and eagle, but a lack of bothersome abrasions boosts the eye appeal. Population: 22 in 66, 3 finer (3/16). NGC ID# 2438, PCGS# 5722

**1918/7-S Standing Liberty Quarter, XF40
Sought-After Wartime Hubbing Error**

- 4187 1918/7-S XF40 PCGS. FS-101.** The 1918/7-S Standing Liberty quarter is one of the most sought-after keys to the series. The present coin is an attractive XF specimen of this famous hubbing error, with lightly worn and lightly abraded dove-gray surfaces that show some traces of amber. The undertype 7 is plainly visible below the primary digit. NGC ID# 243A, PCGS# 5726

1918/7-S Quarter, XF Details

- 4188 1918/7-S FS-101 — Cleaning — PCGS Genuine. XF Details.** The diagonal of the underdigit 7 is unmistakable on this moderately circulated key date quarter. Both sides are hairlined, and the predominantly stone-gray surfaces display a few dark spots, notably near QUARTER. Nonetheless, a fairly sharp example of the elusive overdate variety. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

**1918/7-S Quarter, AU Details
Above-Average Strike**

- 4189 1918/7-S FS-101 — Cleaning — PCGS Genuine. AU Details.** Although lightly cleaned in the past, this pewter-gray 1918/7-S quarter remains somewhat pleasing. Liberty's head and a few shield rivets are soft, but the date, gown, and stars are bold. The leading edge of the eagle's left (facing) wing also shows minor incompleteness. The overdate is famously unknown with a full strike, and above-average coins such as this are highly sought-after. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

- 4190 1918-S MS63 Full Head NGC.** This attractive Select specimen shows enough detail on the head to qualify for the Full Head designation, but some softness shows on Liberty's torso. The lightly marked, lustrous surfaces are toned in shades of champagne-gold and lavender. Census: 29 in 63 (1 in 63 ★) Full Head, 81 finer (3/16). NGC ID# 2439, PCGS# 5725

- 4191 1919 MS65 Full Head PCGS.** In addition to the Full Head details, this piece has full shield details, included the small interior shield and all of the rivets. This Gem exhibits frosty silver luster with trivial splashes of gold toning. NGC ID# 243B, PCGS# 5729

**1919-D Quarter, Champagne-Toned MS65
Conditionally Elusive**

- 4192 1919-D MS65 PCGS.** The 1919-D is a famous semikey of the series, scarce in Gem or better condition even without a Full Head designation. This piece displays a sharp date and stars, but some minor weakness is seen on Liberty's head, the shield rivets, and the leading edge of the eagle's left (facing) wing. Light champagne toning warms the satiny luster. A heavy die crack extends from reverse rim at 2 o'clock into the eagle's wing tip. Population: 52 in 65 (1 in 65+), 29 finer (3/16).
From The Somerset Collection. NGC ID# 243C, PCGS# 5730

- 4193 1919-S AU58 PCGS. CAC.** In addition to half of the head details, the obverse of this near-Mint quarter has considerable shield detail. Both sides are lustrous with frosty surfaces and only a trace of high-point rub. NGC ID# 243D, PCGS# 5732

**1919-S Quarter, MS65
Low-Mintage Branch Issue**

- 4194 1919-S MS65 PCGS. CAC.** Delicate jade-green, lavender, and golden-brown shades endow this highly lustrous representative. The obverse is pristine save for a line on the shield, and a lens reveals scattered unimportant marks on the reverse. The head shows typical definition. An early and elusive branch mint issue. Certified in an old green label holder. Population: 38 in 65 (1 in 65+), 14 finer (3/16).
Ex: Long Beach Signature (Heritage, 2/2006), lot 1053, which realized \$4,600.
From The Somerset Collection. NGC ID# 243D, PCGS# 5732

**1920 Quarter, Lustrous MS67
High-End Registry Acquisition**

- 4195 1920 MS67 PCGS.** Despite having the highest mintage of the series at more than 27 million coins, the 1920 Standing Liberty quarter is scarce in Superb Gem, with or without a Full Head. Interestingly, none are finer than the MS67 numeric level. This top-grade PCGS coin represents an important opportunity for the collector assembling a high-end non-Full Head date set. Other than Liberty's head, the design elements are razor-sharp. Both sides are unabraded and frosty. The obverse has an ivory interior with gold and amber border hues, while the reverse displays mottled lavender-gold coloration. Population: 24 in 67 (5 in 67+), 0 finer (3/16). NGC ID# 243E, PCGS# 5734

**1920 Quarter, Sharp MS67
Rare CAC-Endorsed Example
Nearly Full Head Detail**

- 4196 1920 MS67 PCGS. CAC.** The 1920 quarter is rare in MS67 and unknown in MS68. This example is one of only five in this top grade with a CAC endorsement (3/16), making it an extremely rare opportunity for the astute collector. Liberty's head is nearly full, being only a trifle weak at the temple. The shield is bold, and the eagle is comparably sharp. Liberty's central gown lines are well-defined. This satiny, brilliant 1920 Superb Gem is devoid of perceptible flaws. Population: 24 in 67 (5 in 67+), 0 finer (3/16). NGC ID# 243E, PCGS# 5734

**1920 Standing Liberty Quarter, MS67+
Spectacular Peripheral Toning**

- 4197 1920 MS67+ PCGS.** The 1920 Standing Liberty quarter is one of the most well-struck issues in the series, as even non-Full Head coins are available with sharp central definition. This high-end Superb Gem is an exceptional coin in that regard, showing bold shield rivets and stars, with sharp feather detail along the leading edge of the eagle's left (facing) wing. Liberty's head is nearly full, with a trifle of weakness at the temple precluding the coveted designation. The silver centers are ringed by vivid shades of burnt-orange, greenish-gold, and magenta toning, with vibrant mint luster underneath. This issue is a significant rarity at the MS67 grade level, regardless of strike quality, and none are numerically finer. Population: 23 in 67 (5 in 67+), 0 finer (2/16). NGC ID# 243E, PCGS# 5734

- 4198 1920 MS66 Full Head PCGS.** As expected for the issue, the shield and eagle are sharply defined on this Premium Gem 1920 quarter. The 1 in the date is characteristically flat compared to the 920, and Liberty's temple is a trifle weak, but the Full Head criteria are nonetheless achieved. This piece has a blush of golden toning over the reverse and a few light marks on the obverse figure. Population: 36 in 66 (4 in 66+) Full Head, 7 finer (3/16). NGC ID# 243E, PCGS# 5735

- 4199 1920-D MS64 PCGS.** An attractive Choice specimen of this popular branch mint issue, with well-preserved, lustrous surfaces that show highlights of greenish-gold and magenta toning. The design elements are well-detailed and eye appeal is quite strong. Population: 89 in 64 (1 in 64+), 76 finer (3/16). NGC ID# 243F, PCGS# 5736

**1920-D Quarter, MS66
Seldom Seen This Fine**

- 4200 1920-D MS66 NGC.** The 1920-D is among the rarest issues in the series in high-grade Full Head, but non-Full Head coins are also scarce and undervalued in Premium Gem condition. This piece is brilliant and satiny. Liberty's head and a couple of shield rivets lack complete definition, but the eagle's plumage, the stars, and the date numerals are sharp. Luster is average, but the overall eye appeal is pleasing. Census: 13 in 66, 2 finer (2/16). NGC ID# 243F, PCGS# 5736

**1920-D Quarter, MS66
Only Three Finer at PCGS**

- 4201 1920-D MS66 PCGS.** This important Premium Gem is a condition rarity and almost impossible to locate in higher grades. More than half of the head detail is present on this example, with nearly all of the shield detail. Both sides are frosty and lustrous with wispy gold toning on the obverse. Population: 34 in 66, 3 finer (3/16). NGC ID# 243F, PCGS# 5736

**1920-D Quarter, MS66
Scarce Denver Issue**

- 4202 1920-D MS66 PCGS.** Exceptional on the obverse, the reverse shows several faint marks in the left field that keep this pale golden colored piece from an even finer grade. The 1920-D is a better date, scarcer in high grade than many collectors realize. Superb Gems are extremely rare. This MS66 coin displays above-average sharpness and frosty luster. Population: 33 in 66, 3 finer (3/16).
Ex: Long Beach Signature (Heritage, 9/2003), lot 6801; New York Signature (Heritage, 11/2003), lot 6306.
From The Somerset Collection. NGC ID# 243F, PCGS# 5736

- 4203 1920-D MS62 Full Head PCGS.** Full Head examples of this better Denver issue are scarce and always in demand. The present piece shows satiny luster and unusually clean surfaces for the grade. Full sharpness appears on Liberty's head, the shield rivets, and the date — none which are typically well-struck. Each side shows light golden toning. For the grade, this 1920-D Full Head quarter is virtually impossible to surpass. NGC ID# 243F, PCGS# 5737

- 4204 1920-S MS65 PCGS. CAC.** Housed in a green label holder, this lustrous Gem is exceptionally preserved and displays rich gold toning. The strike is pleasing, but the absence of an earhole denies Full Head status. The date and stars are razor-sharp. Population: 50 in 65, 19 finer (3/16).
Ex: Long Beach Signature (Heritage, 2/2006), lot 1062.
From The Somerset Collection. NGC ID# 243G, PCGS# 5738

- 4205 1921 AU55 PCGS.** This golden-gray 1921 Standing Liberty quarter has remnants of luster in the fields and displays bold design elements. Liberty's head very well may have been full after striking, although slight high-point friction has softened the definition in the vicinity of the ear. The color is original, and the eye appeal is pleasing. All four date numerals are clear. NGC ID# 243H, PCGS# 5740

**1921 Quarter, Frosty MS65
Attractively Lustrous**

- 4206 1921 MS65 PCGS. CAC.** This low-mintage key date is elusive above MS65, and CAC-endorsed coins in Gem and better grades are particularly scarce. This coin displays frosty luster and a blush of champagne toning. Weakness on Liberty's temple and a flat date are characteristic of the issue, although the originality of the surfaces increases the eye appeal. PCGS lists 31 finer non-Full Head coins (3/16).
From The Somerset Collection. NGC ID# 243H, PCGS# 5740

**1923 Quarter, MS65 Full Head
Brilliant, Shimmering Surfaces**

- 4207 1923 MS65 Full Head PCGS. J.H.** Cline estimated that only 10% of the entire 1923 Standing Liberty quarter production (9.7 million coins) was struck with Full Head detail, and that such examples are actually scarcer than previously thought. This Gem features satiny luster over brilliant surfaces. The rivets, shield lines, chain mail, and feathers are boldly rendered, as is Liberty's head, while the 1 in the date is typically soft. Minor ticks are well-hidden and undistracting. NGC ID# 243J, PCGS# 5743

- 4208 1923-S AU58 NGC.** This near-Mint 1923-S quarter displays satiny luster with light golden toning. Liberty's head is weak only in the region of the ear, and interior definition of the gown and stars is comparably above average. A pleasing example of this key issue, suitable for the collector who may find a Mint State coin to be out of reach. NGC ID# 243K, PCGS# 5744

**1923-S Quarter, MS65
Notably Vibrant Luster**

- 4209 1923-S MS65 PCGS. CAC.** A low-mintage key to the Standing Liberty series, the 1923-S commands a premium at all grade levels and still seems to be among the most sought-after issues. This Gem is absolutely original, displaying a fully untuned, snow-white appearance while boasting shimmering, satiny surfaces. Liberty's head detail is more than 70 percent complete, and the balance of the coin is equally sharp.
Ex: Long Beach Signature (Heritage, 2/2005), lot 6720.
From The Somerset Collection. NGC ID# 243K, PCGS# 5744

- 4210 1924-D MS64 Full Head PCGS.** An elusive issue in Full Head, often seen with the deficient strike for which the 1926-D is famous. This Choice 1924-D quarter displays pleasing preservation and warm golden toning over satiny luster. The head, shield, and date show above-average sharpness. NGC ID# 243M, PCGS# 5749

- 4211 1924-S MS64 PCGS.** The sharp date and stars on this Choice 1924-S quarter are worthy of mention, and Liberty's head is only a trifle weak at the ear hole. This satiny, minimally abraded coin is undipped and displays lilac-gray overtones on each side. NGC ID# 243N, PCGS# 5750

**1924-S Quarter, MS66
Exceptional Eye Appeal**

- 4212 1924-S MS66 PCGS. CAC.** Potent luster sweeps this uncommonly smooth Premium Gem. Mostly white, although wisps of lime-green and tan-gold toning grace the margins. The strike is fairly sharp, showing softness only on Liberty's cheek and the usual pair of shield rivets. Both sides exhibit clash marks. A conditionally scarce branch mint issue. Certified in an old green label holder. Population: 38 in 66 (2 in 66+), 7 finer (3/16).
Ex: Long Beach Signature (Heritage, 2/2006), lot 1070, which realized \$4,025.
From The Somerset Collection. NGC ID# 243N, PCGS# 5750

- 4213 1924-S MS62 Full Head PCGS.** An attractive and lustrous satiny silver-white example of this midseries date, meeting the requirements for Full Head but showing some scattered ticks and scrapes (one under GOD) that determine the grade. The tops of the date digits meld into the pedestal, a design flaw that would be repaired in the following year. NGC ID# 243N, PCGS# 5751

**1924-S Quarter, MS64 Full Head
Better Date in Full Head**

- 4214 1924-S MS64 Full Head PCGS. CAC.** A challenging issue in Full Head and particularly scarce finer than the present Choice example. Liberty's head is well-defined, and the shield rivets show above-average definition. Light, scattered marks define the grade. This piece is light golden in color but also has some deep russet toning along the left obverse border. NGC ID# 243N, PCGS# 5751

- 4215 1925 MS66 Full Head PCGS.** A Full Head Premium Gem with satiny luster that displays a faint champagne hue. The shield rivets are slightly weak, but the head detail is strong; the eagle's breast feathers show pleasing definition, but the leading edge of the left (facing) wing is slightly soft. Few Full Head 1925 quarters are known finer. Population: 73 in 66 (2 in 66+) Full Head, 12 finer (3/16). NGC ID# 243P, PCGS# 5753

- 4216 1925 MS66 Full Head NGC. CAC.** Frosty luster envelops both sides of this champagne-tinged Premium Gem Full Head quarter, displaying a sharp strike throughout and all shield rivets bold, save for two. This high-mintage date is a go-to issue for attractive survivors in top grade. Small patches of darker toning show on the left (facing) knee, the shield, and the eagle's left wing. Census: 38 in 66 (3 in 66+) Full Head, 13 finer. CAC: 11 in 66 Full Head, 4 finer (2/16). NGC ID# 243P, PCGS# 5753

**1926-S Quarter, MS65
Attractive Peripheral Patina**

- 4217 1926-S MS65 PCGS.** A lustrous Gem that boasts original honey-gold and lilac-red toning throughout the margins. Thorough study is required to locate the infrequent and incidental marks. The head has an incomplete impression, customary for this scarcer branch mint issue. Housed in an old green label holder.
From The Somerset Collection. NGC ID# 4462, PCGS# 5758

**1927-D Standing Liberty Quarter, MS66 Full Head
None Finer at PCGS**

4218 1927-D MS66 Full Head PCGS. From a low-mintage of 976,000 pieces, the 1927-D Standing Liberty quarter is rare in MS66 condition, with the Full Head designation, and finer coins are virtually unobtainable. This well-detailed Premium Gem exhibits well-preserved lustrous surfaces with highlights of golden-tan toning and outstanding eye appeal. Population: 18 in 66 Full Head, 0 finer (2/16). NGC ID# 243V, PCGS# 5763

4219 1928 MS66 Full Head PCGS. The 1928 is elusive in MS66 Full Head and rare finer. This piece displays softly frosted luster with light champagne toning. Liberty's head, the shield, and the eagle's breast feathers all exhibit above-average sharpness. Population: 68 in 66 (7 in 66+) Full Head, 8 finer (3/16). NGC ID# 243X, PCGS# 5767

4220 1928-D MS67 NGC. Well-defined overall with a head that falls just shy of Full Head status. The luster is pleasing, and hints of silver-blue and lavender-pink patina grace the fields. Rare in this lofty grade. Census: 10 in 67, 0 finer (2/16).
Ex: *Dallas Signature* (Heritage, 10/2008), lot 778; *Houston Signature* (Heritage, 11/2012), lot 3983. NGC ID# 243Y, PCGS# 5768

**1928-S Standing Liberty Quarter, MS67
Rare Full Head Example**

4221 1928-S MS67 Full Head PCGS. CAC. The 1928-S Standing Liberty quarter is seldom encountered in MS67 condition, with Full Head details. This spectacular Superb Gem exhibits well-detailed design elements and vibrant mint luster, under pleasing shades of champagne-gold toning. Eye appeal is outstanding. Population: 21 in 67 (2 in 67+) Full Head, 0 finer (2/16). NGC ID# 243Z, PCGS# 5771

4222 1929 MS66 Full Head PCGS. 30th Anniversary Green Label Holder. Iridescent pastel toning graces satiny luster on this Premium Gem Full Head 1929 quarter, accentuating the bold design elements and clean surfaces. The 1929 is almost as plentiful as the 1930 in Full Head, but coins grading finer than MS66 are rare. PCGS lists only nine Full Head Superb Gems finer (3/16). NGC ID# 2442, PCGS# 5773

**1929-D Quarter, MS65 Full Head
Golden-Toned and Lustrous**

4223 1929-D MS65 Full Head PCGS. In recent years, the 1929-D Standing Liberty quarter has been gaining popularity as a scarce issue in high-grade Full Head. This Gem example is well-struck with adequate head detail and above-average definition on the shield rivets. Frosty surfaces display light golden toning, and a few minor ticks are not out of line for the grade. Population: 47 in 65 Full Head, 14 finer (3/16). NGC ID# 2443, PCGS# 5775

4224 1929-S MS66+ Full Head PCGS. This sharp 1929-S Standing Liberty quarter displays satin luster and mostly unabraded surfaces. The obverse shows parallel die polishing lines in the recesses and lavender-gray toning around the border, while the reverse is slightly more frosty with golden patina. PCGS lists 16 finer Full Head examples (3/16). NGC ID# 2444, PCGS# 5777

4225 1930 MS66+ Full Head PCGS. CAC. This is lovely 1930 quarter, showing Full Head detail and frosty, champagne-toned luster. The Plus designation and the CAC endorsement combine to confirm the excellent preservation — even Liberty's forward leg is devoid of the usual tiny marks. Were it not for a thin line crossing Liberty's abdomen and into the shield, a full Superb Gem grade would have been easily attained. PCGS lists 45 finer Full Head coins (3/16). NGC ID# 2445, PCGS# 5779

4226 1930-S MS67 PCGS. CAC. This delightful Superb Gem is one of the finest survivors from a mintage of just over 1.5 million pieces. The design elements are well-detailed and the impeccably preserved surfaces radiate vibrant mint luster. Population: 21 in 67 (1 in 67+), 0 finer (3/16).
From *The Somerset Collection*. NGC ID# 2446, PCGS# 5780

4227 1930-S MS66 Full Head PCGS. CAC. This Premium Gem Full Head 1930-S quarter has sharpness reminiscent of its Philadelphia counterpart. Both sides display frosty luster with a hint of champagne color. Only the usually weak shield rivets are less than fully rendered. PCGS reports 27 Superb Gems finer in Full Head. CAC: 30 in 66, 15 finer (3/16). NGC ID# 2446, PCGS# 5781

**1930-S Quarter, MS67 Full Head
Original Toning and Luster**

- 4228 1930-S MS67 Full Head PCGS. CAC.** Frosty luster and pristine surfaces deliver impressive eye appeal on this conditionally rare Superb Gem Full Head 1930-S quarter. Both sides are mostly toned olive-gold but with russet, crimson, and pine-green overtones around the borders. Liberty's head is well-defined, but the shield rivets and the eagle's breast feathers show typical softness. Population: 26 in 67 (1 in 67+) Full Head, 1 finer; CAC: 15 in 67, 0 finer (3/16). NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

- 4229 1932 MS66+ NGC.** The debut Philadelphia issue is widely sought for type collections, particularly high-end examples such as this Premium Gem. Both sides display satiny luster with champagne-gray toning and no abrasions. NGC and PCGS each list only four finer coins (2/16). NGC ID# 2447, PCGS# 5790
- 4230 1932-D MS63 PCGS.** The key issue to the Washington quarter series, struck during the bicentennial of our first president's birth, this Denver Mint piece has brilliant and untuned silver surfaces with soft, frosty mint luster. Many collectors consider MS63 to be the ideal grade, providing a pleasing coin at a similarly pleasing price. NGC ID# 2448, PCGS# 5791
- 4231 1932-D MS64 PCGS.** An attractive Choice example of this first-year, low-mintage key, with sharply detailed design elements and vibrant mint luster on both sides. The brilliant surfaces show only a few minor contact marks and overall eye appeal is terrific. NGC ID# 2448, PCGS# 5791
- 4232 1932-D MS64 PCGS.** This key issue features bold luster radiating from the untuned, silver-white surfaces that have just a glimmer of copper-gold color. The die polish near the date on this example is a diagnostic for one genuine D-mint die, as is the mintmark's squared serifs and its appearance of resting in a small depression. A few small abrasions on Washington's cheek and neck are noted, but they are undistracting.
Ex: Denver Signature (Heritage, 8/2006), lot 1355. NGC ID# 2448, PCGS# 5791
- 4233 1932-D MS64 PCGS.** A boldly struck, well-preserved Choice example of this key Denver issue, showing light golden toning and satiny luster. Finer coins are scarce and present a challenge for the budget-restricted collector. This piece is much more readily accessible. NGC ID# 2448, PCGS# 5791

**1932-D Quarter, MS65
Low-Mintage Key**

- 4234 1932-D MS65 PCGS.** Always a popular coin and the key to the series, especially at this lofty grade level, the low-mintage 1932-D Washington quarter is very scarce at the Gem grade level. Only three examples have graded higher at both services (two at PCGS, one at NGC), and not many MS65 examples are likely to compare favorably to the present piece. Speckled russet-red and sea-green patina is present on both sides, and there are no distracting abrasions on either side. A small contact mark on the eagle's neck, just below the head, is noted only for the sake of accuracy. Population: 83 in 65 (3 in 65+), 2 finer (3/16).
Ex: ANA Signature (Heritage, 4/2006), lot 638; FUN Signature (Heritage, 1/2012), lot 1166. NGC ID# 2448, PCGS# 5791

**1932-S Quarter, MS65
Lightly Toned, Conditionally Elusive**

- 4235 1932-S MS65 PCGS.** Although a handful of Plus-designated coins are arguably superior, only four Premium Gems are numerically finer than this Gem 1932-S Washington quarter at PCGS (3/16). The strike is bold, and varying shades of golden toning grace each side. Occasional tinges of deeper russet patina accent the crevices. NGC ID# 2449, PCGS# 5792
- 4236 1934 Medium Motto, FS-402, MS67+ PCGS. CAC.** Rich olive-green and caramel-gold toning blends across this lustrous and desirable Superb Gem. Only a few wispy grazes on the right obverse field preclude perfection. As of (3/16), PCGS has certified just 12 pieces as MS67+ and only two finer as MS68. PCGS# 146002 Base PCGS# 5793
- 4237 1934-D Medium Motto MS66 PCGS.** Medium Motto. An overtly original example of this little-saved Depression-era quarter, with patchy russet, forest-green, and olive-gray toning over the satiny, mattelike luster that typifies this Denver issue. A sharply struck Premium Gem. The Medium Motto is confirmed by the R in TRUST, which extends below the baseline of the surrounding letters. Rare any finer — PCGS reports just seven pieces in a finer numerical grade. NGC ID# 244C, PCGS# 5796

4238 1934-D Heavy Motto MS66 NGC. The Heavy Motto Washington quarters are easily identified by the middle point of the W in WE protruding above the other points, but the bold letters are also profoundly different, and the R in TRUST ends in a blunt tip and lacks a descender that goes beyond the baseline of the letter. The Medium Motto R in TRUST descends well below the baseline and ends in a sharp point. This Premium Gem offers lovely multicolor pastel toning over satiny, lustrous surfaces. The Light and Heavy Motto Denver issues remain unlisted in the *Guide Book* but are essential to complete variety sets. For the issue, Census: 49 in 66 (2 in 66+, 7 finer (3/16)). NGC ID# 244C, PCGS# 85796

**1934-D Quarter, Toned MS66+
Heavy Motto, Few Are Finer**

4239 1934-D Heavy Motto MS66+ PCGS. 30th Anniversary Green Label Holder. The middle point of W in WE reaches above the tops of the surrounding letters, confirming the Heavy Motto variant. A speckling of olive-gold and brown toning adds natural appeal to the obverse, with plenty of silver luster shining through. The reverse is untoned and lustrous satin-white, struck with a filled mintmark. Population: 53 in 66 (7 in 66+), 3 finer (3/16). NGC ID# 244C, PCGS# 85796

4240 1935 MS67+ PCGS. CAC. This Registry Set contender showcases virtually pristine surfaces that are aglow with satiny luster and lovely champagne toning. Boldly rendered motifs appear sharp even upon close examination, contributing to the outstanding eye appeal. Only a single coin is certified finer (3/16). NGC ID# 244D, PCGS# 5797

4241 1935-D MS67 PCGS. Frosty luster illuminates the bold design elements of this Superb Gem 1935-D Washington quarter, among the finest certified and essential for a strong Registry Set. Each side displays warm champagne toning and outstanding eye appeal. Population: 23 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 244E, PCGS# 5798

**1936-D Quarter, Rim-Toned MS67
Conditionally Elusive**

4242 1936-D MS67 PCGS. The 1936-D issue in the Washington quarter series, despite a healthy mintage exceeding 5.3 million coins, seems mostly to have slipped into circulation for the most part, and Superb Gem survivors are elusive, as they are for the 1934-D and 1935-D as well. This piece shows wine and cinnamon rim toning contrasting against silver, satiny untuned areas elsewhere. The profile of Washington is free from mentionable perturbances, as is the eagle on the reverse. Population: 20 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 244H, PCGS# 5801

4243 1936-S MS67 PCGS. CAC. A spectacular Superb Gem, with well-detailed design elements and frosty mint luster under delicate shades of lavender, gray, and golden-tan toning. Population: 50 in 67 (3 in 67+), 0 finer (3/16). NGC ID# 244J, PCGS# 5802

**1938 Quarter, Peripherally Toned MS67+
Tied for Finest at PCGS and CAC**

4244 1938 MS67+ PCGS. CAC. An essential Registry coin, tied for the finest at PCGS and boasting the added distinction of a CAC endorsement. The strike is bold, and much of each side is near-brilliant. Russet, olive, and golden peripheral toning surrounds much of the obverse. Population: 61 in 67 (6 in 67+), 0 finer; CAC: 22 in 67, 0 finer (3/16). NGC ID# 244N, PCGS# 5806

**1939-D Quarter, MS67+
Tied for Finest Certified**

4245 1939-D MS67+ PCGS. CAC. Superb Gem 1939-D Washington quarters are scarce, and none are finer than MS67+. This CAC-endorsed example is one of only four Plus-designated MS67s at PCGS (3/16). A dash of multicolor toning on the top of Washington's head and a few bits of russet around the reverse border are the only mentionable color on this piece. The remainder of each side is essentially frost-white. Population: 81 in 67 (4 in 67+), 0 finer (3/16). NGC ID# 244S, PCGS# 5809

**1939-S Quarter, MS67+
Registry Set Quality, Doubled Die Obverse**

- 4246** 1939-S Doubled Die Obverse, FS-101, MS67+ PCGS. CAC. 30th Anniversary Green Label Holder. Registry Set enthusiasts will have a difficult time exceeding the quality of this high-end Superb Gem quarter, which is tied for the finest at PCGS by virtue of its Plus designation. (Nor has NGC certified a numerically finer example.) A crescent of deep rainbow toning at the left border melds into faint iridescence at the centers of this lustrous, satiny coin. Sharply struck throughout, this is the *Cherrypickers'* obverse showing die doubling on the date and motto. Population: 80 (all varieties) in 67 (3 in 67+), 0 finer (3/16). NGC ID# 244T, PCGS# 145020

**1940-D/D Washington Quarter, MS66
In-Demand *Cherrypickers'* Variety, Rare FS-501**

- 4247** 1940-D/D FS-501 MS66 PCGS. CAC. Remnants of a wayward mintmark stand out well clear to the left of the corrected D, a dramatic and popular *Cherrypickers'* variety for a Denver date that is already scarce at the Premium Gem level regardless of variety. One of the few repunched mintmarks that are totally separated from the primary mark in any series. Thick satin luster covers both sides of this pinpoint-sharp example, frost-white with faint gold and blue overtones. Population (for the variety): 9 in 66 (1 in 66+), 0 finer (2/16). PCGS# 145556 Base PCGS# 5812

- 4248** 1941-D MS67+ PCGS. A spectacular Plus-graded Superb Gem, with impeccably preserved lustrous surfaces that show a few hints of greenish-gold toning. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 244Y, PCGS# 5815

**1943 Washington Quarter, MS67+
Attractively Toned, Few Finer**

- 4249** 1943 MS67+ PCGS. CAC. One of only eight Plus-designated MS67 coins at PCGS, trailing two MS68 pieces that are finer (3/16). This Registry-grade 1943 quarter displays blended rose-gold, mint-green, and lavender-gray toning with satin luster and bold detail. A loupe is required to detect any grade-limiting flaws on the obverse portrait, while the reverse appears virtually flawless. NGC ID# 2455, PCGS# 5820

**1943 Quarter, MS67+
Only One Coin Finer at PCGS**

- 4250** 1943 MS67+ PCGS. CAC. With only two coins finer at PCGS, this Plus-designated MS67 — one of eight at that service — is an important acquisition for the Registry enthusiast. The strike is bold, and the satiny surfaces yield warm golden toning. A tiny mark on Washington's chin appears to be all that limits the grade. NGC ID# 2455, PCGS# 5820

**1943-D Quarter, MS67+
Just One Finer at PCGS**

- 4251** 1943-D MS67+ PCGS. CAC. One of the dozen or so Plus-graded Superb Gem examples at PCGS, this radiant quarter is sharply produced and alive with satin luster. Ice-blue, mint-green, and amber-gold hues complement the smooth and appealing silver surfaces. A coin with Registry Set credentials based on the PCGS Plus designation and CAC endorsement. Population: 79 in 67 (12 in 67+), 1 finer (3/16). NGC ID# 2456, PCGS# 5821

- 4252** 1943-S Goiter, FS-401, MS64 PCGS. The obverse field is buckled near the junction of the chin and neck, and the jaw is sunken above the neck. Perhaps the best explanation is damage to the working hub, but the rarity of the variety suggests only a single working die was affected. Brilliant save for freckles of golden-brown toning on the upper obverse. Population: 10 in 64, 4 finer (3/16). PCGS# 511572 Base PCGS# 5822

**1944 Quarter, Beautifully Toned
Plus-Graded Superb Gem, Registry Coin**

- 4253 1944 MS67+ PCGS.** 30th Anniversary Green Label Holder. Attractive iridescent rainbow colors appear in a swath from the Y in LIBERTY across the hair and neck, while frosty silver luster flows across both sides of this high-end Superb Gem. The reverse shows delightful ice-blue, lavender, and champagne-gold hues. A sharply struck example with outstanding eye appeal, sure to tempt Registry Set specialists. Population: 90 in 67 (11 in 67+), 0 finer (3/16). NGC ID# 2458, PCGS# 5824

**1945 Quarter, MS67+
Pleasing Pastel Toning**

- 4254 1945 MS67+ PCGS. CAC.** The year 1945 saw a dramatic reduction in quarter dollar output at the Philadelphia Mint, from 104 million coins down to 74 million pieces. A pleasing mix of blue, lavender, and golden-russet tones covers each side of this Superb Gem, duly recognized by PCGS and CAC for its quality within the grade. Frosty luster, impeccable preservation, and strong design detail enhance the appeal. Population: 40 in 67 (3 in 67+), 2 finer (3/16). NGC ID# 245B, PCGS# 5827 Base PCGS# 5787

**1945-D Quarter, MS67+
Top-of-the-Line at PCGS**

- 4255 1945-D MS67+ PCGS. CAC.** Tied with three other Plus-graded MS67s as the finest at PCGS, a huge significance in the world of Registry Set competition. This 1945-D quarter displays bold motifs and satiny luster with irregular olive and lavender-gold toning. Seldom seen so fine with a CAC endorsement. Population: 46 in 67 (4 in 67+), 0 finer; CAC: 18 in 67, 0 finer (3/16). NGC ID# 245C, PCGS# 5828

- 4256 1947 MS67+ PCGS. CAC.** The 1947 Washington quarter is a scarce issue at the MS67 grade level, and finer coins are virtually unobtainable. This high-end Superb Gem offers sharply detailed design elements and lustrous, impeccably preserved surfaces. PCGS has graded no numerically finer examples (3/16). NGC ID# 245H, PCGS# 5833

**1950 Quarter, MS67+
Delicately Toned, Tied for Finest**

- 4257 1950 MS67+ PCGS. CAC.** A Registry Set essential, this high-end Superb Gem 1950 quarter is CAC-approved as one of the finest certified by either service. The strike is bold, and the preservation is nearly flawless. Both sides display satiny champagne luster with iridescent hues near the extreme outer peripheries. Population: 58 in 67 (5 in 67+), 0 finer (3/16). NGC ID# 245S, PCGS# 5841

- 4258 1952-D MS67 PCGS.** PCGS is particularly picky about the 1952-D quarters, having awarded just 19 Superb Gem grades at the MS67 level and none finer (3/16). NGC reports just one coin in a numerically finer grade. The surface quality of this example is outstanding, with patchy tan-brown toning on the obverse and iridescent colors at the reverse margin. Satiny mint luster bathes both sides. NGC ID# 2462, PCGS# 5850

- 4259 1954-D MS67 PCGS. CAC.** This spectacular Superb Gem displays impeccably preserved surfaces, under dusky shades of sea-green, lavender-gray, and amber toning. Sharply detailed design elements and satiny luster add to the exceptional quality. Population: 18 in 67 (1 in 67+), 0 finer (2/16). NGC ID# 43PC, PCGS# 5856

- 4260 1956-D MS67 PCGS.** This Superb Gem Washington quarter exhibits a veritable kaleidoscope of toning, especially on the obverse that ranges from orange to gold, green, and blue. The reverse is mostly ivory with peripheral iridescence. Population: 27 in 67, 0 finer (3/16). NGC ID# 246C, PCGS# 5861

**1961 Quarter, MS67 ★
Tied for Finest Certified**

- 4261 1961 MS67 ★ NGC.** Type A Reverse. Superb Gem examples of the 1961 quarter are rare, and none are finer than MS67. NGC has seen 38 submissions in this grade, of which only two are Star-designated (3/16). This piece displays satiny luster and bold motifs. Russet, olive, gold, and amber hues blend over each side, although the central reverse shows a blush of lavender-blue. NGC ID# 246M, PCGS# 5870

**1964 Quarter, MS67 ★
Delightful Obverse Toning**

4262 1964 MS67 ★ NGC. CAC. Type A Reverse. Dramatic cherry-red, sea-green, and orange-gold obverse toning explains the presence of the NGC Star. The reverse is brilliant. An essential Registry coin, among the finest certified. Census: 57 in 67 (3 in 67+, 6 in 67 ★, 1 in 67+★), 0 finer; CAC: 13 in 67, 0 finer (3/16). NGC ID# 246U, PCGS# 5876

4263 1964-D MS67 NGC. CAC. Type A Reverse. Blushes of lavender, jade-green, sun-gold, and cherry-red endow highly lustrous and essentially immaculate surfaces. Census: 84 in 67 (1 in 67+, 11 in 67 ★, 1 in 67+★), 0 finer (3/16).
Ex: FUN Signature (Heritage, 1/2013), lot 10304, which realized \$1,116.25. NGC ID# 246V, PCGS# 5877

4264 1982-P MS68 NGC. This magnificent Washington quarter offers sharply detailed design elements and vibrant mint luster, under vivid shades of electric-blue and greenish-gold toning. The impeccably preserved surfaces add to the outstanding eye appeal. Census: 2 in 68, 0 finer (3/16). NGC ID# 247U, PCGS# 5912

4265 1982-D MS67+ PCGS. This high-end Superb Gem displays sharply detailed design elements and lustrous, impeccably preserved surfaces, under shades of greenish-gold and lavender patina. Eye appeal is tremendous. Population: 33 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 247V, PCGS# 5913

4266 1992-D MS67 PCGS. Registry collectors will find the 1992-D quarter an extreme rarity in certified Superb Gem condition. This Condition Census coin is well-struck with radiant, champagne-tinged luster. Some die erosion is seen in the peripheral fields, and parallel diagonal die lines dominate the fields adjacent to the portrait. Population: 5 in 67, 1 finer (3/16). NGC ID# 248H, PCGS# 5933

PROOF WASHINGTON QUARTERS

4267 1936 PR65 PCGS. CAC. Delicate shades of greenish-gold toning visit the well-preserved surfaces of this popular proof issue. The design elements are sharply detailed throughout and the fields show slightly hazy reflectivity. NGC ID# 27HN, PCGS# 5975

**1936 Washington Quarter, PR67
First Proof Issue for the Design**

4268 1936 PR67 PCGS. The initial proof Washington quarter issue saw just 3,837 pieces struck, this Superb Gem among them. Both sides have strong mirrors, though that of the obverse is stronger and contrast is minimal. Occasional faint dapples of milky color visit otherwise silver surfaces. Population: 10 in 67, 0 finer (3/16). NGC ID# 27HN, PCGS# 5975

**1953 Quarter, PR68 Deep Cameo
Doubled Die Obverse**

4269 1953 Doubled Die Obverse, FS-101, PR68 Deep Cameo PCGS. The 1953 proof quarter is scarce in Deep Cameo grades, and this high-end Superb Gem is tied with just nine others as the finest at PCGS (3/16). This example also represents the FS-101 doubled die obverse, which shows a significant spread on the date, motto, and designer's initials. The strike is full, and the untuned surfaces yield stark white-on-black contrast. PCGS# 144448 Base PCGS# 95985

4270 1956 PR69 Deep Cameo PCGS. Quite an extraordinary coin and one that we were surprised to see such an early date on. At first glance, it looks like one of the mass-produced cameo proofs from the 1980s or 1990s. Brilliant throughout with strong cameo contrast on each side. Population: 46 in 69 Deep Cameo, 0 finer (3/16). NGC ID# 27J2, PCGS# 95988

4271 1974-S PR70 Deep Cameo PCGS. Tied with 25 others as the finest Deep Cameo proof at PCGS; NGC has not certified a single coin in perfect condition (3/16). This piece is fully struck and showcases stark contrast beneath wisps of warm golden toning. Eye appeal is superb. NGC ID# 27JE, PCGS# 96006

WALKING LIBERTY HALF DOLLARS

4272 1916 MS65 PCGS. Sharply struck and moderately toned on the obverse, the reverse is more lightly toned. Lovely magenta, golden-brown, and iridescent toning is visible on both sides. An outstanding Gem to represent the debut of this popular design. The strike is razor-sharp, with only a few trivial marks visible with a lens.
Ex: FUN Signature (Heritage, 1/2006), lot 4001.
From The Pellegrini Collection, Part II. NGC ID# 24PL, PCGS# 6566

4273 1916 MS65 PCGS. CAC. Warm champagne toning graces the glowing, mattelike luster of this Gem first-year Walker. Liberty's figure and the eagle are sharply rendered, and only a few trivial ticks preclude Premium Gem classification. CAC-endorsed in an old green label holder. NGC ID# 24PL, PCGS# 6566

**1916 Walking Liberty Half, MS66
Few Seen Finer**

- 4274 1916 MS66 PCGS.** A simply beautiful Premium Gem, the surfaces are fully lustrous with the fine granularity often associated with first-year Walkers. Both sides are fully struck, and there is not a single outwardly distracting abrasion. Delicate pastel iridescence shimmers over the sharp features in a slightly mottled fashion. While this first-year P-mint issue is relatively common in lower grades, premium quality Gems are few and far between in today's market.
Ex: *Santa Clara Signature* (Heritage, 11/2002), lot 6142. NGC ID# 24PL, PCGS# 6566

- 4275 1916-D MS65 PCGS.** This highly lustrous Gem is a splendid example of the first-year for the Walking Liberty design. This piece has excellent details and brilliant, frosty luster with wispy gold toning. PCGS has only certified 65 finer examples (3/16). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

- 4276 1916-S MS63 PCGS.** A brilliant example, frost-white and radiantly lustrous. More scarce than the other 1916 Walkers from the Philadelphia and Denver Mints, just 508,000 pieces were struck. The strike is sharp with strong definition on Liberty's head, the branch hand, and the feather detail on the eagle's trailing leg. Housed in a green label holder.
From *The Pellegrini Collection, Part II*. NGC ID# 24PN, PCGS# 6568

- 4277 1916-S MS64 PCGS.** A pleasing Choice Mint State piece, this first-year example exhibits delicate gold toning over frosty silver luster on both sides. A typical strike lacks central detail on both sides as almost always on this popular issue. NGC ID# 24PN, PCGS# 6568

**1916-S Walking Liberty Half, MS64
Old Album Toning**

- 4278 1916-S MS64 PCGS. CAC.** Once housed in an old coin board or album, this Choice 1916-S Walking Liberty half dollar displays deep russet-brown and olive peripheral toning around lighter golden-gray interiors. The strike is sharp, and there are no significant abrasions. First-year Walkers are always in demand, particularly examples of the San Francisco issue, which boasts a small 508,000-coin mintage and is scarce in Gem condition. NGC ID# 24PN, PCGS# 6568

**1916-S Walker, Luminous MS65
Few Seen Finer**

- 4279 1916-S MS65 NGC.** The 1916-S is the scarcest of the three first-year Walking Liberty half dollar issues, although a supply of MS63 and MS64 coins are usually available. This Gem example is conditionally scarce, and anything finer is rare. The strike is bold, and the champagne-tinted, glistening luster provides for outstanding eye appeal. There are no mentionable abrasions. Census: 58 in 65 (1 in 65+), 14 finer (3/16). NGC ID# 24PN, PCGS# 6568

- 4280 1917-D Obverse MS63 PCGS.** Deep, multicolored toning blankets both sides of this carefully preserved example, where olive-gold shades are the primary visual impression. Somewhat soft in the centers, the coin shows essentially full satin luster. Elsewhere, the coin does not show any distracting abrasions, or even any minute contact marks, on either the obverse or the reverse. Just 765,400 pieces were struck.
Ex: *FUN Signature* (Heritage, 1/2006), lot 4006.
From *The Pellegrini Collection, Part II*. NGC ID# 24PR, PCGS# 6570

- 4281 1917-D Obverse MS63 PCGS.** Beautifully toned surfaces offer a rich palette of colors comprising lilac, saffron, ice-blue, copper-gold, and charcoal, with rich luster prevailing throughout. An attractive and unusual example of this better-date Walking Liberty half.
Ex: *Pittsburgh Signature* (Heritage 10/2011), lot 3988. NGC ID# 24PR, PCGS# 6570

- 4282 1917-D Obverse MS64 PCGS.** A hint of rose-gold patina in the centers is accented by pale ice-blue at the rims with some russet leavings on the lower gown. The reverse offers a similar palette. Frosty luster and a decent strike on original-looking surfaces make this an extremely appealing example of this early semikey date. The Gem level is seldom seen. NGC ID# 24PR, PCGS# 6570

- 4283 1917-D Obverse MS64 PCGS.** The prevailing light rose-gray patina resolves at the rims into orange, amber, and deep charcoal-brown toning, an appealing but atypical color palette. Only a couple of ticks show on Liberty's torso. Strike weakness is noticeable on the lower gown, more design flaw than Mint defect. NGC ID# 24PR, PCGS# 6570

- 4284 1917-D Obverse MS64 PCGS.** An appealing Choice example of this popular design, with the prominent obverse mintmark. The design elements are well-detailed and the well-preserved surfaces show satiny mint luster under shades of lavender-gray and amber toning. NGC ID# 24PR, PCGS# 6570

- 4285 1917-D Obverse MS64 PCGS.** 1917 was the transitional year for branch mint Walking Liberty half dollars when the mintmark was relocated from the obverse to the reverse. This Choice Mint State piece is an early Obverse Mintmark example with brilliant silver surfaces and frosty luster. NGC ID# 24PR, PCGS# 6570

- 4286 1917-D Reverse MS62 NGC.** Attractive shades of ice-blue, champagne-gold, and lavender toning blanket the slightly textured surfaces of this well-detailed MS62 example. A bold strike and satiny mint luster adds to the outstanding eye appeal. Always an important type coin for the year, with the mintmark moved to the reverse.
Ex: *Philadelphia Signature* (Heritage, 8/2012), lot 3975.
From *The Pellegrini Collection, Part II*. NGC ID# 24PS, PCGS# 6571

**1917-D Half Dollar, MS64
Reverse Mintmark**

- 4287 1917-D Reverse MS64 PCGS.** This satiny MS64 example displays light golden toning and minimal abrasions for the grade. Impressive sharpness is seen throughout Liberty's figure and the central eagle. The 1917-D Reverse Mintmark half dollar is collectible in MS64 but scarce any finer, with just 54 such coins certified by PCGS (3/16). NGC ID# 24PS, PCGS# 6571

**1917-D Half Dollar, MS64
Mintmark On Reverse**

- 4288 1917-D Reverse MS64 PCGS. CAC.** The later Reverse Mintmark variety, scarcer in high grade than its Obverse Mintmark counterpart. This Choice CAC coin displays sharp relief elements and mattelike luster with dappled lavender-gray toning over silvery-gray surfaces. Finer examples are out of reach for most budget-restricted collectors. CAC: 19 in 64, 9 finer (3/16). NGC ID# 24PS, PCGS# 6571

**1917-D Half Dollar, MS64
Reverse Mintmark, Seldom Seen Finer**

- 4289 1917-D Reverse MS64 PCGS Secure.** More than twice as many Reverse Mintmark halves were struck in comparison to the Obverse Mintmark variety at the Denver Mint, although in finer grades the Reverse Mintmark is considerably scarcer. This satiny, near-Gem example is boldly struck through the centers, with nice thumb separation on the branch hand and visible feather detail on the eagle's trailing leg. Soft luster flows beneath faint bluish-gray patina. The few microscopic marks that exist require a lens to view and do not distract. NGC ID# 24PS, PCGS# 6571

- 4290 1917-S Obverse AU58 PCGS. CAC.** Natural silver-gray toning blankets both sides of this near-Mint Obverse Walker. Soft mint luster remains on both sides, while the motifs retain remarkably sharp definition with little discernible wear. CAC endorsed, with outstanding quality for the grade level. NGC ID# 26G7, PCGS# 6572

**1917-S Walking Liberty Half, MS62
Obverse S, Always In Demand**

- 4291 1917-S Obverse MS62 ANACS.** Housed in an early generation ANACS holder, this attractively toned Obverse Mintmark half displays lustrous, smooth surfaces beneath amber-gold shades that cover both sides. A few light-blue accents add interest. The strike is slightly soft through the centers, but otherwise sharp with above-average definition on Liberty's head and the eagle's plumage. NGC ID# 26G7, PCGS# 6572

**1917-S Half Dollar, MS62
Obverse Mintmark**

- 4292 1917-S Obverse MS62 PCGS.** The earlier Obverse Mintmark version of the 1917-S Walker, boasting a mintage of slightly less than 1 million coins. This example displays satiny luster and golden toning. The strike is sharply rendered, although minor abrasions on Liberty's figure deny a higher grade. Housed in a green label holder. From The Pellegrini Collection, Part II. NGC ID# 26G7, PCGS# 6572

**1917-S Walking Liberty Half, MS64
Scarce Obverse Mintmark Example**

- 4293 1917-S Obverse MS64 PCGS.** An attractive Choice example of this low-mintage early series date, with the mintmark on the obverse. The design elements are well-detailed, with some emerging detail showing on Liberty's wreath hand and the eagle's leg. The surfaces show satiny mint luster and traces of light gold toning, with only minor signs of contact. NGC ID# 26G7, PCGS# 6572

4294 1917-S Reverse MS63 PCGS. A brilliant, deeply frosted example of the Reverse mintmark, with blazing silver luster and a translucent suggestion of ivory-gold. The branch hand is about 60% complete, with slight thumb definition. Liberty's head is less well-defined. The strike on the eagle's leg is bold, with better feather definition on the leg than expected. Slight chatter on Liberty's leg and torso accounts for the Select Uncirculated grade.
From The Pellegrini Collection, Part II. NGC ID# 24PU, PCGS# 6573

4295 1917-S Reverse MS63 PCGS. A well-detailed Select specimen of this early-series issue, with the mintmark on the reverse. Satiny mint luster shines beneath light gold and speckled amber toning. Although the 1917-S is not particularly known for a strong strike, the present coin sharper than many and undeniably original.
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3670; Central States Signature (Heritage, 4/2012), lot 4712.
From The Pellegrini Collection, Part II. NGC ID# 24PU, PCGS# 6573

4296 1917-S Reverse MS63 PCGS. The later transitional variety, now with the Mintmark on the reverse. This example is fully lustrous slightly mellowed mint frost. The strike is above average and the overall eye appeal is excellent. NGC ID# 24PU, PCGS# 6573

4297 1918 MS64 PCGS. Brilliant save for a glimpse of lemon-gold at the rims, this lustrous and sharply struck half is one of the Philadelphia Mint's best-produced early Walkers. Eye appeal is off the charts for the present example. Blazing silver luster greets the eye from all angles, while marks are limited to some inconsequential ticks and a fine line in the right obverse field. Scarce so well-preserved and vibrant.
From The Pellegrini Collection, Part II. NGC ID# 24PV, PCGS# 6574

4298 1918-D MS62 PCGS. An interesting coin, struck from heavily clashed dies. This is a pleasing Mint State example of this better branch mint issue, showing sharp design elements and satiny, champagne-tinged luster. A dash of amber-brown toning appears near the border behind Liberty's head. NGC ID# 24PW, PCGS# 6575

4299 1918-D MS62 PCGS. A scarcer issue in Mint State grades, and here with delicate peripheral gold toning that frames the ivory luster. A pleasing piece with frosty mint surfaces. NGC ID# 24PW, PCGS# 6575

4300 1918-D MS63 NGC. Attractive, lustrous silver surfaces show just a hint of peripheral lilac patina. A desirable coin from the third year of issue, the first year on which the mintmark appears only on the reverse and a challenging piece to find above this Select Uncirculated grade. Sharply struck for the issue, with clear thumb separation on the branch hand.
Ex: Dallas Signature (Heritage, 12/2005), lot 2129.
From The Pellegrini Collection, Part II. NGC ID# 24PW, PCGS# 6575

**1918-D Half Dollar, MS64
Rarely Encountered Finer**

4301 1918-D MS64 NGC. The 1918-D is a better date, rarely seen above MS64. This Choice example remains collectible for many enthusiasts, and the satiny luster is especially pleasing. Each side shows light golden toning with speckled russet overtones. Liberty's branch hand shows significant thumb separation. NGC has seen 14 finer representatives (3/16). NGC ID# 24PW, PCGS# 6575

**1918-D Walking Liberty Half, MS64
Seldom Seen Any Finer**

4302 1918-D MS64 PCGS. The 1918-D Walking Liberty half dollar is somewhat scarce in MS64 condition, and finer examples are rare. This attractive Choice specimen exhibits well-detailed design elements, with just a touch of softness on the usual trouble spots, like Liberty's head and the eagle's leg. The lightly marked surfaces radiate vibrant mint luster and eye appeal is outstanding. PCGS has graded 31 numerically finer examples (2/16). NGC ID# 24PW, PCGS# 6575

4303 1918-S MS64 NGC. Light glimpses of amber and rose-pink contrast with untuned silver-gray on this appealing near-Gem 1918-S half dollar, conditionally elusive at this grade level and seldom seen finer. Scattered contact marks are minor, but the strike through the centers is only moderate. This in-demand issue should still see good bidding activity. NGC ID# 24PX, PCGS# 6576

4304 1918-S MS64 NGC. Challenging at the Choice Uncirculated level and very scarce any finer, this MS64 example offers silky-smooth, satiny surfaces with abundant silver luster. Fleeting gold highlights add to the eye appeal. A strong strike through the centers sets the coin apart from many representatives of this San Francisco issue, with nice head definition and thumb separation on the branch hand joining above-average feather detail on the eagle. A near-Gem — problem-free and attractive.
From The Pellegrini Collection, Part II. NGC ID# 24PX, PCGS# 6576

4305 1918-S MS64 PCGS. This impressive Choice Mint State 1918-S Walker is important in the context of the series, with only 39 finer PCGS certified examples (3/16). Both sides are frosty and fully lustrous with dappled gold toning on ivory surfaces. NGC ID# 24PX, PCGS# 6576

**1919 Half Dollar, MS63
Better Date in High Grade
From the Richmond Collection**

- 4306 1919 MS63 NGC.** Ex: Richmond Collection. Among Philadelphia issues, only the 1916 and 1921 possess lower mintages than the 1919, of which 962,000 pieces were struck. As such, it is a desirable and elusive date as far as early Walkers are concerned. In his book *The Complete Guide to Walking Liberty Half Dollars*, Fox assigns an R.4 rating ("Scarce. May or may not be available at larger shows") to 1919 halves in MS63. The surfaces of this example reveal nice luster and are well-preserved, showing only three or four minute, well-concealed marks on Liberty's figure. Warm olive-tan patina with a splash or two of ice-blue color occupies each side. While not fully struck, as is the case with many early-date Walkers, the design elements display better-than-average definition. Liberty's head shows very nice detail, and the left thumb area is partially defined. Most all of the feathers show on the eagle.
Ex: *Palm Beach Signature* (Heritage, 3/2005), lot 5847; *Dallas Signature* (Heritage, 12/2005), lot 2133.
From *The Pellegrini Collection, Part II*. NGC ID# 24PY, PCGS# 6577

1919 Walker, Upper-End MS63

- 4307 1919 MS63 PCGS.** The 1919 is a slightly better date in Uncirculated condition, being particularly rare in MS65 or finer. This collectible Select example displays impressive, razor-sharp detail and smooth, softly frosted luster with a hint of champagne toning. There are no obvious abrasions, although a few faint lines in the fields preclude a finer grade. NGC ID# 24PY, PCGS# 6577

1919 Walker, Champagne-Toned MS64+

- 4308 1919 MS64+ PCGS. CAC.** Frosty luster and light champagne toning adorn each side of this high-end Choice 1919 Walking Liberty half dollar. Finer coins are scarce, and few in this grade and higher are CAC-endorsed. The present piece is slightly weak on Liberty's thigh and branch hand but is otherwise sharp. CAC: 17 in 64, 17 finer (3/16). NGC ID# 24PY, PCGS# 6577

- 4309 1919-D AU53 ANACS.** Only a touch of wear shows on the well-detailed design elements of this attractive Walking Liberty half dollar, and the lustrous surfaces are free of large or distracting abrasions. Pleasing shades of greenish-gold toning add to the strong antique eye appeal. NGC ID# 24PZ, PCGS# 6578

**1919-D Walking Liberty Half, AU58
Lustrous Fields**

- 4310 1919-D AU58 PCGS.** A partially lustrous near-Mint example of this better Denver issue, showing mottled olive-gold and russet toning over each side. The central portions of the eagle and Liberty's figure show expected softness, although the fields are free of distracting abrasions. A loupe is required to detect any evidence of wear. NGC ID# 24PZ, PCGS# 6578

**1919-D Walking Liberty Half Dollar, MS61
Elusive Issue in Mint State**

- 4311 1919-D MS61 ANACS.** The 1919-D is one of the premier condition rarities in the Walking Liberty series, as very few high-grade examples were saved out of the smallish mintage of 1.16 million pieces. This well-struck Mint State example shows the obverse covered with even gray patina while the reverse is much lighter in hue.
From *The Pellegrini Collection, Part II*. NGC ID# 24PZ, PCGS# 6578

- 4312 1919-S AU53 PCGS.** Light wear visits both sides of this attractive example that retains traces of mint luster on its light gray surfaces. This piece will appeal to a wide range of collectors and we expect strong bidding when it crosses the auction block. NGC ID# 24R2, PCGS# 6579

**1919-S Half Dollar, Toned MS63
Elusive Better Series Date**

- 4313 1919-S MS63 PCGS.** Charcoal and reddish-brown patina cover both sides of this Select silver-gray coin. The strike is well-executed for the issue, being only marginally deficient on the eagle's breast and leg feathers. While some may contend that the coin has a somewhat subdued luster, the originality of this elusive S-mint Walker could never come under question. The 1919-S Walking Liberty half is a better date and a conditionally elusive entry in the series.
Ex: FUN Signature (Heritage, 1/2006), lot 4024, which realized \$7,188.
From The Pellegrini Collection, Part II. NGC ID# 24R2, PCGS# 6579

**1920-D Half Dollar, MS62
Better Denver Issue in Mint State**

- 4314 1920-D MS62 NGC.** A distinctively toned, visually impressive example of this early Denver Mint issue. The obverse is brilliant, yet the reverse displays a rich, ice-blue patina with lilac overtones. Marks are limited to the central obverse, which shows some incompleteness of strike through the center, while the reverse is somewhat bolder with a few small contacts hidden in the plumage. Vibrant satin mint luster gleams from both sides.
From The Pellegrini Collection, Part II. NGC ID# 24R4, PCGS# 6581

**1920-D Half Dollar, MS62
Challenging Denver Issue**

- 4315 1920-D MS62 PCGS.** Satiny luster illuminates a hint of light golden toning on each side of this Mint State 1920-D Walking Liberty half. Liberty's branch hand is a trifle soft, but the strike is otherwise sharp throughout. Light, scattered abrasions define the grade but none are individually significant. NGC ID# 24R4, PCGS# 6581

**1920-D Half Dollar, MS63
Clean Surfaces for the Grade**

- 4316 1920-D MS63 PCGS.** Consistent with the issue's reputation, this Select 1920-D Walking Liberty half dollar is deficiently struck on the central devices, although a lack of serious abrasions balances the eye appeal. Both sides are satiny and have a hint of champagne color. The 1920-D is a better date, elusive in finer Mint State grades. NGC ID# 24R4, PCGS# 6581
- 4317 1920-S MS61 NGC.** The 1920-S is underappreciated compared to its Denver counterpart, but Mint State coins are scarce. Dappled crimson patina appears near the borders, but each side is virtually brilliant with shimmering frost. The devices are well-struck, and marks are unobtrusive. NGC ID# 24R5, PCGS# 6582
- 4318 1920-S MS63 NGC.** Although unimpressive in terms of mintage (more than 4.6 million coins), the 1920-S Walker does warrant attention in the finer Mint State grades due to conditional scarcity. This accessible Select example displays satiny gray-gold luster with tinges of olive near the lower obverse border. Liberty's branch hand shows the usual minor strike weakness. NGC ID# 24R5, PCGS# 6582

1920-S Walking Liberty Half, Satiny MS64

- 4319 1920-S MS64 PCGS.** This near-Gem displays a slightly above-average strike, with Liberty's branch hand showing a modicum of detail. Subtle gold-gray shadings and a few dots of deeper color appear on each side. Strong eye appeal is present for this early S-mint Walker, which becomes conditionally scarce any finer. Satiny luster appears throughout both sides. PCGS reports only 59 submissions at the Gem level or finer (2/16).

Ex: Central States Signature (Heritage, 4-5/2009), lot 2841, which realized \$3,450; Ted Sierra Registry Set / ANA World's Fair of Money Auction (Stacks Bowers, 8/2012), lot 9200, brought \$3,966.

From The Pellegrini Collection, Part II. NGC ID# 24R5, PCGS# 6582

1920-S Half Dollar, MS64

Elusive in Finer Grades

- 4320 1920-S MS64 PCGS.** The 1920-S is a better date in high grade, particularly so above MS64. This Choice example remains within the grasp of most collectors of Mint State coins. The central portions of the devices are weak, as usual, but there are no severe abrasions. The fields show mint-made die striations from die lapping. Both sides have russet-gold toning. CAC: 18 in 64, 18 finer (3/16). NGC ID# 24R5, PCGS# 6582

1921 Walking Liberty Half Dollar, MS62

Low-Mintage Key Date

- 4321 1921 MS62 NGC.** From a low mintage of 246,000 pieces, the 1921 Walking Liberty half dollar is one of the keys to the series, and examples in Mint State grades are especially elusive. This attractive MS62 specimen shows just a touch of the usual softness on Liberty's wreath hand and the eagle's leg, and the lustrous surfaces show the minimum number of minor contact marks for the grade.

From The Pellegrini Collection, Part II. NGC ID# 24R6, PCGS# 6583

1921 Walking Liberty Half, MS63

Frosted Mint Luster

- 4322 1921 MS63 PCGS.** The 1921 is the most-saved of the three issues from this year, even though it has the second-lowest business strike mintage in the entire series. This brilliant example shows only slight high-point softness on the central devices. The surfaces are lustrous, and the only notable marks are in the crook of Liberty's left (facing) elbow and above the heel. NGC ID# 24R6, PCGS# 6583

- 4323 1921-D — Cleaning — PCGS Genuine. AU Details.** The 1921-D is a low-mintage key in the Walking Liberty series. This attractive specimen is well-detailed and lightly worn, but the surfaces show some evidence of a light cleaning, long ago. The surfaces are remarkably free of even minor abrasions. NGC ID# 24R7, PCGS# 6584

1921-D Half Dollar, AU53

Original Toning, Partially Lustrous

- 4324 1921-D AU53 PCGS.** A pleasing key-date representative with mottled amber toning over satiny champagne surfaces. Wear is minor, as much of the weakness on the central eagle and Liberty's figure is due to a deficient strike — not unusual on this elusive Denver issue. This piece retains areas of luster in the fields. NGC ID# 24R7, PCGS# 6584

1921-D Half Dollar, MS62

Important Denver Issue

- 4325 1921-D MS62 PCGS.** Just 208,000 pieces were struck, making this Denver date a key issue of unceasing collector demand. Satiny luster glows beneath attractive, slate-gray surfaces that reveal remarkably few marks for the grade. The strike is sharp except for the usual blending through the centers. NGC ID# 24R7, PCGS# 6584

1923-S Half Dollar, Lightly Toned MS63

- 4326 1923-S MS63 PCGS.** Only the San Francisco Mint struck half dollars between 1921 and 1929, and coinage was intermittent. The 1923-S becomes elusive in the finer Mint State grades and is an essential acquisition for the complete date set. The present MS63 coin exhibits pale gold and lavender toning. Some strike weakness is seen on the central devices, as usual, and a few marks in the right obverse field limit the grade. NGC ID# 24R9, PCGS# 6586

1923-S Half Dollar, Rim-Toned MS64

- 4327 1923-S MS64 PCGS.** This lovely near-Gem boasts light rose patina at the margins on each side complementing silver-white, untoned centers. The strike is a tad soft — not overly so — on Liberty's head and branch hand and the eagle's right (facing) leg, as is normal for the issue. Soft luster prevails throughout surfaces that are relatively unabraded and extremely attractive. The 1923-S is much more elusive only one grade point finer, where PCGS reports 43 submissions in MS65 (three in MS65+) and nine higher (2/16).
Ex: Ted Sierra PCGS Registry Set / Philadelphia ANA Auction (Stacks Bowers, 8/2012), lot 9205, which brought \$5,141.
From The Pellegrini Collection, Part II. NGC ID# 24R9, PCGS# 6586

- 4328 1927-S AU58 PCGS. CAC.** A better date in Mint State with strong demand also in the upper AU grades. This near-Mint 1927-S Walker displays lustrous fields with light golden toning. Liberty's branch hand is slightly soft, and the fields exhibit faint parallel die striae, as is often seen on San Francisco issues of this year. NGC ID# 24RA, PCGS# 6587

**1927-S Half Dollar, MS64
Softly Lustrous, Modestly Toned**

- 4329 1927-S MS64 PCGS.** The 1927-S Walker is scarce above MS64, making the present coin ideal for the budget-conscious collector. The fields display satiny luster and light golden toning that deepens toward the borders. Some strike softness is seen on the central high points of the figure and eagle, and the eagle shows a prominent die crack across its wing. NGC ID# 24RA, PCGS# 6587

-
- 4330 1929-D MS65 PCGS.** A fully lustrous Gem, this 1929-D is an important piece earmarked for a high quality PCGS Registry set. This piece has brilliant silver luster with full mint frost and untoned obverse and reverse surfaces. NGC ID# 24RC, PCGS# 6589

- 4331 1929-S MS63 PCGS.** A delightful Select Mint State piece with excellent eye appeal, this frosty and fully lustrous example has a trace of gold toning on each side. NGC ID# 24RD, PCGS# 6590

- 4332 1929-S MS63 PCGS.** A tinge of golden toning does little to impact the strong silver luster that radiates from beneath the sparse patina, while the reverse is brilliant save for a dramatic splash of rainbow toning in the lower right quadrant. The eagle is sharply struck, although Liberty's branch hand lacks separation. A few tiny marks do not diminish the smooth and vibrant eye appeal. Housed in a green label holder.
From The Pellegrini Collection, Part II. NGC ID# 24RD, PCGS# 6590

- 4333 1929-S MS64 PCGS.** A delightful Choice Mint State example, this lustrous piece has frosty silver surfaces and excellent design definition with no toning on either side. A splendid piece for an advanced collection. NGC ID# 24RD, PCGS# 6590

**1933-S Half Dollar, MS65
Very Scarce With CAC Seal**

- 4334 1933-S MS65 PCGS. CAC.** A splendid olive-gold Gem. The strike is full and the fields display only wispy contact. The devices show just a couple of minor reed impressions. The first Walking Liberty issue from any facility since 1929, due to the Great Depression. Housed in a green label holder. NGC ID# 24RE, PCGS# 6591

**1933-S Half Dollar, MS65+
Lustrous and Well-Struck**

4335 1933-S MS65+ PCGS. The final year of San Francisco-only half dollar coinage was 1933. The 1933-S had a mintage of nearly 1.8 million coins, but survivors are usually only available through MS65. This Plus-designated coin will have special appeal to quality-conscious collectors. Liberty's branch hand shows partial thumb separation, and the head is bold. A dusting of olive toning in the right obverse field is the only trace of color on that side, while the reverse has amber and olive speckles near the right-hand border. NGC ID# 24RE, PCGS# 6591

4336 1934 MS67 PCGS. CAC. Mint-fresh, frosty luster adorns each side of this Superb Gem 1934 Walker, showing wisps of golden toning that add to the eye appeal. Liberty's branch hand shows the only mentionable weakness, as usual. PCGS has seen only eight finer representatives. CAC: 33 in 67, 1 finer (3/16). NGC ID# 24RF, PCGS# 6592

4337 1934-D MS66 PCGS. Small D. Golden-brown and apple-green toning fill design crevices of this otherwise brilliant Premium Gem. Lustrous and well struck with pleasing preservation. A Great Depression issue rarely encountered any finer. NGC ID# 24RG, PCGS# 6593

4338 1934-D MS66 PCGS. CAC. Small D. Wisps of honey-gold toning accompany the lustrous surfaces of this well struck Premium Gem. The branch hand and skirt lines show virtually complete detail. Carefully preserved, and a great rarity any finer. NGC ID# 24RG, PCGS# 6593

4339 1934-S MS65 ANACS. Variegated pumpkin-gold and jade-green dominate the margins, although the open fields and devices are only lightly toned. This thoroughly lustrous Gem is beautifully preserved and provides pleasing eye appeal. The skirt lines and cheek are well struck and the thumb of the branch hand shows clear separation. *Ex: New York Signature (Heritage, 12/2011), lot 3842; Philadelphia Signature (Heritage, 8/2012), lot 3993. From The Pellegrini Collection, Part II.* NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS65
Iridescent Luster**

4340 1934-S MS65 PCGS. The 1934-S is a fairly available date, although the certified population declines somewhat above MS65. This collectible Gem example displays razor-sharp design elements amid frosty, iridescent luster. There are no significant abrasions, and the eye appeal is pleasing for the grade. NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS65
Razor-Sharp Strike**

4341 1934-S MS65 PCGS. CAC. The San Francisco Mint coined more than 3.6 million Walking Liberty half dollars in 1934, a considerable production increase from previous years. Although the issue is more available in high grade than its predecessors, it still presents a formidable challenge in MS65, especially as sharply struck and eye-appealing as this CAC-approved Gem. Splashes of golden-olive patina grace the otherwise brilliant, frosty surfaces. Full thumb separation, complete skirt lines, and the absence of noteworthy marks define this offering. NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS66
Sharp Strike, Attractive Original Surfaces**

4342 1934-S MS66 PCGS. Tinges of rose patina embrace this silver-gray Middle Series Walker to confirm its attractive, original patina. More sharply struck than the vast majority of the strike-challenged San Francisco issue, the well-defined head and split thumb are pleasant surprises, as is the level of detail on the eagle's trailing leg. A lovely, softly frosted Premium Gem, only moderately available at the MS66 level and rare any finer. PCGS reports just eight numerically finer coins (2/16). NGC ID# 24RH, PCGS# 6594

**1934-S Walking Liberty Half, MS66
Most Elusive Middle Series Issue**

4343 1934-S MS66 PCGS. Among middle-date Walking Liberty half dollars, the 1934-S is the most elusive issue, from a reported mintage of 3.6 million pieces. This well-preserved Premium Gem exhibits well-detailed design elements, with a touch of softness on Liberty's head and vibrant mint luster throughout. Hints of emerald-green and violet toning visit the peripheries. PCGS records only eight finer submissions (2/16). NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, Exceptional MS66
Seldom Seen With CAC Endorsement**

- 4344 1934-S MS66 PCGS. CAC.** Light rose-gold patina graces both sides of this exceptionally well-preserved and powerfully struck Premium Gem 1934-S half dollar. Liberty's head, the branch hand, and the eagle all boast a wealth of detail seldom seen even on this generally well-produced issue. PCGS reports only eight Superb Gems finer. CAC: 30 in 66, 6 finer (3/16). NGC ID# 24RH, PCGS# 6594

**1935 Half Dollar, Frosty MS67
Only One Coin Finer at PCGS**

- 4345 1935 MS67 PCGS.** This mid-series Philadelphia issue is scarce in Superb Gem condition, and coins grading finer than the present MS67 example are prohibitively rare. This piece displays vibrant, frosty luster and untuned, unabraded surfaces. Liberty's branch hand shows the only measurable softness. Population: 50 in 67 (3 in 67+), 1 finer (3/16). NGC ID# 24RJ, PCGS# 6595
- 4346 1935-D MS65 PCGS.** A scarce Denver Mint issue, the 1935-D becomes challenging in MS65 and it is very scarce any finer. Brilliant, frosty mint luster coruscates over the smooth surfaces of this dazzling-white Gem. As always for this Denver issue, the strike is a bit incomplete through the centers but sharp elsewhere. Terrific Mint-fresh appeal. NGC ID# 24RK, PCGS# 6596
- 4347 1935-D MS65 PCGS. CAC.** This spectacular Gem is lightly toned in shades of champagne-gold, with vibrant mint luster and outstanding eye appeal. The design elements are well-detailed despite a touch of the customary softness at the centers. The fields are smooth and satiny. A few tiny reeding marks are noted on Liberty's lower gown. CAC endorsed and hard to find significantly nicer than this attractive MS65 example.
Ex: Dallas Signature (Heritage, 11/2006), lot 935; Central States Signature (Heritage, 4/2012), lot 4746.
From The Pellegrini Collection, Part II. NGC ID# 24RK, PCGS# 6596
- 4348 1935-S MS65 PCGS.** Among the middle dates, the 1935-S ranks second to only the 1934-S in scarcity. This lustrous and attractive Gem is essentially untuned with frosty brilliance. Sharply struck for the issue, with nice head detail and some definition on the branch hand and the eagle's leg. There are no significant marks to report. NGC ID# 24RL, PCGS# 6597
- 4349 1937 MS67 PCGS.** A delightful Superb Gem, with well-detailed design elements that show definite separation between Liberty's thumb and fingers on the wreath hand. The impeccably preserved surfaces radiate vibrant mint luster with outstanding eye appeal. PCGS has graded five numerically finer examples (3/16). NGC ID# 256A, PCGS# 6601

- 4350 1937 MS67 PCGS. CAC.** The 1937 Walking Liberty half dollar is virtually unobtainable in grades above MS67. This delightful Superb Gem displays sharply detailed design elements and vibrant mint luster throughout. PCGS has graded five numerically finer examples (3/16). NGC ID# 256A, PCGS# 6601

- 4351 1937-S MS66+ PCGS.** A remarkably well-preserved, frosty 1937-S half with champagne-toned original "skin." The fields are especially clean. Liberty's head and the eagle's trailing leg show bold definition, while Liberty's branch hand is slightly soft. PCGS has seen 35 Superb Gems finer (3/16). NGC ID# 24RT, PCGS# 6603

- 4352 1938 MS67 PCGS.** 30th Anniversary Green Label Holder. This impressive Superb Gem shows some separation between Liberty's thumb and fingers on the wreath hand and some emerging detail on the eagle's leg, the usual problem areas for the Walking Liberty half dollar. The impeccably preserved surfaces show vibrant mint luster under shades of greenish-gold and violet toning. Population: 95 in 67 (2 in 67+), 1 finer (3/16). NGC ID# 24RU, PCGS# 6604

- 4353 1938-D MS65 PCGS.** A lustrous pearl-gray Gem with wisps of golden-brown toning. The branch hand is merged but the remainder of the strike is good. Minor grazes on the right obverse field determine the grade. A popular low mintage issue. NGC ID# 24RV, PCGS# 6605

- 4354 1938-D MS65 ★ NGC.** Faint die polishing lines in the fields leave this Gem 1938-D Walker with a satiny silver hue that has been awarded the Star designation for eye appeal. Liberty's branch hand is slightly weak, but the strike is otherwise well-executed. A few bits of russet toning are seen around the obverse rim. NGC ID# 24RV, PCGS# 6605

- 4355 1938-D MS66 PCGS.** This sharply detailed Premium Gem exhibits impeccably preserved surfaces with vibrant mint luster on both sides. A few hints of greenish-gold and lavender toning add to the outstanding eye appeal. PCGS has graded 43 numerically finer examples (3/16). NGC ID# 24RV, PCGS# 6605

- 4356 1938-D MS66 PCGS. CAC.** This spectacular Premium Gem exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's wreath hand. Satiny mint luster radiates from the impeccably preserved surfaces and eye appeal is terrific. PCGS has graded 43 numerically finer examples (3/16).
From The Somerset Collection. NGC ID# 24RV, PCGS# 6605

- 4357 1938-D MS66+ PCGS.** Mottled lemon-gold and amber toning warms each side of this high-end Premium Gem 1938-D Walker. The strike is slightly soft on Liberty's branch hand and the eagle's trailing leg, but the design elements are otherwise well-defined. Finer examples are infrequently seen. NGC ID# 24RV, PCGS# 6605

- 4358 1938-D MS66+ PCGS. CAC.** This key Denver issue is seldom seen above MS66, a barrier which this Plus-graded CAC coin nearly breaches. Silvery-lavender and champagne hues intermingle over frosty, unabraded surfaces. Slight weakness is seen on Liberty's branch hand, but the allegorical figure's head is intricately detailed. NGC ID# 24RV, PCGS# 6605

- 4359 1938-D MS66+ PCGS. CAC.** The 1938-D Walking Liberty half dollar is always a popular issue with collectors due to its low mintage under a half-million coins. This piece offers satiny silver-gray surfaces with glints of jade and gold. The bold strike includes a split thumb and excellent head detail on Liberty. Population: 51 in 66+, 43 finer. CAC has endorsed only 18 examples at the MS67 level (3/16). NGC ID# 24RV, PCGS# 6605

- 4360 1939-S MS67 PCGS. CAC.** 30th Anniversary Green Label Holder. The gleaming silver-white surfaces are free of distracting contact marks on both sides, even the fragile, open, usually abraded right obverse field. There are only rudimentary signs of a thumb on Liberty's branch hand. Tied for the finest certified at PCGS and the finest endorsed at CAC (3/16). NGC ID# 24RY, PCGS# 6608

- 4361 1939-S MS67 PCGS. CAC.** A scarce CAC-approved Superb Gem example of this San Francisco issue, among the finest at PCGS (2/16). A hint of iridescent champagne toning graces the frosty, mint-fresh luster, while a loupe fails to reveal even trivial contact. Eye appeal is exceptional. NGC ID# 24RY, PCGS# 6608

1940 Half Dollar, Well-Preserved MS68

- 4362 1940 MS68 PCGS.** The unusual but attractive obverse toning, predominantly copper-orange, complements a rectangle of untuned silver-white, clearly caused by something that covered that area for years when the natural toning process was occurring. The reverse is untuned. Both sides show a notable lack of marks amid frosty luster. The 1940 Walking Liberty half is seldom seen so fine. Population: 28 in 68, 0 finer (3/16). NGC ID# 24RZ, PCGS# 6609

- 4363 1940-S MS66 PCGS. CAC.** This remarkable Premium Gem has an exceptional strike for a 1940-S Walker, exhibiting full skirt lines and a trace of thumb detail on the obverse. Wisps of champagne toning enhance the reflective silver surfaces of this fully lustrous beauty. PCGS has only certified 13 finer (3/16). NGC ID# 24S2, PCGS# 6610

- 4364 1940-S MS66+ PCGS.** This high-end Premium Gem exhibits well-detailed design elements with just a touch of the usual softness on the wreath hand and eagle's leg. The well-preserved surfaces display radiant mint luster and a few hints of lavender and golden-tan toning. PCGS has graded 13 numerically finer examples (3/16). NGC ID# 24S2, PCGS# 6610

- 4365 1941-S MS66 PCGS. CAC.** The 1941-S is conditionally rare in grades above MS66. This attractive Premium Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, with outstanding eye appeal. PCGS has graded nine numerically finer examples (3/16). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

- 4366 1943 MS67+ PCGS. CAC.** A mere hint of olive-gold patina visits this pristine and lustrous Superb Gem. The strike is bold and the eye appeal is remarkable. An outstanding representative of the type. Unlike many if not most 1943-dated half dollars, no obverse die doubling is apparent. NGC ID# 24S9, PCGS# 6618

1943-S Half Dollar, MS67 Attractive Pastel Toning

- 4367 1943-S MS67 PCGS. CAC. FS-101.** Large S. Light to medium honey-gold toning embraces this lustrous and virtually pristine half dollar. Well struck on Liberty's head and skirt lines, though the branch hand is incomplete. IN GOD WE TRUST and the bottom of the skirt are die doubled, as often seen on this World War II issue. Population: 41 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 24SB, PCGS# 6620

1943-S Half Dollar, MS67 Attractive Pastel Toning

- 4368 1943-S MS67 PCGS. CAC. FS-101.** Trumpet tail S. Pastel ice-blue and almond-gold toning graces this lustrous and exceptionally unabraded Superb Gem. The strike is sharper than expected, although the branch hand and skirt lines are incomplete. FS-101 is an available variety with minor obverse die doubling on IN GOD WE TRUST and the base of the skirt. Population: 41 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 24SB, PCGS# 6620

- 4369 1944 MS67 PCGS. CAC.** Remarkable forest-green, fire-red, and orange-gold toning endow this lustrous and pristine Superb Gem. The strike is precise except on the branch hand fingers. A more colorful obverse would be a great challenge to secure. NGC ID# 24SC, PCGS# 6621

1944 Half Dollar, MS67+ Well-Struck S-Mint from the War Years

- 4370 1944 MS67+ PCGS.** 30th Anniversary Green Label Holder. Even in high Uncirculated grades, the 1944 San Francisco issue seldom shows a sharp strike with greater than 60% definition on Liberty's head, branch hand, or the eagle's trailing leg. This Plus-graded Superb Gem is an exception, with a bold strike that is well above average in all three areas. Attractive amber-gold toning at the left obverse border joins lustrous, frost-white surfaces on the reverse for great eye appeal. Population: 15 in 67+, 1 finer (3/16). NGC ID# 24SC, PCGS# 6621

- 4371 1944-S MS66+ PCGS. CAC.** The Large S mintmark has a repunched upper left serif. A brilliant and lustrous Premium Gem with exemplary preservation and outstanding eye appeal. The strike is indistinct on the branch hand, usual for this wartime San Francisco issue. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

**1945-D Half Dollar, MS67+
None Finer at PCGS**

4372 1945-D MS67+ PCGS. CAC. Tied for the finest at PCGS, this high-end Superb Gem 1945-D Walker is one of 13 MS67 coins that have achieved a Plus designation (3/16). The eagle's trailing leg and Liberty's branch hand show trivial softness, but the remainder of each side is bold. Potent luster shines through deep original toning, which includes lavender-gray and mint-green over the obverse interior with crimson-gold around the border and a champagne reverse. NGC ID# 24SG, PCGS# 6625

4373 1946 MS67 PCGS. Razor-sharp definition is evident on all design elements of this delightful Superb Gem, and the impeccably preserved surfaces radiate vibrant mint luster, with a few hints of pale gold toning. Population: 61 in 67 (4 in 67+), 0 finer (3/16). NGC ID# 24SJ, PCGS# 6627 Base PCGS# 6627

4374 1946 Doubled Die Reverse, FS-801, MS65 PCGS. Strong doubling on the wings, sapling, and E PLURIBUS UNUM identify the impressive FS-801. Light to medium golden toning accompanies this lustrous and unabraded Gem. The strike is sharp except for the index finger of the branch hand. Population: 42 in 65 (1 in 65+), 16 finer (3/16). NGC ID# 24SJ, PCGS# 145152 Base PCGS# 6632

**1946 FS-801 Half Dollar, MS66+
Doubled Die Reverse**

4375 1946 Doubled Die Reverse, FS-801, MS66+ PCGS. CAC. The 1946 Doubled Die Reverse is the sole die variety listed for the series in the 2016 *Guide Book*. It merits that status due to prominent doubling on the plumage and PLURIBUS UNUM. Light golden toning graces this lustrous and well preserved Premium Gem. The strike is good despite blending on the fingers of the branch hand. NGC ID# 24SJ, PCGS# 145152 Base PCGS# 6632

4376 1946-D MS67 PCGS. CAC. This superb 1946-D Walker exhibits frosty, undeniably original luster shining through soft champagne-gray and lilac patina. The design elements are pleasantly well-defined and close study with a loupe confirms the outstanding level of preservation. Population: 82 in 67 (2 in 67+), 0 finer (3/16). NGC ID# 24SK, PCGS# 6628

4377 1946-S MS67 PCGS. A lustrous and pristine stone-white Superb Gem. The strike is good despite some blending on the central skirt lines and branch hand. A vertical die crack traverses the eagle's body. Population: 70 in 67 (4 in 67+), 0 finer (3/16). NGC ID# 24SL, PCGS# 6629

4378 1947 MS67 PCGS. 30th Anniversary Green Label Holder. Vivid shades of burnt-orange and greenish-gold toning visit the impeccably preserved obverse surfaces of this impressive Superb Gem, while the reverse remains essentially brilliant. The design elements are well-detailed and both sides exhibit vibrant mint luster. Population: 63 in 67 (4 in 67+), 0 finer (3/16). NGC ID# 24SM, PCGS# 6630

**1947-D Walking Liberty Half, MS67
Conditionally Scarce**

4379 1947-D MS67 PCGS. The availability of this final-year Denver issue dramatically plunges at the MS67 grade level, and anything finer is almost unknown. This piece showcases thick mint frost over unabraded surfaces. The design elements are boldly rendered. A hint of ice-blue graces the interiors while a frame of lemon-gold surrounds the peripheries. Population: 33 in 67 (3 in 67+), 0 finer (3/16). NGC ID# 5ESK, PCGS# 6631

4380 1947-D MS67 NGC. A well-preserved and highly lustrous ice-blue and almond-gold Superb Gem. The strike is crisp, although peripheral elements appear slightly indistinct due to long-in-use dies. Census: 58 in 67 (2 in 67+, 6 in 67 ★), 1 finer (3/16). NGC ID# 5ESK, PCGS# 6631

**PROOF WALKING LIBERTY
HALF DOLLARS**

4381 1936 PR63 PCGS. This fully struck Select proof is an ideal first-year proof for the budget-restricted collector, showing a hint of champagne toning over subtly contrasted surfaces. The mirroring in the fields is highly reflective. Housed in an old green label holder. NGC ID# 27V4, PCGS# 6636

4382 1936 PR64 PCGS. The 1936 is the scarcest issue in the proof Walking Liberty half dollar series, boasting a debut mintage of 3,901 coins. This Choice example is appealing for the grade with light champagne toning and a hint of contrast on the obverse. Housed in an old green label holder. NGC ID# 27V4, PCGS# 6636

4383 1936 PR64 PCGS. A well struck Choice proof with medium green-gold toning and pleasing preservation. The low mintage key of the seven-year proof type. Encapsulated in a green label holder. Ex: *FUN Signature (Heritage, 7/2014)*, lot 3567, which realized \$2,232.50. NGC ID# 27V4, PCGS# 6636

1936 Walking Liberty Half, Rim-Toned PR65

- 4384** 1936 PR65 PCGS. Light rim toning is slightly more perceptible on the reverse of this attractive first-year Gem proof Walking Liberty half. The issue is a perennial favorite for type collections, and this pleasingly sharp, problem-free example should find numerous willing bidders when it crosses the block. NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, Mirrorlike PR65
First Proof Walker**

- 4385** 1936 PR65 PCGS. The short series of proof Walking Liberty halves is an eminently attainable set in Gem or finer conditions, although the debut 1936 proof is the lowest-mintage issue of the short series. This is a gleaming, silver-mirrored example, housed in an old green label holder. Fully struck, the brilliant surfaces show a faint halo of powder-gray patina at obverse border but no visible hairlines or other problems. The eye appeal is excellent. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, Faintly Contrasted PR65

- 4386** 1936 PR65 PCGS. A lovely champagne-tinged Gem proof example of the debut proof Walking Liberty half dollar, showing a hint of cameo contrast on each side. The mirroring is deep and watery, and there are no mentionable hairlines or contact marks in the fields. The 1936 is the scarcest proof Walker in high grade, due to its small mintage of 3,901 pieces. NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, PR66
Inaugural Proof Issue**

- 4387** 1936 PR66 PCGS. CAC. Proof Walking Liberty half dollar production took place for the first time in 1936. The inaugural total amounted to 3,901 specimens. Comparable Premium Gem proofs are scarce, but obtainable for a price. Brilliant surfaces display attractive powder-blue accents and razor-sharp strike detail, as one would expect of a proof. This lovely CAC-endorsed example is sure to appeal to a wide spectrum of collectors. NGC ID# 27V4, PCGS# 6636

-
- 4388** 1937 PR67+ PCGS. CAC. This high-end Superb Gem displays virtually pristine surfaces, with deeply reflective fields and attractive shades of greenish-gold toning. The design elements are sharply detailed and eye appeal is exceptional. PCGS has graded 10 numerically finer examples (3/16). NGC ID# 5ESS, PCGS# 6637

**1938 Half Dollar, PR68
Subtle Field-Motif Contrast**

- 4389** 1938 PR68 NGC. Proof Walking Liberty halves are extremely rare with a Cameo designation, making coins such as this top-grade 1938 — with a hint of contrast on each side — highly sought-after. This piece is fully struck and beautifully preserved, showing brilliant interiors and a touch of gold toning around the extreme outer periphery. Census: 59 in 68 (7 in 68 ★), 0 finer (3/16). NGC ID# 27V6, PCGS# 6638

-
- 4390** 1939 PR67+ NGC. CAC. A high-end, brilliant proof, struck from fresh dies that show deeply reflective fields and fully rendered relief elements. No die polishing fades the sun rays or the eagle's feathers. This piece is visually outstanding and even has a hint of field-device contrast. Finer coins are scarce. NGC ID# 5ESU, PCGS# 6639

1939 Walker, Brilliant PR68

- 4391 1939 PR68 PCGS.** This brilliant, immaculately preserved high-end Superb Gem proof 1939 Walking Liberty half dollar displays needle-sharp detail and deeply reflective mirrors. The obverse is minutely contrasted, the reverse less so. Eye appeal is outstanding. Population: 38 in 68, 0 finer (3/16). NGC ID# 5ESU, PCGS# 6639

1940 Half Dollar, PR68 Among the Finest Certified

- 4392 1940 PR68 PCGS.** Although plentiful in lower grades, few 1940 proof Walkers survive at the PR68 level and none are numerically finer. This piece is fully struck and reflective, showing an intrusion of olive-gold toning around the borders. The eagle's feathers and the sun rays are boldly defined, indicating that fresh dies were employed. On proof Walking Liberty halves, it is not unusual for the shallow details to be softened by aggressive die polishing. This piece is especially pleasing. Population: 35 in 68 (2 in 68+), 0 finer (3/16). NGC ID# 27V8, PCGS# 6640

1942 Half Dollar, PR68 Delicate Peripheral Toning

- 4393 1942 PR68 PCGS.** The 1942 is the most plentiful proof Walking Liberty half dollar in high-grade, ideal for the collector seeking a single type coin. This PR68 coin is fully struck and deeply mirrored with essentially brilliant interiors. Lovely golden toning offers a halo of warmth around the outer peripheries. Population: 54 in 68 (2 in 68+), 1 finer (3/16). NGC ID# 282G, PCGS# 6642

FRANKLIN HALF DOLLARS

1948-D Franklin Half, MS66 Full Bell Lines FS-801, Doubled Die Reverse Among the Finest of This Variety at PCGS

- 4394 1948-D Doubled Die Reverse, FS-801, MS66 Full Bell Lines PCGS.** This Registry-grade 1948-D doubled die reverse half dollar is boldly struck but from lightly flowlined dies; the reverse doubling is clear on E PLURIBUS UNUM and the clapper but is faded on the peripheral lettering from die wear. The reverse shows light golden toning, while the obverse has deeper olive and amber hues. A few small marks are seen beneath the patina. Population of FS-801: 4 in 66 (1 in 66+) Full Bell Lines, 0 finer (3/16). NGC ID# 24SS, PCGS# 145804 Base PCGS# 86652

1950 Franklin Half, MS67 Full Bell Lines Among the Finest Certified

- 4395 1950 MS67 Full Bell Lines PCGS. CAC.** A radiantly lustrous Registry coin, among the finest certified. This 1950 Full Bell Lines Franklin half dollar is fully struck and frosty with champagne obverse that shows gold and blue peripheral hues, and a mottled olive-green, gold, and amber-red reverse. Rarely seen this well-preserved, particularly with the CAC green label. Population: 14 in 67 (1 in 67+) Full Bell Lines, 0 finer; CAC: 5 in 67 Full Bell Lines, 0 finer (3/16). NGC ID# 24SW, PCGS# 86656

- 4396 1951 MS67 NGC.** It has been several years since we last offered an MS67 example of the 1951 issue, a testament to the condition rarity of this Superb Gem Franklin half. Combined, PCGS and NGC report fewer than 10 coins at this level of preservation with none finer. Beautifully toned in reddish-bronze and ice-blue hues, the satiny surfaces are sharply struck and free of all but a few microscopic ticks. The eye appeal is extraordinary. Census: 6 in 67 (1 in 67 ★), 0 finer (2/16). NGC ID# 24SY, PCGS# 6658

- 4397 1952 MS67 Full Bell Lines PCGS.** This spectacular Superb Gem displays virtually pristine surfaces, with vibrant mint luster under shades of magenta and greenish-gold toning. The design elements are well-detailed throughout, with the coveted Full Bell Lines designation. Population: 21 in 67 Full Bell Lines, 0 finer (3/16). NGC ID# 24T3, PCGS# 86661

- 4398 1952-D MS66+ Full Bell Lines PCGS. CAC.** The obverse is generally gunmetal-blue, though the border is golden-brown. The reverse displays rich shades of cream-gray, wheat-gold, and sea-green, overlaid by myriad tiny rose-red freckles. Lustrous and splendidly smooth with imposing eye appeal. NGC ID# 24T4, PCGS# 86662

- 4399 1952-S MS66 Full Bell Lines PCGS.** Intense gold and dappled iridescent toning appears on both sides of this lovely Premium Gem. The devices are boldly rendered, including the all-important bell lines on the reverse. Population: 53 in 66 (7 in 66+) Full Bell Lines, 3 finer (3/16). NGC ID# 24T5, PCGS# 86663

**1952-S Franklin Half Dollar, MS66+ Full Bell Lines
Vivid Multicolor Toning on Reverse**

- 4400 1952-S MS66+ Full Bell Lines PCGS. CAC.** Vivid shades of lavender, gray, and sea-green toning blanket the reverse of this Plus-graded Premium Gem, while the obverse is much lighter. The design elements are well-detailed, with vibrant mint luster that shines through the toning. Population: 52 in 66 (7 in 66+) Full Bell Lines, 3 finer (2/16). NGC ID# 24T5, PCGS# 86663
- 4401 1953 MS66 Full Bell Lines PCGS.** This impressive Premium Gem features sharply detailed design elements, including full definition on the bell lines, and well-preserved, lustrous surfaces that show highlights of lavender-gray and sea-green toning. Population: 53 in 66 (4 in 66+) Full Bell Lines, 0 finer (3/16). NGC ID# 24T6, PCGS# 86664
- 4402 1953-D MS66+ Full Bell Lines PCGS.** Rich orange-gold, ruby-red, sea-green, lavender, and powder-blue toning endows this lustrous and boldly struck Premium Gem. A lens reveals only minor obverse field contact and a few ticks on the upper right portion of the bell. NGC ID# 24T7, PCGS# 86665
- 4403 1953-D MS66+ Full Bell Lines PCGS.** The PCGS Plus designation is an important dividing line between the occasionally seen Premium Gems with Full Bell Lines and those coins with exceptional quality and eye appeal. Fewer than 10 pieces have such an honor in MS66, and very few coins are finer. This sharply struck high-end example displays rose and tangerine-gold highlights with areas of russet and olive-gray toning. Mint luster beams brightly beneath the attractive patina. Population: 9 in 66+ Full Bell Lines, 2 finer (3/16). NGC ID# 24T7, PCGS# 86665
- 4404 1953-S MS67 PCGS. CAC.** Orange-red toning is prevalent on the upper obverse and right reverse. Stone-gray and sea-green patina is also extensive. This coruscating and well preserved Superb Gem shows minor merging on the lower bell lines west of the crack. Population: 24 in 67, 0 finer (3/16). NGC ID# 24T8, PCGS# 6666

**1956 Franklin, MS67 Full Bell Lines
High-End Registry Coin**

- 4405 1956 MS67 Full Bell Lines PCGS.** The obverse of this nearly abrasion-free example is cloaked in mottled steel-blue and golden toning, while a softer gray patina combines with specks of russet on the reverse. Few pieces are certified so fine, amounting to active competition between Registry Set collectors. Population: 24 in 67 (1 in 67+) Full Bell Lines, 0 finer (3/16).
Ex: The Kenny's Bennies #3 All-Time PCGS Registry Set of Full Bell Line Franklin Half Dollars / FUN Signature (Heritage, 1/2005), lot 7979. NGC ID# 24TD, PCGS# 86671

- 4406 1957 MS67 Full Bell Lines PCGS.** Pastel tones of gold, violet, and pale jade and blue invigorate the lustrous surfaces of this strike-rarity 1957 half dollar, one of only 24 in the Superb Gem Full Bell Lines grade at PCGS (3/16). There are none finer at either service. The surfaces are well-preserved throughout, producing strong eye appeal. NGC ID# 24TW, PCGS# 86672 Base PCGS# 86650

**1958 Half Dollar, MS67 Full Bell Lines
Delicate Original Patina**

- 4407 1958 MS67 Full Bell Lines PCGS.** Type One Reverse, with four flattened feathers on the left wing. Autumn-gold and rose-red toning invigorate the peripheries. The fields are lightly patinated in shades of lilac and aquamarine. Splendidly smooth and well-defined. Virtually unobtainable any finer. Population: 18 in 67 (1 in 67+) Full Bell Lines, 0 finer (3/16). NGC ID# 24TH, PCGS# 86674
- 4408 1959 MS66 Full Bell Lines PCGS.** Type One Reverse. Breen believed that a majority of business strikes were Type Two. This lustrous and lightly toned Premium Gem is remarkably unabraded and exhibits outstanding eye appeal. Population: 54 in 66 (3 in 66+) Full Bell Lines, 0 finer (3/16). NGC ID# 24TJ, PCGS# 86676
- 4409 1960 MS66 Full Bell Lines PCGS. CAC.** This spectacular Premium Gem Full Bell Lines Franklin half dollar exhibits sharply detailed design elements throughout. The brilliant surfaces radiate vibrant mint luster and no mentionable distractions are evident. Population: 66 in 66 (2 in 66+) Full Bell Lines, 1 finer (3/16). NGC ID# 5H6J, PCGS# 86678
- 4410 1962 MS65 Full Bell Lines PCGS.** This fully brilliant Gem is an extraordinary example that was likely preserved in a mint set. Both sides are untuned silver with satin luster and exceptional design detail. PCGS has only certified 10 finer examples (3/16). NGC ID# 24TR, PCGS# 86682

**1962-D Franklin Half, MS66 Full Bell Lines
Among the Finest Certified**

- 4411 1962-D MS66 Full Bell Lines PCGS.** This conditionally rare Full Bell Lines 1962-D Franklin half dollar is among the finest certified, an ideal Registry Set acquisition. The strike is bold, and the surfaces display frosty luster. The obverse has mottled olive toning, and the reverse is light golden. A few small ticks do not detract. Population: 27 in 66 (1 in 66+) Full Bell Lines, 0 finer (3/16). NGC ID# 24TS, PCGS# 86683

- 4412 1963 MS65 Full Bell Lines PCGS.** The obverse of this final year Franklin half dollar exhibits delicate gold and blue toning over satin luster. The reverse has variegated iridescence. PCGS has only certified five finer Full Bell Lines examples of this issue (3/16). NGC ID# 24TT, PCGS# 86684

**1963 Franklin Half, MS65+ Full Bell Lines
Brilliant and Conditionally Elusive**

- 4413 1963 MS65+ Full Bell Lines PCGS.** Rich, brilliant luster adds to the eye appeal of this Gem Full Bell Lines 1963 Franklin half, a better-date issue seldom seen so fine. A few small, scattered marks barely preclude an MS66 grade, but this coin has many virtues, particularly for those who prefer an absence of toning. Population: 5 in 65+ Full Bell Lines, 5 finer (2/16).
Ex: New York Signature (Heritage, 11/2013), lot 4144, which brought \$4,113. NGC ID# 24TT, PCGS# 86684

PROOF FRANKLIN HALF DOLLARS

- 4414 1950 PR67 NGC.** A suggestion of cameo contrast accents the brilliant, deeply reflective surfaces of this Superb Gem proof 1950 Franklin half. Full definition is seen on the relief details. This is a Registry-grade proof, trailing only four finer non-Cameos at NGC (2/16). NGC ID# 27VA, PCGS# 6691

- 4415 1950 PR67 NGC.** A delightful Superb Gem example of the first Franklin half dollar proof issue, this coin exhibits razor-sharp definition on all design elements and deeply mirrored fields. The impeccably preserved surfaces show a few hints of greenish-gold toning. NGC has graded four numerically finer examples (3/16). NGC ID# 27VA, PCGS# 6691

**1950 Franklin Half, PR67
Outstanding Color**

- 4416 1950 PR67 PCGS.** 30th Anniversary Green Label Holder. The 1950 is the debut proof in the Franklin half dollar series. This Superb Gem is conditionally scarce and among the finest at PCGS. Modest contrast is overcome by vivid peripheral toning in shades of amber-gold, violet, and aquamarine. Population: 57 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 27VA, PCGS# 6691

**1950 Half Dollar, PR65 Ultra Cameo
Rare With Stark Field-Device Contrast**

- 4417 1950 PR65 Ultra Cameo NGC.** Ultra Cameo proofs of the 1950 Franklin half dollar are rare with 30 grading events at NGC and PCGS combined, including untold resubmissions and crossovers. Gem Ultra Cameo proofs like this one are popularly pursued by knowledgeable specialists and Registry collectors, generating spirited bidding when they cross the auction block. This starkly contrasted Franklin half dollar proof showcases brilliant interiors with glimpses of golden-russet patina around the margins. Eye appeal is exceptional. Census: 11 in 65 Ultra Cameo (2 in 65 ★ Ultra Cameo), 3 finer (3/16). NGC ID# 27VA, PCGS# 96691

- 4418 1951 PR67 PCGS.** This impressive Gem proof features brilliant silver surfaces and excellent eye appeal. Both sides are sharply struck and untoned. An exceptional example for the advanced Set Registry collector. PCGS has only certified two finer examples (3/16). NGC ID# 27VB, PCGS# 6692

- 4419 1954 PR68 Cameo NGC.** This Superb Gem Cameo proof exhibits light cameo contrast between the fully mirrored fields and the lightly frosty devices. The obverse is brilliant and the reverse displays a peripheral ring of iridescent toning. NGC has only certified five finer Cameo proofs (3/16). NGC ID# 27VE, PCGS# 86695

- 4420 1956 Type Two PR69 Deep Cameo PCGS.** This Deep Cameo Type Two 1956 proof Franklin is virtually pristine in every respect, among a select few coins that have achieved the phenomenal PR69 Deep Cameo grade. This top-tier Registry coin displays full detail and stark white-on-black contrast. Eye appeal is truly remarkable. Population: 55 in 69 Deep Cameo, 0 finer (3/16). NGC ID# 24TW, PCGS# 96697

- 4421 1956 Type Two PR69 Deep Cameo PCGS.** Icy motifs and legends rise above darkly mirrored fields. A magnificent specimen with flawless surfaces and only a wisp of tan toning on the right-side obverse margin. Population: 55 in 69 Deep Cameo, 0 finer (3/16). NGC ID# 24TW, PCGS# 96697

4422 1956 Type Two PR69 Deep Cameo PCGS. The Type Two is the more frequently encountered of the two varieties known from this year. This is a true "wonder coin." The surfaces are hairline-free and distraction-free with illimitable, mirror-like reflectivity seen in the fields. The devices are heavily frosted and present a stark white-on-black contrast on each side. Population: 55 in 69 Deep Cameo, 0 finer (3/16). NGC ID# 24TW, PCGS# 96697

4423 1957 PR69 Cameo NGC. An essentially perfect Cameo proof, this lovely half dollar exhibits delicate mint frost on the devices within a deeply mirrored frame. Both sides are brilliant and untuned. Census: 31 in 69 Cameo (8 in 69 ★ Cameo), 0 finer (3/16). NGC ID# 24TX, PCGS# 86698

4424 1960 PR68 Deep Cameo PCGS. Stark white-on-black contrast adorns the brilliant, near-perfect surfaces of this Registry-quality 1960 proof half. Frosty design elements rise above mirrored fields with full detail, and the eye appeal is corresponding high. Population: 75 in 68 Deep Cameo, 5 finer (2/16). NGC ID# 24TY, PCGS# 96701

KENNEDY HALF DOLLARS

1967 Half Dollar, MS67
Unsurpassed Quality

4425 1967 MS67 PCGS. Registry collectors will take notice of this attractive 1967 Kennedy half dollar that ranks among the finest examples at both services. The lighter interior on the obverse progresses to green, gold, and orange-toned borders with splashes of powder-blue intermixed. The reverse is brilliant. Strongly impressed with unsurpassed technical quality. Population: 13 in 67, 0 finer (3/16). NGC ID# 24WJ, PCGS# 6710

1969-D Kennedy Half, MS67
Top-Grade Registry Set Rarity

4426 1969-D MS67 PCGS. The 1969-D is the final silver-alloy (40%) Kennedy half from this mint that was issued for general circulation. The 1970-D was only distributed through Mint Sets. Superb Gem examples are rare. This Registry-grade coin displays a bold strike and satin luster. Both sides have intermingled sun-gold, cottonwood-green, and crimson-red toning. Population: 8 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 24U8, PCGS# 6712

4427 1982-P No FG, FS-901, MS67 PCGS. Frank Gasparro's initials are absent from their usual position on the field below the eagle's right (facing) leg. This wheat-gold and powder-blue Superb Gem is lustrous, nicely struck, and immaculate. NGC ID# 24UY, PCGS# 510568 Base PCGS# 6741

1984-D Half Dollar, MS67
Unsurpassed Quality

4428 1984-D MS67 PCGS. The 1984-D Kennedy half is an elusive issue in top grades with an extremely small Superb Gem population. Brilliant cartwheel luster appears on each side of this impressive coin, with gold and iridescent toning over light gray on the obverse, and with mostly blue-gray inside an iridescent frame on the reverse. Population: 14 in 67, 0 finer (3/16). NGC ID# 24V5, PCGS# 6746

SMS KENNEDY HALF DOLLARS

1965 SMS Kennedy Half, SP67 Deep Cameo
Tied for Finest at PCGS

4429 1965 SMS SP67 Deep Cameo PCGS. The 1965-dated Special Mint Set Kennedy half dollar is scarce with Deep Cameo contrast, a characteristic more frequently associated with the 1967 SMS issue. This Superb Gem Deep Cameo coin is tied with 10 others as the finest at PCGS (3/16). The strike is razor-sharp, and the cameo contrast is delivered by deep mirroring in the fields. Both sides are brilliant. NGC ID# 34CB, PCGS# 96845

1967 SMS Kennedy, SP68 Deep Cameo
Tied for Highest-Graded at PCGS

4430 1967 SMS SP68 Deep Cameo PCGS. Although the 1967 is generally the most available in Deep Cameo of the three 1965-67 Special Mint Set Kennedy 40% silver issues, it is still elusive, and far more so with the pristine preservation of this untuned SP68 Deep Cameo example. Blatant silver-on-black contrast and nary a mentionable mark prevail here. Population: 12 in 68 Deep Cameo, 0 finer (3/16). NGC ID# 24WJ, PCGS# 96847

**1967 SMS Kennedy Half, SP68 Deep Cameo
Registry-Grade Rarity**

- 4431 1967 SMS SP68 Deep Cameo PCGS.** The 1967 SMS Kennedy half dollar is the most plentiful Special Mint Set issue in Deep Cameo grades, although even this date is rare in SP68. This piece is among the finest at PCGS. The strike is razor-sharp, and the surfaces are untoned. The white-on-black contrast is comparable to proof issues. Population: 12 in 68 Deep Cameo, 0 finer (3/16). NGC ID# 24WJ, PCGS# 96847

PROOF KENNEDY HALF DOLLARS

- 4432 1964 Accented Hair, FS-401, PR68 Cameo NGC.** Type One Reverse. A fully brilliant and pristine example of this ephemeral introductory subtype. The portrait exhibits outstanding contrast with the glassy obverse field. NGC lists 35 finer Cameos (2/16).
Ex: New York Signature (Heritage, 3/2012), lot 8009; Philadelphia Signature (Heritage, 8/2012), lot 4068. NGC ID# 24WG, PCGS# 145626 Base PCGS# 86801
- 4433 1976-S Clad PR70 Deep Cameo PCGS.** A scarce clad proof Bicentennial half dollar in PCGS-certified perfect PR70 Deep Cameo. This fully struck Registry coin displays flawless preservation and contrast. Eye appeal is superb. Only a single coin has graded so fine at NGC. Population: 81 in 70 Deep Cameo (3/16). NGC ID# B76C, PCGS# 96811
- 4434 1976-S Clad PR70 Deep Cameo PCGS.** A technically perfect example of the elusive Clad Bicentennial issue, with fully struck design elements and deeply mirrored fields that contrast boldly with the frosty devices. Eye appeal is terrific. Population: 87 in 70 Deep Cameo, (3/16). NGC ID# B76C, PCGS# 96811

COLONIALS

1652 Willow Tree Shilling, VF30
Noe 2-B, Eight Known
Ex: Crosby, Winsor, Jackman

4501 1652 Willow Tree Shilling VF30 NGC. CAC. Noe 2-B, W-170, Salmon 2-B, R.7. 71.6 grains. Six die varieties exist of Willow Tree shillings, and all are very rare. Just two Noe 2-B shillings are confirmed, and the other five varieties range from High R.6 to R.7.

The Noe 2-B variety was known to Crosby, and listed as Crosby 2-B in his *Early Coins of America*. Crosby once owned the present example, although it is not plated in his seminal reference. Noe knew of three pieces, listed as #7 through #9 among the Willow Tree shillings in his 1943 reference. The present coin is #9 in his Plate IV. Eight were recorded by the time of the 2005 Ford auction. The pedigrees for those coins were briefly noted in the 2002 Hain Family catalog as "T.J. Clarke (ex Wurtzbach), Earle sale, Steinberg (ex Jackman) sale, Roper sale, Lauder sale" and the Rusbar and two Hain Family examples. The present coin was in the Jackman sale but was not offered in any of the four Gilbert G. Steinberg auctions.

The present coin was struck three times. From the first impression, all that remains evident is a thick line above the date, likely a row of denticles merged together by subsequent strikes and circulation wear. The coin rotated slightly between the second and third strikes, creating a double I in IN and a lesser shift on XII, DO, and GLA.

Unlike some of those pieces, much of the design is present on this coin, including the left and right borders of the tree, its roots, XII, and the partial legends SATH, ETS IN, N DOM NE, and NGLAN. The 52 in the date is faint, but readily located. The gunmetal-gray surfaces are pleasing and without mentionable detractors. An important example of a very rare variety and type.

Ex: *Sylvester S. Crosby Collection* (John W. Haseltine, 6/1883), lot 486; *Richard Boswell Winsor Sale* (S.H. & H. Chapman, 12/1895), lot 2; *Allison W. Jackman Sale* (Henry Chapman, 6/1918), lot 3; *Peales*; *H.R. Newcomb*; *Col. Green*; *L. Young*; *Reed Hawn Collection of Massachusetts Silver* (Stack's, 5/1998), lot 7; *Donald Groves Partrick*. NGC ID# 2ARC, PCGS# 16

1652 Noe 1-A Willow Tree Shilling, XF45
Full Tree, Date, and Denomination
Ex: Smith, Stearns, Oechsner, Hain Family

4502 1652 Willow Tree Shilling XF45 NGC. CAC. Noe 1-A, Salmon 1-A, High R.6. 67.9 grains. This richly detailed Willow Tree shilling has an impressive pedigree, and an equally imposing auction history. In its earliest recorded appearance, it opened the 1906 Harlan P. Smith sale, where the Chapman Brothers included it on Plate I and described it as "1652 Shilling. MA(SAT)HVS(ET)S. (I)N. Tree sketchily drawn, and resembling a bush, usually [referred to as] a willow tree. Rev. (NEW) ENL(AND) : AN : DOM.; in center 1652; XII. Double struck as usual, except the tree. Very Fine. Extremely rare."

At its 1966 Stearns auction sale, the coin was cataloged by Robert Vlack as "Noe Plate III, #4. This is the actual specimen pictured in the above reference. Ex: Smith Sale (1906). Unquestionably one of the most attractive Willow Tree shillings in existence and the best of about 6 known."

For its 1988 Oechsner auction appearance, the coin was cataloged as "The Noe plate coin. A full sharp tree, most of the legend visible. The reverse is double struck, with the date reading 166522. A wonderful example of this rarity. Even medium gray, and free from any detractors. One of the finest extant of the variety and probably in the top 6 of all [Willow Tree shilling] varieties."

The coin later participated in the 2002 Hain Family auction, where it was cataloged as "lovely, medium silver gray in color on both sides. The Noe Plate Coin (1-A, No. 4). On the obverse, MA, THVS, N show, along with much of the inner and outer beaded borders. Full tree, a remarkable feature on a Noe 1-A and clearly the reason Noe chose to plate this specimen. On the reverse, AN DOM shows, the XII denomination is clear, the rest shift double struck with the date reading 166522 and the balance of the legend a jumble. The 1991 ANA Exhibition Coin (No. 13). One of the nicest Noe 1-A's your writer [Michael Hodder] can remember seeing and a rival to the piece [Don] Taxay once called the finest he had seen. The Garrett specimen was superb and the Stearns: 5 coin is nearly Unc[irculated] but both of these are off the market for the foreseeable future. Your writer knows of 12 different examples of N. 1-A. This is a variety that seems to survive in Extremely Fine and better condition more frequently than not."

To these former lot descriptions we will add that the tree has nearly complete detail. All branches appear present, and although a few are lightly brought up, most of the tree is bold. The date and denomination are also sharp, but the date is composed of three different strikes: 16, 652, and 2. The peripheral legend shows a majority of the letters, but a few are indistinct on each side. The coin was struck three times, rotating moderately clockwise (relative to the reverse) between strikes. The gunmetal-gray surfaces are remarkably free from distractions, and the centering is close to ideal.

A complete variety collection of Willow Tree shillings is practically unobtainable, since just two Noe 2-A examples are known. The Willow Tree threepence provides another stopper, represented by only three survivors. But it is possible to secure a Willow Tree type coin with an essentially full tree, date, and denomination, if the present lot is secured.

Ex: Harlan P. Smith Sale (S.H. & H. Chapman, 5/1906), lot 1; C.H. Stearns Collection (Mayflower, 12/1966), lot 4; Herbert M. Oechsner Collection (Stack's, 9/1988), lot 928; Hain Family Collection (Stack's, 1/2002), lot 4; Donald Groves Partrick / FUN Signature (Heritage, 1/2015), lot 5519. NGC ID# 2ARC, PCGS# 16

**1662 Oak Tree Twopence, MS63
Small 2, Noe-30, Ex: Picker / Partrick
The Finest Known**

4503 1662 Oak Tree Twopence, Small 2, MS63 NGC. CAC. Noe-30, W-240, Salmon 1-A, R.4. Ex: Donald Groves Partrick Collection. 12.2 grains. The surfaces on this outstanding example show golden-brown fields and lavender high points. All peripheral letters are fully intact, although the obverse is misaligned a few degrees toward 7 o'clock. The long tail on the 2 in the date, and the absence of a parallel break above, respectively differentiate Noe-30 from Noe-29 and Noe-31. This piece is superior to any others that are known to us. The Ford coin was called Choice AU, and three others are also graded AU.

Ex: Richard Picker (7/1966); Donald Groves Partrick Collection (Heritage, 1/2015), lot 5557. NGC ID# 2ARD, PCGS# 45355 Base PCGS# 17

**1652 Oak Tree Threepence, MS63
The Finest Known Noe-28.5
Excellent Eye Appeal**

4504 1652 Oak Tree Threepence, No IN on Obverse, MS63 NGC. CAC. Noe-28.5, W-310, Salmon 6-B, R.7. Ex: Hain/Donald G. Partrick Collection. 15.2 grains. Described as "The Finest Seen" of Noe-28.5 in the Hain Family catalog. Some confusion exists concerning what distinguishes Noe-28.5 from Noe-28 and Noe-28.5.5. Picker refers to obverse die re-engraving, Hodder more accurately (in the Hain Family catalog) refers to obverse die lapping, and Salmon describes the die cracks on the right reverse. The present coin shows the indistinct design on the lower obverse characteristic of Noe-28.5, as well as cracks and breaks on the AN in ENGLAND. This magnificent example displays smooth and dusky tan-brown and silver-gray surfaces. Well struck given the state of the dies. The reverse has excellent centering, and the obverse is moderately misaligned toward 5 o'clock. The flan is nearly oval-shaped due to straight edge clips by the Boston Mint. Listed on page 38 of the 2016 Guide Book. Ex: Brigandi Coin Company (10/1987); Hain Family Collection (Stack's, 1/2002), lot 74; Donald Groves Partrick Collection (Heritage, 1/2015), lot 5555. NGC ID# 36MF, PCGS# 45357 Base PCGS# 18

1652 Noe-16 Oak Tree Sixpence, MS64 The Finest Known Example

4505 1652 Oak Tree Sixpence, IN on Reverse, MS64 NGC. CAC. Noe-16, W-360, Salmon 1-A, R.5. 34.4 grains. Ex: Merkin. This exceptionally well-centered sixpence exhibits most of the outer border beads on each side, and that is highly unusual for the die marriage. This Choice Mint State example is visually finer than the better Ford coin that was described as the finest seen by the cataloger. The fully lustrous surfaces exhibit lovely gold toning with bluish-steel overtones, especially on the obverse. A planchet crack is evident at 8:30 relative to the obverse. The lower obverse has "stretch" lines identical to lot 44 in the Ford sale, and they are characteristic of the strike, although failed to weaken the design at that location. This extraordinary sixpence is important as a well-centered strike rarity, and as the finest known of the variety.

Ex: Lester Merkin (privately, 8/29/1967); Donald Groves Partrick / FUN Signature (Heritage, 1/2015), lot 5546. NGC ID# 2ARG, PCGS# 45359 Base PCGS# 19

1652 Noe-1 Oak Tree Shilling, MS63 Ex: Eliasberg Collection Condition Census

4506 1652 Oak Tree Shilling, IN at Left, MS63 NGC. Noe-1, W-430, Salmon 1-A, R.3. 72.5 grains. Ex: Eliasberg. Only slight evidence of the rocker-press production appears on this fully lustrous piece. Light gray surfaces exhibit delicate gold and blue toning on each side; eye appeal is excellent. The top of the obverse is slightly crimped, affecting the tops of AS, and the lower legend is slightly off the flan. That feature was undoubtedly characteristic of the planchet, as the weight is slightly greater than the 72-grain standard. The tree is well-detailed inside an oval-shaped inner circle. The reverse is nicely centered with complete legends and a perfectly round inner circle. Slight evidence of die rust appears on the reverse, although insufficient to call this piece Noe-1.5, a die state with heavy rust.

Following the limited NE and Willow Tree coinages, the Oak Tree pieces were struck in substantially greater numbers. For example, there are more survivors of the Noe-1 Oak Tree coinage than for the combined total of NE and Willow Tree pieces of all denominations. The Oak Tree coinage was probably struck in the early to mid-1660s, including the 1662-dated twopence. All other Oak and Pine Tree pieces maintain the 1652 date, regardless of the actual time of striking.

Ex: Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 5/1996), lot 2; Jon Hanson (5/20/1996); Donald Groves Partrick / FUN Signature (Heritage, 1/2015), lot 5525. NGC ID# 36MK, PCGS# 45361

**1652 Oak Tree Shilling, MS65+
Noe-5, IN at Bottom
Finest Known of the Variety, Ex: Partrick**

4507 1652 Oak Tree Shilling, IN at Bottom, MS65+ NGC. CAC. Noe-5, W-470, Salmon 3-D, R.2. Ex: Bluestone/Donald G. Partrick Collection. 70.2 grains. An apple-green and stone-gray example that boasts vibrant luster and outstanding eye appeal. This is the finest known Noe-5 Oak Tree shilling seen to date. The obverse is moderately misaligned toward 6 o'clock. The reverse letters are complete, although the W is tight against the edge. The "S" bend expected of rocker press varieties is prominent near the top of the tree. The vertical breaks near ND A are characteristic of Noe-5, as is the heavy horizontal break on the upper obverse margin. Much of the tree appears blurry due to the die state.

Related varieties include Noe-5.1 and Noe 5.8, both questionable pieces that may be modern fabrications. Christopher Salmon includes Noe 5, 5.1, and 5.8 in a single listing for his variety 3-D. The tree would soon after be completely reengraved by the coiner to create Noe-6. The reverse die was used for several different varieties designated as Noe-4, 5, 6, and 7. Noe 5 is the most plentiful of the four varieties that share the same reverse die, and is an excellent candidate for a high-grade colonial type collection. Although the Salmon numbering system has yet to take hold, it clears up many of the difficulties created with the cumbersome Noe variety system as it has been modified in recent years. Listed on page 39 of the 2016 *Guide Book*.

Ex: 95th Sale (Barney Bluestone, 12/1946); later, Donald Groves Partrick / FUN Signature (Heritage, 1/2015), lot 5531, realized \$105,750. NGC ID# 2ARL, PCGS# 45362 Base PCGS# 20

**1652 Noe-6 Pine Tree Shilling, MS63
The Finest Known
Ex: Hain, Partrick**

4508 1652 Pine Tree Shilling, Large Planchet, Reversed N, MS63 NGC. CAC. Noe-6, W-720, Salmon 5-Di, R.6. Ex: Hain, Donald G. Partrick Collection. 73.9 grains. A rich silver-gray example with exemplary surfaces and pleasing eye appeal, this piece is nicely centered, and the legends are complete aside from the tops of SA near 9 o'clock. The rocker-press coining technology produced the wavy surfaces seen here. The strike is sharp except on the obverse exergue, which has a distorted appearance due to die slippage during production. In the Hain Family catalog it was described as Noe-6.1, which implies a striking prior to Noe-6. However, the die breaks through the M in DOM, and over the 6 in the date, are more advanced than sometimes seen on Noe-6. The AU58 Newman coin is the next finest we have handled, and we believe this piece from the Hain Family Collection is the finest known.

Ex: *Corrado Romano Collection (Stack's, 6/1987), lot 4; Hain Family Collection (Stack's, 1/2002), lot 110; Donald Groves Partrick; FUN Signature (Heritage, 1/2015), lot 5576.* NGC ID# 2ARX, PCGS# 45372 Base PCGS# 23

1652 Pine Tree Shilling, MS65 Noe-4.5, Full Legends The Finest Known Noe-4.5

4509 1652 Pine Tree Shilling, Large Planchet, Reversed N, MS65 NGC. Noe-4.5, W-720, Salmon 4-D, R.5. Ex: Stack's/Donald Groves Partrick Collection. 73.9 grains. No Pellets at Trunk. N in IN Reversed. First N in ENGLAND Reversed. The Noe-4.5 variety, a missing link between Noe-4 and Noe-5, first received notice in print in lot 213 of New Netherlands' 60th sale held December 1968. John J. Ford, Jr. wrote: "Dies of Crosby 5-B in transitional state, not known to Noe. Upon the obverse the forms of M ... TV. E .. are as on Noe 5 as is the inner circle, but the tree is as on Noe-4; the letter M has its third stroke so weak as to be hardly discernible. Rev. Die injury and failure at AND*; die reground at O leaving that letter partly open; break at M extended; inner beads, date and XII as on Noe 5 but as yet not strengthened; die extensively reground. ... The total appearance of this piece is quite different from that of both Noe 4 and 5. In addition to our comments above, attention might be called to the following obv. details: top horizontal of first T, the bottom serifs of the H, all of the letter V, and, possibly, the bottom serif of the second S."

Eight years later, Noe-4.5 was recorded in Richard Picker's list of intermediate Massachusetts silver varieties in the 1976 ANS reference *Studies on Money in Early America*. No variety collection of Pine Tree shillings is complete without an example. Both Crosby and Noe overlooked the distinct variety, partly due to its scarcity.

The present Gem ranks among the finest known examples of the variety. In its 2005 Stack's appearance, the cataloger noted "the Hain collection contained a similarly graded specimen (lot 102), but that one had planchet and striking issues that are missing from the very attractive and problem-free specimen offered here." The pastel sea-green and wheat-gold toning is as pleasing as the crisp strike and coruscating luster. The slight wave on the piece is characteristic of original examples. Unabraded and desirable with full legends and outstanding eye appeal. Listed on page 39 of the 2016 *Guide Book*.

Ex: *Americana Sale* (Stack's, 1/2005), lot 2446; *Donald Groves Partrick*; *FUN Signature* (Heritage, 1/2015), lot 5573, realized \$49,350. NGC ID# 2ARX, PCGS# 45372 Base PCGS# 23

(c. 1670) St. Patrick Halfpenny, AU50
Vlack 4-B, Outstanding Condition Rarity
Ex: Newcomer/Col. Greene

4510 (1670-75) St. Patrick (Mark Newby) Halfpenny AU50 PCGS. Vlack 4-B, W-11540. The Vlack 4-B is a rare variety among the St. Patrick halfpennies, always in demand by specialists and virtually without peer at the About Uncirculated grade. Identified by Small Letters on the obverse and Large Letters on the reverse, King David kneels on a "checkerboard" pattern floor, some believe reminiscent of the device often seen on Renaissance-era paintings. Struck 5% or so off-center east on the obverse, the reverse shows better centering and the central motifs are sharp for a St. Patrick halfpenny.

This example lacks an obvious brass splasher, with just a trace of brassy-gold color in the upper-left junctions of the crown elements. Glossy surfaces show weakness of strike at FLO of FLOREAT similar to other Vlack 4-B examples, as well as loss of definition among the letters of REX. Corrosion is present at the obverse margins and scattered to a lesser extent across the obverse, while the reverse shows only minor pits and occasional roughness in sheltered areas. Attractive, dark chocolate-brown surfaces with a faint mahogany tinge appear smooth and hard in-hand. This is the sole-finest St. Patrick halfpenny at PCGS by 10 points. Population: 1 in 50, 0 finer (3/16).

Ex: Waldo Newcomer; Colonel E.H.R. Greene Collection; New Netherlands Coin Company; John J. Ford, Jr. Collection Part VII (Stack's, 1/2005), lot 15. NGC ID# AUAS, PCGS# 46

1670-A French Colonies, MS63
5 Sols, W-11605
Issued for Canada and Louisiana Territory

4511 1670-A French Colonies 5 Sols MS63 PCGS Secure. Breen-256, W-11605, R.6. The Paris Mint and many of the French branch mints issued coins that were intended for circulation in North America. The present piece was one of those coins struck under authority of King Louis IV (1638-1715) who served a long reign from 1643 until his death. His reign of 72 years was the longest ever in a European country up to that time. Many important North American discoveries were made during his tenure on the throne.

Among the many French colonial coinage issues is this 5 Sols silver piece minted in Paris in 1670. Few of these have survived, with a population estimate of 30 or fewer pieces. This Select Mint State example has natural silver-gray surfaces beneath lovely gold and iridescent toning on both sides. Listed on page 52 of the 2016 *Guide Book*. NGC ID# 2AXH, PCGS# 158627

1776 Continental Dollar, AU58 Newman 1-C, Broken Obverse Die

4512 1776 Continental Dollar, CURRENCY, Pewter AU58 PCGS. CAC. Newman 1-C, W-8445, R.3. The two Newman 1-C Continental dollars in the present Central States sale are virtually identical die states with the prominent die break joining the tops of GI in FUGIO. During his detailed study of the series, Eric P. Newman addressed the topic of what denomination these pieces represented. He noted that a contemporary Continental Currency (that of July 22, 1776) issue lacked a one dollar note, and believed that these coins were meant to take their place.

In his *Complete Encyclopedia*, Walter Breen assigned two different denominations, calling the brass or copper pieces pence or pennies, and, following traditional nomenclature, he called the pewter pieces "dollars" with that word in quotes, perhaps suggesting that he disagreed. Although examples were illustrated a few years after they were struck, with limited descriptions of the coinage in the 1780s, no contemporary accounts of the coinage have been located that date to the year of issue. In the absence of such documentation, accounts of the Continental Currency coinage is mostly speculation with some educated guesses.

This near-Mint example has light gray luster on its pewter-gray surfaces with trivial marks on each side. A small divot appears above the base of the sundial on the obverse. The outer ring is indistinct at the top of the obverse. All remaining detail on both sides is boldly defined. Population: 16 in 58, 46 finer (3/16). NGC ID# 2AYN, PCGS# 791

1776 Continental Dollar, MS63 Late State Newman 1-C

4513 1776 Continental Dollar, CURRENCY, Pewter MS63 NGC. Newman 1-C, W-8445, R.3. The Newman 1-C is frequently encountered from an unknown yet substantial production, likely in New York prior to the British invasion that summer. There is a difference of opinion regarding General Washington's handling of the situation, some saying he blundered the operations and others calling him a hero. There is also a difference of opinion regarding these Continental dollars. In fact, some specialists claim they are not dollars at all, since they were primarily struck in pewter. The opposing view is that pewter was the only readily accessible material for their production.

Eric P. Newman wrote the primary study of these pieces six decades ago, and his work is still the standard reference. His efforts led to identification of Elisha Gallaudet as the designer or engraver, but little else is really known of these important pieces. They were first illustrated less than 10 years after their production, including appearances in English and German publications.

The Newman 1-C die pair is thought to be a production early in the year, before the spelling of CURRENCY was corrected with two Rs, and before the EG FECIT statement was added to the obverse. This piece exhibits the prominent die break joining the tops of GI in FUGIO.

A splendid Choice Mint State piece, this Continental dollar exhibits considerable bright gray luster with medium gray and delicate brown toning. Grade-consistent marks are scattered over the obverse and reverse, but none stand out among all the others. This exceptional piece will be a centerpiece of most any collection of early U.S. coinage. Census: 11 in 63, 6 finer (3/16). NGC ID# 2AYN, PCGS# 791

**1776 Continental CURRENCY Dollar, MS65
High-Quality Pewter Example, Semiprooflike
Newman 3-D, W-8460, EG FECIT**

4514 1776 Continental Dollar, CURRENCY, Pewter, EG FECIT MS65 PCGS Secure. Newman 3-D, W-8460, R.4. The 1776 Continental dollar is one of the most enigmatic issues in the early federal coinage series. Although no documentary evidence has been found authorizing the issuance of these coins, researchers believe they were struck as a substitute for paper dollars in late 1776. Earlier paper money issues of the Continental Congress (February and May, 1776) included various denominations ranging from 1/6 dollar through eight dollars, and the one-dollar denomination was included on both occasions. Later issues (July 22 and November 2, 1776) omitted the one-dollar denomination. The 1776 Continental dollars were apparently intended to take the place of the paper notes in these emissions.

Most 1776 Continental dollars were struck in pewter, and these seem to have circulated to some extent, as they are seen in all grades today. A few examples are known in silver and brass compositions, but these are extremely rare. The silver coins are of full weight and value, and may have been intended to circulate as precious-metal issues, but the Continental Congress did not have an adequate supply of silver to support a large scale mintage of silver coins, and such a plan must have been abandoned quickly. The brass specimens may have served as patterns. Eleven varieties have been identified, mostly by Eric P. Newman in his 1952 work *The 1776 Continental Currency Coinage*. Varieties include specimens struck in varying compositions from five different obverse dies and four different reverse dies. The design differences arise from different spellings of the word currency, different treatment of the rings on the reverse, and the addition of the inscription EG FECIT on some varieties. The present coin represents the Newman 3-D variety, struck in pewter, with the correct spelling of CURRENCY, and the engraver's initials EG FECIT (E.G. made it) on the obverse. Newman identified Elisha Gallaudet as the engraver of this die.

Responding to a question in the Numismatic Bibliomania Society's online forum, the *E-Sylum*, Robert D. Leonard identified what may be the first mention in print of the 1776 Continental dollars. The reference to "pewter dollars, what both hands can hold, a thimble-full of plate, a mite of gold" was made in a sarcastic poem titled "The Congratulation" written by Loyalist poet Jonathan Odell and published in the November 6, 1779 edition of New York's *Royal Gazette*. The bias of the poet is obvious in the poem, but his characterization of the 1776 Continental dollar as an unpopular and often repudiated medium of exchange is accurate.

Recent research by Eric P. Newman and Maureen Levine, published in the July 2014 edition of *The Numismatist*, reveals that the first image of a 1776 Continental dollar was Daniel Berger's engraving of a specimen in Matthias Christian Sprengel's book *Historisch-genealogischer Calender*, published in Berlin in 1783. Berger's drawing translated the legends on the coin from English and Latin to German, and was reprinted in numismatic publications on several occasions, including a reproduction in Sprengel's 1784 *Allgemeines historisches Taschenbuch*, which was previously thought to be the earliest illustration of the Continental dollar. Sprengel's account of the dollar also predates Richard Watson's famous 1786 analysis of the piece in his *Chemical Essays* by more than two years.

The 1776 Continental CURRENCY dollar is an elusive issue, but pewter specimens are regularly available in circulated grades. Examples in Gem condition are very rare, and finer pieces are virtually unobtainable. The present coin is a spectacular Gem, with sharply detailed design elements and semiprooflike, mostly brilliant surfaces that show a few hints of golden-tan and amber toning. No mentionable distractions are evident and the eye appeal is outstanding. Coins of this quality tend to find their way into strong hands, and it may be years before a comparable offering of this historic issue occurs. Listed on page 85 of the 2016 *Guide Book*. Population: 4 in 65, 1 finer (2/16).

From The Indian Rocks Collection. NGC ID# 2AYU, PCGS# 795

1787 Indian/New York Arms Copper, AU50 Excelsior Reverse, Breen-990, W-5795 Third-Finest Known, Ex: Whitman-Newman

4515 1787 New York Excelsior Copper, Indian and New York Arms, Breen-990, W-5795, High R.6, AU50 PCGS. CAC. Ex: Whitman / Newman. 171.4 grains. Previously certified by NGC and metallurgically analyzed as 99% copper. Two varieties of the Liber Natus, Excelsior coppers are known. The variety offered here combines the standing Indian obverse with the New York Arms reverse. Typical survivors are in higher grades, suggesting that the variety saw little circulation. Just over a dozen examples of this variety are known. Based on John Ford's notes, Michael Hodder presented a preliminary census of this issue in the May 2004 Ford catalog, recording nine examples. We have refined and expanded that census here:

1. **MS65.** Louis E. Eliasberg, Sr. Collection; Eliasberg Estate (Bowers and Merena, 5/1996), lot 58.
2. **AU.** Sarah Sophia Banks (1818); British Museum.
3. **AU50 PCGS.** Eric P. Newman Numismatic Education Society; Newman Collection, Part V (heritage, 11/2014), lot 3028, realized \$88,125. **The present specimen.**
4. **AU.** Lorin G. Parmelee (New York Coin & Stamp Co., 6/1890), lot 457; H.P. Smith (Chapman Brothers, 6/1906), lot 124; Col. James W. Ellsworth; John Work Garrett; Johns Hopkins University (Bowers and Ruddy, 11/1979), lot 601.
5. **XF.** F.C.C. Boyd Estate; John J. Ford, Jr. (Stack's, 5/2004), lot 312.
6. **XF.** Mickley Sale (W.E. Woodward, 10/1867); Bushnell Sale (Chapman Brothers, 6/1882), lot 888; Brand Collection.
7. **Fine.** William H. Woodin; Peter Gschwend (Thomas Elder, 4/1909); F.C.C. Boyd.
8. **Fine.** John G. Mills Collection (Chapman Brothers, 4/1904), lot 348.
9. **VG.** John Story Jenks (Henry Chapman, 12/1921), lot 5493.
10. **VG.** Norweb Collection, but not found in the catalogs of that collection.
11. **Good.** James Ten Eyck (B. Max Mehl, 5/1922), lot 816.
12. **Poor.** Thomas Warner (Chapman Brothers, 7/1891), lot 2094.
13. **Plugged.** New Netherlands Coin Co. (44th Sale, 6/1954), lot 71.
14. **Holed.** Matthew Stickney (Henry Chapman, 6/1907), lot 240.

Although this piece was cleaned many decades ago, both sides are now attractively and naturally toned to olive and light blue-steel. Trivial rim bruises are to be expected on these old coppers, but the obverse and reverse surfaces are outstanding. Listed on page 65 of the 2016 *Guide Book*.

Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 3028, realized \$88,125. NGC ID# 2B3R, PCGS# 436

**1783 Chalmers Threepence, W-1760, MS61
Important Condition Rarity
Possibly Third-Finest Known**

4516 1783 Chalmers Threepence, Breen-1018, W-1760, R.5, MS61 NGC. Ex: Craige. 13.9 grains. Annapolis, Maryland, silver- and goldsmith John Chalmers struck threepence, sixpence, and shillings, all dated 1783 and designed for local circulation — an aim that appears to have been fulfilled, given the extensive wear that many surviving pieces show. The Long Worm and Short Worm shillings are the most commonly seen Chalmers coins overall. The threepence are next in overall availability with respect to varieties.

The various reference guides are confusing, particularly in regard to the rarity of the four sixpence versus the others. The Long and Short Worm shillings are the most frequently seen (R.4 and High R.4, respectively), followed by the threepence (R.5), then the four sixpence die marriages (each R.6 to R.7), and finally the Rings shillings at High R.7. However, the threepence is the rarest Chalmers denomination in terms of the cumulative total of survivors.

Those rankings are also absolute, and a piece such as this Mint State NGC-certified threepence is a marvelous conditional rarity. Much luster appears on silver-gray surfaces with a bold strike, but the strike is a tad off-center and the blank was axially misaligned, creating strike softness above I.C. on the obverse and PENCE on the reverse. This piece may rank third-finest certified behind two finer pieces at PCGS (3/16).

Ex: Robert A. Vlack; Ted L. Craige (3/25/1971); Donald Groves Partrick / FUN Signature (Heritage, 1/2015), lot 5654; FUN Signature (Heritage, 1/2016), lot 5213. NGC ID# 2AUP, PCGS# 592

1783 Chalmers Sixpence, W-1765, XF40
Rarest Sixpence Variety
Period Between Large Date
Third-Finest Known

4517 1783 Chalmers Sixpence, Large Date XF40 NGC. Breen-1013, W-1765, R.7. Ex: Craige. 28.5 grains. Period Between Large Date. Of the three varieties of Chalmers sixpence, the Breen-1013 Large Date showing a period between 17 and 83 is almost certainly the rarest. As we pointed out in our recent offering of an AU55 NGC example in the Newman Collection Part V Signature (Heritage, 11/2014), the *Whitman Colonial Encyclopedia* suggests (with a question mark) a rarity of two to four pieces, but we believe the actual survival is more on the order of eight to 10 examples. We believe that the Small Date sixpence variety (Breen-1015) survives to the extent of a dozen to a dozen and a half, while the Large Date, Period After Date (Breen-1014) survival is perhaps two dozen coins. Breen's 1017 has been proven to be an example of Breen-1014.

Large Date, with a period appearing between 17 and 83. *The Whitman Colonial Encyclopedia* notes that "the 'period' dividing the date is actually an ornament found on other dies as well, but in this instance intruding slightly into the date." Note the small T and S within the crescents ending the cross on the reverse, for Thomas Sparrow (1746-1784), engraver of the dies (perhaps for all the Chalmers coins). He also engraved the plates for Maryland paper currency and the so-called Sparrow Seal, which first appeared in 1765 on the title page of the Reverend Thomas Bacon's compilation of the *Laws of Maryland*. Sparrow was the ward and employee of Annapolis printer Jonas Green.

The strike is off-center toward 9 o'clock on the obverse, with the dentilation correspondingly boldest at 3 o'clock. The surfaces are nicely preserved overall, showing the expected light to moderate wear. The reverse displays some reeding and edge marks in the central area from contact with a second coin. A small fissure appears near the rim between 1 and 7 in the date. This piece is the third-finest known to us of this extremely rare variety, behind the Newman example and one XF45 PCGS piece. The Newman AU55 NGC-CAC coin brought \$88,125.

Ex: Ted L. Craige (1/16/1971); Donald Groves Partrick / FUN Signature (Heritage, 1/2015), lot 5655. NGC ID# 2AUS, PCGS# 594

1796 Myddelton Mule, PR64 Brown Breton-722, W-8910

4518 1796 Myddelton Mule, Copper Company of Upper Canada, PR64 Brown PCGS. Breton-722, W-8910, R.7. Ex: Temple. This rare Myddelton mule with the Copper Company of Upper Canada reverse appears in American and Canadian references. The Myddelton tokens were intended for the use of English emigrants who settled on land in Kentucky. Breen wrote that Boulton & Watt struck these mules as sample coins, perhaps for numismatic purposes. This splendid Choice proof exhibits glossy mahogany-brown surfaces with bold details and fully mirrored fields. This impressive piece will appeal to both American and Canadian colonial collectors. Listed on page 77 of the 2016 *Guide Book*. NGC ID# 2B68, PCGS# 651

Important 1820 North West Token, VF35 Rare Copper Emission, W-9252

4519 1820 North West Token, Copper, VF35 PCGS. Breen-1084, W-9252, High R.6. The North West Company, which merged with the Hudson Bay Company in the 1821, issued brass and copper tokens dated 1820 and likely struck by John Walker & Co. in Birmingham, England. These tokens, depicting King George IV on the obverse, were used in the Pacific North West to pay Indian's for beaver pelts, explaining the reverse design. Brass tokens are relatively plentiful with nearly 200 examples thought to survive today. However, the copper pieces such as this one, are rare with only about a dozen pieces known. This example, like nearly all known pieces, is holed at 12 o'clock. The rich, dark chocolate surfaces exhibit ancient maroon corrosion. A pleasing piece none-the-less. NGC ID# 2B6J, PCGS# 956 Base PCGS# 662

1785 General Washington Copper, AU50 Large Circle Confederatio Reverse, W-5645 Only Six or Seven Known

4520 1785 General Washington / Confederatio, Large Circle Cent, Crosby Plate VII, No. 14, Baker-9, Breen-1125, Whitman-5645, High R.7, AU50 PCGS Secure. CAC. Ex: Roper/Donald G. Partrick Collection. 129.1 grains. An exceptional likeness of General George Washington appears on the obverse, with sharp stars on the reverse. The likeness of Washington is so well executed that it provides further evidence of an American origin for these pieces, traditionally attributed to England. Most of the 1780s Washington tokens that originated in England displayed rudimentary images.

Despite the imperfect edge, this impressive piece is sharper than the Newman example that we sold in November 2014. This piece has pleasing mahogany-brown surfaces with a few scattered marks of no consequence. Current Condition Census data reveals a population of only seven examples of this rare colonial issue, and the status of one of those is uncertain. Listed on page 57 of the 2016 *Guide Book*.

A. Uncertain. An example reported in the Massachusetts Historical Society, from William Sumner Appleton. NGC ID# BFJD, PCGS# 849

HALF CENTS

1793 C-3 Half Cent, MS64 Brown
Ex: Pawling, Brobston, Charles Jay

4521 1793 C-3, B-3, R.3, MS64 Brown PCGS Secure. In *Walter Breen's Encyclopedia of United States Half Cents*, the present half cent is ranked #4 on his C-3 Condition Census. Its pedigree is readily traced by what Breen refers to as a "light Mint clip of the obverse at 2 o'clock." The same feature was described in *Stack's Price List #69* as "a small semi-circular planchet clip [that] just about touches the beaded border between 2:00 and 3:00."

Unquestionably, this example ranks among the finest Cohen-3 1793 half cents. The golden-brown and olive-green surfaces are smooth and glossy. A strong lens is required to locate the few nearly microscopic ticks. The strike is precise throughout, sharp enough for every minute grain of die rust to be visible on the reverse. PCGS lists just two finer examples of C-3, an MS64+ and an MS65, both from the recently auctioned Missouri Cabinet. NGC lists a single MS64 as C-3 with none others certified as such above VF.

The first year 1793 is also important as the sole date of the Liberty Cap, Bust Left type. This position of Liberty matches that on the heralded Betts-615 *Libertas Americana* Medal, although the Liberty pole is shorter relative to the bust, due to the smaller diameter of the half cent. Only four 1793 die varieties exist, and all have similar rarity, although C-4 is somewhat more available than C-1. The striking sequence of the four varieties is well known since each marriage features at least one die shared by another variety. Our EAC grade MS60.

Ex: John Pawling Collection (New Netherlands, 11/1952), lot 73; Joseph Brobston Collection (Stack's, 1/1963), Fixed Price List #69; Charles Jay Collection (Stack's, 10/1967), lot 80. NGC ID# 2222, PCGS# 35009 Base PCGS# 1000

1795 Lettered Edge Half Cent Late State C-2a, B-2a, AU58

4522 1795 Lettered Edge, Punctuated Date, C-2a, B-2a, R.3, AU58 PCGS. Manley Die State 3.0, the latest die state recorded in that reference. This variety is the last of the 1795 Lettered Edge half cents, and the late die state represents one of the latest pieces struck before the lowered weight standard that took effect just before the 1796 new year.

This piece is sharply struck with light olive and chocolate-brown surfaces that exhibit pale blue overtones. The surfaces exhibit mostly microscopic marks and lines that are especially evident on the obverse. Our EAC grade VF25. PCGS# 35070 Base PCGS# 1015

1795 C-6a, B-6a Half Cent, AU58 Rolled Copper Stock

4523 1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6a, R.2, AU58 PCGS. Manley Die State 1.0. An early die state with no evidence of the obverse die bulge that eventually forms in the upper right field, along the border right of LIBERTY. This lovely half cent was struck on rolled copper stock, as opposed to others that were coined on cut-down Talbot, Allum & Lee tokens. The pleasing surfaces exhibits intermingled olive, chestnut, and steel-brown patina with trivial handling marks and faint hairlines only evident with a glass. An outstanding example. Our EAC grade AU50. Population: 4 in 58, 10 finer (3/16) for the *Guide Book* type. NGC ID# 2225, PCGS# 35089 Base PCGS# 1018

PROOF HALF CENTS

**1809/6 C-5, B-5 Half Cent, MS65 Brown
Rare Intermediate Die State**

4524 1809/6 9 Over Inverted 9, C-5, B-5, R.1, MS65 Brown NGC. Manley Die State 2.9 with the dentilation most gone. Faint clash marks are visible inside the wreath, and the end of the stem is complete and sharp. This is an exceptional example of the blundered date that is routinely assigned the incorrect nomenclature of "9 over 6." However, such an overdate is impossible since the Classic Head design was not yet conceived in 1806. On this die, the engraver incorrectly entered the final digit upside down, and then correct his error, creating the "9 over Inverted 9" die blunder. This piece exhibits glossy brown surfaces with cartwheel luster, combining golden-brown, chestnut-brown, and tan. Our EAC grade MS62. Census: 0 in 65 Brown, 0 finer (3/16).

**1841 Original Half Cent, PR66 Brown
Large Berries, B-1**

4525 1841 Original, B-1, R.5, PR66 Brown PCGS. CAC. The Large Berries on the reverse of this variety are indicative of the Original strike that was coined in 1841. A common reverse die was used for all the Original half cents throughout the decade. Richard T. Coleman estimates that as many as 67 examples of this variety exist, ranking it as the most plentiful of all the proof half cent varieties in the 1840s. For that reason, it is a variety frequently chosen to represent the Braided Hair design in 19th century type sets. This iridescent Premium Gem has mirrored brown fields with lovely blue overtones and splashes of original orange mint color. Our EAC grade PR62. Population: 2 in 66 Brown, 1 finer (3/16). NGC ID# 26Z6, PCGS# 1254

**1842 Original Half Cent, B-1
PR64 Red and Brown
The Stickney-Eliasberg Example**

4526 1842 Original PR64 Red and Brown NGC. B-1, R.6. The Braided Hair half cents were only coined in proof format from 1840 through 1848, and in 1852. Small Date 1849s were also coined in proof, and the 1849 Large Dates were struck in both proof and circulation strike format. The remaining years through 1857 were produced both ways, except for 1853 where no proofs are known. Originals were struck at the time of the coin date, while First and Second Restrikes appeared many years later.

With a provenance dating back to the 19th century, this piece has an important numismatic history. This Choice piece, one of about 18 surviving proofs, exhibits considerable orange mint color with dappled olive and dark brown. A lovely representative. Our EAC grade PR63. Census: 2 in 64 Red and Brown, 0 finer (3/16).

Ex: Matthew A. Stickney Collection (Henry Chapman, June 1907); John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr. (Bowers and Merena, 5/1996), lot 456; the present consignor, who purchased this piece directly from the Eliasberg sale. PCGS# 1261

**1842 First Restrike Half Cent
B-2, PR66 Brown**

4527 1842 First Restrike PR66 Brown PCGS. CAC. B-2, R.6. PCGS has certified three of these in PR66 Brown and two others in PR66 Red and Brown, and those five submissions represent the finest that grading service has certified, although the specific identification of First or Second Restrikes is unknown. All three varieties of 1842 are rated R.6, meaning less than 30 examples are known of each. It is thought that only a little over half that number of First Restrikes exist today. This piece has hints of red on both sides, with delicate blue overtones on its olive-brown surfaces. The design elements are sharp and the fields are completely mirrored. Our EAC grade PR62. NGC ID# 26Z8, PCGS# 1263

**1849 Small Date Half Cent, B-2
First Restrike, PR65 Red and Brown**

4528 1849 First Restrike PR65 Red and Brown PCGS. B-2, Low R.6. Only Original and First Restrike variants are known for the 1849 Small Date half cents, with about 20 of the former and nearly 30 of the latter thought to exist today. There is no detailed Condition Census of these proofs, although half cent collector Richard T. Coleman published provenance notes just over a decade ago. This lovely Gem is an impressive piece that has virtually full mint red color, subdued only by a trace of bluish-brown color on each side. Our EAC grade PR64. Population: 1 in 65 Red and Brown, 1 finer (3/16). NGC ID# 26ZM, PCGS# 1306

**1852 First Restrike Half Cent
B-2, PR66 Brown**

4529 1852 First Restrike PR66 Brown PCGS. CAC. B-2, R.4. More than 100 examples of the 1852 Proof First Restrike half cents are believed to exist, making this variety the most plentiful of all proof half cents, and the only common proof issue of 1852. Despite the number known, only six examples are PCGS certified as PR66, with none finer. One of those is the present exceptional specimen that exhibits fully mirrored fields and sharp design definition. The obverse is deep tan with lovely blue-green overtones, while the reverse is mostly lighter tan with traces of original mint color. Our EAC grade PR62. Population: 4 in 66 Brown, 0 finer (3/16). PCGS# 35402 Base PCGS# 1317

LARGE CENTS

**1793 S-3, B-4 Cent, Fine 12
Chain, AMERICA**

4530 1793 Chain, AMERICA, S-3, B-4, Low R.3, Fine 12 PCGS. Breen Die State III with light clash marks at the profile and beneath the bust truncation. Approximately half of the surviving Chain cents are the S-3 variety, suggesting that half the original mintage, or about 18,000 coins, were produced from the die pair. Type collectors seeking an example of America's first official production from the Philadelphia Mint favor this variety. This example, housed in an old green-label PCGS holder, has light tan devices with medium and dark olive-brown fields. Both sides exhibit slight roughness consistent with the age and grade of this piece. Our EAC grade VG8. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

**1793 S-6, B-7 Wreath Cent, AU55
Sprung Die Obverse, Late Die State**

4531 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3, AU55 PCGS. CAC. Breen Die State V. The Sprung Die name stems from the horizontal die bulge in the left obverse field, and this coin shows the beginning stages of die cracks along the bulge, and from Liberty's lower lip toward the border. An additional die crack extends into the field from the border right of the Y in LIBERTY. This exceptional piece has glossy olive and light brown surfaces. The obverse is imperfectly centered with border beads absent from 1 to 4 o'clock. The reverse is well-centered. This pleasing piece is likely among the top dozen examples of the variety. Our EAC grade XF45.

Ex: Boys Town Collection Sale (Bowers and Merena, 3/1998), lot 99; Chicago Signature (Heritage, 8/2015), lot 3920, brought \$44,650. NGC ID# 223H, PCGS# 35450 Base PCGS# 1347

PROOF LARGE CENT

1793 S-9, B-12 Wreath Cent, XF40
Vine and Bars Edge
Intermediate State

4532 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, XF40 PCGS. Breen Die State IV, an intermediate die state for this die pair that saw extensive use. Current rarity ratings suggest that 2,200 to 2,900 Wreath cents exist for all varieties. Nearly one-third of those coins, 750 to 1,000 pieces, are examples of the S-9 die combination. Similar situations occur with the S-3 Chain cent that represents nearly half of all surviving examples, and also S-13 Liberty Cap cent that represents more than half of the surviving 1793 Caps. The three varieties are excellent choices for type collectors. This example has lovely olive and golden-brown surfaces with trivial handling marks and excellent eye appeal. Our EAC grade VF30. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

1849 N-18 Cent, PR64 Red and Brown
Considerable Mint Orange Remaining

4533 1849 N-18, R.6, PR64 Red and Brown PCGS. This near-Gem proof is among the approximately two dozen surviving examples of the N-18 die pairing, all in proof format. The reverse die was used for seven proof-only die pairings from 1844 through this year. The obverse here shows the curl tip pointing just right of the inner loop of the 8, and the bust tip, the left flag of the 1, the base of the 1, and the left edge of a dentil all align. The surfaces range from light tan to considerable mint orange remaining on the obverse portrait. A small nick shows on Liberty's cheek, along with a faint oval dark spot behind the head. The strike is somewhat soft on the highest hair curls. Our EAC grade PR63. Population: 1 in 64 Red and Brown, 2 finer (3/16). PCGS# 400589 Base PCGS# 1977

PROOF FLYING EAGLE CENTS

**1856 Flying Eagle Cent
Snow-9, Select Proof**

4534 1856 Snow-9 PR63 PCGS. CAC. A fully struck Select representative of the famous first small cent date. The fields and high points are walnut-brown, while lighter golden-brown resides in design recesses. A loupe reveals delicate obverse field marks and a faint hair-thin line through the T in CENT. The Snow-9 variety is an unofficial (but Mint-produced) proof restrike coined circa-1859 to capitalize on market demand for 1856 Flying Eagle cents. The number of American coin collectors soared during the late 1850s, partly due to the retirement of the large cent in favor of its smaller and more convenient successor. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

**1856 Flying Eagle Cent, PR65
Famous Low-Mintage Rarity**

4535 1856 Snow-9 PR65 NGC. Rich gunmetal-blue toning dominates this fully struck and coruscating Gem, although areas of orange-red linger in design recesses. Contact is minimal and the eye appeal is exemplary. The Snow-9 proofs were coined during the late 1850s, an era of extensive restrike activity at the Philadelphia Mint. The numismatic hobby was booming in popularity, and every new collector wanted an 1856 Flying Eagle cent, the rarest date of the small cent series. For a year or two, the Mint complied with demand, and also restruck backdated proof half cents and Seated dollars, along with 1804 dollars and miscellaneous patterns. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

INDIAN CENT

**1874 Cent, Condition Rarity MS66 Red
Exceptional Quality and Color
Tied for Finest, Ex: Gardner**

4536 1874 MS66 Red PCGS. The 1874 Indian cent, struck in the amount of 14.1 million coins, is often seen well-struck but with streaky woodgrain toning, resulting from higher concentrations of tin and zinc mixed into the copper alloy. Consequently, Red representatives prove significantly more elusive than Red and Brown examples. This Gem is an outstanding example of this conditionally rare Indian cent issue. The headdress shows pinpoint strike detail, and each side displays even orange-red color unaffected by mellowing or browning. Population: 11 in 66 Red, 0 finer (3/16).

Ex: FUN Signature (Heritage, 1/2003), lot 5338; Central States Signature (Heritage, 4-5/2009), lot 1122; purchased by Eugene Gardner from Bill Nagle (5/2009); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98021. NGC ID# 227Z, PCGS# 2120

PROOF INDIAN CENTS

1864 Bronze Cent, PR64 Red Cameo Snow-PR1, L on Ribbon Variety Extremely Rare, Sole Cameo Certified

4537 1864 L On Ribbon PR64 Red Cameo PCGS. Snow-PR1. There are three die varieties known for the proof 1864 L on Ribbon bronze cents with a combined population of about 20 coins. For many years it was thought that just one die pair existed for genuine pieces (PR-2). It was not until 1984 that Walter Breen confirmed the existence of PR-1. The only known example of the third variety, PR-3, was authenticated by Richard Snow in 1997.

PR-1 and PR-3 are believed to be originals struck in 1864, while the PR-2 coins, using a reverse die that is seen on later-year proofs, are considered restrikes coined circa 1868. PR-1 appears significantly less often than PR-2. Our roster, drawn from Snow's *Flying Eagle and Indian Cent Attribution Guide*, third edition, includes six individual coins and several additional appearances that likely represent different coins and early appearances of confirmed specimens. Snow estimates about eight or nine different pieces exist, although few have appeared at auction in recent years.

This full Red Choice Cameo fails to match any of the previously known examples of the PR-1 variety, although comparisons become increasingly difficult with the older catalog listings. The coin has the distinction of being the *only* full Red example in the Census, and by extension the only Cameo proof. Each side displays stark field-motif contrast with rich copper-gold coloration and pronounced mirroring. Smooth surfaces lack major signs of contact. A carbon speck between feathers 2 and 3 serves as a pedigree identifier. This piece ranks as one of only two coins, all varieties included, designated as Red Cameo at PCGS, the other being a Gem PR-2 representative (3/16).

Roster of Proof 1864 L on Ribbon Bronze Cents (PR-1)

- 1. PR66 Red and Brown PCGS.** Marks (Bowers and Ruddy, 11/1972), lot 164; Austin Collection (Bowers and Ruddy, 5-6/1974), lot 285; Dr. Curtis R. Paxman Collection (Bowers and Ruddy, 11/1974), lot 215; Dr. Stanley Spurgeon Collection.

1864 L on Ribbon Cent Gem Proof Red Cameo Snow-PR2, Ex: Norweb Single Finest at PCGS

4538 1864 L on Ribbon PR65 Red Cameo PCGS Secure. Snow-PR2. Ex: Norweb. The 1864 L on Ribbon proof is one of the classic rarities in the U.S. cent series. The fascinating history of these pieces is published in Rick Snow's book *The Flying Eagle and Indian Cent Attribution Guide*, third edition, where the die pair of the present coin is listed as Snow-PR2. There is an obverse die line (as struck) on Liberty's neck (under the ear) that matches the diagnostics given by Walter Breen in his 1977 *Encyclopedia of United States and Colonial Proof Coins: 1722-1977*. Since that time additional discoveries have been made which shed new light on this enigmatic issue.

The initial proof delivery of the 1864 L on Ribbon cent was 10-20 examples. These coins were either held as die trials or sold to collectors in a random manner. A few years later, the existence of these proofs became known, by which time the advanced collectors who desired examples could not locate the coins. When Henry Linderman began his first term as Mint Director in 1867, the proof 1864 L on Ribbon Cent had already become a hotly desired numismatic item. During Linderman's first term (1867-1869), and continuing for a few years thereafter, many numismatic delicacies were restruck at the Mint.

At least 10 (and perhaps more) additional 1864 L on Ribbon proofs were struck sometime around 1871, including the present coin. Rick Snow is credited with this discovery by matching the reverse die of the present example with the regular issue proof dies of that year. The unique die lines on the reverse are the same as on proofs from 1869 through 1871, although the 1869 and 1870 proofs were from earlier die states.

The present coin, pedigreed to the Emery May Norweb Collection, is a spectacular Gem that stands as the sole finest Snow-PR2 example known. It exhibits sharply detailed design elements throughout, with the L on the ribbon boldly delineated. The devices are frosty, creating some elements of contrast with the deeply reflective fields. The well-preserved surfaces retain their original red color with a few highlights of gold. Only a few microscopic specks of carbon are evident. A truly magnificent coin, and the finest of just two Red Cameos certified (3/16).

Ex: Michael Colman; Empire Coin Company; Norweb Collection; Norweb Collection, Part I (Bowers and Merena, 10/1987), lot 156. PCGS# 82281

LINCOLN CENTS

1910-S Cent, MS67 Red Rare Top-Grade Registry Coin

4539 1910-S MS67 Red PCGS. Early San Francisco issues are some of the most difficult dates in the Lincoln cent series to acquire in high-grade Red condition. The 1910-S is, surprisingly, far rarer in this condition than the key-date 1909-S VDB. PCGS records only four pieces in MS67 Red and none finer; NGC lists five coins in this grade and none finer (3/16). The supply is far insufficient to supply the needs of Registry Set collectors. This piece displays frosty, nearly flawless luster and sharp design elements. The surfaces have bright yellow-gold luster with overtones of honey and peach coloration. Eye appeal is outstanding. A 1910-S of unsurpassed quality. NGC ID# 22B6, PCGS# 2440

1912-S Lincoln Cent, MS66 Red Exceptional Registry Set Candidate

4540 1912-S MS66 Red PCGS. From a smallish mintage of 4.4 million pieces, the 1912-S Lincoln cent is a scarce, semikey issue in this popular series. Most of the mintage was released into circulation and few examples were saved by contemporary collectors, perhaps due to difficulties in ordering Uncirculated specimens directly from the San Francisco Mint that year. At least one prominent collector, Commodore Eaton, had his request for coins refused by the Superintendent of the Mint, who informed him that "one-cent pieces may be distributed only upon an order from the Treasurer of the United States or an Assistant Treasurer." The Mint's policy on providing collector coins seems to have been inconsistent in the early 20th century, and may account, at least in part, for the elusive nature of the 1912-S in high grade today.

The present coin is a spectacular Premium Gem, with impeccably preserved original red surfaces and vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is terrific. Population: 3 in 66 Red, 0 finer (3/16). NGC ID# 22BC, PCGS# 2458

1914-D Cent, MS66 Brown Sole Finest Brown Coin at PCGS Outstanding Coloration

4541 1914-D MS66 Brown PCGS. The 1914-D Lincoln cent is rare in MS66 regardless of color designation, and no examples are known finer. At PCGS, the top-grade population includes six MS66 Red coins and this single MS66 Brown coin (3/16). For a Brown representative, the present piece exhibits significant color. Coppery-orange luster shines through around the borders of the device and the rims, and the interiors are cast in vivid steel-blue and violet toning. The strike is well-executed, and eye appeal is superb. A few tiny specks near the lower reverse border are hidden by the patina. This is a rare and important acquisition for the Registry collector. NGC ID# 84BX, PCGS# 2471

1916-D Cent, Flashy MS66 Red

4542 1916-D MS66 Red PCGS. Although the 1916-D Lincoln cent is not as celebrated as some of its S-mint counterparts in high Mint State grades with Red surfaces, it is nearly as elusive. For example, PCGS recognizes only 14 submissions of the 1911-S in MS66 Red with none finer. This 1916-D is among only 16 such (three of them MS66+) at PCGS, and there are two finer in MS67 Red (3/16). The surfaces show a fine-grained mattelike quality, beaming with splendid luster and a complete absence of mentionable distractions. The strike is powerfully bold throughout both sides, including most especially the date, mintmark, and Lincoln's hair and beard. The last example we offered in this exact grade and service was lot 3461 in our Houston Signature (Heritage, 12/2014), which realized \$19,975. NGC ID# 22BP, PCGS# 2491

1955 Cent, MS65 Red and Brown Doubled Die Obverse, Rare So Fine

4543 1955 Doubled Die Obverse, FS-101, MS65 Red and Brown PCGS. Mint State examples of the 1955 doubled die obverse cent are available for a price through MS64, but at the Gem level this issue becomes rare. The current offering is a glowing Red and Brown coin that shows virtually no true brown. Coppery-orange luster over satiny surfaces dominates each side, although plum and steel-blue overtones add a degree of character that gives this piece its Red and Brown designation. The strike is bold, and there are no bothersome abrasions. The only carbon specks are very small, tucked against the reverse rim near the M in UNUM. Population: 8 in 65 Red and Brown, 0 finer (3/16). NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

1969-S Lincoln Cent, AU58 Rare Doubled Die Obverse

4544 1969-S Doubled Die Obverse, FS-101, AU58 PCGS. CAC. The 1969-S Doubled Die was discovered shortly after its release, yet today specimens remain highly elusive. The bold die doubling in places is nearly as dramatic as that on its cousin, the 1955 Doubled Die, an error coin that is nonetheless far more available. While the digits of the 1955 Doubled Die are more widely separated, the letters near the rim of the 1969-S Doubled Die are separated by nearly a half-letter width at IN GOD WE TRUST. The digits of the date and LIBERTY are also widely doubled, although not in so extreme a fashion as the 1955 Doubled Die.

Interestingly, all of the 1969-S Doubled Die cents were apparently made from a single die pair. This also puts the 1969-S Doubled Die cents in common with the 1955 Doubled Die cents, which are also all struck from a single die pair. But there, the similarities largely end.

While the 1955 Doubled Die is readily obtainable for a price in the lower Mint State grades, Uncirculated examples of the 1969-S Doubled Die are seldom seen. The typical survivor is an AU55, placing this piece in the above-average category. This is an attractive coin with even, reddish-brown coloration on both sides. A tick at the top of Lincoln's hair, one on the beard, and one above the Y in LIBERTY are the only mentionable contact on the obverse. Singular contact is also nearly absent on the reverse, save for a small mark on a column of the Lincoln Memorial. These are minor complaints, however, compared to the overall high quality and excellent eye appeal this coin offers. Population: 15 in 58, 5 finer (3/16). PCGS# 37994 Base PCGS# 2921

PROOF LINCOLN CENTS

**1913 Cent, PR67 Red
Conditionally Rare**

4545 1913 PR67 Red PCGS. Remarkably few matte proof Lincolns have achieved a Superb Gem grade, across all issues and color categories. The 1913 shows a PCGS population of just seven coins in PR67 Red, with none finer (3/16). Surprisingly, this paltry survival rate is among the higher for the grade in the matte proof series. The present coin is truly superb. Full definition appears on all design elements and the rims are broad and squared. Bronze-gold hues dominate the matte surfaces, but yield to overtones of violet-red, lilac, and olive. A few faint carbon specks are present, but there are no contact marks. NGC ID# 22KW, PCGS# 3317

**1941 Lincoln Cent, PR67 Red
Tied for the Finest at PCGS**

4546 1941 PR67 Red PCGS. CAC. A minuscule diagonal die line slants down through the top of the 1 and upper curve of the 9. While PCGS has certified nearly 2,000 proof 1941 Lincoln cents, just seven of those grade PR67 Red, and none are finer (3/16). On the other coast, NGC has certified nearly 1,100 of these, and they have never assigned a higher grade. This piece is also tied for the finest PCGS proof from all the 1936 to 1942 proof issues. It is an excellent type candidate to represent the pre-WWII brilliant proofs. As expected, the strike is exquisite. The fields are deeply mirrored and nicely frame the reflective devices. A trivial toning spot appears on the fiery orange obverse, with no spots on the similar fiery reverse. NGC ID# 22LH, PCGS# 3350

TWO CENT PIECES

1872 Two Cent Piece, MS66 Red and Brown Tied for Finest at PCGS

4547 1872 MS66 Red and Brown PCGS. The two cent denomination was unwanted and unnecessary in the national economy by 1872. Only 65,000 business-strike examples were struck that year, the final regular-issue mintage of the series. After a proof-only mintage the following year, the denomination was discontinued. The 1872 is an elusive issue in all grades and the acknowledged key to the regular-issue series today.

The present coin is a spectacular Premium Gem, with sharply detailed design elements and vibrant mint luster throughout. The original red surfaces have mellowed to light crimson in some areas, mostly on the reverse. No mentionable distractions are evident and eye appeal is outstanding. Population: 2 in 66 Red and Brown, 0 finer (3/16). NGC ID# 22NG, PCGS# 3613

1872 Two Cent, Bold MS66 Red Tied for Finest Certified

4548 1872 MS66 Red PCGS Secure. The wonderfully preserved surfaces showcase amber-red and golden-bronze coloration with occasional ice-blue highlights. Glowing luster swirls over each side. The impression is bold, particularly on the wreath leaves, and all shield lines are clearly delineated. This is a lovely Premium Gem representative with no mentionable signs of handling.

This is the final circulation strike issue in the series, as only proofs were produced in 1873, the year the denomination was abolished. The 1872 is also by far the lowest-mintage date among regular issues in the short-lived two cent series. Only 65,000 coins were manufactured. Population: 3 in 66 Red, 0 finer (3/16).

Ex: Baltimore Auction (Stack's Bowers, 3/2011), lot 1013; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98095. NGC ID# 22NG, PCGS# 3614

PROOF TWO CENT PIECE

**1871 Two Cent, PR66+ Red
Top-Grade PCGS-CAC Example**

4549 1871 PR66+ Red PCGS. CAC. Sumptuous preservation is the hallmark of this splendid Premium Gem proof 1871 two cent piece, one of only 960 pieces struck during the waning years of this odd denomination. Blends of paler straw-gold near the margins blend into vivid sunset-orange in the interiors with darker device high points. The strike is essentially full throughout. No visible contact or carbon mars the strong eye appeal, although we note one small brown fleck beneath the O in GOD. This PR66+ Red example is clearly among the few finest survivors of that mintage, the sole finest Red non-Cameo at PCGS by the Plus margin. NGC reports seven in PR66 Red and one PR67 Red. Population: 15 in 66 (1 in 66+) Red, 0 finer. CAC: 8 in 66 Red, 0 finer (2/16). NGC ID# 22NH, PCGS# 3647

THREE CENT SILVER

**1872 Three Cent Silver, MS67
Post-Civil War Rarity**

4550 1872 MS67 PCGS. The circulation strike three cent silver pieces minted for a decade during and after the Civil War, from 1863 to 1872, are all important rarities from low mintages. This issue, marking the end of circulation strikes for the denomination, had a mintage of only 1,000 coins, with an additional 950 proofs. PCGS has only certified 57 of those circulation strikes, including two MS67 and one MS67+ (3/16). This scintillating Superb Gem exhibits reflective fields and brilliant ivory luster beneath peripheral gold, sea-green, violet, and blue toning. NGC ID# 22ZN, PCGS# 3693

SHIELD NICKEL

1873 Open 3 FS-1301 Nickel, MS63 Large Over Small Date

4551 1873 Open 3, Large Over Small Date, FS-1301, MS63 PCGS. The attribution numbers in the Cherrypicker's Guide continue to evolve, having changed more than once through the various editions. This extremely rare variety was once known as FS-009, and is identified as FS-106 on the PCGS holder. Today, it is known as FS-1301. Remnants of a small 3 are visible between the 7 and the 3 of the primary date. Fivaz and Stanton write: "This is a very rare variety, always sought by the many Shield nickel specialists." This Select Mint State piece has satin luster that shines through its lovely gold toning. PCGS has certified 12 of these in all grades. Population: 1 in 63, 1 finer (3/16). PCGS# 38394 Base PCGS# 3802

PROOF SHIELD NICKELS

1871 Shield Nickel, PR67 Cameo Tied for Finest at PCGS

4552 1871 PR67 Cameo PCGS. While mintages of proof Shield nickels from 1866 to 1877 are inexact, it is clear from reading the patterns of stated strikings that the first high-production period for the series began in 1870, when strikings took a jump from the 600-piece range to four-figure production. The 1871 nickel has a slightly lowered official mintage but still falls in the higher range for the early years at 960+ examples. This moderately contrasted example has light frost and mirrors, the latter showing green-gold toning along parts of the margins. The design elements are sharply detailed, the surfaces are impeccably preserved, and overall eye appeal is terrific. Population: 2 in 67 Cameo, 0 finer (3/16). NGC ID# AMU3, PCGS# 83825

LIBERTY NICKEL

1876 Shield Nickel, PR67 Deep Cameo Single-Finest PCGS Example

4553 1876 PR67 Deep Cameo PCGS. The Philadelphia Mint increased production of proof sets considerably in 1876, probably in anticipation of extra collector interest, due to the centennial celebration of American independence. Unfortunately, quality control was not what it should have been, and many examples seen are dull or hazy in the fields.

The present coin is definitely an exception to the rule, with sharply detailed design elements and deeply mirrored fields that set up profound cameo contrast with the frosty devices. The virtually pristine surfaces show delicate highlights of greenish-gold and lavender toning and eye appeal is terrific. As the finest-certified PCGS specimen, this coin is a must-have for Registry Set enthusiasts. Population: 1 in 67 Deep Cameo, 0 finer (3/16). NGC ID# 276T, PCGS# 93830

1905 Nickel, Frosty MS67 Registry Set Essential Tied for Finest Known

4554 1905 MS67 PCGS. Any Liberty nickel in Superb Gem condition is a rarity. This type in general did not experience widespread collector interest during production, meaning that most of the high-end coins known today survived by chance. The 1905 is a common date through MS65 but becomes scarce in MS66. This piece is one of only two Superb Gems at PCGS (both MS67), and NGC contributes only one more coin in this grade (3/16). The thick, glowing mint frost is almost flawlessly preserved, and the corresponding eye appeal dazzles the viewer. The strike is bold, and a hint of iridescence accentuates the eye appeal. NGC ID# 277G, PCGS# 3866

BUFFALO NICKELS

1916 Doubled Die Nickel, XF45 Clean Surfaces and Problem-Free Overall

4555 1916 Doubled Die Obverse, FS-101, XF45 NGC. CAC. James Earl Fraser's Indian Head nickel series offers a number of significant varieties for the enterprising specialist. Among the most challenging is the 1916 Doubled-Die Obverse, and the dramatically doubled coins are, in fact, among the most elusive varieties in all series. In their *Authoritative Reference on Buffalo Nickels*, John Wexler, Ron Pope, and Kevin Flynn classify the doubling as pivot hub doubling. This occurs "when a die is pivoted about a point near the rim during rehubbing." Doubling is most evident directly opposite the pivot point, which in this case occurred between 1 and 2 o'clock. Consequently, the date is the most dramatically doubled design element. This is a particularly attractive example. The surfaces are nearly abrasion-free, and each side displays pale horizontal streaks of gray-russet patina. Even wear is seen over the high points. NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931

Big Tree, one of the three models used for the Buffalo nickel

1916 Buffalo Nickel, MS61 Famous Doubled Die Obverse, FS-101 Sought-After *Guide Book* Hubbing Error

4556 1916 Doubled Die Obverse, FS-101, MS61 NGC. The 1916 Doubled Die Obverse Buffalo nickel is well-known and extremely popular with collectors today, but this remarkable hubbing error went undetected for decades after its striking. David Lange details the early history of this issue in his *Complete Guide to Buffalo Nickels*:

"The first published report of this variety (FS-1916-101) appeared in *The Numismatic Scrapbook Magazine* for July 1962, when an example was submitted by Herbert S. Perlin of Pomona, California. Knowledge of it, however, was not widespread until the mid-1970s. Not until it was described and illustrated in the September 1976 issue of the *Coin Dealer Newsletter Monthly Summary* did this coin gain proper recognition. It appeared shortly thereafter in the Red Book (*A Guide Book of United States Coins*, by R.S. Yeoman), and it's been a perennial favorite ever since."

Because the issue went unnoticed at the time of issue none were saved for numismatic purposes. By the time collectors became aware of this dramatic Mint error, the coins had been circulating for decades and most examples seen are in lower circulated grades. The surviving population is estimated at 150-200 examples in all grades, with fewer than 15 Mint State specimens extant.

The 1916 Doubled Die was the result of pivoted hub doubling, according to CONECA, producing a "very strong spread on date, chin, throat, feathers, and the tie on the braids." These features are all evident on the present coin, a pleasing MS61 specimen with well-detailed design elements and slightly subdued satiny mint luster on the obverse. The reverse is sharper, with brighter luster. The lightly marked surfaces are blanketed in delicate shades of lavender-gray and pale gold toning and the overall presentation is quite attractive. Census: 2 in 61, 10 finer (2/16).

From *The Indian Rocks Collection*. NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931

1917-D Buffalo Nickel, MS66+ Only One Finer Coin at PCGS

4557 1917-D MS66+ PCGS. CAC. From a mintage of more than 9.9 million pieces, the 1917-D Buffalo nickel was not a well-produced issue. Most examples seen are softly struck, with insipid mint luster and inferior eye appeal. This high-end Premium Gem is a happy exception to the rule, with razor-sharp definition on all design elements and vibrant, satiny mint luster on both sides. The well-preserved surfaces are visited by attractive shades of ice-blue and greenish-gold toning. Overall eye appeal is terrific. This coin will be a welcome addition to the finest collection or Registry Set. Population: 21 in 66 (1 in 66+), 1 finer (3/16). NGC ID# 22RE, PCGS# 3935

1917-S Buffalo Nickel, MS67 The Sole-Finest Certified at Either Service

4558 1917-S MS67 NGC. Although NGC has certified 11 examples of the 1917-S Buffalo nickel in MS66 and PCGS has graded 24 at that level, one in MS66+ (with almost certain duplications in those numbers), the present MS67 1917-S nickel is the only one so certified at either service (3/16). Any Registry Set collector pursuing the ultimate such set simply must have this coin, and none other.

The strike is unusually sharp, producing sculptural detail to all design elements. The knot binding the hair in the Indian's queue is well separated at both top and bottom. All digits of the date are bold, and the hairline is complete. On the reverse, the bison's tail is split, the hair at the shoulder is sharp if not entirely full, and the hair on the head is of similar quality. Contact is, of course, not an issue here and eye appeal is terrific. NGC ID# 22RF, PCGS# 3936

1918/7-D Nickel, Lustrous MS62 Scarce Overdate Issue, FS-101

4559 1918/7-D FS-101 MS62 NGC. Struck from an advanced state of the dies, a characteristic die crack from just above the braid knot reaches nearly to the Indian's mouth and metal flow lines appear on the borders. Even so, this example of the famous Denver overdate is thoroughly sharp and attractive. Exceptional definition for the variety graces the central motifs on both sides. Reddish-orange mint luster glows from beneath olive-gray and blue overtones to create a rich patina that the variety seldom offers.

Attractive 1918/7-D examples are coveted by nickel specialists in all grades. Those with significant eye appeal (like the present coin) are especially rare when in Mint State, and therefore always in demand. Based on the infrequent appearance of Uncirculated pieces in our auctions, it may be many years before we offer another 1918/7-D Buffalo with this much eye appeal for the assigned grade. Census: 16 in 62, 23 finer (2/16). NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1925-D Nickel, Colorful MS66 Tied for Finest, Superb Registry Coin

4560 1925-D MS66 PCGS. The 1925-D Buffalo nickel is often seen poorly struck, which contributes to its scarcity in MS65. This Premium Gem is both sharp and conditionally rare. Only two dozen pieces are known this fine at both services combined, and none are finer (3/16). The present coin is beautifully preserved and glistens with softly frosted luster. Both sides exhibit blended lavender, champagne, ice-blue, and rose coloration. Only minor evidence of die erosion is seen in the fields. The Registry Set enthusiast would be hard-pressed to locate a more appealing example of this Denver issue. Population: 11 in 66, 0 finer (3/16). NGC ID# 22S3, PCGS# 3955

1926-S Buffalo Nickel, MS64 Low-Mintage Series Key

4561 1926-S MS64 PCGS Secure. The 1926-S Buffalo nickel claims the lowest business-strike mintage of the series, at a paltry 970,000 pieces. In addition, few high-quality examples were saved by contemporary collectors and the hoarders of the 1930s had limited success in locating this issue in circulation. Coins grading MS64 are quite scarce in today's market, and finer specimens are very rare.

The present coin is an attractive Choice example, with well-detailed design elements that show just a touch of the usual softness on the bison's shoulder. The lightly marked surfaces are enhanced by shades of lavender, ice-blue, and champagne-gold toning, with satiny mint luster underneath. PCGS has graded 13 numerically finer examples (2/16).

From The Indian Rocks Collection. NGC ID# 22S7, PCGS# 3959

1937-D Three-Legged Nickel, Remarkable MS67 Ultimate 'Demand Rarity'

4562 1937-D Three-Legged, FS-901, MS67 NGC. "Three-Legged Buffalo." The name has a piquancy and an oxymoronic savor that made it catch on even among the general public. The U.S. coin issues that members of the noncollecting public could name are an extremely short list, but they would include the Three-Legged Buffalo, the "1943 copper penny," and the 1909-SVDB cent, this last in a lesser class than the other two.

It is fitting that the Big Sky Country of Montana was "home on the range" for the novel Buffalo nickels, which seem to have turned up there within a short time after production, chiefly the area in and around Bozeman. David Lange's series reference notes that C.L. "Cowboy" Franzen either discovered—or at least first publicized—the variety in *The Numismatic Scrapbook Magazine* as early as 1937-38. Veteran coin dealer Aubrey Bebee wrote in the magazine about the issue:

"Maurice Gould is undoubtedly correct in his assumption that Montana was the main 'stamping ground' of the 3-legged Buffaloes. While touring the West for several months in 1939, we stopped at Bozeman, Montana, for several days, where Mrs. Bebee and I had the great pleasure of meeting Harold C. White, who informed us of the existence of this freak. I bought several of these nickels from Mr. White, as I doubted that I would be able to find any as late as 1939. However, the next day I went to the banks there and from four \$50.00 bags found about 30 specimens. In Great Falls, Montana, we did not find as many but here we found several that were strictly uncirculated. Two months later, we returned from Canada and toured Idaho, Washington, Oregon and other western states, and the only 3-legged Buffaloes we found were in the possession of collectors."

It is fortunate for collectors that the issue was discovered so soon after manufacture, because high-grade (and all) examples are the subject of incredible demand—sometimes from those selfsame members of the "general public" who would not dream of owning any other collector coin. Lange notes that Mint State coins are "scarce but sometimes available," adding this:

"They turn up for sale less often than their certified population would suggest, due to an unceasing demand that results in quick placement. Choice examples are scarce, gems rare. Most pieces encountered grade VF-AU."

The combined certified population at NGC and PCGS is in the neighborhood of 2,000 Mint State coins, but those figures must be taken with several grains of salt, since a one-point grade bump provides a considerable price incentive. Most Uncirculated certified coins cluster at the MS62 level, with finer-graded pieces diminishing rapidly in number in MS63 and above. Superb Gems are among the ultimate condition rarities — certainly of the series, but as an unquestioned "demand rarity" among the entire federal coinage, it leaves other issues in the dust (despite only three legs).

This lustrous and sharply struck example has all the eye appeal of the finest regular 1937-D nickels. The definition on the chief's hair, braid knot, and the bison's back are exceptional. The satiny surfaces radiate vivid mint luster with mellow champagne-gold shades at the borders and icy-lilac toning at the centers. NGC reports just three MS67 examples with none finer; PCGS has yet to record such a highly graded coin. Census: 3 in 67 (1 in 67 ★), 0 finer (3/16). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

**1915 Buffalo Nickel, PR68
Gorgeous Toning
Among the Finest at PCGS**

Mounted Head of Black Diamond

4563 1915 PR68 PCGS. Although the task does present a challenge, the matte proof Buffalo nickel series — five issues — can be assembled in the top PR68 grade in PCGS holders. There are 11 1914s in this grade and seven each for the 1913 Type Two and the 1916; the 1913 Type One and the 1915 (here represented) each have only four PCGS coins at the PR68 level. None of these issues is certified finer at that service (3/16). The Registry Set competitor will find this top-grade 1915 matte proof unavoidably enticing. The strike is fully rendered, and the preservation is essentially flawless. Lavender-blue interiors cede to rose-gold and lemon toning around the peripheries. Eye appeal is superb. NGC ID# 278U, PCGS# 3992

EARLY HALF DIMES

1792 Half Disme, MS63 Historic Pre-Mint Issue Judd-7, Pollock-7

4564 1792 Half Disme, Judd-7, Pollock-7, R.4, MS63 NGC. For the past 150 years, these coins have intrigued collectors as well as Mint officials. Much has been written about the origins of the half dismes, some of it embellishment, some outright fabrication. The real breakthrough in research seems to have come in the past ten years, the results of which were published in the ANS' *American Journal of Numismatics* 15 for 2003. In that article, the authors, Joel Orosz and Carl Herkowitz, explore all aspects of the production of these first official United States coins. The article, "The Fabled 1792 Half Dimes," is well worth the effort for anyone interested in early U.S. coinage. The authors discovered an obscure reference to a tipped-in note that was discovered in a European coin book in 1943 and the contents of the note were subsequently published in *The Numismatist*. A subsequent misinterpretation of the author of the note by Charles McSorley, Jr. led to one of the major pieces of misinformation regarding the 1792 half dismes. McSorley misidentified the author of the note as officer and refiner in the Mint, Jonas R. McClintock. The signature was faded and only read J—Mc—. Orosz and Herkowitz identified the actual author of the note as John McAllister, Jr., a fascinating individual who was a close friend of Adam Eckfeldt, who was present at the striking of the 1792 half dismes. The actual content of the tipped-in note reads:

"In conversation with Mr. Adam Eckfeldt (Apr 9, 1844) at the Mint, he informed me that the Half Dimes above described, were struck, expressly for Gen. Washington, to the extent of One Hundred Dollars, which sum he deposited in Bullion or Coin, for the purpose. Mr. E. thinks that Gen. W. distributed them as presents. Some were sent to Europe, but the greater number, he believes, were given to friends of Gen. W. in Virginia. No more of them were ever coined. They were never designed as Currency. The Mint was not, at the time, fully ready for being put into operation. The Coining Machinery was in the cellar of Mr. Harper, saw maker, at the corner of Cherry and 6th Sts, at which place these pieces were struck."

While the facts in the note above may have been well-known to a small group in the mid-1840s, later retellings of the story stretched and greatly enhanced the basic facts until the present day, when it is still believed by many that Martha Washington was the model for the figure of Liberty, the coins were struck from Washington's Sheffield silver plate, only \$75 worth of coins were struck, and that George and Martha were in attendance when the coins were presented. Skipping to the end of this masterful article, Orosz and Herkowitz's conclusions are:

- The half dismes were not struck from sterling silver or silver-plated tableware but rather, as Eckfeldt states, from bullion or coin.
- The half dismes survive today at an unusually high rate, consistent with early presentation to at least some degree.
- The amount struck (1500 pieces or \$75) is consistent with an initial deposit of \$100, with the loss due to preparation.
- After the planchets were prepared, they were deposited with the cabinet officer in charge of the Mint. Jefferson personally delivered the blanks to the Mint to be struck, and the struck coins were returned to his care.
- Jefferson recorded all transactions regarding the 1792 half dismes as private records, not public records.

As noted above, numerous half dismes were handed out as favors by George Washington, while others were shipped to Europe. This particular piece must have been highly prized by its owner, as it is in essentially the same condition as when it left John Harper's saw shop 224 years ago. The only difference is the addition of multiple layers of gray, blue, and golden toning over each side. Magnification shows a few light contact marks, but none that are worthy of individual mention. The strike details on the obverse are stronger than on the reverse. Also worthy of note is the absence of the planchet flakes usually seen on half dismes. This is one of the finest pieces known of this historic issue. This is the only coin NGC has certified in MS63, with 30 finer (many obvious resubmissions are included in this number), while PCGS has certified three examples in MS63 with 13 finer (2/16).

Ex: Bowers and Ruddy (Rare Coin Review #23, Summer 1975), offered at \$9,950; Bowers and Ruddy (Rare Coin Review #25, Spring 1976), offered at \$9,500; Bowers and Ruddy (Rare Coin Review #27, Winter 1976-1977), offered at \$8,950; Bowers and Ruddy (Rare Coin Review #28, Spring 1977), offered at \$8,500; Aubrey and Adeline Bebee Auction (Bowers and Merena, 8/1987), lot 1498, realized \$14,300; Long Beach Signature (Heritage, 6/2005), lot 5684, not sold; Bergstrom & Husky Collections (Stack's, 6/2008), lot 2007, realized \$402,500. NGC ID# 946T, PCGS# 11020

1794 Half Dime, V-4, LM-4, AU58 Sharp First-Year Flowing Hair Example

4565 1794 V-4, LM-4, R.4, AU58 NGC. The date sits low beneath curl and bust, while the reverse has three inner berries but no outer berries beneath the left (facing) wing. A total of seven berries left and five berries right confirm the LM-4 variety, which is more available than other 1794 die pairs, but still scarce as a representative of the challenging 1794 Flowing Hair half dimes.

This near-Mint example displays a number of visual attributes, including a bold, even strike, an almost complete absence of perceptible wear, and a lack of detracting adjustment marks. Both sides show consistent steel-gray patina with hints of luster in the fields. A few deeper gray toning streaks and light abrasions angle up from left to right on the obverse, but they are a trivial distraction at most. Census (all 1794 varieties): 17 in 58, 54 finer (2/16). NGC ID# 22ZT, PCGS# 38584 Base PCGS# 4250

1794 Flowing Hair Half Dime, MS64 Popular First-Year, V-4, LM-4 Variety

4566 1794 V-4, LM-4, R.4, MS64 PCGS. Although the denomination was authorized by the Mint Act of 1792 — and indeed, a limited mintage of 1792 half dimes was produced in that year — the Mint did not deliver any Flowing Hair half dimes until 1795. Some of those coins were struck from 1794-dated dies, with a *Guide Book* mintage of 7,700 pieces, although the actual number of pieces struck is likely higher based on the number of grading events, as well as the fact that four different die varieties are known for the 1794-dated coins. The present piece represents the LM-4 variety, with the date far from the bust and three inner berries, with no outer berry, under the left (facing) wing. This was the only use of the obverse die, and the third and final use of the reverse die.

An attractive Choice example, the coin displays strong central elements and well-preserved surfaces that show prominent die cracks and clash marks on the obverse. The raw planchet was filed and not all of the file marks were eliminated by strike, where they are still visible at the upper obverse margins. The reverse shows some peripheral weakness of strike, suggesting the dies were misaligned. The coin is largely brilliant and lustrous, where the sharp central strike adds to the considerable eye appeal. Population (all varieties): 11 in 64, 10 finer (2/16). NGC ID# 22ZT, PCGS# 38584 Base PCGS# 4250

1795 Half Dime, V-5, LM-8, MS64+ Well-Preserved Flowing Hair Type Coin

4567 1795 V-5, LM-8, R.3, MS64+ NGC. An intermediate die state, cracked from the Y in LIBERTY, through Liberty's face, to the 7 in the date. LM-8 is a plentiful die pairing among 1795 half dimes, but high-end Mint State examples are nonetheless rare. This Plus-designated Choice example displays satiny luster with a hint of warm champagne toning. There are no mentionable abrasions. Strike weakness is seen on the lower hair curls, cheek, and portions of the eagle's wings, with the result that some adjustment marks on the obverse portrait were not fully struck out of the planchet. Eye appeal is nonetheless pleasing. Census (all varieties included): 39 in 64 (2 in 64+), 19 finer (3/16). NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1796 Half Dime, Sharp AU58 Colorful Toning V-1, LM-1, LIKERTY

4568 1796 LIKERTY, V-1, LM-1, R.3, AU58 NGC. The so-called "LIKERTY" variety with a broken B in LIBERTY. LM-1 is the more frequently seen of the two 1796 half dime die varieties. Production of this type was limited in its debut year. Three warrants — one in March and two in June — account for the 10,230-coin official mintage, although it is possible that some of the half dimes delivered in February 1797 were from 1796 dies. Logan-McCloskey note that the LM-1 die pairing is typically seen well-worn, which distinguishes the appeal of this near-Mint example. The strike is impressively bold, even, and well-centered, with trivial high-point friction blending the eagle's breast feathers. Original violet, plum, and golden-gray toning appears in the fields, and various gray hues cover the motifs. There are no visual distractions. This is a remarkable coin that is worthy of spirited bidding. Census: 9 in 58, 16 finer (3/16). NGC ID# 22ZX, PCGS# 38596 Base PCGS# 94254

SEATED HALF DIMES

**1839-O Seated Half Dime, MS67+
Concentric Rainbow Toning
The Sole Finest Certified**

4569 1839-O No Drapery MS67+ NGC. The New Orleans Mint struck just over 1 million No Drapery half dimes in its second year of operation. The date's production total is comparable to the 1839 and 1840 Philadelphia issues. However, the 1839-O is scarcer than its P-mint counterparts, especially in Mint State. This is the finest certified survivor from that 1 million-coin mintage, making this an important opportunity for the advanced Seated specialist or Registry enthusiast.

Vibrant luster shines through the concentric bands of rainbow toning coloring both sides of this spectacular No Drapery representative. While the 1839-O is known for poor strikes, Liberty's head, the stars, and the wreath all show full detail. Clash marks occur in the upper obverse field. An impeccably preserved and technically unrivalled Plus-graded Superb Gem. Census: 1 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 232T, PCGS# 4320

**1858 Seated Liberty Half Dime, MS66+
Date Struck Over Inverted Date, FS-302
Tied for Finest at PCGS**

4570 1858 Over Inverted Date, FS-302, MS66+ PCGS. This popular *Guide Book* variety is one of the most spectacular die gaffes in U.S. Mint history — at least under high magnification. The overdate is bold, a result of first punching the date upside-down into the die, and then repunching with the correct orientation. The variety was discovered in 1963 and has been avidly sought-after ever since. This Gem example has well-preserved surfaces with rose-to-peach centers and cerulean-to-aqua hues at the margins. The design elements are well-detailed and vibrant mint luster shines through the toning. Overall eye appeal is terrific. Population: 3 in 66 (2 in 66+), 0 finer (3/16). PCGS# 38739 Base PCGS# 4368

EARLY DIMES

1792 Disme in Silver, Judd-9, AU50 Finest of Three Examples Known Ex: Judd-Partrick

4571 1792 Disme, Judd-9, Pollock-10, R.8, AU50 PCGS Secure. Ex: Judd-Donald G. Partrick Collection. 41.5 grains. In contrast to the 1792 half disme, there is little in the historical record that directly addresses the disme of the same year. Only three examples are known to collectors today, with two specimens struck on a normal flan and another on a thick planchet, with the date effaced. The present coin is by far the finest-known example, having graced the fabulous collections of Dr. J. Hewitt Judd and Donald G. Partrick. Heritage Auctions is privileged to offer this classic pattern rarity in just its second auction appearance.

On July 9, 1792, Mint Director David Rittenhouse requested permission from George Washington to coin half cents, cents, half dismes, and dismes. Washington approved the same day. In between, Thomas Jefferson wrote to Washington and suggested that the President ought not to feel obligated to manage what he apparently considered routine details of the Mint operation. Jefferson's recommendation, while well-intended, probably had the unfortunate side effect of reducing the depth of the historical record. As a result, the otherwise little-discussed disme has inherited some of the mythology associated with the half disme.

Authors have grouped the two together since at least 1864. Edward Cogan's January 1, 1864 announcement letter (for the Neff sale), in describing a silver disme, referred to "the acknowledged fact that it was made from silver sent to the mint by George Washington ..." Ebenezer Mason, the Philadelphia coin dealer, wrote in the February 1885 issue of his house organ *Mason's Coin Collectors' Magazine* "It is recorded that Washington resorted to this mint for the private coinage of the 1792 silver dimes and half dimes, which were coined from a portion of his old silver plate, and presented by him to friends of the family." Mason sadly failed to indicate exactly where "it is recorded," and the thread continued. In 1914, the American Numismatic Society Exhibition Catalogue again lumped the two coins together and stated "The silver used in the above two pieces was furnished by Washington."

The Washington association was a potent force during the expansion of American coin collecting in the 1840s and 1850s. Connecting a coin to Washington was commercially a good thing to do, and the Mint itself got in the act with the publication of *A Description of the Medals of Washington* (1861). Jacob R. Eckfeldt and William E. DuBois took note of the interest in Washington material in *A Manual of Gold and Silver Coins of All Nations* (1842):

"The Mint was not fully in operation until 1795. Before that time it was rather engaged in experimenting; hence the variety of specimens, in silver and copper, anterior to that date, which are now so much in request among the virtuosi. The most noted of these is the Washington Cent ... The 'Washington Cent,' of which a few specimens escaped the Mint, is now one of the greatest numismatic curiosities, and is eagerly sought after, by collectors. [Which Philadelphia Mint Washington piece the authors are referring to is unclear. This could possibly be a reference to the 1792 coppers struck by Getz or the 1792 Washington President, 13 Star Above Eagle coppers.]"

An 1851 newspaper account of the Dr. Lewis Roper sale, the first major rare coin auction in America, naturally began its coverage with the Washington pieces. A 1792 Getz half dollar crossed the block at \$18, an extraordinary sum at the time. The veneration of the first President created a temptation to stretch the truth, and the "fact" that Washington had deposited silver for the 1792 half dismes evolved into a connection with the silver disme as well. In actuality, Washington's supposed silver deposit for the half disme was only first recorded in 1844 by the Philadelphia antiquarian John McAllister, who was relating the history as told to him by the retired Chief Coiner, Adam Eckfeldt. The story was oft-repeated and resonated strongly with 19th century collectors. Today, it falls into the category of "unsolved mystery," provocative but proven to no one's satisfaction.

The present coin has the most mysterious provenance of all the 1792 silver dimes, as its history has only been traced with certainty back to 1946. It is likely the specimen that first surfaced in the collection of Massachusetts numismatist DeWitt Smith in the 19th century, although some descriptions of that piece do not exactly match this example. Smith's collection was purchased intact by super-collector Virgil Brand in 1908, for the staggering price of \$62,619.98. When the Brand Collection was dispersed, beginning in the 1930s, this piece was held by several dealer intermediaries before passing to pattern specialist Dr. J. Hewitt Judd in 1946. More recently, this coin was a highlight of the magnificent Donald G. Partrick Collection, a mark of high distinction for any coin. When it was offered by Heritage Auctions in lot 5507 of the Partrick Collection in January 2015, it realized a record price of \$998,750. Although it was once offered in an Abe Kosoff fixed price list in the early 1960s, the 2015 Partrick sale was the first time this specimen had been offered at auction.

The present coin is a pleasing AU specimen, the finest known example of this classic rarity by a wide margin. The design features Liberty facing left with flowing hair extended to the right. The motto LIBERTY PARENT OF SCIENCE & INDUST[RY]. begins below and to the right of the truncation point and extends around the periphery, while the date is placed in the field below the portrait and above the motto. The obverse exhibits coin-gray toning with scattered areas of more intense color outlining the devices. There is a hidden mark within the hair, to the left of the second E in SCIENCE, just above the outstretched strand. The die orientation is 330 degrees (near medal alignment). The reverse shows evidence of multiple strikes, with doubling seen in STATES and in the dentilation to the top and right. The surfaces are problem-free and the overall presentation is most attractive. For the early pattern specialist, there is no adequate substitute for the coin offered here. Population: 1 in 50, 0 finer (2/16).

Roster of the 1792 Silver Dimes (Judd-9)

1. AU50 NGC. 41.5 grains. Possibly DeWitt Smith; Virgil Brand (1908); Brand purchased Smith's collection, including this coin, in 1908 (Brand ledger entry #46511); the coin was appraised by Burdette G. Johnson for \$125 and sold at the same price to Wayte Raymond on October 20, 1935; possibly the coin offered to James Kelly by B.G. Johnson on November 5, 1941 for \$800; Dr. J. Hewitt Judd (acquired in 1946 or before), *An Illustrated History of United States Coins* (Abe Kosoff, 1962), lot 13; Kosoff reported this coin sold to an anonymous collector in the January 24, 1973 edition of *Coin World*; The Donald Groves Partrick Collection (Heritage, 1/2015), lot 5507; realized \$998,750. **The present coin.**

2. XF Details NGC. 66.1 grains (thick flan). Joseph J. Mickley Collection (W. Elliot Woodward, 10/1867), lot 2131, realized \$39 to Mendes I. Cohen; Colonel M.I. Cohen (Edward Cogan, 10/1875), lot 379, realized \$20 to Jules Fonrobert, bidding as "Roberts"; Die Jules Fonrobert Sammlung (Adolph Weyl, 2/1878), lot 366; George Ulex Collection (Lyman Low, 7/1902), lot 431, realized \$33.50; Henry Jewett Collection (S.H. Chapman, 6/1909), lot 1605, realized \$280 to Thomas Elder; Colonel E. H. R. Green; Eric P. Newman and Burdette G. Johnson; Celina Coin Company, offered on page 1327 of the November 1946 edition of *The Numismatist* for \$750; J. P. Morgan et al. (Hans M. F. Schulman, 4/1952), lot 855M, realized \$300; Wayte Raymond; New Netherlands Coin Company, purchased by the Norwebs on January 31, 1958; Norweb Collection Part III (Bowers and Merena, 11/1988), lot 3390, realized \$28,600; Donald Groves Partrick; FUN Signature (Heritage, 1/2016), lot 5508, realized \$458,250.

Note: It seems likely that S.H. Chapman was the buyer at the Ulex sale and placed the coin in the Jewett auction for his own account. Henry Jewett died in 1897, so he could not have purchased the coin from the Ulex sale in 1902.

3. Fine 15 NGC. 39.5 grains. This coin was presented by Edward Cogan in the introductory letter to the J.P.W. Neff Collection (Cogan, 1/1864), but not listed in the catalog, sold to George Seavey for \$205; Seavey Descriptive Catalog (William H. Strobridge, 6/1873), lot 839, not sold as Lorin G. Parmelee bought the collection intact before the sale took place; Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1, realized \$61 to Charles Steigerwalt; offered in Steigerwalt's FPL numbers 22-25 at \$125; H.O. Granberg, displayed at the 1914 ANS Exhibition; Waldo Newcomer; "Col." E.H.R. Green; Eric P. Newman and Burdette G. Johnson; offered on page 946 of the August 1946 edition of *The Numismatist* by the Celina Coin Company, price on request; purchased by Floyd T. Starr in late 1946 for \$750; 65th Anniversary Sale (Stack's, 10/2000), lot 478; Rick Sear; southern collection; Bob Simpson; FUN Signature (Heritage, 1/2016), lot 5304, realized \$329,000. NGC ID# 294G, PCGS# 11025

The Finest Known 1792 Disme, Judd-10 SP64 Brown, Ex: Garrett-Simpson

4572 1792 Disme, Judd-10, Pollock-11, SP64 Brown PCGS Secure. On April 2, 1792, Congress passed legislation enabling an official United State Mint. Commonly known as the Mint Act of 1792, the legislation laid out all aspects of operation, and specified several denominations from copper half cents and cents, to silver half dismes through dollars, and gold quarter eagles to eagles. A substantial quantity of silver half dismes were coined just three months later, and those coins are considered the first regular issue U.S. government issues produced under authority of the 1792 Mint Act. However, they were not coined inside the Mint walls, as the facility was still under construction.

Honors for the first coins struck inside the Philadelphia Mint are awarded to the 1792 pattern cents, dismes, and quarters. The 1792 pattern coinage combined technical coinage experimentation with differing representations of Liberty. Three distinct styles of Liberty appeared. Loosely curled hair appeared on the Birch cents and the half dismes, tightly coiled and braided hair appeared on the Eagle-on-Globe quarters, and Flowing Hair appeared on the silver-center and fusible alloy cents, as well as the copper and silver dismes.

Invariably, each time we offer a 1792 pattern coin, someone asks how many were made. Those figures are unknown, and were likely never recorded. A survival rate is impossible to determine, so the original mintage will likely never be known. All we can say is that those varieties existing in higher numbers, Judd-1, 2, and 10, were probably struck in a large enough quantity to distribute to members of Congress. A dream discovery would be a personal journal of a member of Congress who recorded that he received a 1792 cent or disme on a certain date.

Both sides of this finest-known example display even chocolate-brown color, with scattered splashes of crimson toning on the reverse. Please blue, pink, and gold overtones enhance the already exceptional eye appeal. The smooth mirrored surfaces are indicative of the impressive grade. Its rarity, historical significance, and close association with David Rittenhouse and the founding of the first Mint will ensure that only the strongest bid will secure this numismatic treasure for the advanced cabinet.

Rarity of the 1792 Patterns

Current rosters suggest that a total of 67 patterns of 1792 exist for all 12 varieties. The count does not include the 1792 silver half dismes, Judd-7, that are almost certainly regular issue coins, although they were not struck inside the physical first U.S. Mint building. The patterns can be divided into five broad classifications, the silver-center and fusible alloy cents with 24 known, the Birch cents with 12 known, the unique copper half disme, the dismes with 25 known, and the Eagle-on-Globe quarters with six known. In an absolute sense, each category is a major rarity. The following accounting exhibits the number known for each of the 1792 varieties.

- 14 - Judd-1 plus one example without the silver center.
- 9 - Judd-2
- 2 - Judd-3
- 7 - Judd-4
- 2 - Judd-5
- 1 - Judd-6
- 1 - Judd-8
- 3 - Judd-9
- 18 - Judd-10
- 3 - Judd-11
- 2 - Judd-12
- 4 - Judd-13 plus two uniface pieces.

Complete 1792 Disme Roster

There are just two dozen 1792 dismes known today, including three in silver, 18 in copper with a reeded edge, and three in copper with a plain edge. The copper and silver dismes are the most plentiful of the 1792 pattern varieties. These pieces carry extraordinary historical interest, in addition to their obvious rarity. The present example is considered the finest of the 18 Judd-10 copper dismes, and it has but a single peer among the other disme varieties. The following roster lists all 24 pieces known today.

Roster of the 1792 Silver Dimes (Judd-9)

1. AU50 NGC. Thin planchet. 41.5 grains. Dr. J. Hewitt Judd (acquired in 1946 or before), *An Illustrated History of United States Coins* (Abe Kosoff, 1962), lot 13; Kosoff reported this coin sold to an anonymous collector in the January 24, 1973 edition of *Coin World*; Donald Groves Partrick Collection (Heritage, 1/2015), lot 5507, which realized \$998,750.

2. XF Details NGC. Thick planchet (Judd-9a). 66.1 grains. Joseph J. Mickley Collection (W. Elliot Woodward, 10/1867), lot 2131, realized \$39 to Mendes I. Cohen; Colonel M.I. Cohen (Edward Cogan, 10/1875), lot 379, realized \$20 to Jules Fonrobert, bidding as "Roberts"; Die Jules Fonrobert Sammlung (Adolph Weyl, 2/1878), lot 366; George Ulex Collection (Lyman Low, 7/1902), lot 431, realized \$33.50; Henry Jewett Collection (S.H. Chapman, 6/1909), lot 1605, realized \$280 to Thomas Elder; Colonel E. H. R. Green; Eric P. Newman and Burdette G. Johnson; Celina Coin Company, offered on page 1327 of the November 1946 edition of *The Numismatist* for \$750; J. P. Morgan et al. (Hans M. F. Schulman, 4/1952), lot 855M, realized \$300; Wayte Raymond; New Netherlands Coin Company, purchased by the Norwebs on January 31, 1958; Norweb Collection Part III (Bowers and Merena, 11/1988), lot 3390, realized \$28,600; Donald Groves Partrick Collection (Heritage, 1/2015), lot 5508, which realized \$458,250. Note: It seems likely that S.H. Chapman was the buyer at the Ulex sale and placed the coin in the Jewett auction for his own account. Henry Jewett died in 1897, so he could not have purchased the coin from the Ulex sale in 1902.

3. F15 NGC. Thin planchet. 39.5 grains. This coin was presented by Edward Cogan in the introductory letter to the J.P.W. Neff Collection (Cogan, 1/1864), but not listed in the catalog, sold to George Seavey for \$205; Seavey Descriptive Catalog (William H. Strobridge, 6/1873), lot 839, not sold as Lorin G. Parmelee bought the collection intact before the sale took place; Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1, realized \$61 to Charles Steigerwalt; offered in Steigerwalt's FPL numbers 22-25 at \$125; H.O. Granberg, displayed at the 1914 ANS Exhibition; Waldo Newcomer; "Col." E.H.R. Green; Eric P. Newman and Burdette G. Johnson; offered on page 946 of the August 1946 edition of *The Numismatist* by the Celina Coin Company, price on request; purchased by Floyd T. Starr in late 1946 for \$750; 65th Anniversary Sale (Stack's, 10/2000), lot 478; Rick Sear; southern collection; Bob Simpson (Heritage, 1/2016), lot 5304, which realized \$329,000.

Roster of the 1792 Reeded Edge Copper Dimes (Judd-10)

The 1792 reeded edge copper dime is the most available of the 1792 patterns, but remains rare in an absolute sense. Fewer than 20 examples are traced, similar to the Getz silver half dollars of the same year. The population profile is similar to that of the silver half dime. A disproportionate number of high grade examples survive, yet, at the same, time, a good number of coins exhibit signs of circulation. The following roster is based on work by Pete Smith, as part of research for the book *1792: Birth of a Nation's Coinage*, to be published, along with co-authors Joel Orosz and Leonard Augsburger, by Heritage Galleries.

1. SP64 Brown PCGS. 58.6 grains. James W. Ellsworth private sale (3/1923) to John Work Garrett; The Garrett Collection Part IV (Bowers and Ruddy, 3/1981), lot 2352, realized \$54,000; Marvin Browder; Alhambra Coin Center, private sale (1998); Hanks & Associates; Heritage (E-Fair Signature, 10/1999) lot 6187, not sold; Coin World ad 5/22/2000, listed at \$700,000; Rare Coin Wholesalers; Benchmark Ventures L. P.; Legend Numismatics; Bob Simpson. **The present coin.**

2. PR62 Brown NGC. Dr. J. Hewitt Judd; Abe Kosoff, 1962, *Illustrated History* lot 14; Stuart Levine private sale 3/26/2001; Ed Price; ANA World's Fair of Money (Heritage, 7/2008), lot 1406, realized \$690,000; Greensboro Collection; ANA National Money Show (Heritage, 10/2012), lot 366, realized \$587,500; Cardinal Collection Educational Foundation.

3. Uncirculated. ANA Sale (Jess Peters, 8/1973), lot 1088, realized \$9000; Alan V. Weinberg.

4. Uncirculated. 58.8 grains. Mint Cabinet (T. L. Comparette 1914 catalog, #1494); Smithsonian Institution #87.060.28/29.

5. AU58 PCGS. Crosby plate X, 18; Allison W. Jackman (Henry Chapman 6/1918), lot 224; Loye L. Lauder (William Doyle Galleries 12/1983), lot 237, realized \$15,000; Stuart Levine and Anthony Terranova; Bertram Cohen; Dana Linett; David Henderson; Benson Collection (Goldberg's 2/2001), lot 152, realized \$109,250; Stuart Levine; Ed Price; Stuart Levine 10/4/2004; William H. LaBelle, Sr. (American Numismatic Rarities 7/2005), lot 604, realized \$175,000.

6. SP55 PCGS. 57.6 grains. Eric P. Newman Numismatic Education Society (Heritage 5/2014), lot 3042, realized \$499,375; Anthony Terranova.

7. AU55 PCGS. 60.2 grains. Hollinbeck (7/1954), lot 964; Norweb Collection Part III (Bowers and Merena, 11/1988), lot 3391, realized \$28,600; Andy Lustig; David Hall; 73rd Anniversary Sale (Stack's, 10/2008), lot 32, not sold; Rarities Night Auction (Stack's Bowers, 8/2011), lot 7481, realized \$362,250.

8. AU50 PCGS. Midwest Collector; Stuart Levine (privately 3/2001); Ed Price; Stuart Levine (3/2003); Liberty Collection, Part III (Heritage, 8/2015), lot 3986, which realized \$182,125.

9. XF40 PCGS. 57.0 grains. Illustrated on the August 1869 multi-denominational plate in the *American Journal of Numismatics*. Edward Cogan (6/1869); George Earle Collection (Henry Chapman, 6/1912), lot 2180; Carl Wurtzbach (exhibited at ANS Exhibition of United States and Colonial Coins, 1914, plate VI); Sol Kaplan; Phillip E. Benedetti; Gary Fitzgerald; Donald G. Partrick Collection (Heritage, 1/2015), lot 5509, realized \$211,500; Heritage (9/2015), lot 3798, realized \$211,500.

10. XF40 NGC. Virgil M. Brand; New Netherlands (9/1953), lot 416, realized \$160; June Sale (Stack's, 6/1973), lot 879, realized \$10,000; Laird U. Park Collection (Stack's 05/1976), lot 203, realized \$18,000; Ellis Robison (Stack's 02/1982), lot 968, realized \$25,000; Allen Lovejoy Collection (Stack's 10/1990), lot 1; Andy Hain; Julian Leidman; Ed Price; Stuart Levine; Haig A. Koshkarian Collection (American Numismatic Rarities 3/2004), lot 300, realized \$101,200; Harry Laibstain and Rick Sear; Denis Loring and Donna Levin.

11. XF40. New England Rare Coin Gallery (11/1975), lot 383, realized \$21,000; ANA (Stack's, 8/1976), lot 131, realized \$19,000.

12. VF30. 52.82 grains. Byron Reed Collection; Omaha Public Library; Durham Museum.

13. VF25 PCGS. 57.8 grains. Superior (2/1997), lot 2646; Stack's (5/1998), lot 108; Stuart Levine and Anthony Terranova, private sale (5/1998) to Ed Price; Stuart Levine; Pre-Long Beach Sale (Superior, 5/2001), lot 1046, realized \$45,425; New York Connoisseur's Collection (American Numismatic Rarities, 3/2006), lot 37, realized \$87,400; Coin Rarities Online; Park Avenue Numismatics; private collection; Americana Auction (Stack's Bowers, 2/2014), lot 2002, realized \$211,500.

14. VF. Colonel Mendes I Cohen (Edward Cogan, 10/1875), lot 378; Heman Ely (W. Elliot Woodward, 1/1884), lot 446, realized \$26; W. Elliot Woodward (5/1888), lot 1605; James Ten Eyck (B. Max Mehl, 5/1922), lot 566-A, realized \$73.50; Virgil Brand; Burdette G. Johnson; Michael F. Higgy (Abe Kosoff, 10/1943), lot 1397, realized \$167.50; Will W. Neil (B. Max Mehl, 6/1947) lot 1197, realized \$210; Abe Kosoff / Numismatic Gallery (8/1958), lot 37, realized \$650.

15a. F12 PCGS. FUN Signature (Heritage 1/2007), lot 1200, not sold; FUN Signature (Heritage 1/2008), lot 3463, not sold. Probably the same as the next.

15b. VG/Fr. 52.33 grains. New England Rare Coin Galleries (10/1981), lot 334, realized \$5170; Stack's (5/1985), lot 51, realized \$4,400; Bill Subjack, private sale (1/1992), to Ed Price; Stuart Levine (3/2001); private collection.

16. AG. River Oaks Collection (Bowers and Ruddy, 11/1976), lot 937, realized \$3600; Stack's (1/1987), lot 515, realized \$7,150; Denis Loring, private sale (2/1988), to Kenneth Goldman.

17. AG. Frank H. Stewart; Congress Hall Collection; Independence National Historical Park, catalog #9267.

18. P01 PCGS. Bowers & Merena (11/2001), lot 2516, which realized \$10,925; John Dannreuther; Stacks-Bowers (3/2015), lot 7, which realized \$32,900.

Roster of the 1792 Plain Edge Copper Dismes (Judd-11)

1. MS64 Red and Brown NGC. 61.5 grains. Mint Cabinet, Dr. Edward Maris (H. P. Smith, 6/1886), lot 147, realized \$67.50; The Garrett Collection Part IV (Bowers and Merena, 3/1981), lot 2353, realized \$45,000; Donald Groves Partrick Collection (Heritage, 1/2015), lot 5510, which realized \$1,057,500.

2. MS61 Brown NGC. Lenox Lohr (Empire Coin Company FPL, c. 1961), offered at \$9,750; Hazen B. Hinman (Paramount Century, 4/1965), lot 52, realized \$3,200; John L. Roper, 2nd (Stack's, 12/1983), lot 429, realized \$19,800; Anthony Terranova and Stuart Levine; Bertram Cohen; Dana Linett (San Diego Show, 10/1988), lot 12, realized \$41,250; 70th Anniversary Sale (Stack's, 10/2005), lot 1378, did not sell; southern collection; Bob Simpson.

3. PCGS Genuine. 58.2 grains. Pre-Long Beach Sale (Goldberg's, 2/2005), lot 805, realized \$55,200; Long Beach Signature (Heritage, 2/2008), lot 2301, not sold; Peter Cabral. The coin is uncirculated but exhibits severe obverse cuts. The Goldberg's description speculated these were cancellation marks.

Selection from the Bob Simpson Collection.

BUST DIME

1814 Large Date Dime, JR-3, MS65+

4573 1814 Large Date, JR-3, R.2, MS65+ PCGS. On the obverse, the left edge of the lowest hair curl aligns with the right side of the second 1 in the date. The reverse shows the second T in STATES left of the I in PLURIBUS, and there is no period after 10 C.

Capped Bust dimes were struck sporadically; only three years, 1809, 1811, and 1814, were struck before 1820, when productions became more-or-less yearly (save 1826). The JR-3 is a fairly available variety (while still elusive so fine as here) and one of the four Large Date variants for the year; but all five of the 1814 varieties are more easily located, especially in high grade, than the 1809 and 1811 dates, each known from single die pairings. This MS65+ JR-3 is dove-gray with dabs of russet around the rims and some splashy light orange on the reverse. Extensive die clashing is typical; stars 3 and 8 connect to the rim via small die cracks. Numerous other cracks and clashes appear on the reverse, particularly within the shield. The strike is adequate overall, although notable softness shows at the bottom-right wingtip and CA of AMERICA nearby. NGC ID# 236W, PCGS# 38775 Base PCGS# 4488

SEATED DIMES

1863-S Seated Liberty Dime, MS64 Only One Finer Coin at NGC

4574 1863-S F-101, R.3, MS64 NGC. From a modest mintage of 157,500 pieces, the 1863-S Seated Liberty dime is scarce-to-rare in all grades, and Mint State examples are rare. Only a single die pair is recognized for this date. The present coin is a Condition Census contender, with well-detailed design elements that show a touch of the often seen softness on Liberty's head and the wreath. The lightly marked surfaces radiate vibrant mint luster on both sides, under attractive highlights of pale gold and lavender toning. This coin should find a home in the finest collection or Registry Set. Census: 2 in 64, 1 finer (3/16). PCGS# 538201 Base PCGS# 4638

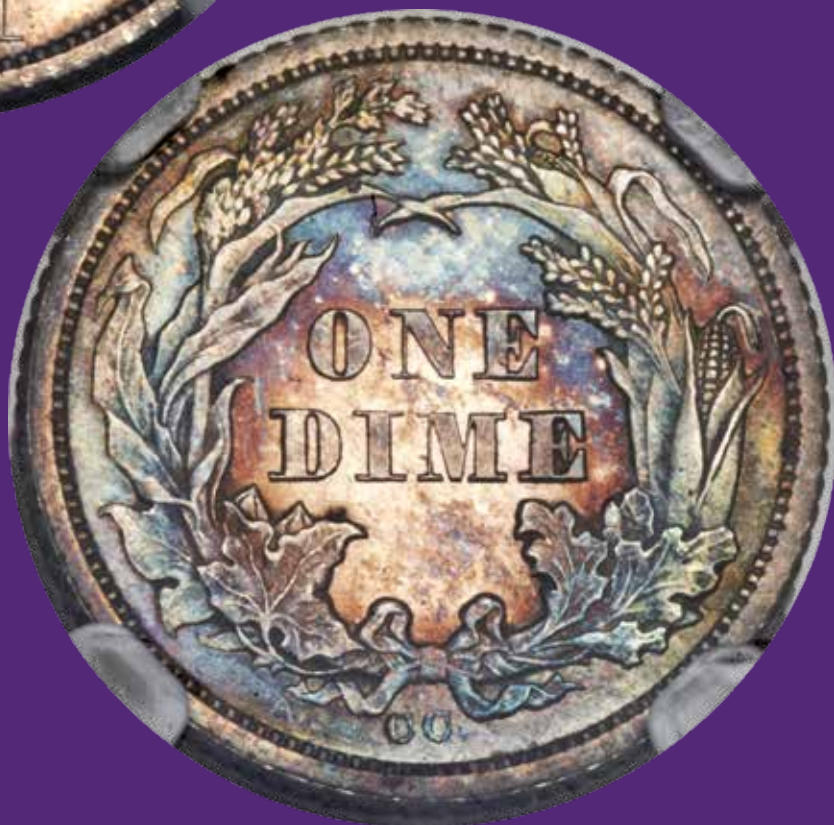

1866-S Seated Dime, MS66 The Finest of 20 Mint State Survivors

4575 1866-S F-101, R.4, MS66 NGC. The variety shows a sharp downward-sloping date, a vertical die crack running from Liberty's head down through the shield, and a so-called small, weak mintmark. It is, however, clearly visible despite the nomenclature. The issue (135,000 coins struck) is very rare in Uncirculated condition. Approximately 20 pieces survive in all Mint State grade levels.

A veil of light golden toning covers this lustrous Premium Gem. The devices are well-struck with a hint of softness on Liberty's head and the bowknot. The mintmark is clearly defined, unlike many examples from the issue. Near-pristine surfaces are devoid of any mentionable marks. An impeccable S-mint representative. Census: 2 in 66, 0 finer (3/16).

Ex: Lindesmith Collection (Bowers and Merena, 3/2000), lot 381; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98241; Houston Signature (Heritage, 12/2015), lot 3101. PCGS# 538215 Base PCGS# 4644

1871-CC Seated Liberty Dime, SP65
Rare, First Carson City Issue
Only Specimen Example, Ex: Stack-Gardner

4576 1871-CC SP65 NGC. Fortin-101, only dies for the date. Unique as a Specimen. Ex: J. Stack. Dimes were struck for the first time at the Carson City Mint in 1871, when a modest mintage of 20,100 pieces was accomplished. Because there was no interest in collecting branch mint issues at that time, it is unlikely that any high-quality examples were saved for numismatic purposes. As a result, only a few Mint State coins survive today and the 1871-CC is one of the major keys to the Seated dime series. On the PCGS CoinFacts website, Ron Guth notes:

“The 1871-CC Dime is one of the stars of the Carson City coins, primarily because of its inherent rarity and the paucity of Mint State examples. After some confusion about crossovers, resubmissions, etc. a clear picture has emerged of the members of the Mint State “club” and it shows that there are, at best, five Uncirculated 1871-CC Dimes. The best is the NGC MS65 from the Eugene Gardner Collection that sold recently for a record price of \$270,250.”

The coin offered here is the Gardner example Ron Guth refers to above, currently certified as SP65 NGC, and the only coin recognized as a Specimen strike by either of the leading grading services. It is likely this piece was the coin offered to Stack's by B.G. Johnson in a July 21, 1943-dated invoice, where it was described as, “1871-CC Mint, Bril. proof and of the most excessive rarity in this condition.” The invoice is marked “AUG 27 PAID.” Prominent collector James Stack (no relation to the coin firm, but a good customer of theirs) acquired the coin at an early date and preserved it in his collection, which was only dispersed long after his death in several sales by the Stack's firm. The 1871-CC dime was offered in their January 1990 offering as lot 146:

“1871'CC' Gem Brilliant Uncirculated. A wholly prooflike example, sharply struck and cameolike. In fact, without looking for the mintmark, one could easily be lulled into thinking it a Proof! The coin has beautiful light to medium iridescent toning. This cataloguer described the example in our Holmes Sale in 1960 (the only other Mint State example known) and in his opinion, the present coin is more beautiful. A great rarity in extraordinary condition, all of the ingredients for a record price.”

In fact, the uncertified James A. Stack coin did realize a record price for the time (and in a notably weak coin market overall, which had largely tanked in the second half of 1989), bringing in a healthy \$50,600. It has changed hands infrequently since then, most notably appearing in the fabulous collection of Gene Gardner in October 2014, as noted by Ron Guth above. We have compiled a roster of recent appearances of Mint State specimens of the 1871-CC dime below.

The present coin is a spectacular Gem with incredible eye appeal to match its highest available technical quality and absolute rarity. The reflective surfaces are prooflike throughout — a trait often seen on the few Mint State 1871-CC dimes known — and highly reflective under a layer of lovely pink and blue patina on both sides. The strike is quite sharp on all details front and back, and even a loupe reveals no mentionable distractions. We expect intense competition from series specialists when this lot is called. Census: 1 in 65, 0 finer (2/16).

Recent Appearances of Mint State 1871-CC Dimes

Given likely duplications in certified population data, there may be as few as four or five Mint State examples known. The following roster was compiled with the help of Ron Guth, President PCGS CoinFacts.

1. NGC SP65. Probably the coin purchased by Stack's from B.G. Johnson on August 27, 1943, per an invoice on the Newman Numismatic Portal; James A. Stack, Sr.; James A. Stack, Sr. Collection (Stack's, 1/1990), lot 146; Pre-Long Beach Sale (Superior, 2/2003), lot 1358 (as NGC MS65), not sold; Baltimore Auction (Bowers & Merena, 3/2005), lot 443 (as NGC MS65), realized \$230,000; Eugene Gardner Collection (Heritage, 10/2014), lot 98271 (as NGC MS65 1664785-001), realized \$270,250. **The present coin.**

2. PCGS MS63. Harold M. Budd, Sr.; Numismatic Gallery (Abe Kosoff and Abner Kreisberg); Imperial Coin Company (Ben Stack), sold privately on 7/29/1954; Norweb Collection (Bowers & Merena, 10/1987), lot 529, realized \$12,100; Auction '88 (RARCOA, 7/1988), lot 1630; Waldo E. “Pat” Bolen, Jr. Collection; Numisma '95 (Stack's/RARCOA/Akers, 11/1995), lot 2134 (as Raw Gem Uncirculated), realized \$34,100; Kennywood Collection (American Numismatic Rarities, 1/2005), lot 373 (as PCGS MS62), realized \$75,900; Rusty Goe, sold privately in 1/2005; Battle Born Collection (Stack's Bowers, 8/2012), lot 11102 (as PCGS MS63), realized \$97,750.

3. PCGS MS62. Metropolitan New York Convention Sale (NERCA, 3/1977), lot 115; Lovejoy Collection (Stack's, 10/1990), lot 370; Baltimore Auction (Bowers & Merena, 3/2005), lot 444, realized \$51,750; Los Angeles Signature (Heritage 7/2009), lot 1068 (as NGC MS62 1969967-007), realized \$46,000; Houston Signature (Heritage, 12/2009), lot 394 (as NGC MS62 1969967-007), not sold; Boston ANA Signature (Heritage, 8/2010), lot 3084 (as NGC MS62 1969967-007), not sold; Sunday Internet Auction (Heritage, 2/2011), bought in; Pre-Long Beach Sale (Goldbergs, 6/2014), lot 340 (as PCGS MS62), realized \$82,250.

4. NGC MS61. FUN Signature (Heritage, 1/2006), lot 129 (as NGC MS61 303573-011), not sold; Palm Beach Signature (Heritage, 3/2006), lot 450 (as NGC MS61 303573-011), realized \$46,000; Old West and Franklinton Collections (American Numismatic Rarities, 8/2006), lot 323 (as NGC MS61), realized \$49,450; Tuesday Internet Coin Auction (Heritage, 10/2006), lot 13415 (as NGC MS61 303573-011), not sold; FUN Signature (Heritage, 1/2007), lot 872 (as NGC MS61 303573-011), realized \$48,875; Chicago ANA (Stack's Bowers, 8/2015), lot 10063, realized \$30,550.

5. BU. Milton Holmes Collection (Stack's, 10/1960), lot 2782; Krugjohann II (Bowers and Ruddy, 11/1976), lot 57. NGC ID# 23A5, PCGS# 4654

PROOF SEATED DIMES

1841 No Drapery Dime, PR53 Only Two No Drapery Proofs Known Ex: F.C.C. Boyd, The Ahwash Plate Coin

4577 1841 No Drapery, F-101, R.8, PR53 NGC. Small Stars, No Drapery, Upright Shield. Traditionally, the No Drapery feature of this extremely rare early proof has been attributed to die polishing, but the uncovering of its big-brother counterpart, the Newman-Gardner PR67+ coin, made definitive die analysis possible, proving that the 1841 No Drapery proof dime is in fact a transitional design between the original No Drapery obverse of 1838-1840 and the With Drapery design of later years. John McCloskey published his study the 1841 No Drapery proof dies in Issue #80 of the *Cobrecht Journal*. Only two examples of the issue are known. This is the circulated piece that is plated in Ahwash and on the Fortin webpage.

This coin was discovered by F.C.C. Boyd in the early 1940s and was first offered for public sale when Boyd's material was sold under the name of the World's Greatest Collection in 1945. It reappeared 18 years later in New Netherlands' 57th Sale where it was described as "once a proof," and it was later offered in the 1973 MANA Sale (Kagin's, 11/73), lot 1107, where it was reported to have realized \$52,000. The coin has been off the market since it appeared in lot 6029 of our Long Beach Signature sale (Heritage, 10/2001), where it realized \$47,500.

The coin shows evidence of moderate handling, but the surfaces still retain enough of the original proof texture to make it identifiable as a special striking. The surfaces display natural gold and honey-orange toning with trivial marks. In his roster of proofs, Walter Breen only mentioned one other proof 1841 — the "Col." Green-Newman-Gardner coin, which has only recently reappeared at auction after being hidden in the Newman Collection for decades. The Smithsonian does not have a proof 1841, and this may well be the only example available to collectors in the foreseeable future.

1841 Proof Dime Roster

No Drapery Proof Dime

1. PR67+ NGC. An example from a silver/minor proof set mentioned in *Numismatic Review*, volume I, issue 3, page 29 (1943), from "Colonel" E.H.R. Green's collection; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$250.00; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33322, realized \$305,500; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98262, realized \$205,625.

2. PR53 NGC. F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 5/1945), lot 519, realized \$75; 57th Sale (New Netherlands, 12/1963), lot 466; Sale of the Seventies (Kagin, 11/1973), lot 1107; ANA Sale (Heritage, 7/1993), lot 5212, realized \$46,750; Long Beach Signature (Heritage, 10/2001), lot 6029, realized \$47,500. **The present coin.**

With Drapery Proof Dime

1. PR63 Cameo NGC. ANA Sale (Heritage, 7/1994), lot 6454, \$38,500; Halpern and Warner Collections (Bowers and Merena, 3/1997), lot 2215, \$14,300; Richmond Collection (David Lawrence, 3/2005), lot 1236, \$46,000; Phil Kaufman Collection / FUN Signature (Heritage, 1/2008), lot 3019, \$63,250; Greensboro Collection, Part I (Heritage, 10/2012), lot 3940, \$47,000; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98286. PCGS# 539073 Base PCGS# 4728

1844 Seated Dime, PR65 Ex: Pittman, Kaufman, Gardner Finest Known Example

4578 1844 F-101, R.8, PR65 PCGS. CAC. We have only been able to confirm seven proofs of the 1844 dime. Several additional appearances of the issue cannot be confirmed or integrated into the seven known coins. Business strikes of this date are widely known as “Little Orphan Annie” dimes, but proof examples transcend such promotion.

Variegated cobalt-blue and tan-lilac patina in the fields complements mostly champagne-gold devices on this pedigreed rarity, bolstering the contrast between the reflective fields and lightly frosted motifs. Close examination with a loupe reveals impeccably preserved surfaces. The only mentionable pedigree marker is a curving lint mark below the right foot of the E in STATES. Population: 2 in 65, 0 finer (3/16).

Roster of 1844 Proof Dimes

- 1. PR65 PCGS, formerly PR66 NGC.** Numismatic Gallery; purchased privately by John Jay Pittman as part of an 1844 silver proof set on 4/5/1948; John Jay Pittman Collection (David Akers, 10/1997), lot 833, part of Pittman’s 1844 complete proof set; Phil Kaufman Collection/FUN Signature (Heritage, 1/2008), lot 3024; Greensboro Collection (Heritage, 10/2012), lot 3943; Jason Carter to Eugene Gardner (9/2013); Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98287. **The present example.**
- 2. PR65 PCGS.** Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 5/1996), lot 1130.
- 3. PR64 NGC.** Richmond Collection, Part III (DLRC Auctions, 3/2005), lot 1239; Continuous Internet Auction (Heritage, 4/2005), lot 23192; San Francisco Signature (Heritage, 7/2005), lot 10158; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98264.
- 4. PR64 PCGS.** Dallas Coin and Stamp Exposition (Heritage, 12/1986), lot 362; Baltimore Signature (Heritage, 7/2003), lot 6568; FUN Signature (Heritage, 1/2008), lot 2763.
- 5. PR64 PCGS.** Newport Collection (Bowers and Ruddy, 1/1975), lot 220; Krugjohann Collection (Bowers and Ruddy, 5/1976), lot 309; Blauvelt Collection (Bowers and Ruddy, 2/1977), lot 106; Auction ’90 (RARCOA, 8/1990), lot 605; Central States Signature (Heritage, 4/2009), lot 2260; Long Beach Signature (Heritage, 9/2009), lot 448.
- 6. PR63 NGC.** Public Auction Sale (Lester Merkin, 4/1966), lot 139; 1971 ANA (Stack’s, 8/1971), lot 663; Lovejoy Collection (Stack’s 10/1990), lot 223.
- 7. Proof.** Smithsonian Institution, from the Mint Cabinet.

1855 Arrows Dime, PR67 ★ Cameo Tied for Finest Certified of the Issue

4579 1855 Arrows PR67 ★ Cameo NGC. Only about 12 to 15 proof 1855 dimes are known, including this piece and a similarly graded example formerly in the Kaufman Collection (Central States Signature, Heritage, 4/2008, lot 2395). Known auction records comprise more than 40 appearances for the issue, starting in the early 20th century and continuing to the present day, mostly for coins grading PR60 to PR64.

As for most pre-1858 proof coins, there is no reported mintage figure for the 1855 Arrows dime, but our pedigree research indicates that about 12 to 15 survivors is fairly accurate; we can account for only 13 pieces, including that in the Smithsonian Institution.

This centrally brilliant Superb Gem is an absolutely stunning proof 1855 With Arrows dime, showing a splash of blue, russet, and violet at the upper obverse, and similar peripheral toning around the entire reverse. The obverse has faint striae slanting up to the left, crossed by other striae up to the right. A few insignificant planchet flakes, lint marks, and faint hairlines are present on each side. Nearly full details are evident, with star 13 a tad weak, and the upper right berry inside the branch mostly flat. The date, arrows, and several stars are boldly doubled, as Breen described in his *Proof Encyclopedia*: "Double date, first punched too far to right, then corrected; parts of all eight digits discernible." Census: 2 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (3/16).

Ex: *Central States Signature* (Heritage, 4/2008), lot 2266, which realized \$74,750; *ANA Signature* (Heritage, 10/2012), lot 3953. NGC ID# 23CG, PCGS# 84744

1859 Transitional Dime, PR65 Judd-233, Elusive *Guide Book* Variety

4580 1859 Transitional, Judd-233, Pollock-280, High R.6, PR65 PCGS. The Stars Obverse design appears on regular issue dimes minted from 1838 to 1859, and the Cereal Wreath reverse design appears on regular issue dimes minted from 1860 to 1891. This variety combines the two designs into a transitional pattern that is struck in silver with a reeded edge. This stunning Choice proof dime exhibits fully mirrored fields that surround sharply defined devices beneath an overlay of gold, lavender, and blue patina. Diagonal die striations are clearly evident in the obverse and reverse fields.

Ex: *Lindesmith Collection Sale* (Bowers and Merena, 11/1999), lot 1145; *Eugene H. Gardner Collection, Part III* (Heritage, 5/2015, as PR64 PCGS with CAC approval), lot 98272. NGC ID# 23CH, PCGS# 4749

1873 Arrows Dime, PR67 ★ Unparalleled Eye Appeal

4581 1873 Arrows, F-102, R.4, PR67 ★ NGC. The Mint struck 500 proof dimes with the Arrows design in 1873, which was implemented to reflect a minuscule increase in silver weight. Collectors would be hard-pressed to locate an example of this two-year type with more eye appeal. A band of multicolor rainbow toning hugs the obverse borders and the lower reverse, while the remaining surfaces retain their brilliance. The strike is expectedly needle-sharp, and contact marks are virtually nonexistent. Census: 4 in 67 (1 in 67+, 2 in 67 ★), 0 finer (3/16).

Ex: Jason Carter to Gene Gardner (5/2012); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98279. PCGS# 539033 Base PCGS# 4769

1891 Dime, Vividly Toned PR68 Cameo Ex: Gardner, Sole Finest at PCGS and CAC

4582 1891 PR68 Cameo PCGS. CAC. The Seated Liberty quarter dollar series came to an end with the production of 600 proofs in 1891, and this PR68 Cameo example is tied for finest certified at both services — and regardless of level of contrast designated. Each side boasts electric-blue centers that cede to jade-green, yellow, and rose-violet. The effect is especially vivid on the reverse. Reflective fields, razor-sharp motifs, and nearly blemish-free surfaces are unsurprising, given the grade, and they produce impressive contrast. This is a top-quality Superb Gem with the eye appeal to match its nearly flawless technical grade. Population: 1 in 68 Cameo, 0 finer. CAC: 1 in 68 Cameo, 0 finer (2/16).

Ex: Eugene H. Gardner Collection, Part IV (Heritage, 10/2015, as PR67 NGC with CAC approval), lot 98548. NGC ID# 23DG, PCGS# 84788

BARBER DIMES

1894-O Dime, Patinated MS65 An Important Key Date, Ex: Gardner

4583 1894-O MS65 PCGS. The 1894-O, with a mintage of 720,000 pieces, is a semikey in lower grades and a key date in AU and above. David Lawrence assigns a rarity rating of R.6 in MS64 and finer. Bluish-green and golden-tan patination bathes the lustrous surfaces of this near-Gem example, deeper on the reverse. The design elements are well-struck, a characteristic of most 1894-O dimes. Close examination reveals no significant marks on either side. Housed in a prior generation holder. Population: 5 in 65, 8 finer (3/16).

Ex: Bowers and Merena (3/1998), lot 570; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98354. NGC ID# 23DU, PCGS# 4804

1895-O Barber Dime Error, MS64 Spectacular Obverse Die Cap

4584 1895-O — Obverse Die Cap — MS64 PCGS. The 1895-O is the lowest mintage issue in the entire Barber dime series, except for the essentially uncollectible 1894-S. Because of its early date and its stingy production run, the 1895-O is rare in Mint State, and only a few dozen pieces are certified as such. But it is certain that no other Uncirculated 1895-O resembles the present piece. After its initial and normal strike, the piece stuck to the obverse die. The press continued to operate, and planchets were fed in one after another, with each piece struck between the reverse die and the present die cap. Heaven knows where those brockages are today, but none can be identified as an 1895-O, because the obverse design was blocked by the die cap. The additional strikes this die cap received caused the obverse to wrap around the die. The portrait is razor-sharp, while the denticles are transformed into a blurry series of lines. The reverse design is spread but remains clear, and this includes the all-important New Orleans mintmark. The cap is several millimeters high, and if it were any higher, it would not fit within the standard PCGS holder. The piece is evenly toned in dappled sea-green, plum-mauve, and golden-brown shades. Faint clash marks appear near Liberty's chin, but there are no post-strike abrasions, and in fact one wonders why the piece failed to receive an even finer grade. Fortunately for posterity, the press operator took the time to carefully remove the die cap, and its succession of owners gave equal care to its storage and handling. Any undamaged Barber dime cap in Mint State would be a major error find, and nearly impossible to duplicate. But for an essentially pristine die cap to exist on an 1895-O is a remarkable occurrence, and will surely be the talk of the Barber collector community.

Ex: Orlando Signature (Heritage, 1/2007), lot 880.

MERCURY DIMES

1903-O Barber Dime, MS67
Registry Set Essential, Ex: Gardner

4585 1903-O MS67 PCGS. This is a somewhat scarcer date in the series in all grades, despite an unremarkable mintage of nearly 8.2 million coins. What is remarkable is that this is the single-finest certified survivor at PCGS (2/16). Violet-gray patina overall reveals olive-gold and ice-blue accents when held at the proper angle. The striking definition is excellent for a New Orleans coin, though the usually seen incompleteness occurs on the hair above Liberty's forehead. The reverse wreath is expertly detailed throughout, and a few ticks that prevent an even higher grade are well-hidden beneath the toning. We expect significant interest from Registry Set enthusiasts when this lot is called. Population: 1 in 67, 0 finer (2/16).

Ex: Eugene Gardner, purchased from U.S. Coins (4/2008); Gardner Collection, Part III (Heritage, 5/2015), lot 98295 (as MS67 NGC), realized \$8,813. NGC ID# 23EN, PCGS# 4831

1916-D Mercury Dime, MS62 Full Bands
Fully Struck, Late Die State

4586 1916-D MS62 Full Bands PCGS. This is a razor-sharp 1916-D Mercury dime, showing satin luster and champagne toning — even the peripheral legends are fully brought up. There are no singular abrasions, although light chatter on each side defines the grade. This piece was struck from cracked dies. On the obverse, a radial crack extends upward from the rim at 6 o'clock toward the center of the portrait. The reverse is more severely cracked: A pair of radial cracks extend toward the center of the fasces from the 6 and 12 o'clock rims, although they do not appear to yet meet; additional cracks appear from the rim to the R in AMERICA and from the rim to the U in UNITED. The 1916-D is elusive so sharply struck, and the advanced die state of this piece heightens its appeal. A pleasing of this key date. NGC ID# 23GY, PCGS# 4907

1916-D Mercury Dime, MS65 Full Bands Series Key, Major Condition Rarity

4587 1916-D MS65 Full Bands PCGS. By far, the lowest-mintage date in the Mercury dime series is the 1916-D. Its 264,000-coin production total came as a result of a halt in dime coinage at the Denver Mint on November 24th. The Treasury Department had placed orders for quarter dollars that totaled some 4 million coins. Regional dime coinage was shifted to the San Francisco Mint for the remainder of 1916, and the Denver facility was instructed to strike Barber quarters with all of its available resources. The new Standing Liberty quarter design was not struck at the Denver Mint until 1917.

The official delivery of the 1916-D Mercury dime was not until the end of December, by which time, much of the first-year novelty of the new design had subsided. High-grade Philadelphia coins had already been saved in abundance. The Denver issue largely slipped silently into circulation, and few examples survive in Mint State. Dave Bowers calls this key date “300 to 500 times rarer” than its Philadelphia counterpart in Mint State. Doubtless resubmissions are represented in the certified population totals.

This Gem Full Bands coin is rare and firmly of Registry Set quality. The unabraded surfaces display glistening champagne-tinged luster and sharply rendered design elements — even the peripheral legends are well-defined. An outstanding capstone addition to a high-grade collection. Population: 34 in 65 Full Bands, 32 finer (2/16). NGC ID# 23GY, PCGS# 4907

1916-D Mercury Dime, MS65 Full Bands Elusive Key Issue, First Year of Design

4588 1916-D MS65 Full Bands PCGS. From a memorably low first-year mintage of 264,000 pieces, the 1916-D Mercury dime has been the acknowledged key to the series since the 1930s. Despite generous productions of the denomination at the Philadelphia and San Francisco facilities in 1916, the Denver Mint only coined dimes during November of that year. After November 24, all resources at the Western mint were allocated to producing Standing Liberty quarters, because a shortage of these coins had developed after the opening of World War I. Some examples of the popular new design were saved for their novelty value, but high-grade specimens have always been scarce.

This delightful Gem exhibits well-detailed design elements, with full split bands on the fascies. The well-preserved surfaces radiate vibrant mint luster, with highlights of champagne-gold toning. Eye appeal is terrific. Population: 35 in 65 Full Bands, 32 finer (2/16). *From The Indian Rocks Collection.* NGC ID# 23GY, PCGS# 4907

1917-D Dime, MS66+ Full Bands Rare CAC-Endorsed Registry Coin

4589 1917-D MS66+ Full Bands PCGS. CAC. In Full Bands, the 1917-D Mercury dime is conditionally rare in MS66 and prohibitively so any finer. Despite totaling more than 9 million coins, the mintage of the '17-D was only about a third that of the San Francisco issue of this year and a sixth that of the Philadelphia. The rarity of the 1917-D in high grade is even more distinct when compared to the moderate availability of the other two 1917 issues in this condition.

The present Plus-graded Premium Gem is tied for the finest in Full Bands at PCGS. Lovely sun-gold and amber toning surrounds the obverse border, while the interior of that side and the entire reverse display lavender-tinted champagne-gray luster. The strike is bold throughout the central devices and the peripheral legends. There are no distracting abrasions. One of six in this top grade with CAC endorsement. Population: 14 in 66 (3 in 66+) Full Bands, 0 finer (2/16). NGC ID# 23H3, PCGS# 4913

1918-D Dime, MS65 Full Bands Glistening Luster, Conditionally Rare

4590 1918-D MS65 Full Bands PCGS. CAC. Overall, the 1918-D Mercury dime is more elusive in Full Bands than either of the previous issues from this mint, even the key 1916-D. At the Gem level, examples are genuinely rare, and finer pieces are only seen once in a great while. Moreover, CAC has endorsed only four coins in this grade and one finer (2/16), which ranks the present piece as a high-end Registry candidate. Were it not for a faint graze on Liberty's cheek below the eye, a finer grade might have been achieved. The interiors are well-defined, although minor weakness is seen along the left-hand peripheries. Some die erosion is observed in the reverse fields. Eye appeal is superb, accentuated by light golden toning over each side. Population: 27 in 65 Full Bands, 3 finer (2/16). NGC ID# 23H6, PCGS# 4919

1918-S Dime, MS66 Full Bands Condition Census Rarity

4591 1918-S MS66 Full Bands PCGS. CAC. The 1918-S is a challenging issue in Full Bands, and Gem examples are scarce. This CAC-approved Premium Gem is rare, and finer pieces are prohibitively so. CAC has endorsed only 18 Full Bands examples in all grades and just three in MS66 (3/16). This piece is fully struck throughout the fascies, portrait, and peripheral legends. A loupe fails to reveal any abrasions, and the surfaces are illuminated by rich satin luster. Both sides exhibit mottled lemon-gold, amber, and russet toning, with the deeper hues are most prominent near the borders. No finer 1918-S is currently available, as both of the MS67 Full Bands PCGS coins are impounded in Registry Sets. This piece is plated on CoinFacts. Population: 16 in 66 Full Bands, 2 finer (3/16). NGC ID# 23H7, PCGS# 4921

1919-D Dime, Satiny MS65 Full Bands Great Strike Rarity in the Series

4592 1919-D MS65 Full Bands PCGS. Only a slight hint of tan color graces the surfaces of this Gem Full Bands 1919-D Mercury dime, an example of one of the foremost strike rarities within the series. The crucial central bands are fully split and raised, as required, with no interruption in the "trough" separating the two. The diagonal bands as well are separated throughout their length, showing separation at the intersection of the olive leaf and lower band. Satiny luster graces both sides of this nicely preserved Gem dime. Auction appearances of this issue are infrequent, so specialists in this popular series should be ready to bring their most aggressive bids. Population: 15 in 65 Full Bands, 5 finer (2/16). NGC ID# 23H9, PCGS# 4925

1919-S Dime, MS65+ Full Bands Major Strike Rarity This Fine

4593 1919-S MS65+ Full Bands PCGS. The San Francisco Mint had difficulty producing sharp strikes in 1919, as is evident on all denominations from this year. The 1919-S Mercury dime is among the rarest issues in the series in Full Bands and is far scarcer than any preceding date from any mint with such a designation. This high-end Gem is rare, possibly even more so than the certified population totals would suggest. Due to the high value of Gem-quality 1919-S Full Bands dimes, a number of resubmissions may inflate the official data. This piece is Plus-graded with satiny luster and light golden toning. The interior devices are boldly rendered, while the outer peripheral legends display occasional weakness as is often seen. For a 1919-S, the sharpness of the strike is impressive. Population: 24 in 65 (2 in 65+) Full Bands, 4 finer (2/16). NGC ID# 5LLN, PCGS# 4927

1921 Dime, MS66+ Full Bands Impeccably Preserved Semikey

4594 1921 MS66+ Full Bands PCGS. CAC. Mercury dime production was limited to the mints at Philadelphia (1.2 million coins) and Denver (1 million coins) in 1921. The mass-manufacturing of dimes from 1916 through 1920 combined with the economic downturn in 1920-21 resulted in an oversupply of the denomination, reducing the need for additional pieces. Like other 20th century semikeys, the issue's low mintage led to widespread hoarding. Examples are moderately accessible through Premium Gem condition with Full Bands, but Plus-graded coins in this grade are very rare. PCGS has awarded Plus designations to only three out of 48 MS66 Full Bands submissions, and there are merely two finer Superb Gems at that service. Additionally, CAC has stickered 15 Premium Gems and one finer (2/16).

As one would expect, the surfaces are exceptionally preserved, the only mark of note being a minute tick on the lower part of the boldly defined fascies. A hint of peripheral incompleteness is visible on 21 in the date and W in WE. Each side is satiny and toned in light champagne hues, delivering universal eye appeal. A virtually unimprovable semikey Mercury dime worthy of a premium bid. NGC ID# 23HE, PCGS# 4935

1921-D Dime, MS66 Full Bands Conditional Rarity and Key Date

4595 1921-D MS66 Full Bands PCGS. After the six-figure 1916-D, the next lowest mintage of the Mercury dime series falls to the 1921-D, at just more than 1 million pieces. The 1921-D is the second rarest regular issue overall, and pieces in Full Bands are scarce at the lofty Premium Gem level. Superb Gems are known but are prohibitively rare and out of reach for most collectors. This MS66 coin will be a stellar acquisition for any high-grade collection. Bold design elements rise above satiny, golden-toned surfaces with hints of lavender and steel-blue appearing in the protected regions of the fields. Eye appeal is comparable to the outstanding technical merit. Population: 24 in 66 (6 in 66+) Full Bands, 1 finer (2/16). NGC ID# 23HF, PCGS# 4937

1924-S Dime, MS65 Full Bands Condition and Strike Rarity

4596 1924-S MS65 Full Bands PCGS. The 1924-S Mercury dime issue is a notable rarity in Gem grade, either with the Full Bands designation or without. Without Full Bands PCGS reports 23 in MS65 and five finer, and with Full Bands there are 17 in MS65 (one MS65+) and only two finer, both MS66 (2/16). This Gem Full Bands example boasts a sharp date on the obverse and well-detailed devices overall, as well as the crucial rounding on the central bands needed to achieve the desired designation. Attractive light rose-gray patina adds to the high eye appeal, as does the paucity of visible contact marks. This is a great coin for the grade, destined for a top Registry Set. NGC ID# 23HL, PCGS# 4947

1927-D Dime, MS66 Full Bands Splendid and Conditionally Rare

4597 1927-D MS66 Full Bands PCGS. A noted rarity in the higher Mint State grade with the Full Bands designation, the 1927-D dime usually appears only in MS64 or lower condition and seldom shows sufficient strike sharpness on the bands or elsewhere, for that matter. PCGS reports only 13 in 66 Full Bands with none finer, while NGC accounts for five and none finer (2/16). Generous luster prevails on both sides of this splendid MS66 PCGS example, showing light golden-tan patina and sharp detail throughout the central devices of each side. Minor weakness is confined to the extreme rim below the fascies. These coins appear with Heritage only an average of about once per year; astute bidders must be on the alert. NGC ID# 23HV, PCGS# 4963

1927-S Dime, MS66 Full Bands Delicately Toned, None Finer at PCGS

4598 1927-S MS66 Full Bands PCGS. CAC. San Francisco issues of the 1920s are often difficult to locate with full strikes. This is particularly apparent with the quarter dollar and nickel denominations, but S-mint Mercury dimes from this period are also elusive in Full Bands. The 1927-S dime is particularly scarce. In MS66, this issue is a rarity even with a weak strike, and Full Bands examples are all the more sought-after. Only a single MS67 Full Bands NGC coin is finer. The present piece is one of only seven MS66 Full Bands with a CAC endorsement. In fact, only 13 examples of this date in Full Bands have been endorsed in all grades combined. This piece is fully struck and displays lovely iridescent luster that has a faint lavender-rose hue at most angles. The strike is fully rendered, and the only grade-limiting flaw is a tiny tick between the L and I in LIBERTY. Population: 27 in 66 (1 in 66+) Full Bands, 0 finer (3/16). NGC ID# 23HW, PCGS# 4965

1928-S Dime, MS67 Full Bands Rare High-Grade Registry Coin

4599 1928-S MS67 Full Bands PCGS. CAC. The 1928-S Mercury dime is an underappreciated rarity in Superb Gem Full Bands. PCGS has graded 10 pieces so fine and NGC only one, neither service reporting anything finer; of these, only three are CAC-endorsed (2/16). The present coin showcases beautiful, frosty luster with an old-time, iridescent "skin." The sharp strike encompasses the peripheral legends as well as the interior motifs, despite evidence of die erosion in the fields. There are no mentionable abrasions. The scarcity of the 1928-S in this condition is only in part due to the moderately low Full Bands population, as it is also due to the low survival rate of the issue overall in an unabrased state. Even non-Full Bands 1928-S dimes are rare this well preserved. NGC ID# 23HZ, PCGS# 4971

1931 Mercury Dime, MS67 Full Bands Tied for Finest Certified

4600 1931 MS67 Full Bands PCGS. The United States was solidly in the throes of the Great Depression by 1931. With deflation spiraling out of control and the unemployment at 15%, demand for coinage was understandably low. Activity at the Philadelphia Mint reflected the economic reality: The facility struck only cents, dimes, and double eagles in that year. Dime production amounted to 3.1 million coins, among the lowest totals in the series. Full Band Premium Gems appear on the market with relative frequency, but the 1931 poses a real challenge at this remarkable grade level. PCGS shows 19 MS67 Full Bands submissions, and NGC reports one similar grading event. Both firms have yet to encounter a finer representative (2/16).

Shades of green, blue, violet, and crimson patina meld over each side of this delightful Superb Gem Mercury dime. Luminous luster issues from the near-flawless surfaces. Design detail is strong overall with full band delineation. This important offering should stand out to Registry builders. NGC ID# 5BZ2, PCGS# 4983

1942/1 Mercury Dime, MS66 Among the Finest Certified at PCGS

4601 1942/1 FS-101 MS66 PCGS. CAC. The 1942/1 Mercury dime is the most avidly sought-after variety of the series. The overdate was noted almost immediately after the coins were released and the variety became immensely popular because of the dramatic “naked eye” visibility of the overdate, a feature every collector notices when examining a coin. The fame of the variety was established by its early inclusion in the *Guide Book*, and its prestige and value have increased steadily over the years.

The present coin is a remarkable Premium Gem, with well-detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces show traces of sea-green and amber toning and overall eye appeal is outstanding. Population: 6 in 66, 0 finer (2/16).

From *The Indian Rocks Collection*. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

1945 Mercury Dime, MS65 Full Bands Compelling and Elusive Strike Rarity

4602 1945 MS65 Full Bands PCGS. The circumstances that led to this odd strike rarity have never been fully explained, but it remains a great (and celebrated) issue when found with fully split central bands; Lange makes the interesting point in his series reference that since all the dies for all three mints were made at the Philadelphia Mint die shop, there should have been nothing fundamentally different about the P-mint strikes.

This Gem Full Bands example displays effulgent luster over frosty silver-white surfaces. The central bands show full separation and the strike is, in fact, bold throughout both sides. A bit of die clashing shows on the obverse under Liberty's chin and behind the head. The last example we offered in this exact grade and service was lot 3120 in our Houston Signature (Heritage, 12/2015), also an untuned coin, which realized \$13,513. Population: 38 in 65 Full Bands, 17 finer (2/16). NGC ID# 5A98, PCGS# 5057

PROOF ROOSEVELT DIME

1951 Roosevelt Dime, PR68+ Deep Cameo Spectacularly Toned Registry Set Candidate

4603 1951 PR68+ Deep Cameo PCGS. Only 57,500 proof sets were issued in 1951, the year after the Mint resumed its commercial proof set offerings. Few survivors have been seen with Deep Cameo contrast, and coins in extremely high grade tend to have brilliant surfaces. This magnificent Plus-graded PR68 specimen displays vivid shades of burnt-orange and cobalt-blue toning, over sharply detailed design elements and deeply reflective fields that contrast dramatically with the frosty devices. The stunning cameo effect is most unusual with richly toned coins. Eye appeal is tremendous, to match the unparalleled technical quality. Population: 3 in 68 (1 in 68+) Deep Cameo, 0 finer (3/16). NGC ID# 27EK, PCGS# 95226

PROOF TWENTY CENT PIECE

1878 Twenty Cent, PR66 Proof-Only Issue, 600 Pieces Struck

4604 1878 PR66 PCGS. BF-1, R.3. The twenty cent denomination had been abolished in 1876, but the Philadelphia Mint remained engaged in the production of proofs for collectors through 1878. That year witnessed the manufacture of 600 twenty cent specimens, all widely pursued today by specialists that far outnumber the surviving population. Most proofs grade in the PR62 to PR64 range. Premium Gems are rarely offered. This PR66 twenty cent piece shows colorful toning that includes shades of mainly blue and violet with rose and golden-orange accents. Grade-limiting contact marks, few and far between as they may be, are well-concealed by the eye-catching patina. Population: 11 in 66, 1 finer (3/16). NGC ID# 27H5, PCGS# 5306

EARLY QUARTERS

1796 Draped Bust Quarter, Fine 15 Key First-Year Issue, B-2

4605 1796 B-2, R.3, Fine 15 NGC. Browning-2 is the more frequently encountered die marriage of the 1796 Quarter, and it is readily identifiable by a high 6 in the date. It is always the sign of an important sale when we can offer a problem-free representative of this low mintage (6,146 pieces), one-year type. Moderate to heavy wear is evenly distributed over both sides with all major design elements at least outlined. The obverse rim is sharp, as is that on the reverse in all but one or two areas. The number of light to moderate abrasions is consistent with an early quarter that saw this extensive wear, and, with rich charcoal-gray toning that lightens over the raised features, neither side reveals any singularly mentionable blemishes. Worthy of a strong bid.

Ex: Santa Clara Signature (Heritage, 11/2002), lot 7007. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

1796 Quarter, Problem-Free XF40 B-2, High 6 Variety

4606 1796 B-2, R.3, XF40 NGC. The authors of *Early Quarter Dollars of the United States Mint 1796-1838*, Rory R. Rea, Dr. Glenn Peterson, Bradley S. Karoleff, and John J. Kovach Jr., define the many numismatic market segments that compete for any appearance of a 1796 Draped Bust quarter:

“The quarter dollar of 1796 is avidly pursued by collectors for a number of reasons. The progenitor of the denomination, the 1796 quarter dollar is sought by type, date, series, and Redbook variety collectors — all of whom must compete for a coin with a total mintage of 6,146.

“Due to its rarity and desirability, the appearance of any 1796 quarter in an auction — no matter the coin’s condition — is a ‘marquee event,’ with the coin typically given a detailed description and photographic illustration.”

For the collector of 18th century type coins, this is indeed a “marquee event.” The surfaces on this piece are problem-free; indeed, almost abrasion-free. Each side is evenly worn and light gray overall with slightly pinkish-gray accents over the high points. Each side is also perfectly centered, showing full dentils. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

1805 B-3 Bust Quarter, Lustrous MS64+ Condition Census, Late Die State Coin

4607 1805 B-3, R.1, MS64+ PCGS. CAC. Die State V. This common Browning variety is actually quite rare in such an advanced die state, and the present example is equal to the top of the Condition Census enumerated in Walter Breen's 1992 update of Browning's *The Early Quarter Dollars of the United States, 1796-1838*.

The late die state of this coin is characterized by several die markers. There are three obverse die cracks: one through star 4 passing below the hair ribbon to the hair curl, a second that runs through stars 1 and 2 and through the lower date digits, and a third that extends upward from the 5 in the date to the bust. The E in LIBERTY is quite weak, noticeably more so than the flanking letters. On the reverse, there are heavy clash marks from the bust above the clouds and STATES OF, a crack through the tops of STA, and another from the rim to the upright of the first T in STATES.

The current example has muted silver-gray surfaces with a golden overlay, complemented on the reverse by peripheral aqua and amber. Bright mint luster radiates beneath the light toning. A small dark alloy spot in the 0 of the date will serve as a pedigree identifier. There are no mentionable planchet flaws or other distractions on this incredibly rare and appealing coin. This example is sure to generate some spirited bidding. Population: 7 in 64 (2 in 64+), 1 finer (2/16).

Ex: Heritage (4/2006), lot 1462; The Joseph C. Thomas Collection, Part Two / Long Beach Signature (Heritage, 5/2009), lot 601. NGC ID# 23RC, PCGS# 38925 Base PCGS# 5313

1806/5 Quarter, B-1, MS64
Ex: Randall, Garrett, Gardner
Provenance Extending Back 131 Years

4608 1806/5 B-1, R.2, MS64 PCGS Secure. The sole dies employed for the 1806/5 overdate. Graded MS65 in 1980 and certified MS64 today, this beautiful 1806/5 quarter displays exquisitely preserved lustrous satin surfaces graced by warm gray, gold, and lilac iridescent toning. The design elements are well-detailed, the undertype 5 clearly visible below the primary digit. As Q. David Bowers stated in the Garrett catalog, "In today's era of 'dipped' and 'cleaned' issues, such specimens as this from the previous century [now two centuries] with beautiful original toning are to be prized."

Ten die varieties are known for this date, but only the present B-1 variety employs the overdated obverse from 1805. The 1806/5 quarter is one of the prominent "naked eye" overdates that are so popular with collectors today. It is an easily visible overdate that can be seen with no magnification.

Some experimentation took place in the engraving and coinage department of the Mint during 1806. Seldom do overdates of any era originate with dies that were actually used in previous years. Nearly all overdates, especially in the early years of our coinage, resulted from dies engraved in previous years but unused. It is believed that dies actually used became "work hardened" and brittle and were unable to be successfully altered in the Mint. Such dies remained in use until they wore out, producing backdated coinage that now renders original Mint coinage records almost obsolete.

However, 1806/5 overdates are known for quarters, half dollars, and quarter eagles. In each of these three instances, the previous dies dated 1805 were actually used during the year, then altered by Mint engravers after the beginning of the new year. In the case of the quarter dollar, the obverse and reverse are each struck from the dies previously used to coin the 1805 B-4 variety.

The present coin is a spectacular specimen that occupies the number one position in Steve Tompkins' Condition Census and the number three spot in the Rea-Koenings-Haroutunian Condition Census. Tracing its history to the fabled Garrett Collection and to Gene Gardner afterward, this coin has been prized by the most advanced collectors for more than a century. Series specialists should bid accordingly. PCGS has graded three examples of the 1806/5 in MS64, one in MS64+, and three finer. NGC has graded two in MS64 and two finer (1/16).

Ex: John Colvin Randall Collection (W. Elliot Woodward, 6/1885), lot 551; T. Harrison Garrett; Robert Garrett, John Work Garrett, John Hopkins University; Garrett Collection, Part II (Bowers and Ruddy, 3/1980), lot 625; Long Beach Signature (Heritage, 2/2008), lot 341; Gene Gardner; Gardner Collection, Part I (Heritage, 6/2014), lot 30346. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

1806 B-2 Quarter Dollar, MS64 High Condition Census, Late Die State

1806 Draped Bust Quarter, MS62 Popular B-3 Variety

4609 1806 B-2, R.2, MS64 NGC. This late die state Draped Bust quarter shows extensive clash marks on both sides, with severe die cracks and rim crumbling on the reverse. It is intermediate between states c and d in the Rea-Peterson-Karoleff-Kovach accounting.

This impressive piece ranks high in the Condition Census, with only two finer examples of the B-2 die combination recorded in the census listed in the same Rea, et al reference. The Choice surfaces are well-struck for the state of the dies, with few marks or signs of contact visible on either side. Full satin luster is visible beneath rich, natural antique lilac-gray and iridescent toning with exceptional eye appeal.

Ex: Superior (10/1995), lot 343. However, this is not the same coin that appeared in the Superior (9/1997) sale as lot 1896, as reported in the Rea, Koenings, Haroutunian Condition Census. NGC ID# 23RD, PCGS# 38928 Base PCGS# 5314

4610 1806 B-3, R.1, MS62 PCGS. CAC. The 1806 Draped Bust quarter boasts a substantial mintage of 206,124 pieces, with 10 die varieties known for the date. This coin represents the popular B-3 variety, with an imperfect T in LIBERTY and the stem centered over C in the denomination on the reverse. The B-3 is an available variety, with at least one remarriage known. Most examples seen are lightly struck at the centers.

This impressive MS62 specimen offers well-detailed design elements, with a touch of the usual softness on the central devices. Some interesting clash marks and die cracks are evident on the reverse, along with some diagnostic shield damage (from a late state of the die) and extensive rim crumbling. Shades of lavender-gray, steel-blue, and golden-brown toning blanket the lightly marked surfaces. Population: 13 in 62, 22 finer (3/16). NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

BUST QUARTERS

1806 Draped Bust Quarter, B-9, MS62+ Terminal Die State

4611 1806 B-9, R.1, MS62+ NGC. Tompkins Die State 6/5, the latest obverse and reverse die states recorded in that reference. The obverse has a bisecting crack from the 1 in the date to the E in LIBERTY. A second crack from the rim to the drapery joins the first crack behind the neck. Both sides have extensive clash marks, and the reverse has a number of small rim breaks. The date is clashed at TES OF. This lovely quarter exhibits gray-gold toning over ivory luster with delicate blue overtones. Trivial marks limit the grade but fail to diminish the eye appeal. Census (all varieties): 14 in 62 (1 in 62+), 24 finer (2/16). NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

1818 B-2 Quarter, MS65 Exemplary Preservation and Eye Appeal

4612 1818 B-2, R.1, MS65 PCGS. Tompkins Die State 4/2. Star 13 is repunched, and each side exhibits dramatic die clash. Quarter dollar production resumed in 1815 after an eight-year hiatus, but Steve Tompkins writes that it was "primarily due to a specific request from the Planters Bank of New Orleans, who insisted on only quarter dollars in return for their silver deposit." Only three years later in 1818 did the manufacture of Capped Bust quarters reflect demand from the general public. By that point, Spanish two reales had largely disappeared from circulation, and an alternative was finally needed. The Mint struck 361,174 quarters in 1818 from five obverse dies and seven reverse dies. Browning-2, one of 10 known die varieties, is easily the most available. Nevertheless, Gems are of the utmost rarity.

Blended gold, crimson, and cobalt-blue hues adorn the rims, yielding to fully frosted and brilliant interiors. Liberty's curls display strong detail, as do the eagle's fletchings and talons. Virtually unimprovable technical quality and extraordinary eye appeal place this Gem in the top echelon of survivors. Population (all varieties): 23 in 65, 4 finer (2/16). NGC ID# 23RH, PCGS# 38943 Base PCGS# 5322

1835 B-2 Quarter, Rim-Toned MS64+ Seldom Seen in Finer Grades

4613 1835 B-2, R.2, MS64+ PCGS. The B-2 quarter is readily distinguished by the 8 low and 3 high in the date — the 1 and 5 are rather in-between — and minor recutting on star 6. On the reverse, the tip of the olive stem protrudes right, past the C in the denomination. The B-2 and B-7 R.2 varieties are slightly more elusive than the B-1, at R.1, but all three can be found fairly readily for the design and date, making them prime potential acquisitions for type collectors. On this MS64+ example, as on all known coins of the B-2 variety, there is a faint crack running rightward beneath the date, towards star 13. Ample eye appeal is present on this highly lustrous coin, largely tan-gold with tinges of pale blue at the rims on both sides. A few stray abrasions, including one tick on Liberty's cheekbone, are all inconsequential.

The Census in the Rea-Peterson-Karoleff-Kovach series reference enumerated only two examples of the B-2 marginally finer; but the "Col." Green-Eric Newman coin, listed as "MS65," later was graded MS67 ★ NGC. It traded in our Newman Part II Signature (Heritage, 11/2013) as lot 33355, where it realized \$58,750. Another example of the B-2, certified MS64 PCGS and encapsulated in an old green-label holder, was lot 3094 in our Long Beach Signature (Heritage, 1-2/2015), where it brought \$12,925. NGC ID# 2352, PCGS# 38998 Base PCGS# 5354

Samuel Moore Mint Director, 1824 - 1835

PROOF BUST QUARTER

1828 B-4 Quarter, PR65
Attractively Toned and Reflective
Extremely Rare, Tied for Finest at PCGS

4614 1828 PR65 PCGS. B-4, R.7 as a Proof. Among early proof rarities, few are so highly prized as those from the screw-press period. The 1828 proof quarter is extremely rare, and Mint records do not indicate how many were actually struck. PCGS estimates its survival at six to eight coins, while Steve Tompkins, in *Early United States Quarters*, lists confirmation of at least six proofs, including five of the B-4 die marriage and one of the B-1 dies. A definitive roster of 1828 proofs is virtually impossible to assemble at this time, as in previous catalogs, a number of prooflike circulation strikes were offered as proofs, distorting the records of actual proofs. Modern certification data further warps reality. PCGS lists four proofs, including two in PR64 and two in PR65; NGC has seen submissions in PR62 (1), PR64 (2), PR65 (1), and PR66 (1) (3/16). These figures undoubtedly include resubmissions.

Previously, we were able to identify a total of six proofs in all varieties — consistent with Tompkins' findings. The last example we sold was the Gem Eugene H. Gardner coin (Heritage, 6/2014), which realized \$82,250. The present example is its top-grade counterpart at PCGS. Although listed on the *Population Report*, this Gem proof has been off the market for decades and is only now becoming known to us. We have now identified six B-4 proofs, including this piece, which makes a total of seven 1828 proof quarters when the Tompkins-referenced B-1 coin is added to the roster.

This piece is effectively tied for second-finest behind the sole PR66 NGC coin. Only a PR65 NGC coin and the PR65 PCGS Gardner example are comparable to the present coin. The strike is fully rendered, and the fields are highly reflective. The reverse is slightly rotated clockwise, as is typical of the B-4 die pair. Lilac-gray interiors cede to amber and violet in the margins with mint-green and blue around the borders. Eye appeal is original and captivating. A beautiful Gem proof, worthy of a strong bid. NGC ID# 27HC, PCGS# 5375

SEATED QUARTERS

1840 With Drapery Quarter, MS66 ★ Finest Known of the Issue

4615 1840 MS66 ★ NGC. Briggs 1-A. Ex: Eric P. Newman Collection. This 1840 With Drapery quarter is the sole finest certified by a grade point at either leading service, and should pique the interest of many advanced collectors, both for its obvious aesthetic allure as well as its prestigious Newman pedigree. Gorgeous concentric toning on the obverse is blue-green at the rims with a fade through indigo and violet to finish in a small peach core. The sharply defined reverse is semireflective in the fields with colors appearing mostly at the borders. With its substantial all-around eye appeal, this early Seated quarter more than earns the Star designation that accompanies its lofty third-party grade. The NGC plate coin for the Coin Explorer website.

Ex: Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33362; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98330. NGC ID# 23SH, PCGS# 5397

1840-O Drapery Quarter, Large O, MS64 Briggs 1-A, FS-501, Doubled Denticles

4616 1840-O Drapery, Large O, Briggs 1-A, FS-501, MS64 PCGS. CAC. Large O, Doubled Denticles on the reverse. Only 43,000 pieces were struck of the 1840-O Drapery quarters between the Large O and Small O variants combined — an amount far smaller than the 1840-O No Drapery, struck to the extent of 382,200 coins. The mintmark is considerably larger on the Large O — *Cherrypickers'* calls it "25% larger" — than on normal O-mint quarters of this period, but an easier way to distinguish the Large O versus Small O is the centering and shape. The Large O is neatly centered at the apex of the fletchings and olive stem tip and it is elongated, where the Small O (Briggs Reverse B) is shifted perceptibly to the left (facing the coin), and it is round.

Briggs notes of this curious reverse:

"[Two] sets of dentils were hand cut into the dies. The first set was 0.9 mm high and faint. The second set was 0.7 mm high, boldly cut, and centered over the gaps of the first set. This gives the appearance of diagonal spurs running off the corners of the second cut dentils. A die crack runs from the rim through the left upright of the 'N' in 'UNITED' to the wing. A die bulge is at the juncture of right wing and shield. Also another at the lower right thigh - field area."

When writing his 1991 series reference, Briggs called the 1840-O Large O Drapery quarter R.6 in all grades, adding that it was "to date" the rarest collectible Seated Liberty quarter.

This near-Gem offers muted luster over silver-gray surfaces accented with pale blue and copper tones near the rims. This piece should create a considerable stir within the Liberty Seated collector base. PCGS# 395925 Base PCGS# 5398

1849-O Seated Quarter, MS63+ Originally Toned Mint State Rarity Sole Second Finest Known

4617 1849-O MS63+ NGC. Briggs 1-A. The 1849-O is among the great Seated quarter keys of the pre-Arrows and Rays period. The mintage is included in the 412,000-coin mintage of the 1850-O, likely among the first delivery of 16,000 coins. The small survival rate certainly supports a low five-figure mintage. Uncirculated examples are extremely rare. An MS64 NGC coin is the sole finest, followed closely by the present MS63+ example as the second finest. Two NGC and one PCGS coin reside in MS63, and a pair of MS62 NGC pieces round out the bottom of the pack in Mint State (3/16). Some duplication may be included in these figures.

This piece is sharply struck with satin fields and minimally abraded devices. Rich ocean-blue and violet hues encompass much of each side, although tinges of sun-orange appear in the centers. Eye appeal is outstanding. NGC ID# 23T3, PCGS# 5414

1852-O Seated Quarter, MS62 Ex: Gardner, One Example Finer

4618 1852-O MS62 PCGS. Dusky gold and lilac patina appears on the obverse of this New Orleans rarity, while the reverse is mostly brilliant save for scattered accents of similar hues. A few small dark toning flecks show on the reverse, but the softly frosted luster that swirls over each side more than compensates. Well-struck save for the centers of a few of the right-side stars. The obverse is microgranular, and both sides are minimally abraded. Only 96,000 pieces were struck, with many melted since bullion value exceeded face value upon issue. Population: 2 in 62, 1 finer (3/16).

Ex: Auction '88 (Superior's Session, 7/1988), lot 119; Long Beach Signature (Heritage, 9/2008), lot 1519; Central States Signature (Heritage, 4/2010), lot 2082; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98341. NGC ID# 23T9, PCGS# 5420

1853/53 No Arrows Quarter, MS66 Repunched Date, Melt Rarity

4619 1853/53 No Arrows, Briggs 1-A, FS-301, MS66 NGC. This Gem 1853 No Arrows quarter displays splendid peach, rose, and ocean-blue patina on lustrous surfaces devoid of mentionable marks. Sumptuous eye appeal and a splendid, sharp strike make this No Arrows quarter an obvious target for series specialists.

The *Guide Book* records a mintage of more than 15 million pieces for the 1853 Arrows and Rays quarters, versus only 44,200 pieces for the 1853 No Arrows. Imbalances in the ratios of gold and silver after 1849, due to the California Gold Rush, had made silver coinage overvalued — worth more as melted bullion than its face value — and in 1853 the Mint would reduce the amount of silver proportionally in all denominations smaller than one dollar to a level that would make melting unprofitable. This reduced weight standard was denoted by the Arrows design on half dimes and dimes, and Arrows and Rays on quarters and half dollars.

Ex: *FUN Signature* (Heritage, 1/2006), lot 2285; *Gardner IV Collection* (Heritage, 10/2015), lot 98424. NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421

1855 Arrows Quarter, MS67 Finest at PCGS, Ex: Gardner

4620 1855 Arrows MS67 PCGS. Briggs 2-B. Arrows and Rays were added to the design of the Seated Liberty quarter in 1853 to signify a weight change, but the Rays were discontinued after the first year, because of striking problems and die breakage. The Arrows were also removed after 1855, creating a popular two-year design type for present-day collectors.

This spectacular Superb Gem is the single-finest survivor certified by PCGS, a must-have coin for Registry Set enthusiasts. The design elements are sharply detailed and the impeccably preserved surfaces radiate vibrant mint luster, under attractive shades of greenish-gold, lavender-gray, and cerulean-blue toning. Eye appeal is terrific. Population: 1 in 67, 0 finer (2/16).

Ex: *Eugene Gardner*, purchased from *Bill Nagle* (12/2003); *Gardner Collection, Part III* (Heritage, 5/2015), lot 98342 (as MS67 NGC), realized \$27,025. NGC ID# 23U8, PCGS# 5435

1857 Quarter, MS67+ Frosty and Colorfully Toned

4621 1857 MS67+ PCGS. The 1857 quarter claims a large mintage approaching 10 million pieces from multiple die pairs. Larry Briggs identifies eight different obverse and reverse dies in his 1991 reference, although such a large mintage suggests that other marriages exist. The obverse of this variety shows the date slightly more distant from the rock than most other obverses.

This Superb Gem displays frosty luster that emanates from smooth surfaces delightfully toned in accents of sky-blue, orange, and amber-gold. The strike is generally bold, although a few star centers are softly impressed, especially stars 12 and 13. The eagle is fully defined. Population: 8 in 67 (2 in 67+), 1 finer (3/16). NGC ID# 23TE, PCGS# 5442

1858-O Quarter, Semiprooflike MS64 Condition Census Rarity Stand-Out Eye Appeal

4622 1858-O MS64 PCGS. Briggs 1-A. In absolute terms, the 1858-O Seated Liberty quarter is a rarity in Mint State but somewhat underrated as such. PCGS reports six Uncirculated submissions, including two MS62, two MS63, this MS64, and a single Gem finer; NGC has seen Mint State submissions in MS61 (1), MS62 (3), MS63+ (1), and MS65 (1). The MS65 PCGS coin was previously graded by that service as MS64+ when it was offered in the Eugene H. Gardner Collection, Part III (Heritage, 5/2015), where it realized \$21,150. That was the last time we handled a high-end PCGS example of this condition rarity.

The present Choice example is among the pieces plated on CoinFacts, and although not overly flamboyant with regards to toning, this eye-catching coin is dazzling in other respects: The fields are semiprooflike and deliver modest cameo contrast, and the sharpness of the strike is staggering. Both sides have light golden toning into which a few tiny ticks melt, leaving this coin with stop-and-look-twice eye appeal. NGC ID# 44LC, PCGS# 5446

1858-S Seated Quarter, MS62 Only Known Mint State Example

4623 1858-S MS62 PCGS. CAC. Briggs 2-B. The present coin is the only 1858-S quarter certified as Mint State by either NGC or PCGS. (The prior NGC certification of this coin has not dropped off their Census yet.) Although the mintage of 121,000 pieces ensured survivors, there was a paucity of collectors on the West Coast until the 20th century, and the median grade among certified examples is VF. But this quarter exhibits full design detail aside from slight incompleteness on Liberty's knees. The fields show surprisingly few marks, and luster dominates the borders and devices.

Ex: Rarities Sale (Bowers and Merena, 8/1995), lot 112, as MS62 PCGS; Richmond Collection, Part III (David Lawrence, 3/2005), lot 1446, as MS62 NGC; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98347, as MS62 NGC; New York Signature (Heritage, 10/2015), lot 3189, as MS62 PCGS. NGC ID# 23TK, PCGS# 5447

Refining gold in the Philadelphia Mint, 1903

1860-S Quarter, MS61 The Only Mint State Example of This Rarity

4624 1860-S MS61 PCGS. CAC. Even though 56,000 quarters were produced of this issue, the story is the same for it as it is for many other S-mint issues from the 1850s through the 1870s: high attrition. Demand in the West for hard currency severely limited the survival rate of high-grade examples. Many S-mint issues from this period do not have even a single remaining coin in Mint State, and we can only speculate about the circumstances surrounding the preservation of this 1860-S representative. In the November 1990 edition of *The Gobrecht Journal*, Jim Gray pointed out, “the most underappreciated and undervalued of all Seated coins is the 1860-S quarter, particularly in higher grades.”

After 30 years and multiple millions of coins certified by both of the major grading services, this piece still remains the sole 1860-S quarter encapsulated as Mint State. The surfaces are even, light gray with soft, frosted mint luster visible beneath the toning. There are a few tiny abrasions on each side, as one would expect from an MS61 coin, the most obvious and easily usable for pedigree purposes being a vertical mark to the left of the date and a similar tick on Liberty’s thigh. Several stars are a trifle soft, but the overall striking quality is satisfactory.

It is noteworthy that the two most prominent collectors of Seated coinage of the past generation have owned this coin: Jim Gray and Eugene H. Gardner. Its status as the finest known of the issue stands unrivaled, and the next owner will find it an important addition to a high-end Seated quarter collection.

Ex: Public Auction (Stack’s, 9/1989), lot 1126; Jim Gray Collection (Bowers and Merena, 7/2004), lot 2240; Eugene H. Gardner Collection, Part II (Heritage, 10/2014, as MS61 NGC with CAC approval), lot 98372. NGC ID# 442R, PCGS# 5453

1861-S Seated Liberty Quarter, AU58 Unknown in Mint State

4625 1861-S AU58 PCGS. Briggs 1-A. All the S-mint quarters from the era just preceding the Civil War boast low production totals, only 96,000 pieces in the case of the 1861 issue. The 1861-S also has a low survival rate, and it is a prime condition rarity in high grade today. No Mint State examples have been certified by either of the leading grading services, and specimens in AU58 are very rare.

This attractive near-Mint example shows the slightest trace of wear on the well-detailed design elements and the lightly abraded surfaces retain traces of original mint luster. Vivid shades of magenta and greenish-gold toning add to the considerable eye appeal. Population: 5 in 58 (1 in 58+), 0 finer (3/16). NGC ID# 23TU, PCGS# 5455

1864-S Quarter, MS64+ The Gardner Coin, Sole Finest at PCGS

4626 1864-S MS64+ PCGS. CAC. Briggs 1-A, showing recutting on the 18 in the date and a large S mintmark shifted slightly left but separated from the juncture of the stem and fletchings. This is the former Gene Gardner Collection coin, which has now been crossed over to an MS64+ PCGS holder from its former MS64 NGC slab, both with CAC endorsement. We described this coin in its last appearance with us in this way: "Nicely frosted silver-gray surfaces display ample luster and traces of golden-rose patina that congregate largely around the obverse rim. The strike is sharp, save for a few of the star centers on the lower-right side, and the reverse is uniformly bold. A great coin with much eye appeal."

Gene Gardner also owned an MS64 PCGS example of this issue, which we offered in our Gardner Collection, Part I Signature (Heritage, 6/2014), lot 30383, which realized \$28,200. The present coin, in its new MS64+ PCGS holder, slightly edges out that piece and two other MS64 submissions for the sole finest at that service. All of these examples are, of course, dwarfed in grade by the incredible MS68 NGC ex: Eliasberg coin. NGC further reports three submissions in MS64 and one in MS65. Given the minuscule mintage of only 20,000 coins for the issue, it is likely that those population numbers contain duplicates. Mint State examples of the 1864-S quarter appear infrequently at auction, and series specialists will be ready. Population: 3 in 64 (1 in 64+), 0 finer. CAC: 2 in 64, 0 finer (2/16).

Ex: Benson Sale, Part I (Goldberg Auctions, 2/2001), lot 1633, as MS64 NGC; Gene Gardner; Gardner Collection, Part IV Signature (Heritage, 10/2015), lot 98454, as MS64 NGC-CAC, brought \$28,200. NGC ID# 23TZ, PCGS# 5460

1867-S Quarter, Near-Gem Uncollectible in Higher Grades

4627 1867-S MS64 PCGS. From a mintage of just 48,000 pieces, the 1867-S Seated Liberty quarter is an elusive issue in all grades, and Mint State examples are rare. There was no collector demand for mintmarked issues at the time (proofs satisfied the date sets then in vogue), so coins like this one circulated extensively on the West Coast. This Choice representative is attractive despite minor incompleteness of strike on the final three stars, the dentils near the date, and STATES. Well-preserved and coruscating surfaces are blanketed in shades of golden-brown, lavender, and gray patina, with patches of amber on the reverse. There is merely one coin finer between the two services, an MS67 representative at NGC that has long been recognized as the sole finest example of the issue. Population: 2 in 64, 1 finer (3/16). NGC ID# 23UE, PCGS# 5471

1868 Seated Liberty Quarter, MS66 Among the Finest of This Underrated Issue

4628 1868 MS66 PCGS. Briggs 1-A The mintage of 29,400 coins puts this issue into the "underrated" category along with the 1867 quarters, although the 1868 is slightly more available in Gem grade. Copious mint luster runs over rose-gray and lilac surfaces bounded by a ring of aqua patina at the rims on each side. Sharply struck design elements are the rule throughout. Die lines between the Liberty pole and the forearm accompany others appearing at the end of the ribbon and into the drapery. The shield on reverse shows many diagonal die lines, and recutting is present on some of the letters in the denomination. A few scattered marks are minor but hold the coin back from an MS66 grade. The eye appeal is excellent. Population: 3 in 66 (1 in 66+), 0 finer (2/16). NGC ID# 23UF, PCGS# 5472

1878-S Seated Liberty Quarter, MS66 Tied for Finest Certified

4629 1878-S MS66 PCGS. Briggs 1-A. Ex: Eliasberg. A blanket of dusky lavender-gray toning graces radiant, satiny mint luster on each side of this well-struck Premium Gem. The preservation is excellent, save for a few dark, pedigree-identifying toning spots, one on the central obverse and the other two on the reverse below the G in GOD and within the eagle's right (facing) talons. In a green label holder.

The 1878-S quarter had a low mintage of 140,000 pieces, and as if that were not enough to make it a key date in the series, significant quantities were melted to prepare for the massive silver dollar coinages that began that year. Most survivors are well-worn, damaged, or otherwise impaired, and Mint State examples are rare in any grade. Population: 2 in 66, 0 finer (3/16).

Ex: Lyman H. Low (7/1903) by J.M. Clapp; John H. Clapp; Clapp Estate (1942) to Louis E. Eliasberg, Sr.; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1527; Rarities Sale (Bowers and Merena, 8/2001), lot 157; Eugene H. Gardner; Gardner Collection Part II Signature (Heritage, 10/2014), lot 98387, which brought \$19,975. NGC ID# 23VA, PCGS# 5510

1891-O Quarter, MS65 Prooflike Only 68,000 Pieces Produced Sole Prooflike Coin Certified

4630 1891-O MS65 Prooflike NGC. The New Orleans Mint struck silver dollars annually once the mint reopened in 1879; however, no dimes or quarters were minted until the final year of the Seated Liberty design. While the 1891-O dime is relatively common, the 1891-O quarter is rare, with only 68,000 pieces produced. This well-struck Gem has pale sky-blue, gray, and rose toning. The fields show undeniable reflectivity on each side, and there is virtually no sign of coin-to-coin contact. This remains the only Prooflike of this rare issue certified by NGC (3/16). NGC ID# 23VS, PCGS# 5525

PROOF SEATED QUARTERS

1841 Quarter, PR66
One of Four Known Proofs
Ex: Pittman-Gardner

Finest Certified by Five Grade Points

4631 1841 PR66 NGC. The only Premium Gem proof 1841 Seated quarter in existence, this piece is the finest of just three proofs that are available to collectors, so far as we know. In his May 1998 cataloging of this 1841 quarter when it was part of the John Jay Pittman Collection, David Akers wrote:

"This Proof 1841 Quarter, especially given its considerable superiority in terms of condition to the only other Proofs known, is one of the rarest and most important of the many Proof Liberty Seated coins in the John Jay Pittman Collection."

And rare and important this Premium Gem is. In his 1988 *Encyclopedia*, Breen says there are "4 proofs known." In his *The Comprehensive Encyclopedia of United States Liberty Seated Quarters*, Larry Briggs estimates the mintage as: "2+ proofs-2 verified." A mere five specimens have been reported in the population reports — NGC has only certified this PR66 Pittman-Kaufman specimen, while PCGS has graded two PR61s, one PR62, and one PR58. However, we believe the PR58 specimen is an old listing and the piece is now one of the PR61 examples mentioned before. Based on auction records, our research indicates there are only four known 1841 proof quarters, including the example in the National Numismatic Collection at the Smithsonian Institution (see the roster below).

All of the design elements of this incredible PR66 coin exhibit razor-sharp definition. Liberty's hair and the eagle's plumage are fully delineated, as is the foot with its complete separation from the sandal and its straps. Deeply mirrored fields establish pronounced contrast with the richly frosted devices when the coin is tilted beneath a light source, and medium-intensity violet, cobalt-blue, and gold patina in the fields further serves to highlight the lighter champagne-gold and soft blue hues of the central motifs.

Both faces exhibit impeccable preservation, though we mention what Akers referred to as "... a few very light contact marks hidden under the toning in the right obverse field." A minute carbon speck beneath the eagle's beak provides an identifier for future pedigree researchers.

Given its full strike, exquisite original toning, and exemplary preservation, enough cannot be said about the outstanding eye appeal exuded by this finest-certified 1841 proof quarter, which will undoubtedly find a new home in a top-shelf collection.

Ex: Sam Kabealo, sold privately in 1941; 1959 ANA Sale, lot 2480; New Netherlands (54th Sale, 4/1960), lot 1113; John Jay Pittman (David Akers, 1/1998), lot 1302; The Phil Kaufman Collection of Early Seated Proof Sets, Part II (Heritage, 1/2008), lot 3020, realized \$345,000; FUN Signature (Heritage, 1/2009), lot 3762; ANA Signature (Heritage, 7/2009), lot 1084; Greensboro Collection, Part III (Heritage, 4/2013), lot 4217; Eugene Gardner Collection, Part I (Heritage, 6/2014), lot 30403; FUN Signature (Heritage, 1/2016), lot 5341.

1844 Proof Quarter, PR65, CAC Gold Label The Pittman-Kaufman-Gardner Coin Sole Example Available

4632 1844 PR65 PCGS Secure. Gold CAC. Briggs 4-D. Ex: Pittman-Kaufman. The date is higher than Briggs 1 or 2. The 8 is recut at the top of the lower loop.

The rarity of the 1844 proof Seated quarter is attested to by the solitary example certified by either NGC or PCGS. This PCGS-graded PR65 coin with **CAC gold label**, is pedigreed to the John Jay Pittman and Phil Kaufman collections. This piece is also (and understandably) the CoinFacts plate coin for the issue.

Larry Briggs, in *The Comprehensive Encyclopedia of United States Liberty Seated Quarters*, says of the 1844 quarter that there are “approximately five proofs,” and Walter Breen, in the *Complete Encyclopedia of United States and Colonial Coins*, also contends that there are “five proofs traced.” He elaborates on them in the 1989 *Encyclopedia of United States and Colonial Proof Coins, 1722-1989*: (1) “Smithsonian Institution, from Mint.” (2) “Ex Dr. Judd cased set.” (3) “J.H. South: 507.” (4) “LM 6/71: 717.” (5) One other impaired piece seen years ago, but I have long since lost track of it.”

We believe that the estimates by Breen and Briggs are clearly too high. David Akers presents a more complete discussion of the 1844 proof quarter in the Pittman Collection catalog of October 1997:

“This is the rarest silver denomination of the year in Proof with possibly only three examples known; other than the one reportedly in the Smithsonian Institution and the example in the Matthew Stickney original Proof set (Lot 1788 in the 1907 auction of his collection), I have not seen or heard of another.”

Aside from the appearances mentioned above, our search of auction records turns up no further examples. We emphasize that in the decades prior to the 1986 advent of third-party grading services, many coins that would today be described as prooflike were listed in catalogs as proofs.

The current (very) high-end Gem proof displays beautiful natural toning with a plethora of iridescent colors, including reddish-gold, cobalt-blue, and gold-beige, the palette slightly deeper on the obverse. The sharp proof strike has created uniformly full definition to every design feature; even the sandal and straps on Liberty’s foot exhibit complete separation.

This piece, earlier offered in the Kaufman and Gardner collections in a PR66 NGC holder, is today in a PR65 PCGS holder with gold CAC label, as mentioned. It is not only extremely rare, it is the only one certified and likely the finest known. Since the Smithsonian example, if confirmed, will never reach the numismatic marketplace, *the present coin may be the only example of the proof 1844 quarter ever available to collectors*. Once it has sold, it may be decades before it — or another specimen, if any are truly available — appears again at auction.

Ex: Numismatic Gallery (4/1948); John Jay Pittman Collection (David Akers, 10/1997), lot 833, part of an original 10-piece proof set, half cent through gold eagle; Philip Kaufman Collection of Early Seated Proof Sets, Part Two / FUN Signature (Heritage, 1/2008), lot 3025; FUN Signature (Heritage, 1/2009), lot 3764; Bay State Collection, Part Two (Heritage, 8/2009), lot 1086; Greensboro Collection, Part IV (Heritage, 8/2013), lot 5888; Eugene H. Gardner Collection / Gardner Part I Signature (Heritage, 6/2014), lot 30404, as PR66 NGC-CAC (green label), which brought \$182,125; ANA Signature (Heritage, 8/2015), lot 4033, as PCGS-CAC (gold label). NGC ID# 23W7, PCGS# 5538

**1845 Quarter Dollar, PR65
Tied for Second-Finest of Eight Proofs
Modest Field-Device Contrast**

4633 1845 PR65 NGC. Briggs 5-E. This Gem proof 1845 Seated quarter is tied with the Clapp-Eliasberg-Kaufman-Gardner coin as the second-finest known. Only the Menjou-Pittman-Kaufman-Gardner PR66 coin is finer. The present piece is a new discovery for our roster, appearing out of an old-time collection and here plated in an auction catalog for the first time. The number of proof 1845 quarters now tallies to eight, which matches the number of proof dimes known for this date. The Briggs estimate of “approximately 6 proofs” was formed while both the present coin and the Eric. P. Newman example were hidden away.

This piece shows the boldly recut date that is diagnostic of the proof die pair. The strike is fully rendered, and a touch of field-device contrast accentuates warm amber-gold toning that blankets each side. Eye appeal is outstanding, even for the Gem grade. Census: 2 in 65, 1 finer (3/16). NGC ID# 23W8, PCGS# 5539

1850 Seated Liberty Quarter, PR67 Finest-Known Example Ex: Pittman-Kaufman

4634 1850 PR67 PCGS Secure. CAC. Briggs 3-C. The former John Jay Pittman 1850 proof quarter is the finest of the four reported specimens of this early proof rarity by a full two grade points. The flawless surfaces display rich golden-brown centers bounded by plum-red and ocean-blue borders. The design elements are fully struck and the fields are deeply reflective, under the toning. Overall eye appeal is simply terrific.

Walter Breen, in his 1989 *Proof Encyclopedia*, calls the 1850 issue “prohibitively rare” and claims to have seen records of only two 1850 proof quarters, “aside from those in the unseen proof sets.” Similarly, David Akers writes in the May 1998 catalog of the Pittman Collection:

“The 1850 Quarter in Proof is exceedingly rare, even more so than the Proofs of 1847, 1848 and 1849, and it is in the same rarity class as the 1840, 1841 and 1844 Proof Quarters of which only two or three examples of each are known. Just two Proof 1850 Quarters are known with certainty, with possibly a third example also extant, although the third piece ... is not as obvious a Proof as the other two and is open to debate as to its original minting status.”

In addition to the pieces mentioned above, we have identified a fourth example, which was included in the famous Floyd Starr Collection, sold by Stack’s in the early 1990s (see roster below). Remarkably, super-collector Gene Gardner owned three of the four known specimens at various times.

Akers described the present coin in the Pittman catalog:

“Thin date. Open 5. Superb! The quality and beauty of this coin are so extraordinary that no written description can possibly do it justice. The strike is absolutely full and there is a high wire rim, especially prominent on the obverse in the upper right quadrant. The fields are deep mirrors and there is great proof luster under the superb toning which is a fiery reddish-gold, violet, blue, and gold. There are a few faint lines in the fields under the toning, but these are planchet lines that were present at the time of striking and not hairlines. There are tiny die defects on the upper right side and lower left side of the 0 in the date; these defects are characteristic of Proofs and appear on both indisputable Proof 1850 Quarters I have seen. The John Jay Pittman Collection has so many exceptional Proof coins of great quality and beauty that it is difficult to single out any one coin as the ‘most beautiful’; but, if one were to do so, this 1850 Quarter certainly would be one of the leading candidates. ...”

John Dannreuther relates that Paris’ Bibliothèque Nationale in 1986 traded a proof 1850 quarter out of a complete 1850 proof set (including gold) for French coins that the institution lacked. The set was “reportedly obtained by Alexandre Vattmare from the Philadelphia Mint in 1850.” Ed Hipps displayed it in 1986 and Tangible Investments of America displayed it at the 1998 FUN convention, according to Akers. It later appeared in the Richmond Collection and was acquired by Gene Gardner, via Jason Carter.

In the era prior to third-party certification, a number of prooflike 1850 quarters were sold or cataloged as proofs. Since the advent of PCGS and NGC, only three different certified proofs have appeared at auction. One, of course, is the present coin, another is the specimen from the Bibliothèque Nationale-Richmond-Gardner Collections, and the other is the PR62 PCGS example, ex: Floyd Starr (Stack’s, 1/1993), lot 455. The PR63 example that David Akers mentioned and was undecided as to its proof status last appeared before the era of third party grading, but we list it in our roster for the sake of completeness.

The present coin is a spectacular Superb Gem, the finest-known example of this extremely rare issue. It possesses tremendous eye appeal and an illustrious pedigree to match its highest available technical quality. We expect intense competition from series specialists and Registry Set enthusiasts when this lot is called. Population: 1 in 67, 0 finer (3/16).

Roster of 1850 Proof Seated Liberty Quarters

- 1. PR67 PCGS.** Possibly from Harlan P. Smith (Chapman Brothers, 5/1906), lot 820; acquired by John Jay Pittman from R. Green (5/1949); John Jay Pittman (David Akers, 5/1998), lot 1317; Phil Kaufman Collection / FUN Signature (Heritage, 1/2008), lot 3035; Greensboro Collection, Part IV (Heritage, 8/2013), lot 5591; Eugene H. Gardner Collection, Part I (Heritage, 6/2014), lot 30406; FUN Signature (Heritage, 1/2015), lot 4099; ANA Signature (Heritage, 8/2015), lot 4036. **The present coin.**
- 2. PR65 NGC.** Purchased directly from the Mint by Alexandre Vattmare (1850); Bibliothèque Nationale, Paris; Ed Hipps (1986); exhibited by Tangible Investments of America at the 1998 FUN convention; Richmond Collection, Part III (David Lawrence Rare Coins, 3/2005), lot 1521; Jason Carter; purchased by Gene Gardner (4/2005).
- 3. PR63.** J.H. South Collection (Stack’s, 5/1951), lot 515; Central States Convention Sale (RARCOA, 4/1976), lot 218; Reed Hawn Collection (Stack’s, 3/1977), lot 310; Ellis Robison (Stack’s, 2/1982), lot 1318; Heritage (2/1984), lot 956.
- 4. PR62 PCGS.** Floyd T. Starr Collection (Stack’s, 1/1993), lot 445; Rarities Sale (Bowers and Merena, 8/1998), lot 156; Gene Gardner.

Additional Appearances

- A. Proof.** John F. McCoy (W. Elliot Woodward, 5/1864), lot 379. A five-piece silver proof set sold for \$25 to “Levett” (probably George Leavitt).
- B. Proof.** Joseph J. Mickley (W. Elliot Woodward, 10/1867), lot 1720. A five-piece silver proof set sold for \$35 to William Lilliendahl.
- C.** Floyd Starr reported seeing an 1850 silver proof set in the possession of coin dealer William Hesslein in 1923.
- D. Gem Proof.** Arizona State National Convention (Vintage, 10/1988). Possibly number 2 on the roster. NGC ID# 23WD, PCGS# 5544

**1856 Seated Quarter, PR65
Gleaming Mirrors, Rich Coloration
Tied for Finest at PCGS**

4635 1856 PR65 PCGS. The Briggs reference describes the 1856 proof issue as follows, "Proofs of this year are quite rare and are identified by a large die bulge on the reverse that extends from above the right wing to 'L' of 'DOL.'" The diagnostic bulge is evident on this coin when viewed under a light, but perhaps a more visible confirmation of the proof dies are several raised, angled die lines in the obverse shield, under the R of LIBERTY. We have seen these lines before on all 1856 proof quarters viewed.

The smooth, deep mirrors display full reflectivity when viewed at the proper angle. Wonderful shades of purple, blue, and sea-green surround the rims, with translucent orange-gold toning covering the centers. This Gem proof is tied for finest-certified by PCGS. It is estimated that fewer than 30 examples exist in proof format. Population: 3 in 65, 0 finer (3/16). NGC ID# 23WH, PCGS# 5552

**1868 Quarter, PR66 Deep Cameo
Sole Deep Cameo at PCGS**

4636 1868 PR66 Deep Cameo PCGS. The 1868 quarter saw a mintage of 600 proofs, a fair number of which have survived to the present day, but field-motif contrast is lacking on most known examples. Cameos are rare in any grade, and this Premium Gem ranks as the only Deep Cameo certified at PCGS; NGC has also awarded only a single piece an Ultra Cameo grade (also PR66), making this coin, from a certain point of view, tied with one other as the finest 1868 proof quarter certified (3/16). The essentially untuned surfaces exhibit an exquisite strike and stunning white-on-black contrast. Both sides are nicely preserved.

Ex: Dallas Signature (Heritage, 10/2009), lot 532. NGC ID# 23WZ, PCGS# 95567

BARBER QUARTERS

1896-O Barber Quarter, MS67 Tied for Finest Certified

4637 1896-O MS67 PCGS. While most collectors, novice and advanced, recognize the 1896-S as an important rarity in the Barber quarter series, its New Orleans Mint cousin is every bit as elusive in top condition, especially with a sharp strike. In fact, David Lawrence, in *The Complete Guide to Barber Quarters*, second edition, gives the date an R.6 rarity rating in Mint State. This Superb Gem is a memorable coin that is tied with two others (one each at PCGS and NGC) for the finest certified of the issue (3/16). Nearly every design feature is boldly rendered, including the star radials, Liberty's hair strands, and the eagle's feathers; only the arrow fletchings near the eagle's claw show slight weakness. The central regions display creamy luster, complementing peripheral hues of gold, magenta, and electric-blue around the obverse and a narrower ring of the same color palette on the reverse. An impressively preserved example.

Ex: ANA Signature (Heritage, 8/2007), lot 1658; FUN Signature (Heritage, 1/2009), lot 3781; Baltimore Auction (Bowers and Merena, 11/2009), lot 743; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98412. NGC ID# 23Y8, PCGS# 5614

1901-S Quarter, Originally Toned VF20 Seldom Encountered Any Finer

4638 1901-S VF20 PCGS. An unrecognized rarity in its immediate post-mintage years, nearly all examples of the 1901-S entered circulation without foreknowledge or regard for its impending status as the hands-down key to the Barber quarter series. Just 72,664 pieces were struck, and the West Coast commerce easily assimilated the scant mintage.

This attractive survivor is especially sharp for the assigned grade, with bold definition on the central devices with all of the letters of LIBERTY fully visible (or nearly so). The rims and dentils on both sides are deeply struck and ideal for the VF grade. Rich gunmetal-gray toning covers both sides, with areas of deep charcoal gray in protected areas of the raised motifs. Exceedingly nice for the assigned grade, and deserving of the strong demand this pleasing coin will undoubtedly receive. Population: 5 in 20, 69 finer (2/16). NGC ID# 23YR, PCGS# 5630

STANDING LIBERTY QUARTERS

**1916 Standing Liberty Quarter
MS63 Full Head
Lightly Toned and Appealing**

4639 1916 MS63 Full Head PCGS. The 1916 Standing Liberty quarter is a sought-after key in all grades, but since the issue was released into commerce amongst a flood of 1917-dated pieces, there was little immediate recognition of its scarcity. Thus, most survivors are in various circulated grades. Per J.H. Cline, a few original rolls of Mint State pieces were broken up in the 1950s, and the coins were readily absorbed into the market. Other small groups of Mint State 1916 quarters originated in the stocks of a few early 20th century coin dealers such as Henry Chapman, John Zug, and John B. Boss. It is likely that the majority of these coins lacked Full Head definition. Cline writes of this issue in *Standing Liberty Quarters*, fourth edition: "3% or less struck with Full Heads." With a scant mintage of 52,000 coins, the scarcity of high-grade Full Heads is understandable. This Select example is well-defined for the issue with satiny luster and light golden toning. Trivial, grade-limiting abrasions are not overly obvious.

From The Somerset Collection. NGC ID# 2AMV, PCGS# 5705

**1916 Standing Liberty Quarter
MS65 Full Head
Sought-After, Low-Mintage Key**

4640 1916 MS65 Full Head NGC. From a remarkably low 20th century mintage of 52,000 pieces, the 1916 Standing Liberty quarter is an acknowledged key to the series. First-year type collectors have no other option to choose from, as no quarters were struck at the branch mints in 1916. The Type One design was modified the following year to cover Liberty's torso with a coat of chain mail, another important consideration for type purposes. Thus, the 1916 is prized by collectors of several different collecting disciplines and examples are always in high demand.

The present coin is a delightful Gem, with sharply detailed design elements, including Full Head definition and just a touch of softness on some shield rivets. The well-preserved surfaces are brightly lustrous, with a few hints of golden-tan toning. Census: 51 in 65 (1 in 65+ Full Head, 2 in 65 ★). NGC ID# 2AMV, PCGS# 5705

1916 Standing Liberty Quarter MS66 Full Head Intense, Mint-Fresh Luster

4641 1916 MS66 Full Head PCGS. The rarity of the 1916 Standing Liberty quarter is largely due to neglect on the part of the Mint, whose singular focus for much of the year was devoted to the new Mercury dime and Walking Liberty half dollar issues. By the time those designs were tweaked and tweaked again, the Standing Liberty quarter design was in danger of not being released at all in 1916, since various Mint officials still had a list of adjustments that they wanted to make to the hubs before regular production could be commenced. To avoid a failure to launch the new design as planned, the decision was made in December to use the existing dies (which lacked the officials' proposed changes) to hastily produce a token quantity of P-mint 1916-dated pieces of the new type. Numismatic researcher and historian, Roger Burdette, writes in *Renaissance of American Coinage 1916-1921*:

"Most of the changes various officials wanted were made to the new quarter, but applied to hubs dated 1917 by either [George T.] Morgan or [Charles] Barber [Mint assistant engraver and chief engraver, respectively]. The obverse was completely redesigned and the mint's reverse was strengthened, this creating a second variety of the new coin before it had been officially issued."

The 1916-dated coins were officially released alongside the first 1917-dated pieces in early January, with the two issues differing in several respects as to their respective variations of the Standing Liberty design. Most prominently, the 1916 is much softer overall than is the 1917, readily apparent in the obverse stars and shield lines, which are indistinct on the earlier issue but sharp on the later. Moreover, on the 1916, Liberty's head crowds the upper border of the coin, creating what appears to be a split in the reed and bead pattern that circumnavigates the periphery, while on the 1917 issue, the border pattern is intact. The 1916 gown is wider at the extreme bottom left (facing) of the coin, appearing to touch both the outside of Liberty's foot and the sideboard of the gate through which she strides, and her toe overlaps the top of the pedestal, where it does not on the 1917. Minute differences are also discernable in olive leaves, Liberty's hair style, and the drapery from the outstretched arm.

Students of the Standing Liberty series often identify the 1916 and 1917 Type One issues as two distinct types, a distinction that puts even greater pressure on high-grade examples of the earlier issue, which are already prized rarities. This representative is a notable coin within the MS66 Full Head grade, not only for its impeccably well-preserved, original surfaces but also for the intense mint-fresh luster that enlivens both sides to a degree that is downright rare on the 1916 issue. Liberty's head shows the appropriate detail, and a few minute ticks on the obverse around Liberty's outstretched arm are almost inconsequential in the shadow of this coin's captivating cartwheel effect. Lovely pastel hues are illuminated on each side in shades of lavender-blue, pale olive-gold, and lilac. A truly stand-out coin among the finer-known examples of this coveted series key. Population: 18 in 66 (1 in 66+) Full Head, 5 finer (3/16). NGC ID# 2AMV, PCGS# 5705

1918/7-S Quarter, Choice AU Partially Lustrous and Pleasing

4642 1918/7-S FS-101 AU55 PCGS. The San Francisco Mint produced more than 11 million quarter dollars in 1918, but strike quality was lacking from most of the mintage. Surviving 1918-S Standing Liberty quarters are extremely rare with full details, and examples of the 1918/7-S *Guide Book* variety — here represented — are unknown with such. In fact, the overdate is the most poorly struck issue in the series. Even the few pieces designated as Full Head are obviously weak in other areas. For this reason, there is not much of a gain in eye appeal between the upper AU grade levels and the lower Mint State designations. For the budget-conscious collector seeking as much sharpness as possible, this Choice AU example would be a showcase coin in a quality collection. The surfaces are bright and satiny, and the relief elements show little friction. Liberty's head and the shield have expected weakness, but the overdate feature is bold. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1918-S Standing Liberty Quarter MS66 Full Head Nice Registry Set Candidate

4643 1918-S MS66 Full Head PCGS. The 1918-S is a challenging issue in Full Head grades, and such coins are extremely rare as fine as MS66. J.H. Cline wrote: "Perhaps less than three percent of these were struck with real Full Heads." Specialists well-know the challenge of locating a well-struck 1918-S, as production at the San Francisco Mint during this period was lacking significant quality control. Besides inadequate striking pressure, many working dies were used well-beyond their normal life expectancy, which further inhibited the production of sharp strikes.

This magnificent coin is among the finest at PCGS. Liberty's head is fully defined and the date numerals are bold. The shield rivets and the central eagle exhibit some of the characteristic softness. This piece was struck from heavily clashed dies; the upper-left obverse and much of the reverse show fine die striae, the telltale result of a mint-effort to remove these clash marks. Clash marks were especially prominent on San Francisco Standing Liberty quarters from this point through the end of the series. This piece is well-preserved and lightly toned in pastel hues. Population: 14 in 66 (3 in 66+) Full Head, 1 finer (3/16). NGC ID# 2439, PCGS# 5725

1919-S Quarter, MS64 Full Head Semikey Date, Rare This Sharp

4644 1919-S MS64 Full Head PCGS. CAC. The 1919-S is among the most elusive dates in the Standing Liberty quarter series in Full Head grades. As J.H. Cline wrote (2007): “Full Heads of this date are very rare and would be closely paralleled with the value of the 1916, and very difficult to locate.” Certified examples are mostly clustered in the MS63 and MS64 grades with few finer and few lesser. One of the last Choice PCGS Full Heads we offered was in lot 3930 of the Long Beach Signature sale (Heritage, 6/2015), which realized \$24,675.

This piece is uncommonly sharp, including the eagle’s feathers, the date, Liberty’s head, and the shield, which shows at least partial definition of each rivet. Satiny surfaces are free of major abrasions and display soft champagne toning. Population: 29 in 64 (6 in 64+) Full Head, 21 finer (3/16). NGC ID# 243D, PCGS# 5733

1921 Quarter, MS66 Full Head Full Shield and Bold Date

4645 1921 MS66 Full Head PCGS. The 1921 is a well-known key issue in the Standing Liberty quarter series and is especially sought-after in Mint State. Unlike many other issues, Full Head 1921 quarters typically also have full shield details, as seen on this Premium Gem. But the 1921 does suffer from frequently flat date numerals and Liberty’s head often is weak at the temple, even on Full Head coins. This example has above-average strength in the date numerals, and the head detail is what J.H. Cline would have referred to as “immaculate.” A splendid representative, this piece has frosty luster and nearly pristine surfaces with mottled gold and pale blue toning. Only three finer examples are certified at PCGS and NGC combined. Population: 22 in 66 (2 in 66+) Full Head, 2 finer (3/16). NGC ID# 243H, PCGS# 5741

1923 Quarter, MS67 Full Head Rare, Among the Finest at PCGS

4646 1923 MS67 Full Head PCGS. In Superb Gem Full Head, the 1923 Standing Liberty quarter is arguably rarer than its key-date San Francisco counterpart. PCGS has seen six 1923 submissions in MS67 Full Head (one in MS67+) and none finer; the comparable grade of the 1923-S totals nine coins at that service (3/16). Over the past two-plus decades, we have offered a 1923-S in MS67 Full Head on 11 occasions, but the 1923 on only eight.

This top-grade 1923 PCGS coin displays frosty original luster with a slight iridescent hue. There is an olive-colored spot above Liberty's shoulder and a strip of russet through the eagle's left (facing) wingtip. The strike is sharp throughout the shield, head, date, eagle, and stars. There are no mentionable abrasions. NGC ID# 243J, PCGS# 5743

1927-S Quarter, MS65 Rare CAC-Endorsed Gem Underrated So Fine

4647 1927-S MS65 PCGS. CAC. The 1927-S is a famous Standing Liberty quarter key, particularly in Mint State. Yet, non-Full Head coins in Gem and finer grades are underrated, as most of the heraldry of this issue is focused on the rare Full Head coins. Non-Full Head Gems are ideal for collectors who find the Full Head pieces to be unobtainable.

The frequency of auction appearances in MS65 and finer is somewhat less than one would expect if the certified population data are correct. CAC-endorsed coins at this level are particularly rare, offering the astute specialist an outstanding opportunity to acquire a rarity at a somewhat accessible price level. This PCGS-CAC Gem is frosty and lustrous with a hint of light golden toning around the edges. Although not full, Liberty's head is significantly sharper than typical, a characteristic that the shield and stars share. There are no distracting abrasions. Faint die striations in the fields remain from an attempt to remove clash marks from the dies at the Mint. An outstanding coin in every respect. Population: 44 in 65 (2 in 65+), 37 finer; CAC: 5 in 65, 9 finer (3/16).

From The Somerset Collection. NGC ID# 243W, PCGS# 5764

EARLY HALF DOLLARS

1794 Flowing Hair Half, VF25 O-101, Attractive Collector-Grade Example

4648 1794 O-101, T-7, High R.3, VF25 NGC. Tompkins Die State 1/3. The most available die pair (by far) for the 1794 Flowing Hair halves, one of 11 die marriages required for the issue with a reported mintage of 23,464 pieces. Half dollars were authorized by the Act of April 2, 1792, but no half dollars were struck until December of 1794 and just 5,300 pieces were delivered in the calendar year of issue. Others were delivered in 1795.

Less celebrated than the showpiece 1794 dollars, the half dollars were a backbone of early circulating U.S. coinage and Uncirculated examples are rare. The O-101 (T-7) variety is the only die pair with Uncirculated examples available to collectors. This piece saw moderate circulation, but retains nice definition on the motifs and the date is sharp. The reverse rim is unusually high and well-formed. Lovely silver-gray toning deepens slightly at the borders, with abrasions lessened by wear. An appealing, collector-friendly example. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 Flowing Hair Half Dollar, XF40 O-101a, Important First-Year Example

4649 1794 O-101a, T-7, High R.3, XF40 PCGS. Star 1 pierces the lowest curl, star 8 is far from the Y in LIBERTY, and the F in OF is far from the leaf. The die state shows a crack from the rim through (O)F that continues faintly to the final S in STATES. It has long been thought that 1794 half dollars were struck to the extent of 23,464 coins. One delivery on December 1, 1794 comprised 5,300 coins, while another on February 4, 1795, included 18,164 coins. However, it is possible that the second delivery contained only 1794 half dollars, some percentage of 1794 half dollars, or no 1794 half dollars. While the actual mintage is impossible to know with certainty, researchers like Steve Tompkins believe between 650 and 800 examples survive in all. Only a handful are finer than the coin offered here.

This eminently appealing XF Flowing Hair half dollar showcases light gray centers and a ring of olive patina that encircles the peripheries. The piece is well-centered with complete dentilation and full legends. Liberty's hair curls are boldly rendered, as are the eagle's wings. Thin file marks appear at the centers, but the only noteworthy post-Mint distractions occur in the form of two small marks in front of and below the portrait. An exceptional representative of this important issue. Population (all varieties): 5 in 40, 17 finer (3/16). NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, VF Details Very Rare O-110, Possibly Finest Known

4650 1794 O-110, T-9, R.7 — Repaired — PCGS Genuine. VF Details. Herrman's Autumn 2015 revision states that nine examples of O-110 are known. This very rare variety is distinguished by a somewhat horizontal die break that extends from the left (facing) wing to the border at 2 o'clock, across the eagle's head and the upper right portion of the wreath. Of those nine survivors, all but one are in Good or lower grades, and several are impaired. The finest listed is an Uncertified Fine 12 with "scattered marks and light scratches" per its January 1992 catalog description. The present piece, previously misattributed as an O-103, is considerably sharper and would be regarded by many as the new finest known for O-110. Designated as repaired by PCGS, but although both sides display hairlines, any smoothing is difficult to discern. Visible marks are confined to three thin lines from star 6 down to the hair. Cream-gray centers and fields are framed by sea-green and plum-red borders. NGC ID# 24E6, PCGS# 39212 Base PCGS# 6051

1795 Flowing Hair Half, Sharp MS62 O-104, Two Leaves, High Condition Census

4651 1795 2 Leaves, O-104, T-24, R.4, MS62 NGC. This is an unusually appealing Flowing Hair half dollar — devoid of adjustment marks or significant abrasions of any kind, with remarkably smooth and unblemished surfaces for the grade. Striking definition is equally superb; Liberty's hair strands are boldly defined, and above-average sharpness is evident on the eagle's breast and head. The border denticles show impressive boldness around each side, and the wreath leaves are sharply delineated. Both sides exhibit consistent lavender-gray and olive-gold hues that blend amid deeper gunmetal-gray accents, the lighter colors most clearly revealed when tilted beneath a light.

The absence of adjustment marks is particularly significant for the O-104 (Tompkins-24) variety because the finest O-104, an MS63 coin, is heavily adjusted across the portrait. This MS62 example appears to rank second in the Census for the variety according to both the Stephen Herrman and Steve Tompkins listings, although it is only recently holdered as such. Struck from a late state of the dies as described by Tompkins Die State 3/3, the 7 in the date shows bold recutting as does the M in AMERICA.

For the Flowing Hair motif, it would be difficult to find a more suitable example than the present coin; a lack of adjustment marks, bold detail, and attractive Mint State surfaces deliver a degree of appeal that is seldom seen on any example of this type, regardless of variety. The coin is sure to please even the most discerning enthusiast.

Ex: October Sale (Stack's, 10/1997), lot 649; The Eugene H. Gardner Collection Part IV (Heritage, 10/2015 as MS61 NGC), lot 98626. NGC ID# 24E7, PCGS# 39219 Base PCGS# 6052

1795 Flowing Hair Half Dollar, AU53 Attractive O-105, T-25 Example

4652 1795 2 Leaves, O-105, T-25, High R.3, AU53 NGC. A substantial mintage of 317,844 Flowing Hair half dollars was accomplished in 1795, with 31 die varieties known for the date. This coin represents the O-105 variety, with two points of star 1 touching the first curl and the berries in a 10x7 pattern on the reverse. This piece is from a late state of the die, with a die crack passing through the right serifs of I in UNITED. Only light wear shows on the devices and the lightly abraded surfaces retain traces of original mint luster. Highlights of lavender, violet, and golden-brown toning add to the considerable eye appeal. Census (for the variety): 1 in 53, 2 finer (3/16). NGC ID# 24E7, PCGS# 39220 Base PCGS# 6052

1796 16 Stars Half Dollar, O-102 Well-Defined VF Details Late Die State Obverse

4653 1796 16 Stars, O-102, T-2, High R.5 — Plugged, Tooled — NGC. VF Details. The Draped Bust Small Eagle half dollar design type, bearing the dates 1796 or 1797, is one of the most coveted U.S. type coins. Its minuscule mintage of 3,918 pieces and low survival rate of fewer than 300 known examples make it one of the most costly and difficult type coin to acquire. This VF Details specimen displays grayish toning imbued with whispers of soft bluish-purple and brownish-tan. The design elements exhibit relatively strong detail, including numerous strands in Liberty's hair and feathers in the eagle's wings. The only marks of note are two small digs in the rim above BE in LIBERTY that help to identify the coin. A hole at 12 o'clock on the obverse has been neatly plugged, and the letters ER and the denominator 2 on the reverse reengraved.

This piece is a new discovery since the December 2012 Heritage-published book titled *The Draped Bust Half Dollars of 1796-1797*. Another noteworthy aspect of the present coin is that its obverse is a later die state, showing a crack from the rim through the first four stars. Only about one-third of the known 1796 16 Star half dollars exhibit this crack. The remaining two-thirds of known specimens are from an early die state that lack the crack. The plug and tooling notwithstanding, this coin will fit comfortably in a mid-grade type collection. Moreover, it may very well be of interest to the specialist collecting by die state.

1797 Half Dollar, Original Fine 12 The Rare O-102 Variety

4654 1797 O-102, T-2, Low R.6, Fine 12 PCGS. Amato-523. Any 1797 Draped Bust Small Eagle half dollar appearing at auction is cause for excitement. An example of this 1796-1797 two-year design type half dollar is a “must have” coin to complete a type set of United States coins. Needless to say, it is usually missing from all but the most advanced type collections. Moreover, it is necessary to complete a date or variety collection of early half dollars. Additionally, the 1797 O-102 is the rarest of the four known Draped Bust Small Eagle half dollar varieties.

The present Fine 12 example will satisfy the requirements of the most discriminating collector. Its two-toned gray surfaces display slightly darker fields that highlight lighter gray devices, yielding a pleasing, subtle contrast over each side. The design elements are well-defined over both obverse and reverse, each of which is free of mentionable marks. A few light toning streaks are visible on the obverse, but do not detract in the least from the coin's overall eye appeal.

It is unlikely that one will be able to locate a more desirable, original, mid-grade example of this coveted piece of Americana. Our research indicates that one-third or more specimens of the 1796-1797 half dollar exhibit one or more impairments. Problem-free examples in this level of preservation appear only infrequently. The successful bidder for this coin will be pleased to include it in his/her collection.

Ex: FUN Signature (Heritage, 1/2007), lot 955. NGC ID# 24EC, PCGS# 39266 Base PCGS# 6060

1806 Half, O-111a, MS61 6 Over Inverted 6, Intermediate Die State

4655 1806 6 Over Inverted 6, O-111a, T-11, R.4, MS61 PCGS. The popular 6 over Inverted 6 variety, in this instance an intermediate die state with a rim break over TED but only a crack over U. The Overton-111 is the middle die pair in a four-marriage. The obverse is used later for O-112, while the reverse was first used for O-110, and also for O-127.

Reflective surfaces are visible beneath variegated gray, rose, sea-green, and lilac toning on both sides. The strike is typically weak at the drapery and right (facing) wing. A few minor scrapes and abrasions are evident on each side, including a thin, shallow mark on Liberty's neck. Excellent luster remains across both sides, glowing ember-orange at the centers.

Eventually, the grading services will provide more accurate information by die pair and die state that will be more useful to determine the true rarity of this coin and others that share the 6 over Inverted 6 obverse. Die state is equally important in determining value.

Ex: Michael Summers (8/1999); FUN Signature (Heritage, 1/2008), lot 1376; privately from Premium Numismatics (1/2008). NGC ID# 24EL, PCGS# 39337 Base PCGS# 6078

1806 Draped Bust Half Dollar, MS63 O-120, Pointed 6, Attractive Toning

4656 1806 Pointed 6, Stem, O-120, T-28, R.3, MS63 PCGS. Tompkins Die State 1/1. Struck from an early die stage, although the obverse die shows extensive die clashing and cracking. The reverse die is an intermediate state with a nearly perfect die, showing a light crack above the first A in AMERICA but no signs of die chipping on the vertical shield stripes and no die crack above UNITED. Attractive aquamarine tones at the margins merge with peach-gold and warm-gray shades over the central devices, with nice mint luster shining through the natural patina on both sides.

The strike is sharp save for minor blending at Liberty's highest hair strands and at field star 12 above the central scroll section, where a glass reveals a few light adjustment marks. The only other marks of note are a pair of shallow lines from near star 11 to the neck area. Among the finest for the O-120 variety in this Select Uncirculated condition — tied for third in the Condition Census listings by Parsley, Herrman, and Tompkins. Population (all Pointed 6, With Stem varieties): 11 in 63, 17 finer (3/16). NGC ID# 24EJ, PCGS# 39325 Base PCGS# 6071

1807 Draped Bust Half Dollar, MS65+ Second Finest at PCGS Condition Census O-105 Example

4657 1807 Draped Bust, O-105, T-4, R.1, MS65+ PCGS. CAC. Tompkins Die State 3/2. A rare, high-end type coin from the final year of the Draped Bust design. The only Draped Bust halves that are marginally available in Mint State for type collectors are the 1806 and 1807, and these are also the only dates in the series that exist in any meaningful quantity — even if small — at the Gem level. This Plus-graded 1807 is effectively the sole second-finest at PCGS, and it is a high Condition Census example of the O-105 die pairing. The only finer examples of the variety are an MS66 NGC coin and the D. Brent Pogue MS66 PCGS example (Stack's-Bowers, 5/2015), lot 1115, which realized a staggering sum of \$152,750. NGC lists one additional MS66 coin, an O-110 example that last appeared in our FUN Signature sale (Heritage, 1/2016), lot 5363.

This high-end MS65, however, carries the distinction of being one of only two Gems with a CAC endorsement — something not awarded to any finer example of the variety or date. This piece is also the first PCGS-graded Gem regular-issue 1807 half we have ever offered at auction, even though PCGS lists seven other non-Plus-graded MS65s (3/16). This coin displays a razor-sharp, even strike that defines all peripheral stars and the central reverse eagle and stars. Liberty's portrait is equally bold. This frosty, lustrous coin showcases original mint luster. The interiors have light champagne toning, but the peripheries exhibit deep russet and gunmetal-blue hues that attractively frame the devices. Only a few trivial ticks are seen under a loupe. This die state shows both dies clashed with faint peripheral cracks. Later states of the reverse exhibit advanced deterioration, as this is that die's only use. The obverse was later employed for O-106 and -107. An outstanding coin that is sure to attract competitive bidding when it crosses the auction block. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

BUST HALF DOLLAR

1829 Small Letters O-112 Half, MS65+ Top-Notch Surface Preservation

4658 1829 Small Letters, O-112, R.1, MS65+ PCGS. The obverse of this available variety is most readily distinguished, in the early die stages as here, by a patch of five or so diagonal die lines between the 9 in the date and star 13. Star 7 points to the upper half of a dentil and the top of a curl. The reverse shows a large 50 C with the 0 smaller than the 5 or C and line 6 in the shield solid. The I in PLURIBUS is a touch left of the center of T2. This MS65+ coin boasts top-notch eye appeal, displaying excellent luster throughout both sides. Rose-gray and blue-tinged rim patina on the obverse cedes on the reverse to ivory-gray, amber-gold, russet, and more blue. A few faint ticks on Liberty's chin and the denomination are all insignificant but among the only noticeable marks on this extremely well-preserved coin. An MS65 example of this variety, certified in a PCGS green-label holder, was lot 3803 in our Long Beach Signature (Heritage, 5-6/2012), where it realized \$9,775. NGC ID# 24FS, PCGS# 39795 Base PCGS# 6154

REEDED EDGE HALF DOLLAR

1836 Reeded Edge Half Dollar, MS64 GR-1, Condition Census Representative

4659 1836 Reeded Edge, GR-1, R.2, MS64 PCGS. The Thonnelier steam press was installed at the Philadelphia Mint in 1836, and used to coin a few copper medalets early in that year. The modified-design Capped Bust, Reeded Edge half dollars were among the first regular-issue coins struck using the new technology. This Choice Mint State half dollar ranks high on the list of known survivors from a limited mintage of slightly more than 1,200 coins. Both sides have mottled gold and violet-gray toning with iridescent accents of blue, green, and rose. Softly frosted mint luster shines through the original patina. The relief elements are well-detailed but display incompleteness over the hair curls, lower stars, and the eagle's left wing feathers. This lovely near-Gem presents the advanced specialist with the chance to acquire one of the finest examples of this low-mintage key date issue. Population: 6 in 64 (1 in 64+), 0 finer (3/16). NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

PLATINUM NIGHT

PROOF REEDED EDGE HALF DOLLAR

1839-O Reeded Edge Half Dollar, GR-1, Branch Mint PR65 Finest of Four Examples Known

4660 1839-O PR65 NGC. GR-1. Ex: Robison. The 1839-O proof half dollar is a mysterious, little known rarity from the second year of operations at the New Orleans Mint. The issue is often compared to its more famous predecessor, the 1838-O half dollar, which is one of the marquee rarities in American coinage. The two issues have much in common, as both were produced in proof format, ostensibly at the newly established New Orleans Mint. The same reverse dies were used to coin both issues, and both obverse dies featured the prominent O mintmark, characteristic of this short-lived two-year design type. The histories of these two issues diverged broadly shortly after their production, however, as the 1838-O became one of the most celebrated issues in the U.S. series, while the 1839-O languished in obscurity.

This lack of recognition may stem from the fact that the 1839-O proofs were accompanied by a large business-strike emission, while the 1838-O was never struck in regular-issue format. The 1839-O proof is actually a much rarer issue, with only four confirmed survivors, compared to at least nine examples of the 1838-O. The 1839-O is so rare that it has been out-of-sight, out-of-mind in the numismatic community for most of its history. Although the four confirmed examples have all appeared at auction in recent years, precious little has been written about them, and much of the published information is ambiguous or questionable.

When Walter Breen studied this issue for his proof reference in the 1970s, he made mention of a specimen he examined in the Philip Straus Collection that was struck in medal turn, with the devices aligned in a 360 degree rotation. By the time he wrote his *Complete Encyclopedia* in 1988, he believed that all examples were struck in medal turn. This is definitely not the case for the four examples we have tracked in our roster below, all being struck in the normal 180 degree coin turn. The Straus example has never surfaced, and we are convinced Breen must have been in error about the die alignment.

It was always believed that the 1839-O proofs were all coined at the same time, since they were struck from the same dies. Comparing the four coins that have appeared at auction recently casts some doubt on that piece of conventional wisdom, as well. The coin in lot 2163 of the Long Beach Signature Auction (Heritage, 9/2008) shows incomplete detail in the hair around Liberty's ear, and the stars appear spindly and small when compared to the devices on the other specimens in the roster. The coin is sharply struck, but the dies themselves seem to lack the fine detail seen on the other coins. This is probably the result of lapping, to remove die cracks or clash marks. The proof dies were used to strike regular issue coins as well as proofs in 1839. It seems likely that some proofs were struck from newly delivered, polished dies. Then the dies were used in business-strike production, developing some cracks or clash marks, and subsequently lapped and polished before striking a few more proofs. No records were kept of specific proof strikings during this period, so it is impossible to say exactly when the 1839-O proofs were struck. Interestingly, the reverse of this specimen appears to be in an earlier die state than in its use on the 1838-O half dollar in the Smithsonian Institution, which shows more advanced die cracks. We know the obverse dies were not delivered until March 1839, and the reverse dies were effaced on February 21, 1840, so there is no possibility of a restrike issue at a later date.

The present coin is a magnificent Gem, with a razor-sharp strike that imparts fine definition to each individual hair strand in Liberty's curls. All the stars have full centrils and the date is bold. The mintmark is double-punched, with the extra outline showing along the lower curve. The reverse is equally sharp, with exquisite definition on the eagle's feathers and talons. The surfaces are toned in iridescent shades of blue, champagne-gold, russet, green, and violet in a stunning play of colors. The fields are brightly reflective under the patina, and show only the most insignificant signs of contact. Visual appeal is terrific. This coin is the finest known specimen of this rare and important proof issue and it should find a home in the finest collection of Capped Bust, Reeded Edge half dollars.

Census of Proof 1839-O Half Dollars

This census contains the four distinct proof 1839-O half dollars known, as well as three earlier, untraced sightings that may or may not correspond with those below.

- 1. PR65 NGC.** Ellis Robison Collection (Stack's, 2/1982), lot 1607; Queller Family Collection (Stack's, 10/2002), lot 448; Pre-Long Beach Sale (Ira and Larry Goldberg, 2/2008), lot 2177; Long Beach Signature (Heritage, 2/2012), lot 3633, realized \$299,000; **the present coin.**
- 2. PR64 NGC.** Salisbury/Woods Collections (Bowers and Merena, 9/1994), lot 1214; Baltimore ANA Signature Auction (Heritage, 7/2008), lot 1690; FUN Signature (Heritage, 1/2013), lot 5645, realized \$123,375.
- 3. PR63 NGC.** Krouner Collection (Lester Merkin, 2/1971), lot 736; Public Auction Sale (Stack's, 9/1992), lot 358; George Byers Collection (Stack's, 10/2006), lot 1098; Long Beach Signature Auction (Heritage, 9/2008), lot 2164; Los Angeles Signature Auction (Heritage, 7/2009), lot 1119. The Breen *Proof Encyclopedia* Plate Coin.
- 4. PR62 NGC.** Long Beach Signature Auction (Heritage, 9/2008), lot 2163; Central States Signature (Heritage, 4/2009), lot 2462.

Additional Appearances

A. Proof. F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 5/1945), lot 411; Christian Allenburger (B. Max Mehl, 3/1948), lot 1936; R.E. Cox (Stack's, 4/1962), lot 1875. Walter Breen believed these descriptions were all of the same coin, but the first two appearances were not plated, and the catalogers of the Cox specimen report that the consignor was told it was the Allenburger coin, but they could not verify that claim. The plate of the Cox coin shows an unsightly planchet void near the eagle's head. Considering the painstaking process employed in striking proofs of this era, it seems unlikely that the coiners would select a damaged planchet to strike a proof coin. The Cox specimen may be a prooflike business-strike.

B. Proof. An unverified example that Breen reported in the Philip G. Straus Collection, circa 1951. The coin remains unseen since that time and is likely one of the four listed above.

C. Proof. A piece in the Kagin reference collection, observed by Q. David Bowers in the 1950s. Probably an earlier appearance of one of the coins above.

D. Branch Mint SP62. Chicago ANA Convention Auction (Stack's Bowers, 8/2015), lot 10108, realized \$105,750. Cataloged as a specimen striking by PCGS and the plate does not match any of the coins in the main roster. Possibly a reappearance of one of the Additional Appearances above. PCGS# 6253

SEATED HALF DOLLARS

1839 No Drapery Seated Half Lightly Toned, Select Uncirculated

4661 1839 No Drapery, WB-101, MS63 NGC. An essential issue for type and Seated Liberty specialists alike, the 1839 No Drapery halves are scarce-to-rare in better Uncirculated grades. Despite many so-called No Drapery issues in the series, the 1839 is the only true representative of Gobrecht's intended design. The others are a function of die state.

Star 1 is close to the rock, a key pick-up point to differentiate the variety from the much more available 1839 With Drapery halves, and an important identifier for distinguishing imposters with drapery removed. Blue toning accents invigorate the central portrait of this orange-gold Select coin, with a crisp strike on the obverse and only minor incompleteness at the eagle's leg. Soft mint luster glows beneath the attractive patina. Census: 7 in 63 (1 in 63+), 9 finer (3/16). NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

1842 Small Date Half, MS65+ Finest Certified at PCGS

4662 1842 Small Date, Large Letters, WB-101, MS65+ PCGS. The 1842 Small Date half dollar is significantly scarcer than its Medium Date counterpart, and is genuinely rare in Mint State. This example is one of only two Gems certified by PCGS and is the only one awarded a Plus designation, with none numerically finer; NGC has seen four MS65 coins, also with one finer (3/16). Both sides display frosty sun-gold luster, with hints of lilac and pale lavender also present. The strike is bold and the surface preservation is exceptional. The reverse is extensively cracked, as is typical of this variety, with peripheral cracks connecting UNITED STATES OF, and radial cracks extending through the olive leaves and along the left side of the O in DOL. NGC ID# 24GT, PCGS# 572011 Base PCGS# 6240

1844 Seated Half, MS65 ★ Finest at Either Service

4663 1844 WB-101 MS65 ★ NGC. The date is positioned far left, with the 8 repunched south plus slight repunching on the first and second 4s. Not a recognized variety in the 1993 Wiley-Bugert reference, the fields are semiprooflike on both sides and the motifs display a full strike. Needle-sharp star centers and full details on Liberty's hair strands and facial features join full feathers on the eagle except for minor incompleteness on the left (facing) talon.

Pleasing gold toning deepens slightly at the margins, with mint luster shining softly across the reflective surfaces and the similarly toned, lightly frosted devices. A few tiny marks are visible with a glass but they are entirely inconsequential. This coin is the sole MS65 with the NGC Star designation. Neither NGC nor PCGS report a finer 1844 half. Census: 3 in 65 (1 in 65 ★), 0 finer (3/16). PCGS# 572025 Base PCGS# 6245

1859 Seated Liberty Half, MS67 Single-Finest Certified at PCGS Ex: Gardner

4664 1859 Type One Reverse, WB-101, MS67 PCGS. From a mintage of 747,200 pieces, the 1859 Seated Liberty half dollar is an underrated Philadelphia issue. This delightful Superb Gem is an exceptional example both technically and aesthetically, the single-finest certified survivor at PCGS (2/16). The virtually pristine surfaces display an amazing iridescent patina that needs to be seen in hand to be fully appreciated. Violet, pink, lime-green, and lemon-gold shades progress from the rims to the frosted central design elements. A full strike attends the virtually mark-free fields and devices, with only a few microscopic marks showing any evidence of coin-to-coin contact or handling. Gleaming mint luster bolsters the impressive coloration. In their book (1993) Wiley-Bugert state that most 1859s are fully struck and without significant die cracks or other such anomalies. This coin fulfills that description beautifully. Population: 1 in 67, 0 finer (2/16).

Ex: Heritage Auctions; Eugene Gardner, purchased privately in 2003; Gardner Collection, Part III (Heritage, 5/2015), lot 98476 (as NGC MS67), realized \$18,212.50. NGC ID# 24HY, PCGS# 572128 Base PCGS# 6296

CONFEDERATE STATES OF AMERICA

1861 Scott Restrike Half, MS64 Flashy Color and Luster

4665 1861 Scott Restrike MS64 PCGS. CAC. This is one of the most attractive Scott Restrike half dollars to cross our paths at Heritage in recent memory. Many of these coins, even when Uncirculated, show a dull gray color or mentionable aesthetic impairments of one sort or another. Not so this coin, boasting flashy luster throughout. The obverse features a honey-gold center bounded by glints of steel-blue and sunset-orange; the reverse displays a pastel violet patina with golden accents. Even despite the curious striking circumstances that cause the obverse to be always weakly detailed, this is a special example of this historic issue. Listed on page 412 of the 2016 *Guide Book*. Population: 9 in 64, 1 finer. CAC: 5 in 64, 1 finer (3/16). NGC ID# 2C4R, PCGS# 340402

SEATED HALF DOLLARS

1873 No Arrows, Open 3 Half Dollar, AU58

4666 1873 No Arrows, Open 3, WB-101, AU58 PCGS. The Seated Liberty half dollar underwent several minor design changes in 1873, with a total of three different subtypes for the year. The first type featured a Close 3 in the date, which Chief Coiner A. Loudon Snowden complained was easily mistaken for an 8. The logotype was restyled to display an Open 3, to avoid confusion. When the Mint Act of February 12, 1873, instituted a change in weight for all silver denominations except the silver dollar, the engraver added arrows at the date to signify the change. The 1873 Open 3, No Arrows half has a low mintage of 214,200 pieces, much smaller than the production totals of either of the other types from the Philadelphia Mint.

In addition to its low mintage, the Open 3, No Arrows issue has a low survival rate. It seems that few examples were released into circulation before the weight change took effect in February, and the coins that were still on hand were melted to provide bullion for the new With Arrows issue. The 1873 Open 3, No Arrows half dollar is one of the rarest issues of the series, and Randy Wiley and Bill Bugert list it as a high R.7 variety in AU grades. The present coin is a well-detailed near-Mint specimen with a touch of softness on the upper stars that is often seen on this issue. The lightly abraded surfaces are blanketed in shades of dove-gray and blue-steel patina with hints of prooflike reflectivity clinging to the devices. Population: 1 in 58, 3 finer (3/16).

Ex: Kenneth C. Long Estate Collection (Bowers and Merena, 5/1995), lot 1110; FUN Signature (Heritage, 1/2013), lot 5649. PCGS# 572206 Base PCGS# 6337

1874-CC WB-101 Arrows Seated Half Satiny Near-Gem Example

Ex: Reed Hawn/Dick Osburn/Battle Born

4667 1874-CC Arrows, WB-101, Die Pair 3, R.4, MS64 NGC. The 10-coin run of Carson City Seated half dollars is one of the most appealing short sets of the entire federal series, as well as an enduring testament to the brief tenure of the Carson City Mint. The set challenges collectors early and often, beginning with the inaugural 1870-CC, followed by the scarce 1871-CC to 1874-CC issues.

Just 59,000 pieces were struck of the 1874-CC — the second-lowest mintage among all Carson City halves. Fewer than a dozen Choice Mint State or finer 1874-CC coins exist. Rusty Goe commented on the rarity in his reference, *The Mint on Carson Street*, saying, “Choice to Gem Uncirculated specimens [of the 1874-CC half dollar] are prohibitively scarce ... small crowds are waiting on the sidelines for every high grade specimen that enters the market.”

Three obverse dies were paired with a single reverse die to produce the 1874-CC halves. A fourth variety is actually a late state of Die Pair 3 — the dramatic Die Pair 3a “Railroad Tracks” variety, with die damage at STATES that resembles a closely grouped sequence of railroad ties. The former Dick Osburn coin is the finest Railroad Tracks variety we are aware of at MS62 PCGS.

All of the 1874-CC varieties are scarce-to-rare in MS64 or finer condition. An enigmatic MS66 coin is the finest certified example. The coin remains unseen since its certification in 2003. Close on its heels, the Eliasberg/Gardner coin grades MS65 PCGS CAC and the uncertified Queller Family Collection coin (perhaps the mysterious MS66?) occupies the third position, followed by eight MS64 coins that tie for fourth in the Condition Census.

Among the near-Gems is the current coin, an important high Condition Census piece from the early die stage of Die Pair 3 with an impressive pedigree. Satiny silver surfaces and reddish-gold border toning distinguish it from all others. The sharply struck devices show only minor imperfections, including a few light roller marks on Liberty’s left (facing) forearm and slight incompleteness at the centers of stars 5 and 6. Smooth and appealing, the coin pedigrees to Henry Chapman, the Anderson Dupont Collection, and a 1968 Lester Merkin auction prior to its later appearances in the Reed Hawn, Dick Osburn, and Battle Born collections.

PROOF SEATED HALF DOLLARS

1844 Half Dollar, PR66 Cameo

Ex: Pittman-Kaufman

The Finest of Only Four Proofs Known

4668 1844 PR65 Cameo PCGS Secure. CAC. WB-101. Soft reddish-gold patina dominates the obverse central device, turning to cobalt-blue, violet, and gold in the fields. The reverse is a lighter, more uniform champagne-gold, with just a hint of blue at the margins. A strong strike showcases intricate detail on each of the design elements, which are noticeably highlighted by the bright, mirrored fields. While a few faint hairlines, visible only under magnification, are noted in the fields, no marks that might help identify the coin for future catalogers can be identified.

The Kaufman specimen was part of the John Jay Pittman 1844 Proof Set "In Original Case of Issue" sold by David Akers Numismatics, Inc. in October 1997. Akers writes:

"The non-gold coins in the 1844 set were purchased by JJP as an original Proof set in the original case (with price list) from Abe Kosoff of Numismatic Gallery on 4/5/48 for \$400. (Almost certainly this is the set formerly owned by Dr. J. Hewitt Judd, a good friend of both JJP and Abe Kosoff.)" Akers continues: "It is likely that only 10-15 Proof sets were issued in 1844"

Randy Wiley and Bill Bugert, writing about the 1844 circulation strike and proof half dollars in their Seated half dollar reference, say of the proofs "less than 10 known." Interestingly, after more than 30 years of third-party grading, the population reports show a mere two certified examples, making this proof issue seem significantly rarer than previously perceived.

1844 Proof Half Dollar Roster

1. Proof 66 Cameo. The Kaufman specimen. Numismatic Gallery (4/1948); John Jay Pittman (David Akers, 10/1997), lot 833; Philip Kaufman. Part of Pittman's 1844 proof set. The silver coins were kept intact by Phil Kaufman until they were sold individually in our Platinum Night Signature in the FUN 2008 auction. The half dollar was lot 3026, and brought \$149,500. The Greensboro Collection, Part II (Heritage, 1/2013), lot 5658; Gardner Collection, Part I (Heritage, 6/2014), lot 30528. **The present specimen.**

2. Proof. Stack's (1/1974), lot 1437; Robison Collection (Stack's, 2/1982), lot 1622.

3. Proof. Stack's (9/1993), lot 358. Stack's described this piece as a hairlined example, although they did not plate the coin in their catalog. It is probably different from the Robison coin and is certainly not the Smithsonian or Pittman coins.

4. Proof. Smithsonian Institution.

Additional Appearances

A. Impaired Proof. Kreisberg-Schulman (2/1961), lot 2816. Not plated. Described as having "numerous tiny field scratches." It is possibly the same as the Stack's 1993 specimen. NGC ID# 27T6, PCGS# 86388

BARBER HALF DOLLARS

1892-O Half Dollar, Brilliant MS67 The Hugon-Gardner Example

4669 1892-O MS67 PCGS. The 1892-O Barber half dollar was saved to a certain extent because of its first-year status, and so despite a low mintage of 390,000 coins, examples can be procured through MS65. Finer representatives prove to be exceedingly elusive, particularly at this grade level. This New Orleans issue typically features incompleteness over the right shield / wing juncture, fletchings, and tailfeathers, but this Superb Gem displays strong detail on those areas. The right claw is a trifle soft. Each side is flashy and brilliant without a lick of toning, appealing to collectors who target coins with a mint-fresh look. Star 3 shows a touch of softness, but the obverse design elements are bold otherwise. As expected, Liberty's cheek and the fields are unmarked. A tiny tick is well-hidden by the headdress. Population: 1 in 67, 1 finer (3/16).

Ex: From the Estate of John C. Hugon; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98542. NGC ID# 27UW, PCGS# 6462

1901-S Half Dollar, MS65 Only One Finer at NGC

4670 1901-S MS65 NGC. *The Complete Guide to Certified Barber Coinage* ranks this tricky issue third in Mint State rarity, surpassed only by the 1904-S and 1896-O emissions. NGC has certified only four Gems of this date with one piece finer; PCGS has certified six pieces in MS65 and six finer (6/13).

This example offers silver surfaces lightly tinged with gold throughout, and even under a loupe there are no singularly distracting abrasions. For an S-mint coin, however, the strike is curiously soft on the right shield corner and the nearby areas. Some interesting die cracks appear on both sides, the sign of die fatigue. Census: 4 in 65 (1 in 65+), 1 finer (3/16).

Ex: Long Beach Signature (Heritage, 2/2008), lot 674, which brought \$25,300. NGC ID# 5EPB, PCGS# 6491

1904-O Barber Half Dollar, MS65 Ex: Dale Friend

4671 1904-O MS65 PCGS. CAC. Ex: Friend. This is among the few times that we have offered a Gem MS65 example of the challenging 1904-O Barber half dollar in any of our auctions since January 1993. Dale Friend's Gem is nearly equal to the Price and Eliasberg coins, and similar to the Pryor-Hugon coin in quality.

The obverse has medium gold toning that deepens slightly near the border. The reverse has lighter ivory color with peripheral gold at the upper half of the border. It is quite boldly defined with slight weakness only at the junction of the wing and right shield border. A single small mark on the cheek prevents a higher grade. Population: 5 in 65, 8 finer (3/16).

Ex: Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars (Heritage, 1/2009), lot 3894, which realized \$10,350. NGC ID# 5EPG, PCGS# 6499

1904-O Barber Half Dollar, MS66 Beautiful Color and Surfaces Ex: Duckor, Akers

4672 1904-O MS66 PCGS Secure. Ex: Duckor/Akers. Incredibly so for the issue, this Premium Gem 1904-O half is fully struck on both sides. The coin is arguably sharper than the outstanding Dr. Price specimen that David Akers said was "much more sharply struck than normally seen." The brilliant silver surfaces are incredibly smooth and free of problems, other than a few inconsequential ticks. The surfaces are highly lustrous, with satiny fields resulting from die lapping. Both sides have delicate peripheral rainbow toning, including gold, russet, violet, and blue.

This piece compares favorably to all past offerings of 1904-O half dollars. The strike and grade are at least equal to the Price coin and finer than the Pryor-Hugon, Eliasberg, and Nichols specimens. It is also finer than the Norweb example. The Buddy Byers coin had a similar strike but was of inferior technical quality. The Gem specimen in the Queller Family Collection is nearly as fine as the present piece. Population: 6 in 66 (2 in 66+), 2 finer (3/16).

Ex: David Akers (3/29/2003); The Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature (Heritage, 8/2010), lot 3210. NGC ID# 5EPG, PCGS# 6499

1907-S Half Dollar, Attractively Toned Rare Premium Gem Example

4673 1907-S MS66 PCGS. CAC. Variegated pastel palette includes rose-gold and pale olive-gray toning with iridescent highlights, enlivened by glowing mint luster over both sides of this gleaming Premium Gem half. The strike is sharp (but not quite full), as usual for this underrated San Francisco date. The S mintmark is slightly repunched southwest.

A mintage of 1.25 million pieces suggests a greater number of Gem or finer examples should exist for the issue, but this is not the case. PCGS CoinFacts estimates a mere 50 coins in Gem or finer condition are available to collectors. This Premium Gem representative is among the finest, and it is destined for a fine collection. Population: 6 in 66, 3 finer (3/16). NGC ID# 24N3, PCGS# 6511

1908-D Half Dollar, MS68 Sole Finest Certified

4674 1908-D MS68 NGC. CAC. The 1908-D is widely available in lower grades, as 3.28 million pieces were struck. Even at the Gem level it is relatively accessible, with a couple of dozen pieces so-certified. Nonetheless, the issue is extremely rare in Superb Gem condition, and this piece ranks as the sole finest (3/16).

Colorful, satiny surfaces are almost perfectly preserved, and the fields display a semiprooflike glow that enlivens the multiple layers of toning. Lavender and sea-green colors dominate each side, while several other hues intermingle as well around the peripheries. The devices are sharply struck throughout.

Ex: FUN Signature (Heritage, 1/2005), lot 4250; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98561. NGC ID# 24N5, PCGS# 6513

1910-S Half Dollar, MS67 Exemplary Luster and Surfaces

4675 1910-S MS67 PCGS. CAC. Ex: Friend. Although a pair of MS68 coins are reported by the grading services, this magnificent Superb Gem is nonetheless one of the finest 1910-S Barber half dollars we have ever handled. Moreover, we imagine this coin's incredible aesthetic appeal is comparable to that of the MS68 coins. In lower grades, the 1910-S is still rarer than most of the later S-Mint Barber half dollars, although it is more plentiful than most of the earlier San Francisco issues.

The Friend coin appears to be finer than the Pryor and Price coins, and perhaps similar to the Eliasberg piece in overall quality. It is highly lustrous with a brilliant central obverse design motif that is framed by pastel russet, lilac, and blue near the borders. The reverse is mostly brilliant with faint peripheral iridescence. All of the design elements are boldly detailed, except as usual, the top right of the shield and the adjacent wing, although even those details are sharper than often seen. Population: 3 in 67 (1 in 67+), 1 finer (3/16).

Ex: U.S. Coins, Inc.; *The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars / FUN Signature (Heritage, 1/2009)*, lot 3906. NGC ID# 24NC, PCGS# 6520

1913-S Half Dollar, MS66+ Outstanding Surface Quality

4676 1913-S MS66+ PCGS. CAC. The 1913-S Barber half dollar had a moderately low mintage of 604,000 coins and is proportionately scarce in all Mint State grades. Examples are rarely seen as fine as the Gem level, and finer coins are usually only dreamt of. This issue follows a similar pattern as many other dates in the series, even Philadelphia issues. In fact, assembling a Barber half dollar set in Gem or finer condition is an extremely difficult task, more so than even the financial expense would suggest.

This Plus-graded MS66 1913-S half is softly lustrous with a hint of light golden color. A faint reed mark at the junction of Liberty's neck and jawline is the only abrasion of note. The strike is incomplete on the eagle's right (facing) talons and wing junction, but the obverse is well-defined. Population: 7 in 66 (1 in 66+), 1 finer (3/16). NGC ID# 24NM, PCGS# 6529

PROOF BARBER HALF DOLLAR

1910 Barber Half Dollar, PR68 Stunning Coloration, Superb Quality

4677 1910 PR68 PCGS. CAC. This is one of two PR68 examples of the 1910 Barber half certified by PCGS (3/16), and it possesses eye appeal in spades to go with the impressive technical grade. The obverse flashes a silver crescent, with vibrant ochre, steel-blue, and violet shades predominating elsewhere. On the reverse the color palette is similar, but all-encompassing and spectacular.

The strike is as bold as ever seen on a 1910 Barber half, with only minuscule blending on the right shield corner. Certified in a green-label holder with CAC endorsement, this marvelous, Superb Gem proof is as good as it gets.

Ex: Central States Signature (Heritage, 4/2008), lot 2324; The Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection (Heritage, 8/2010), lot 3252.

From The Greensboro Collection, Part VI. NGC ID# 26A4, PCGS# 6557

WALKING LIBERTY HALF DOLLARS

1917-S Walking Liberty Half Dollar, MS65 Low-Mintage Obverse Mintmark Variant

4678 1917-S Obverse MS65 NGC. The Walking Liberty half dollar design was slightly modified partway through the year in 1917, when the mintmark was moved to the reverse. According to Mint records, a small mintage of 952,000 half dollars was accomplished at the San Francisco Mint before the change took place. While the 1917-S Obverse half dollars can be found in circulated grades with a little patience, high-grade specimens are decidedly elusive.

The present coin is an impressive Gem, with well-detailed design elements that show just a touch of the usual softness on Liberty's wreath hand and the eagle's leg. The lightly marked, lustrous surfaces show highlights of greenish-gold toning and eye appeal is quite strong. Census: 30 in 65 (1 in 65+), 2 finer (3/16). NGC ID# 26G7, PCGS# 6572

1921-D Walking Liberty Half, Toned MS64 Original and Appealing Key

4679 1921-D MS64 PCGS. One of the widely recognized 1921-PDS keys to the Walking Liberty Half set, the 1921-D has the lowest mintage of the series with a mere 208,000 pieces struck. It is extremely elusive above VF; Mint State pieces are seldom seen, as few were saved. The surfaces on this piece are unquestionably original, toned with rich, multicolored hues. The obverse exhibits a brilliant center and deep iridescence at the circular border areas; the reverse is completely toned. The strike is sharp and complements the thick, underlying mint luster. No distracting blemishes appear. If rich, original toning is one of the criteria for someone's set of Walkers, this piece would make a splendid addition. PCGS reports only 32 submissions of this issue in the Gem grade — where the cost would double to triple the price of an MS64 coin.

Ex: FUN Signature (Heritage, 1/2006), lot 3209, which garnered \$13,225.

From The Pellegrini Collection, Part II. NGC ID# 24R7, PCGS# 6584

1921-S Walking Liberty Half Dollar, AU55 Low-Mintage Series Key

4680 1921-S AU55 PCGS. CAC. The 1921-S Walking Liberty half dollar claims a low mintage of 548,000 pieces. Although a few other issues (including the 1921 and 1921-D) have even lower production totals, the 1921-S is the rarest Walking Liberty half in Mint State condition. It seems that contemporary collectors overlooked the 1921-S at the time of issue and few examples were saved for numismatic purposes.

The present coin is an attractive Choice AU specimen that shows just a trace of wear on the well-detailed design elements. Some separation between Liberty's thumb and fingers is still evident. The lustrous surfaces are remarkably free of serious abrasions, under pleasing shades of golden-brown toning. This coin will be a welcome addition to a fine collection of Walking Liberty half dollars.

From The Pellegrini Collection, Part II. NGC ID# 24R8, PCGS# 6585

PROOF WALKING LIBERTY HALF DOLLAR

**1933-S Walking Liberty Half, MS67
None Finer at PCGS**

4681 1933-S MS67 PCGS. CAC. The 1933-S Walking Liberty half dollar is the last of the early series dates. It was a well-produced issue in general, but it is still very rare at the MS67 level, and finer coins are virtually unobtainable. This delightful Superb Gem displays vivid shades of sea-green and amber toning, mixed with lighter highlights of lavender on both sides. The design elements are moderately well-detailed, with a touch of separation between Liberty's thumb and finger on the wreath hand and some of the usual softness on the eagle's leg. Vibrant mint luster shines through the toning. Population: 14 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 24RE, PCGS# 6591

**1936 Walker, Toned PR67+
Only One Coin Finer**

4682 1936 PR67+ PCGS. CAC. After the failed matte proof experiment of the 1908-1916 period, the Mint did not strike proofs of any kind for sale to collectors until 1936. The proof Walking Liberty half dollar series is only seven-issues in length. Of these, the 1936 is by far the rarest in Superb Gem condition. This Plus-graded PR67 coin is tied for the second-finest known, trailing a lone PR68 PCGS example that is finer. The coin exhibits fully struck design elements set against mirrored fields. Both sides show an array of deep amber, crimson, olive, and gold toning, without any distracting contact marks. Population: 37 in 67 (3 in 67+), 1 finer; CAC: 19 in 67, 1 finer (3/16). NGC ID# 27V4, PCGS# 6636

FRANKLIN HALF DOLLAR

1951-S Franklin Half Dollar, MS67 Rare Full Bell Lines Example

4683 1951-S MS67 Full Bell Lines PCGS. The 1951-S Franklin half dollar is a scarce issue in high grade and examples in MS67 condition with Full Bell Lines are very rare. This delightful Superb Gem is among the finest-known survivors, with sharply detailed obverse devices and Full Bell Lines on the reverse. The 1951-S is nearly always softly struck, and some slight blending shows on the center of the bell and the yoke details, but the lines at the bell bottom are complete.

Both sides display attractive shades of green, lavender, and champagne-gold toning at the borders, with vibrant, frosty mint luster underneath. Close inspection reveals virtually no marks or mentionable distractions on either side. Importantly, there are no numerically finer coins at either service for this strike-challenged San Francisco issue. Population: 5 in 67 (1 in 67+) Full Bell Lines, 0 finer (3/16). NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660

PROOF FRANKLIN HALF DOLLAR

1954 Franklin Half, PR68 Deep Cameo Registry Set Essential

4684 1954 PR68 Deep Cameo PCGS. Fewer than two dozen Deep Cameo proof 1954 Franklin halves are certified in this top-most grade of PR68, and the present coin is one of only 10 such pieces at PCGS (3/16). With some 244 Franklin Half Dollars Basic Proof Sets in the PCGS Registry, there are clearly not enough high-end pieces to go around. The present coin is numerically equal to the example in the current highest-rated Registry Set. The frost-white design elements are fully struck, and the untuned fields display seemingly infinite depth of mirroring. There are no surface flaws, and the eye appeal is outstanding. NGC ID# 27VE, PCGS# 96695

EARLY DOLLAR

1799 Draped Bust Dollar, AU58 Nicely Toned B-16, BB-158 Example

4685 1799 7x6 Stars, B-16, BB-158, R.2, AU58 NGC. Bowers-Borckardt Die State III. The 1799 Draped Bust silver dollar boasts the largest recorded mintage of the series, at 423,515 pieces, but some of those coins may have been dated 1798. A total of 22 die varieties are known for the date. This coin represents the relatively available BB-158 variety, with the characteristic clash marks above the date and the second T in STATES over the left half of a cloud. The obverse die was only used on this variety, but the reverse was also used to strike three other varieties of this date.

This attractive near-Mint specimen offers sharply detailed design elements with just a trace of wear on the high points. The surfaces are free of large or distracting abrasions and retain traces of original mint luster. Both sides are blanketed in attractive shades of lavender-gray, blue-steel, and golden-brown toning. Census (for the variety): 5 in 58, 2 finer (3/16). NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

GOBRECHT DOLLAR

1836 Die Alignment I Gobrecht Dollar Judd-60, Die State 2, PR61

4686 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 PR61 NGC. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State 2, showing die chips in the dentils above the final A in AMERICA. The often-encountered diagonal die clash line is missing above the eagle's wing, indicating this was one of the first 400 dollars struck in the final week of 1836. This early die state gives an indication that this was an early strike in the week, can say it was on Monday? — as later reverse die nicking was created by the feeding mechanism striking the anvil (reverse) die. This is a pleasing Gobrecht dollar, especially for the grade. Each side displays gray, rose, lilac toning with the usual shallow, but still reflective, mirrors glittering in the fields. Strong strike definition is seen throughout, and there are no obvious or detracting contact marks on either side. NGC ID# BLWV, PCGS# 11225

PROOF SEATED DOLLARS

Key 1851 Restrike Dollar, PR63 Cameo

4687 1851 Restrike PR63 Cameo NGC. CAC. The offering of an 1851 silver dollar at auction — whether it is a business strike or a proof — is sure to elicit the attention of collectors far and wide. Of the 33 different Philadelphia Seated dollar issues from 1840 to 1873, the 1851 is considered the rarest date. In his *Silver Dollars & Trade Dollars of the United States* (1993), Bowers estimates that between 26 and 52 examples out of the original 1,300 mintage of 1851 circulation strike dollars survive to this day. Regarding the proof restrikes of the same date, he approximates an extant population of between 30 to 60 pieces, thus suggesting that business strike and proofs are of equal rarity. Recent research by Dick Osburn and Brian Cushing estimate the proof restrike mintage at 50 to 100 pieces. Why the Mint would take the time and expense to prepare silver dollar dies for such a paltry mintage of silver dollars remains a mystery.

The current coin is one of the few to have been designated as a Cameo by either NGC or PCGS, and based on the reverse die it was likely struck in late 1859 or early 1860. As expected, the fields are exceptionally deep in their mirrored reflectivity, which helps set up contrast against the frosted devices. Variegated reddish patina is seen over each side with a faint accent of blue noted around the margins. Light hairlines explain the PR63 grade and why this piece does not grade higher even though visually it appears finer. The only surface disturbance worthy of note is a tiny area of pinscratching in the exergual area between the 1 and 8 in the date. Census: 2 in 63 Cameo, 1 finer (3/16). NGC ID# 2524, PCGS# 86993

1854 Seated Dollar, Dramatic Contrast Select Cameo Restrike Proof

4688 1854 PR63 Cameo PCGS. CAC. New and interesting research on Seated dollars, both circulation strikes and proofs, exists on www.seateddollarvarieties.com created by Dick Osburn and Brian Cushing. The discussion of 1854 proof dollars is insightful, where the status of this proof as a restrike is confirmed by both the obverse and reverse dies. The blundered date slants up, with remnants of misplaced digits above and below the 54 in the date. The reverse was struck from a die used for original proofs of 1859, with diagnostic lumps in the feathers of the lower left wing.

This is a profound white-on-black proof, with silver-white devices that contrast boldly with charcoal-suffused fields. Elements of rose, violet, and blue enrich the margins. While a few delicate lines are present, the overall visual appeal remains strong. Softness of strike at Liberty's shield arm — and more extensively at the eagle's left (facing) leg, shoulder, and arrow fletchings — is typical for the restrike proofs, but the incompleteness is substantial on this coin. Nevertheless, outstanding eye appeal remains, as confirmed by the CAC endorsement. With just four Cameo examples known at PCGS and none at NGC, this coin offers an important opportunity for series enthusiasts. Population: 1 in 63 Cameo, 3 finer (3/16). NGC ID# 4SJH, PCGS# 86997

1855 Seated Dollar, Gleaming PR64 Just 46 Proofs in All Grades Reported

4689 1855 PR64 PCGS. CAC. The 1855 is a key issue in the Seated dollar series regardless if it is a circulation strike or a proof. Choice Mint State coins are virtually unobtainable, while proofs are equally challenging. Because both proofs and circulation strikes come from the same die pair, distinguishing the two is at times problematic. Typically, business strikes are somewhat weakly struck although early strikes can be sharp.

The present Choice coin is clearly a proof. Fully struck throughout, the wide rims, squared-off dentils, and mirrored fields all confirm its status. The obverse approaches cameo contrast, while the reverse contrast is slightly less noticeable from the comprehensive, attractive electric-blue and peach-gold toning that covers both sides. NGC and PCGS combined report only 46 proofs in all grades and formats. Housed in a green label holder with CAC endorsement. Population: 11 in 64 (1 in 64+), 2 finer (3/16). NGC ID# 2529, PCGS# 6998

1855 Seated Liberty Dollar, PR66 Tied for Finest Certified

4690 1855 PR66 NGC. The 1855 proof Seated Liberty dollar is an underrated issue from an unknown, but certainly small mintage. Q. David Bowers estimates the surviving population at 20-33 examples in all grades. NGC and PCGS have combined to certify 46 examples between them, including an unknown number of resubmissions and crossovers (3/16) — a number that has not changed appreciably in recent years. The coins were struck using one obverse and two reverse dies. This piece was struck from the leftover reverse die used to strike proofs in 1854.

The present coin is a delightful Premium Gem, tied with one other coin at NGC for finest, although one coin has been certified PR66 Cameo (3/16). The design elements are sharply detailed and the fields are brightly reflective under vivid shades of lavender-gray and violet toning. The surfaces are immaculately preserved and eye appeal is terrific. NGC ID# 2529, PCGS# 6998

1856 Seated Dollar, PR65 Tied for the Finest at PCGS The Gardner Example

4691 1856 PR65 PCGS. Proof Seated dollars are the most popular coins in the entire series of silver proofs, a situation that remains unchanged since the time of issue. While mintages for the proof dollars were higher than the subordinate denominations, demand was and still is proportionately higher. CoinFacts suggests a surviving population of 50 to 75 coins, while Seateddollarvarieties.com suggests 40 proofs are extant.

This gorgeous Gem proof exhibits pronounced contrast between the mirrored fields and frosty devices. A few faint hairlines and contact marks hide beneath the appealing gold, lilac, and blue toning intermingled over each, including small nicks below CA of AMERICA, useful for pedigree tracking. Counted among the finest known examples with fully original toning and exceptional eye appeal. The fields are covered with faint die striations. Population: 3 in 65, 0 finer (3/16).

Ex: Summer FUN Signature (Heritage, 7/2013), lot 3217; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98609; Houston Signature (Heritage, 12/2015), lot 3234. NGC ID# 252A, PCGS# 6999

1866 Motto Seated Dollar, PR66 Ex: Eliasberg, Outstanding Eye Appeal

4692 1866 Motto PR66 NGC. CAC. Ex: Eliasberg. A razor-sharp proof example of the first-year Motto design with deep silver-mirrored surfaces and a random scattering of mauve, blue, and gold toning offsetting frost-white central devices. Inexplicably, a single die pair was used to produce all business strikes (48,900 coins) while three die pairs were required to mint 725 proofs. All 1866 proofs are of the Motto variety except for the two famous and historic, ultra-rare No Motto proofs.

NGC reports just six Premium Gem proofs and two finer examples, while PCGS lists but a single PR66 coin (3/16). By and large the proofs were carefully made, with several Cameo and Ultra Cameo proofs certified but not included in the above counts. This glittering proof with the Eliasberg pedigree offers exceptional quality for the grade and provenance. NGC ID# 5GDV, PCGS# 7014

1868 Seated Dollar, PR65+ Cameo Exceptional Selection for Type

4693 1868 PR65+ Cameo PCGS. CAC. While the proof Seated dollars of the late 1860s and early 1870s are relatively far more available than those of earlier decades, in high grades they are still rare in any absolute sense. (This is true for proof Morgan silver dollars of later years as well, although their survival rates may be a touch higher.)

The 1868 dollar saw a proof mintage of 600 pieces, yet this PR65 Cameo is one of only eight such at PCGS, and the sole example with the PCGS Plus designation. A single PR66 Cameo is finer at the service (3/16). The golden-gray surfaces are well-contrasted, sharply struck throughout, and free of mentionable distractions. A beautiful coin for type purposes, CAC endorsed. NGC ID# 252P, PCGS# 87016

1872 Seated Dollar, PR65 CAC Endorsement, Original Patina

4694 1872 PR65 NGC. CAC. An unknown percentage of the 950 Seated dollar proofs struck in 1872 were melted. Today, somewhere around 600 specimens survive — a fair estimate based on the number of submissions at NGC and PCGS.

Most examples grade in the PR63 to PR64 range, and Gem proofs are decidedly rare. This originally toned dollar offers lovely violet and cobalt-blue toning with dusky tan-gold patina at the central obverse. Sharply struck, the coin shows dramatic die doubling on the banner and motto most noticeable at IN GOD and, to a lesser extent, on the eagle's left (facing) wing and the denomination. Census: 15 in 65, 8 finer (11/15). NGC ID# 252U, PCGS# 7020

MORGAN DOLLARS

1872 Seated Dollar, PR65
Rich Multicolor Toning

4695 1872 PR65 PCGS. CAC. While the proof 1872 Seated dollars were generally well-produced, the engraving of the dies shows anomalies that are unusual to find on 1870s-era proofs. Die doubling on the reverse occurs in several places, especially on the Motto. On the obverse, a diagnostic die line runs horizontally across the shield recess directly above the T in LIBERTY.

This no-questions Gem proof is magnificently toned in sea-green, plum, and azure-blue shades with vibrant golden hues at the rims. Deep mirroring at the borders yields to the extensive toning on the obverse, but less so on the reverse where the reflectivity enhances the vibrant coloration. The strike is sharp on the star centers and Liberty's entire portrait, and blending at the edge of the eagle's shoulder is minimal. Population: 22 in 65 (1 in 65+), 1 finer (3/16). NGC ID# 252U, PCGS# 7020

1878 7TF Morgan, MS65
Deep Mirror Prooflike Example
Cameo Eye Appeal, Reverse of 1879

4696 1878 7TF Reverse of 1879 MS65 Deep Mirror Prooflike PCGS. Among the few finest Deep Mirror Prooflike seven tailfeathers 1878 Morgan dollars certified. The E in the obverse peripheral legend is faintly doubled, as are the 8s in the date; the tip of the bust truncation points to a dentil. This Gem Reverse of 1879 Morgan displays seemingly infinite depth of mirroring in the fields and has stark white-on-black contrast with a hint of champagne toning. A few small marks on the obverse are all that limit the grade. Razor-sharp detail characterizes Liberty's hair curls and the eagle's talons. Finding a more appealing circulation strike may be prohibitively difficult. Population: 6 in 65 Deep Mirror Prooflike, 0 finer (3/16). NGC ID# 253L, PCGS# 97077

1878-CC Morgan Dollar, MS66+ Condition Rarity in Finer Grades

4697 1878-CC MS66+ PCGS. The Carson City Mint produced more than 2.2 million silver dollars in 1878, the first year of the Morgan design. The issue is always in demand from branch mint type collectors and date collectors alike. Many high-grade coins have survived, but the population thins out drastically above the MS66 grade level, making this Plus-graded Premium Gem an excellent balance of quality and value. The design elements exhibit razor-sharp definition throughout, and the impeccably preserved surfaces radiate vibrant mint luster on both sides. An interesting die crack runs through the base of the letters in dollar. PCGS has graded only six numerically finer examples (2/16). NGC ID# 253M, PCGS# 7080

1879-CC Morgan Dollar, MS65 Incredible Eye Appeal

4698 1879-CC MS65 PCGS. While the 1879-CC Morgan dollar issue was represented in the GSA hoard, the proportion of survivors from that source is much smaller than for other, later issues. In *A Guide Book of Morgan Silver Dollars*, Q. David Bowers comments: "Among basic date and mintmark issues, the 1879-CC is the first key or rare variety in the Morgan dollar series and is the second rarest (after 1889-CC) of all Carson City Morgans. ... There were probably hundreds of thousands of 1879-CC dollars melted under the 1918 Pittman Act, but facts will never be known."

The present Gem example boasts incredible eye appeal. Though the hair over the ear shows softness, the remainder of each side is well-defined. Delicate, hazy silver-gray luster graces amply lustrous fields. A gorgeous survivor from an issue that is essentially unavailable any finer; PCGS has certified only three such coins, all MS66 (3/16).

Ex: ANA Signature (Heritage, 3/2008), lot 903, which realized \$19,550. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS64+ Popular VAM-3 Variety

4699 1879-CC Capped Die, VAM-3, MS64+ PCGS. CAC. A Top 100 Variety. In a curious blunder, the engraver initially inscribed a smaller CC mintmark on this die, then tried to efface it and stamped the primary mintmark using larger letters over the remnants of the first mintmark. The date on the obverse die was doubled, with the undertype visible at the top of the 1 and 8, and the bottom of the 9. The 1879-CC Morgan dollar is an elusive issue, regardless of variety, from a low-mintage of 756,000 pieces.

This Plus-graded Choice example exhibits well-detailed design elements and vibrant, frosty mint luster throughout. The well-preserved surfaces show attractive hints of pale lavender toning, with outstanding eye appeal. PCGS has graded 13 numerically finer examples (3/16). NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-O Morgan Dollar, MS66 Rare Top-Grade Registry Coin

4700 1879-O MS66 PCGS. The 1879-O Morgan is rare in MS66 and unknown finer, producing feverish demand when such a coin is offered at auction. This piece is frosty and brilliant with exceptional eye appeal, and the level of preservation stands in direct contrast against the issue's reputation of being heavily abraded. Most of the Mint State coins known today originated in Treasury bags that were paid out in the 1950s and '60s and show the scattered abrasions that typically affect silver dollars from that source. This piece shows a touch of strike softness on the hair above Liberty's ear, but the eagle is well-defined. A small abrasion in the reverse field left of the eagle's head is the only notable surface flaw. Population: 25 in 66 (2 in 66+), 0 finer (3/16). NGC ID# 253X, PCGS# 7090

1879-S Dollar, Snow-White MS68+ With CAC Endorsement

4701 1879-S MS68+ PCGS. CAC. One is simply at a loss to describe the near-miraculous state of both the production criteria under which this Morgan dollar was struck, as well as the subsequent white-glove preservation it somehow managed to endure for some 137 years and counting. The 1879-S through 1882-S dollar issues are among the best-produced within the series, but even so, this is piece of stunning quality. The profile of Liberty is completely free of any contact marks above the microscopic level. One luster graze each appear before and behind the head, although we see one little contact on the hair curl over the ear. The reverse is, if anything, even cleaner, showing tiny grazes outside the wreath on left and right. Brilliant snow-white surfaces and blazing cartwheel luster complete the immense eye appeal. Population: 6 in 68+, 0 finer. CAC: 50 in 68, 0 finer (2/16). NGC ID# 253X, PCGS# 7092

1880 Morgan, MS66 Deep Mirror Prooflike Golden-Toned Cameo Tied for Finest DMPL Certified

4702 1880 MS66 Deep Mirror Prooflike PCGS. The 1880 Morgan dollar is elusive in the Deep Mirror Prooflike category, and Gem examples are rare. This Premium Gem is tied with one other as the finest in DMPL at PCGS; NGC also lists two Ultra Cameos in this grade and none finer (3/16). Many bags of this issue were paid out by the Treasury through the 1950s, but the quality of the coins was generally poor. Most Uncirculated pieces today show moderate bagmarks. The 1880 — among other early Philadelphia issues — is elusive in Gem condition and something of a rarity any finer. A Deep Mirror Prooflike coin in MS66 is truly something special. This piece is boldly struck and showcases stark field-motif contrast. Warm sun-gold toning deepens toward the borders where it merges with peripheral violet and ocean-blue. NGC ID# 253Y, PCGS# 97097

1880-O Morgan Dollar, Strong Gem One Submission Finer at PCGS

4703 1880-O MS65 PCGS. CAC. Small or Micro O. Amazingly, the certified population at PCGS declines by more than 97% between MS64 and MS65, confirming the conditional rarity of the 1880-O Morgan dollar in Gem grades or higher. The New Orleans Mint struck 5.3 million dollars in 1880. The prevalence of AU and lower mint condition examples suggests many pieces either circulated briefly or were stored in bags and subjected to rough handling. This impeccably preserved representative is clearly the exception, devoid of distracting bagmarks. A handful of microscopic specks appear in the fields, but the cheek is relatively clean. Frosty, coruscating luster issues from brilliant surfaces that show glimpses of gold patina. Design definition is strong for the facility. Population: 38 in 65 (4 in 65+), 1 finer (2/16).

From The Paul H. Gerrie Collection. NGC ID# 2543, PCGS# 7114

1880-S Dollar, Brilliant MS68+ Immaculate Semiprooflike Surfaces Only 15 Plus-Graded Coins Certified

4704 1880-S MS68+ PCGS. CAC. Large S. The 1880-S is obtainable even in this high grade, but its availability should not diminish the impressive nature of this blazing, untuned example. Availability, however, is severely limited with coins that have the Plus designation, only 15 coins have been so graded. The design detail is razor-sharp aside from the extreme centers, where faint roller marks are visible. Each side is virtually immaculate with marked semiprooflike reflectivity and contrast. Further endorsed with a green CAC sticker. PCGS shows merely five finer grading events (3/16). NGC ID# 2544, PCGS# 7118

1881 Silver Dollar, MS67 Rare, Tied for Finest Certified

4705 1881 MS67 PCGS. The availability of the 1881 Morgan dollar steadily declines in succeeding grades finer than MS63, but it remains at least marginally available through MS66. Not so in MS67; at the Superb Gem level, the 1881 Morgan is extremely rare. PCGS and NGC have so-graded only nine coins (five and four pieces, respectively), and none are finer (3/16). As Dave Bowers writes in *A Guide Book of Morgan Silver Dollars*: "... there is no shortage of 'average' pieces in the marketplace. Sharply struck, lustrous coins with superb eye appeal are hard to find and mount a challenge for the serious collector."

This frosty, radiant Registry coin is in the latter category. The strike is well-executed, and the untuned surfaces are beautifully preserved. Eye appeal far surpasses what is typical of this issue. The rarity of this grade only adds to the attributes this coin possesses. NGC ID# 2546, PCGS# 7124

1881-S Morgan Dollar MS68 Deep Mirror Proof Like The Finest at PCGS

4706 1881-S MS68 Deep Mirror Prooflike PCGS. Ex: Jack Lee. The 1881-S has long been recognized as the most ubiquitous issue in the Morgan dollar series. In his *Encyclopedia of silver dollars* (1993), Bower's estimate of the surviving population, in Mint State grades, was between 4 and 6.25 million pieces!

That said, let us consider the number of 1881-S dollars that have been certified as MS68 Deep Mirror Prooflike by the two major grading services: NGC has seen just two such pieces, and PCGS has only found one, in 30 years of certification (Neither company has graded an example any finer than these three.)

Fully struck and seemingly pristine, this fabulous coin presents an essentially untuned appearance, although some milky patina is noted in the obverse fields. Of the millions that still exist, then, this 1881-S gets bragging rights as one of the top three, at least among those that have been encapsulated; and it remains the finest-known example at PCGS. Still housed in its original green label holder.

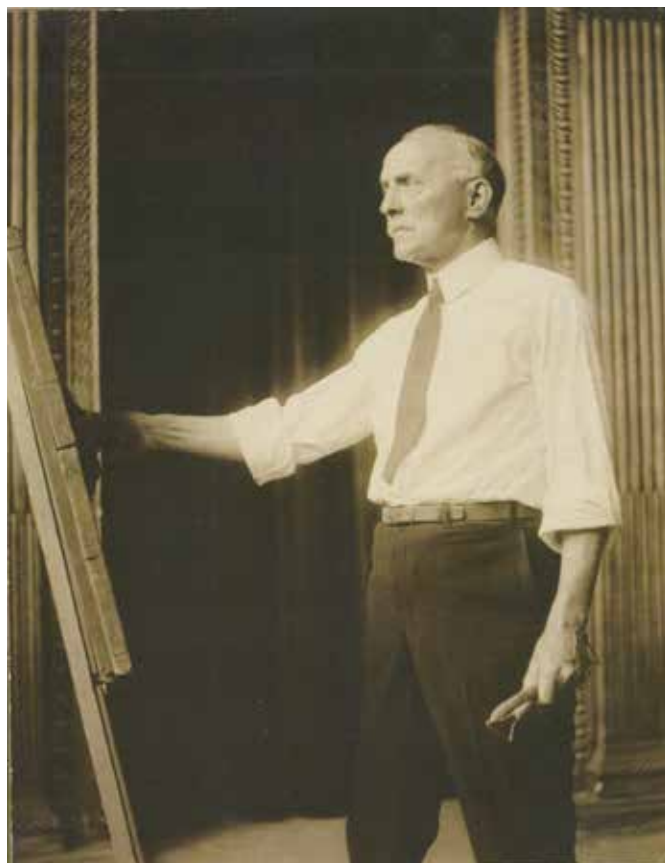

Ex: Jack Lee / Dallas Signature (*Heritage*, 11/2007), lot 1069. NGC ID# 2549, PCGS# 97131

1883 Morgan Dollar, MS66+ Elusive Deep Mirror Prooflike Example

4707 1883 MS66+ Deep Mirror Prooflike PCGS. CAC. The 1883 Morgan dollar boasts a huge mintage of nearly 12.3 million pieces, making the issue an available one in all grades and a favorite choice of type collectors. Unfortunately, the issue was not particularly well-made, as the demands of such a large production made quality control a second priority. Prooflike coins are sometimes encountered, but examples with intense cameo contrast are rare.

The present coin is a Plus-graded Premium Gem, with sharply detailed, frosty design elements that provide stunning cameo contrast with the deeply mirrored fields. The mostly brilliant, well-preserved surfaces show a few hints of lavender toning at selected angles and overall eye appeal is terrific. Population: 11 in 66 (1 in 66+) Deep Mirror Prooflike, 0 finer (3/16). NGC ID# 254G, PCGS# 97143

George T. Morgan

1884-S Morgan Dollar, MS63+ Classic Condition Rarity and Series Key

4708 1884-S MS63+ PCGS. CAC. A substantial mintage of 3.2 million Morgan dollars was accomplished at the San Francisco Mint in 1884. Most of the mintage was released into circulation at the time of issue, and few coins were saved for numismatic purposes. The 1884-S is, therefore, plentiful in circulated condition, while high-grade examples are elusive in today's market.

Undoubtedly, some bags were retained in Treasury vaults, as small numbers were later released to customers in the period from 1926 to the early 1950s. However, the bulk of the government stockpile was likely melted under the provisions of the Pittman Act in 1918, as the numbers released in later years were never large, and the issue attracted little attention.

The 1884-S was not well-represented in the Treasury releases of the 1960s, signaling to series specialists that the issue was scarce in all Mint State grades and rare above the Select level. Today, the 1884-S is recognized as an important key to the Morgan dollar series in high grade.

This delightful Select example enjoys sharply detailed design elements that show bold definition on the hair strands above Liberty's ear. Largely brilliant surfaces display a few areas of pale green and gray toning, mainly confined to the reverse. Both sides exhibit a mixture of vibrant, frosty mint luster and semiprooflike reflectivity. We expect intense competition from Morgan dollar enthusiasts when this lot is called. Population: 53 in 63 (4 in 63+), 14 finer (2/16).

Ex: Fenn Family Collection / Long Beach Signature (Heritage, 2/2013), lot 3878.

From The Paul H. Gerrie Collection. NGC ID# 254P, PCGS# 7156

1885-CC Dollar, VAM-2A, MS67 Top-Notch Registry Set Entry

4709 1885-CC MS67 PCGS. CAC. VAM-2A, R.6, Dash Under 8, Clashed Obverse n. The 1885-CC Morgan dollar issue was found in prodigious supply in the great GSA dispersals of a few decades ago: From the original mintage of 228,000 coins, more than 130,000 were reportedly surviving in Mint State, with another 17,000 in mixed grades — about 65% of the total mintage. As lowball Registry Set players know, however, finding a low-grade example of the 1885-CC is actually an enormous challenge. The certified survivors at NGC and PCGS average about halfway between Select and Choice — MS63.4, to be exact.

Few indeed, however, measure up to the Superb Gem level of this incredible coin. Creamy-white surfaces boast brilliant luster and amazingly pristine preservation on Liberty's profile and, in fact, both sides overall. A few minuscule ticks are largely confined to the upper reverse field. The strike is as sharp as the preservation is superb. Population: 77 in 67 (3 in 67+), 1 finer (2/16). NGC ID# 254S, PCGS# 7160

1886-O Morgan Dollar, MS64 Only Six Coins Finer at Both Services

4710 1886-O MS64 PCGS. CAC. Dedicated collectors of the Morgan dollar series are well-aware of the dual nature of the 1886-O. The issue's rarity in the higher Mint State grades and availability in circulated grades is the result of a high initial mintage combined with a high attrition rate and so-so production quality. Although this near-Gem shows a bit of the inevitable strike softness over the ear, it is decidedly better-struck than usual. Shimmering luster radiates from brilliant surfaces that show only minor evidence of contact. PCGS has certified a meager six coins finer, and there are none in higher grades at NGC (2/16).

Ex: Chicago Signature (Heritage, 8/2011), lot 7315; FUN Signature (Heritage, 1/2012), lot 1166.

From The Paul H. Gerrie Collection. NGC ID# 254W, PCGS# 7168

1889-CC Morgan Dollar, MS61 Low-Mintage Carson City Key

4711 1889-CC MS61 PCGS. CAC. According to Mint records, only 350,000 Morgan dollars were struck at the Carson City Mint in 1889. Many coins were released into circulation in the 19th century, and others were later widely circulated in the hard-money economy of the region. By the time of the GSA sales of the 1970s, few were left in government storage. As a result, the 1889-CC is the most challenging Morgan dollar issue of the Carson City series, especially in high grade.

The present coin is an attractive Mint State specimen, with sharply detailed design elements and vibrant, cartwheel mint luster. The surfaces show a scattering of minor contact marks on both sides, with subtle hints of pale gold and lavender toning. This coin will be a welcome addition to a fine collection of Morgan dollars. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, MS62 Much Scarcer Than the Mintage Suggests

4712 1889-CC MS62 PCGS. The 1889-CC Morgan dollar is a key date in the series, occasionally grouped together with the 1879-CC and 1893-CC as the Big Three Carson City issues, but it undoubtedly stands above the others in terms of popularity and desirability. Morgan dollars from that facility are not rare in the absolute sense. Rather, they are elusive by virtue of their availability compared to other dates in the series and, naturally, supply relative to demand. The 1889-CC is different. Given the wide disparity between Mint State survivors of the 1889-CC Morgan and all other Carson City issues — many with comparable original mintage figures — the 1889-CC appears to have been the victim of some kind of mass extinction event, as Rusty Goe claims in *The Mint on Carson Street*. Few of the survivors of this mysterious extinction event exceed the present MS62 piece. The softly frosted surfaces are mostly brilliant with just a slight accent of golden patina scattered irregularly around the margins. Sharply (but not fully) struck with a few small abrasions scattered about. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, Rim-Toned MS64 Wonderful Surface Preservation An Important Key Date in the Series

4713 1889-CC MS64 PCGS. This near-Gem 1889-CC Morgan dollar presents an important opportunity of which series specialists are undoubtedly aware; even nonspecialists are similarly familiar with the rarity of the 1889-CC as a date. Nearly all of the 350,000 coins originally minted were released into circulation, where they remained for a long time. Today, those that have survived are usually found in well-worn condition. Existing Mint State coins survived the early years purely as a matter of chance — perhaps a birthday present for a youngster. A few others may have been set aside as a remembrance of some special occasion. Whatever the reason, the number of pieces saved was certainly small. Today, collectors must thank those unknown past custodians.

The present coin has been carefully preserved for nearly 120 years since the time it was minted. The surfaces retain their full reflective luster, just shy of prooflike status. The reverse exhibits a suggestion of cameo contrast between the fields and devices. The strike was a powerful one, producing exceptionally sharp design motifs on both sides. Pale champagne toning prevails overall, complementing splashes of golden-brown, russet, and cobalt-blue largely concentrated near the borders. Population: 32 in 64, 2 finer (3/16). There are no Prooflike or Deep Mirror Prooflike examples reported finer at PCGS, making only two numerically finer-graded coins than this piece: one MS65 and the incredible ex: Jack Lee MS68 coin.

Ex: Central States Signature (Heritage, 4/2008), lot 2362, which realized \$54,625. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, MS63 Deep Mirror Prooflike Brilliant, Contrasted Keystone Date

4714 1889-CC MS63 Deep Mirror Prooflike PCGS. CAC. The 1889-CC Morgan dollar is the second and most elusive of the three Carson City Mint keys to the series, along with its bookends, the 1879-CC and 1893-CC.

The superintendent of the Carson City Mint, James Crawford, died on March 8, 1885. Coincidentally, incoming President Grover Cleveland appointed a new Secretary of the Treasury, Daniel Manning, on the same day as Crawford's death. Crawford was a well-loved superintendent who had served with honor for 10 years at Carson City. Rusty Goe writes in *The Mint on Carson Street*:

"... his death triggered a knee-jerk reaction in Washington; 11 days later, on March 19, 1885, the Treasury ordered that the Carson City Mint be closed for the year, resulting in an economic setback to the crestfallen townspeople of Carson City.

"Crawford's successor William Garrard was appointed to the office on April 1st serving in his position as mint superintendent until 1889; he is not given much credit for anything other than laying off the entire staff of approximately 80 employees."

Garrard did, nonetheless, supervise the transfer to Treasury vaults of nearly 3.2 million silver dollars dated 1882-CC, 1883-CC, 1884-CC, and 1885-CC, which coins would form the bulk of the GSA sales nearly a century later.

The yearlong hiatus in Carson City turned into an extended four-year period during which no coins were struck. It would take a new presidential administration in Washington, that of Benjamin Harrison, before the Carson City Mint reopened for coinage in 1889. (Harrison reopened the mint as a political favor in return for Nevada's support during the presidential campaign.)

It was the dawning of a new era at the Nevada mint, one that would turn out to be its swan song. The unpopular superintendent Garrard was replaced by the respected city undertaker, Sam Wright. A new (and apparently quite talented) chief coiner was named, Charles H. Colburn. Although some 350,000 1889-CC silver dollars were struck, Goe maintains that much of the coinage was later melted, for reasons not fully understood today.

Many surviving Mint State 1889-CC dollars are of remarkably high quality. Goe writes that "a relatively high percentage of these handsome new dollars displayed deep mirrored prooflike surfaces, gradually descending to brilliant prooflike, and tapering off to semiprooflike."

This piece has bright, sparkling mirrors that generate marked cameo contrast against the devices. The design elements are fully struck, and each side is brilliant. A few small abrasions are scattered over each side, none worthy of individual mention. Population: 47 in 63 Deep Mirror Prooflike, 17 finer (2/16).

Ex: Central States Signature (Heritage, 4-5/2009), lot 2624; Central States Signature (Heritage, 4/2013), lot 4373.

From The Paul H. Gerrie Collection. NGC ID# 2559, PCGS# 97191

1890 Silver Dollar, MS66 Tied for Finest Certified

4715 1890 MS66 PCGS. The availability of the 1890 Morgan dollar drops significantly between MS64 and MS65, and in Premium Gem condition this date is a major series rarity. Only a dozen pieces are certified this fine at PCGS and NGC combined (five and seven coins, respectively) and none are finer (3/16). This coin has softly frosted luster and unabraded surfaces. Blended multicolor hues blanket each side, restricting the deepest colors to the peripheral regions. The eagle's breast and the hair immediately above Liberty's ear show minor strike softness, as is frequently seen on this issue. The 1890 has long reputation as a common date, as the more than 16 million-coin mintage was paid out in quantities for decades of time. But high-end examples are nonetheless in a distinct minority. NGC ID# 255C, PCGS# 7196

1893-CC Dollar, MS64 Rarely Encountered Finer

4716 1893-CC MS64 PCGS. The 1893-CC dollar has always been a collector's favorite due to its scarcity and status as the last Carson City Mint coin of its denomination. In his *Silver and Trade dollar Encyclopedia* (1993), Dave Bowers writes:

"Mint bags of 1893-CC dollars came on the market as early as 1920 at face value through the Cash Room at the Treasury in Washington and, in particular, from storage at the San Francisco Mint. However, the quantity was small in comparison to certain other Carson City dates, particularly those of the early and mid-1880s. The supply seems to have been exhausted by the late 1950s, and there are no records of any quantities being paid out after that time."

A hint or two of light tan color appears under magnification on the near-Gem being offered in this lot. Lustrous surfaces yield some prooflike tendencies in the fields, with the consequent mild contrast with the motifs. A well-executed strike leaves its mark on the design features, being manifested in sharpness in the hair at Liberty's ear and the eagle's breast feathers. A few minute obverse marks and luster grazes preclude the assignment of full Gem classification. PCGS lists only 14 finer representatives (3/16).

Ex: Long Beach Signature (Heritage, 9/2007), lot 2699; ANA Signature (Heritage, 7-8/2008), lot 2401. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS64
Final Carson City Morgan**

4717 1893-CC MS64 PCGS Secure. The Carson City Mint began operations in 1870, but afterward was under almost constant threat from political interests to be closed down. Operations were suspended in 1885, at the direction of anti-silver President Grover Cleveland, and did not resume until 1889, following the election of Republican Benjamin Harrison. Coinage of silver dollars was high at the Nevada branch mint through 1893. The reelection of Grover Cleveland to the presidency, coupled with the repealing of the Sherman Silver Purchase Act (which had largely fueled silver dollar coinage since 1890) in November, spelled the end of the Carson City Mint, which did not strike silver dollars beyond the end of May.

The 1893-CC is a conditionally elusive Morgan dollar issue and highly sought-after as the final CC-mint issue in the series. This Choice example is finer than typical, showing frosty luster and impressively sharp interior detail. The surfaces are untoned, and there are no major abrasions. PCGS lists 14 finer representatives (3/16). NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS64
Condition Rarity in Finer Grades**

4718 1893-CC MS64 PCGS Secure. The 1893-CC Morgan dollar represents the final issue from the famous Carson City Mint, an important consideration for branch mint type collectors. In addition, the 1893-CC is prized by series specialists because of its low mintage of 677,000 pieces. The 1893-CC was not as well-represented as some other CC-mint issues in the GSA sales of the 1970s, making the issue especially elusive in high grade.

This impressive Choice example exhibits well-detailed design elements and vibrant mint luster throughout. Only minor signs of contact are evident and the pleasing surfaces show a few hints of greenish-gold toning. PCGS has graded 14 numerically finer examples (3/16). NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS64+ Brilliant Carson City Semikey

4719 1893-CC MS64+ PCGS. CAC. Unlike the Carson City Morgan dollars from the early to mid 1880s and the early 1890s, 1893-CC was not well-represented in the GSA hoard of the 1970s. In fact, only a single example turned up. Instead, Mint State trickled out of Treasury vaults from about 1920 through the 1950s, and most of them were heavily bagmarked. High-end Choice representatives are scarce, and Gems are exceedingly rare. This phenomenal Plus-designated and CAC-endorsed final-issue CC dollar is brilliant with radiant mint frost that rolls over each side. The central devices are boldly rendered, and minimal chatter appears in the fields, barely precluding a full Gem grade. PCGS has seen merely 14 finer submissions (2/16).

From The Paul H. Gerrie Collection. NGC ID# 255S, PCGS# 7222

1893-S Silver Dollar, XF45 Widely Circulated Issue, Scarce Any Finer

4720 1893-S XF45 PCGS. The 1893-S is rare in Mint State and is among the few issues in the date and mintmark set that is often not acquired in Mint State, even by well-heeled collectors. Upper-end circulated pieces are typically the finest that are known, as most of the small 100,000-coin mintage was released into circulation. The bulk of the surviving population curiously resides in the VG to VF grade range. Despite having obviously circulated, the 1893-S was rare in circulation prior to 1925, per contemporary silver dollar specialist, E.S. Thresher. Dave Bowers, in *A Guide Book of Morgan Silver Dollars*, theorizes:

"I can envision a scenario in which, sometime after 1925, tens of thousands were turned loose in circulation in the Rocky Mountain states, routinely used, and not numismatically noticed. This would neatly explain the VF concentration."

The present Choice XF coin is above average for the issue. Steel-gray surfaces have hints of luster in the protected regions of the fields, and the overall eye appeal suggests originality. The motifs are well-defined, and there are no mentionable surface imperfections. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Original XF45 Pleasing Problem-Free Surfaces

4721 1893-S XF45 PCGS. CAC. The rarity of the 1893-S Morgan dollar transcend the series, its importance known to virtually all students of American numismatics. A paltry production of 100,000 coins was accomplished at San Francisco in 1893, making this the lowest-mintage issue in the set. Problem-free XF representatives prove challenging, and anything finer will give even the most patient, well-resourced collector a run for his or her money. This Choice XF, CAC approved key date dollar features lovely battleship-gray patina and crisp design detail despite moderate rub over the high points. A couple of tiny reeding marks appear below Liberty's eye and serve as undistracting pedigree identifiers.

From The Paul H. Gerrie Collection. NGC ID# 255U, PCGS# 7226

1894-O Dollar, MS64 Spectacular Patination

4722 1894-O MS64 PCGS. CAC. The allure of this conditionally rare O-mint Morgan dollar is universal, both in terms of its technical quality and eye appeal. For one, the 1894-O is scarcely found in Choice condition and anything finer is essentially inaccessible. Additionally, Bowers explains that the issue is typically "wretched in appearance." Not so here, with eye-catching patina in shades of cobalt-blue, magenta, and golden-orange framing partially brilliant centers. Softly frosted luster issues from the underlying surfaces, illuminating well-detailed relief elements with incompleteness over the ear and breast feathers. A high-end example with minimal marks that is sure to please even the most discerning specialist. PCGS reports 11 finer submissions (2/16).

From The Paul H. Gerrie Collection. NGC ID# 255W, PCGS# 7230

1895-O Morgan, MS61 Seldom-Seen New Orleans Issue

4723 1895-O MS61 PCGS. There are precious few Mint State coins of this popular and difficult issue to go around, and many Morgan collectors must settle, for budgetary and/or aesthetic reasons, on a high-grade circulated specimen rather than a low-Mint State piece.

This example shows rather muted luster over powder-gray patina on each side, which serves to lessen the effect of the numerous mostly light abrasions that dot both the device high points and the fields. This strictly Mint State coin will make a nice acquisition for the advanced collector who cannot justify the much greater expense of an MS62 or MS63. Population: 39 in 61, 83 finer (3/16).

Ex: Dallas Signature (Heritage, 10/2008), lot 1442; FUN Signature (Heritage, 1/2009), lot 5034; Los Angeles Signature (Heritage, 8/2009), lot 1176. NGC ID# 255Y, PCGS# 7236

1896-S Morgan Dollar, MS65 Conditionally Scarce Example

4724 1896-S MS65 PCGS. VAM-2. Like many Morgans, the 1896-S is plentiful in Uncirculated condition but becomes challenging in Gem and above. Treasury releases ensured an ample supply of survivors, but few match the quality of this Gem example. This coin exhibits especially clean fields, with only a minor abrasion above the cap and below B of PLURIBUS. The strike at the center of the obverse is a touch soft, with roller marks evident on the hair and temple. Both sides are largely brilliant with russet and blue-green at the rims. The reverse reveals light chatter above the motto, and there is a light die crack joining the peripheral letters. This piece is scarce at the MS65 level, and the populations of finer examples are all in the single digits. The 6 in the date is faintly doubled at the top of the upper loop. Population: 79 in 65 (4 in 65+), 5 finer (3/16). NGC ID# 2564, PCGS# 7244

1896-S Dollar, MS65 Rare CAC-Approved Example

4725 1896-S MS65 PCGS. CAC. The marginal availability of the 1896-S Morgan in Mint State evaporates at the Gem level. This PCGS coin is conditionally scarce but is more importantly one of only five MS65 coins awarded a CAC green label. Finer examples are extremely rare and far out of reach for most collectors. This 1896-S displays frosty luster and an exceptionally clean cheek on Liberty's portrait. Both sides have warm rose-gold toning with deeper amber accents around the borders. Trivial softness on the eagle's breast and the hair above Liberty's ear is expected for the issue. A Registry-grade example. Population: 77 in 65 (4 in 65+), 5 finer (2/16).

From The Paul H. Gerrie Collection. NGC ID# 2564, PCGS# 7244

1897-O Morgan Dollar, MS64 Sharply Detailed and Lustrous

4726 1897-O MS64 PCGS. The New Orleans Mint struck more than 4 million Morgan dollars in 1897, but quality control was not a priority and most examples seen are softly struck, with insipid mint luster. Few collectors recognize the difficulty of locating a high-quality specimen, as the 1897-O is not a low-mintage key and little attention has been focused on it over the years.

The present coin is a happy exception to the rule. This attractive Choice example offers sharply detailed design elements and vibrant mint luster, under delicate shades of golden-tan and lavender toning. Overall eye appeal is outstanding for this challenging issue. Population: 43 in 64 (7 in 64+), 14 finer (2/16). NGC ID# 2565, PCGS# 7248

1901 Morgan Dollar, MS63 Vivid, Iridescent Toning

4727 1901 MS63 PCGS. The 1901 Morgan dollar claims a mintage of 6.9 million pieces, but the issue is much more difficult to locate in high grade than that substantial production total would suggest. Many coins were released into circulation near the time of issue and example in circulated grades can be found without much effort. A large number were also stored in Treasury vaults, only to be melted under the provisions of the Pittman Act in 1918. The 1901 was not well-represented in the Treasury releases of the 1960s, and it remains one of the most challenging issues in the series at the Gem level of preservation.

The present coin is an attractive Select specimen, with well-detailed design elements and vibrant mint luster throughout. The lightly marked surfaces are blanketed by iridescent shades of golden-brown and violet toning, with outstanding eye appeal. PCGS has graded 38 numerically finer examples (3/16). NGC ID# 256J, PCGS# 7272

1901 Dollar, CAC-Approved MS63 Famous P-Mint Condition Rarity

4728 1901 MS63 PCGS. CAC. The issue's mintage of 6.9 million coins is middle-of-the-road for the series, failing to stand out as anything significant. Yet, the 1901 is among the most elusive Morgan dollar dates in MS63 or finer. Any coins not distributed during the early part of the 20th century were likely melted under the terms of the Pittman Act of 1918. Contemporary collectors failed to set many examples aside on account of the unassuming mintage, making the 1901 the prime condition rarity it is today. Pale golden hues tint the margins, leaving the interiors fully frosted and brilliant. Well-struck with surprisingly unabraded obverse fields. Mentionable imperfections are limited to a thin linear depression on the cheek and group of bagmarks near the eagle's left (facing) wing. Rarely seen finer.

From The Paul H. Gerrie Collection. NGC ID# 256J, PCGS# 7272

**1902-O Dollar, MS67 Prooflike
Uncommonly Sharp and Reflective
The Sole Finest Prooflike Coin at PCGS**

4729 1902-O MS67 Prooflike PCGS. In general, the 1902-O Morgan dollar is rare in MS67. In the Prooflike category, however, coins become rare in MS66. This Superb Gem Prooflike coin is the sole finest at PCGS, a cousin to the single NGC coin in this grade (3/16). As is consistent with the issue's reputation, this Prooflike coin has minimal cameo contrast, but the depth of mirroring in the fields is nonetheless superb. The experienced Morgan dollar collector will immediately appreciate the unusually well-struck central devices. This piece is virtually brilliant over the interiors but has a halo of lemon-gold toning around the extreme outer peripheries. There are no surface abrasions noticed. A 20th century condition rarity for the Registry Set enthusiast. NGC ID# 256N, PCGS# 7281

**1903-S Dollar, MS65+
Registry-Grade Semikey**

4730 1903-S MS65+ PCGS. CAC. Mike Casper Collection. The 1903-S is more of an absolute rarity rather than a condition rarity among late-date Morgans. Only 1.24 million pieces were produced, and very few are known in all grades of Uncirculated. However, when a high grade piece such as this is encountered, the results can be very pleasing. The mint luster is bright and frosted, reminiscent of the frost seen on early S-mint Dollars such as the 1881-S. Fully struck, the surfaces are remarkably free from any distracting abrasions, especially on Liberty's cheek. CAC-approved and brilliant throughout. *Ex: Purchased by Mr. Casper (1982); Santa Clara Signature (Heritage, 11/2001), lot 6207.*

From The Paul H. Gerrie Collection. NGC ID# 256T, PCGS# 7288

PROOF MORGAN DOLLARS

1878 8 Tailfeathers Dollar, PR66 Cameo Nicely Preserved and Well-Contrasted

4731 1878 8TF PR66 Cameo NGC. Ex: Pacific Rim Collection. It is unusual to find this first-year Morgan dollar variety with any degree of mentionable contrast, making this Premium Gem Cameo example a standout coin in many regards. One hundred proofs were struck each on March 12 and 15, 1878, and 300 more on March 18, leading to the usual production figure of 500 proofs of the variety. Most certified examples, however, grade no finer than PR64 to PR65 and without a Cameo designation, as mentioned. This piece boasts light rose patina with moderate device frost contrasting well against deeply mirrored fields. One thin line through the 1 in the date and a couple of minor ticks and thin marks on Liberty's cheek account for the grade, none of them distracting. Some prominent die-polishing lines appear on the lower reverse, part of the normal die-preparation process. Census: 12 in 66 Cameo, 6 finer (2/16).

From *The Pellegrini Collection, Part II*. NGC ID# 2572, PCGS# 87311

1878 7 TF Morgan Dollar, PR65 Cameo Seldom-Seen Reverse of 1878 Type

4732 1878 7TF Reverse of 1878 PR65 Cameo NGC. Ex: Pacific Rim Collection. The 8 Tailfeathers Morgan dollars were the first struck of the new design in 1878. Generous quantities of both the 8 Tailfeathers and 7 Tailfeathers coins were struck for circulation — Bowers' *Guide Book* reference estimates 750,000 of the former and 7.85 million of the latter.

The situation regarding proof Morgan dollars of 1878 is quite different. About 500 proof Morgan dollars were struck during the debut year of the 8 Tailfeathers type versus an estimated 250 of the 7 Tailfeathers proofs — both showing the Parallel Arrow Feathers Reverse of 1878. These 7 Tailfeathers coins in proof format are notable rarities.

The fields on both sides of this Gem Cameo proof 1878 7 Tailfeathers, Reverse of 1878 Morgan dollar are limpid pools of deep reflectivity, contrasting nicely against perceptibly frosted devices on both sides. The untuned, brilliant surfaces show excellent preservation and no significant contact. Parallel planchet striations from the planchet production are visible in the fields on both sides but neither distracting nor grade-affecting. The high, squared-off railroad rims encircling each side and the remarkably sharp strike detail throughout, as well as the deeply contrasted surfaces, mark this as a no-questions proof of this issue rather than a prooflike business strike. Appearances of high-grade examples of this proof rarity are infrequent and must be acted on accordingly. Census: 8 in 65 Cameo, 1 finer (2/16).

From *The Pellegrini Collection, Part II*. NGC ID# 2573, PCGS# 87312

1879 Morgan Dollar, PR66+ Cameo Champagne-Toned, Strongly Contrasted

4733 1879 PR66+ Cameo PCGS. The *Guide Book* gives a mintage of 1,100 Morgan dollar proofs in 1879, while Breen's *Proof Encyclopedia* cites a net distribution of 650 proofs. The certification totals at NGC and PCGS suggest the true mintage may lie somewhere in between. In any case, Cameo examples are scarce at the Premium Gem level and rare any finer. This high-end Premium Gem Cameo proof is a wonder to behold with deeply mirrored fields, frosty devices, and clean surfaces. A blush of light golden toning adds a degree of warmth to each side. Population: 18 in 66 (3 in 66+) Cameo, 6 finer (3/16). NGC ID# 27Z2, PCGS# 87314

1881 Silver Dollar, PR67 Cameo

4734 1881 PR67 Cameo PCGS. The year 1881 was the first full year of Morgan dollar production in which fewer than 1,000 proof coins were struck — 984 pieces, to be exact. This Superb Gem proof is distinguished from most survivors simply by being in so high a grade level — any Gem certified proof Morgan dollar is already rare — and far more so by the addition of the Cameo designation. An excellent strike and broad eye appeal are on display here. Delicate champagne and gold patina, strongest at the rims as usual, visits gleaming and beautifully preserved mirrors. The level of frostiness on the central devices is moderate but sufficient for a strong cameo effect. Population: 6 in 67 (1 in 67+) Cameo, 2 finer (1/16).

From The Pellegrini Collection, Part II. NGC ID# 27Z5, PCGS# 87316

1884 Silver Dollar, Ice-White PR67 Cameo

4735 1884 PR67 Cameo NGC. Few of the 875 proofs struck of this issue can possibly rival the technical preservation and aesthetic appeal of this wonderfully preserved Superb Gem. This highly impressive specimen exhibits razor-sharp definition on all design motifs and marvelous surface preservation throughout. Ice-white frosted devices seem to be suspended above watery, deep-mirrored fields. One of the finest known survivors from this popular proof issue. Census: 10 in 67 Cameo (2 in 67 ★ Cameo), 3 finer (2/16).

Ex: Central States Signature (Heritage, 4/2009), lot 3245; Chicago Signature (Heritage, 8/2011), lot 7385, brought \$10,925.

From The Pellegrini Collection, Part II. NGC ID# 27ZB, PCGS# 87319

1888 Morgan Dollar, PR67 ★ Cameo Possibly the Finest Certified Example

4736 1888 PR67 ★ Cameo NGC. Strangely, the Philadelphia Mint seems to have relaxed its standards on proof coins produced in the late 1880s. Many examples seen are softly struck at the centers and few show real cameo contrast. Prominent dealer Harlan P. Smith filed a formal complaint about the shoddy workmanship on proofs of this era and Q. David Bowers notes "Proofs of the era beginning about now are not on a visual par with those earlier in the decade."

Fortunately, the present coin is a happy exception to the rule. This spectacular Superb Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast profoundly with the frosty devices. The surfaces are impeccably preserved and Liberty's cheek is virtually pristine. The brilliant centers yield to vivid shades of greenish-gold and cobalt-blue at the peripheries. Overall visual appeal is tremendous. This coin should find a home in the finest collection or Registry Set. Census: 4 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (3/16). NGC ID# 27ZH, PCGS# 87323

1890 Morgan Dollar, PR66 Deep Cameo Strongly Contrasted Example

4737 1890 PR66 Deep Cameo PCGS. Struck to the small extent of only 590 pieces, proof Morgan dollars from 1890 can see considerable variation from coin to coin. Some examples are softly struck in the centers, and the contrast is usually low- to medium-intensity. Happily, this coin is a sharply detailed exception to the rule, with starkly contrasted frosty devices and liquid mirrored fields. Close inspection of the surfaces reveals only the most insignificant imperfections, and a few highlights of gold toning enhance the pristine fields. The eye appeal is strong. Population: 4 in 66 (1 in 66+) Deep Cameo, 1 finer (1/16).

Ex: Paul Taylor Collection / Chicago Signature (Heritage, 8/2011), lot 7365.

From The Pellegrini Collection, Part II. NGC ID# 2Z4R, PCGS# 97325

1893 Dollar, PR67 Cameo Just One Example Finer at PCGS

4738 1893 PR67 Cameo NGC. *Ex: South Beach Collection.* The proof mintage for this year was a scant 792 pieces, a low percentage of which survive today in such a spectacular state of preservation. This impressively contrasted Cameo specimen showcases unfathomably deep mirrors against thickly frosted devices. A thin peripheral circle of deep antique-gold color borders the obverse, and to a lesser extent, the reverse. Noticeable striking deficiency over the ear is a fairly common trait among proofs from the early 1890s. Nonetheless, this wonderful, carefully preserved specimen is undeniably worthy of a Superb collection. Census: 5 in 67 Cameo (1 in 67 ★ Cameo), 1 finer (2/16).

Ex: FUN Signature (Heritage, 1/2005), lot 30367; ANA Signature (Heritage, 10/2012), lot 5065.

From The Pellegrini Collection, Part II. NGC ID# 27ZN, PCGS# 87328

1894 Morgan Dollar, Brilliant PR67 ★ Rare as a Proof or Business Strike

4739 1894 PR67 ★ NGC. The present coin is among only eight proof 1894 Morgan dollars that have received the coveted Star designation from NGC, awarded for superior eye appeal. This fully brilliant and intricately struck Superb Gem proof appears to merit a Cameo designation, although the mint frost diminishes slightly on the cheek and neck. The fields are prominently mirrored, and there are no remotely mentionable indications of contact marks, hairlines, or other distractions. The proof 1894 has a mintage of 972 pieces and is in demand since the associated business strike is the rarest Philadelphia commercial issue. Census: 24 in 67 (1 in 67 ★, 1 in 67+★), 10 finer (2/16).

Ex: Chicago Signature (Heritage, 8/2011), lot 7387, realized \$10,925.
From The Pellegrini Collection, Part II. NGC ID# 2577, PCGS# 7329

1895 Morgan Dollar, PR61 Pleasing Lower-End Example Proof-Only Series Key

4740 1895 PR61 NGC. Only 880 silver dollars — all proofs — were struck in 1895. The *Annual Report of the Director of the Mint* contained an accounting error stating that 12,000 circulation strike dollars were also coined, but those are now known to have been of an earlier date, per research by Henry T. Hettger. For collectors, this leaves only proofs to fill the hole in their dollar collection. Date pressure on 1895 proofs is inordinately strong because of the popularity of the series.

This piece is deeply mirrored and shows light, scattered hairlines, the effects of which are greatly subdued by soft golden toning over each side. The lower grade is accounted for by a diagonal scratch below the eagle's left (facing) wing and a short, angling mark in the same area.

Ex: Long Beach Signature (Heritage, 9/2005), lot 6192. NGC ID# 27ZR, PCGS# 7330

1895 Morgan Dollar, PR64 Attractive Peripheral Toning Only 880 Pieces Struck

4741 1895 PR64 PCGS. The “King of Morgan Dollars” is the name often given to this proof-only issue, the single date that is missing from more collections than any other. While some collectors solve the problem by only collecting business strike Morgans, it is absolutely necessary to include this date in a complete collection of the series. Just 880 proofs were coined during the year for each silver denomination. While it is hard to estimate the number of survivors, it seems likely that 500 to 600 examples still exist. In *A Guide Book of Morgan Silver Dollars*, Dave Bowers gave “field populations” for each issue in various grades. For the 1895 proof Morgan dollar, the total of his field population was in the range of 751 to 1,075 coins, the higher figure substantially greater than the original mintage. Bowers population figures clearly seem too high, in our opinion.

This piece, a remarkable Choice proof example, has light silver-gray color over much of the obverse and reverse surfaces, with lovely blue, russet, and amber toning along the obverse and reverse borders. It is sharply struck with deeply mirrored fields and light frosted devices. Although not a Cameo proof, it exhibits pleasing contrast between the fields and devices. As always for this issue, all of the obverse and reverse design details are boldly rendered. It is an exceptional example for the grade, a coin that will please almost any collector.

Ex: Long Beach Signature (Heritage, 2/2007), lot 5820. NGC ID# 27ZR, PCGS# 7330

1895 Morgan Dollar, PR63 Cameo A Famous Series Rarity

4742 1895 PR63 Cameo NGC. The silver dollars that bore the Morgan design were authorized by the Act of February 28, 1878, better known as the Bland-Allison act after its sponsors. The Act amounted to a subsidy of silver miners, as millions of unwanted silver dollars piled up in Treasury vaults. The Act of July 14, 1890, more than doubled the per-month silver subsidy, and within three years, the nation's financial reserves were in peril.

The Act of November 1, 1893, brought sanity back, cutting off the silver miners' subsidy. Without the constant flow of domestic silver into the various mints, silver dollar production plunged. Philadelphia had struck more than 1 million silver dollars in 1892, but the numbers tell the tale: 378,000 pieces in 1893, 110,000 coins in 1894, and just 12,000 business strikes were reported for 1895. The emphasis, of course, is on *reported*, since no business strike survivors are known today. For generations, collectors have turned to proof 1895 dollars to fill the space.

The 1895 proof Morgan dollars belong to a sequence of "well-made" years in the series. They often show strong detail and contrast. Both elements are rewarding on this Select specimen, thanks to generous frost on well-defined devices. The fields are strongly mirrored beneath gold-gray patina, and arcs and dots of blue and deep amber appear along the rims. The fields are lightly hairlined, but this is a thoroughly pleasing example for the grade. Census: 8 in 63 Cameo, 89 finer (2/16).

Ex: ANA Signature (8/2010), lot 3367, which brought \$43,125.

From The Pellegrini Collection, Part II. NGC ID# 27ZR, PCGS# 87330

1895 Morgan Dollar, PR66 Cameo Sharply Contrasted Example of This Proof-Only Issue

4743 1895 PR66 Cameo NGC. Production of silver dollars in 1895 was less than spectacular, creating rarities for today's collectors. According to Mint records published in the Director's *Annual Report*, the Philadelphia Mint coined 12,880 silver dollars, including 880 proofs. In New Orleans the total mintage was 450,000, while San Francisco contributed 400,000 pieces. This is the only year from 1878 through 1921 that the total annual production was less than 1 million coins.

While 12,000 business strikes were reportedly coined at Philadelphia, none have ever surfaced. It is now believed that the business strike mintage record is merely an accounting entry for coins that were actually produced in 1894. Today, every known example is a proof, including those pieces that show evidence of circulation. It is believed that almost every 1895 proof Morgan dollar still survives today. Contemporary collectors acquired these proofs at the time of issue, having no other option. The few high-grade 1895-O and 1895-S pieces that exist are most likely pieces that were obtained by Southern and Western collectors at the time they were issued. Most of the latter pieces entered circulation, and neither was represented by any quantity stored in Treasury vaults.

This example, a Premium Gem Cameo, has deeply mirrored fields and highly lustrous devices with mostly brilliant silver surfaces that are enhanced by faint champagne toning. A few faint hairlines are evident, but the overall quality and aesthetic appeal are above reproach. Census: 16 in 66 Cameo (1 in 66+ Cameo), 18 finer (3/16). Ex: *Charlotte Money Show Signature* (Heritage, 3/2007), lot 1407. NGC ID# 27ZR, PCGS# 87330

1896 Dollar, PR66 Deep Cameo High-Quality Morgan Proof Issue

4744 1896 PR66 Deep Cameo PCGS. CAC. Many Morgan dollar proofs from the 1888-1895 period were plagued by striking problems, but an era characterized by high production values began in 1896. The present Premium Gem proof is a prime example of this high-quality date, exhibiting razor-sharp definition on all design elements and deeply mirrored reflective fields. The frosty texture of the devices provides profound cameo contrast with the virtually unmarked fields, and the black-on-white cameo flash creates incredible eye appeal. The proof mintage was a paltry 762 pieces. Population: 10 in 66 (1 in 66+) Deep Cameo, 12 finer. CAC: 3 in 66 Deep Cameo, 6 finer (1/16).

Ex: Paul Taylor Collection / Chicago Signature (Heritage, 8/2011), lot 7371, which brought \$19,550.

From The Pellegrini Collection, Part II. NGC ID# 27ZT, PCGS# 97331

1897 Morgan Dollar, PR67 Among the Finest

4745 1897 PR67 PCGS. The 1897 dollar saw a mintage of 731 pieces in proof format. Most still survive, if the population figures are any indicator; several hundred examples have been certified by PCGS and NGC. However, only 25 coins have been given the Superb Gem designation, and a mere seven pieces have been graded higher.

This PR67 specimen displays exceptionally smooth surfaces; Liberty's facial and neck features are as fresh as the day the coin came off the press. Low intensity silver-gray patination is accented with orange-gold, magenta, and lavender along portions of the borders. The design elements are strongly struck, including the eagle's breast feathers. A truly superb coin that is housed in a green PCGS holder. Population: 10 in 67, 2 finer (3/16).

Ex: Long Beach Signature (Heritage, 2/2007), lot 5823. NGC ID# 27ZV, PCGS# 7332

1897 Dollar, PR66 Deep Cameo Splendid Field-Device Contrast

4746 1897 PR66 Deep Cameo PCGS. The 1897 proof Morgan dollar is a well-produced issue, renowned among collectors for the splendid contrast between its fields and devices. This coin stands out in that regard, as it is the only Deep Cameo in PR66 at PCGS with a single PR67 Deep Cameo coin finer (1/16). The frosty devices are sharply detailed and provide a startling black-on-white cameo flash when the coin is tilted in the light. The fields are brilliant and profoundly mirrored. Tremendous eye appeal will entice many willing bidders to attempt to acquire this prize. As it was in its last appearance with us, this piece remains the sole finest Deep Cameo of the issue we have had the privilege to offer.

Ex: Paul Taylor Collection / Chicago Signature (Heritage, 8/2011), lot 7372, realized \$16,675.

From The Pellegrini Collection, Part II. NGC ID# 27ZV, PCGS# 97332

1898 Morgan Dollar, PR66 Deep Cameo Only 735 Pieces Struck

4747 1898 PR66 Deep Cameo PCGS. Only 735 proof Morgan dollars were produced in 1898. The issue was uniformly well-made and the coins are justly famed for their high quality. This delightful Premium Gem more than lives up to that reputation. The design elements are fully struck and richly frosted, and the fields are deeply mirrored, to produce a stunning white-on-black cameo flash when the coin is tilted in the light. The well-preserved surfaces show no mentionable distractions and a few hints of pale gold toning add to the outstanding eye appeal. Population: 10 in 66 Deep Cameo, 16 finer (2/16).

Ex: FUN Signature (Heritage, 1/2012), lot 7301. NGC ID# 27ZW, PCGS# 97333

1898 Morgan Dollar, PR67 Deep Cameo 735 Pieces Struck, High-Quality Issue

4748 1898 PR67 Deep Cameo PCGS. From a tiny mintage of 735 pieces, the 1898 proof Morgan dollar is justly celebrated in the series for its high quality and eye appeal. The typical example displays a sharp strike and bold cameo contrast, prompting Michael Fuljenz to comment, "This year was probably the best made in the entire series."

The present coin is a magnificent Superb Gem, with deeply mirrored brilliant fields and razor-sharp definition on all design elements. The richly frosted devices provide dramatic contrast with the reflective fields and the black-on-white cameo flash is stunning when the coin is tilted in the light. Eye appeal is terrific. Population: 15 in 67 (2 in 67+) Deep Cameo, 1 finer (3/16). NGC ID# 27ZW, PCGS# 97333

1900 Morgan Dollar, Flashy PR67 Cameo

4749 1900 PR67 Cameo NGC. The design elements of this Superb Gem Morgan dollar proof are fully struck, showing precise definition in all areas. The rich mint frost of the devices provides bold contrast with the deeply mirrored fields, and the surfaces are impeccably well-preserved. The black-on-white cameo flash is startling in its intensity when the coin is tilted in the light. Only 912 proof Morgan dollars were struck in 1900. Census: 14 in 67 Cameo (1 in 67 ★ Cameo), 8 finer (2/16).

Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4319, brought \$12,650.

From The Pellegrini Collection, Part II. NGC ID# 3MNH, PCGS# 87335

1904 Morgan Dollar, PR65 Cameo Extremely Rare With Contrast

4750 1904 PR65 Cameo PCGS. CAC. Cameo proof examples of this issue are perhaps *rarer* than the proverbial hen's teeth. This is the second time we have handled this lovely Gem Cameo PCGS proof example, and it and one PR66 Cameo NGC piece are the only representatives of the issue in high-grade Cameo that we have offered in the last eight years. Auction appearances at other companies are even sparser, according to our internal records. As we pointed out in this coin's last appearance with us, these coins were not intentionally produced with contrast; it was strictly a matter of chance of the random use of new dies that account for the few survivors that do exist. The fields on this piece are remarkably deep, making even the slightest frost on the devices seem significant. Each side is largely brilliant, save only for light peripheral toning. Population: 1 in 65 Cameo, 0 finer. CAC: 1 in 65 Cameo, 0 finer (1/16). The CAC endorsement of this coin is extremely important, as astute collectors will acknowledge.

Ex: *Summer FUN Signature* (Heritage, 7/2012), lot 4472, which brought \$21,850.

From *The Pellegrini Collection, Part II*. NGC ID# 2824, PCGS# 87339

1921 Morgan Dollar, PR63 Rare 'Chapman' Proof About 30 Pieces Struck

4751 1921 Chapman PR63 NGC. Two so-called proof strikes are known for the 1921 Morgan dollar issue: Chapman proofs and Zerbe proofs. However, in his *Silver Dollar Encyclopedia*, Dave Bowers remarks: "In my opinion, true Proofs with deep mirror surfaces are exceedingly rare. The situation is obfuscated, however, by a profusion of prooflike coins from hairlined dies sold as 'Zerbe Proofs,' or with other nomenclature." Bowers argues that only the Chapman proofs, ordered by Henry Chapman and "done clandestinely by or for George T. Morgan," can be considered veritable proof strikes. Production estimates for Chapman proofs vary widely. In 1993, Bowers noted that possibly 15 Chapman proofs were struck, while his more-recent *Guide Book of Morgan Silver Dollars* claims the mintage to be unknown, but "fewer than 30." Breen believed the total to be 12 pieces, and CoinFacts provides an estimate of between 30 and 40 proofs. The certification totals at NGC and PCGS show 64 submissions, including an unknown number of duplications.

The Select Chapman proof offered here boasts deep mirroring in the fields despite an overlay of golden hues, and razor-sharp definition typical of the issue. Contrast is minimal, as are distracting signs of contact that prevent a higher grade. This lot represents an important opportunity to acquire an excellent example of this challenging and sought-after proof issue. Census: 7 in 63, 15 finer (2/16).

From *The Pellegrini Collection, Part II*. NGC ID# 2579, PCGS# 7342

GOLD DOLLARS

1850-C Gold Dollar, MS63 Excellent Registry Set Contender

4752 1850-C MS63 PCGS. Variety 1. Only 6,966 gold dollars were struck at the Charlotte Mint in 1850, the second-smallest production total of the series. Doug Winter estimates the surviving population at 150-250 examples in all grades, leaving the 1850-C tied with the 1859-C as the second-rarest Charlotte gold dollar (the legendary 1849-C Open Wreath is the rarest). This attractive Select example exhibits sharply detailed design elements throughout, an unusual situation for this issue, as most examples seen have some flatness on the head and star centers. The lustrous yellow and orange-gold surfaces are lightly marked and eye appeal is quite strong. Population: 3 in 63, 0 finer (3/16). NGC ID# 25BG, PCGS# 7510

1856-S/S Gold Dollar, MS63+ Only Type Two Issue of the Year

4753 1856-S/S FS-501 MS63+ PCGS. All of San Francisco's gold dollar output — a meager 24,600 coins — was of the coveted (and fleeting) Type Two variety. In addition, no other Type Two gold dollars were coined at any U.S. mint in 1856, as the Philadelphia and Dahlonega gold dollars struck were of the Type Three design. The effects are twofold: Not only is the 1856-S a requirement for a complete mintmark or year set of Type Two gold dollars, but the S mintmark gives the 1856 Type Two pieces optimal collectibility.

The 1856-S Type Two is also an issue that is seldom seen in Mint State; most are lightly circulated. This Select PCGS example offers rich orange-gold luster on surfaces that show light die clashing on each side, with some small die cracks on the obverse. The strike is quite sharp, the eye appeal top-notch given the minimal contact marks. Population: 6 in 63 (1 in 63+), 3 finer (3/16). NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

PROOF GOLD DOLLARS

1858 Gold Dollar, PR66 Deep Cameo Tied for Finest at PCGS

4754 1858 PR66 Deep Cameo PCGS. Although Mint records are lacking, it is estimated the proof 1858 gold dollar had a limited mintage of only about 25 coins. Survival estimates are generally in the 15 to 18-coin range, although Garrett and Guth suggest as many as 20 pieces are known. Regardless of the precise number, this issue is far rarer than has been suggested by certified population data which records 33 appearances at NGC and PCGS combined (2/16). Virgil Brand had three specimens in his collection and Harry W. Bass, Jr. accumulated four. This is not a reflection of availability, but rather of rarity; these numismatists recognized the scarcity of the issue and sought to acquire as many pieces as possible.

The present coin is tied with one other example for finest certified at PCGS, an important consideration for Registry Set enthusiasts. This piece exhibits stark field-device contrast and showcases lovely yellow-gold color. The deep mirrors show a couple of Mint-made strike-throughs, but the visual quality is uninhibited. Population: 2 in 66 Deep Cameo, 0 finer (2/16). NGC ID# 25DZ, PCGS# 97608

1887 Gold Dollar, PR66 Cameo

4755 1887 PR66 Cameo NGC. The fields are quite reflective and contrast nicely against the reddish-orange, frosted devices on this well-struck and well-preserved Premium Gem proof. The razor-sharp wire rim, distinct denticulation throughout, and occasional glimpses of orange-peel texture all mark the characteristics of a no-questions proof, rather than a prooflike circulation strike. Slightly more than 1,000 representatives of this proof issue were struck, of which today Bowers estimates that no more than 140 survive. An attractive example of this late-series gold dollar. Census: 11 in 66 Cameo, 4 finer (3/16). NGC ID# 25EX, PCGS# 87637

EARLY QUARTER EAGLES

1796 No Stars Quarter Eagle, BD-2, VF30 One-Year Type, Excellent Midgrade Example

4756 1796 No Stars on Obverse, BD-2, R.4, VF30 PCGS. The fledgling Mint was spread quite thin in 1796, but even so, it was the first year since the operation began that every authorized circulating denomination, from half cent through eagle, was struck in some quantity. (The next time this would happen would be in 1849.)

In the case of the 1796 No Stars quarter eagles it would be a minuscule amount indeed, a reported 963 pieces split between the two die varieties known today. The Bass-Dannreuther reference succinctly says of the 1796 No Stars quarter eagle:

"This one-year type coin has been in demand among collectors of U.S. coins since the dawn of collecting in the early to mid part of the 19th century. By the time there was an organized marketplace a number of years later, these first quarter eagles were hammered down and sold after lengthy floor battles among the bidders, mostly dealers representing collectors, as they always had this coin on their want list."

No exact mintage figure can be given for the two varieties of 1796 No Stars, despite the existence of two deliveries of 66 coins and 897 coins that some have equated to the two varieties. But some of the 432 coins delivered in January 1797 could have been of the 1796 No Stars rather than the 1796 With Stars; or, as Bass-Dannreuther point out, some of the 897 coins could have been the With Stars variety, so that fewer than 963 of the No Stars varieties were struck.

This example obviously stayed in circulation for many years, or as the BD reference above states, until the demand from an organized marketplace caught up with the meager supply of these pieces. The surfaces show even wear throughout. Both sides display unquestionably original "old gold" color with deeper accents within and surrounding the devices. Only the slightest handling marks can be seen, and no large or distracting abrasions appear. This is an excellent midgrade example of this one-year type.

Ex: Houston Signature (Heritage, 12/2013), lot 3792, which brought \$94,000. NGC ID# 25F2, PCGS# 45501 Base PCGS# 7645

**1802/'1' Quarter Eagle, BD-1, XF40
Green CAC, Green Label Holder**

4757 1802/'1' BD-1, R.4, XF40 PCGS. CAC. Bass-Dannreuther Die State b/c, the latest known state. Recent research has questioned the overdate status of the 1802 quarter eagle, although the green label holder in which the present coin resides designates it an 1802/1. This one obverse die was paired with three different reverses for 1802-dated coinage. BD-1 is distinctive for a heavy horizontal die line that extends left into the wing from the left corner of the shield. John Dannreuther estimates no more than 120 examples survive in all grades.

This XF coin displays attractive olive-gold surfaces with hints of reddish patina tucked in the crevices around relief elements. The reverse shows bits of luster in the peripheral fields. The strike is even and well-centered, although not full — remnants of planchet adjustment marks were not completely struck out of the reverse over the high points of the eagle and shield. The CAC green label only adds to the appeal. Population: 4 in 40, 66 finer; CAC: 1 in 40, 22 finer (3/16). PCGS# 45506 Base PCGS# 7650

**1806/5 Quarter Eagle, AU53
Rare BD-2 Die Marriage**

4758 1806/5 7x6 Stars, BD-2, High R.5, AU53 NGC. Bass-Dannreuther Die State c/b, obverse cracked and lapped. The strike is bold and even, although the lower obverse and upper reverse rims are slightly ill-defined. Some reflective surface appears in the protected regions of the fields amid warm honey-gold patina, and a few minor marks are consistent with the grade. A horizontal strike-through (mint-made) in the left obverse field should not be mistaken for a post-strike abrasion.

BD-2 is the rarer of the two 1806 quarter eagle varieties with perhaps only 25-35 pieces known in all grades. This same die pair was previously used for the 1805-dated coinage — the head die was overdated and annealed for 1806 usage. The tail die was well-made and lasted through the remainder of Draped Bust quarter eagle coinage, as well as more than 150,000 1807 dimes. Cross-usage of reverse dies between dimes and quarter eagles during this period was not uncommon, as the two denominations shared the same design and were nearly identical in diameter. Census: 1 in 53, 12 finer (3/16). NGC ID# BFXV, PCGS# 45513 Base PCGS# 7655

1833 Quarter Eagle, BD-1, R.5, MS66

Ex: James A. Stack, Sr., The Pogue

'Duplicate'

Wonderful Preservation

4759 1833 BD-1, R.5, MS66 PCGS. Ex: D. Brent Pogue, and encapsulated in the special Pogue PCGS holders from the Stack's Bowers sales. Bass-Dannreuther Die State a/c. Only a single die pair was apparently employed — only one is known, and the odds against a second die pair appearing, while not nil, are extremely low — for the meager mintage of 1833-dated quarter eagles, recorded as 4,160 pieces. This was a typical mintage for all of the 1829-1834 With Motto dates of the Reduced Diameter quarter eagle issues, all struck to the extent of about 3,400-4,500 pieces per year.

The obverse die was obviously used only for 1833-dated quarter eagles, but the reverse die was carried over from 1830 and used consecutively until the series ended in 1834, accounting for the die lapping on the reverse (which apparently happened after the dies clashed in 1831) of which John Dannreuther comments, "distinguishing between State a and State c is nearly impossible." (The clashed Die State b is quite rare.)

Regarding the apparent die cracks joining the knobs in the date, Dannreuther notes that they are from defective digit 3 punches, as they also appear on the 1833-dated silver dimes.

While the 1829-1832 quarter eagle issues are all very scarce, the 1833 is rated rare at R.5 according to Bass-Dannreuther, and the 1834 With Motto is very rare or R.6. This means that 60 to 80 pieces are estimated to survive of the 1833 quarter eagle, but in any case, this phenomenal Premium Gem is certainly among the few finest survivors. The luster is fully prooflike throughout both sides, amid excellent honey-gold patina with scattered orange accents and simply no marks worthy of mention. The strike is sharp on all obverse stars, although the lock before Liberty's ear is weak (weaker than on the Bass specimen, which Dannreuther calls a proof), and the first two lines in the shield show minor joining of some of the stripes, and strike weakness shows along the left shield border. Raised die lines show on the lower portrait of Liberty, and a small planchet depression above 83 in the date.

But these are quibbling trifles on a coin in such a wonderful state of preservation, offering eye appeal that is simply off the charts. PCGS reports only this single 1833 quarter eagle in MS66, along with one MS66+ marginally finer, both depicted in all their splendor on the CoinFacts website. Both of those coins hail from the D. Brent Pogue Collection, Part II offering, where this piece was offered as the "The James A. Stack 1833 Quarter Eagle — A Duplicate Only Pogue Could Own."

Ex: James A. Stack, Sr. Collection (before 1949); James A. Stack, Jr.; James A. Stack, Sr. Collection (Stack's, 10/1994), lot 849; Silvano DiGenova to the Great Lakes Collection; Larry Hanks, private trade (2000); D. Brent Pogue; D. Brent Pogue Collection, Part II (Stack's Bowers Galleries / Sotheby's, lot 2057), which realized \$129,250. NGC ID# BFWC, PCGS# 45527 Base PCGS# 7673

CLASSIC QUARTER EAGLE

1836 Classic Head Quarter Eagle, MS64+ Block 8, Variety 15

4760 1836 Block 8, Second Head of 1837, Breen-6144, Variety 15, R.2, MS64+ PCGS. CAC. The 1836 Classic Head quarter eagle claims a substantial mintage of 547,986 pieces. This coin represents the Second Head of 1837 Variety 15, with a Block 8 date style and a detached berry in the olive branch on the reverse. In general, the Block 8 varieties are more elusive than their Script 8 counterparts. This high-end Choice example offers well-detailed design elements, with just a touch of the usual softness on Liberty's curls below the band and the eagle's leg. The pleasing orange and rose-gold surfaces radiate vibrant mint luster, and only minor signs of contact are evident. Population: 11 in 64 (1 in 64+), 4 finer (3/16). NGC ID# 25FU, PCGS# 97694

PROOF LIBERTY QUARTER EAGLES

1904 Quarter Eagle, PR64 Deep Cameo Tied for Finest at PCGS

4761 1904 PR64 Deep Cameo PCGS. From a limited mintage of 170 pieces, the 1904 Liberty quarter eagle is one of the most challenging proofs of the 20th century series. Although some other dates have even smaller production totals, the 1904 has a lower survival rate than most proofs of the era, making unimpaired specimens particularly elusive.

The present coin is a spectacular Choice example, with sharply detailed, frosty design elements that contrast profoundly with the deeply mirrored fields to produce a stunning cameo effect. The yellow-gold surfaces are well-preserved, with minimal signs of contact. Population: 2 in 64 Deep Cameo, 0 finer (3/16). NGC ID# 3W99, PCGS# 97930

1906 Quarter Eagle, PR65 Cameo Blatant Eye Appeal

4762 1906 PR65 Cameo NGC. Cameo proof gold coinage from the post-1902 period — the year in which the Mint eliminated its earlier production method that produced deeply contrasted surfaces between reflective fields and frosted devices — is quite rare and seldom seen. Such pieces today exist largely as a matter of chance, perhaps struck as a handful of first strikes from dies before the contrast ground down between the two elements, raised and flat (or flat and incused, in the die).

This is a lovely, well-preserved Gem proof with substantial contrast between the inky-black, reflective fields and honey-gold frosted devices. The strike is tack-sharp throughout both sides. One tick on Liberty's jaw and one on her neck are of little consequence compared to the blatant eye appeal on display. Census: 9 in 65 Cameo, 38 finer (3/16). NGC ID# 288W, PCGS# 87932

INDIAN QUARTER EAGLES

1911-D Quarter Eagle, MS64 Inaugural Denver Key, Strong D

4763 1911-D MS64 PCGS. Strong D. The 1911-D is a key date and a rarity in high grade. Choice examples are highly sought-after as a more affordable alternative to headlining MS65 coins. This was the first quarter eagle issue struck at the Denver Mint and also the first branch mint quarter eagle produced since 1879. Even in 1911, the denomination was not particularly needed in daily commerce. The *Annual Report of the Director of the Mint* ending June 1930, stated: "There is a call for [quarter eagles] each year, about the holiday season, for gift purposes, and during the remainder of the year they drift back to the Treasury. ... This piece is too small for ordinary circulation, and I recommend that it be formally discontinued by act of Congress."

The quarter eagle did serve a purpose in banks and to a lesser extent as backing for gold certificates, so its coinage was continued. But the inaugural Denver production amounted to only 55,680 pieces. This issue was lightly circulated, resulting in a supply of AU coins today. Mint State pieces typically show moderate abrasions. This Choice coin displays sharp detail and satiny orange-gold luster. A few minor grazes in the fields are unobtrusive. PCGS lists only 24 coins finer (3/16).

From *The Indian Rocks Collection*. NGC ID# 7KR7, PCGS# 7943

PROOF INDIAN QUARTER EAGLES

1914 Indian Quarter Eagle, MS65 Lower-Mintage Better Date

4764 1914 MS65 PCGS. CAC. Collectors less familiar with the series might group the 1914 Indian Head quarter eagle with the 1913 and 1912 issues, but such a move would be in the wrong direction. The 1914 has more in common with the 1914-D and the 1911-D.

While the 1912 saw a production of more than 600,000 coins and the 1913's was 722,000 pieces, the 1914 mintage of 240,000 examples was the second-lowest of the series. In Gem condition the 1914 is downright rare. Considering the numbers certified at NGC and PCGS in Gem and finer grades, the 1914 appears second only to the 1914-D, with the key 1911-D in third place in total Gems graded.

While this coin's MS65 grade is a combination of factors, they all work out, in essence, to *eye appeal*. No marks are visible without a loupe, and under magnification the few marks present are away from the focal areas, as expected. The color is wonderful antique-gold, with mattelike surfaces and good luster. The strike is sharp, well-defined on the headdress feathers and the eagle's plumage. PCGS has certified only three numerically finer examples, with three more at NGC (3/16).

Ex: *ANA Signature (Heritage, 7-8/2008)*, lot 1913. NGC ID# 7KRA, PCGS# 7946

1909 Quarter Eagle, PR63 Scarce 'Bright' Proof Issue Only 139 Pieces Struck

4765 1909 PR63 PCGS. After collectors expressed their displeasure with the matte proofs in 1908, gold proofs in 1909 and 1910 were struck on planchets that received no pre- or post-striking treatment. They are certainly more brilliant than matte proofs, but little can be said about the surfaces that differentiates them from strikes for circulation other than exceptional sharpness of detail. As a result, unsold proofs from these years could be dropped into circulation. This example certainly shows the sharpness of strike expected, and the surfaces overall are brighter than a circulation strike with just a hint of even reddish patina. Only the slightest hairlining can be seen with magnification. Of the 139 proofs struck in 1909, possibly half remain in all grades. Population: 21 in 63, 20 finer (3/16). NGC ID# 289H, PCGS# 7958

1910 Indian Two and a Half, PR64 'Bright' or 'Roman' Finish Example

4766 1910 PR64 PCGS Secure. CAC. According to Mint records, the Philadelphia Mint struck a series-high 682 proof Indian quarter eagles in 1910. Some numismatists have questioned the accuracy of these mintage figures, while others have suggested that the production total may be accurate, but an unusually high percentage of the proofs went unsold, due to collector dissatisfaction with the "Roman Gold" finish used on proofs in 1909 and 1910.

Alternatively, Roger Burdette theorizes that the high mintage figures were the result of increased orders by speculators during the year, because business-strike quarter eagles were not produced until very late and contemporary numismatists may have believed proofs would be the only examples available for the date. Once a substantial mintage of 492,000 quarter eagles was produced, in December of 1910, speculators simply spent the extra proof examples they had purchased. The "Roman Finish" proofs were similar in appearance to regular-issue coins, aside from their square rims and sharper-than-average strike, and a short time in circulation would render them indistinguishable from business strikes. It is possible that a large number of proof coins are masquerading as business strikes in the population data today. In any case, the 1910 proof Indian quarter eagle is not significantly more available than the other proof issues of the series in today's market, despite the large reported mintage.

The present coin is a sharply detailed Choice specimen, with brightly lustrous yellow-gold surfaces that show only minimal signs of contact. Outstanding eye appeal compliments the high technical quality. Population: 33 in 64 (1 in 64+), 18 finer (3/16). NGC ID# 7KRP, PCGS# 7959

1915 Quarter Eagle, Magnificent PR67 Tied for Finest Certified Final Matte Proof Issue

4767 1915 PR67 PCGS. "This is the final year of Proofs issued for this series. Collector demand had fallen in most years, and Proof gold coinage was halted in 1916 for regular-issue gold denominations." So Garrett and Guth begin their entry for the proof 1915 quarter eagle in their *Encyclopedia of U.S. Gold Coins*. More at length on this theme, they write:

"Long considered to be the key date to the Proof series, the 1915 issue has earned its reputation as a rarity with few offerings and constant demand. ... [T]he 1915 quarter eagle Proof has always commanded attention, with a tiny mintage of just 100 pieces. Also, being the final year of issue, precious few of these coins remain in gem grades to satisfy collector demand."

Perhaps only 60 to 75 pieces are extant in all grades. This Superb Gem, one of just six coins so-certified by PCGS with none finer (3/16), is among the most remarkable representatives known. Both sides are exquisitely preserved and display rich orange-gold color. The texture is granular, in accordance with the notes by Garrett and Guth, who state: "The 1915 Indian Head quarter eagles were struck in the identical finish as the 1914 issue, employing the darker and coarser finish to the coins." With its sharp strike and great all-around eye appeal, this absolutely incredible coin deserves a place in the finest classic gold collection. NGC ID# 289P, PCGS# 7964

THREE DOLLAR GOLD PIECES

1854-O Three Dollar Gold, AU58 Only New Orleans Three Dollar Issue

4768 1854-O AU58 NGC. **Variety 2.** The 1854-O is always in demand as the only three dollar gold piece from the New Orleans Mint. Despite the low recorded mintage of 24,000 pieces, the 1854-O can be found in lower circulated grades without too much trouble, but high-grade examples are quite elusive. This attractive near-Mint specimen exhibits strongly impressed design elements throughout, but the dies were lapped to remove clash marks at some point in the production run, resulting in some lack of detail on both sides. The pleasing yellow-gold surfaces are lightly abraded and retain much of their original mint luster. This issue is popular with branch mint type collectors, as well as series specialists. Census: 92 in 58 (1 in 58+), 21 finer (3/16). NGC ID# 25M5, PCGS# 7971

1855 Three Dollar Gold, MS64 Lustrous, Colorful Example

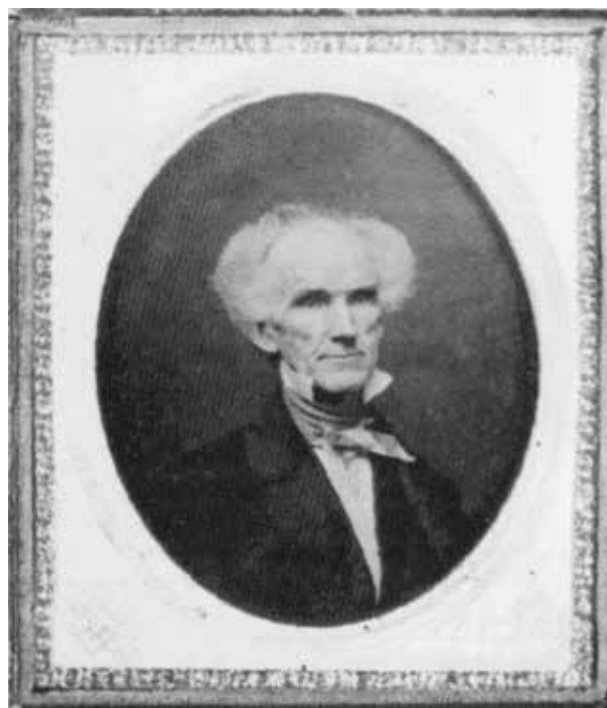

4769 1855 MS64 PCGS. CAC. Mintage of three dollar gold pieces declined considerably in 1855, the second year of the denomination. The reported mintage of 50,555 pieces was enough to ensure an adequate supply of circulated survivors, but the 1855 is an elusive issue in MS64 condition, and finer examples are very rare. This attractive Choice specimen exhibits well-detailed design elements and lightly marked orange-gold surfaces with especially vibrant mint luster on both sides. Eye appeal is excellent and the 1855 is popular with type collectors and series specialists alike. Population: 25 in 64 (2 in 64+), 3 finer (3/16). NGC ID# 25M6, PCGS# 7972

1882 Three Dollar, MS64+ Low-Mintage Gold Issue

4770 1882 MS64+ PCGS. CAC. Only 1,500 business-strike three dollar gold pieces were struck at the Philadelphia Mint in 1882, all delivered in a single group on December 23 of that year. A small mintage of 76 proofs were also struck and delivered at intervals throughout the year. Because the regular-issue mintage was so small, most examples seen have prooflike surfaces, causing much confusion for early catalogers. Fortunately, the dies for the business-strike coins show a crescent-shaped remnant of an undertype 2 above the final digit in the date, making it easy for present-day numismatists to tell the issues apart.

The coin offered here is an attractive high-end Choice example, with well-detailed design elements and well-preserved orange-gold surfaces. The surfaces show the typical prooflike reflectivity of this issue and eye appeal is outstanding. Population: 39 in 64 (15 in 64+), 12 finer (3/16). NGC ID# 25N5, PCGS# 8004

James B. Longacre

PROOF THREE DOLLAR GOLD PIECES

**1858 Three Dollar Gold, PR65+ Cameo
Very Rare Landmark Proof Gold Issue
Finest Certified at PCGS, Ex: Trompeter**

4771 1858 PR65+ Cameo PCGS. CAC. The Philadelphia Mint began its commercial proof set offerings in 1858 and the program was met with gratifying enthusiasm by the general public. A substantial number of minor and silver proof coins were sold, but gold proofs were less popular, due to their higher face value. Mintage figures for proofs were not recorded, but the number of three dollar proofs distributed was undoubtedly small. The gold proofs were sold individually for the most part, but complete sets could be ordered. One such set was offered in lot 712 of the Catalogue of American and Foreign Coins (W. Elliot Woodward, 10/1860):

"1858 A most magnificent set of proofs, comprising \$20, \$10, \$5, \$3, \$2, \$1."

Perhaps 8-10 examples of the 1858 three dollar gold piece survive today in all grades, with several recent offerings in impaired condition. The small supply for collectors is further reduced by the coins in institutional holdings, one in the collection of the American Numismatic Society, one in the Harry W. Bass, Jr. Foundation, and one in the Smithsonian Institution.

The 1858 three dollar gold piece also boasts a small business-strike mintage of 2,133 pieces, and high-quality coins in that format are just as rare as proofs. Q. David Bowers and Doug Winter provide some diagnostics to help distinguish between proofs and prooflike business strikes:

- On the obverse, the forward plume of the headdress was polished from the die.
- On the reverse, the lower right part of the 5 in the date is positioned over the highest peak of the ribbon bow. (Also seen on strikes for circulation.)
- The mirror surfaces is often incomplete on the obverse.
- Lint marks are commonly seen.

The present coin is a delightful Plus-graded Gem from the famous Trompeter Collection. Ed Trompeter was a connoisseur, and he assembled the finest gold proof collection of all time. This piece offers sharply detailed design elements throughout, and the deeply mirrored fields provide bold cameo contrast with the frosty devices. The yellow and orange-gold surfaces are well-preserved, but a characteristic number of lintmarks are present, including one near the chin, one near the base of I in UNITED, another in the reverse field, above the left top of the wreath, and one near the lower knob of the 3. Eye appeal is terrific. The leading grading services have combined to certify a total of nine 1858 three dollar gold pieces in proof format, undoubtedly containing some resubmissions and crossovers. This piece is the single-finest certified example at PCGS, by virtue of its Plus designation (2/16). Advanced collectors and Registry Set enthusiasts should bid accordingly.

Ex: Ed Trompeter Collection (Superior, 2/1992), lot 100. NGC ID# 289W, PCGS# 88021

1888 Three Dollar Gold, PR66+ Cameo The Only PR66+ at PCGS; None Finer

4772 1888 PR66+ Cameo PCGS. CAC. The year 1888 saw the highest proof mintage of any three dollar gold piece with 291 examples coined. Perhaps half or more of those pieces survive today. This issue is clearly the most plentiful proof issue of the series, and it is ideal for type collectors. Of course, series specialists still need an example, as do those who are forming proof sets of the year.

In all grades, PCGS and NGC have a combined certified population of 236 submissions, although that total undoubtedly includes an unknown number of resubmissions and crossovers. This example is the solitary Plus-designated Premium Gem Cameo proof at PCGS. That service has also graded 15 PR66, seven PR66 Cameo, and one PR66 Deep Cameo (3/16). Despite the high mintage, this piece and the PR66 Deep Cameo are the two finest examples that PCGS has certified.

A prominent outline is visible at the top left part of the wreath on these proofs, while that feature is nearly invisible on circulation strikes from this die pair. This example shows the watery texture in the fields that is invariably found on 19th century proof gold coins. The late David Akers called this feature an “orange peel” texture that is an equally appropriate description. The strike is excellent as expected, and the surfaces are pristine. Deeply mirrored field contrast with the satiny devices, providing excellent eye appeal to this brilliant yellow-gold proof. NGC ID# 28AX, PCGS# 88052

EARLY HALF EAGLES

**1795 Half Eagle, BD-1, AU Details
Sharp, Even Strike**

4773 1795 Small Eagle, BD-1, R.5 — Cleaning — PCGS Genuine. AU Details. The first half eagles coined at the infant Mint in Philadelphia were dated 1795, and totaled 8,707 pieces. Eight obverse and 10 reverse dies were needed, as the Mint's hardening process was far from perfect, and die life was minimal. There are 12 Small Eagle 1795 die pairings known. BD-1 is believed to have been the first struck. There are only 40 to 50 surviving examples known, per John Dannreuther, which are understandably sought-after.

This piece is unusually bold on the eagle's breast, the stars, and Liberty's hair curls. The surfaces are unnaturally bright due to light cleaning, but there are no distracting abrasions. Hairlines are minimal. The strike is even and well-centered — not always the case with coins produced on a screw press. The type collector will find much to appreciate about this coin. NGC ID# 25ND, PCGS# 519849 Base PCGS# 8066

**1795 Capped Bust Right Half Eagle
AU Details
First United States Gold Issue, BD-1**

4774 1795 Small Eagle, BD-1, R.5 — Improperly Cleaned — NGC Details. AU. Bass-Dannreuther Die State c/b. The first gold coins struck at the U.S. Mint were the 744 Capped Bust Right half eagles delivered on July 31, 1795. Although Mint records indicate 8,707 half eagles were struck at the Philadelphia facility that year, with 12 die varieties known for the date, numismatists believe the rare BD-1 half eagles were the first ones struck. The BD-1 is identified by the position of the flag of the 5 embedded in the bust, star 11 away from the Y in LIBERTY, and the leaves touching the bases of U and N in UNITED. The BD-1 has an estimated surviving population of 40-50 examples in all grades and it is an important issue for type collectors, as well as series specialists.

This still-attractive example exhibits strongly impressed design elements, with just a touch of wear on the high points. The orange-gold surfaces show a number of minor marks and grazes, but no large or distracting abrasions. Traces of prooflike reflectivity cling to sheltered areas, despite some evidence of a light cleaning. NGC ID# 25ND, PCGS# 519849 Base PCGS# 8066

1795 Large Eagle Five, BD-15, AU53 Ex: Hilt Collection

4775 1795 Large Eagle, BD-15, High R.5, AU53 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State b/c, displaying branching die cracks on the lower reverse. The 1795 Heraldic Eagle (or Large Eagle) five dollar gold pieces were all struck in mid- to late 1797 or possibly in 1798. The issue was certainly struck after the 1797 BD-5 coins according to the Bass-Dannreuther reference, but the exact striking sequence is unknown. Perhaps as many as 500 to 1,000 pieces were produced of the BD-15 die pair, but only 30 to 35 coins are estimated to survive.

The date is recut, most obviously on the 1(7)95. The 9 is positioned lower than the other numerals. On the reverse, the A of AMERICA is diagnostic, sitting on wing feather 4 unlike any other 1795 Large Eagle variety. Multiple die breaks are seen through and around the eagle's tail. The obverse die state is confirmed by a lengthy crack that starts at the edge near star 10 and proceeds down through the hat, hair, and to the neck.

No 1795 Large Eagle fives appear at auction with any frequency, although the occasional opportunity does arise. When it comes, the chances are it will be an offering of the BD-15 variety to be pursued not only by date and variety collectors, but also by those who need a 1795 example for type.

Sharp detail remains throughout the surfaces of this appealing, green-gold coin. The fields display prooflike character — especially on the margins surrounding the stars and legend. Liberty's cap and hair strands are boldly detailed. The eagle is a bit weak at the head, neck, and scroll center, although it is normal softness for the assigned grade. The wings and wingtips, shield, and talons are crisp and frosted. The fields and devices show only minor abrasions commensurate with the About Uncirculated designation. Early gold specialists of all inclinations will be on high alert when this attractive lot is called.

Ex: Liberty USA Collection / FUN Signature (Heritage, 1/2015), lot 4277, which brought \$76,375. NGC ID# 25NK, PCGS# 519869 Base PCGS# 8075

1802/1 Half Eagle, BD-8, AU58 Copious Mint Luster, Great Type Coin

4776 1802/1 BD-8, R.4, AU58 PCGS. Bass-Dannreuther Die State c/b. Two overdated obverse dies were combined with seven different reverse dies to manufacture eight different die varieties for the 1802/1 half eagles, were struck to the extent of 53,176 pieces — the largest production for the denomination from 1795 until 1808. This BD-8 variety shows the Left Overdate die (BD calls it High Overdate) that was used on the BD-6, BD-7, and BD-8, showing the underdigit 1 shifted farther left, and with star 13 slightly lower and closer to the bust than on the Centered Overdate varieties, BD-1 through BD-5. The reverse here shows the last S to the far right of a cloud and the upright of E in STATES centered over a gap between clouds. The T's are perfect, showing no missing feet. This is a lovely golden-blond, lightly circulated example that shows the usual die clashing above the date and die cracks through UNI(TED). Copious luster enlivens both sides of this attractive type coin, showing minor strike weakness confined to the lower reverse. NGC ID# 25NX, PCGS# 519889 Base PCGS# 8083

1803/2 Half Eagle, BD-4, AU58 Late-State Dies With Obverse Cud

4777 1803/2 BD-4, R.4, AU58 PCGS. One of many blundered, challenged dies from the early Mint, this overdate 1803/2 BD-4 half eagle also shows the late state of the obverse, with a rectangular cud that extends from beneath the right side of the 8 past the 03 to end four dentils further along toward the right. The immediately apparent overdate and die cud complement the long die cracks that extend past star 1 on the left and below star 13 on the right. Another crack connects stars 1-3 on the left. Several other cracks appear on the reverse of this doughty die, which saw further uses in 1804 before apparently disintegrating. Generous luster covers both sides of this honey-gold, lightly circulated coin, a top-notch potential acquisition for a fine type set. NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

1804 Half Eagle, BD-1, AU58 Well-Struck Small 8 Example

4778 1804 Small 8, BD-1, High R.4, AU58 NGC. Bass-Dannreuther Die State a/a. BD-4, with an estimated survival of just 70 to 90 coins, is actually one of the more plentiful varieties of the scarce 1804 half eagle. Of the seven known die combinations, BD-1 and BD-2 are about tied for second-most often seen, while BD-7 is the most frequently encountered, with 100 to 150 examples believed known. This piece is notably well-struck, with particular mention of the strong borders and unusually sharp hair curls and shield stripes. Slight high-point friction softens the finer details. Both sides exhibit subtle orange-gold overtones in the recesses, with brighter yellow-gold over the exposed surfaces. An appealing example of this sought-after date in the Draped Bust half eagle series. PCGS# 519891 Base PCGS# 8085

1805 Five Dollar, AU55, BD-2 Near-Terminal Obverse Die State

4779 1805 BD-2, R.4, AU55 PCGS. CAC. Bass-Dannreuther Die State g/c. A branch off of the bisecting obverse die crack identifies this near-terminal die state. A wonderful early half eagle that has unmarked honey-gold surfaces and ample billowy luster. The strike is intricate in the centers, and shows incompleteness only near the junction of the left (facing) wing to the shield. Multiple sets of bold clash marks will delight the collector, and the upper reverse is lightly strike doubled. An oval depression on the drapery is as made, caused by a tenacious lump of material that stuck to the obverse die and was struck into successive examples.

Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4861. NGC ID# 25P4, PCGS# 45616 Base PCGS# 8088

LIBERTY HALF EAGLES

1809/8 Capped Bust Left Five, AU53 BD-1, Only Die Variety for the Date

4780 1809/8 BD-1, High R.3, AU53 PCGS. Bass-Dannreuther Die State b/b. The only dies for the date. This attractive AU53 example shows just a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. No planchet adjustment marks are evident and eye appeal is strong for the grade. A date collection (1807 to 1812) for the Capped Bust Left type is within reach of most advanced numismatists, something that cannot be said for most pre-1834 gold types. But a *Guide Book* variety collection for the series is impractical, due to the great rarity of the 1810 Small 5. NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

1839-D Five Dollar, AU55 Debut Liberty Head Type

4781 1839-D AU55 PCGS. Variety 2-A. The 1839-D half eagle is a distinct one-year type. Christian Gobrecht's Liberty Head obverse replaced William Kneass' Classic Head design in this year, but the Liberty portrait is modeled slightly more artistically than is seen on the modified obverse of 1840 and later issues. The 1839-D shows a more pronounced curvature to the neck truncation, and the portrait is better distanced from the surrounding stars. The mintmark is also on the obverse on the '39-D and appears on the reverse on all subsequent issues.

This issue is scarce in all grades with fewer than 225 pieces believed extant. Mint State pieces are rare. The present Choice AU representative displays bold detail with deep orange-gold patina. The surfaces are lightly abraded, as is typical of the issue. Population: 11 in 55, 12 finer (3/16). NGC ID# 25S9, PCGS# 8193

1849-D Half Eagle, Seldom-Seen MS61

4782 1849-D MS61 PCGS. Variety 25-S, the usually seen variety with the top of the D mintmark enclosing a triangular shape against the lower olive branch and the tip of the fletchings.

More than \$225,000 in domestic gold was deposited at the Dahlonega Mint in 1849, more than 92% of all national deposits. The bulk of the gold was coined into half eagles, a mintage of 39,036 pieces, with gold dollars and quarter eagles making up the balance. Most 1849-D half eagles are found well-circulated, usually down to lower AU or XF grades. This Mint State example offers excellent eye appeal and a nice bold strike on khaki-gold surfaces that display top-notch luster. Scattered small contact marks account for the grade, but few are overt. Population: 1 in 61, 8 finer (3/16). NGC ID# C5XE, PCGS# 8242

1863-S Half Eagle, AU55 Scarce in All Grades Single Finest at CAC

4783 1863-S AU55 PCGS. CAC. The 1863-S Liberty five had a small mintage of 17,000 pieces, but even more impressive is the low survival rate: just 60-75 coins, per PCGS. Our auction archives support this estimate, and the 104-coin combined population of PCGS and NGC is likely inflated, particularly in the upper AU grades where NGC especially shows a disproportionately large number of submissions. This is likely due to the rarity and extremely high value of Mint State coins, of which there are only two certified (both at PCGS). This Choice AU PCGS coin displays orange-gold surfaces with light chatter in the fields and bits of luster in the protected regions. The strike is sharp, and eye appeal is pleasing. This is the sole finest of just five coins endorsed by CAC. Population: 9 in 55, 6 finer (3/16). NGC ID# 25VT, PCGS# 8295

INDIAN HALF EAGLES

1909-O Five Dollar Indian, AU55

Attractive Example of This Low-Mintage Key

4784 1909-O AU55 PCGS. By 1909, the Louisiana branch mint faced strong competition from the San Francisco and Denver Mints as its own machinery and infrastructure deteriorated. Doug Winter explains that "it became increasingly more difficult to justify the cost of operations in New Orleans," and coin production ceased entirely by year's end. The 1909-O five is ever-popular as a single-year type; it is the only Indian Head half eagle struck at the New Orleans Mint and the facility's final gold coin issue. Moreover, the date claims the lowest mintage in the series with an emission of just 34,200 representatives. This is a pleasing, well-defined example. A few stray field marks are seen in the upper reverse field, and some curious diagonal die striations are located in the obverse fields. We say they are "curious" because this design is never seen prooflike, so was the Coiner trying to polish out die clashing? Even yellow-gold color throughout. The mintmark is well-formed. NGC ID# 25ZK, PCGS# 8515

1909-O Five Dollar Indian, AU55

Key to This Challenging Series

4785 1909-O AU55 PCGS. CAC. Kathleen Duncan penned an interesting article, "Incused Indians: Just A Few Stoppers," in the April 13, 2012, edition of the *Coin Dealer Newsletter Monthly Supplement*, providing perspective on several key issues within the Indian Head quarter eagles and half eagles series. Regarding the 1909-O half eagle, she writes, after discussing the 1911-D quarter and half eagles:

"... you may embark upon a quest for 'the holy grail' of the incused Indian Gold series: the 1909-O Half Eagle. The New Orleans Mint outdid Denver in terms of striking a rarity in every sense of the word, minting just 34,200 pieces for this one year and just before getting out of the coin minting business altogether that same year. Perhaps, due to this fact, the 1909-O Half Eagle has acquired a certain historic lore over the years as the last of the greatest of coins ever produced there."

If one does embark on the "holy grail" of this challenging series, AU is generally as fine a coin as one can locate. This Choice AU shows muted yellow-gold surfaces with a few tiny abrasions scattered about (none of consequence) and strong strike details throughout.

NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, AU58 Only New Orleans Indian Five

1909-O Five Dollar, AU58 Attractive, Problem-Free Example

4786 1909-O AU58 NGC. The 1909-O Indian half eagle claims a low mintage of 34,200 pieces, struck during the final year of coinage operations at the New Orleans Mint. The issue is the rarest coin in the series in absolute terms, and the only Indian half eagle struck at the famous Southern mint. It seems that a few high-quality coins were saved by contemporary collectors, or perhaps for novelty value by the general public, as a few dates in the series are more difficult to locate in high grade. Still, the 1909-O is definitely scarce in AU58 condition and the issue is always in demand.

This attractive Near-Mint example shows just the slightest trace of high-point wear on the sharply detailed design elements. The pleasing orange-gold surfaces are lightly abraded and retain most of their original mint luster. This coin should find a home in a fine date collection or branch mint type set. NGC ID# 25ZK, PCGS# 8515

4787 1909-O AU58 NGC. The 1909-O is one of the “stoppers” to the Indian half eagle date and mintmark set. The issue is famously rare in Mint State, and a majority of the more accessible AU representatives have been cleaned or otherwise artificially brightened to the detriment of eye appeal. The present Borderline Uncirculated example will be a refreshing reward for the patient specialist. Subtle olive-gold deepening of the luster occurs over the fields and high points of the design, denoting trivial friction, while the recesses display original, satiny luster in brighter straw-gold hues. There is little softening of the finer details, and the surfaces are free of severe abrasions. A finer 1909-O half eagle will prove exceedingly difficult to find and proportionately more costly to acquire. NGC ID# 25ZK, PCGS# 8515

1909-O Indian Five Dollar, AU58 Remarkably Clean and Well-Struck

4788 1909-O AU58 PCGS. CAC. The 1909-O half eagle is somewhat of a numismatic oddity. The New Orleans Mint was on the verge of being closed, and no five dollar gold pieces had been struck at this facility since 1894. Despite this, a modest production of 34,200 Indian Head half eagles was issued during the New Orleans Mint's final year. It is one of the most popular and sought-after issues in the series because it has the lowest business-strike mintage, it is the only Indian Head five to be struck at this mint, and it is the final gold coin struck in New Orleans. The 1909-O five dollar can be located without too much trouble in lower circulated grades. However, in near-Mint and finer grades it is very challenging. This is a remarkably clean example that is well-defined overall, including the mintmark. Just the slightest tinge of reddish patina is seen over each side. NGC ID# 25ZK, PCGS# 8515

1909-S Indian Half Eagle, MS64 Third Lowest Mint State Population

4789 1909-S MS64 PCGS. The Normal Mintmark variety, as usual. David Akers mentioned a widely doubled mintmark on the Norweb coin, but there is no mention of such a variety in the Breen Complete Encyclopedia or the Cherrypicker's Guide. Varieties of 20th century gold coinage is an understudied area of American numismatics.

One of the many great condition rarities in the Indian half eagle series is the 1909-S that had a mintage of 297,000 coins. PCGS has certified 202 of these in all Mint State grades. Only the 1909-O (79) and 1911-D (159) Indian half eagles have lower Mint State populations. This Choice Mint State piece has frosty lemon-yellow luster, bold design motifs, and excellent surfaces for the grade. Population: 19 in 64 (4 in 64+), 4 finer (3/16). NGC ID# 25ZL, PCGS# 8516

1910-D Half Eagle, MS65+ Very Scarce in Gem and Finer

1911-D Half Eagle, MS62 Second-Rarest Issue in Mint State

4790 1910-D MS65+ PCGS. The light reddish-gold surfaces show a distinctly fine-grained, mattelike texture with few mentionable abrasions, other than a couple of hits in the obverse field near star 4 and a small tick on the Indian's cheek. The strike is quite sharp throughout the Indian's headdress feathers and the date, although the lower two teeth on the necklace are incomplete. The strike is uniformly bold on the reverse, including the mintmark and all of the eagle's feathers. Only a couple of hair-thin marks show on that side. Population: 8 in 65 (1 in 65+), 5 finer (3/16). NGC ID# 28DL, PCGS# 8518

4791 1911-D MS62 PCGS. The 1911-D Indian half eagle is a well-known key date in the series, boasting a low mintage of 72,500 pieces. Yet, Uncirculated representatives remain underappreciated. In terms of Mint State examples certified, the 1911-D is the second-rarest issue in the Bela Lyon Pratt series, trailing only the key-date 1909-O. The auction appearance rate of the 1911-D is also the second-lowest in the series, even lower than the 1929. Yet, prices realized are often lower than might be expected.

This piece grades about in the middle of the Mint State population, but exhibits fewer bothersome abrasions than most MS62 examples. Bronze-gold surfaces display satiny luster with subtle olive overtones in the fields. The mintmark is bold and the devices are equally sharp. A collector-grade Mint State example of this conditionally scarce Denver issue. NGC ID# 28DR, PCGS# 8521

1913-S Half Eagle, MS64 Series Key in High Grades

4792 1913-S MS64 PCGS. All San Francisco Indian Head half eagles are moderately available in lower Mint State grades, but they prove difficult to locate across the board in Select condition and higher, none moreso than the 1913-S. Choice representatives like the one offered here are very rare, and Gems are practically unobtainable. Rich hues of orange-gold dominate smooth, frosted surfaces with occasional glimpses of lilac accents. The strike is typical for the issue, though the eagle's shoulder shows bold detail, and the mintmark is clear. From a mintage of 408,000 coins, this near-Gem presents the advanced series specialist with a not-to-be-missed opportunity. Population: 16 in 64, 2 finer (3/16). NGC ID# 25ZP, PCGS# 8526

1914 Half Eagle, MS65+ Only Two Coins Certified Finer

4793 1914 MS65+ PCGS. Only a few Indian half eagle issues can be termed available in Gem condition, and the 1914 is not one of them. This slightly better Philadelphia issue is rare in MS65, and only two coins are known finer — an MS66 at each service. At the Gem level, there are likely resubmissions reflected in the already small population figures. Any such coin is a rare and important acquisition for the Indian gold collector, but the present piece has the added distinction of being the only Plus-graded Gem certified. The strike is boldly rendered, and the frosty surfaces display attractive yellow-gold luster. There are a few trivial grazes in the reverse fields, but the obverse is mostly untouched. Population: 32 in 65 (1 in 65+), 1 finer (3/16). NGC ID# 28DU, PCGS# 8527

PROOF INDIAN HALF EAGLE

1909 Five Dollar Indian, Matte PR67 ★ Impeccable 'Roman Finish' Superb Gem

4794 1909 PR67 ★ NGC. Paraphrasing from our description of "The Matte Proofing Process" (page 36) in *The Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip H. Morse Collection*, when the Mint introduced four new gold coinage designs in 1908, it was determined, due to the extreme curvature of the dies, that the old method of producing proof gold could not be used, in which portions of the coins would turn out with brilliant mirrored fields. A "sandblast" method was used, in which the newly produced gold pieces were taken to an industrial cabinet and "carefully sandblasted on each side with a stream of fine, industrial sand to impart a dull, grainy effect. The fineness of the particles and skill of the workman doing the sandblasting governed the shade and appearance of the particular coin, ranging from light yellow-gold, to light brown, to deep khaki-green color."

Some numismatists liked the new finish. Most did not, however, and in the following year 1909 the Mint struck proof gold on planchets that received no pre- or post-production treatment. Later the enigmatic "Roman Finish" was used to describe these pieces. Breen describes it as a "satiny, semi brilliant, pale lemon color." The present coin shows two different perspectives on the untreated gold proof, depending on the distance from which the observer looks at the coin. From a distance, it is remarkable how bright the fields are. The piece appears bright yellow-gold, with a slight hint of reddish patina. As expected of the grade, essential contact is nonexistent, and the NGC Star appellation justly confirms the overwhelming appeal. A fine wire rim appears around the entire reverse and nearly all of the obverse. In PR67 ★ this piece is one of three pieces so graded, and there are three finer, all PR68 without the Star (3/16). Obviously, auction appearances at this rarefied grade level are infrequent. However, we would point out one more recent appearance of a PCGS-graded PR67+ coin with CAC endorsement, which was lot 1232 in our recently concluded Long Beach Signature (Heritage, 2/2016). That coin brought \$105,750.

Ex: Long Beach Signature (Heritage, 2/2010), lot 1641, which brought \$57,500. NGC ID# 25ZS, PCGS# 8540

EARLY EAGLE

1800 BD-1 Eagle, MS62 High-End Coin for Type Purposes

4795 1800 BD-1, High R.3, MS62 PCGS. Bass-Dannreuther Die State c/e, with a die crack atop LIBERTY and clashed dentils over STATES. BD-1 is the only die pair for the date. The Bass-Dannreuther reference provides a mintage for the 1800 eagle that ranges from 5,999 coins to 12,500 coins. A quantity of 1800 ten dollar gold pieces were struck prior to the 1801, and another batch of coins was manufactured using the 1800 dies after the 1801 obverse die failed (the die state here suggests this piece was coined after the 1801 BD-1 examples). Regarding the issue's mintage and survival rate, the authors write:

"... this is one of the more available varieties of early eagles, with more than 200 examples extant with some estimates as high as 300 known. With a survival rate of two to four percent for early eagles (except the Small Eagle type), one would guess the mintage would be closer to the high estimate than the 5,999 reported."

The extraordinary quality of this early eagle is on full display. Bright yellow-gold surfaces are awash in glistening mint luster. The impression is uniformly bold with full stars, crisply delineated hair curls, and razor-sharp wing and tailfeathers. Aside from expected chatter, this Uncirculated 1800 ten dollar gold coin is free of any major flaws to detract. Population: 20 in 62, 12 finer (3/16). NGC ID# BFYT, PCGS# 45732 Base PCGS# 8563

LIBERTY EAGLES

1848-O Ten Dollar, MS61 Rare in Mint State

4796 1848-O MS61 PCGS. Variety 1. The 1848-O eagle had a small mintage of 35,850 pieces, and most of these experienced extensive circulation. Mint State survivors are rare. This Uncirculated representative displays satiny fields with a hint of reflectivity near the borders. Scattered lines in the fields are the chief grade-limiting factor, although a small mark is seen on Liberty's cheek. The high points of the curls and the eagle's talons show minor strike weakness. Both sides display lovely straw-gold color with coppery-orange overtones in the fields. The *S.S. Republic* yielded nine examples of this issue from its treasure, although none were Mint State. The piece in the Smithsonian Institution also has slight high-point friction. Population: 3 in 61, 7 finer (3/16). NGC ID# 2634, PCGS# 8600

1863 Ten Dollar, Seldom-Seen AU50 Low-Mintage Civil War Issue

4797 1863 AU50 PCGS. The mintage of this mid-Civil War eagle issue was a meager 1,218 pieces for circulation (plus 30 proofs) at a time when coinage of all gold denominations, with the broad exception of S-mint double eagles (the ravages of the Civil War were distant in geography and economy from the Old West of that era), had dried up to a trickle. For 1863, the quarter eagles were a proof-only issue, and between Philadelphia and San Francisco, fewer than 20,000 half eagles were struck.

The 1863 eagle, besides its low production figure, is additionally rare because the few collectors of the day preferred proof coins to circulation strikes for their collections. This honey-gold AU50 PCGS example boasts well-struck surfaces overall (save for a couple of the right-side obverse stars) that show a few scattered ticks and light circulation wear. There is little distraction on surfaces that are, rather, extremely appealing. A touch of prooflike reflectivity remains in the protected area around the date. A very rare coin, seldom seen in any grade. Population: 5 in 50, 6 finer (2/16). NGC ID# 264B, PCGS# 8637

1863-S Liberty Eagle, AU50 Underrated Low-Mintage Issue

4798 1863-S AU50 PCGS. As with numerous Civil War gold issues, the 1863-S eagle production was small (10,000 pieces struck), leading to survivors being rare and challenging to find in problem-free condition at any grade level. The attractive piece exhibits caramel-gold color overall, with a few green highlights and splashes of peach appearing in portions of the protected areas. The wear is even and there are no surface marks worthy of individual mention, making this an extremely attractive representative. Population: 4 in 50, 7 finer (3/16).

Ex: Central States Signature (Heritage, 4/2013), lot 5897. NGC ID# 264C, PCGS# 8638

1865-S Ten Dollar, AU55 Inverted Date, Sole Finest at CAC

4799 1865-S 865 Over Inverted 186 AU55 NGC. CAC. Fewer than 100 1865-S eagles are known in all grades, with slightly more than half being of the 865 Over Inverted 186 variety. Examples are almost unknown in Mint State, making this Choice AU coin rare and highly sought-after. This is the sole finest Inverted Date representative with a CAC endorsement, although the overall rarity of the issue in this grade is equally impressive. Some luster appears in the peripheral portions of the fields, leaving the interiors with deep olive-gold patina. The eagle's neck feathers are slightly soft, but Liberty's portrait is bold. Wear is light. Census: 5 in 55 (1 in 55+★), 2 finer (2/16). NGC ID# 28ED, PCGS# 8643

1892 Liberty Eagle, MS65+ Only One Finer Coin at PCGS

4800 1892 MS65+ PCGS. A substantial mintage of 797,480 Liberty eagles was accomplished in 1892. Many examples are available in lower Mint State grades today, with the numerous bagmarks that are associated with rough storage and counting. It seems likely that many specimens were used in foreign trade, and later repatriated to this country. At the MS65 grade level, the 1892 is very rare, and finer coins are virtually unobtainable.

This Plus-graded Gem exhibits razor-sharp definition on all design elements. A wispy die crack is visible on the reverse, through the top of OF and the tip of the eagle's wing, to the rim. The well-preserved apricot-gold surfaces are enhanced by radiant mint luster and eye appeal is terrific. Population: 13 in 65 (8 in 65+), 1 finer (2/16). NGC ID# 266V, PCGS# 8721

INDIAN EAGLES

1907 Wire Rim Indian Eagle, MS65 Original Saint-Gaudens Design in Bold Relief

4801 1907 Wire Rim MS65 PCGS. The initial coinage of Saint-Gaudens' ten dollar gold piece was 500 pieces with the high relief, sculptural modeling that President Roosevelt so openly liked. These earliest examples of the issue were technically patterns — struck as conceptual representatives of the design and distributed to notable dignitaries and other persons of importance. As many as half are believed to still exist, although their acquisition comes at a significant price.

Also known as the Judd-1901 pattern (formerly Judd-1774), the Wire Rim 1907 Indian eagle was affected by one of the same production problems that influenced coinage of its High Relief double eagle counterpart. Metal from the planchet often flowed up around the edge of the dies during striking, resulting in a raised fin — a wire rim — around each periphery. This, in addition to the lack of a true rim in the coin's design, caused ejection problems and hindered the pieces' ability to later stack properly. When regular production of Saint-Gaudens' design commenced later in the year, the coins had a rounded rim and the relief was noticeably lower. Collectors clamor for examples of the original concept, which is significantly rarer and harder to acquire at auction than High Relief double eagles.

This Gem example is representative of the swirling luster and bold definition for which the Wire Rim Indian eagle is famous. The surfaces are well-preserved, and the wire rim is prominent around much of each side. Finer coins are extremely elusive. The collector should not less this rarity pass by. Population: 67 in 65 (6 in 65+), 23 finer (2/16).

From The Indian Rocks Collection. NGC ID# 26F2, PCGS# 8850

1907 Indian Eagle, MS66+ No Motto, No Periods

4802 1907 No Motto MS66+ PCGS. Although two rare Indian eagle patterns were produced in 1907, the No Periods motif was the first version to be released into general circulation and the first example of Saint-Gaudens' popular design seen by the general public. Since the No Motto reverse was modified the following year, the issue is prized by both series specialists and type collectors today. Although the 1907 was produced in large numbers, the issue is scarce in MS66 condition, and finer examples are rare.

This Plus-graded Premium Gem is an excellent balance of quality and value. The design elements are sharply detailed, save for a touch of the usual softness on Liberty's curls. The well-preserved yellow-gold surfaces emit vibrant mint luster on both sides, with a few hints of rose and orange patina. Eye appeal is extraordinary. PCGS has graded 11 numerically finer examples (2/16). NGC ID# 28GF, PCGS# 8852

1907 No Motto Eagle, Top-Notch MS66+

4803 1907 No Motto MS66+ PCGS. CAC. Although it was preceded by two limited-mintage patterns (the Rolled Edge and Wire Rim issues), the 1907 No Periods was the first variety of Saint-Gaudens' acclaimed Indian design that was actually seen by most numismatists and the general public. The No Periods issue claims a mintage of 239,400 pieces and some high-quality examples were saved for their novelty value, but the coins are rare in grades above MS66.

This high-end Premium Gem displays well-detailed design elements and impeccably preserved orange-gold surfaces featuring vibrant mint luster throughout. The eye appeal is top-notch. Population: 30 in 66+, 11 finer. CAC: 55 in 66, 6 finer (1/16).

Ex: Houston Signature (Heritage, 12/2014), lot 3821. NGC ID# 28GF, PCGS# 8852

**1908-D No Motto Eagle, MS64
Deep Apricot-Gold Color**

4804 1908-D No Motto MS64 PCGS. This is a nice, well-preserved example of this conditionally elusive Denver issue, one that is seldom seen in Gem condition. Only a couple of small marks on Liberty's mouth and in the left field on the reverse seemingly preclude Gem status on this lovely coin. Attractive, deep apricot-gold color and cartwheel luster abound throughout each side. The strike is somewhat weak on the obverse portrait and headdress feathers, typical for the issue, although the central feather details on the reverse are boldly struck up. Population: 49 in 64 (4 in 64+), 8 finer (2/16).

From The Indian Rocks Collection. NGC ID# 28GH, PCGS# 8854

**1908-S Indian Ten Dollar, MS64
Rich Luster and Color
Better San Francisco Issue**

4805 1908-S MS64 PCGS. CAC. Ex: Harbor View. The 1908-S is the first Saint-Gaudens ten from the San Francisco Mint. It is also the first true semikey of the With Motto portion of the series. With a low mintage of 59,850 pieces, Uncirculated survivors are scarce, strewn throughout the grade spectrum. This is a middle-of-the-road example, showing near-Gem surface quality and yet remaining within the grasp of more budget-restricted collectors. Luster is incredibly radiant, showcasing rich tangerine-gold surface color. The strike is bold, and a few tiny marks on the cheek are the only mentionable abrasions. CAC-endorsed and genuinely rare as such. Population: 38 in 64 (2 in 64+), 36 finer. CAC: 5 in 64, 14 finer (2/16).

From The Indian Rocks Collection. NGC ID# 28GL, PCGS# 8861

1913-S Indian Eagle, MS63 Challenging Issue in High Grade

4806 1913-S MS63 PCGS. Only 66,000 Indian eagles were struck at the San Francisco Mint in 1913, making the 1913-S one of the most challenging issues of the series. The 1913-S is especially difficult to locate in high grade, and examples grading MS63, or better, are very scarce in today's market. This attractive Select specimen is sharply detailed in most areas, but shows just a touch of softness on the leading edge of the eagle's wing. The lower obverse displays the semicircular area of roughness that is often seen on this issue, most obvious on 19 of the date. The lustrous orange-gold surfaces show a few minor signs of contact and some hints of lilac on the reverse. Population: 27 in 63, 16 finer (2/16).

From The Indian Rocks Collection. NGC ID# 28GZ, PCGS# 8874

1914 Ten Dollar, MS66+ Condition Census Quality Extremely Rare So Fine

4807 1914 MS66+ PCGS. CAC. Although marginally available through MS64, the 1914 Indian eagle becomes conditionally scarce at the Gem level and is rare any finer. This high-end Premium Gem is something special. Our Permanent Auction Archives show only 10 previous appearances of this issue in MS66, none Plus-graded. Only a single Superb Gem has been offered finer, a coin which was sold nearly 14 years ago. The last CAC-approved MS66 we offered was lot 5011 of the FUN Signature (Heritage, 1/2012), which realized \$32,200. This glistening Plus-graded example may challenge that realization. The strike is bold, and the surfaces yield frosty, unabraded luster in soft wheat-gold hues. A couple of tiny ticks below Liberty's eye may serve as pedigree identifiers. Population: 11 in 66 (2 in 66+), 3 finer (2/16). NGC ID# 28H2, PCGS# 8875

1915-S Indian Eagle, MS64 Series Semikey and Condition Rarity

4808 1915-S MS64 PCGS. Ex: Harbor View. The 1915-S is one of the keys to the No Motto portion of the Indian eagle series, boasting a small 59,000-coin mintage. Uncirculated survivors are scarce and typically come with detracting abrasions. Pieces grading finer than MS62 are rare. Mike Fuljenz writes of this issue: "Most 1915-S Eagles have below average eye appeal and this is one of the reasons why this date is so rare in Gem Uncirculated. The typical example is well struck and lustrous but very bagmarked."

This is a Registry-grade MS64 coin. "Well struck and lustrous" is a fitting description, but this near-Gem is far finer than the typically seen example with heavy abrasions. The surfaces yield smooth, satiny luster in rich orange-gold and honey hues. A loupe reveals a few trivial marks on the cheek, but bothersome abrasions are nonexistent. The 1915-S ten is rare this fine and exceedingly so any finer. Population: 23 in 64 (1 in 64+), 8 finer (2/16).

From *The Indian Rocks Collection*. NGC ID# 28H6, PCGS# 8879

PROOF INDIAN EAGLES

1908 Motto Eagle, Matte PR65 An Important and Beautiful Proof

4809 1908 Motto PR65 PCGS Secure. This Gem matte proof example of the 1908 With Motto eagle coinage is both an incredibly important coin and an intensely beautiful one. Although the number of proof eagles reportedly struck in 1908 was 116 pieces, they were quite popular due to their status as the first proofs of the new Augustus Saint-Gaudens design generally made available to collectors. Struck in the year after “the Saint” died of stomach cancer, the pieces saw large orders from numismatists of the era. The few known proofs of 1907, of whatever kind, are great rarities and were never broadly available to collectors. Regardless of the number struck, far fewer survive today, and they see virtually ceaseless demand. A Gem PCGS example in our Chicago ANA Signature (Heritage, 8/2014), lot 5673, brought \$79,312.50 in competition from 11 different bidders.

The Garrett and Guth *Gold Encyclopedia* notes that “possibly three” proof finishes were used for the 1908 Motto eagles, but the vast majority show a dark matte finish consistent with the present piece. A medium mustard-copper color is remarkably uniform throughout both sides. Even under a loupe, this piece appears conservatively graded, given the absence of even the smallest disturbances appear. A fine wire rim appears around portions of each side, the result of excessive pressure pushing portions of the planchet upward into the collar die. PCGS reports 15 submissions in matte PR65 with 10 finer — seven PR66, one PR66+, and two PR67 (2/16).

From The Indian Rocks Collection. NGC ID# 2AME, PCGS# 8890

1908 Indian Eagle, PR66+ Only Two Finer Coins at PCGS

4810 1908 Motto PR66+ PCGS. CAC. The Philadelphia Mint issued proof Indian eagles for commercial consumption for the first time in 1908, when a fairly generous mintage of 116 proofs was accomplished. All the coins featured the motto *IN GOD WE TRUST*, which had been omitted on earlier issues of the design, introducing a popular new design type.

The great majority of the proofs were produced with a dark matte (or sandblast) finish, but the Mint experimented with other finishes, as well. PCGS and NGC have combined to certify a total of three proof 1908 Indian eagles with a distinct Satin finish, all in PR64. The identical grade on all these specimens suggests there may be some duplication, due to resubmissions and crossovers, but that cannot be confirmed at this time. PCGS CoinFacts also lists a single specimen in "Roman Finish", purchased by Joe Flynn at the 1976 ANA Convention, but not currently certified.

The novelty of the new design was enough to ensure an enthusiastic response from collectors, at least initially. The love affair was short-lived, however, as collectors did not appreciate the virtues of the matte finish, and much-preferred the brilliant finish used on proofs in earlier years. Still, enough coins were sold to make the 1908 the most available proof of the series. PCGS CoinFacts estimates the surviving population at 60-75 examples in all grades.

The present coin is a high-end Premium Gem, with the slightly granular, dark matte surfaces that show the flat luster characteristics typical of this issue. The design elements are sharply detailed throughout and the impeccably preserved mustard-gold surfaces show no mentionable distractions, even on close examination with a loupe. Eye appeal is simply outstanding. Population: 8 in 66 (1 in 66+), 2 finer (2/16). NGC ID# 2AME, PCGS# 8890

LIBERTY DOUBLE EAGLES

**1851 Double Eagle, MS62
Resplendent Luster**

4811 1851 MS62 PCGS. CAC. The early 1850s saw an extreme imbalance between the plentiful supplies of gold flowing, chiefly from California but other sources as well, and silver, which was becoming increasingly scarce in relation. Silver coinage hardly circulated until the amelioration in the form of the Arrows/Arrows and Rays motifs of 1853, exerting extra pressure on gold coinage for commercial and banking activities. Even though more than 2 million examples were struck of the 1851 double eagle, most circulated extensively: The average grade of certified survivors — the top end of all coins — is only a tad more than AU50. Mint State examples are seldom seen, although the few dozen different coins that qualify form a nice bell curve around the MS60 through MS64 increments, with most in the MS62 grade of this piece.

The wheat-gold surfaces boast resplendent luster with excellent eye appeal created by the bold strike and few marks of any import. All star radials are full on the obverse, and Liberty's hair displays a wealth of detail. The reverse also shows sculptural definition. This Type One double eagle would make an excellent type candidate. Population: 63 in 62, 16 finer. CAC: 6 in 62, 2 finer (3/16). NGC ID# 268H, PCGS# 8904

**1851-O Double Eagle, AU55
Collectible New Orleans Issue**

4812 1851-O AU55 PCGS. Variety 2. The double eagle was authorized for production in 1849 by the same legislation that created the gold dollar, but coinage of the larger denomination was delayed at all mints until 1850, "in consequence of difficulties in the execution of the dies ..." by 1850, California gold deposits at the New Orleans Mint amounted to \$666,080, and it would increase significantly by 1851. When double eagle coinage began at the Southern branch mint in 1850, 141,000 pieces were struck by year's end. The 1851-O twenty had a mintage of 315,000 pieces. These issues are among the few New Orleans double eagles that are typically available, since California gold deposits at that facility virtually vanished after the opening of the San Francisco Mint in 1854, and double eagle coinage almost evaporated along with it. This Choice 1851-O double eagle displays bold motifs and partially lustrous fields with light chatter. The surfaces are brightly yellow-gold, as is typical of coins struck with California gold. NGC ID# 268J, PCGS# 8905

1852 Double Eagle, Sharp MS62 Scarce, High-End for the Grade

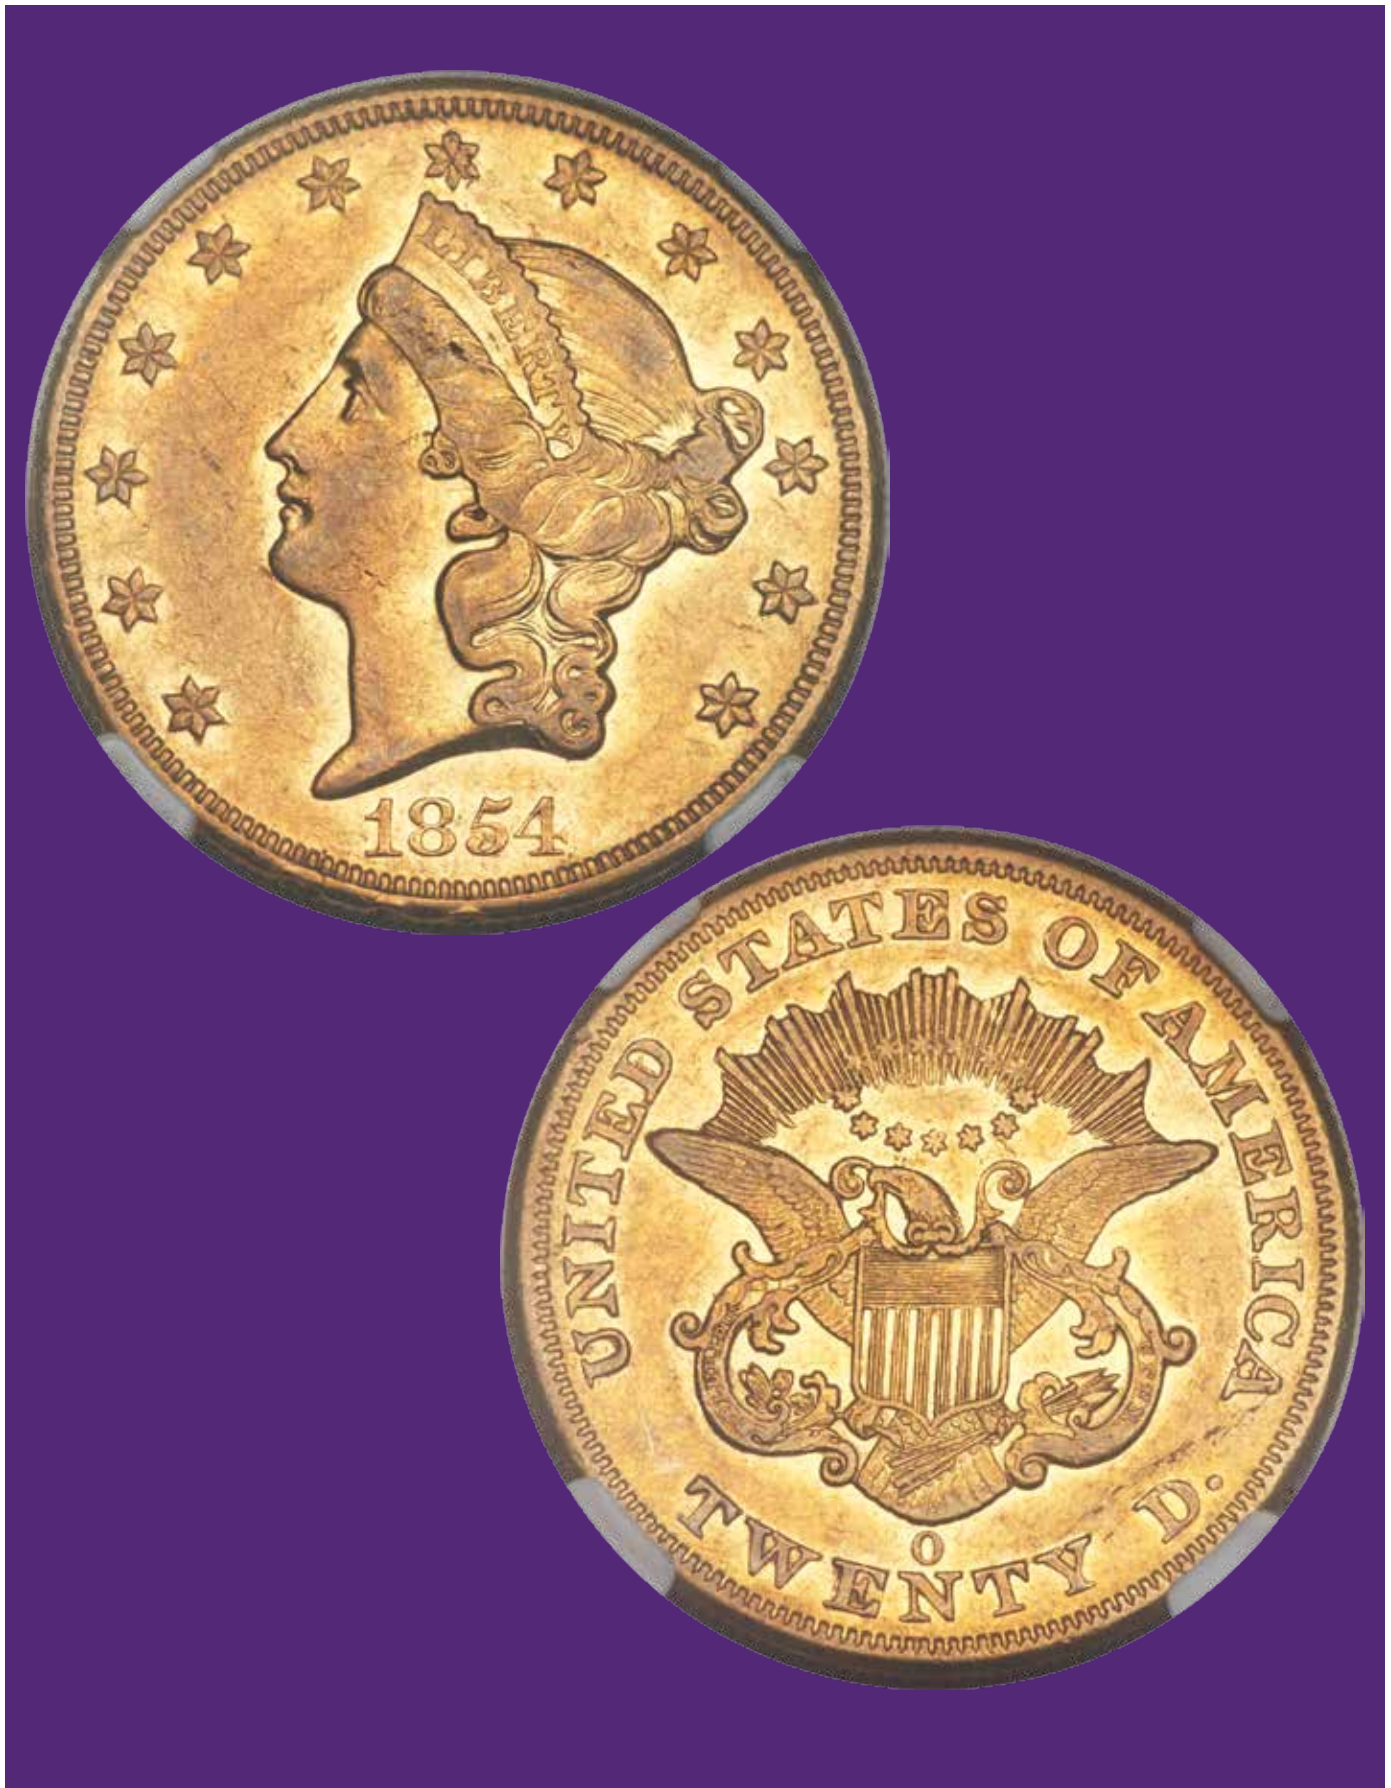

4813 1852 MS62 PCGS. As late as 1854, the vast majority of the domestically mined gold bullion deposited at the United States Mint and its branches was of California origin, although small amounts from Atlantic states were also reported, and a few trivial quantities from Oregon were beginning to surface. The California ore contained small amounts of silver, which had to be parted at the Mint, but was otherwise fairly pure. This compared to the Oregon ore that was “characterized by having an appreciable per-centage of platinum sand.” Double eagles struck in California gold often have a bright yellowish appearance.

This Uncirculated 1852 twenty is conditionally rare, as few of the more than 2 million pieces struck in Philadelphia in that year escaped light circulation. Most of the gold used for this issue's coinage was of California origin. This piece displays sharp detail and frosty yellow-gold luster. Grade-limiting abrasions are surprisingly trivial. Population: 36 in 62, 13 finer (3/16). NGC ID# 268K, PCGS# 8906

1853-O Double Eagle, AU53 Smooth Surfaces, Conditionally Scarce

4814 1853-O AU53 NGC. Variety 1. Although the San Francisco Mint did not become operational until 1854, New Orleans double eagle production declined significantly in 1853, to 71,000 coins — down from 190,000 pieces struck the year before. Surviving 1853-O twenties are seen about half as often as 1852-O coins, consistent with the certified population figures. The 1853-O is considered the last available New Orleans double eagle, although AU coins are highly sought-after. This piece shows slight high-point wear but with remarkably smooth, unabraded surfaces. Green-gold luster remains in the protected regions of the fields, and the design elements are sharply detailed. A visually finer example would be difficult to acquire in this grade. NGC ID# 268N, PCGS# 8910

1854-O Liberty Double Eagle, AU55 Classic O-Mint Rarity Condition Census Candidate

4815 1854-O AU55 NGC. Variety 1. The 1854-O Liberty double eagle claims a meager mintage of 3,250 pieces, the second-lowest production total of the series. The reason for the small mintage is easily explained by the opening of the San Francisco Mint in 1854, which drastically reduced the flow of gold deposits at the New Orleans facility. Before 1854, large amounts of gold dust and ore were deposited every year at the Southern mint, but the San Francisco facility was much more convenient to the great California gold fields, so deposits dwindled to a trickle once that location commenced coinage operations. As a result, the 1854-O is one of the rarest coins of any denomination ever struck at the New Orleans Mint.

For many years experts felt the 1856-O double eagle was the rarest O-mint twenty dollar gold piece by a slight margin, but recent research indicates the 1854-O may be just as rare. We recently compiled rosters of both issues for comparison. The roster of 1856-O double eagles included 23 recognizably different coins, with a number of additional appearances that may or may not represent the coins listed in the main roster. The 1854-O roster (below) lists only 22 coins that we know to be different examples, but the list of additional specimens is somewhat longer and it is possible that a few more coins may eventually prove to be separate specimens. In any case, the data indicate that the 1854-O and 1856-O are virtually tied in terms of absolute rarity.

The present coin is a mysterious example that last appeared in lot 4449 of our 8/2015 Chicago ANA Signature (the Duquesne specimen). It had evidently been off the market for some time before that offering, as we were not able to identify any previous auction appearance for this specimen. It may be one of the Additional Appearances we were unable to definitely link to a recent pedigree chain in the roster below. Less likely, it may be a specimen that had never been offered at auction. In either case, it is a relatively fresh example to the numismatic community, and a high-quality piece, at that. The design elements were strongly impressed and show just a touch of wear on the high points. Many stars show evidence of recutting and the diagnostic raised die lines are visible near TY in LIBERTY. The pleasing greenish-gold surfaces retain significant amounts of original mint luster and abrasions are both smaller and fewer in number than usually seen on this issue. This attractive Choice AU specimen is tied with several other coins for fifth place in the Condition Census for the date. The 1854-O is listed among the *100 Greatest U.S. Coins*. Census: 4 in 55, 3 finer (3/16).

Roster of 1854-O Liberty Double Eagles

(The assistance of P. Scott Rubin is acknowledged and appreciated.)

1854-S Double Eagle, AU58 Outstanding Original Surfaces

4816 1854-S AU58 PCGS. CAC. Shortages of parting acids at the San Francisco Mint during its first year of operation limited production of double eagles by restricting the amount of bullion that could be prepared for coinage. This problem was remedied in 1855, but the 1854 double eagle was left with a marginally small mintage (for the period) of little more than 140,000 pieces. Most of these experienced extensive circulation in Gold Rush-era California. Mint State survivors are scarce, and even high-end AU coins are elusive. This near-Mint representative displays a bold strike and lustrous, frosty fields. There are no heavy abrasions, and only slight friction is seen over the high points of the devices. The medium green-gold patina is original. Population: 4 in 58, 54 finer; CAC: 4 in 58, 4 finer (3/16). NGC ID# 268U, PCGS# 8913

1857-S Twenty, Bold S, Lovely MS65 *S.S. Central America Recovery*

4817 1857-S MS65 PCGS. Variety 20B, Ex: *S.S. Central America*. SSCA 5072. This is an early die state of the Bold S showing the upper loop of the S mintmark closed, or virtually so. This is a lovely Gem example of the 1857-S showing typical coloration for these shipwreck-recovery coins, lighter canary-yellow in the center ceding to deeper caramel-gold near the rims, the whole emanating powerful luster. Few marks appear for the grade, despite three small parallel scrapes near the mintmark.

The whole epic drama and tragedy of the *S.S. Central America* — an earlier generation's *Titanic* — would make a great Hollywood movie (or an opera, perhaps). It was catastrophes such as the sinking of the *S.S. Central America* along with the *S.S. Republic*, the *S.S. Brother Jonathan*, and others, that spurred America 50 years later into completing the Panama Canal in the face of the failure of France to do so — another pet project of President Teddy Roosevelt. NGC ID# 2696, PCGS# 8922

1857-S Spiked Shield Double Eagle, MS65 Excellent Type Coin Candidate

4818 1857-S MS65 PCGS. Variety 20A. Spiked Shield. The 1857-S double eagle shows a hefty certified population exceeding 7,100 pieces, most of which are concentrated in Mint State. The large number of Mint State 1857-S double eagles resulted from the more than 5,400 Uncirculated examples recovered from the wreck of the *S.S. Central America*, lost in a hurricane in 1857. Consequently, this issue is often collected as a type coin.

Intense luster radiates from the orange-gold surfaces of the present Gem offering, and all of its design elements are well-defined. A few minute marks are within the confines of the grade designation and do not detract from the pleasing eye appeal. An excellent piece for a high-grade type collection.

Ex: *Beverly Hills Signature* (Heritage, 11/2014), lot 4080. NGC ID# 2696, PCGS# 8922

1858 Double Eagle, MS61 Underrated, Conditionally Rare

4819 1858 MS61 PCGS. This issue has the second-lowest mintage among Philadelphia twenties struck during the denomination's first decade of production (211,714 coins). Doug Winter's doubleeaglebook.com estimates 800 to 1,000 examples survive in all grades, but only 20 to 30 pieces remain in mint condition. Boldly struck devices showcase strong detail on the stars and the central reverse. Liberty's upper and lower curls are a tad soft, but that is expected. Rose-gold surfaces display glimpses of green coloration in the obverse fields, and frosty luster rolls over each side. There are a couple of prominent ticks on Liberty's cheek, and a reeding mark between the U in UNITED and the T in TWENTY. Other abrasions are small and unimportant. A marvelous example of this underrated Type One issue. Population: 8 in 61, 8 finer (3/16). NGC ID# 2697, PCGS# 8923

1859-O Liberty Twenty, AU Details Fourth-Rarest New Orleans Double Eagle

4820 1859-O — Improperly Cleaned — NGC Details. AU. **Variety 1.** From a tiny mintage of 9,100 pieces, the 1859-O is the fourth-rarest Liberty double eagle from the New Orleans Mint. PCGS CoinFacts estimates the surviving population at 75-100 examples in all grades, and the issue is extremely rare in Mint State. Although a few nice AU coins were recovered from the wreck of the *S.S. Republic*, only two Mint State coins have been certified by NGC and PCGS combined, the finest only MS61 (3/16).

This lightly worn specimen offers well-detailed design elements and yellow-gold surfaces that show some areas of minor chatter on the obverse, but no large or distracting individual marks. The luster is somewhat muted, due to an improper cleaning. A still-attractive example of this rare branch mint issue. NGC ID# 269B, PCGS# 8927

1859-O Twenty Dollar, AU55 Stunningly Original Surfaces

4821 1859-O AU55 NGC. Variety 1. Ex: Duquesne. This is one of three die pairings known for this issue, showing the 1 in the date centered between dentils and a hand-cut crossbar on the A in STATES. The 1859-O double eagle issue scarcely survives in the Uncirculated grade levels, with the exception of couple of lower-Mint State coins. NGC currently shows a sole MS61 Prooflike example in Mint State, while PCGS has seen a single MS60 coin, the ex: Bass piece. Doug Winter writes of a third example — an AU58 PCGS coin in a green-label holder, which we offered as lot 8834 in our FUN Signature (Heritage, 1/2005), where it brought \$92,000 — that “in my opinion, this coin would grade MS60-MS61 by today’s standards.” Winter in his reference on O-mint gold also lists a fourth example that was apparently graded MS61 NGC and pedigreed to the *S.S. Republic* shipwreck recovery. But where Winter lists two MS61 NGC examples, NGC itself now shows only a single coin in that grade, so either it has been delisted/cracked out or it has been regraded into a different holder.

The 1859-O double eagle was struck in the meager amount of 9,100 pieces during the aftermath of the opening of the San Francisco Mint, which had the effect of drastically reducing the need for double eagle coinage from gold depositors at the Southern facility. The minor wear has resulted in thinner luster visible in the fields and light high-point wear, but there are no singular signs of contact — quite the opposite, in fact, as the surfaces show stunning originality with deep honey-gold color prevailing, accented with lighter yellow-gold, reflective prooflike areas around the protected device edges. This beautiful coin might have garnered a higher grade were it not for some remnants of struck-in die grease in the reverse center. But as it is, this is an extremely appealing coin with surfaces that clearly (and fortunately) have never been cleaned, dipped, or otherwise messed with.

It has been several years since we offered a finer example of this issue, emphasizing the importance of this coin. Census: 10 in 55, 17 finer (3/16). NGC ID# 269B, PCGS# 8927

1859-S Twenty Dollar, Frosty MS61 Popular Type One Issue

4822 1859-S MS61 PCGS. The 18 in the date is lightly repunched. The San Francisco Mint struck hundreds of thousands more double eagles than the Philadelphia and New Orleans Mints combined, making the 1859-S the issue of choice for collectors assembling date sets. However, Doug Winter and CoinFacts both peg the Uncirculated survival rate at only 40 to 50 coins.

Vibrant mint frost radiates over this Type One double eagle, giving each side impressive aesthetic quality that is enhanced by attractive, light reddish-gold and lilac coloration. The impression is superior to most examples from this issue with full radials on nearly every star and crisp detail on the eagle's head and tailfeathers. Abrasions are peppered throughout, as usual. The only mark of any significance is a linear depression on the cheek. Population: 20 in 61, 15 finer (3/16) NGC ID# 269C, PCGS# 8928

1860-O Liberty Double Eagle, AU58 Underrated Branch Mint Issue Seldom Seen Any Finer

4823 1860-O AU58 NGC. Variety 1. Ex: Duquesne. The mintmark is centered slightly to the right above the N in TWENTY, as usually seen on this small coinage of 6,600 pieces — even less than the 9,100 coins struck for the 1859-O. The 1860-O and 1861-O double eagle issues would be the last in the series until the 1879-O many years later, as the Civil War would close the New Orleans Mint for coinage in 1861.

The 1860-O's fame and importance are sometimes overshadowed as a result by the 1861-O that follows it, which was struck under three different coining authorities. But like those monumental twin keys among early O-mint eagles, the 1854-O and 1856-O, the 1860-O is virtually unknown in Mint State, and near-Mint State examples are nearly as rare. PCGS shows no Mint State examples of the 1860-O, although NGC has certified one example in MS60 Prooflike grade that is pedigreed to the *S.S. Republic* shipwreck of October 1865. At the AU58 level of the present piece, NGC reports 10 submissions with none finer, although there are two AU58 Prooflike and the aforementioned MS60 Prooflike. PCGS reports six in AU58 with none finer (3/16).

As with other O-mint double eagles from the Duquesne Collection, this piece shows, first and foremost, strictly original surfaces that appear never to have been dipped or cleaned, a consideration of paramount importance for most collectors. The color is an even, deep orange-amber save for the protected areas around device edges, where accents of lighter yellow-gold enhance the traces of prooflike reflectivity still present. Mentionable contact is chiefly limited to a few small ticks on Liberty's cheek and neck, as the surfaces overall show only light chatter in the fields and on the device high points from a short spell in circulation. The strike is adequate, save for flatness on stars 1-4 on the left-side obverse. Excellent eye appeal and top-notch preservation make this a stunning survivor of this issue, and likely a quite underrated coin in the context of the O-mint double eagle series. NGC ID# 269E, PCGS# 8930

1866-S Liberty Double Eagle, MS61 Rare No Motto Variant Condition Census Example

4824 1866-S No Motto MS61 PCGS. The hardships of the Civil War brought about a revival of religious consciousness in this country and Reverend M.R. Watkinson of Ridleyville, Pennsylvania petitioned the Treasury Department to add an inscription to circulating U.S. coinage acknowledging “Almighty God in some form.” Treasury Secretary Salmon P. Chase approved the suggestion in November of 1861 and, in due course, the motto IN GOD WE TRUST was adopted for use on U.S. coins large enough to accommodate the inscription, beginning with the two cent piece in 1864. The Act of March 3, 1865 specified the motto should be included on all gold coins larger than the three dollar piece, the silver denominations larger than the dime, and the newly created nickel five-cent piece. Reverse dies for the double eagle were duly prepared containing the new motto at the Philadelphia Mint, but they did not reach the San Francisco Mint until March of 1866, or perhaps a little later.

Anxious to begin coinage and uncertain about the time-table of events in the East, the San Francisco Mint began striking double eagles early in the year in 1866, using two of the old reverse dies without the motto. In a scenario reminiscent of the earlier 1861-S Paquet Reverse double eagles, an estimated total of 120,000 No Motto double eagles was produced and released into circulation before the new dies arrived. Contemporary collectors had no interest in mintmark issues, and collecting large denomination gold coins was beyond the means of most 19th century numismatists, because of the large face value of each coin in the set. Collecting double eagles only became popular in this country in the late 1930s, after President Franklin Roosevelt’s Gold Recall of 1933 made it illegal for American citizens to own large amounts of gold in other forms. By then, the 1866-S No Motto twenties had been circulating for decades, and attrition had taken a severe toll on the small initial mintage. Today, approximately 200 examples of the 1866-S No Motto double eagle can be accounted for, making the issue scarce-to-rare in all grades and conditions. The 1866-S No Motto is a prime condition rarity in high grade, and only a handful of specimens have been certified in Mint State.

An early auction appearance of the 1866-S No Motto was lot 827 of the Dr. Charles W. Green Collection (B. Max Mehl, 4/1949):

“1866 S. Without motto. Extremely fine with considerable mint luster. Light hairlines on the obverse. The coin shows but very slight evidence of circulation. **Extremely rare.** Far more so than is generally recognized. This identical specimen is from my Sale of Mr. Philpott’s Collection, November, 1945, where Dr. Green obtained this coin at a cost of \$210.00. But Dr. Green was willing to pay up to \$525.00 for it, as he recognized its great rarity. Even the great Atwater Collection did not have a specimen. Catalogs at \$200.00 which I think is far too low for this rarity.”

The lot realized \$315, confirming Mehl’s estimate of the coin’s value at the time. Recent sales include the MS62 NGC example in lot 5712 of the Chicago Signature (Heritage, 8/2014), which realized \$246,750. The finest-known example is probably the MS62 PCGS-graded Saddle Ridge coin that was offered for \$1 million in 2014, but failed to sell.

The present coin is an attractive MS61 specimen that fits solidly in the Condition Census for the issue. Currently, PCGS has graded four coins in Mint State grades, one in MS60, two in MS61, and one in MS62; while NGC has graded six Mint State examples, two in MS61, three in MS62, and one in MS60 (3/16). This coin exhibits well-detailed design elements, with a better-than-average strike, and pleasing honey-gold surfaces, with a few hints of rose. Only minor signs of contact are evident, with a minimum number of surface marks for the grade. Vibrant satiny mint luster adds to the considerable eye appeal. We expect intense competition when this classic gold rarity is offered, as a comparable specimen may not become available for years. NGC ID# 269W, PCGS# 8945

1866 Twenty Dollar, MS62 FS-801, Doubled Die Reverse First Year With Motto

1867 Liberty Twenty, MS62+ Lustrous Type Two Double Eagle

4825 1866 Motto, Doubled Die Reverse, FS-801, MS62 PCGS. This variety shows IN positioned high with a boldly repunched N. A production of 698,745 coins in 1866 represented the first batch of double eagles struck with the new motto IN GOD WE TRUST above the eagle on the reverse. Note that the motto was punched into dies by hand during the first year, creating the FS-801 variety. The 1866 Liberty Head twenty survives to a sizeable degree in XF to AU grades. All Uncirculated coins are rare, a nice MS62 being about the finest grade even the most well-resourced collectors can hope to obtain, as there are only two finer representatives at the leading certification services.

This frosty peach-gold twenty shows full star centers and typically defined central motifs. Scattered bagmarks appear throughout, and an alloy spot within the lower part of the shield will help identify this coin in future appearances. Population (all varieties): 6 in 62, 2 finer (3/16). NGC ID# 38JK, PCGS# 145733 Base PCGS# 8949

4826 1867 MS62+ PCGS. The 1867 Liberty double eagle claims a mintage of 251,015 pieces, an adequate production total in absolute terms, but not large in the context of the series. Most of these coins were used in overseas trade, where they were often melted for recoinage. The coins that circulated domestically are usually heavily worn, with many abrasions, and the examples repatriated from European holdings show signs of rough storage and transport. While circulated examples can be found without much trouble, the 1867 is a prime condition rarity in grades above the MS62 level.

This Plus-graded MS62 example offers well-detailed design elements, with just a trace of the usual softness on Liberty's hair. The pleasing orange-gold surfaces radiate vibrant mint luster, with a scattering of minor contact marks that do little to detract from the outstanding eye appeal. Population: 44 in 62 (3 in 62+), 2 finer (3/16). NGC ID# 269Z, PCGS# 8951

1869-S Twenty Dollar, MS61 Radiant Mint Luster

4827 1869-S MS61 NGC. With a mintage of 686,750 coins, the 1869-S is relatively plentiful in circulated grades. CoinFacts estimates that slightly more than 2,500 pieces survive, enough to satisfy the bulk of collector demand. However, Mint State coins are very scarce, likely moreso than the certification total indicates, as they almost certainly include numerous resubmissions.

This Uncirculated Type Two double eagle exhibits splashes of deep orange-gold color over light peach and lavender-gold surfaces. The central motifs are sharply defined, while a touch of softness occurs on stars 1 through 4. Each side is minimally abraded for the grade. Radiant mint luster furthers the appeal. NGC ID# 26A6, PCGS# 8956

1870 Type Two Twenty, MS61 Challenging Philadelphia Issue

4828 1870 MS61 PCGS. The 1870 Liberty double eagle claims a fairly low mintage of 155,150 pieces, and the issue is definitely ranks among the better Philadelphia dates. Like most Type Two twenties, the 1870 circulated widely and few examples were saved for numismatic purposes. The 1870 is particularly elusive in Mint State condition.

The lustrous, medium yellow-gold surfaces of this attractive MS61 double eagle show the minimum number of minor contact marks for the grade. Well-detailed design elements exhibit just a touch of softness over Liberty's hair. Population: 19 in 61, 22 finer (3/16). NGC ID# 26A7, PCGS# 8957

1871-CC Double Eagle, XF40 Low-Mintage Early Carson City Rarity

4829 1871-CC XF40 PCGS. Variety 2-A, showing the first 1 in the date centered over a dentil, and the second 1 centered between dentils. Two obverse dies were combined with a single reverse die to manufacture the mintage of 17,387 double eagles at the Carson City Mint in 1871. Although many examples have been lost to attrition, enough survive so that pleasing certified examples — those coins usually found in XF or Choice XF grade, less often AU — appear at auction with some regularity. A handful of “monster” Mint State examples also survive of this second-year CC issue. This XF40 PCGS coin shows a few notable abrasions, among them a few hits on Liberty’s face and neck and one linear mark in the obverse field below star 4. The reverse shows one long, thin, diagonal scrape through the shield, and scattered other smaller signs of contact appear. The amber-gold surfaces nonetheless retain a good amount of essential eye appeal and are well-struck overall, despite the 20 points of wear. Population: 21 in 40, 78 finer (2/16). NGC ID# 26AB, PCGS# 8961

1871-S Twenty Dollar, MS62 Conditionally Scarce Issue

4830 1871-S MS62 PCGS. Micro S. The 1871-S is readily secured in XF or AU grades, but is very scarce at the MS62 level, as are most Type Two issues. The present apricot and olive-gold example displays cartwheel sheen and a crisp strike. Mentionable marks are confined to a small reverse rim nick at 7:30. Although a minor and unlisted die variety, the date is both repunched and misplaced. A small digit fragment is noted between the bases of the 8 and 7, and two additional tiny date remnants emerge from the dentils below the space between 71. Population: 24 in 62, 2 finer (3/16). NGC ID# 26ND, PCGS# 8962

1874-CC Double Eagle, AU58 Popular Branch Mint Type Issue

4831 1874-CC AU58 PCGS. Variety 1-A. The 1874-CC Liberty double eagle claims a mintage of 115,085 pieces, a large production total in the context of the series. Doug Winter estimates the surviving population as 1,500-2,000 pieces in all grades, making the 1874-CC an available issue and a popular choice with branch mint type collectors.

The present coin is an attractive near-Mint specimen, with vibrant mint luster and well-detailed design elements that show just a trace of actual wear on the high points. The pleasing orange-gold surfaces show a number of minor abrasions, the worst being a horizontal scratch in the lower left obverse field. Population: 67 in 58 (1 in 58+), 20 finer (3/16). NGC ID# 26AP, PCGS# 8971

1879-S Double Eagle, MS62 None Finer at NGC

4832 1879-S MS62 NGC. CAC. A small quantity of 1879-S double eagles was discovered in the Saddle Ridge Hoard, but none of the coins graded better than AU58 at PCGS. This Uncirculated NGC coin is as conditionally scarce now as it was prior to the Saddle Ridge find. None are finer at NGC, and higher-grade PCGS pieces are extremely rare. This CAC-endorsed coin is razor-sharp and displays frosty, radiant yellow-gold luster. Scattered abrasions limit the grade, but none are singularly obtrusive. Census: 43 in 62, 0 finer; CAC: 5 in 62, 0 finer. A pair of MS62 Prooflike coins are also listed at NGC (3/16). NGC ID# 26B9, PCGS# 8991

**1882-CC Double Eagle
Lustrous Mint State Coin
Scarce Die Variety**

4833 1882-CC MS60 PCGS. Variety 1-A, a scarce die pairing: The obverse shows a near-vertical spike running downward from the bridge of Liberty's nose, in front of the eye. The reverse shows the second C in the mintmark noticeably larger and lower than the first C (or punched more deeply into the die, which amounts to the same thing).

The 1882-CC double eagles were the first issue of the denomination in Carson City since 1879, struck in the moderate amount of 39,140 pieces. The emission might have been larger but the rich gold-bearing lower regions of the Comstock Lode were flooded in this year, temporarily turning Virginia City, Nevada, into a virtual ghost town.

Like most gold coinage struck at this workaday mint, those 1882-CC double eagles circulated heavily. Examples are available in Mint State but elusive: Rusty Goe estimates in *The Mint on Carson Street* an Uncirculated survival of 70 to 90 pieces. This Mint State coin shows scattered marks and luster grazes — one notable on the cheek of Liberty — as well as a bit of smudging from struck-in die grease on the lower reverse. Bright luster and attractive orange-gold color along with a decent strike are compensations. Population: 6 in 60, 66 finer (3/16). NGC ID# 26BF, PCGS# 8997

1886 Liberty Twenty, AU58 Important Philadelphia Mint Rarity

4834 1886 AU58 NGC. The Philadelphia Mint coined 1,000 circulation strikes and 106 proofs of this extremely rare issue. It is doubtful that even 10% of the circulation strike mintage survives today. NGC and PCGS have certified just 56 of those survivors, ranging in grade from VF25 to MS65, and those submissions have an average grade of AU53. The present coin is one of 15 graded AU58, and only five finer pieces have appeared under the graders' loupe at the two services.

Circulation strike examples of this issue are on par, rarity-wise, with the 1854-O, 1856-O, and 1870-CC double eagles, according to David Akers nearly 35 years ago. Today's population data shows a higher submission rate for the 1886 by two to one over the 1854-O and 1856-O twenties, and a lower rate of one to two in relation to the 1870-CC with its total population of 138 grading events.

In our own auctions, we have offered 29 circulation strikes over the last 23 years. Just one of those offerings, graded MS61 NGC, is clearly finer than this piece. The present Choice AU example is one of only three at that grade level that we have offered, with the other 25 appearances of the date in lower grades.

This impressive example has pristine, satiny straw-gold surfaces and nearly full design definition. The critical collector will note a few wispy hairlines in the fields but the overall eye appeal is outstanding. Census: 11 in 58 (1 in 58 ★), 2 finer (3/16). NGC ID# 26BR, PCGS# 9006

PROOF LIBERTY DOUBLE EAGLE

1892 Twenty Dollar, PR63 Ultra Cameo

4835 1892 PR63 Ultra Cameo NGC. CAC. The 1892 Liberty double eagle is a challenging date, having a circulation-strike mintage of only 4,430 coins and a proof production of just 93 specimens. While the circulation issue is understandably scarce, the proof issue is a major rarity, regardless of grade. Jeff Garrett and Ron Guth estimate as few as 25 examples are extant, of which two pieces are housed in the Smithsonian Institution. The NGC and PCGS combined populations list 36 coins, a figure obviously inflated by resubmissions.

Known examples of the 1892 proof are fairly well-balanced between Ultra Cameo and non-Cameo grades, with the Ultra Cameo pieces being the more widely sought for their increased aesthetic merit. This Select example is a prime candidate in terms of eye appeal, showcasing sharp, heavily frosted design elements set against fully mirrored honey-gold fields. A few faint hairlines contribute to the grade, but none are obvious to the unaided eye. This piece offers proof double eagle enthusiasts a slightly more affordable entry into this classic and challenging series. Census: 1 in 63 Ultra Cameo, 8 finer (2/16).

Ex: *Central States Signature* (Heritage, 4/2015), lot 5464, which brought \$34,075. NGC ID# 26ED, PCGS# 99108

HIGH RELIEF DOUBLE EAGLES

1907 Saint-Gaudens Double Eagle, MS62 High Relief, Wire Rim Variant

4836 1907 High Relief, Wire Rim MS62 PCGS. The issuance of Saint-Gaudens' High Relief double eagles coincided with the Panic of 1907, the two being connected by Thomas Elder in the December 1907 — January 1908 edition of his *Monthly Magazine*. Elder explained that contrary to popular belief, there was a direct correlation between economic crises and an increase in the procurement of rare coins: "... on the contrary the 'hoarders' if there are any in our ranks, seem to think that if hoarding is to be done, they will hoard their cash in the shape of rare coins." He noted that the "discussion of the new issues of the eagle and double eagle seems also to have helped. Why, the public simply went wild over the first issue of St. Gaudens' new \$20, and quickly bought up the entire issue of about \$6,000 before the coin collectors had a fair opportunity to add the piece to their collections." Elder's figures are a little off, as \$6,000 face value would only be about 300 double eagles, and the mintage of High Reliefs was about 40 times that figure. Still, collector demand continues to make the Saint-Gaudens High Relief twenty one of the most desirable issues in the American series to this day.

This impressive MS62 example shows the Wire Rim, or fin, around the edge of the coin, seen on about three quarters of the High Relief twenties. The design elements are sharply detailed, as expected, and both sides radiate vibrant mint luster. The pleasing orange-gold surfaces show only the minimum number of minor contact marks for the grade. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, MS63 Wire or 'Fin' Rim Variant

4837 1907 High Relief, Wire Rim MS63 PCGS. Just as the sculpture of Augustus Saint-Gaudens was always a bit outside the realm of most of his contemporaries, so were the two coins he produced. The High Relief twenty is especially notable in this regard. It is distinctively different from the Longacre design that preceded it. The High Relief shows a subtlety of touch and intensity of emotion common to all of Saint-Gaudens monumental works; the effect is just as powerful today as when it was introduced in 1907. The timelessness of the Saint-Gaudens of the striding figure of Liberty is readily apparent on this attractive High Relief twenty. The surfaces are bright yellow-gold and satiny. A few small contact marks limit the grade from an even higher designation. A thin wire rim or "fin" is seen around the margin of each side. NGC ID# 26F2, PCGS# 9135

1907 Wire Rim High Relief Twenty, MS63 Rich Satiny Surfaces

4838 1907 High Relief, Wire Rim MS63 PCGS. Theodore Roosevelt was particularly satisfied with the coinage designs of Augustus Saint-Gaudens. In later years, when he reflected on Saint-Gaudens' Sherman Monument at the entrance to Central Park and also the two gold coins the sculptor produced, he praised Saint-Gaudens for showing the soul within his subjects. He asserted the sculptor reflected more than just beauty; rather, they showed the spirit inside. This is especially difficult to achieve in a small format such as a coin. Saint-Gaudens began with greater-than-life models for the Sherman group, then plaster models reduced to 12 1/2-inches, and finally the fine sculptural details were transferred to the size of a double eagle. Reductions and transfers took a year and a half, but the results were spectacularly successful. The High Relief twenties are unquestionably the most artistically accomplished coins ever produced. This MS63 example fully brings forth all the sculptor wished to communicate on an artistic level to the American public. The strike details are complete in all areas, the reddish-tinged luster is rich and satiny, and there are no obvious or detracting contact marks present. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, MS64 Wire Rim Variant

4839 1907 High Relief, Wire Rim MS64 PCGS. One of Augustus Saint-Gaudens' most famous works, the Sherman Monument at the entrance to New York's Central Park, was an important precursor to the High Relief double eagles produced a few years later. Stylistically, the striding figure of Liberty on the obverse of the High Relief is a direct derivation of the Sherman Monument's Angel of Victory, based on a model of Hettie Anderson. From a logistics standpoint, Saint-Gaudens' assistant Henry Hering played an important role in the creation of both pieces. Saint-Gaudens brought Hering, who had formerly studied under his guidance at the Arts Students League, to Paris while working on the Sherman for the 1899 Paris Salon and 1900 Exposition Universelle. Hering would later craft the models for the High Relief twenty and represent Saint-Gaudens on trips to the Mint, as the ailing sculptor remained confined to his Cornish, New Hampshire residence fighting stomach cancer. Hering knew Saint-Gaudens' wishes for the design of the coins and was able to faithfully transfer his ideas into coin form. This remarkable near-Gem High Relief shows sparkling satiny surfaces and complete strike definition. The only mark that keeps it from an even higher grade is one diagonal contact on the abdomen of Liberty. NGC ID# 26F2, PCGS# 9135

MCMVII High Relief Twenty Dollar, MS64 Wire Rim or 'Fin' Rim

4840 1907 High Relief, Wire Rim MS64 NGC. Thomas Elder and S.H. Chapman sent a letter on behalf of the ANA to President Theodore Roosevelt on December 10, 1907, expressing the Association's approval of the newly issued eagles and double eagles:

"We beg to express our high appreciation of your efforts resulting in the issuance of the beautiful eagle and double eagle by Saint Gaudens. These coins we regard as possessing high artistic merit though with some faults in detail and technique — and as greatly superior to those of the old type, and as marking an advance in American numismatic art."

The faults in detail may refer to the striking difficulties posed by the High Relief coins, and it is possible that the technical faults denote the wire rim that encircled the borders. These were considered flaws at the time of striking, termed "finning" in Mint parlance. However, these qualms clearly fail to diminish the overall importance and appeal of the new issues, which received glowing reviews then as they do now. This is a bright, satiny example with glowing surfaces. The strike is strong, as expected, and there are no obvious or detracting contact marks on either side.

From The Indian Rocks Collection. NGC ID# 26F2, PCGS# 9135

1907 Wire Rim Twenty, MS64 Exceptional Surface Preservation

4841 1907 High Relief, Wire Rim MS64 PCGS. CAC. The various artists and sculptors involved in the Columbian Exposition in 1892-1893 had a unifying theme of showing the truth of the "American Experience" to the world. In 1907, Augustus Saint-Gaudens transformed the "American Experience" into the "Spirit of America." Saint-Gaudens struggled for years to perfect the allegorical figure of Liberty that led General Sherman on the Sherman Monument. Once he achieved sculptural perfection, he reduced the figure of Liberty to the size of a double eagle. But doing so required multiple interventions with the Mint by President Roosevelt, who had taken on the production of the ten and twenty dollar coins as his "pet crime." The "crime" was accomplished and the result was the creation of the most majestic and beautiful monument in miniature ever produced. This is a marvelous example of the sculptural perfection achieved by Saint-Gaudens. The surfaces are bright and satiny with a glowing yellow-gold finish. There are no mentionable or observable contact marks on either side. NGC ID# 26F2, PCGS# 9135

MCMVII Twenty Dollar, MS64 CAC-Endorsed Wire Rim Variant

4842 1907 High Relief, Wire Rim MS64 PCGS. CAC. Six months after the death of Augustus Saint-Gaudens an exhibit of the sculptor's works was held at New York's Metropolitan Museum of Art. Two days prior to the opening of the exhibit, a farewell memorial to Saint-Gaudens was held. Among those in attendance were Daniel Chester French, John Flanagan, Richard Watson Gilder, and Will Low. In Michael Moran's book *Striking Change*, he summarized the sentiments of those present:

"He had taught Americans that beauty in art, as in nature, is not a luxury but a necessity for happiness."

This way of looking at life and art tells us a great deal about why Saint-Gaudens High Relief twenty dollar design was responsible for ushering in the Renaissance of American Numismatics. And this example of the High Relief double eagle is an excellent example of this new way of considering coinage designs. The strike definition is complete in all areas and the satiny surfaces show just a tinge of light reddish patina. Magnification with a loupe is required to discover the tiny contact marks that prevent an even higher grade. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Double Eagle, MS65 High Relief, Wire Edge

4843 1907 High Relief, Wire Rim MS65 PCGS. Beginning in 1891, Augustus Saint-Gaudens had tangled on several occasions with the Mint's engraver Charles Barber. President Roosevelt promised if Saint-Gaudens would design new high-relief coinage based on those seen from ancient Greece, he would have the Mint produce them. Roosevelt emphasized his continuing interest in the project in a letter to Saint-Gaudens where he said, "You know, Saint-Gaudens, this is my pet crime."

Roosevelt did continue to be involved in the newly designed coins, even to the point of suggesting design changes. One design element he insisted on was a change in the way the eagle was depicted on gold coins. The president had spent years in the West and was familiar with eagles and how they appeared in the wild. He thought the eagle on contemporary gold coins looked like a grilled squab, and Roosevelt did not like grilled squabs — there was never enough there for a full-grown man to eat. With Roosevelt's admission that the new coins were his "pet crime" and his involvement in the actual design details, Saint-Gaudens gained a powerful partner in his high-relief coinage adventure.

This delightful Gem is a fine representative of the resulting issue, which many consider the most beautiful U.S. coin design. The design elements are sharply detailed and a thin fin, or wire rim, can be seen around the edge of the coin. This feature is present on about three quarters of the known specimens, caused by metal extruding through the narrow gap between the die and collar when the coin was struck. The well-preserved orange-gold surfaces radiate vibrant mint luster, with terrific eye appeal. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, Wire Rim, MS66 Seldom Seen in Higher Grades

4844 1907 High Relief, Wire Rim MS66 NGC. The so-called Wire Rim variant of the High Relief twenties is a result of extruded metal that squeezed between the obverse and reverse die and the collar die. But the Wire Rim and Flat Rim distinctions are somewhat artificial — neither is a pure category. The wire rim (or “fin”) seldom appears uniformly around each side. It was viewed by Mint workers in 1907 as a flaw and an impediment to the commercial usage of the coins (“they won’t stack,” bankers of the day said). The Mint responded to this criticism by striking the last 20% or so of the production run with lesser traces of a wire rim — the so-called Flat Rim variant of the High Relief.

This NGC-certified Premium Gem offers bidders the opportunity to acquire what is certainly one of the most desirable High Relief double eagles extant. The honey-gold color is evenly distributed and unquestionably original. Razor-sharp strike detail appears over all design elements, the surfaces being smooth enough to allow full appreciation of this feature. The finish is nearly mattelike in texture, a not-uncommon characteristic for the issue. This coin would please even the most discerning collector. Census: 25 in 66, 7 finer (3/16). It has been more than two years since we handled an MS66 NGC example: Lot 5856 in our Central States Signature (Heritage, 4/2014), realized \$58,750.

Ex: Long Beach Signature (Heritage, 6/2005), lot 8168. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1907 High Relief, Flat Rim Twenty, MS64 Exceptional Eye Appeal

4845 1907 High Relief, Flat Rim, MS64 PCGS. An early sketch of Saint-Gaudens' "Striding Liberty" design for the obverse of the double eagle shows a winged figure at the top of the mountain with a torch in one hand and a shield in the other. On November 11, 1905, Saint-Gaudens described his idea to President Roosevelt:

"... on the other side some kind of a (possibly winged) figure of Liberty striding forward as if on a mountain top, holding aloft on one arm a shield bearing the stars and stripes with the word Liberty marked across the field; in the other hand perhaps a flaming torch, the drapery would be flowing in the breeze."

Before the coins were struck, Saint-Gaudens decided to simplify his design and removed the wings. But the resemblance between the figure on the coins and the famous Victory (Nike) of Samothrace statue – a sculpture by which Saint-Gaudens was inspired – remained. The final modification to the design was the elimination of the wire rim, considered by the Mint to be a production flaw.

This near-Gem displays very little of the wire rim remaining, and the coin is almost a complete Flat Rim. The satiny surfaces show only one grade-limiting mark, near the rim at 9 o'clock on the obverse. The surfaces are exceptional throughout, and the eye appeal for this most-popular U.S. coin design is quite strong.

Ex: FUN Signature (Heritage, 1/2011), lot 5301, which brought \$29,922. From The Indian Rocks Collection. NGC ID# 26F2, PCGS# 9136

1907 Saint-Gaudens Twenty, MS67 Arabic Numerals, Tied for Finest Major Condition Rarity

4846 1907 Arabic Numerals MS67 PCGS. The High Relief 1907 Saint-Gaudens double eagle was a relic of numismatic artistry, and many of the examples struck were saved for numismatic purposes or for the pure joy of ownership. The low relief, Arabic numerals version that was struck for the remainder of the year was much less cherished, and most high-grade examples survived merely by chance. The High Relief is rare in MS67, but the Arabic numerals variant is rarer still. And unlike the High Relief, which is extremely rare but at least known to exist in MS68 and MS69, the Arabic numerals 1907 Saint is unknown finer than the present numeric level. A pair of MS67+ PCGS coins are arguably finer than the present piece, although one would be hard-pressed to differentiate them from this example with respect to visual display. This coin showcases virtually flawless fields and sharp, unabraded devices. Mint-fresh, frosty luster adorns the surfaces, captivating the viewer's eye. A second and third look are required to single out the few unobtrusive ticks that can be used for pedigree tracking. This is a coin whose quality and eye appeal are obvious, even blatant, at first glance.

The last PCGS Superb Gem we offered was in lot 4611 of the Central States Signature sale (Heritage, 4/2013), which realized \$47,000. The present coin is worthy of a comparably strong bid. Population: 18 in 67 (2 in 67+), 0 finer (3/16). NGC ID# 26F5, PCGS# 9141

1912 Saint-Gaudens Twenty, MS65 Very Rare in Finer Grades

4847 1912 MS65 PCGS. Recent research by Roger W. Burdette reveals that 169,750 business-strike Saint-Gaudens double eagles were struck in 1912, almost 20,000 more than the traditionally reported production total. The extra coins were struck in December of 1912 and were not listed in the Philadelphia Mint Delivery Ledger, but were recorded in the Date-Mint Ledger, preserved in the National Archives and Records Administration. Many of the coins were sent to Europe in normal foreign exchange, and most survivors show the effects of rough storage and transport, but little actual wear. A smaller number show signs of circulation. These pieces were probably used in cross-border trade between the U.S. and Canada, although a few pieces may have circulated domestically. Examples are seldom encountered at the MS65 level of preservation today, and finer specimens are very rare.

This attractive Gem exhibits well-detailed design elements and well-preserved orange-gold surfaces, with hints of rose and vibrant mint luster on both sides. Overall eye appeal is outstanding. Population: 40 in 65 (1 in 65+), 5 finer (2/16). NGC ID# 26FM, PCGS# 9160

1914 Double Eagle, MS65 Rare So Well-Preserved

4848 1914 MS65 PCGS. Seekers of 1914 Saint-Gaudens double eagles often settle for coins graded MS64 or lower, as Gems are usually unavailable. This MS65 coin is a rare offering, particularly in the PCGS holder. A recently auctioned Gem PCGS example appeared in lot 5683 of the FUN Signature sale (Heritage, 1/2016), and realized \$18,800. The present coin is equally appealing and worthy of a comparable bid. The strike is boldly rendered. Satiny orange-gold luster blankets each side, while a loupe is needed to locate a few trivial marks. PCGS and NGC combined list only four finer coins, which are far out of reach for most collectors. Population: 40 in 65, 3 finer (3/16). NGC ID# 26FS, PCGS# 9164

1914 Saint-Gaudens Double Eagle, MS65 Only Three Finer Coins at PCGS

4849 1914 MS65 PCGS. The 1914 Saint-Gaudens double eagle claims a low business-strike mintage of 95,250 pieces. Much of this mintage was sent to Europe, as the opening of World War I greatly increased the exportation of U.S. gold coins to France and Britain. Many coins have been repatriated from European holdings over the years, and it is not difficult to locate examples in grades up to the MS64 level today. The issue becomes very scarce in MS65, and finer coins are virtually unobtainable.

This impressive Gem offers well-detailed design elements and pleasing orange-gold surfaces with no mentionable distractions. Vibrant mint luster adds to the outstanding eye appeal. Population: 40 in 65, 3 finer (3/16). NGC ID# 26FS, PCGS# 9164

1914 Saint-Gaudens Twenty, MS65 Underrated Philadelphia Issue

4850 1914 MS65 PCGS. From a low mintage of 95,250 pieces, the 1914 Saint-Gaudens double eagle is very scarce in MS65 condition, and finer examples are extremely rare. This delightful Gem exhibits razor-sharp definition on all design elements, with countable columns in the Capitol building and crisp detail on the eagle's feathers. The pleasing orange-gold surfaces show only the most insignificant signs of contact and vibrant mint luster radiates from both sides. Overall eye appeal is outstanding. We expect intense competition from series specialists when this lot is called. Population: 40 in 65, 3 finer (3/16). NGC ID# 26FS, PCGS# 9164

1922-S Twenty Dollar, Frosty MS65+ Heavily Melted Condition Rarity

4851 1922-S MS65+ PCGS. The 1922-S Saint-Gaudens double eagle suffered heavy melting under the dictates of President Roosevelt's gold confiscation order in 1933. Pieces that have survived typically show scattered abrasions and lack impressive eye appeal. Gems are rare. The 1922-S is an issue that escapes widespread recognition as a key date but nonetheless poses tremendous difficulty for collectors to acquire.

This Plus-graded MS65 coin is an important offering. Finer representatives are prohibitively rare and far out of reach for mainstream collectors. This piece shows original, satiny luster and warm honey-gold surfaces. Liberty's figure and the peripheral stars are bold, and the fields are free of abrasions. Only a few small marks on the high points of the devices limit the grade. A small alloy spot appears near the Capitol building on the obverse. Population: 16 in 65 (2 in 65+), 4 finer (2/16). NGC ID# 26G4, PCGS# 9174

1924-D Double Eagle, MS64 Elusive, Rarely Seen Finer

4852 1924-D MS64 PCGS Secure. Unlike its common Philadelphia counterpart, the 1924-D Saint-Gaudens double eagle is far scarcer than its more than 3 million-coin mintage would suggest. In MS64, this Denver issue is infrequently seen, and finer examples are genuine rarities — far out of reach for most collectors. This Choice PCGS representative displays bold relief elements set against satiny fields. Honey, rose, and mint-green hues intermingle throughout yellow-gold surfaces, delivering pleasant eye appeal. Fewer than two dozen finer coins have appeared in our auctions over the past two decades, including multiple duplications. PCGS has certified only 11 such pieces to date (2/16).

From The Indian Rocks Collection. NGC ID# 34VF, PCGS# 9178

1926-D Saint-Gaudens Double Eagle, MS60 20th Century Melt Rarity

4853 1926-D MS60 NGC. The certified population of 1926-D double eagles confirms the scarcity of the issue in all grades. The mintage of 481,000 pieces has no relation to the number of survivors, because most coins never circulated before meeting an inglorious end at the melting pots of the Gold Recall. Some pieces made it into the hands of overseas gold hoards, later to return and lessening the rarity of the lower rungs of the Mint State ladder.

This frosty, greenish-gold example shows few abrasions for the bottom-level Mint State grade, the largest mark being a contact at Y of TWENTY on the reverse. Soft-but-complete mint luster lurks beneath the frost-laden obverse patina, with less interference on the brightly lustrous reverse. Some blending of strike at the Capitol building is offset by sharper definition at the centers. NGC reports just 97 finer coins for this scarce Denver issue (3/16). NGC ID# 26GE, PCGS# 9184

1926-S Saint-Gaudens Twenty, MS65 Very Rare Any Finer

4854 1926-S MS65 PCGS. From a substantial mintage of 2 million pieces, the 1926-S was once a great rarity in the Saint-Gaudens double eagle series, as most of the coins were stored in banks and Treasury vaults at the time of issue, and later melted after the Gold Recall of 1933. Fortunately, a relatively small number of coins were used in foreign trade, and repatriated to this country in the 1950s. Most of the coins from European holdings show signs of rough storage and transport, however, and the 1926-S remains a rare issue in high grade.

This delightful Gem offers well-detailed design elements, with an interesting die crack at the leading edge of the eagle's wing. The well-preserved orange-gold surfaces are brightly lustrous and overall eye appeal is outstanding. Population: 34 in 65, 4 finer (3/16). NGC ID# 26GF, PCGS# 9185

COMMEMORATIVE SILVER

1925 Norse Medal Silver Die Trial Burnished Oversized Planchet Mint State Details

4855 1925 Norse Medal — Die Trial on Thick Silver Oversized Medal — Brushed — NGC. Unc Details. It is well-known that the Philadelphia Mint struck 6,000 of the silver Norse American Centennial medals on thin planchets before reverting to a much larger mintage of 33,750 of the silver medals on thicker planchets. A (much) smaller number were struck in gold — 100 pieces of which 53 were later melted, for a net distribution of 47 — and 75 bronze medals were struck and silver-plated outside of the Mint.

While the octagonal silver Norse medals, thick and thin, were struck of normal 900 fine U.S. coin silver and thus show a typically frosted surface, the gold medals were struck with a matte proof finish. This piece appears to be some sort of Mint experiment on an oversized planchet that we would call “burnished” rather than “brushed,” perhaps an attempt to achieve some more-reflective or satiny surface finish by the Mint that was soon abandoned. Some other oversized Norse patterns are known, including one in brass graded MS64 NGC that we offered as lot 5192 in our ANA Signature (Heritage, 10/2012), which realized \$25,850 — but that piece was struck on a round planchet with the octagonal shape contained within. Another die trial, this one in copper, was discovered in a Midwest coin shop in 2014, only the second one known at the time.

From The Paul Denby Collection. NGC ID# 2WHM, PCGS# 9450

1925 Norse Medal, MS63 Large Format, Silvered Quite Rare and Seldom Seen

4856 1925 Norse Medal, Large Format, Silvered MS63 PCGS. The 1925 Large Format silvered Norse medals appear seldom at auction and are quite rare, although they are little-known even by many seasoned numismatists. These medals were struck on oversized bronze planchets measuring about 67 mm across, then the pieces were “triple-plated” in silver outside of the Mint. (Where exactly we do not know, although Medallion Arts Company would be a good bet — speculation on our part.) A total of 75 pieces was originally struck, but only 60 were distributed. In either case, these are rarer than all other Norse medal types save for the matte proof gold, which has a net distribution of only 47 pieces. These large-sized silvered medals were issued so that museums could more easily exhibit oversized examples in their display cases.

This piece is conservatively graded by PCGS as MS63. The untuned surfaces are satiny and show few hairlines or noticeable impairments of any kind. This is the sole example in this grade at PCGS. The last two examples we offered were an MS64 NGC piece that brought \$9,400 (FUN Signature, Heritage, 1/2015, lot 6475) and an MS64 PCGS piece that garnered \$8,813 (FUN Signature, Heritage, 1/2016, lot 3388). Population: 1 in 63, 2 finer (2/16).

Ex: Charles A. Wharton Collection / Americana Sale (Stack's Bowers, 2/2014), lot 2111, which realized \$11,750.

From The Paul Denby Collection. NGC ID# 2WHM, PCGS# 523083

1926-S Oregon Trail Half Dollar, MS68 None Finer at PCGS or NGC

4857 1926-S Oregon MS68 PCGS. Despite having the largest distribution of the long-running Oregon Trail series, the 1926-S encountered its share of problems with incomplete strikes at the rims and loss of definition on some of the high points. As a result, few coins have achieved the highest level for technical reasons, more so than from lack of eye appeal because the design, minting, and distribution of the coins was carefully done.

The strike on this MS68 example is full throughout both sides. The top-rear of the wagon is sharp and the hip of the ox is fully defined. The features of the standing Indian chief are equally sharp, including the fingers and thumbs. The map of the United States is complete east to west, from rim to rim. Bright silver luster gleams from the unmarked satin surfaces, with iridescent rainbow toning drifting in from the sloped margins. The eye appeal is seemingly unimprovable. Population: 7 in 68, 0 finer (3/16). NGC ID# BYH7, PCGS# 9341

1915-S Panama-Pacific Half Dollar, MS67+ Tied for the Finest at CAC

4858 1915-S Panama-Pacific MS67+ PCGS. CAC. A great celebration was held in San Francisco in 1915, following completion of the Panama Canal the previous year. Farran Zerbe thought out the plans for an ambitious series of commemorative coins, from half dollars to fifty dollar gold pieces.

This piece is one of 56 MS67 Panama-Pacific half dollars that have been approved by CAC, although no breakdown exists to tell how many of the Plus-graded examples have been examined. This Superb Gem has highly lustrous and brilliant mint frost, bold design motifs, and extraordinary eye appeal. The ivory surfaces exhibit attractive greenish-gold toning along the borders. Population: 96 in 67 (11 in 67+), 3 finer (3/16). NGC ID# BYHP, PCGS# 9357

THE PAUL DENBY COLLECTION OF U.S. COMMEMORATIVE GOLD

1903 Louisiana-Jefferson Dollar, MS67+ Among Three Such at PCGS, None Finer

4859 1903 Louisiana Purchase Jefferson Gold Dollar MS67+ PCGS. CAC. This Louisiana Purchase Jefferson gold dollar is one of only three in MS67+ as certified at PCGS, the top grade realized for the issue. (There are also three Louisiana Purchase McKinley gold dollars in MS67+ and two in MS68, but for the Jefferson issue, this is among the finest at that service.) Splendid preservation prevails throughout both sides, which feature deep orange-brown patina with daubs of pale green, a simply beautiful coin. A pair of tiny marks in the field behind Jefferson's head are the sole relevant contact, although they are of no particular import whatsoever. Population: 3 in 67+, 0 finer. CAC: 48 in 67 (2/16).

From The Paul Denby Collection of U.S. Gold Commemoratives.
NGC ID# BYLD, PCGS# 7443

1903 Louisiana Purchase Gold Dollar, MS68 McKinley Obverse, Two in This Top Grade

4860 1903 Louisiana Purchase McKinley Gold Dollar MS68 PCGS. The 1903 Louisiana Purchase McKinley and Jefferson gold dollars were the first of the new denomination, and they were struck in quantities far larger than the numismatic market would absorb. Each of the two kinds was struck in the amount of 125,000 coins, but all save an estimated 17,500 of each type were melted. Most survivors, even certified ones, average out into the lower Mint State grades, with planchet problems and, especially, excessive surface contact marks being the limiting criteria.

It is a wondrous event to see a Louisiana Purchase gold dollar as pristinely preserved as is this coin. Thick, rich, frosty luster occupies surfaces are completely free of any contact above the negligible level. The patina is largely reddish-gold but with considerable hints of greenish-gold peeking through. The strike appears fully brought up through both sides. Planchet roughness is minor, limited to the peripheral area above LOUISIANA and ST. LOUIS. This last point seems almost quibbling on a coin of such immense quality. Population: 2 in 68, 0 finer (2/16).

From The Paul Denby Collection of U.S. Gold Commemoratives.
NGC ID# BYLE, PCGS# 7444

1904 Lewis and Clark Gold Dollar, MS67+ Stunning Multicolor Patina, Flashy Luster

4861 1904 Lewis and Clark Gold Dollar MS67+ PCGS. Although the 1904 Lewis and Clark gold dollar is not as elusive as its 1905 counterpart, both issues are far and away more conditionally rare than any others in the classic commemorative gold series. PCGS has certified 18 submissions in MS67 along with this sole MS67+ and a single MS68 finer (2/16). The multicolor patina that embellishes both sides of this flashy coin includes orange, teal, jade, red, and golden hues amid top-notch luster. The central devices as well as the fields are free of any mentionable contact marks, but it is the incredible patina and luster that give this piece an extra dose of firepower that most well-preserved examples lack. This amazing coin is also a plate coin on PCGS CoinFacts, showing another stunning photo.

From The Paul Denby Collection of U.S. Gold Commemoratives.
NGC ID# BYLF, PCGS# 7447

1905 Lewis and Clark Gold Dollar, MS67 Rarest Commemorative Gold Dollar Issue Sole CAC Example

4862 1905 Lewis and Clark Gold Dollar MS67 PCGS. CAC. The surfaces on this top-grade 1905 Lewis and Clark gold dollar are, as expected and desired, essentially perfect in terms of post-Mint distractions. Glowing luster highlights both sides with color ranging from honey-gold to warm apricot-gold. The profiles of both Meriwether Lewis and William Clark are free of mentionable marks, a trait far separating this Superb Gem from most of its kind. Were it not for a couple of minor copper alloy spots in the planchet, as made, we suspect this incredibly preserved coin might have a shot at an MS68 grade. As it is, it is among only four in MS67 at PCGS, and with the CAC endorsement it is the sole example as of this writing (2/16). The last MS67 PCGS specimen of this issue we handled — a different piece, lacking the CAC green sticker — was lot 3383 in our Long Beach Signature (Heritage, 2/2015), which brought \$37,600.

This coin is remarkable for another reason as well, however: Grade-for-grade, the 1905 Lewis and Clark gold dollars are far more elusive than their 1904 counterparts — Bowers suggests 20 percent rarer, but we believe it is higher than that — and both the 1904 and 1905 Lewis and Clark gold are far rarer overall than any other gold dollar commemorative issues. This is thus the finest example (or tied for finest, depending on the weight one assigns to the CAC approval) of the rarest commemorative gold dollar issue.

From The Paul Denby Collection of U.S. Gold Commemoratives.
NGC ID# BYLG, PCGS# 7448

1915-S Panama-Pacific Dollar, MS67 Appealing Top-Grade Example

4863 1915-S Panama-Pacific Gold Dollar MS67 PCGS. Even though they are by different designers, the frolicking dolphins on the reverse of this Charles Keck one dollar gold design are reminiscent, nowadays at least, of the 16 dolphins cavorting in the vertices of the fifty dollar octagonal Pan-Pac commemorative, designed by Robert Aitken. All four of the Pan-Pac gold designs are appealing, although the one dollar obverse is an Everyman design, a simple Panama Canal worker in a cap, rather than the Neoclassical designs of the quarter eagle and fifty dollar coins. This Superb Gem boasts effulgent luster amid excellent surface preservation and attractive golden-orange patina with glints of pale jade in the interstices. The eye appeal is top-shelf. Population: 67 in 67, 0 finer (3/16).

From The Paul Denby Collection of U.S. Gold Commemoratives.
NGC ID# BYLH, PCGS# 7449

1915-S Pan-Pac Quarter Eagle, MS67 Seldom Seen So Fine, CAC-Endorsed

4864 1915-S Panama-Pacific Quarter Eagle MS67 PCGS. CAC. The 1915-S Panama-Pacific quarter eagle, featuring an obverse design by Mint Chief Engraver Charles Barber, is a fairly modernistic design for Barber, who would pass away two years later at age 77. The figure of Columbia riding a hippocampus, a mythological sea monster with the foreparts of a horse and the hindquarters of a fish, plays nicely into the nautical theme of the Panama-Pacific International Exposition. The reverse motif is more pedestrian, a recycled eagle by George T. Morgan first used on 1877 pattern half dollars.

The present Superb Gem Pan-Pac quarter eagle is among 39 submissions in this grade at PCGS, and none are finer. CAC has given its green approval label to 18 in this grade between NGC and PCGS combined (2/16). Softly glowing, thorough luster radiates throughout each side, complementing light orange-gold color and a virtual absence of contact. A prize example of this popular commemorative design.

Ex: Long Beach Signature (Heritage, 2/2013), lot 4029, brought \$21,150; Long Beach Signature (Heritage, 9/2014), lot 3550, realized \$17,038.

1915-S Panama-Pacific Fifty Dollar, MS64 Stunning Round Example, Rare and Beautiful

4865 1915-S Panama-Pacific 50 Dollar Round MS64 PCGS. The round and octagonal Panama-Pacific 1915-S fifty dollar gold coins were merely the largest and most impressive of the vast panoply of medallic, numismatic, and other commemorations of the Panama-Pacific International Exposition. The exposition itself was a tripartite observance: of the opening of the Panama Canal in 1914; a celebration of the elevation of San Francisco to the status of world-class city, after a decade of rebuilding following the disastrous earthquake of 1906; and, finally, an observance of the 400th anniversary of the discovery of the Pacific Ocean by Europeans in 1513.

Sculptor Robert I. Aitken was not only the designer of the famous 1915-S fifty dollar gold coins; he also crafted the so-called dollars issued as official medals at the Panama-Pacific Exposition, HK-399 to -401 in silver, bronze, and gilt. Aitken again chose to mix ancient Greek mythology and aquatic symbols on the so-called dollars, portraying the god Mercury on the obverse opening the locks of the Panama Canal; the reverse shows two female figures holding cornucopias and intertwining representing the earth's hemispheres, with a seagull representing the Canal.

Mercury was a major Roman god (Greek: Hermes), the patron of finance, communication, commerce, travelers, and boundaries — all themes with obvious relevance to the Panama Canal. Contrast Mercury with the Roman goddess Minerva (Greek: Athena) depicted on the fifty dollar gold coins; she represents craft, wisdom, and commerce and is usually accompanied, as on the fifty dollar coins, by her owl familiar. Aitken won a \$1,000 prize for his official medal design; the medals were actually struck on the exposition grounds, the silver examples selling for one dollar each, the bronze and gilt for 25 and 50 cents, respectively.

The large fifty dollar gold coins were originally scheduled to be struck on the exposition grounds as well, but ended up being produced at the San Francisco Mint due to the bulky size of the hydraulic coinage presses required for their manufacture (and the legal requirement that coins be struck in a Mint facility).

The Panama-Pacific fifty dollar gold coins will always remain the largest and most impressive of the commemorative coins from the "classic era" of American numismatics — and they are numismatic treasures of consummate artistry, as well.

The round fifty dollar Pan-Pac is, in spades, the rarest coin from the classic commemorative era of American numismatics. More of the original production was melted than of its octagonal counterpart. Besides its greater rarity, we prefer the design for its slightly larger tondo in which to portray Aitken's gorgeous motifs (but we miss the dolphins). This near-Gem example is fairly bursting with honey-gold luster and ample eye appeal. A few vague marks near Minerva's chin and in the reverse left field appear to account for the grade while being not in the least bothersome. Population: 91 in 64 (3 in 64+), 26 finer (2/16).

NGC ID# BYHP, PCGS# 7451

**1915-S Panama-Pacific Fifty Dollar, MS65
Stunning Octagonal Variant
Fantastic Luster and Originality**

4866 1915-S Panama-Pacific 50 Dollar Octagonal MS65 PCGS Secure. CAC. The May 20, 1914, issue of the *Canal Record*, published weekly in Ancon, the Panama Canal Zone, reported important news that thousands of Panama Canal employees and their relatives in dozens of countries had long awaited:

TEN YEARS OF CANAL WORK

**Tenth Year Closes with Practical Completion of
the Canal, and Marks the Beginning of Use**

"Ten years of American occupation of the Canal Zone were completed on May 4, 1914, the transfer of Canal property from the second French company to the United States having been effected on May 4, 1904. The three first years of the American occupation were devoted principally to preparation. Excavation in the Culebra Cut section, continued from the first with such equipment as was available, was not well under way on the American plan until the first part of 1907; and the only dredge at work up to May 20, 1907, was the old French ladder dredge *Mole*, maintaining the channel between the ocean and the steel wharf at Balboa.

"The decade has seen the virtual completion of the Canal, and the beginnings of its commercial and naval use. During the past year, the sealevel channels have been opened to Gatun and Miraflores Locks; Gatun and Miraflores Lakes have been filled to normal height; Culebra Cut has been flooded; all of the locks have been operated repeatedly; and a number of vessels in the Canal service, as well as several rafts of piles under tow, have passed from ocean to ocean through the Canal."

It was another year before the 1915 Panama-Pacific International Exposition could get under way in honor of the Canal completion, billing itself as the "greatest world's fair of all time." The "Panama-Pacific" name itself embodies the many-faceted nature of the historic 1915 observance in San Francisco. "Panama" alludes to the construction of the audacious Panama Canal, but "Pacific" refers more specifically to the Pacific port city of San Francisco, which saw a massive *rebuilding* from the ruin and ashes in the decade following the catastrophic 1906 earthquake and subsequent fire. And the exposition also commemorated the 400th anniversary of the discovery of the Pacific Ocean by Vasco Núñez de Balboa and his party, the first Europeans ever to do so.

The Panama-Pacific fifty dollar gold coins are arguably the most impressive remembrances today of the massive exposition. Struck nearly a century ago, the two-and-a-half-ounce gold coins featured an unparalleled size and heft that would never again be approached by a U.S. coin in the "classic commemorative" era. The round version featured slightly larger designs, while the octagonal version showed smaller central designs with a bonus — 16 dolphins frolicking in the vertices of each side.

While the round versions of these giant gold commemorative coins are rarer due to greater melting, the octagonal pieces are slightly more apt to be found in Gem grade, as here, due to their somewhat greater survival. And an impressive survivor indeed this piece is, showing deep reddish-orange to reddish-brown patina, clearly the result of 101 years of unblemished preservation. The textured surfaces are a cornucopia of fantastic luster, originality, and simply superlative eye appeal. It is difficult to conceive of a finer example. Population: 24 in 65 (3 in 65+), 4 finer. CAC: 12 in 65, 0 finer (2/16). The last example that we offered in MS65 PCGS with a CAC green label was in our Central States Signature (Heritage, 4/2015), lot 5516, which brought \$205,625.

1916 McKinley Gold Dollar, MS67+ Sumptuous Luster and Preservation

4867 1916 McKinley Gold Dollar MS67+ PCGS. CAC. There are nine different U.S. commemorative gold dollar issues (counting dates and varieties) beginning with the two Louisiana Purchase coins of 1903 and ending with the 1922 Grant With Star and No Star dollars. Although the 1916 McKinley gold dollar is generally the most available of those commemorative gold dollar issues, this is a remarkable example that simply blows away most others in terms of preservation and eye appeal. This coin is one of two in the top MS67+ grade at PCGS, although that service reports 92 others in MS67 (3/16). Sumptuous luster on deep orange-red surfaces complements top-notch preservation and a strike that is essentially full throughout both sides.

From The Paul Denby Collection of U.S. Gold Commemoratives.
NGC ID# BYLK, PCGS# 7454

1917 McKinley Gold Dollar, MS67+ Copious Luster and Top-Notch Surfaces

4868 1917 McKinley Gold Dollar MS67+ PCGS. CAC. Grade-for-grade the 1917 McKinley gold dollars are more elusive than their 1916 counterparts; Bowers estimates that 15,000 were distributed of the 1916 compared to 5,000 of the 1917, net after unsold pieces were melted. As always in this marvelous commemorative consignment, the present MS67+ piece is at the top end of certified survivors, showing copious luster over immaculately preserved and sharply struck amber-gold surfaces. Population: 71 in 67 (3 in 67+), 0 finer. CAC: 14 in 67, 0 finer (2/16).

From The Paul Denby Collection of U.S. Gold Commemoratives.
NGC ID# BYLL, PCGS# 7455

1922 Grant No Star Gold Dollar, MS67+ Among Five Finest at PCGS

4869 1922 Grant Gold Dollar, No Star, MS67+ PCGS. CAC. Surviving examples of the 1922 No Star Grant Memorial gold dollar are more or less evenly distributed throughout the MS63 to MS66 grade levels, but the number of pieces achieving a Superb Gem grade is minimal — and this is among only a handful to reach the MS67+ level *and* to gain the CAC endorsement. The strike is bold throughout both sides, and the preservation is exceptional — nay, phenomenal. Frosty wheat-gold luster imparts outstanding eye appeal. Population: 5 in 67+, 0 finer. CAC (which ignores Plus grades): 23 in 67, 0 finer (3/16).

Ex: FUN Signature (Heritage, 1/2016), lot 3440, which brought \$6,463.

1922 Grant With Star Gold Dollar, MS68 Sole Finest at PCGS One of Only Four MS68 Gold Commems

4870 1922 Grant Gold Dollar, With Star, MS68 PCGS. This small commemorative gold issue is supposed to come nice as a rule, but this is the finest example that we have ever seen; it is also the sole finest certified at PCGS. Under close examination with a 20-power magnifier the surfaces are essentially flawless. Added to the coin's immaculate preservation are the rich mint luster that covers each side, and lovely light peach and yellow-gold patina. The Laura Gardin Fraser design is boldly rendered, despite a hint of typical weakness noted on the tree trunks and roof on the reverse. An outstanding Superb Gem Grant With Star gold dollar and a coin of unsurpassed quality.

It bears mentioning, as well, that of the 43,820 current submissions of commemorative gold coins of all kinds to PCGS, this piece is among only four to achieve the MS68 grade — the other three all being gold dollars as well, two 1903 Louisiana Purchase-McKinley pieces and one a 1904 Lewis and Clark. If you are contemplating the finest Registry Set possible, this is your coin. Population: 1 in 68, 0 finer (2/16).

Ex: New York Signature (7/2002), lot 5034, brought \$13,225; Dan McClure Collection / ANA Signature (Heritage, 7-8/2008), lot 2149, realized \$21,850; Beverly Hills Signature (Heritage, 11/2014), lot 4214, garnered \$18,800.

PROOF COMMEMORATIVE GOLD

1926 Sesquicentennial Quarter Eagle, MS66 Condition Rarity in This Grade

4871 1926 Sesquicentennial Quarter Eagle MS66 PCGS. As is the case with its half dollar counterpart, the 1926 Sesquicentennial quarter eagle commemorative was designed (by a committee) and struck in a low relief that made many survivors show a blunt strike; others of the 46,000-plus net coins distributed exhibit light wear or contact marks. This Premium Gem is a pleasing exception, displaying superlative preservation and radiant luster on deeply orange-tinged surfaces. This piece is bettered by a sole MS66+ at PCGS (a coin that was certified MS67 by PCGS around 1999 has now been delisted) (3/16).

From The Paul Denby Collection of U.S. Gold Commemoratives.
NGC ID# 2FE9, PCGS# 7466

1903 Louisiana Purchase Gold Dollar Jefferson Portrait, PR66 Cameo

4872 1903 Louisiana Purchase Jefferson Gold Dollar PR66 Cameo PCGS. CAC. The 1903 Louisiana Purchase Jefferson and McKinley gold dollars were the first of this smallest gold denomination issued in the commemorative format by the U.S. Mint. After producing commemorative half dollars in 1892, quarters (and halves) in 1893, and silver dollars dated 1900, the U.S. Mint in 1903 was persuaded to strike the two different gold dollar types in observance of the Louisiana Purchase Exposition, popularly known at the time as the St. Louis World's Fair. Proofs were struck in small quantities of 100 apiece, most of them surviving today: PCGS estimates 80 to 90 extant of each kind. The proof coins were distributed to "favored insiders" in Bowers' words, with special packaging and an engraved card, aiding no doubt their good survival rate.

Few are as well-preserved as this piece, however, and nearly none with the Cameo designation. This piece presents amazingly deep gold-on-black contrast throughout both sides, with scattered but picayune signs of contact mostly confined to the reverse. The portrait of Jefferson is remarkably free of major contact — one tiny dot on the cheek — and the obverse fields are a tad better-preserved overall. This is a piece that is nonetheless of outstanding quality throughout both sides, and is a plate coin for PCGS CoinFacts. Population: 2 in 66 Cameo, 0 finer (2/16).

From The Paul Denby Collection of U.S. Gold Commemoratives.
NGC ID# BYMF, PCGS# 87482

1903 Louisiana Purchase Gold Dollar Sole Finest at PCGS, PR66+ Cameo

4873 1903 Louisiana Purchase McKinley Gold Dollar PR66+ Cameo PCGS. CAC. Most of the 100 or so proofs each struck of the Louisiana Purchase Jefferson and McKinley commemorative gold dollars survive today, since they were given to the well-connected in special packaging. While the choice of a Jefferson portrait for the one type was obvious — Thomas Jefferson was the sitting President when the vast land deal with France was done in 1803 — but the choice of McKinley for the other type was more tenuous. While attending the 1901 Pan-American Exposition in Buffalo, New York, President McKinley had been struck down by a bullet from the gun of Leon Czolgosz, however, and his death was still fresh in the national psyche.

The majority of the proof Jefferson and McKinley gold dollars survive today, due to their presentation in special packaging to well-connected patrons of the day. This piece is nonetheless the sole finest Cameo proof PCGS-certified commemorative gold dollar available. Although NGC reports one Louisiana Purchase McKinley dollar in PR68 Cameo and three other Cameo submissions in PR66, PR67, and PR67 Star, PCGS reports only this single PR66+ Cameo for the McKinley format. One non-Cameo PCGS McKinley coin is numerically finer, a PR67. The surfaces boast rich caramel-gold color with excellent overall preservation and minimal signs of contact in the fields, well away from the prime focal points of the devices. One tiny dark fleck appears in the obverse field, just out from McKinley's bow tie. Population: 3 in 66 (1 in 66+) Cameo, 0 finer (2/16).

From The Paul Denby Collection of U.S. Gold Commemoratives.
NGC ID# BYMG, PCGS# 87483

1916 McKinley Gold Dollar, PR64 Cameo Sole Finest Among Four Known Garrett-Guth Plate Coin

4874 1916 McKinley Gold Dollar PR64 Cameo PCGS. CAC. Proof-format examples of any U.S. gold commemorative issue from the “classic era” spanning 1903-1926 are extremely rare, save for the 1903 Louisiana Purchase-Jefferson and McKinley gold dollars: PCGS estimates that 80 to 90 are known of each. For the 1904 Lewis and Clark gold dollar, PCGS asks “5 known?” on its *Population Report*. Two of that issue are certified at PCGS, one each in PR63 Cameo and PR64.

For the 1916 McKinley gold dollar, PCGS estimates that five to eight are known and has graded four submissions — one PR64, two PR63 Cameo, and the present PR64 Cameo.

PCGS has never certified a proof example of any later gold commemorative issue through 1926 — no 1917 McKinleys, no 1922 Grants, no 1926 Sesquicentennial quarter eagles (although NGC reports a matte PR65 Sesqui), no 1915 Pan-Pacs of any denomination save for a single mysterious Pan-Pac quarter eagle that PCGS calls Specimen 67 (!).

All of the foregoing makes the present 1916 McKinley gold dollar in PR64 Cameo PCGS one of the rarest and highest-graded proof gold commemoratives from this classic era of U.S. gold. A marvelous PCGS TrueView of this coin shows off its good side(s) but overemphasizes the relatively minor contact marks. Much delightful field-device contrast appears between mirrored, reflective fields and orange-frosted devices throughout. The rims are high and squared off, a wire rim effect as would be expected, and the impeccably sharp strike produces “full steps” on the McKinley Memorial building as well as throughout the design on both sides. This may be one of the smallest coins in this marvelous consignment of commemorative gold — but it is also among the most important.

Roster of 1916 Proof McKinley Gold Dollars

Only four examples of the 1916 proof McKinley are apparently known.

1. PR64 Cameo PCGS. The present example. The Plate Coin in the second edition of the Garrett-Guth *Gold Encyclopedia*. Although we required a good high-powered loupe for both the book and the coin, a more-than-minuscule brown toning dot behind McKinley’s cheek is only one of numerous positive identifiers (the others are mostly tiny lintmarks), of which the authors write that “the coin appears to have all the characteristics of a true Proof.” Earlier provenance is likely “Choice Proof, RARCOA (Auction ‘89, 7/1989), lot 363, part of a three-piece set that also included a business strike, and a nickel trial piece, Judd-1802.” Cert. #21922141.

2. PR64 PCGS. Superior (10/1990), lot 2283; Superior (5/1994), lot 1745.

3. PR63 Cameo PCGS. Honey-gold streaks show in the obverse field. Bowers and Merena (1/1996), lot 2320; Stack’s (11/2008), lot 5076; Chicago ANA Signature (Heritage, 8/2011), lot 7718, which brought \$48,875. Cert. #04326254.

4. PR63 NGC. CAC. FUN Signature (Heritage, 1/2012), lot 5140, which brought \$37,375; FUN Signature (Heritage, 1/2015), lot 4464. Cert. #3508265-001.

From *The Paul Denby Collection of U.S. Gold Commemoratives*.

1925 Norse Gold Medal, PR66 A Numismatic Dream Coin, Ex: Bass

4875 1925 Norse Gold Medal PR66 PCGS. CAC. The 1925 Norse Centennial medals struck (mostly) in silver with a small smattering in gold and bronze, managed to squeeze by the bureaucrats at the Treasury Department — and therefore be authorized for striking by the Philadelphia Mint — by forgoing the presence of a denomination on the pieces. They are technically medals, not coins (not that the average person on the street could readily explain that difference), and are not legal tender in the United States.

By the early 1920s the U.S. commemorative coin program had seen various excesses of numerous kinds — although worse would follow — and it was getting increasingly difficult to obtain passage of enabling legislation within acceptable timeframes needed for many issues, which were coupled with physical observances — fairs, expositions, celebrations, and the like. (Witness the Alabama Centennial half dollars, observing the centennial of Alabama's statehood in 1919. Centennial celebrations were held throughout the state in 1919, but enabling legislation was passed and designs developed only in 1920, and the coins were finally struck in 1921 and dated as such to "clarify" the situation.)

The Norse gold and silver medals neatly sidestepped such issues precisely by being medals, and today they are collected by many numismatists right alongside their "official" commemorative coin counterparts. Their slight "outlier" status (as well as beautiful design by James Earle Fraser, earlier the sculptor for the iconic Buffalo nickel design introduced in 1913 — note the OPUS FRASER legend on reverse), in fact, makes them hotly pursued in a way that many traditional commemorative silver and gold issues are not.

The gold Norse medals, moreover, are at the very top of the pack, struck in absolutely minuscule quantities. While the net distribution of the silver Thick Planchet medals was either 31,000-plus or 33,000-plus (depending on meltage) and the Thin Planchet pieces saw a net 6,000 distributed, the gold medals were struck to the extent of only 100 examples — and 53 were later melted, for a net distribution of 47 gold medals. Most collectors would consider the owning of a Norse gold medal to be the culmination of a numismatic dream.

While the silver Norse medals were struck from 900 fine Mint coin silver and have a typical frosted finish, the Norse gold medals were struck in a matte proof finish that further separates them from most of the "classic commemoratives" of the 1892-1954 era. The octagonal shape, picturesque theme, and attractive design combine with the gold medal's low mintage to make it among the most desired U.S. commemorative gold items. The present piece is certified PR66 by PCGS and approved by CAC, ranking it among only five so graded (2/16). NGC reports four in PR66 and four finer. CAC reports four in PR66 and one finer.

The surfaces of this majestic piece show a uniform, fine-grained matte proof surface throughout both sides, a beautiful deep caramel-gold color. There is no mentionable sign of contact, although a couple of brownish toning flecks just above the 1825 date can be used for pedigree purposes. This is a remarkably well-preserved and attractive example.

Ex: Rollie Finnert Collection / Chicago ANA Auction (Stack's Bowers, 8/2011), lot 7479, as PR67 NGC, which realized \$43,125, crossed by our consignor to PR66 PCGS and given the CAC endorsement; earlier from the Harry W. Bass, Jr. Collection (Stack's, 5/1999), lot 2065.

1915-S Panama-Pacific Coin Cases Four Different, Original Holders

4876 Five-Piece Lot of 1915-S Panama-Pacific Commemorative Coin Cases. This lot contains no coins, but it does include five different original holders that formerly housed 1915-S Panama-Pacific commemoratives. The lot includes:

Shreve & Co. Copper and Glass Panama-Pacific Coin Frame. The hand-hammered frame is 10" x 8" and is in exceptional condition with its inserts, glass, screws, and velvet interior intact. The upper edge is stamped SHREVE & CO / SAN FRANCISCO / MAKERS. One of approximately 30 known Shreve & Co. copper frame holders with a single slot for each of the five different Panama-Pacific issues.

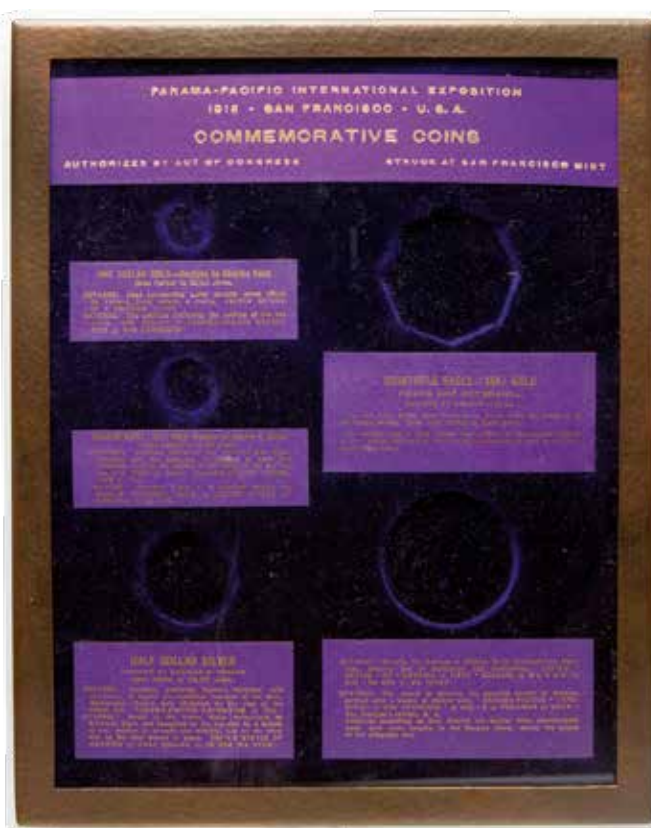

Five-Slot Black Leatherette Case. Velvet-covered interior with slots for each issue; descriptive cardboard insert included, outer vanilla box is included but has a torn side. The case has transparent tape on outer sides and a 85 mm x 30 mm strip of white tape on the bottom.

Four-Slot Black Leatherette Case. Velvet-covered interior with slots for the half dollar, gold dollar, quarter eagle, and octagonal fifty; descriptive cardboard insert included. The box grades XF with trivial scuffs and slight corner wear.

Three-Slot Black Leatherette Case. Velvet-covered interior with slots for the half dollar, gold dollar, and quarter eagle, the clasp is working but the corners show chipping.

Black Leatherette Case for Octagonal Fifty Dollar. Velvet-covered interior, descriptive cardboard insert included, working hinge, VF to XF condition.

Deliveries of Panama-Pacific Commemoratives Four Fascinating Documents

4877 Four Receipts for Delivery of Panama-Pacific Commemorative Coins. Uncertified. The Anglo-California Trust Company was an affiliate of the Anglo-California Bank, Ltd., located in San Francisco, with branches throughout the city. Its main branch was at the corner of Market and Sansome Streets, in the financial district. The trust company acted as agents of the Department of Official Coins and Medals of the Panama-Pacific International Exposition in 1915. This group of four documents records the receipt of various Pan-Pac commemorative coins from the San Francisco Mint, all signed with the WLS monogram of Louis Sutton, Assistant Cashier of the Anglo-California Trust Company. The Pan-Pac commemoratives were distributed by Faran Zerbe, sold in a large booth inside the Palace of Fine Arts on the exhibition grounds.

1. July 10, 1915-dated receipt for Delivery No. 1 of P.P.I.E. round \$50 pieces. A mostly hand written form acknowledging the delivery of "4 drafts" (four sacks) of 1915-S round Panama Pacific fifty dollar gold pieces. Three sacks contained 100 pieces, valued at \$5,000 each, while the fourth sack contained nine pieces, valued at \$450, for a total of \$15,450. This group of 309 round fifties accounts for the lion's share of the 483 pieces sold.

2. June 22, 1915-dated receipt for Delivery No. 1 of P.P.I.E. quarter eagles. A mostly hand written form acknowledging the delivery of "4 drafts" (four sacks) of 1915-S Panama-Pacific quarter eagles. Each sack contained 1,000 pieces, valued at \$2,500 each, for a total of \$10,000, or 4,000 Panama-Pacific quarter eagles.

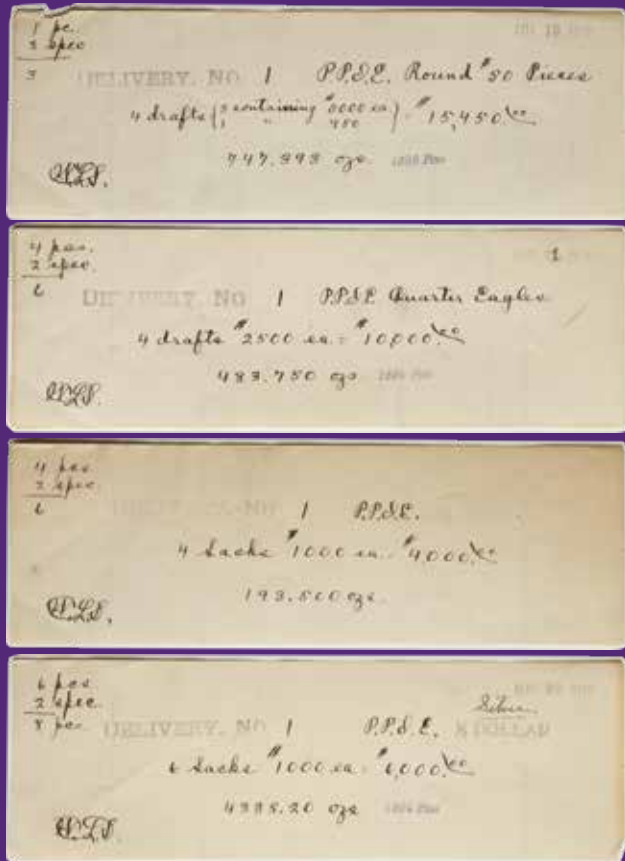

3. May 28, 1915-dated receipt for Delivery No. 1 of P.P.I.E. gold dollars. A mostly hand written form acknowledging the delivery of four sacks of 1915-S Panama-Pacific gold dollars. Each sack contained 1,000 pieces, valued at \$1,000 each, for a total of \$4,000, or 4,000 Panama-Pacific gold dollars.

4. May 28, 1915- dated receipt for Delivery No. 1 of P.P.I.E. silver half dollars. A mostly hand written form acknowledging the delivery of six sacks of 1915-S Panama-Pacific half dollars. Each sack contained 2,000 pieces, valued at \$1,000 each, for a total of \$6,000, or 12,000 Panama-Pacific half dollars, a considerable portion of the total distribution of 27,134 pieces for this issue.

The documents are all well-preserved and completely legible, with minor fading on some entries and minimal chipping on some edges. A fascinating archive for the advanced collector.

From The Paul Denby Collection of U.S. Gold Commemoratives.

END OF THE PAUL DENBY COLLECTION OF U.S. COMMEMORATIVE GOLD

COMMEMORATIVE GOLD

1915-S Five-Piece Panama-Pacific Set, Plus Box Unc Details Through MS65, All PCGS-Certified First Time Offered at Public Auction

4878 1915-S Five-Piece Panama-Pacific Set and Original Box, Unc Details Through MS65 PCGS. In our FUN Auction, we sold an original Panama-Pacific set (with box) that had been in the Hills Brothers family (of coffee fame) that was purchased at the Panama-Pacific Exposition in 1915. That set did extraordinarily well and brought \$180,000. The set was co-consigned, and this five-coin set is from one of the same consignors. These coins came from a much larger East Coast collection that was formed in the 1940s and 1950s. This is the first time this Panama-Pacific set has been offered at public auction, and it is being sold without reserve.

1915-S Panama-Pacific Half Dollar, MS62 PCGS.

Greek and Roman imagery dominate the quarter eagle and fifty dollar gold coins issued in 1915 to celebrate the opening of the Panama Canal one year earlier. The silver half dollar differs stylistically. Cornelius Vermeule wrote in 1971: "The obverse is the halfway point between the designs on French silver coins early in the new century and A.A. Weinman's Walking Liberty for the half dollar which appeared in 1916." George Morgan's reverse is reminiscent of his earlier pattern designs for the silver dollar. Whether intentional or not, the French-inspired obverse and American reverse symbolize the collaboration between the two countries in building the Canal. Pan-Pac half dollars were sold individually and in sets with the total distribution figure amounting to 27,134 coins. This example displays deeply toned surfaces with the normally seen satiny luster still evident. There are no obvious or detracting marks on either side.

1915-S Panama-Pacific Gold Dollar, MS65 PCGS.

New York sculptor Charles Keck's obverse design shows the profile of one of the 80,000 or so workers that toiled over the construction of the Panama Canal. Unlike the quarter eagle and fifty dollar gold pieces issued to commemorate the Panama-Pacific International Exposition, criticized by some for lacking a distinctly American character, the 1915 gold dollar has a decidedly American quality that projects strength and determination. Unfortunately, Keck's intent was unclear to some, who mistook the profile for that of a baseball player. The reverse is unmistakable in its imagery: two dolphins symbolizing the recently completed water route. The issue had a net distribution of 15,000 coins, most of those pieces sold singly. The surfaces on this piece display bright yellow-gold mint luster that is interrupted only by a few shallow abrasions on each side.

1915-S Panama-Pacific Quarter Eagle, MS65 PCGS.

Like the large fifty dollar gold coins issued for the Panama-Pacific International Exposition, the 1915 Pan-Pac quarter eagle obverse is imbued with classical imagery. Barber's design shows Columbia holding a caduceus, a symbol widely associated with medicine. Dave Bowers writes that Columbia's caduceus represents "the medical triumph over yellow fever in Panama during the canal construction." However, additional meaning may be inferred. It is perhaps less well-known that Hermes, messenger to the gods and the Greek god of commerce and communication, is often depicted carrying a winged and serpent-entwined staff. The caduceus has thus been a device linked to trade. Here, it may very well represent the immeasurable impact the Panama Canal would have on international exchange. The bright yellow-gold surfaces on this piece are softly frosted. Only close examination with a loupe reveals a few very shallow field marks. An interesting semicircular strike-through is seen through the S U on the banner on the lower reverse. The strike details are notably strong.

1915-S Panama-Pacific Fifty Dollar Round — Cleaning — Unc Details PCGS Genuine. The Panama-Pacific International Exposition held in San Francisco in 1915 was grandiose in every sense of the word. It demonstrated not only the city's renewal after the devastating earthquake and fire of 1906 but also the nation's technological progress, most notably the opening of the Panama Canal in 1914. The exposition featured monumental public buildings as prescribed by the then-popular City Beautiful urban planning movement, ornate sculptures by famous American artists, and technological innovations like a Ford Motor Company assembly line.

One of the main themes of the exposition was illumination. Electric lighting, especially on such a mass scale, was then still considered a wondrous scientific achievement. The goal of lighting engineers was, through indirect illumination, to present the exposition in as marvelous a fashion at night as it appeared by day. In his article "The Panama-Pacific International Exposition at Night: How the Illuminating Engineer Uses Light Decoratively," published in *Scientific American* in April 1915, Hamilton M. Wright explains: "At the exposition the lighting is produced with a dramatic effect suggesting undreamed of power and potentiality."

Such was also the case with the two fifty dollar gold coins, designed by Robert Aitken, issued to commemorate the event. The obverse design features Minerva, goddess of wisdom, skill, and trade; while the reverse displays an owl, another symbol of wisdom and the sacred bird of Minerva. A spider web, suggestive of industry, appears behind the owl. Clear parallels can be drawn between these motifs, which also appear on the Great Seal of the State of California, and those themes which the exposition and its impressive illumination evoked.

The Round fifties are scarcer than their Octagonal counterparts, which proved more popular at the time because of its novel shape. The Round fifties were struck to the extent of 1,504 coins. However, the large gold pieces were rather expensive souvenirs and thus out of reach for most exposition-goers. According to Roger Burdette, 1,027 Round "quintuple eagles" were ultimately destroyed, leaving a net mintage of just 477 coins. The devices are sharply struck and there is light evidence of cleaning, more evident on the obverse. Remarkably free from post-striking defects otherwise.

1915-S Panama-Pacific Fifty Dollar Octagonal, MS63 PCGS.

The production of fifty dollar gold coins commemorating the Panama-Pacific International Exposition was not entirely without problems. Chief among them was time. Congress passed a bill authorizing the production of gold dollars, quarter eagles, fifty dollar gold coins (equally divided between Round and Octagonal), and silver half dollars on January 13, 1915, just over one month prior to the opening of the fair. In a memorandum dated January 15, 1915, Acting Director of the Mint Frederick P. Dewey wrote to Assistant Secretary of the Treasury William P. Malburn regarding the time constraints: "It will be all but impossible to comply with the terms of the bill requiring the delivery of the coins on the opening day of the Exposition February 20." Dewey was correct. The Octagonal and Round fifties were only delivered in June and July of 1915 respectively.

Diameter also posed problems for Robert Aitken, the San Francisco sculptor selected to design the fifty dollar gold pieces. After examining several fifty dollar "slugs" from the Gold Rush period and an 1877 half union pattern — all with varying diameters — at the American Numismatic Society in New York, Aitken requested clarification regarding the required diameter of Pan-Pac fifties. Dewey responded that the new octagonal coins should be same diameter as the original 1851 slugs produced by the United States Assay Office. However, Chief Engraver Charles Barber wrote to Philadelphia Mint Superintendent Adam M. Joyce on February 4:

"If the diameter in the extreme of both the octagonal and round does not exceed one and a half inches with the relief kept down to what is known to modern coin relief, I am of the opinion that it could be struck upon a coining press, any larger diameter would have to be made as a medal upon the hydraulic press."

Congressional legislation mandated that the coins be produced in San Francisco and appear roughly the same size as the 1851 slugs. That is, the coins had to measure 1.73 inches in diameter, necessitating the use of a hydraulic press. However, these requirements were mutually exclusive based on the capabilities of the West Coast facility, which possessed a coining press but not a hydraulic press. In order to satisfy both the stipulations, Treasury Secretary McAdoo shipped the hydraulic press to California on March 22, 1915 at an expense of \$385.22. The surfaces of this massive, two and a half ounce coin show only slight abrasions. The mint luster is softly frosted and there is just a tinge of reddish patina to the otherwise yellow-gold color.

Five-Piece Black Box

The box is scuffed on the top and bottom, and the top side is bowed, as often seen. The interior is bright and fresh with the distinctive purple silk and felt. The designer's explanatory card is also included. (Total: 6 items) NGC ID# BYHP, PCGS# 7451

PROOF COMMEMORATIVE GOLD

1916 McKinley Gold Dollar, PR63 Only Four Known Proofs

4879 1916 McKinley PR63 NGC. CAC. Little concrete information survives concerning the proof McKinley gold dollars. It is clear that few exist, probably four or five in all. Walter Breen wrote in his *Proof Encyclopedia* of four examples, including one in the Smithsonian Institution.

We wrote in August 2011:

“Proof examples are extremely rare, with only three confirmed specimens. Walter Breen recorded a proof in the Smithsonian Institution, but Jeff Garrett and Ron Guth report that the Smithsonian coin ‘is not a true Proof by today’s standards.’ ”

As far as we can determine, there are four confirmed pieces:

- **Choice Proof.** RARCOA (Auction ‘89, 7/1989), lot 363. Part of a three-piece set that also included a business strike and a nickel trial piece, Judd-1802. This is probably the piece that PCGS has graded PR64 Cameo, and it appears to be the same piece that is illustrated in the Garrett and Guth reference.
- **PR64 PCGS.** Superior (10/1990), lot 2283; Superior (5/1994), lot 1745.
- **PR63 Cameo PCGS.** Bowers and Merena (1/1996), lot 2320; Stack’s (11/2008), lot 5076; Chicago Signature (Heritage, 8/2011), lot 7718.
- **PR63 NGC.** Orlando FUN Platinum (Heritage, 1/2012), lot 5140; Philadelphia Signature (Heritage, 8/2012), lot 5471. **The present specimen.**

The present coin is an unquestionable proof, with razor-sharp strike details far sharper than any business strike could possibly show. The surfaces are a medium yellow-gold, incredibly reflective on each side. A few minor contact ticks appear only a loupe. Census: 4 in 63, 3 finer (2/16).

Ex: FUN Signature (Heritage, 1/2012), lot 5140; Philadelphia Signature (Heritage, 8/2012), lot 5471. NGC ID# BYLK, PCGS# 7487

MODERN BULLION COINS

1995-W Silver Eagle, PR70 Ultra Cameo Proof Series Key

4880 1995-W Silver Eagle PR70 Ultra Cameo NGC. In 1995, proof Silver Eagles were struck at two different mints. Regular coinage was accomplished in Philadelphia, but a small number of pieces (30,125) were struck at the West Point Mint as part of special 10th Anniversary bullion program proof sets. The small mintage was dictated by how many complete sets were ordered. The 1995-W Silver Eagle could not be purchased individually like its Philadelphia counterpart. Today, the number of collectors assembling the Silver Eagle proof series far outnumbers the availability of the 1995-W. This top-grade example should garner particular interest. The strike is sharp, and the preservation is flawless. White-on-black contrast is outstanding. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR70 Deep Cameo Top-Grade PCGS Example

4881 1995-W Silver Eagle PR70 Deep Cameo PCGS. The stark white-on-black contrast of this perfectly preserved 1995-W Silver Eagle is immediately appealing, and the perfection of the strike is equally impressive. This is the key to the Silver Eagle series, as its mintage of only 30,125 pieces produces a significantly stunted supply for the vast number of Silver Eagle collectors. The 1995-W was only sold in 10th Anniversary bullion program proof sets, which were offered from the West Point Mint at a cost of \$999 apiece. The high cost limited sales of the set and therefore also that of the 1995-W Silver Eagle. This is a PR70 Deep Cameo PCGS coin, which is the most highly sought-after of any grade/service combination. PCGS lists only 113 pieces in perfect condition (3/16). NGC ID# CFWX, PCGS# 9887

TERRITORIAL GOLD

1995-W Silver Eagle, PR70 Ultra Cameo Low-Mintage Key Issue

4882 1995-W Silver Eagle PR70 Ultra Cameo NGC. From a limited mintage of 31,125 pieces, the 1995-W is the key to the Silver Eagle series. The proofs were struck exclusively at the West Point Mint for inclusion in special 10th anniversary bullion coin sets, alongside the various gold issues. However, the set's issue price of \$999 was too high for most collectors, resulting in disappointing sales. As a result, the 1995-W proof Silver Eagle has the lowest mintage of the series and examples are prized by collectors, especially in the ultimate grade of PR70. The 1995-W is mentioned in the *100 Greatest Modern Coins*.

The present coin is a magnificent specimen, with technically perfect brilliant surfaces and fully struck design elements. The deeply mirrored fields contrast profoundly with the richly frosted devices to produce a stunning cameo effect. Eye appeal is terrific for this sought-after modern rarity. NGC ID# CFWX, PCGS# 9887

C. Bechtler Five, K-19, MS61 20 Distant from CARATS, RUTHERF:

4883 (1834-37) C. Bechtler Five Dollar, 20 Distant, RUTHERF: MS61 PCGS. K-19, Low R.6. Christopher Bechtler was the most important private Southern gold coiner. He operated his North Carolina mint between 1831 and the mid-1840s, and his less successful son continued the operation until the early 1850s. While gold dollars from the facility turn up regularly, the five dollar varieties range from rare to extremely rare. On the present variety, the date August 1, 1834 refers to the reduction in tenor of U.S. gold coins. The straw-gold surfaces are refreshingly unabraded and are also free from any planchet issues. Listed on page 382 of the 2016 *Guide Book*. Population: 2 in 61, 0 finer (3/16). NGC ID# 2B9S, PCGS# 10115

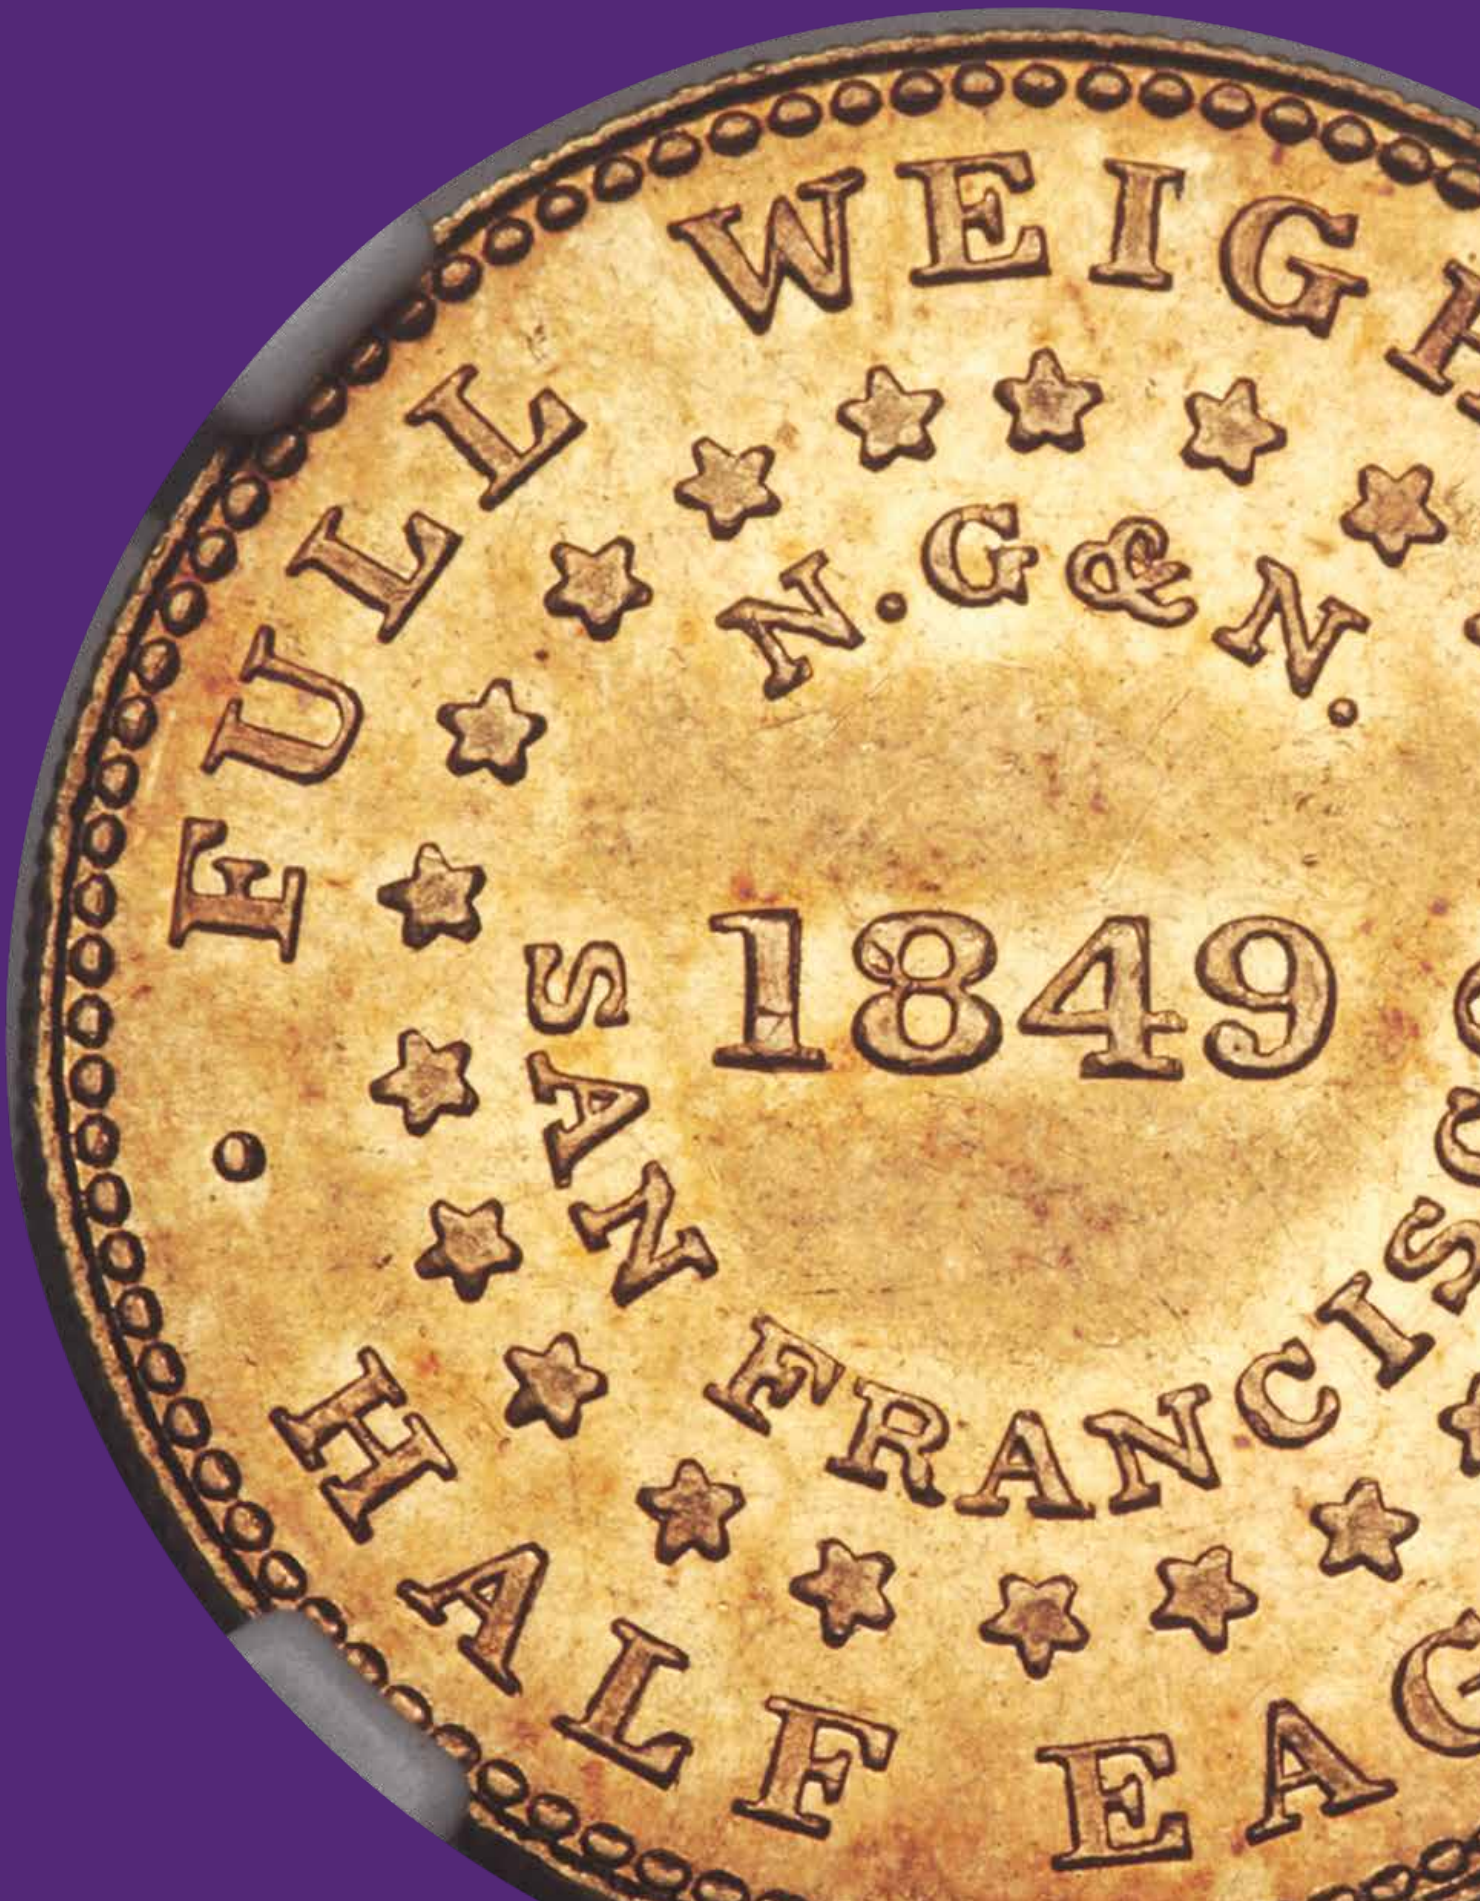

**C. Bechtler K-23 Half Eagle, MS61
Rare GEORGIA GOLD, RUTHERF Variety
Sole Finest at PCGS**

4884 (1834-37) C. Bechtler Five Dollar, RUTHERF. MS61 PCGS. K-23, R.5. GEORGIA GOLD obverse, RUTHERF reverse. The Sixth Series C. Bechtler coins were 22 carat, one carat higher than the 21-carat standard of the Fifth Series coins struck of Carolina gold. Three different location stamps appear on the various Bechtler half eagles: NORTH CAROLINA GOLD, CAROLINA GOLD, and GEORGIA GOLD. Donald Kagin writes in his 1981 reference, "Since there were three different purities and corresponding weights appearing on the \$5 gold coins ... it is believed that the location inscriptions actually designated three different degrees of fineness, regardless of where the stamped gold was mined."

This Uncirculated five dollar piece is certain to hold particular appeal for collectors of Dahlonega and Charlotte gold, and will no doubt spark interest among other collecting disciplines. Semiprooflike yellow-gold surfaces show only light field chatter rather than mentionable marks. Listed on page 382 of the 2016 *Guide Book*. Population: 1 in 61, 0 finer (3/16).

Ex: Riverboat Collection / Central States Signature (Heritage, 4/2014), lot 5408. NGC ID# 2B9W, PCGS# 10109

1849 Norris, Gregg & Norris Half Eagle, MS63
First California Territorial Gold Issue
Reeded Edge, No Period After ALLOY, K-3

4885 1849 Norris, Gregg, & Norris Five Dollar, Reeded Edge, MS63 NGC. K-3, R.6. Ex: Eric P. Newman. The partnership of Norris, Gregg & Norris was founded in New York City as a manufacturing and engineering concern specializing in metal pipes, fittings, boilers, etc., used in plumbing and steam-heating of public buildings. The partners were Thomas H. Norris, Charles Gregg, and Hiram A. Norris, and the firm relocated to the San Francisco area in 1849, following the discovery of gold at Sutter's Mill the previous year. The firm began issuing private gold coinage shortly after its arrival, as evidenced by an article in the *Alta California* newspaper, dated May 31, 1849:

“We have in our possession a Five Dollar gold coin, struck at Benicia City, although the imprint is San Francisco. In general appearance it resembles the United States coin of the same value, but it bears the private stamp of ‘Norris, Grieg, & Norris’, and is in other particulars widely different.”

This brief notice is the earliest mention in print of private coinage in California, and experts believe Norris, Gregg & Norris were the first private coiners in the area. While the article was useful in establishing the firm's priority in the field, it also introduced some misconceptions that puzzled numismatists for many years. The federal half eagles of the period do not resemble the Norris, Gregg & Norris coins at all, except in size and denomination. Perhaps these were the similarities referred to in the article, as the devices are “widely different” in all particulars. The article spells the middle partner's name as Grieg, and Augustus Humbert spelled it Grigg, but contemporary directories list the name as Gregg, the most likely spelling. Although the *Alta California* mentions the stamp of “Norris, Grieg & Norris”, the coins are only stamped N.G. & N., puzzling early catalogers as to the identity of the issuers. The coins began appearing at auction at least as early as Woodward's Sixth Semi-Annual Sale, in March of 1865, yet the firm's identity remained an enigma until an example was discovered in the effects of Augustus Humbert many years later. The description of lot 709 of the Weeks-Humbert Collections (S.H. & H. Chapman, 5/1902) finally dispelled the mystery:

“1849 \$5 Eagle with shield, with 5 on breast. CALIFORNIA GOLD WITHOUT ALLOY. R. Twenty-two stars enclosing N.G. & N. (Norris, Grigg & Norris). SAN FRANCISCO 1849. Around FULL WEIGHT OF HALF EAGLE. Very fine. Dent on obv. The old piece of paper in which this was wrapped supplied the long sought for name of the firm issuing this coin.”

Norris, Gregg & Norris struck large numbers of these five-dollar coins in 1849, and assays at the Philadelphia Mint revealed that the coins were struck without any attempt to alloy the ore, which naturally contained a small amount of silver. The intrinsic value of the coins was reasonably close to the face value, and the coins were well-received by the public. Four die varieties are listed for the date in Donald Kagan's authoritative series reference. All four varieties employ the same obverse and reverse dies, but examples are known with plain and reeded edges; some coins show a period after ALLOY in the reverse legend, while others do not. The missing period is due to die wear and striking characteristics, rather than a difference in design. The present coin represents the rare K-3 variety, with a reeded edge and no period after ALLOY. Probably fewer than 30 examples of the K-3 are extant in all grades today, making it the rarest of the 1849 varieties.

A single coin is known with an 1850 date and STOCKTON instead of SAN FRANCISCO in the legend, designated as K-5 in *Private Gold Coins and Patterns of the United States*, so Norris, Gregg & Norris must have relocated after 1849. The firm is mentioned in at least two articles in the *Stockton Times* in 1850. Norris, Gregg & Norris ceased operations at an unknown date, and it seems unlikely that many coins were struck at the Stockton location, due to the paucity of survivors. The engraver of the dies is unknown, but Albert Kuner once claimed to have prepared a set of dies for this firm. Since Kuner did not arrive in California until July of 1849, his claim has usually been discounted, as far as the 1849 issue is concerned, but he might have engraved the dies used at the Stockton facility.

The coin offered here is the single-finest certified example of the Reeded Edge type seen by NGC and PCGS (3/16). The design elements are boldly rendered and the workmanship is high quality. The pleasing orange-gold surfaces show only minor signs of contact and the fields are brightly reflective in most areas. Eye appeal is extraordinary. The record price realized for a Norris, Greg, & Norris five was established by the present coin in its last appearance in the fabulous Eric P. Newman Collection, Part V, where it realized \$99,875. The advanced collector of Territorial gold should bid accordingly. Listed on page 383 of the 2016 *Guide Book*.

Ex: Eric P. Newman Numismatic Education Society; Newman Collection, Part V (*Heritage*, 11/2014), lot 3471, realized \$99,875. NGC ID# ANJE, PCGS# 10282

1851 Humbert Fifty Dollar, K-5, MS61 Well-Preserved and Lustrous

4886 1851 Humbert Fifty Dollar, Reeded Edge, 880 Thous. MS61 NGC. K-5, Low R.5. No 50 on Reverse. Excellent luster on yellow-gold surfaces and a nicely bold strike are highlights of this Mint State 1851 Reeded Edge Humbert fifty dollar, an example of the most iconic coinage to issue from the historic California Gold Rush that began in 1849. Note how boldly the peripheral obverse legend, AUGUSTUS / HUMBERT / UNITED / STATES / ASSAYER / OF GOLD / CALIFORNIA / 1851, is stamped onto this coin. Even other Mint State examples we have offered in the past seldom show such sharpness throughout the entire eight sides of the octagon. This piece does show quite a few scattered marks, most of them likely from long-term bag storage, and one small planchet flaw appears in the inner circle on the obverse, just below the L in GOLD.

The Humbert/U.S. Assay Office fifty dollar gold coins were part blessing, part curse. They were an a semiofficial issue, but they were too large and cumbersome for small transactions, and making change for them was a nightmare. They began their long journey to the present after two waves of California private-gold coiners had already come and gone. Names such as Norris, Gregg, and Norris — apparently the first to strike California gold coins *in California* (although Templeton Reid apparently struck some trials in Georgia) — Dubosq, Schultz, Miners Bank, Pacific Company, J.S. Ormsby, and the highly debased Mormon coinage had already come and gone by the time the U.S. Congress, in late 1850, authorized Augustus Humbert to become U.S. gold assayer for California. Most of those early coiners' products fell victim to a lack of trust on the part of the populace, the victims of what was likely a combination of greed, incompetence, and good intentions coupled with primitive technology and a lack of proper equipment and supplies to strike credible and durable gold coinage.

The sole surviving entity from those first two waves of private coiners was Moffat & Co., with which Humbert associated himself in the task of making the semiofficial fifty dollar gold pieces in 1851 and 1852, becoming an unofficial or provisional branch mint of the United States Mint in California.

As mentioned, this piece is covered with marks that are extensive but mostly in the small to medium category; a single dig through the H in THOUS., on the ribbon, is among the few larger marks. A series of four triangular reeding marks in the right obverse field, under the eagle's wing, is another. Note how well-preserved that even the vertices of the octagon are, however; most of them are free of mentionable rim bumps. Listed on page 385 of the 2016 *Guide Book*. Census: 8 in 61, 5 finer (3/16). NGC ID# ANH8, PCGS# 10211

**1851 Humbert Fifty Dollar, 887 Thous., MS63
K-6, Finest Graded at PCGS
Iconic Gold Rush Issue**

4887 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. MS63 PCGS Secure. CAC. K-6, R.4. This remarkable Humbert 887 Thous. fifty dollar gold piece, with its celebrated and iconic octagonal design, is the finest example certified at PCGS. For a large Territorial gold Humbert fifty dollar to merit (and rightly so) such a grade makes this a remarkable and noteworthy survivor of this historic early-California issue. The overwhelming majority of these large-denomination pieces were melted in the years shortly after their issuance, as more-convenient forms of commercial exchange became available (chiefly smaller-denomination gold coins from the San Francisco Mint, opened in 1854, and from private coiners who operated in California through 1855). Today, Mint State examples of the Humbert-U.S. Assay octagonal fifties are few and far between — in our opinion, far rarer than the inflated certified populations would lead one to believe.

To begin with, the importance of the 1851 fifty dollar gold coins can scarcely be overemphasized. Ask any advanced collector of Territorial gold to name the most significant and memorable coinage design from the early California Gold Rush period, and the Humbert-U.S. Assay Office octagonal fifty dollars will likely be the first named. For many years — until the commemorative Panama-Pacific fifty dollar pieces of 1915 — the 1851-52 Humbert-Assay Office fifties remained the only large octagonal gold coins struck under the auspices of the United States Mint (the Assay Office was a provisional government mint), although later California private coiners struck round fifty dollar coins (Kellogg in 1854-55 and Wass, Molitor in 1855).

The importance of the 1851- and 1852-dated octagonal fifty dollar coins is such that even well-circulated examples (a class that includes most of the surviving population) are bid up to extremely high levels by multiple bidders eager to lay hands on these colorful mementos of the Wild West, the Gold Rush, and the famous “Forty-Niners” who rushed to seek their fortunes in the fields of gold in 1848-49.

We attempted to build a roster of Mint State examples for the 1851 887 Thous. Humbert fifty dollars; we soon discovered that, unlike so many numismatic rarities that trade fairly frequently, these are coins that seldom change hands, particularly at the Mint State level. Attractive, problem-free Mint State representatives are so scarce — and so iconic in their numismatic importance — that they tend to stay with their owners for many, many years, or else move from owner to owner via private treaty, making pedigree tracking problematic.

The present MS63 PCGS example is of the K-6 reverse variety, showing the ribbon quite close to the edges and a larger concentric circle in the center than on the K-7. As expected given the grade, a wealth of detail is apparent, often bold, on this coin. The date and AUGUSTUS HUMBERT are easily discernible, even though they are weak on most survivors, and all of the other peripheral inscriptions are strong. Well-sculpted detail appears on the eagle’s wing feathers, the shield, and throughout the “engine-turned” reverse. A few scattered marks are as expected. A tiny planchet indent helps with pedigree identification, below the T in THOUS., and a series of four small reeding marks appears in the left obverse field, just below the (larger) TE in UNITED. Generous luster prevails on both sides of this piece, complementing attractive yellow-gold and tan-gold surfaces.

The present coin is the only example of this variety Heritage has ever offered in a PCGS MS63 holder. Such auction offerings are quite infrequent. Two NGC-certified MS63 coins were sold in 2014, both by Heritage. Those pieces realized \$176,250 and \$223,250. Needless to say, we believe this prestigious coin, the finest known, would form the *pièce de résistance* of any collection, will be on pace to set a new price record for the issue. Listed on page 385 of the 2016 *Guide Book*. Population: 1 in 63, 0 finer (2/16). NGC ID# ANH9, PCGS# 10214

**1853 Assay Office Twenty
900 Thous., MS65
K-18, Tied for Finest at NGC**

4888 1853 Assay Office Twenty Dollar, 900 Thous. MS65 NGC. **K-18, R.2.** By the time these late-Gold Rush territorial issues were struck by the United States Assay Office, the Humbert-Moffat-U.S. Assay Office firm had a brand cachet that no other private coiners could match. The magic, official endorsement UNITED STATES ASSAY OFFICE OF GOLD SAN FRANCISCO CALIFORNIA gave these pieces (and their fifty dollar cousins with the Humbert and Assay brands/nameplates) an official — or at least, semiofficial — endorsement that no other Johnny-come-latelies could match.

Imagine that today, you were given two choices. One is a one-ounce American Gold Eagle with the .999 fineness stamped on it and UNITED STATES OF AMERICA. The second choice is a one-ounce gold coin stamped .999 fineness and UNKNOWN COMPANY as its maker. Which would you choose?

It was no different in Gold Rush California. In February 1852, Customs collector T. Butler King was instructed by Treasury Secretary Thomas Corwin to accept the Assay Office's gold coinage, and that opened the floodgates to a large quantity of 884 fineness and 887 fineness Assay Office gold coinage in denominations of ten, twenty, and fifty dollars in 1852 and (dated) 1853. But in September 1852, Corwin further specified that Customs payments must be in 900 fine gold, commensurate with the federal gold standard. Fortunately, the reorganized U.S. Assay Office could by this late date actually refine gold to the required standard. It is virtually a certainty that many of the earlier 880, 884, and 887 fineness gold coins of all denominations were melted down and restruck as these 1853 Assay Office twenty dollar coins of 900 fineness, among the most common of all Gold Rush issues.

While the present K-18 Assay Office twenty is unremarkable in terms of its variety, it is exceptional in terms of its extremely high preservation. It is nearly unthinkable that this piece could have survived for so long in any other way than through the most careful, loving, and intentional preservation. The dies that struck this were originally 880 fineness, overstruck with the later, correct 900 fineness. PCGS and NGC combined report only nine example in this grade, and a single MS66 is finer at PCGS (3/16). Glorious, rich luster and fantastic peach-gold color combine for maximum eye appeal on the problem-free, well-struck surfaces of this Gem coin. Listed on page 388 of the 2016 *Guide Book*. NGC ID# ANHD, PCGS# 10013

PATTERNS

1836 Gold Dollar Pattern in Gold
Judd-67, PR66+
The First Gold Pattern Struck

4889 1836 Gold Dollar, Judd-67, Pollock-70, R.5, PR66+ PCGS. Christian Gobrecht both designed and engraved the dies for this gold dollar pattern. The influence of Mexican coinage is clearly seen on the obverse design showing a Liberty cap surrounded by rays of glory. The reverse features the denomination 1 D. within a coiled palm frond, with the date below and UNITED STATES OF AMERICA above. Struck in coin gold with a 10% copper alloy and a plain edge. Original 1836 patterns were struck prior to March 14 of that year, as established by Walter Breen based on the date Mint Director Patterson sent a gold pattern to Secretary of the Treasury Levi Woodbury. This piece has a coin alignment (end over end) rather than a medallion alignment (side to side). Striking softness is noted in the center of each side, as seen by slight porosity in those areas. The fields are deeply reflective and the piece displays a reddish tint overall. Exceptional quality. NGC ID# 26VC, PCGS# 11260

1856 Flying Eagle Cent in Copper
Judd-181, Pollock-211, Snow-1
PR64 Brown

4890 1856 Flying Eagle Cent, Judd-181, Pollock-211, High R.6, PR64 Brown PCGS. Snow-1. The obverse shows the repunched 5 that is characteristic of Richard Snow's Obverse 1. The reverse has the tilted ONE CENT feature, described by Snow as Reverse A. Struck in copper with a plain edge. With the reverse in its proper vertical alignment with the ribbon bow at 6 o'clock and the branch terminals at 12 o'clock, ONE and CENT are both slanted sharply downward from left to right. This misalignment perhaps was the reason for early rejection of this die pair. Rich brown patina shows a bit of blue interspersed, and the devices on the obverse show the faint remnants of original red around the devices. Sharply defined throughout. PCGS# 11792

**1864 With L Indian Cent in Copper
PR62 Red and Brown, Judd-357
Heralded Proof Rarity**

4891 1864 Indian Cent, With L, Judd-357, Pollock-Unlisted, R.7, PR62 Red and Brown NGC. Snow-PR2. Struck from regular issue With L 1864 Indian cent plain edge dies, but in copper instead of bronze. A metallurgical test is required to distinguish copper from bronze; the reason Pollock omitted the variety. The 1864 With L bronze cent is a famous rarity in proof format, and it is possible that the present coin would certify as such if resubmitted. While the Judd-357 PCGS Population is zero, NGC has certified four pieces (3/16). The die marriage is Snow-PR2, identified by a prominent die scratch on Liberty's neck below the jaw. An intricately struck specimen with rose-red fields and mahogany-brown high points. The quality is outstanding for the PR62 level, since marks are absent and carbon is minimal. A small strike-through (as coined) rests between a pair of upper feathertips. Housed in a prior generation holder. PCGS# 21120 Base PCGS# 21119

**1871 Regular Dies Quarter Eagle in Copper
Judd-1164, PR65 Red and Brown**

4892 1871 Quarter Eagle, Judd-1164, Pollock-1306, R.7, PR65 Red and Brown PCGS. CAC. The regular dies for the 1871 Liberty quarter eagle, struck in copper with a reeded edge. In the 1860s and 1870s, the Philadelphia Mint served as an active coin dealer, with the legal ability to create their own inventory, unlike private dealers. Sometimes called dies trial pieces, the copper and aluminum strikes from regular-design gold dies were most likely issued for collectors. The present piece has considerable field-to-device contrast with mostly brilliant red surfaces that show only slight brown toning acquired over the years. Population: 2 in 65 Red and Brown, 0 finer (2/16).

From The Indian Rocks Collection. NGC ID# 2A5K, PCGS# 71426

1913 Buffalo Nickel Pattern Judd-1950, No Designer's Initial, PR63 Extremely Rare

4893 1913 Buffalo Nickel, Judd-1950 (formerly Judd-1789), Pollock-2025, Low R.7, PR63 PCGS Secure. Ex: Farouk / Forsythe. We have handled this rarity twice previously. The first time was in our June 2001 Long Beach Auction, where it was described as, "Similar to the adopted design but lacking the designer's initial F below the date. Struck in nickel with a plain edge. The surfaces have a rough, granular texture that is even more pronounced than on the regular issue coins. Obviously cleaned at one time, the surfaces have since retoned in speckled rose and lime-green colors but much of the underlying brilliance is still evident." The obverse rim is also much wider than any circulation strike or proof Buffalo nickel.

Mint documents indicate that Philadelphia Mint Superintendent John Landis informed Mint Director George Roberts on March 3, 1913 that 17 of these pieces had been struck and he also listed to whom they were distributed. Of the 17 struck, six pieces went to John Landis on February 28 and are assumed to have been destroyed. Two are in the Smithsonian, leaving at most nine examples in private hands (assuming they have all been identified as patterns).

Three Buffalo nickel-design coins were Included in the eight-coin set housed in a custom leather case with the five 1913 Liberty nickels when Eric P. Newman acquired those famous coins in the early 1940s. In a September 2011 article in *The Numismatist*, Jeff Reichenberger notes that the Judd-1950 pattern was probably one of those pieces.

Ex: Possibly Colonel Green and formerly housed with the five 1913 Liberty nickels; B.G. Johnson; Eric Newman; Palace Collections of Egypt (Farouk) (Sotheby's, 2/1954), part of lot 2029, purchased by Baldwin; Auction '89 (Stack's session, 7/1989), lot 1857; Long Beach Signature (5-6/2001), lot 9484; FUN Signature (Heritage, 1/2003), lot 9484; Forsythe Buffalo Nickel Collection / Regency Auction X (Legend, 12/2014), lot 338.

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$200,000 (minimum \$14), plus twenty percent (20%) of any amount between \$200,000 and \$2,000,000, plus twelve percent (12%) of any amount over \$2,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be no-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment
< \$10.....	\$1
\$10 - \$49.....	\$2
\$50 - \$99.....	\$5
\$100 - \$199.....	\$10
\$200 - \$499.....	\$20
\$500 - \$999.....	\$50
\$1,000 - \$1,999.....	\$100
\$2,000 - \$4,999.....	\$200
\$5,000 - \$9,999.....	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999	\$1,000
\$20,000 - \$49,999	\$2,000
\$50,000 - \$99,999	\$5,000
\$100,000 - \$199,999	\$10,000
\$200,000 - \$499,999	\$20,000
\$500,000 - \$999,999	\$50,000
\$1,000,000 - \$4,999,999	\$100,000
\$5,000,000 - \$9,999,999	\$250,000
>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A

REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In

Terms and Conditions of Auction

addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This is a Public Auction Sale conducted by Auctioneer. The New York City licensed auctioneers are: Samuel Foose – 0952360, Kathleen Guzman – 0762165, Michael J. Sadler – 1304630, Scott Peterson – 1306933, Andrea Voss – 1320558, Ed Beardsley – 1183220, Clinton Swett – 1407750, and Nicholas Dawes – 1304724, who will conduct the sale on behalf of Heritage Auctioneers & Galleries, Inc. NYC #41513036 ("Auctioneer").

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auctioneer may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance, or reserve, or guarantee. Auctioneer has made advances to various consignors in this sale. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates, and its employees may bid on their lots or other lots for their own account in accordance with the laws of New York, and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 3-7-2016

MyRECOMMENDATIONS

Online Suggestion Tool

THE LAST PIECE OF THE PUZZLE? HERITAGE HAS IT.

Our new online tool, MyRecommendations looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available—even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with MyRecommendations visit Heritage's US Coin pages now at HA.com/Coin.

SESSION FOUR

MORGAN DOLLARS

1878 8 Tailfeathers Dollar, MS65 VAM-3, Spiked Eye Variety

4894 1878 8TF Spiked Eye, VAM-3, MS65 PCGS. A die chip appears below Liberty's eyelid, and the reverse legends are doubled. Variegated rainbow hues span the entire obverse, while a crescent of similar colors clings to the right reverse border. The remainder of that side is lightly toned in shades of gold. The eagle's breast feathers exhibit needle-sharp definition, and the overall state of preservation is impression. NGC ID# 2YR3, PCGS# 133786 Base PCGS# 7072

4895 1878 8TF Polished Ear, VAM-14.2, MS65+ PCGS. CAC. Light honey-gold toning visits the obverse margin. The reverse periphery exhibits a broader band of golden-brown, plum-red, and blue-green patina. The fields and devices are brilliant. Lustrous and sharply struck with a smooth portrait and a beautifully preserved reverse. VAM-14.2 Population: 8 in 65+, 0 finer (3/16). NGC ID# 253H, PCGS# 133797 Base PCGS# 7072

4896 1878 8TF Diagonal in 8, VAM-17, R.4, MS65 PCGS. Frosty, vibrant luster blankets both sides of this Gem first-year Morgan dollar, with boldly detailed design elements and fully brilliant mint bloom. A few light surface grazes appear on Liberty's cheek, none of them out of line with the grade. For the variety, Population: 18 in 65 (2 in 65+), 0 finer (2/16).
Ex: Long Beach Signature (Heritage, 6/2014), lot 5040. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

4897 1878 8TF Diagonal In 8, VAM-17, MS65+ PCGS Secure. CAC. Bold and vibrantly lustrous, this high-end Gem eight tailfeathers Morgan dollar displays frosty surfaces with traces of champagne toning around the outer peripheries. The obverse fields are partially reflective. Eye appeal is outstanding. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

1878 8 Tailfeathers Dollar, MS66 VAM-17, Rainbow Toning

4898 1878 8TF Diagonal In 8, VAM-17, MS66 PCGS. CAC. The most available 8 Tailfeathers variety shows slight doubling on LIBERTY and a die line in the lower loop of the first 8. Dramatic shades of yellow-gold, blue, green, rose, and violet blanket the obverse and dominate the reverse border. The central reverse remains frosty and brilliant. This radiant Premium Gem has smooth fields and only subtle contact on the portrait. It would be an arduous task to find another 8 Tailfeather dollar with such vibrant multicolor patina. Population (all varieties): 50 in 66 (4 in 66+), 2 finer (2/16).
Ex: Long Beach Signature (Heritage, 4-6/2012), lot 4200; Long Beach Signature (Heritage, 6/2013), lot 4642.
From The Paul H. Gerrie Collection. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

4899 1878 8TF Broken R & B, VAM-21, MS65 PCGS. Morgan dollars were first struck in 1878, using the 8 Tailfeathers reverse dies. The issue is always in demand from date and type collectors, as well as variety specialists. This well-detailed Gem offers lightly marked, lustrous surfaces under vivid shades of golden-brown, lilac, and slate-gray toning. NGC ID# 253H, PCGS# 133822 Base PCGS# 7072

1878 7/8TF Morgan, MS66 VAM-33, Doubled Legs Reverse

4900 1878 7/8TF Doubled Legs, VAM-33, MS66 PCGS. The recut tailfeathers are barely visible on VAM-33, although bold doubling of the eagle's legs adds significant appeal to this variety. The current Premium Gem is a high-end example of this issue in general. The strike is bold, and there are no major abrasions. Concentric shades of mint-green and ocean-blue surround lavender-gray interiors. Eye appeal is excellent. NGC ID# 2TY3, PCGS# 134032 Base PCGS# 7070

**1878 7/8TF Strong Dollar
MS64 Deep Mirror Prooflike**

- 4901 1878 7/8TF Strong, VAM-36, MS64 Deep Mirror Prooflike PCGS.** The contrast is so strong that at first glance this piece appears to be a proof (although it is clearly a business strike on closer inspection), showing deep, boldly mirrored fields and frosty devices. Rose-gold patina accompanies some noticeable scrapes on Liberty's profile. Seldom seen finer in this contrast level. Population: 35 in 64 Deep Mirror Prooflike, 3 finer (3/16). NGC ID# 2TXZ, PCGS# 134033 Base PCGS# 7078

- 4902 1878 7/8TF Strong, VAM-37, MS65 PCGS. CAC.** Cherry-red borders encompass sun-gold and olive-green interiors. This lustrous and well-struck Gem exhibits four feather fragments beneath the tail. Unimportant grazes on the left obverse correspond to the designated grade. VAM-36 and VAM-37 share the same reverse die, identified by a faint spike below the fletchings. *From The Paul H. Gerrie Collection.* NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

- 4903 1878 7/8TF Strong, VAM-38, MS65 PCGS. LIBERTY** is boldly die doubled on VAM-38, a strong 7/8TF variety. Recutting is also visible on all peripheral lettering and stars. This Gem example displays a bold strike with brilliant interiors and light golden peripheral toning. A few light, scattered grazes are not out of line for the grade. NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078

**1878 7 Over 8 Tailfeathers Dollar
MS65+, Popular VAM-38 Variety**

- 4904 1878 7/8TF Strong, VAM-38, MS65+ PCGS. CAC.** Light silver-gray toning visits this lustrous and well struck doubled tailfeathers type coin. Only incidental marks are present, and the eye appeal is imposing. VAM-38 is interesting for its die doubled tail feathers and E PLURIBUS UNUM. The eagle's wing and tail feathers are partially lapped, as issued. NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078

**1878 7/8TF Morgan, MS65 Prooflike
Elusive VAM-40 Die Marriage**

- 4905 1878 7/8TF VAM-40, 7/5 Strong, MS65 Prooflike PCGS.** This is an elusive variety, particularly in Gem Prooflike condition. Doubled stars and broken serifs on the N and M in UNUM are the most prominent die markers. This coin is boldly struck and brilliant with modest field-device contrast. The mirroring is outstanding. The coin is largely unabraded save for a few minor ticks in the left obverse field that define the grade. NGC ID# 2TXZ, PCGS# 40223 Base PCGS# 7079

- 4906 1878 7TF Reverse of 1879 MS65 PCGS.** Both sides of this conditionally rare issue exhibit intense olive and gold toning over the entire surface, with underlying frosty luster. An exceptional attractive example and rare in finer grades with only 22 PCGS-certified examples above MS65 (3/16). NGC ID# 253L, PCGS# 7076

- 4907 1878 7TF Reverse of 1879 MS65 PCGS. CAC.** A sharp, frosty Gem example of the Reverse of 1879, which is rarely seen finer. This coin displays brilliant luster and shows only a few small grazes on Liberty's cheek that limit the grade. PCGS has seen only 22 finer submissions (2/16). *From The Paul H. Gerrie Collection.* NGC ID# 253L, PCGS# 7076

**1878 Morgan Dollar, MS66
7 Tailfeathers, Reverse of 1879**

- 4908 1878 7TF Reverse of 1879 MS66 PCGS.** The slanting top arrow feather identifies the more elusive Reverse of 1879. This spectacular Premium Gem exhibits well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show a few delicate hints of golden-tan and lavender toning at selected angles. Eye appeal is outstanding. Population: 22 in 66, 0 finer (2/16). NGC ID# 253L, PCGS# 7076

- 4909 1878-CC MS65 PCGS.** A delightful Gem from the Carson City Mint and the first year of the Morgan design, this coin exhibits sharply detailed design elements and well-preserved surfaces that radiate frosty mint luster. A few hints of pink and gold toning add to the outstanding eye appeal. NGC ID# 253M, PCGS# 7080

- 4910 1878-CC MS65 NGC.** The well-preserved, lustrous surfaces of this impressive Gem are free of all but the most insignificant signs of contact and the design elements are sharply detailed throughout. Eye appeal is outstanding for this popular first-year issue. NGC ID# 253M, PCGS# 7080

4911 1878-CC MS65 NGC. This Gem first-year Carson City Morgan is fully struck, showing satiny cartwheel luster with a hint of champagne toning around the borders. A few small grazes on Liberty's cheek are all that preclude a finer grade. NGC ID# 253M, PCGS# 7080

4912 1878-CC MS65 PCGS. Blazing, frosty luster and razor-sharp motifs adorn each side of this Gem first-year Carson City Morgan. The reverse is virtually flawless in preservation, although the obverse has a few tiny marks on the cheek and in the field — hidden beneath reddish-gold interior toning — that preclude a finer grade. Both sides showcase vivid peripheral hues of amber, gold, and aquamarine. NGC ID# 253M, PCGS# 7080

4913 1878-CC MS65 PCGS. VAM-9. CC tilted right. Distinctive die lines in the reverse fields and a broken obverse star (fourth from the date to the right) identify VAM-9. This is a frosty Gem example of the debut Morgan from Carson City. Liberty's portrait and the eagle are sharp, and a few light grazes are not bothersome. Finer examples become scarce quickly. NGC ID# 253M, PCGS# 7080

4914 1878-CC MS65 PCGS. The first year of Morgan dollars from the fabled Carson City Mint, the 1878-CC issue remains a perennial collector favorite. This coin exhibits sharply detailed design elements throughout. The well-preserved surfaces show shades of gray, golden-tan, and violet, largely on the reverse.
Ex: Houston Signature (Heritage, 12/2015), lot 3805, which brought \$1,410. NGC ID# 253M, PCGS# 7080

4915 1878-CC MS65 PCGS. An impressive Gem Morgan dollar, with sharply detailed design elements and lustrous surfaces that show medium intensity greenish-gold and lilac toning. A short scratch near Liberty's eye is the only mark of note. NGC ID# 253M, PCGS# 7080

**1878-CC Silver Dollar, Mark-Free MS66
Pastel-Toned Obverse**

4916 1878-CC MS66 PCGS. Magnificent pastel aqua-blue, lime-green, plum-red, and gold toning alternates across the obverse. The reverse is untoned, save for hints of peach near the rims. The surfaces are boldly impressed, lustrous, and splendidly mark-free. This is the highest grade level effectively obtainable, as PCGS reports only six submissions in MS67 (3/16).
Ex: Central States Signature (Heritage, 4/2008), lot 2571, which realized \$4,600. NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar, MS66
Frosty and Attractive**

4917 1878-CC MS66 PCGS Secure. CAC. VAM-9. Mintmark tilted right, broken right-hand star. This CAC-endorsed Premium Gem 1878-CC Morgan dollar displays brilliant, frosty luster with razor-sharp relief detail. The only mentionable abrasion is a thin pinscratch hidden within the eagle's tailfeathers that blends well with the distinct die line in the fields of that region. Eye appeal is superb. This first-year Carson City Morgan is rarely seen finer, with PCGS having graded only six such coins (2/16).
From The Paul H. Gerrie Collection. NGC ID# 253M, PCGS# 7080

**1878-CC Dollar, MS64 Deep Mirror Prooflike
Sharply Contrasted Surfaces**

4918 1878-CC MS64 Deep Mirror Prooflike PCGS. A few hints of translucent pale-gold toning exist near the raised elements of this deeply reflective Carson City dollar, but overall the coin is brilliant with silver-mirrored fields and frost-white devices. The strike is needle-sharp throughout. Deep Mirror Prooflike examples of the first-year CC-Mint dollars are scarce-to-rare in near-Gem and finer grades. PCGS reports just 38 finer coins (3/16). NGC ID# 253M, PCGS# 97081

**1878-CC Morgan Dollar
MS65 Deep Mirror Prooflike
Nearly Unavailable Finer in DMPL**

- 4919 1878-CC Lines in Wing, VAM-11, Top 100, MS65 Deep Mirror Prooflike PCGS. CAC. Ex:** A Gift of Undeserved Favor. A Top 100 Variety. This issue is unarguably scarce in Deep Mirror Prooflike and virtually impossible to locate as such any finer than MS65. This piece is boldly contrasted and deeply mirrored. A few minor luster grazes on the portrait and a handful of non-distracting field marks are the only visual signs of Mint handling. A bold strike shows no weakness at Liberty's hair strands or the eagle's plumage. A crisscrossing of bold die lines in the eagle's wings are characteristic of the VAM-11 variety. Population: 35 in 65 Deep Mirror Prooflike, 3 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 253M, PCGS# 40438 Base PCGS# 97081

- 4920 1878-S MS66+ NGC.** The debut San Francisco Morgan dollar is available in MS66, but finer examples are scarce. This Plus-designated Premium Gem is razor-sharp and frosty with unabraded surfaces that deliver outstanding eye appeal. Brilliant interiors yield to lavender and aquamarine peripheral toning, formed by an old album or paper bank roll. NGC lists 34 finer representatives (2/16). NGC ID# 253R, PCGS# 7082

- 4921 1878-S MS66+ PCGS.** Iridescent shades of greenish-gold, lavender, and violet toning enhance the well-preserved surfaces of this Plus-graded Premium Gem, with well-detailed design elements and vibrant mint luster underneath. PCGS has graded 36 numerically finer examples (3/16). NGC ID# 253R, PCGS# 7082

- 4922 1878-S MS66+ PCGS. CAC.** A boldly struck first-year San Francisco Morgan, showing frost-white luster rolling over beautifully preserved surfaces. Only a few trivial grazes preclude a full MS67 grade. Eye appeal is excellent. PCGS lists 36 finer coins (3/16). NGC ID# 253R, PCGS# 7082

- 4923 1878-S MS66+ PCGS. CAC.** Were this high-end Premium Gem 1878-S Morgan dollar not coated in original lavender-gold, amber, and olive-green toning, a Prooflike designation would have been achieved. The design elements are sharp and frosty, and the obverse has considerable cameo contrast. Finer coins are scarce. NGC ID# 253R, PCGS# 7082

- 4924 1878-S MS66+ PCGS. CAC.** Spectacularly patinated in vivid shades of greenish-gold and violet, this high-end Premium Gem offers impeccably preserved, lustrous surfaces and a sharp strike throughout. Finer examples are seldom seen. Population: 69 in 66+, 36 finer (2/16).
Ex: New York Signature (Heritage, 10/2015), lot 4769, realized \$1,410. NGC ID# 253R, PCGS# 7082

- 4925 1878-S MS66+ PCGS. CAC.** Lavish colors on each side fail to defeat the generous luster peeking through mint, teal, and lavender patina on this well-struck and delightful piece, a treat for Morgan dollar aficionados. PCGS records 36 Superb Gems finer (3/16). NGC ID# 253R, PCGS# 7082

- 4926 1879 MS66 PCGS.** Delicate shades of lavender and pale gold toning enhance the well-preserved surfaces of this spectacular Premium Gem, with sharply detailed design elements and vibrant mint luster throughout. PCGS has graded four numerically finer examples (3/16). NGC ID# 253S, PCGS# 7084

**1879 Silver Dollar, MS66+
Extremely Rare Any Finer**

- 4927 1879 MS66+ PCGS.** This early Philadelphia Morgan is elusive in MS66, and PCGS lists only four finer representatives (3/16). This Plus-graded Premium Gem displays frosty, untuned luster and boldly rendered design elements. A pair of minor marks on the eagle's breast are the only mentionable abrasions. NGC ID# 253S, PCGS# 7084

- 4928 1879 MS65 Prooflike NGC.** A rare Gem-quality Prooflike 1879 Morgan dollar, showing brilliant, reflective fields and sharp, satiny devices. Neither side exhibits perceptible toning, and grade-limiting abrasions are faint. A hint of cameo contrast is produced at certain angles. Census: 15 in 65 Prooflike, 0 finer (3/16). NGC ID# 253S, PCGS# 7085

**1879-CC Dollar, MS62
Excellent Original Luster**

- 4929 1879-CC MS62 PCGS. VAM-4.** Hints of golden-tan adorn this lustrous semikey-date Carson City dollar. The strike is good, and the reverse on its own merits has the look of a higher grade, though Liberty's cheek and neck display a number of wispy marks. VAM-4 shows light repunching on the second C in the mintmark. Encapsulated in a green label holder.
Ex: Houston Signature (Heritage, 11/2012), lot 4131. NGC ID# 253U, PCGS# 7086

**1879-CC Dollar, MS62
Smooth Surfaces**

- 4930 1879-CC MS62 PCGS.** Light chestnut-gold toning visits the peripheries of this satiny semikey Carson City silver dollar. The cheek and fields are uncommonly smooth for the MS62 level. The strike is good with moderate blending on the eagle's breast and the hair above the ear. Encased in a green label holder.
Ex: Dallas Signature (Heritage, 3/2013), lot 3761. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS62
Radiant Luster, Doubled Mintmark

- 4931 1879-CC MS62 PCGS. CAC. VAM-4.** This lesser VAM variety shows light doubling of the right C in the mintmark; a pair of downward die lines on the bottom of Liberty's nose provide confirmation. This Mint State 1879-CC Morgan falls into the "normal mintmark" version of this issue, which is most famously known for the often-seen "Capped Die" reverse. This date representative is sharp and vibrantly lustrous with brilliant surfaces. Scattered abrasions on the obverse limit the grade. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS63
Pleasing for the Grade

- 4932 1879-CC MS63 PCGS. VAM-4.** VAM-4 shows the right C in the mintmark lightly doubled. The 1879-CC is a better Carson City issue, particularly elusive in the upper Mint State grades. This Select example is well-preserved but also remains within the grasp of budget-conscious collectors. The strike is well-executed, and the satiny surfaces show light golden toning overall. Light chatter on Liberty's cheek is the only grade-limiting factor. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS64
Reflective Fields and Cameo Contrast

- 4933 1879-CC MS64 PCGS. CAC.** After the key-date 1889-CC, the 1879-CC is arguably the most challenging Carson City Morgan in Mint State. Although 756,000 pieces were struck, GSA holdings were scant compared to those of many other dates from this mint. The present Choice example is high-end for the issue, as finer coins are scarce. Frosty luster adorns the sharp motifs, and impressively reflective, yet radiant fields deliver modest cameo contrast. Fully brilliant and minimally abraded.
From The Paul H. Gerrie Collection. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS64
Frosty and Attractive

- 4934 1879-CC MS64 PCGS Secure. VAM-4.** The mintmark is lightly recut on the right C on this lesser VAM variety. The 1879-CC Morgan dollar is scarce in Choice condition in comparison to the demand for it, and Gems are exceedingly so. This coin yields sharp relief detail and frosty fields. A few minor grazes on Liberty's cheek are all that limit the grade. An important acquisition for the collector of Carson City issues. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS62
VAM-3, 'Capped Die'

- 4935 1879-CC Capped Die, VAM-3, Top 100, MS62 ANACS.** A Top 100 Variety. Although occasionally available, the "Capped Die" 1879-CC Morgan dollar is a widely popular VAM variety, partly due to the scarcity of the '79-CC overall. In the Carson City short set, only the 1889-CC is rarer in high grade. This collectible "Capped Die" coin displays well-struck motifs and satiny, untuned luster. Scattered abrasions determine the grade. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088
- 4936 1879-CC Capped Die, VAM-3A, AU53 PCGS.** A Top 100 Variety. The scarce late die state with a line connecting the AM in AMERICA. The "Capped Die" is a Large over Small CC variety with myriad tiny chips at the mintmark from an attempt to efface the initial mintmark impression. The date is also repunched. Any '79-CC is desirable due to the scarcity of the issue. A lightly circulated stone-gray representative. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-O Dollar, Brilliant MS65
Scarce in Gem Condition**

4937 1879-O MS65 PCGS. Even though 2.8 million pieces were struck of the 1879-O it is not easily found with minimal marks and in high grades and also with a full strike. This is an all-brilliant example that is strong in all areas. It is a solid Gem that shows only the tiniest abrasions. The strike is also absolutely complete with full hair definition over the ear of Liberty. NGC ID# 253X, PCGS# 7090

**1879-O Silver Dollar, MS65
Conditionally Challenging**

4938 1879-O MS65 NGC. This better New Orleans issue is seldom seen finer than the present MS65 grade. This piece displays frosty luster and a blush of light rose-gold toning. A few trivial marks on the cheek limit the grade. Census: 154 in 65 (3 in 65+, 2 in 65 ★), 8 finer (3/16). NGC ID# 253X, PCGS# 7090

**1879-O Morgan Dollar, MS65
Sharply Detailed, Lustrous Specimen**

4939 1879-O MS65 PCGS. A delightful Gem Morgan dollar from the New Orleans Mint, this coin exhibits especially sharp definition on all design elements, with well-preserved surfaces and vibrant mint luster throughout. Overall eye appeal is outstanding. PCGS has graded 25 numerically finer examples (3/16). NGC ID# 253X, PCGS# 7090

**1879-O Silver Dollar, MS65
Conditionally Elusive O-Mint Issue**

4940 1879-O MS65 PCGS. A challenging issue in Gem condition, the 1879-O Morgan becomes genuinely rare any finer. This frosty, essentially untuned representative boasts sharp strike definition and superior eye appeal for the issue. Only a few minute ticks on Liberty's cheek preclude any even finer grade. PCGS has certified 25 finer examples (3/16). NGC ID# 253X, PCGS# 7090

1879-O Morgan Dollar, MS65

4941 1879-O MS65 PCGS. This early O-mint issue is rare above the Gem level. The well-preserved surfaces of this attractive Gem are blanketed in shades of champagne-gold, lavender-gray, and violet toning. Well-detailed design elements and vibrant mint luster complete the appealing package. PCGS has graded 25 numerically finer examples (3/16). NGC ID# 253X, PCGS# 7090

**1879-O Dollar, Cameo MS65
Rare Eye Appeal, Semiprooflike Fields**

4942 1879-O MS65 PCGS. CAC. The dazzling eye appeal of this Gem 1879-O Morgan defies the issue's reputation. Dave Bowers writes of this issue: "Bagmarks are a huge problem," and "in proportion to the demand for them, MS-65 pieces are rare." This CAC-endorsed Gem is nearly prooflike, and the cameo contrast is accentuated by lovely amber-gold and navy-blue peripheral toning. The strike is sharp, and the devices showcase frosty, largely unabraded luster. PCGS lists 25 finer representatives (2/16), although we doubt some of them are visually superior to this coin.
From The Paul H. Gerrie Collection. NGC ID# 253X, PCGS# 7090

4943 1879-S Reverse of 1878 MS64 PCGS. The Parallel Arrow Feather Reverse of 1878 style. Light rose-gold patina enlivens the rims on this near-Gem while the centers remain untuned, the entirety lovely, well-preserved, and frosty. This issue is not only popular but seldom seen at the Gem level, making acquisition of this attractive coin a tempting proposition. PCGS reports only 54 submissions in Gem or higher grades (2/16). NGC ID# 253W, PCGS# 7094

4944 1879-S Reverse of 1878 MS64 PCGS. The 1879-S Reverse of 1878 is scarce above MS64, making this brilliant, frosty example an important acquisition for the budget-conscious collector. The strike is sharp, and only a few minuscule ticks limit the grade. PCGS has seen 55 finer submissions (2/16). NGC ID# 253W, PCGS# 7094

4945 1879-S Reverse of 1878 MS64 PCGS. CAC. Ex: Jeffery M Cohen. As a whole, the 1879-S Morgan dollar is common, but Reverse of 1878 examples are elusive in high grade. This Choice representative displays bold motifs and frosty, untuned luster. There are no individually mentionable abrasions. *From The Paul H. Gerrie Collection.* NGC ID# 253W, PCGS# 7094

4946 1879-S Reverse of 1878 MS64+ PCGS. CAC. The elusive Reverse of 1878 variant, seldom seen in Gem condition. This high-end MS64 coin displays radiant luster and partially reflective fields. The obverse has mottled sun-orange toning, the reverse lighter champagne. Liberty's cheek is surprisingly clean. NGC ID# 253W, PCGS# 7094

4947 1879-S MS67 PCGS. Extraordinary cherry-red, cobalt-blue, and aquamarine toning illuminates the obverse. The reverse is essentially brilliant. Well struck and thoroughly lustrous. A tick on the cheekbone denies perfection. NGC ID# 253X, PCGS# 7092

4948 1879-S MS67 PCGS. CAC. Thorough cartwheel luster, untuned silver surfaces, and this issue's usually strong production qualities give this Morgan dollar an inordinate amount of eye and collector appeal. Much more elusive in MS68, especially with the CAC endorsement. NGC ID# 253X, PCGS# 7092

4949 1879-S MS67+ NGC. CAC. VAM-21, showing the date lightly doubled on all numerals. The mintmark is also doubled inside the upper loop. This piece is a high-end Superb Gem with semiprooflike fields that exhibit faint polishing lines (mint-made). Modest cameo contrast adds to the appeal of each side, and the strike is sharp. NGC ID# 253X, PCGS# 7092

1879-S Morgan Dollar, MS68 Among the Finest Certified

4950 1879-S MS68 NGC. MS68 is the highest numeric level achieved by the 1879-S Morgan at either leading service (3/16). This NGC coin displays sharp detail and virtually flawless, vibrant luster with a hint of light golden toning. Some mild reflectivity in the fields boosts the eye appeal. The type collector will be discover that finer coins are extremely rare, even if all issues in the series are examined. NGC ID# 253X, PCGS# 7092

4951 1880 MS66 PCGS. With none certified finer (3/16), Premium Gem 1880 Morgan dollars are in high demand among series collectors. This piece is well-preserved and frosty with sea-green, blue, and lavender-gray toning encompassing much of each side; the reverse also exhibits hints of pale gold in the peripheral recesses. Trivial strike softness is seen on the eagle's breast and the hair immediately above Liberty's ear. NGC ID# 253Y, PCGS# 7096

4952 1880 MS66 PCGS. CAC. Flashy multicolored iridescent toning covers each side and is enlivened by strong mint luster. Just slightly soft in the centers. This is an overlooked early P-mint that is generally not available in high grades. None are certified finer than the Premium Gem level (2/16). *From The Paul H. Gerrie Collection.* NGC ID# 253Y, PCGS# 7096

4953 1880 MS65+ Prooflike PCGS. Beautifully silvered surfaces show nicely frosted devices and mirrored fields amid overall good preservation. A few small luster grazes on Liberty are not terribly overt. The strike is sharp throughout both sides. Population: 25 in 65 (2 in 65+) Prooflike, 2 finer (2/16). NGC ID# 253Y, PCGS# 7097

4954 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS. CAC. A Top 100 Variety. 30th Anniversary Green Label Holder. Rich green-gold toning adorns the left obverse field and date area, though the rest of this lustrous Carson City Gem is untuned. We note a minor fingerprint near the E in UNITED. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

1880/79-CC Dollar, MS66 VAM-4, Reverse of 1878

4955 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS66 PCGS. CAC. A Top 100 Variety. The VAM-4 overdate is scarce in this lofty grade. The present coin displays frosty original luster, is devoid of toning, and has sharply struck central devices. The Reverse of 1878 is significantly scarcer than the Reverse of 1879 on this issue, with an estimated (by Bowers) mintage of just 125,000 pieces. Few examples are seen so fine. *From The Paul H. Gerrie Collection.* NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

4956 1880-CC 8 Over High 7, VAM-5, MS65+ PCGS. CAC. A Top 100 Variety. A lightly toned and thoroughly lustrous Gem of this popular Carson City overdate. Most of the underdigit 7 is apparent, including its base, ears, crossbar, and downstroke. The fields are smooth and the cheek displays only delicate grazes. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

1880-CC Dollar, MS66 8/7, Reverse of 1878

4957 1880-CC 8/7, Reverse of 1878, VAM-7A, MS66 PCGS. CAC. A Hit List 40 Variety. A popular Reverse of 1878 variety, showing a "dash" under the second 8 in the date and the heralded Clashed N clashing under Liberty's throat. This Premium Gem example is brilliant and frosty with excellent preservation. The strike is sharp. This variety is rarely seen this fine. *From The Paul H. Gerrie Collection.* NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

4958 1880-CC MS65 PCGS. The bright mint frost that is invariably seen on 1880-CC dollars make them a popular choice for type. This mostly brilliant example has one added visual element: a wide arc of rainbow iridescence covers the top of the reverse. NGC ID# 2542, PCGS# 7100

4959 1880-CC MS65 PCGS. CAC. VAM-3. Splendid arcs of cherry-red, jade-green, lemon-gold, and powder-blue endow most of the obverse, though the left field remains white. The reverse displays a hint of caramel-gold toning. Pristine aside from unobtrusive abrasions on the portrait. NGC ID# 2542, PCGS# 7100

4960 1880-CC MS66 PCGS. VAM-3A. Rich and original powder-blue, olive-green, and caramel-gold toning encompasses this coruscating and well preserved Premium Gem Carson City dollar. The cheek is smooth and the eye appeal is impressive. PCGS reports only 33 examples of the issue at the Superb Gem grade level (finest one MS67+) (2/16).

Ex: Houston Money Show Signature (Heritage, 12/2015), lot 3820, which brought \$1,469. NGC ID# 2542, PCGS# 7100

4961 1880-CC MS66 PCGS. CAC. This spectacular Premium Gem exhibits the slanting top arrow feather that identifies the Reverse of 1879. The design elements are well-detailed, with some faint, parallel striations in the hair above the ear. The well-preserved surfaces emit vibrant mint luster on both sides, with a few hints of golden-tan and lavender patina. PCGS has graded 33 numerically finer examples (2/16). NGC ID# 2542, PCGS# 7100

1880-CC Dollar, MS66+ Elusive in Higher Grades

4962 1880-CC MS66+ PCGS. CAC. The Plus designation adds considerable appeal to this semiprooflike 1880-CC Morgan dollar, which shows frosty design elements and modest cameo contrast. Finer pieces are rarely seen and are out of reach for most collectors. This example is brilliant, and the preservation is outstanding. PCGS lists 33 finer representatives (2/16).

From The Paul H. Gerrie Collection. NGC ID# 2542, PCGS# 7100

4963 1880-CC MS65 Prooflike PCGS. VAM-10. This is an impressive Prooflike example with snow-white surfaces and boldly struck devices. Light field marks keep it from grading even higher, while mint-made die striations only increase the coin's flashy reflectivity. NGC ID# 2542, PCGS# 7101

4964 1880-O MS64 PCGS. Oval O. Strong cartwheel luster is among this New Orleans dollar's greatest assets. Hints of toning visit the margins, though the centers are largely silver. Minor softness affects the hair over the ear. NGC ID# 2543, PCGS# 7114

4965 1880-O MS64 PCGS. CAC. The eye appeal of this Choice 1880-O Morgan surpasses the grade, although a loupe reveals a few trivial marks on Liberty's cheek. Both sides are vibrantly lustrous, and the obverse has beautiful rainbow toning. The strike is above average for the issue. Although available in this grade, the 1880-O is rare any finer. NGC ID# 2543, PCGS# 7114

1880-O Silver Dollar, MS64+ Sharp Strike, Clean Cheek

4966 1880-O MS64+ PCGS. Oval O. Despite the New Orleans reputation for indifferent strikes, the present near-Gem displays intricate definition. The lustrous surfaces show only a hint of tan patina. The cheek and fields are well preserved, and only a graze on the eagle's belly precludes a seldom-seen MS65 grade. NGC ID# 2543, PCGS# 7114

4967 1880-O MS64+ PCGS Secure. VAM-1E. Small or Micro O. A lustrous and brilliant example that has the look of a Gem save for a thin mark above the LAR in DOLLAR. A "short spike from the left side of the eagle's right leg" identifies VAM-1E, per VAMworld.com. VAM-57 has the same reverse and may simply be a later die state of VAM-1E. NGC ID# 2543, PCGS# 7114

4968 1880-O 80/79 Crossbar, VAM-4, MS64 Prooflike PCGS. A Top 100 Variety. Small or Micro O. VAM-4 and VAM-5 are similar, and both equate to the 80/79 *Guide Book* variety. This flashy and snow-white near-Gem has pleasing surfaces and excellent eye appeal. NGC ID# 356H, PCGS# 41287 Base PCGS# 7117

4969 1880-O 80/79 Crossbar, VAM-4, MS64 Prooflike NGC. A Top 100 Variety. Small or Micro O. A brilliant Choice New Orleans dollar with dazzling luster and a bold strike. A loupe shows only wispy marks, primarily on the portrait. A *Guide Book* overdate variety, a status shared with the Oval O VAM-5. NGC ID# 356H, PCGS# 41287 Base PCGS# 7117

4970 1880-O VAM 6, 8/7 Ear, Top 100, R.5, MS64 PCGS. A Top 100 Variety. The "8/7 Ear" moniker comes from the spikes or horns protruding from the second 8 in the date, remnants of an underlying 7. The folks at VAMWorld.com note the slight bulge on the left side of the 0 where the original 9 was punched, i.e. this is an 1880/79 overdate, or the remnants of one. The frosty, untuned surfaces on this near-Gem show good eye appeal despite a couple of minor marks on Liberty's face and chin that likely determine the grade. The "Ear" trait is clear on the left side of the 8. Sole finest graded of this variety at PCGS (2/16). NGC ID# 2543, PCGS# 133882 Base PCGS# 41289

4971 1880-S MS67 PCGS. CAC. Waves of rainbow toning embellish the lower half of this Superb Gem 1880-S Morgan dollar, while the balance of the obverse and the entire reverse is untuned. The strike and preservation are all that could be expected for this grade and issue, but the amazing patina rules. NGC ID# 2544, PCGS# 7118

4972 1880-S MS67+ PCGS. CAC. Medium S. A peripheral band of orange-red toning frames the brilliant fields and devices. This CAC-endorsed Superb Gem exhibits profound eye appeal with frosty devices and radiant fields. The strike is bold, and only inconsequential grazes determine the grade. NGC ID# 2544, PCGS# 7118

4973 1880-S MS67+ PCGS. CAC. Medium S. An outstanding Morgan dollar type coin that boasts a needle-sharp strike and only a hint of butter-gold patina. The lustrous surfaces are close to immaculate. Treasury officials must have taken great care during the storage and transport of sealed bags for the '80-S, given the number of high grade survivors for the issue. NGC ID# 2544, PCGS# 7118

1880-S Silver Dollar, Captivating MS68

- 4974 1880-S MS68 NGC.** An exceptional, glowing type coin, this 1880-S Morgan dollar exhibits brilliant, radiant luster and seemingly perfect surfaces. Significant semiprooflike mirroring accentuates the eye appeal, and the design elements are boldly rendered. Only 10 examples are certified numerically finer, including five at each leading service (3/16). NGC ID# 2544, PCGS# 7118

1880-S Dollar, Beautiful MS68 Vibrant Reverse Toning

- 4975 1880-S MS68 PCGS.** Radiant luster shines forth on each side of this remarkable 1880-S Morgan dollar type coin, showing a hint of champagne color on the obverse and a splash of gold, rose, green, and plum on the reverse. The strike is sharp, and the preservation is outstanding. Only five coins are finer at PCGS (3/16). NGC ID# 2544, PCGS# 7118

1880-S Silver Dollar, MS68 Old-Time Toning and Eye Appeal

- 4976 1880-S MS68 PCGS. CAC.** This is a razor-sharp, high-end 1880-S dollar, ideal for type purposes. Luster is radiant, and the reverse fields have a hint of reflectivity. A vivid crescent of rainbow toning surrounds the upper obverse border, and much of the lower portion of that side is cast in army-green. The reverse is champagne-tinged but with deeper gold also seen around the periphery. Only five MS69 coins are finer at each service (3/16). NGC ID# 2544, PCGS# 7118

- 4977 1880-S MS66 Deep Mirror Prooflike PCGS. CAC.** Medium S. Snowy, intricately struck motifs provide exemplary contrast with darkly reflective fields. Brilliant aside from a hint of golden patina near the rims. A beautifully preserved Premium Gem.
Ex: Long Beach Signature (Heritage, 2/2005), lot 10008, which realized \$1,840.
From The Paul H. Gerrie Collection. NGC ID# 2544, PCGS# 97119

- 4978 1880/9-S VAM-11, Medium S, MS67 PCGS. CAC.** A Hot 50 Variety. Die fill within the 0 in the date suggests an underdigit, though this *Guide Book* variety can also be identified by a J-shaped die scratch on Liberty's neck. Lustrous, well struck, and close to brilliant. The fields are smooth and the cheek shows only delicate contact. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

- 4979 1881 MS66 PCGS.** The well-preserved, lustrous surfaces of this remarkable Premium Gem show considerable prooflike reflectivity at selected angles. The design elements are sharply detailed and a few hints of pale gold and pink toning add to the outstanding eye appeal. PCGS has graded five numerically finer examples (3/16). NGC ID# 2546, PCGS# 7124

- 4980 1881 MS66 PCGS.** Fully struck and impressively preserved, this brilliant coin displays flashy, vibrant mint luster, and only scattered, minute surface marks that are not distracting or even visible to the unaided eye. A conditionally scarce example at this advanced grade level, and extremely rare any finer. NGC ID# 2546, PCGS# 7124

- 4981 1881-CC MS66 PCGS.** A spectacular Premium Gem from the popular Carson City Mint, this coin exhibits razor-sharp definition on all design elements and impeccably preserved brilliant surfaces with vibrant mint luster on both sides. NGC ID# 2549, PCGS# 7126

- 4982 1881-CC MS66 PCGS.** An attractive example of this low-mintage, high-availability Carson City issue, richly frosted with light silver-gray haze over strongly lustrous surfaces. Carefully preserved and delightful. Housed in a green label holder. NGC ID# 2549, PCGS# 7126

- 4983 1881-CC MS66 PCGS. VAM-2.** A magnificent Carson City Premium Gem. The strike is full, the luster is blazing, the fields are smooth, and the cheek shows only incidental contact. Brilliant aside from a hint of russet toning on the portrait. Certified in an old green label holder. NGC ID# 2549, PCGS# 7126

- 4984 1881-CC MS66 PCGS. CAC. VAM-2.** The delicately toned surfaces of this Premium Gem yield blazing luster and well-struck design elements. A lower mintage Carson City issue, much scarcer than its 1882-CC, 1883-CC, and 1884-CC successors. A few minor grazes do not detract. NGC ID# 2549, PCGS# 7126

- 4985 1881-CC MS66+ PCGS. CAC.** Faint honey toning visits the upper obverse margin of this otherwise brilliant high grade Carson City Morgan. The obverse field appears pristine, and the cheek displays only faint grazes.
Ex: FUN Signature (Heritage, 1/2011), lot 5897.
From The Paul H. Gerrie Collection. NGC ID# 2549, PCGS# 7126

- 4986 1881-CC MS66+ PCGS. CAC.** Frosty, radiant luster captivates the eye as it cartwheels around pristine surfaces on this high-end 1881-CC Morgan dollar. The eagle's talons are a trifle soft, but the strike is otherwise bold. Traces of champagne toning emerge from the outer peripheries, beautifully framing the brilliant interiors.
Ex: Houston Signature (Heritage, 12/2015), lot 3832, realized \$1,998.
NGC ID# 2549, PCGS# 7126

1881-CC Morgan Dollar, MS67
Sharply Detailed and Impeccably Preserved

4987 1881-CC MS67 PCGS. From a small mintage of 296,000 pieces, the 1881-CC Morgan dollar was well-represented in Treasury releases of the 1960s and the later GSA sales. The 1881-CC can only be called scarce at the MS67 grade level, but finer coins are prime condition rarities. This delightful Superb Gem displays sharply detailed design elements and impeccably preserved lustrous surfaces. PCGS has graded four numerically finer examples (2/16). NGC ID# 2549, PCGS# 7126

4988 1881-CC MS66 Prooflike PCGS. Essentially brilliant with modest cameo contrast and frost-white devices. The strike is sharp on this Premium Gem 1881-CC dollar, and there are no severe abrasions. Among the finest in Prooflike at PCGS. Population: 32 in 66 (2 in 66+) Prooflike, 0 finer (3/16). NGC ID# 2547, PCGS# 7127

4989 1881-CC MS64 Deep Mirror Prooflike PCGS. CAC. Deep prooflike mirroring adorns the brilliant fields of this Choice 1881-CC Morgan dollar, while the central devices stand out in stark contrast with frost-white luster. The strike is sharp, and light chatter on Liberty's cheek is all that limits the grade. From The Paul H. Gerrie Collection. NGC ID# 2547, PCGS# 97127

1881-CC Silver Dollar, MS66
Deep Mirror Prooflike, Stark Cameo

4990 1881-CC MS66 Deep Mirror Prooflike PCGS. CAC. While the date as a whole is plentiful in MS66, Deep Mirror Prooflike 1881-CC dollars are scarce this fine and are prohibitively so at the Superb Gem level. This CAC-approved Premium Gem is untuned with stark white-on-black contrast and unmarked fields. The strike is razor-sharp, and eye appeal abounds. Population: 55 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (2/16). From The Paul H. Gerrie Collection. NGC ID# 2547, PCGS# 97127

4991 1881-O MS65 PCGS. The untuned, creamy-white surfaces boast satiny luster and an overall decent strike for a New Orleans Morgan dollar, showing some detail in the hair over the ear and ample feathers on the eagle's breast. A few light ticks on the high points of each side define the grade, but this is a coin with excellent eye appeal. Higher-graded examples are elusive: PCGS reports only 30 submissions in MS66 (three MS66+) and none finer (3/16). NGC ID# 2548, PCGS# 7128

4992 1881-O MS65 PCGS. CAC. A crescent of multicolor toning graces the lower-right obverse border on this Gem 1881-O dollar, while the remainder of each side remains mostly brilliant. Luster is satiny but vibrant, and there are no major abrasions. The strike is above average for the issue. The 1881-O is a better date in high grade, as PCGS has seen only 30 submissions above MS65 (2/16). From The Paul H. Gerrie Collection. NGC ID# 2548, PCGS# 7128

1881-O Dollar, MS65+
Remarkable End-of-the-Roll Toning

4993 1881-O MS65+ PCGS. The large mintage (5.7 million pieces) for the 1881-O does not equate to a large availability in high grades. Not only is this piece an upper-end Gem, the obverse is spectacularly toned. The toning configuration suggests this was an end-of-the-roll coin. Remarkably clean surfaces. NGC ID# 2548, PCGS# 7128

4994 1881-O MS64+ Deep Mirror Prooflike PCGS. CAC. Deeply contrasted fields and frosty devices give this high-end Choice Deep Mirror Prooflike 1881-O Morgan a stark cameo appearance. The strike is sharp, and the only trace of toning is a hint of light golden color around the extreme outer peripheries. PCGS lists only 16 DMPL coins finer (3/16). NGC ID# 2548, PCGS# 97129

4995 1881-O MS64+ Deep Mirror Prooflike PCGS. CAC. A coin with a strong degree of eye appeal as the plus designation indicates, this near-Gem exhibits strong contrast between the frosted devices and the reflective fields. The design elements display a strong level of definition. There are no marks worthy of mention, with only scattered, small abrasions present along with a few tiny as-made strike-throughs. A lovely example. NGC ID# 2548, PCGS# 97129

1881-O Dollar, MS65 Deep Mirror Prooflike
Tied for Finest Certified

4996 1881-O MS65 Deep Mirror Prooflike PCGS. PCGS reports 1,028 1881-O DMPL Morgan dollar submissions. While that figure may seem high, it represents a fraction of the nearly 20,000 examples the firm has seen across all designations. Moreover, Deep Mirror Prooflike representatives are very rare at the Gem grade level (16 coins at PCGS, five coins at NGC), and neither service shows a single finer example (3/16). This MS65 dollar is fully brilliant with captivating reflectivity in the fields and bold white-on-black contrast. Strike detail is outstanding for a New Orleans product. NGC ID# 2548, PCGS# 97129

4997 1881-S MS67+ PCGS. CAC. This high-end Superb Gem possesses terrific eye appeal to complement its high technical quality. The impeccably preserved surfaces are blanketed in vivid shades of golden-brown, lavender, and blue toning, with vibrant mint luster and sharply detailed design elements underneath the patina. NGC ID# 2549, PCGS# 7130

- 4998 1881-S MS67 Prooflike PCGS. CAC.** The design elements of this delightful Superb Gem exhibit razor-sharp definition throughout, and the pristine fields are deeply mirrored on both sides. The surfaces are essentially brilliant, but a few hints of green and blue toning show at the peripheries. Population: 79 in 67 (3 in 67+) Prooflike, 4 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 26G7, PCGS# 7131
- 4999 1881-S MS67 ★ Prooflike NGC.** This untoned Superb Prooflike Gem has amazing eye appeal and contrast, and is a borderline Deep Mirror Prooflike piece, in our opinion. A few trivial marks are evident in the fields, but they in no way disturb the appearance of this impressive dollar. NGC has only certified seven finer Prooflike examples (3/16). NGC ID# 26G7, PCGS# 7131
- 5000 1881-S MS66 Deep Mirror Prooflike PCGS.** Mirrored fields and frosty motifs ensure the eye appeal of this fully struck silver dollar. Brilliant save for iridescent orange, rose, powder-blue, and caramel-gold shades near UNUM. The cheek displays moderate marks. Certified in a green label holder. Population: 76 in 66 (2 in 66+) Deep Mirror Prooflike, 7 finer (3/16). NGC ID# 2549, PCGS# 97131

**1881-S Morgan, MS66 Deep Mirror Prooflike
Peripherally Toned, Interior Cameo**

- 5001 1881-S MS66 Deep Mirror Prooflike PCGS. CAC.** This is a remarkably attractive example of one of the best-produced Morgan dollar issues. The strike appears full throughout both sides, with excellent field-device contrast and silver-white surfaces that show a crescent of peripheral amber-gold and sky-blue on each side. A few small luster grazes rather than overt marks determine the numeric grade.
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4127; FUN Signature (Heritage, 1/2012), lot 6984.
From The Paul H. Gerrie Collection. NGC ID# 2549, PCGS# 97131
- 5002 1881-S MS66 ★ Deep Mirror Prooflike NGC.** Stunning iridescent toning forms a crescent at the top of the obverse, with a delicate crescent of pale gold toning at the lower reverse. The balance on each side is brilliant with frosty devices and deeply mirrored fields, forming impressive cameo contrast. NGC has only certified nine finer Deep Mirror Prooflike examples (3/16). NGC ID# 2549, PCGS# 97131
- 5003 1882 MS66 PCGS.** Strong luster emanates from beneath a moderate layer of patina in shades of gold, jade, and rose, with an excellent strike creating sharp detail on the hair over Liberty's ear and throughout the reverse. The high-point preservation is quite nice despite one small tick at the corner of Liberty's mouth. PCGS reports only nine submissions finer, all MS67 (one MS67+) (2/16). NGC ID# 254A, PCGS# 7132
- 5004 1882 MS66 NGC.** The obverse of this impressive Premium Gem is vividly toned in shades of violet and golden-brown, while the reverse remains essentially brilliant. The design elements are sharply detailed and vibrant mint luster radiates from both sides. NGC has graded eight numerically finer examples (2/16). NGC ID# 254A, PCGS# 7132
- 5005 1882 MS66 PCGS.** A frosty Premium Gem Morgan dollar, this piece approaches the finest certified of the issue. Both sides exhibit brilliant and untuned silver surfaces with exceptional luster and bold design elements. PCGS has only certified nine finer examples (3/16). NGC ID# 254A, PCGS# 7132

- 5006 1882 MS66 PCGS.** This sharply detailed Premium Gem offers well-preserved surfaces with vibrant mint luster and vivid shades of golden-brown and lavender toning. The eye appeal is outstanding. PCGS has graded nine finer examples (3/16). NGC ID# 254A, PCGS# 7132
- 5007 1882 MS66 PCGS. CAC.** Colorful surfaces are concentrically toned, showing mint-green and ocean-blue around the margins and lavender-gold and gray in the centers. This Premium Gem 1882 Morgan is well-struck and free of abrasions. Only nine Superb Gems are finer at PCGS (2/16).
From The Paul H. Gerrie Collection. NGC ID# 254A, PCGS# 7132
- 5008 1882 MS66+ PCGS. CAC.** Intense luster dazzles the eye, illuminating vivid multicolor toning on each side of this high-end Premium Gem example. The interiors chiefly show blended lavender-gray and silver-blue patina complementing deeper aquamarine, yellow-gold, and crimson around the peripheries. The surfaces are well-struck and free of abrasions. Population: 29 in 66+, 9 finer. CAC: 66 in 66, 2 finer (3/16). NGC ID# 254A, PCGS# 7132
- 5009 1882 MS64 Deep Mirror Prooflike PCGS. CAC.** The well-detailed frosty design elements of this impressive Choice Morgan dollar contrast boldly with the deeply reflective prooflike fields and the well-preserved surfaces show only minor signs of contact. Population: 88 in 64 (2 in 64+) Deep Mirror Prooflike, 25 finer (3/16). NGC ID# 254A, PCGS# 97133
- 5010 1882-CC MS66 PCGS.** A razor-sharp, frost-white Premium Gem example of this popular Carson City issue, reminiscent of the visual appearance often exhibited by coins from the GSA sales. This piece shows a few trivial grazes on the cheek that preclude a finer designation, which is scarcely seen. NGC ID# 254S, PCGS# 7134
- 5011 1882-CC MS66 PCGS. CAC.** Collectors have the GSA release of the 1970s to thank for the availability of high-grade Carson City Morgan dollars from 1880 through 1885. This mint-fresh Premium Gem is fully brilliant and sharply struck with swirling luster over impressively preserved surfaces. Wonderful aesthetic quality. NGC ID# 254S, PCGS# 7134
- 5012 1882-CC MS66 PCGS. CAC.** Intense, frosty luster rolls over almost untouched surfaces on this Premium Gem 1882-CC dollar, displaying bold motifs and brilliant color. The Carson City short set of Morgan dollars is heavily collected, putting high-end examples of even the common dates in strong demand.
From The Paul H. Gerrie Collection. NGC ID# 254S, PCGS# 7134
- 5013 1882-CC MS66 PCGS. CAC.** Carson City dollars of the early 1880s often come thickly frosted and radiant, and the present Premium Gem 1882-CC is no exception. Untoned surfaces are devoid of abrasions, and the design elements are well-defined. Eye appeal is outstanding.
From The Paul H. Gerrie Collection. NGC ID# 254S, PCGS# 7134
- 5014 1882-CC MS66+ PCGS.** A high-end Premium Gem representative of this popular branch mint issue, with well-detailed design elements and vibrant mint luster on both sides. The surfaces are impeccably preserved, with outstanding eye appeal. PCGS has graded 76 numerically finer examples (3/16). NGC ID# 254S, PCGS# 7134
- 5015 1882-CC MS66+ PCGS. CAC.** The deeply and beautifully toned obverse will have toned Morgan dollar collectors falling all over themselves to hit the Bid button on this high-end Carson City coin. Jade, gold, and wine hues prevail on the obverse while the reverse is untuned. Brilliant cartwheel luster rolls around both sides. The CAC endorsement affirms what we already knew about the bold strike, excellent preservation, and off-the-charts eye appeal. NGC ID# 254S, PCGS# 7134

5016 1882-CC MS66+ PCGS. CAC. Orange, crimson, and electric-blue patination runs over the obverse of this well-struck Morgan, and a well executed strike delivers strong definition to the design elements. Pleasing overall eye appeal. PCGS has graded 76 numerically finer examples (3/16). NGC ID# 254S, PCGS# 7134

5017 1882-CC Clashed Die, VAM-2A, MS66 PCGS. A Hit List 40 Variety. 30th Anniversary Green Label Holder. The N from IN is clashed in front of Liberty's neck, and the top of a 1 is misplaced below the first 8 in the date. Sharply struck and lustrous with light steel-gray toning and pleasing surfaces. PCGS# 413025 Base PCGS# 7134

5018 1882-CC Clashed Die, VAM-2A2, MS66+ PCGS. CAC. A Hit List 40 Variety. Dusky pumpkin-gold and lime-green toning blankets both sides of this well-struck and high grade CC-mint dollar. The late die state of the popular die marriage, determined by a lapped second C in the mintmark. The misplaced top of a 1, below the first 8 in the date, is the calling card of the VAM-2 family, which includes VAM-2, VAM-2A, VAM-2A1, and VAM-2A2. PCGS# 413025 Base PCGS# 7134

1882-O Dollar, Colorful MS66 Repunched Mintmark Variety

5019 1882-O MS66 PCGS. VAM-8. The 1882-O Morgan dollar is scarce in MS66 and rare finer. This piece is well-struck and lustrous with an array of rose, gold, lemon-yellow, and sky-blue toning over each side. There are no obvious abrasions, and eye appeal is pleasing. VAM-8 shows the mintmark faintly recut on its inside left side. Population: 51 in 66 (3 in 66+), 6 finer (3/16). NGC ID# 254C, PCGS# 7136

1882-O/S Morgan, MS64 VAM-3, Flush

5020 1882-O/S Flush, VAM-3, MS64 PCGS. A Top 100 Variety. The O mintmark is punched over an errant S, with the crossbar of the latter flush within the O. This Choice example displays satiny luster and impressively well-defined motifs. The reverse is essentially brilliant, while the obverse displays vivid olive-gold, aquamarine, and lavender-gray toning. NGC ID# 254D, PCGS# 133889 Base PCGS# 7138

5021 1882-O/S Recessed, VAM-4, MS64+ PCGS. A Top 100 Variety. The central downstroke of an S is apparent within the loop of the New Orleans mintmark. A smooth, well-struck, and practically brilliant near-Gem, coined from lightly rusted dies. Ex: *Summer FUN Signature (Heritage, 7/2014)*, lot 4174. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

1882-S Morgan Dollar, MS67 ★ Reverse Color Galore

5022 1882-S MS67 ★ NGC. While the obverse of this 1882-S is exceptional with brilliant, prooflike fields as well as a clean and frosted cheek, the reverse steals the show. Spectacular, multicolor toning provides vivid bands of fuchsia-pink, jungle-green, azure-blue, and yellow-gold toning in a dazzling display. The strike is almost an afterthought, but it is razor-sharp. NGC ID# 254F, PCGS# 7140

5023 1882-S MS67+ PCGS. CAC. Golden rim toning is light on the obverse, but the reverse shines with vivid, vibrant cascading color including sage, orange, wine, and cobalt-blue. The high points and fields on both sides are equally well-preserved, and the luster and strike are typical of the issue, which is to say, top-shelf. Population: 61 in 67+, 53 finer (2/16). NGC ID# 254F, PCGS# 7140

5024 1882-S MS67+ PCGS. CAC. The virtually pristine surfaces of this Plus-graded Superb Gem radiate vibrant mint luster, with highlights of magenta, greenish-gold, and amber toning. The design elements are sharply detailed throughout. PCGS has graded 53 numerically finer examples (3/16). NGC ID# 254F, PCGS# 7140

5025 1883 MS67 PCGS. A magnificent Superb Gem Morgan dollar, with razor-sharp definition on all design elements and vibrant mint luster throughout. The impeccably preserved surfaces show delicate hints of golden-tan toning with outstanding eye appeal. PCGS has graded only four numerically finer examples (3/16). NGC ID# 254G, PCGS# 7142

5026 1883-CC MS66+ PCGS. VAM-5A. A fully struck high-grade Carson City type coin. Booming luster sweeps well-preserved surfaces. The fields are particularly smooth. This die marriage is presently divided into five different VAMs: VAM-5, VAM-5A, VAM-5B, VAM-5C, and VAM-5D. VAM-5A is a relatively early die state with minor clash marks on both sides. NGC ID# 254J, PCGS# 7144

5027 1883-CC MS66+ PCGS. CAC. Frosty silver-white luster subsumes the reverse and the right half of the obverse, but the left half shows attractive pastel patina in an appealing palette of colors reminiscent of an Impressionist painting. The strike is a tad soft on the hair over the ear, but this is an extremely lovely Carson City Morgan dollar. NGC ID# 254J, PCGS# 7144

5028 1883-CC MS66+ PCGS. CAC. Thick, ice-white luster delivers superb eye appeal on this high-end Premium Gem 1883-CC dollar, despite a few tiny ticks that limit the grade. The originality is staggering. The eagle's breast is a trifle soft, but the obverse portrait is well-defined. NGC ID# 254J, PCGS# 7144

5029 1883-CC MS66+ PCGS. CAC. VAM-5A. A flashy, well struck, and essentially brilliant Carson City Morgan dollar. The fields appear pristine, and the portrait is smooth save for a solitary diagonal line on the cheek. NGC ID# 254J, PCGS# 7144

5030 1883-CC MS66+ PCGS. CAC. VAM-5B. Sea-green, lilac, and peach encompass the reverse. The obverse has a hint of peripheral golden toning. Nicely struck and lustrous with smooth fields and only minor contact on the portrait. Ex: *Atlanta ANA Signature (Heritage, 2/2014)*, lot 4774, which realized \$1,292.50. NGC ID# 254J, PCGS# 7144

- 5031 1883-CC MS66+ PCGS. CAC. VAM-5A.** This boldly struck high grade Carson City type coin exhibits potent luster and light ice-blue and straw-gold toning. Minor marks are confined to the upper reverse field.
Ex: Long Beach Signature (Heritage, 6/2013), lot 5005, which realized \$1,410. NGC ID# 254J, PCGS# 7144
- 5032 1883-CC MS66+ PCGS. CAC.** Spectacular shades of violet, gray, and sea-green toning blanket the obverse of this high-end Premium Gem, while the reverse remains mostly brilliant. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster. NGC ID# 254J, PCGS# 7144
- 5033 1883-CC MS66+ PCGS. CAC.** Golden-brown, aquamarine, and rose-red toning illuminates generous portions of both sides. Lustrous and well preserved with a bold strike and exceptional eye appeal. NGC ID# 254J, PCGS# 7144
- 5034 1883-CC MS66+ PCGS. CAC. VAM-5A.** Booming luster, a bold strike, and uncommonly smooth fields proclaim the quality of this lightly toned Carson City type coin. Wispy grazes on the portrait deny an even finer grade. NGC ID# 254J, PCGS# 7144

**1883-CC Morgan Dollar, MS67
Exceptional Color**

- 5035 1883-CC MS67 PCGS.** An outstanding Carson City type coin, this Superb Gem 1883-CC Morgan showcases radiant, frosty mint luster and unabraded surfaces. The obverse is fully toned in mottled multicolor hues, while the reverse exhibits a faint champagne glow over the interior and amber, violet, and olive-gold around the periphery. PCGS lists five MS68 coins finer (3/16). NGC ID# 254J, PCGS# 7144

**1883-CC Dollar, MS67
VAM-8A, Doubled Date**

- 5036 1883-CC MS67 NGC. VAM-8A.** Clashed N, doubled date. All four numerals are repunched on this elusive VAM variety. The present example is also among the finest 1883-CC Morgans certified by NGC overall (2/16). The design elements are well struck, and the radiant, frosty surfaces are devoid of abrasions. The only toning is a wide crescent of mottled lavender and amber-red over the upper-left obverse margin. NGC ID# 254J, PCGS# 7144

**1883-CC Silver Dollar, MS67
Scarce With CAC Approval**

- 5037 1883-CC MS67 PCGS. CAC. VAM-5.** The glimmering luster of this Superb Gem 1883-CC dollar yields dazzling radiance when rotated beneath a light, revealing unabraded surfaces. The strike is bold, and the eye appeal competes well with other pieces in this grade. VAM-5 shows a faintly doubled date with a "dash" under the second 8; on the reverse, a heavy die line runs along the dentils below DO(LLAR), and a die gouge in the eagle's beak gives the appearance that the national bird is puffing a cigar. Only five MS68 coins are finer, all at PCGS (2/16).
From The Paul H. Gerrie Collection. NGC ID# 254J, PCGS# 7144

- 5038 1883-CC MS66 Prooflike PCGS.** Prooflike 1883-CC Morgan dollars are rarely encountered in grades above MS66. This delightful Premium Gem exhibits sharply detailed, frosty design elements and deeply reflective fields that show only the most insignificant signs of contact. PCGS has graded eight numerically finer examples (3/16). NGC ID# 254H, PCGS# 7145

- 5039 1883-CC MS66 Prooflike PCGS.** The design elements of this impressive Premium Gem are sharply detailed, with a thick coat of mint frost that contrasts boldly with the moderately reflective fields. The virtually pristine surfaces show delicate hints of pale gold toning at selected angles. PCGS has graded eight numerically finer examples (3/16). NGC ID# 254H, PCGS# 7145

- 5040 1883-CC MS66 Prooflike PCGS. CAC.** This deeply contrasted and radiant Premium Gem Carson City dollar boasts almost flawless fields. The white-on-black cameo appearance is superb, and the strike is boldly rendered. Devoid of toning. PCGS has seen only eight finer Prooflike examples (2/16).
From The Paul H. Gerrie Collection. NGC ID# 254H, PCGS# 7145

- 5041 1883-CC MS66+ Prooflike PCGS. CAC. VAM-5B.** A brilliant, nicely struck, and thoroughly lustrous Carson City type coin. Marks are relegated to delicate contact on the portrait. The field near the right side of the wreath is moderately granular. NGC ID# 254H, PCGS# 7145

- 5042 1883-CC MS65 Deep Mirror Prooflike PCGS.** Starkly contrasted design elements showcase the remarkable depth of mirroring in the fields of this Gem 1883-CC dollar. The strike is sharp, and a few trivial ticks are largely overcome by the high degree of eye appeal. The obverse shows a blush of golden toning, the reverse is brilliant. NGC ID# 254H, PCGS# 97145

- 5043 1883-CC MS65 Deep Mirror Prooflike PCGS. CAC.** Traces of light champagne toning accent otherwise frost-white luster on the relief details of this Gem 1883-CC Morgan. The fields are fully prooflike, delivering a stark cameo appearance at all angles. Well-struck with no major abrasions.
From The Paul H. Gerrie Collection. NGC ID# 254H, PCGS# 97145

- 5044 1883-S MS61 PCGS. CAC.** For the grade, this 1883-S Morgan dollar delivers exceptional "pop" — befitting of a CAC-endorsed Mint State coin but nonetheless remarkable for the issue. The radiant luster and brilliant surfaces are reminiscent of those typically seen on 1881-S and '82-S examples. The strike is bold, and scattered abrasions are an afterthought. NGC ID# 254K, PCGS# 7148

5045 1883-S MS62+ NGC. This better date silver dollar has a fully prooflike obverse and dynamic cartwheel luster on the reverse. Light golden-tan toning visits the reverse, while the obverse is brilliant. Marks are surprisingly few for the designated grade. NGC ID# 254K, PCGS# 7148

5046 1883-S MS63 PCGS. An impressive Select Morgan dollar, with sharply detailed design elements and vibrant mint luster throughout. The mostly brilliant surfaces show a scattering of minor contact marks and a few hints of greenish-gold toning. NGC ID# 254K, PCGS# 7148

5047 1883-S MS63 PCGS. To the naked eye, this Select Mint State 1883-S dollar appears at least a grade point finer, although a loupe reveals trivial marks on the cheek beneath the patina. Both sides have champagne-gray and russet-olive toning, with the obverse slightly more mottled than the reverse. NGC ID# 254K, PCGS# 7148

5048 1883-S MS63 PCGS. CAC. Vibrant, brilliant luster illuminates the surfaces of this sharp 1883-S dollar. Light chatter on Liberty's cheek is all that precludes a slightly finer grade. The 1883-S is a better date in Uncirculated condition in demand with a CAC green label. NGC ID# 254K, PCGS# 7148

1883-S Silver Dollar, MS64 Rare Any Finer

5049 1883-S MS64 PCGS. This Choice 1883-S Morgan dollar is among the finest of the issue that most collectors will be able to acquire. Finer examples are rare and costly. This coin displays wisps of champagne toning over vibrant luster and minimally abraded surfaces. The strike is sharp, and eye appeal is pleasing for the grade. PCGS lists 19 finer representatives (3/16). NGC ID# 254K, PCGS# 7148

1883-S Dollar, Lustrous MS64 Rarely Encountered Finer

5050 1883-S MS64 PCGS. CAC. The 1883-S is a conditionally scarce semikey in Mint State, and Gem coins are rarities. This CAC-approved MS64 example displays sharp detail and satiny luster with brilliant surfaces. A few light grazes on the obverse limit the grade but pose little distraction. PCGS lists 19 coins in MS65 or finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 254K, PCGS# 7148

1883-S Dollar, MS64 Vibrant Luster, Rare Any Finer

5051 1883-S MS64 PCGS Secure. The 1883-S is a better date in Uncirculated condition, but it becomes genuinely rare above MS64. This sharp, radiantly lustrous Choice example is among the finest most collectors will have a chance to acquire. The fields are partially reflective and untuned, and abrasions are minimal. PCGS has seen 19 submissions in higher numeric grades (3/16). NGC ID# 254K, PCGS# 7148

1883-S Morgan Dollar, Untoned MS64+ Condition Rarity

5052 1883-S MS64+ PCGS. CAC. First, a small object lesson in proportions. The 1882-S is exceedingly common in the MS64 grade level, where the 1883-S is quite rare and seldom seen finer. PCGS has certified 1.5% as many 1883-S pieces in MS64 and MS64+ compared to the 1882-S coins. This 1883-S in MS64+ approaches the Gem level through excellently preserved silver-white surfaces with satin luster and few marks of consequence. One thin mark protrudes from Liberty's chin but is minor, and a few small reeding marks show on the eagle's breast. A nicer example would require a long search. Population: 34 in 64+, 19 finer. CAC: 67 in 64, 4 finer (2/16). NGC ID# 254K, PCGS# 7148

1883-S Silver Dollar, Frosty MS64+ Seldom Seen in Gem Grade

5053 1883-S MS64+ PCGS. CAC. The 1883-S, despite a generous mintage exceeding 6 million coins, survived the ravages of time in far smaller numbers than its predecessor the 1882-S, which saw an even larger production surpassing 9 million pieces. This brilliant silver-white example offers untuned surfaces with excellent cartwheel luster of the frosty sort. Liberty's cheek is nice and clean, free of major abrasions, although light roller marks from the Mint production process show lightly on the lower profile. The reverse is quite nice on this example, likely on its own achieving Gem grade. Population: 34 in 64+, 19 finer. CAC: 67 in 64, 4 finer (2/16). NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, MS64+
Elusive in Higher Grades**

5054 1883-S MS64+ PCGS. CAC. A scarce issue in higher grades, this near-Gem 1883-S Morgan dollar is fully brilliant and highly lustrous with bold design motifs and excellent eye appeal. Both sides are bright silver without toning. PCGS has only certified 19 finer examples (3/16). NGC ID# 254K, PCGS# 7148

5055 1884 MS66+ PCGS. CAC. Although available in MS66, finer examples of the 1884 Morgan dollar are scarce. This Plus-graded coin balances quality and affordability. The strike is bold, and the brilliant, satiny surfaces display uninterrupted luster. *From The Paul H. Gerrie Collection.* NGC ID# 254L, PCGS# 7150

5056 1884 MS66+ PCGS. CAC. This Plus-graded Premium Gem displays virtually pristine brilliant surfaces that radiate vibrant mint luster and sharply detailed design elements throughout. PCGS has graded 54 numerically finer examples (2/16). NGC ID# 254L, PCGS# 7150

5057 1884-CC MS66 PCGS. CAC. Dramatic cherry-red, forest-green, apricot-gold, and stone-gray toning consumes the obverse. The reverse is brilliant save for a blush of lemon toning near 8 o'clock. Lustrous and well struck with a smooth reverse and a few minor marks on the left obverse. NGC ID# 8BBF, PCGS# 7152

5058 1884-CC MS66+ PCGS. A frosty Carson City type coin with sharp motifs and mostly untuned surfaces. A crescent of vivid sea-green and amber-gold toning along the left obverse border is the only color of note, which also draws the eye away from a few faint grazes in the field. Eye appeal is outstanding. NGC ID# 8BBF, PCGS# 7152

5059 1884-CC MS66+ PCGS. CAC. Flowing luster encompasses untuned silver-white surfaces on both sides of the popular Carson City date. Scattered ticks are minuscule and separated from the important focal areas of the coin. NGC ID# 8BBF, PCGS# 7152

5060 1884-CC MS66+ PCGS. CAC. VAM-4, Spiked Date. The reverse is untuned but lavish multicolor patina dominates the obverse, including lemon, jade, emerald, orange, and wine hues. Surprisingly few marks lurk on either side, just a handful of tiny ticks. Bountiful luster and a sharp strike complete the broad eye appeal. NGC ID# 8BBF, PCGS# 7152

5061 1884-CC MS66+ PCGS. CAC. VAM-3, showing repunching on the 18 in the date. Only a wisp of golden-gray toning visits this highly lustrous, well preserved, and sharply struck Carson City dollar. Although many Uncirculated examples emerged from GSA holdings, few among them match the quality of the present coin. *Ex: New York Signature (Heritage, 10/2015), lot 4829, brought \$1,880.* NGC ID# 8BBF, PCGS# 7152

5062 1884-CC MS66+ PCGS. CAC. VAM-3. The date is repunched. Dynamic luster and nearly pristine fields confirm the high quality of this Carson City type coin. The sweet spot of the cheek is also smooth. Brilliant save for a blush of caramel-gold toning on the reverse exergue. *Ex: Long Beach Signature (Heritage, 9/2013), lot 5675, which realized \$1,527.50.* NGC ID# 8BBF, PCGS# 7152

5063 1884-CC MS66+ PCGS. CAC. VAM-7. The first 8 in the date exhibits a broad outline. A high grade Carson City type coin with dazzling luster and merely a trace of golden toning. The fields are nearly pristine and the portrait shows only delicate grazes. *Ex: Long Beach Signature (Heritage, 2/2012), lot 4202, which realized \$1,725.* NGC ID# 8BBF, PCGS# 7152

**1884-CC Dollar, MS67
High-Grade Carson City Type Coin**

5064 1884-CC MS67 PCGS. VAM-3. A minor VAM-3 variety characterized by doubling at the 1 of the date, pits inside the top and bottom loops of the first 8, and slight doubling of the nose, lips, back of the cap. More importantly, this fully struck and minimally marked dollar achieves the seldom-awarded Superb Gem grade. Slightly more than 100 coins are reported at MS67 by PCGS, with a mere three coins finer (2/16). NGC ID# 8BBF, PCGS# 7152

**1884-CC VAM-3 Dollar, MS67
Brilliant and Sharply Struck**

5065 1884-CC MS67 NGC. VAM-3. The stand of the 1 in the date is repunched. A brilliant Superb Gem that boasts dazzling luster and a bold strike. The fields appear pristine and glow with bright semireflectivity, and the cheek shows only delicate grazes. A popular Carson City issue seldom encountered in the present quality. NGC ID# 8BBF, PCGS# 7152

5066 1884-CC MS66 Prooflike PCGS. VAM-6. 30th Anniversary Green Label Holder. Orange-gold, ruby-red, and cobalt-blue toning accompanies the lower obverse periphery, but the remainder of this high grade Carson City type coin is brilliant. Dazzling luster, a good strike, and a nearly pristine cheek ensure the eye appeal. NGC ID# 254M, PCGS# 7153

5067 1884-CC MS66 Prooflike PCGS. CAC. Dazzling cartwheel luster is accentuated by deeply reflective fields on this Premium Gem Prooflike 1884-CC dollar. The relief details are sharp, and the motifs show frosty luster. Hints of rose-gold toning add to the eye appeal. Population: 100 in 66 (2 in 66+) Prooflike, 1 finer; CAC: 20 in 66 Prooflike, 0 finer (2/16). *From The Paul H. Gerrie Collection.* NGC ID# 254M, PCGS# 7153

5068 1884-CC MS66+ Prooflike PCGS. CAC. Remarkable contrast between frosty cameo design elements and reflective fields contributes to the visual appeal of this fully lustrous Prooflike Carson City Morgan dollar. The brilliant surfaces are devoid of any blemishes save the faintest trace of roller marks behind Liberty's cap, which prevents an even higher grade. Population: 100 in 66 (2 in 66+) Prooflike, 1 finer (2/16). *From The Paul H. Gerrie Collection.* NGC ID# 254M, PCGS# 7153

5069 1884-CC MS65 Deep Mirror Prooflike PCGS. CAC. VAM-4. An early die state of the “Spiked Date” VAM without the “pinned wing gouge” of VAM-4A, though the die gouge through the E in STATES is present. Brilliant and magnificently mirrored with exceptional white-on-black contrast.
From *The Paul H. Gerrie Collection*. NGC ID# 254M, PCGS# 97153

5070 1884-O MS67 NGC. This Superb Gem is highly lustrous with exceptional eye appeal that results from the gold, green, and iridescent toning on the obverse. The reverse is fully brilliant and untuned. PCGS has only certified one numerically finer example (3/16). NGC ID# 254N, PCGS# 7154

5071 1884-O MS67 PCGS. CAC. Brilliant and frosty save for a crescent of multicolor toning that graces the left obverse border. This 1884-O Morgan is conditionally scarce, and finer coins are almost uncollectible. The strike is bold, and there are no severe abrasions. PCGS and NGC each list a single finer example (2/16).
From *The Paul H. Gerrie Collection*. NGC ID# 254N, PCGS# 7154

5072 1884-O/O VAM-10 MS67 PCGS. A Hot 50 Variety. Peripheral peach-gold patina graces this intricately struck and highly lustrous Superb Gem. The rims display a hint of plum-mauve toning. Magnificently preserved, and the single finest certified as VAM-10 by either leading service (2/16). NGC ID# 254N, PCGS# 133993 Base PCGS# 7154

5073 1884-S AU58 PCGS. Only a trace of wear appears on the high points of this untuned better-date Morgan dollar, one that gets quite pricey in higher grades. Generous luster throughout both sides puts this piece into the category of “slider Uncirculated.” NGC ID# 254P, PCGS# 7156

5074 1884-S AU58 PCGS. Radiant luster and brilliant surfaces give this near-Mint 1884-S dollar the eye appeal of a lower-end Mint State coin, although slight friction over the obverse portrait precludes such a designation. There are no major abrasions, and the cartwheel effect is most appealing. NGC ID# 254P, PCGS# 7156

5075 1884-S AU58 NGC. Mottled patina in silver-white alternating with pinkish and amber hues complements ample reflectivity and cartwheel luster remaining on this lightly circulated key-date Morgan.
Ex: *Chicago Signature (Heritage, 8/2014)*, lot 4766, which brought \$1,528. NGC ID# 254P, PCGS# 7156

5076 1884-S AU58 PCGS. A brush of friction on the highest part of the portrait precludes a Mint State designation. Light silver-gray surfaces show only a few abrasions of any note and offer substantial luster. The 1884-S Morgan dollar is highly sought-after in AU58, as Mint State coins quickly climb out of reach for budget-conscious collectors.
Ex: *Long Beach Signature (Heritage, 2/2009)*, lot 1768. NGC ID# 254P, PCGS# 7156

5077 1884-S AU58 NGC. The slightest trace of wear shows on the sharply detailed design elements of this attractive near-Mint specimen, and the lightly abraded surfaces retain most of their original mint luster. A few hints of pale gold toning add to the visual appeal. NGC ID# 254P, PCGS# 7156

5078 1884-S AU58 NGC. The 1884-S Morgan dollar is not difficult to locate in lower-circulated grades, but high-grade examples are quite elusive. This sharply detailed near-Mint specimen is lightly worn and lightly abraded, with lustrous surfaces that show highlights of greenish-gold toning. NGC ID# 254P, PCGS# 7156

5079 1884-S AU58 ANACS. A well-struck, partially lustrous example of this better San Francisco issue, showing a brush of high-point friction that precludes a Mint State designation. The interiors are mostly brilliant, the borders show golden toning. Housed in an old, small size white ANACS holder. NGC ID# 254P, PCGS# 7156

5080 1884-S AU58 PCGS. The 1884-S Morgan dollar is an elusive issue in high grade. Only a trace of wear shows on the sharply defined design elements of this attractive near-Mint example, and the lightly abraded surfaces retain much of their original mint luster. NGC ID# 254P, PCGS# 7156

5081 1884-S AU58 NGC. As one of the important condition rarities in Mint State grades, the AU58 examples of this issue are in high demand. This pleasing example has nearly full luster on its untuned light gray surfaces. An excellent opportunity as this piece would be right at home in an otherwise Mint State set of Morgan dollars. NGC ID# 254P, PCGS# 7156

5082 1884-S AU58 PCGS. CAC. Golden-gray toning is visited by peripheral olive and amber patina on this near-Mint 1884-S Morgan dollar. The strike is bold and wear is light. The fields reveal modest reflectivity when tilted beneath a light. Uncirculated examples of this better San Francisco issue are out of reach for many collectors. NGC ID# 254P, PCGS# 7156

5083 1884-S AU58 PCGS. CAC. Substantial luster remains in the fields of this near-Mint 1884-S Morgan dollar. Champagne-gray toning blankets each side, which are smooth and satiny. Well-struck and showing little notable wear. A better date in high grade. NGC ID# 254P, PCGS# 7156

1884-S Morgan Dollar, AU58+ Brilliant and Highly Lustrous

5084 1884-S AU58+ PCGS. Advanced Morgan dollar collectors are well aware of the elusive nature of Mint State 1884-S dollars, and they often choose a near-Mint example such as this AU58+ to fill that need. In fact, at first glance this piece looks fully Mint State, and only after critical examination does it fall short. A trace of wear visits the high points. The surfaces are brilliant and highly lustrous. An outstanding example. NGC ID# 254P, PCGS# 7156

1884-S Silver Dollar, AU58+ CAC-Approved, Highly Lustrous

5085 1884-S AU58+ PCGS. CAC. This Plus-designated, near-Mint, CAC-endorsed 1884-S dollar challenges most lower-end Uncirculated coins in regards to eye appeal, and the untuned, satiny surfaces yield virtually full luster. True wear is almost indiscernible, although light chatter and a few slide marks on the obverse apparently restricted the PCGS opinion. NGC ID# 254P, PCGS# 7156

**1884-S Morgan Dollar, AU58+
Conditionally Rare**

- 5086 1884-S AU58+ PCGS. CAC.** Virtually full luster appears on both sides of this conditionally elusive Morgan silver dollar. Just a trace of wear is evident on the high points of Liberty's hair, and on the eagle's breast feathers. Wispy champagne toning enhances the eye appeal of this important dollar. NGC ID# 254P, PCGS# 7156

1884-S Dollar, Lightly Toned MS60

- 5087 1884-S MS60 PCGS.** A lustrous Uncirculated example of this better San Francisco issue, showing light golden toning over each side and tinges of blue around the obverse periphery. Slight strike weakness occurs over the eagle's breast and the hair above Liberty's ear, as normal. The scarcity of Mint State 1884-S dollars is well-known, and the date is a rarity in high grade. NGC ID# 254P, PCGS# 7156

- 5088 1885 MS67 PCGS.** A crescent of iridescence clings to the right obverse border of this frosty Superb Gem. The surfaces are largely brilliant otherwise, save for a blush of champagne toning. PCGS reports only three examples in MS68 (one MS68+) (2/16).
Ex: New York Signature (Heritage, 10/2015), lot 4842, realized \$1,998. NGC ID# 254R, PCGS# 7158

- 5089 1885 MS66+ Prooflike PCGS. CAC.** A conditionally scarce Prooflike example of this otherwise plentiful Philadelphia issue, showing brilliant interiors with gold and sea-green peripheral toning. The strike is sharp, and the fields are deeply reflective. Significant cameo contrast appears on each side. Population: 83 in 66 (9 in 66+) Prooflike, 4 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# BYWR, PCGS# 7159

- 5090 1885 MS65+ Deep Mirror Prooflike PCGS.** The sharply detailed, frosty design elements of this Plus-graded Gem representative provide intense cameo contrast with the deeply reflective prooflike fields, and the brilliant surfaces show only the most insignificant signs of contact. NGC ID# 254R, PCGS# 97159

- 5091 1885-CC MS65 PCGS.** An attractive Gem from the fabled Carson City Mint, with well-detailed design elements and well-preserved lustrous surfaces. Overall visual appeal is strong. Housed in a green label holder. NGC ID# 254S, PCGS# 7160

- 5092 1885-CC MS65 PCGS.** Extremely appealing amber-gold patina tinged with marginal blue prevails on the obverse of this Gem, complementing the gorgeous luster shining throughout both sides, including the lightly rim-toned reverse. A few slight ticks on the reverse have a minimal effect on the grade. NGC ID# 254S, PCGS# 7160

- 5093 1885-CC MS65 NGC.** The radiant, frosty luster for which high-end Carson City Morgans are widely known is especially eye-catching on this coin. The strike is bold, and the surfaces are brilliant. A few trivial grazes on Liberty's cheek are all that preclude a finer grade. NGC ID# 254S, PCGS# 7160

- 5094 1885-CC MS65 PCGS. VAM-3.** A stone-white Gem that boasts booming luster and a sharp strike. The fields are close to pristine, although the cheek displays wispy grazes. Fine die scratches in front of Liberty's eye confirm VAM-3 status. NGC ID# 254S, PCGS# 7160

- 5095 1885-CC MS65 PCGS. Ex: GSA.** A boldly struck Gem GSA dollar with a frosty, brilliant reverse and mottled multicolor toning on the obverse. There are no bothersome abrasions beneath the patina. Eye appeal is pleasing for the grade. NGC ID# 254S, PCGS# 7160

- 5096 1885-CC MS65 PCGS. CAC. VAM-3.** A nicely struck and lustrous Gem with delicate chestnut-gold toning and a minor field fingerprint near the shoulder curl. The reverse is exceptionally unabraded. Popular as the lowest mintage Carson City Morgan dollar issue. Encapsulated in an old green label holder that has a piece out from the bottom right corner, without effect on the coin itself. NGC ID# 254S, PCGS# 7160

- 5097 1885-CC MS66 PCGS. VAM-3.** Vibrant mint luster emanates from beneath a vivid layer of rose-gold patina, complementing the sharp strike evident throughout both sides. A few wispy marks are noted in front of the eye. The 1885-CC survived in massive quantities in the GSA dispersals, but circulated examples are quite rare.
Ex: New York Signature (Heritage, 10/2015), lot 4848, which brought \$1,998. NGC ID# 254S, PCGS# 7160

1885-CC Dollar, Frosty MS66+

- 5098 1885-CC MS66+ PCGS.** A high-end Premium Gem with satin-smooth surfaces and hardly any disturbance of the smooth fields and devices. A brilliant, silver-white coin of spectacular quality and eye appeal. Razor-sharp and vibrantly lustrous. PCGS has certified 78 finer examples (3/16), which are out of reach for many budget-conscious collectors. NGC ID# 254S, PCGS# 7160

**1885-CC Dollar, MS66+
Dazzling Luster, Reflective Fields**

- 5099 1885-CC MS66+ PCGS. CAC.** Unabraded, radiantly lustrous surfaces on this 1885-CC Morgan are all the more adorned by a balance of semiprooflike mirroring that gives the fields a distinctive flash. The devices are boldly rendered, and there are no bothersome abrasions. Finer examples of this popular Carson City issue are scarce.
From The Paul H. Gerrie Collection. NGC ID# 254S, PCGS# 7160

1885-CC Dollar, MS66+

- 5100 1885-CC MS66+ PCGS. CAC. VAM-2.** A lightly toned and thoroughly lustrous Premium Gem. The centers exhibit moderate incompleteness of impression, but both sides are refreshingly free from abrasions. The obverse field is essentially pristine. Liberty's chin has a shallow strike-through, as coined. The low mintage 1885-CC has long been popular among Carson City collectors. NGC ID# 254S, PCGS# 7160

1885-CC Morgan Dollar, MS67 Exceptional Preservation and Luster

- 5101 1885-CC MS67 PCGS. VAM-3, R.4.** The mintmark is tilted left with the right C almost touching the wreath. This beautiful Superb Gem combines the desirability of a limited mintage (228,000 pieces) and the allure of the CC mintmark. The fully untuned surfaces glow with cartwheel luster and exhibit pinpoint striking definition on all of the design elements. A spindly die crack extends along the tops of UNITED STATES OF, and die chips are noted inside of both Cs in the mintmark. Outstanding surface preservation only allows for the presence of a few tiny nicks on either side of this visually alluring silver dollar.
Ex: Palm Beach Signature (Heritage, 11/2004), lot 9571; Dallas Signature (Heritage, 11/2007), lot 44. NGC ID# 254S, PCGS# 7160

- 5102 1885-CC MS65 Prooflike PCGS.** The sparkling, silvery, untuned surfaces show generous contrast between reflective fields and nicely frosted devices, a prize for collectors of Prooflike Morgans. The 1885-CC is a favorite date among series aficionados for a couple of reasons. It survived in generous quantities in the vast GSA hoard dispersals, and it was also the last Carson City Morgan struck until the 1889-CC. In some ways the two issues are similar, but in terms of rarity they could scarcely differ more. NGC ID# 254S, PCGS# 7161

1885-CC Dollar, MS66+ Prooflike Flashy and Brilliant

- 5103 1885-CC MS66+ Prooflike PCGS. VAM-3.** A brilliant and flashy Premium Gem of the lowest mintage Carson City Morgan dollar issue. Marks are confined to a minor reed impression on the field near the arrowheads. The strike is good aside from blending on the central obverse. VAM-3 is the most prevalent '85-CC variety, noteworthy for delicate die lines near Liberty's eye. NGC ID# 254S, PCGS# 7161

1885-CC Dollar, MS66 Deep Mirror Prooflike Stark Cameo Contrast, Clean Fields

- 5104 1885-CC MS66 Deep Mirror Prooflike PCGS.** The deeply mirrored fields on this starkly contrasted Premium Gem 1885-CC Morgan beautifully display frost-white motifs and reveal only a few tiny marks. A hint of golden peripheral toning adds to the eye appeal. This piece is slightly weak in regards to strike, evident on the eagle's breast and legs and the hair above Liberty's ear. Some roller marks (mint-made) remain on Liberty's portrait, having been not fully struck out of the planchet. Population: 47 in 66 (5 in 66+) Deep Mirror Prooflike, 2 finer (3/16). NGC ID# 254S, PCGS# 97161

- 5105 1885-O MS67 PCGS.** The 1885-O Morgan is a plentiful date through MS67 but is prohibitively rare any finer. This radiant, frost-white example displays brilliant, well-preserved surfaces and unusually bold design elements. PCGS has certified one MS68 coin finer (3/16). NGC ID# 254T, PCGS# 7162

- 5106 1885-O MS67 PCGS. CAC.** This sharply detailed Superb Gem displays vibrant mint luster and a spectacular mix of iridescent violet and greenish-gold toning on the reverse. PCGS has graded one numerically finer example (3/16). NGC ID# 254T, PCGS# 7162

**1885-O Dollar, MS66 Deep Mirror Prooflike
Elusive CAC Endorsement**

- 5107 1885-O MS66 Deep Mirror Prooflike PCGS. CAC.** This common New Orleans issue becomes surprisingly scarce if one focuses their search on high-grade Deep Mirror Prooflike coins. The present Premium Gem is rare and it is one of only 11 DMPL coins endorsed by CAC at this level (2/16). Untoned and starkly contrasted, the well-preserved surfaces yield razor-sharp relief detail. Population: 47 in 66 (2 in 66+) Deep Mirror Prooflike, 1 finer (2/16). From The Paul H. Gerrie Collection. NGC ID# 254T, PCGS# 97163

**1885-O Morgan Dollar
MS66 Deep Mirror Prooflike
Tied for Third Finest at PCGS**

- 5108 1885-O MS66 Deep Mirror Prooflike PCGS. CAC.** Just three finer examples are certified at PCGS, including two MS66+ DMPL and one MS67 DMPL (3/16). It is likely these coins are held in long-term collections, making this MS66 Deep Mirror Prooflike the finest that is available in the current marketplace.
- Both sides of this sharply defined Premium Gem have excellent cameo contrast between the frosty white devices and the fully mirrored fields. A few trivial marks are reflected in the mirrors, but they are inconsequential. This untuned beauty is an exceptional example. Population: 47 in 66 (2 in 66+) Deep Mirror Prooflike, 1 finer (2/16). NGC ID# 254T, PCGS# 97163

- 5109 1885-S MS65 PCGS. CAC.** Available in this grade, the 1885-S Morgan becomes exceedingly scarce at the next numeric level. This CAC-approved Gem shows nearly prooflike fields with sharp motifs and vibrant luster. Any grade-limiting abrasions are not immediately obvious. PCGS lists 45 finer representatives (2/16). From The Paul H. Gerrie Collection. NGC ID# 254U, PCGS# 7164

- 5110 1886 MS67 PCGS. CAC.** The 1886 is a common date, ideal for type purposes. This is a conditionally scarce, CAC-endorsed PCGS Superb Gem, and that grading service has designated only seven coins finer (2/16). This piece displays vibrant, brilliant luster and bold relief details. Trivial grazes near the left obverse stars are all that preclude an even loftier designation. From The Paul H. Gerrie Collection. NGC ID# 254V, PCGS# 7166

- 5111 1886 MS67 ★ NGC.** Ex: Stack's W 57th St Collection. A crescent of iridescent toning appears at the lower right obverse of this brilliant and frosty Superb Gem. Delicate golden toning forms a similar crescent on the reverse of this lovely Morgan dollar. NGC ID# 254V, PCGS# 7166

- 5112 1886 MS67+ PCGS. CAC.** Both sides exhibit vivacious ocean-blue, plum-red, and caramel-gold patina. Lustrous, well struck, and remarkably unabraded. The surfaces display an orange-peel texture, as coined from long-in-use dies. NGC ID# 254V, PCGS# 7166

**1886 Morgan Dollar, MS68
Lovely Reverse Toning**

- 5113 1886 MS68 NGC.** The 1886 is a common date overall, but few examples are known in the lofty MS68 grade. This piece is a rarity, displaying vibrant, frosty luster and unabraded surfaces. Most of the obverse is brilliant, save for a dash of gold near the upper border; the reverse displays a wide rainbow crescent over the lower half. Census: 30 in 68 (3 in 68+, 2 in 68 ★), 0 finer (3/16). NGC ID# 254V, PCGS# 7166

- 5114 1886-O MS61 PCGS.** Most of the contact marks that determine the grade are confined to the reverse, particularly a noticeable diagonal scrape across the eagle's breast. Other patches of minor luster grazes show in the reverse field. This leaves the obverse, while not mark-free, relatively attractive and showing only minor ticks on Liberty's cheek and neck. The satiny surfaces are untuned and sport generous luster. The 1886-O is a conditional rarity in higher Mint State grades. NGC ID# 254W, PCGS# 7168

- 5115 1886-O MS61 PCGS.** Satiny luster illuminates the mostly brilliant surfaces of this Mint State 1886-O Morgan dollar. The strike is slightly weak on the central high points, as usual. In the absence of any major abrasions, light grazes and lines on Liberty's cheek are all that limit the grade. NGC ID# 254W, PCGS# 7168

- 5116 1886-O MS61 PCGS.** The design elements of this attractive Mint State Morgan dollar are sharply detailed, especially for a New Orleans issue. The lustrous surfaces are blanketed in shades of sea-green and lavender-gray toning and the only marks of note are a few short scratches on Liberty's cheek. NGC ID# 254W, PCGS# 7168

- 5117 1886-O MS62 NGC.** A pleasing MS62 specimen, with sharply detailed design elements and vibrant mint luster on both sides. The lightly marked surfaces are visited by shades of lavender and greenish-gold toning, with a couple of amber smudges on the obverse. NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS63
Upper-End for the Grade**

- 5118 1886-O MS63 PCGS.** This champagne-toned 1886-O Morgan dollar is unusually clean for the grade. A few marks are seen beneath the patina in the obverse fields, but the cheek is less abraded. The satiny surfaces showcase well-struck design elements and present an all-around pleasing example of the 1886-O dollar. Finer examples are elusive. NGC ID# 254W, PCGS# 7168

1886-O Silver Dollar, MS63
Mottled Patina With Attractive Luster

- 5119 1886-O MS63 PCGS.** A condition rarity within the Morgan dollar series, the 1886-O is virtually unseen at the Gem level. The present Select example displays attractive luster underneath a mottled layer of violet, russet, silver-gray, pinkish-gold, and ice-blue. A few marks on Liberty's cheek and chin account for the grade, but this is a great-looking coin; an MS64 will cost far more. NGC ID# 254W, PCGS# 7168

1886-O Silver Dollar, MS63
Victim of the Pittman Act Melts

- 5120 1886-O MS63 NGC.** The technical quality of this New Orleans issue is typically limited by poor luster and moderate bagmarks. Moreover, a significant portion of the more than 10.7 million-coin mintage was released into circulation in the 19th century, and still more pieces were melted under the terms of the 1918 Pittman Act. This Select Mint State piece is representative of a seldom seen grade. The obverse exhibits lightly mottled aquamarine and amber-gold toning, while the reverse shows more uniform champagne color. The eagle's breast and the hair above Liberty's ear show minor striking weakness, as usual. NGC ID# 254W, PCGS# 7168

1886-O Morgan Dollar, MS64
Extremely Rare in Finer Condition

- 5121 1886-O MS64 PCGS.** Silver dollar coinage in New Orleans during 1886 was fairly significant, averaging about 900,000 coins per month. But many were paid out into circulation and large quantities of additional pieces are believed to have been melted under the dictates of the Pittman Act of 1918. In Mint State today, the '86-O is a scarce issue and is "exceedingly rare in choice or gem," in the words of Dave Bowers. This piece is well-struck and satiny with no major abrasions. Brilliant and appealing. Only six Gems are finer, all PCGS coins (3/16). NGC ID# 254W, PCGS# 7168

1886-O Morgan, MS64
None Finer at NGC

- 5122 1886-O MS64 NGC.** The 1886-O Morgan is only marginally scarce in Choice condition, but the extreme rarity of finer examples makes this MS64 coin among the finest most collectors will be able to acquire. Satiny luster is golden-toned in the margins and exhibits only a few light abrasions. Trivial striking softness is seen on the eagle's breast and the hair above Liberty's ear. None are finer at NGC (3/16). NGC ID# 254W, PCGS# 7168

1886-O Morgan Dollar, MS64
Conditionally Rare in Finer Grades

- 5123 1886-O MS64 PCGS.** When numismatic discussions consider the topic of condition rarity, one issue that immediately comes to mind is the 1886-O Morgan dollar. This Choice Mint State piece has brilliant and untuned silver surfaces with frosty mint luster. It is a piece of extraordinary eye appeal. PCGS has only certified seven numerically finer examples (3/16). NGC ID# 254W, PCGS# 7168

- 5124 1886-O Clashed E, VAM-1A, Top 100, MS62 PCGS.** A Top 100 Variety. Several dramatic clash marks on the reverse, including the bold letter E below the eagle's tailfeathers, identify the popular VAM-1A variety. This well-detailed MS62 specimen displays pleasing lustrous surfaces with a scattering of minor contact marks. NGC ID# 254W, PCGS# 133905 Base PCGS# 7168

1886-S Silver Dollar, MS66
Registry Set Contender

- 5125 1886-S MS66 PCGS. CAC.** Above MS65, the 1886-S Morgan dollar is a significant rarity in the context of the series. This Premium Gem is a standout Registry-grade coin, showing brilliant, radiant luster and bold design elements. There are no severe abrasions. Finer examples will prove to be far out of reach for most collectors. Population: 43 in 66 (3 in 66+), 4 finer; CAC: 12 in 66, 2 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 254X, PCGS# 7170

5126 1886-S/S VAM-2, Top 100, MS65 NGC. A Top 100 Variety, showing the mintmark noticeably recut with a minute counterclockwise rotation. As a date, the 1886-S Morgan dollar is elusive in MS65 and scarce finer. This golden-toned Gem displays well-struck design elements and a few faint marks on the cheek. There are 19 finer submissions at NGC (3/16). NGC ID# 254X, PCGS# 133906 Base PCGS# 7170

5127 1887 MS67 PCGS. A lustrous, sharply struck Superb Gem representative, this piece is largely brilliant and untuned save for portions of the outer edges. The toning includes hues of golden-orange, teal, yellow, and hints of red. PCGS has certified just a single submission finer (3/16). NGC ID# 27Y3, PCGS# 7172

5128 1887 MS67 PCGS. 30th Anniversary Green Label Holder. Highlights of greenish-gold, lavender-gray, and violet toning enhance the outstanding eye appeal of this spectacular Superb Gem, with well-detailed design elements and vibrant mint luster underneath. PCGS has graded only one numerically finer example (3/16). NGC ID# 27Y3, PCGS# 7172

5129 1887/6 VAM-2, Top 100, MS65 PCGS. Ex: Ray George. Light silver-gray patina appears in the fields of this highly lustrous Gem. A few stray marks appear in the fields and on the nicely struck devices, none of them particularly distracting. The overdate is plain under magnification.
Ex: *Cocoa Beach Collection / FUN Signature (Heritage, 1/2007)*, lot 7101. NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

1887/6-O Morgan Dollar, MS64 Rare in Near-Gem Condition

5130 1887/6-O VAM-3 MS64 PCGS. A Top 100 Variety. The outside curve of an underdigit 6 remains to the lower right of the 7 in the date, the primary identifier of the popular VAM-3 overdate. The frosty surfaces display brilliant silver luster and only minor blending over the ear — a strong strike for this New Orleans issue. Only faint, shallow abrasions are seen on this Mint-fresh coin. PCGS reports just a single coin in a finer numeric grade. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

5131 1887-O MS65 PCGS. A frosty and attractive Gem example of this better New Orleans issue, showing untuned, radiant surfaces with a few trivial grazes on the cheek that limit the grade. Slight strike weakness occurs on the eagle's breast and the hair above Liberty's ear. PCGS lists 10 finer representatives, NGC only four (3/16). NGC ID# 2547, PCGS# 7176

5132 1887-O MS65 PCGS. The 1887-O Morgan dollar is scarce in Gem condition and very rare any finer. This impressive specimen is sharply detailed, with well-preserved brilliant surfaces that radiate vibrant mint luster. PCGS has graded 10 numerically finer examples (3/16). NGC ID# 2547, PCGS# 7176

1887-O Dollar, MS65 Condition Rarity in Finer Grades

5133 1887-O MS65 PCGS. CAC. The 1887-O is another issue that is plentiful in lower-end Mint State grades but elusive in MS65 and rare finer. This piece showcases vibrant, frosty luster and brilliance with sharp design elements. The surfaces are impressively clean, even for the Gem grade level. There are 10 finer coins at PCGS (2/16).
From *The Paul H. Gerrie Collection*. NGC ID# 2547, PCGS# 7176

1887-O Morgan, MS65 Prooflike Fantastic Contrast

5134 1887-O MS65 Prooflike PCGS. Fantastic contrast appears on frosty silver-white devices complementing deeply mirrored, looking-glass fields on both sides of this nicely preserved Gem 1887-O Morgan. A glint of sunset-orange and gold enlivens the rims, but the coin is largely untuned. The O-mint strike is a tad better than expected. Population: 17 in 65 Prooflike, 2 finer (3/16). NGC ID# 2552, PCGS# 7177

5135 1887-O MS64 Deep Mirror Prooflike PCGS. The 1887-O Morgan is scarce in Deep Mirror Prooflike. This Choice example displays stark white-on-black contrast with frosty design elements and deeply reflective fields. A few light marks are consistent with the grade, and the hair above Liberty's ear displays trivial softness. NGC ID# 2552, PCGS# 97177

5136 1887-O MS64 Deep Mirror Prooflike PCGS. The outer edges of the obverse display several shades of attractive toning, including hues of copper-gold, teal, sea-green, and plum. A hint of denim-blue patina is present on the obverse. This near-Gem exhibits a bold strike. A number of minor grazes are present on the cheek. PCGS records only eight finer coins in Deep Mirror Prooflike (3/16). NGC ID# 2552, PCGS# 97177

5137 1887-S MS65 PCGS. Untuned surfaces are void of color and boast vibrant mint luster that cartwheels over each side. The hair over Liberty's ear displays a touch of softness, while the other areas feature bold definition. A few luster grazes in the left obverse field and light chatter on the cheek define the grade. NGC ID# 2554, PCGS# 7180

5138 1887-S MS65 PCGS. CAC. The 1887-S Morgan is a famous rarity above MS65, and high-end Gems are highly sought-after by budget-conscious collectors. This CAC-endorsed coin displays excellent sharpness and frosty luster. Much of each side shows lavender-gray and champagne toning, although vivid aquamarine and amber hues are intermingled near the relief elements. PCGS lists 30 finer examples (2/16).
From *The Paul H. Gerrie Collection*. NGC ID# 2554, PCGS# 7180

**1887-S Morgan Dollar, MS66
Essentially Unimprovable**

5139 1887-S MS66 PCGS. CAC. Ivory-gray prevails on the obverse with some glints of deeper color on the reverse, but both sides of this better-date Morgan S-mint boast marvelous preservation and top-notch eye appeal. Liberty's cheek is rounded, smooth, and pristine, and the hair over the ear is decently struck up. The Premium Gem grade is essentially unimprovable for this issue. Population: 29 in 66 (2 in 66+), 1 finer. CAC: 8 in 66, 0 finer (2/16). NGC ID# 2554, PCGS# 7180

5140 1887-S/S VAM-2A MS65 PCGS. A Top 100 Variety. The popular and distinctive variety with blatant repunching of the mintmark inside the loops. Lustrous and crisply struck with a mere hint of golden patina. The fields are smooth and the portrait shows only moderate marks. NGC ID# 2554, PCGS# 133915 Base PCGS# 42937

5141 1888 MS66+ PCGS. CAC. This frosty Premium Gem has tinges of gold toning along the borders of the otherwise brilliant and untuned silver surfaces. An attractive example that is rarely found finer, with only 38 higher grade PCGS submissions (3/16). NGC ID# 26KE, PCGS# 7182

5142 1888-O MS66 PCGS. The availability of this moderately plentiful issue is restricted to Gem and lower grades, as MS66 examples are seldom available. This example displays sharp motifs and radiant luster. Varying shades of lemon-gold toning encompass the obverse and spill over onto the reverse peripheries, and the underlying surfaces are free of any major abrasions. None have been certified numerically finer at PCGS (3/16). NGC ID# 2556, PCGS# 7184

5143 1888-O MS66 PCGS. CAC. Although the 1888-O Morgan dollar is only marginally scarce in MS66, finer coins are prohibitively rare and none are known in a PCGS holder (2/16). This CAC-endorsed coin will appeal to a plethora of collectors. Frosty, untuned surfaces yield bold design elements, and the preservation is excellent. *From The Paul H. Gerrie Collection.* NGC ID# 2556, PCGS# 7184

1888-O Dollar, Top-Grade MS66+ Prooflike

5144 1888-O MS66+ Prooflike PCGS. CAC. Liberty's cheek is nicely well-preserved and free of all but the most picayune marks, of no consequence. The untuned surfaces show brilliant cartwheel luster and good field reflectivity contrasting against well-frosted devices. This near-immaculate coin is one of the top two in this designation at PCGS. Population: 11 in 66 (2 in 66+) Prooflike, 0 finer. CAC: 7 in 66 Prooflike, 0 finer (3/16). NGC ID# 2556, PCGS# 7185

5145 1888-O MS65 Deep Mirror Prooflike NGC. The sharply detailed design elements of this impressive Gem display a rich coat of mint frost that contrasts dramatically with the deeply reflective prooflike fields. The well-preserved surfaces show a few hints of greenish-gold toning, with a single spot of amber on Liberty's chin. Census: 28 in 65 (1 in 65+) Deep Mirror Prooflike, 2 finer (3/16). NGC ID# 2556, PCGS# 97185

5146 1888-O Scarface, VAM-1B4 — Improperly Cleaned — NGC Details. AU. A Top 100 Variety. The very late die state with the jagged "scar" crack across both the face and neck of Liberty. VAMworld.com calls VAM-1B4 "the mother of all Morgan die breaks." This momentarily circulated example has light straw-gold toning and minimal bagmarks. The surfaces are mildly bright from a wipe. NGC ID# 2556, PCGS# 133918 Base PCGS# 87184

5147 1888-S MS65 NGC. This brilliant, silver-white San Francisco issue joins the 1889-S as a duo of low-mintage and underrated issues in the Morgan dollar series. Sharply struck for an 1888-S with Gem surfaces and strong definition on the central devices, the current coin is superior for the grade despite a few faint roller marks on the portrait. Just 13 pieces are numerically finer at NGC (3/16). NGC ID# 2557, PCGS# 7186

5148 1888-S MS65 PCGS. From a small mintage of 657,000 pieces, the 1888-S Morgan dollar is conditionally rare in grades above MS65. This well-detailed Gem is well-preserved and lustrous, with strong eye appeal. PCGS has graded 32 numerically finer examples (3/16). NGC ID# 2557, PCGS# 7186

5149 1888-S MS65 PCGS. Electric-blue, turquoise, violet, and orange-gold intermingle in portions of the fields on this glistening Gem 1888-S Morgan dollar, while the remainder of each side shows champagne coloration. Eye appeal is uniquely exceptional. The strike is bold, and no major abrasions are observed. PCGS lists 32 finer representatives (3/16). NGC ID# 2557, PCGS# 7186

5150 1888-S MS65 PCGS. The 1888-S silver dollar is marginally available in MS65 but becomes rare any finer. This brilliant coin is vibrantly lustrous and boldly struck. A few faint grazes on the cheek are all that preclude a finer grade. Eye appeal is excellent. PCGS reports 32 finer submissions (3/16). NGC ID# 2557, PCGS# 7186

**1888-S Dollar, Well-Preserved MS65
Light Peripheral Toning**

5151 1888-S MS65 PCGS. CAC. A better date in high grade, the 1888-S Morgan dollar is rare above MS65. This CAC-endorsed Gem displays satiny luster with hints of golden toning around the peripheries. Some minor strike weakness is seen on the eagle's breast and the hair above Liberty's ear. PCGS lists 32 finer representatives (2/16). *From The Paul H. Gerrie Collection.* NGC ID# 2557, PCGS# 7186

**1888-S Morgan Dollar, MS65+
Better Branch Mint Issue**

- 5152 1888-S MS65+ PCGS.** A high-end Gem example of this better date San Francisco Mint issue, from a low mintage of 657,000 pieces. This coin exhibits well-detailed design elements and vibrant mint luster, under shades of greenish-gold and lavender-gray toning. PCGS has graded 32 numerically finer examples (3/16). NGC ID# 2557, PCGS# 7186

**1889 Morgan Dollar, MS66+
Conditionally Very Rare in Finer Grades**

- 5153 1889 MS66+ PCGS.** From a huge mintage of 21.7 million pieces, the 1889 Morgan dollar is not too difficult to locate in MS66 condition, but the issue is a prime condition rarity in finer grades. This Plus-graded Premium Gem offers sharply detailed design elements and well-preserved lustrous surfaces, under shades of lavender-gray and greenish-gold toning. PCGS has graded four numerically finer examples (3/16). NGC ID# 2558, PCGS# 7188

- 5154 1889 MS65 Deep Mirror Prooflike NGC.** Stunning field-to-device contrast is manifest on this spectacular Gem, with sharply detailed, frosty design elements and deeply reflective prooflike fields. Only minor signs of contact are evident. Census: 16 in 65 Deep Mirror Prooflike, 2 finer (3/16). NGC ID# 3VWX, PCGS# 97189

- 5155 1889 MS65 Deep Mirror Prooflike PCGS.** 30th Anniversary Green Label Holder. The deeply mirrored fields of this impressive Gem provide stunning cameo contrast with the sharply detailed, richly frosted design elements. A few minor signs of contact are evident on close inspection, none worthy of individual mention. Population: 35 in 65 Deep Mirror Prooflike, 4 finer (3/16). NGC ID# 3VWX, PCGS# 97189

**1889 Morgan Silver Dollar
MS65 Deep Mirror Prooflike**

- 5156 1889 MS65 Deep Mirror Prooflike PCGS.** This impressive Gem displays brilliant silver surfaces that are splashed by delicate peripheral gold toning. Both sides have deeply mirrored fields and brilliant, frosty silver luster on the devices. The field-to-device contrast is exceptional. Population: 35 in 65 Deep Mirror Prooflike, 4 finer (3/16). NGC ID# 3VWX, PCGS# 97189

- 5157 1889-CC VF25 NGC.** The lightly abraded surfaces of this important branch mint key are blanketed in shades of light pink toning and two-thirds of the detail in Liberty's curls remain bold. Some wear shows on the eagle's breast and legs. NGC ID# 2559, PCGS# 7190

- 5158 1889-CC VF35 PCGS.** A silver-gray example with Choice VF definition on the devices but many tiny marks that frequent the otherwise smooth surfaces. Somewhat soft over the ear and at the eagle's breast — a combination of strike and wear. Just 350,000 pieces were struck for this key Carson City issue. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Deeply Toned XF45

- 5159 1889-CC XF45 PCGS.** Well-detailed, this Choice XF 1889-CC Morgan dollar will appeal to the collector who prefers deep toning. Both sides display heavy olive-gray patina that shows hints of dusky lavender at certain angles. A small tick on Liberty's chin is the only abrasion of note. This is the key to the Carson City short set and one of the biggest "stoppers" in the entire series. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, XF45
Key Carson City Issue**

- 5160 1889-CC XF45 PCGS.** An attractive Choice XF example of the rarest Morgan dollar from the famous Carson City Mint. This impressive piece shows light wear on the usual problem areas, like the eagle's breast and the hair strands above Liberty's ear. The lightly abraded surfaces are blanketed in light shades of golden-tan and lavender-gray toning. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, Choice XF

5161 1889-CC XF45 PCGS. Tinges of gold surround the peripheries of this silver-white 1889-CC dollar. Light wear defines the grade, but hints of luster remain in the fields. Light chatter on each side is consistent with the grade and issue. The '89-CC is highly sought-after in the upper circulated grades, as Mint State coins are out of reach for budget-restricted collectors. NGC ID# 2559, PCGS# 7190

5162 1889-CC — Rims Filed — ANACS. AU50 Details. VAM-5. Luster illuminates the borders and devices of this lightly circulated key date dollar. The obverse rim has an abrasion above the P in PLURIBUS, and that area is accompanied by delicate hairlines. A die scratch on the cap above the T in LIBERTY identifies VAM-5. NGC ID# 2559, PCGS# 7190

5163 1889-CC — Cleaning — PCGS Genuine. AU Details. VAM-2A. A double set of clash marks attributes the VAM variety. This key date Carson City Morgan dollar displays splashes of lavender patina and wheat-gold toning across portions of both sides. The hair over the ear and the eagle's breast show moderate wear. The surfaces are somewhat bright but lack mentionable marks. NGC ID# 2559, PCGS# 7190

5164 1889-CC — Obverse Damage — NGC Details. AU. Only a touch of actual wear shows on the well-detailed design elements of this key Carson City issue and both sides retain much of their original mint luster, under dappled shades of greenish-gold toning. The noted damage consists of some localized gouges and surface problems on Liberty's cheek. NGC ID# 2559, PCGS# 7190

5165 1889-CC — Filed Rims — PCGS Genuine. AU Details. A key date Carson City dollar with untuned fields and motifs. The borders display freckles of light golden-brown patina. The centers display slight wear, but bagmarks are inconsequential. Both sides are lightly hairlined and the rims are filed throughout. NGC ID# 2559, PCGS# 7190

1889-CC VAM-4 Silver Dollar Near-Mint Sharpness

5166 1889-CC — Cleaned — ANACS. AU58 Details. VAM-4. A sharply defined key date dollar with only a whisper of wear on the eagle's breast and the hair above the ear. The fields are nearly unabraded but somewhat bright from a wipe. The cheek displays moderate marks. Close to brilliant, although protected areas display glimpses of straw-gold toning. NGC ID# 2559, PCGS# 7190

1889-O Silver Dollar, MS65 Rare in Finer Grades

5167 1889-O MS65 PCGS. Despite a mintage nearing 12 million coins, the 1889-O Morgan dollar is elusive in Gem condition and significantly rare any finer. This piece is brilliant and frosty, and the surfaces display ideal preservation. The detail-oriented collector will notice slight weakness on the hair above Liberty's ear, but this is not particularly distracting to the naked eye. PCGS lists 10 finer representatives (3/16). NGC ID# 255A, PCGS# 7192

1889-O Morgan Dollar, MS65 Bold Strike, Lightly Toned

5168 1889-O MS65 PCGS. The prodigious mintage of nearly 12 million pieces resulted in a large number of poorly struck coins, caused by a combination of factors including die wear, die spacing, and careless attention to quality. This Gem example, however, shows a bold strike for the New Orleans issue with only minor blending above the ear. The light toning is more prevalent on the obverse, with blue and russet shades strongest at the margins and thinly dispersed elsewhere. Nice luster illuminates minimally marked surfaces. PCGS has certified 10 numerically finer examples (3/16). NGC ID# 255A, PCGS# 7192

1889-O Silver Dollar, MS65 Clean Cheek

5169 1889-O MS65 PCGS. CAC. The 1889-O is challenging in MS65, and finer coins are rarely seen. This CAC-approved representative displays bold devices and satiny luster with hints of light champagne toning. There are no individually concerning abrasions. PCGS has seen only 10 finer submissions, all MS66; CAC: 16 in 65, 3 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255A, PCGS# 7192

- 5170 1889-S MS65 PCGS.** A brilliant Gem, this 1889-S Morgan dollar has satiny silver luster with no evidence of toning. Unlike many Morgan dollars, the obverse of this example is pristine with just a few trivial marks on the reverse. PCGS has certified 88 finer examples (3/16). NGC ID# 255B, PCGS# 7194
- 5171 1889-S MS65 PCGS.** Dusky shades of golden-brown and slate-gray toning blanket the well-preserved surfaces of this attractive Gem, with sharply detailed design elements and vibrant mint luster underneath. Overall eye appeal is quite strong. Just 700,000 pieces were struck. NGC ID# 255B, PCGS# 7194
- 5172 1889-S MS65 PCGS.** A combination of low mintage (only 700,000 pieces struck) and frequent bagmarks make the 1889-S a condition scarcity in MS65 or finer grades. This blazing-white example emits vibrant cartwheel luster from its frosty silver surfaces. The strike is virtually full, with only a handful of tiny marks that cannot diminish the coin's eye appeal. A sharp and lively Gem in all regards. NGC ID# 255B, PCGS# 7194
- 5173 1889-S MS65 PCGS. CAC.** The 1889-S Morgan is a slightly better date with a low mintage of 700,000 coins. Pieces grading finer than the present MS65 example are scarce. This coin is sharply rendered and brilliant. Dazzling cartwheel luster imparts tremendous eye appeal.
From The Paul H. Gerrie Collection. NGC ID# 255B, PCGS# 7194
- 5174 1889-S MS65 PCGS. CAC.** This San Francisco date saw 700,000 pieces struck and many were paid out by the U.S. Treasury before the present surge in popularity of the Morgan dollar. Rich tawny gold distinguishes this pleasing example. Each side is minimally abraded and the fields are bright and semiprooflike.
Ex: Long Beach Signature (Heritage, 5-6/2012), lot 4343. NGC ID# 255B, PCGS# 7194
- 5175 1889-S MS65 PCGS. CAC.** This is a high-quality piece, even for the Gem grade level. A couple of faint grazes above Liberty's eye and on the lowermost point of the neck truncation appear to be all that limit the grade; the cheek is pleasantly clean but shows a few faint roller marks on the lower jaw. Nonetheless, the high points of the eagle's breast and the hair above Liberty's ear are well-defined. The 1889-S Morgan is seldom seen finer. NGC ID# 255B, PCGS# 7194

**1889-S Silver Dollar, MS66
Ice-White and Frosty**

- 5176 1889-S MS66 PCGS.** Blatant cartwheel luster rolls around both sides of this ice-white Premium Gem Morgan dollar, a better date in itself and certainly an exemplary representative of the 1889-S issue. Mentionable contact is a nonissue, although some roller marks remain on Liberty's cheek from the planchet production. A great-looking coin for the date. Population: 87 in 66 (8 in 66+), 1 finer (3/16). NGC ID# 255B, PCGS# 7194
- 5177 1889-S MS64 Prooflike PCGS.** Ex: Shapiro. A brilliant and highly lustrous near-Gem. The strike is sharp and the fields are smooth. The cheek displays wispy marks. Only a tiny percentage of 1889-S dollars possess prooflike fields. NGC ID# 255B, PCGS# 7195

- 5178 1890 MS65 PCGS. CAC.** A well-struck Gem with smooth, satiny surfaces. The interiors display dusky lavender-gray toning, while the peripheries show vivid sky-blue, violet, and mint-gold coloration. The 1890 is a slightly better date in high grade. PCGS has seen only five submissions finer than MS65 (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255C, PCGS# 7196
- 5179 1890 MS65 PCGS. CAC.** Frosty, brilliant luster rolls over the Gem-quality surfaces of this 1890 Morgan dollar. The strike is sharp, and eye appeal is excellent. PCGS has seen only five Premium Gems finer; CAC: 45 in 65, 0 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255C, PCGS# 7196
- 5180 1890 MS65 PCGS. CAC.** Softly frosted luster illuminates this Gem 1890 Morgan dollar, displaying sea-green and lavender-gray toning on the obverse with champagne-gray over the reverse. The strike is well-executed, and there are no major abrasions. PCGS has seen only five finer submissions (3/16). NGC ID# 255C, PCGS# 7196

**1890 Silver Dollar, MS65+
Beautiful Concentric Toning**

- 5181 1890 MS65+ PCGS.** The 1890 Morgan is a better date that is rare in MS66 and therefore highly sought-after in high-end MS65. This Plus-designated coin displays glowing luster and vivid concentric toning. Both sides have rich sun-orange and gold interiors with blue and mint-green peripheries. The border colors are more prominent on the obverse. Sharp detail characterizes the motifs, and the only mentionable abrasions are pair of small nicks on Liberty's jaw. PCGS lists five finer representatives (3/16). NGC ID# 255C, PCGS# 7196
- 5182 1890 MS64 Deep Mirror Prooflike PCGS. CAC.** A brilliant Choice example that boasts highly reflective fields and considerable white-on-black cameo contrast. Likely sold as a proof in its past, but not from the proof dies (VAM-1H) for the issue, which exhibit specific die polish lines near the right (facing) claw. NGC ID# 3VX7, PCGS# 97197
- 5183 1890-CC MS64 PCGS.** An average of about 200,000 1890-CC dollars were struck each month throughout the year, most going into storage. Bags were released from the Treasury overtime, and by the early 1970s, the GSA sales had only a few thousand coins left to disperse. In Gem condition, the 1890-CC is scarce, but the present Choice example remains obtainable for most collectors. Well-struck and minimally abraded, this piece shows satiny luster with a hint of light golden toning around the outer peripheries. NGC ID# 255D, PCGS# 7198
- 5184 1890-CC MS64 PCGS.** 30th Anniversary Green Label Holder. An attractive Choice Morgan dollar from the famous Carson City Mint, this piece offers well-detailed design elements and lightly toned surfaces that radiate vibrant mint luster. Only minor signs of contact are evident. NGC ID# 255D, PCGS# 7198
- 5185 1890-CC MS64 NGC. CAC.** A remarkably clean coin for the grade, this CAC-endorsed 1890-CC Morgan dollar displays a bold strike and frosty luster. The obverse shows mottled lavender and ocean-blue toning, the reverse has champagne interior regions and a light blue periphery. Eye appeal is pleasing. NGC ID# 255D, PCGS# 7198

5186 1890-CC MS64 PCGS. CAC. VAM-3. A Far Date VAM with light repunching on the bases of the 90 in the date. The reverse is brilliant, but the obverse is draped in deep autumn-brown and cobalt-blue shades. Lustrous and nicely struck. The fields are refreshingly unabraded, although the cheek displays unobtrusive marks. NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, MS65
Vividly Toned Obverse**

5187 1890-CC MS65 PCGS. Vivid patina on the obverse includes orange, pale violet, jade, amber, and champagne-pink, while the reverse is untuned and frosty silver-white. There are no mentionable abrasions on the high points of Liberty's cheek, although the eagle's breast shows a few small ticks. Numerous wispy peripheral die cracks encircle much of the reverse periphery. An issue seldom seen in finer grades. NGC ID# 255D, PCGS# 7198

**1890-CC Silver Dollar, MS65
Eye-Appealing Surfaces**

5188 1890-CC MS65 PCGS. 30th Anniversary Green Label Holder. The GSA sales of the early 1970s yielded only 3,949 1890-CC dollars, few of which were in high grade. Gem examples of this issue are only marginally available and finer coins are genuine rarities. This MS65 coin displays vibrant, frosty luster. Crisp definition over the ear and at the eagle's talons confirms a sharp strike. Hints of gold toning appear around the rims, and there are no obvious abrasions. NGC ID# 255D, PCGS# 7198

**1890-CC Silver Dollar, MS65
Rare Any Finer**

5189 1890-CC MS65 PCGS. CAC. One of the more elusive dates in the Carson City short set, the 1890-CC Morgan is rare above MS65. This Gem example displays outstanding preservation, even for the already upper-end grade, and yields vibrant, brilliant luster. Semiprooflike mirroring in the fields accentuates the eye appeal. PCGS lists 15 higher-grade representatives (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255D, PCGS# 7198

5190 1890-O MS65 PCGS. Mostly brilliant with satiny luster and brick-red, gold, and electric-blue toning toward the edges. Only the central devices show faint softness on this otherwise well-struck Gem. A loupe reveals small, infrequent marks that do not detract. PCGS has seen only 27 finer submissions (3/16). NGC ID# 255E, PCGS# 7200

5191 1890-O MS65 PCGS. The obverse of this Gem displays splendid gold, blue, and violet toning, while the reverse exhibits delicate golden splashes on otherwise brilliant silver surfaces. Only 27 finer examples reside in PCGS holders (3/16). NGC ID# 255E, PCGS# 7200

5192 1890-O MS65+ PCGS. The frosty surfaces of this high-end Gem 1890-O Morgan dollar are virtually fine enough to merit a full Premium Gem grade, but significant weakness of strike on the central devices limits the PCGS designation. The obverse displays lovely amber-gold, rose, and aquamarine toning around the lower-right two-third of that side with champagne color over the remainder. The reverse is mostly light golden but with a ribbon of amber-orange and blue along the right periphery. PCGS lists 27 finer representatives (3/16). NGC ID# 255E, PCGS# 7200

5193 1890-O MS65+ PCGS. The 1890-O is rare above MS65, making this Plus-graded Gem example highly appealing among budget-conscious collectors. The strike is above average for a New Orleans issue, and the untuned surfaces are beautifully preserved. A touch of reflectivity in the fields accentuates the eye appeal. PCGS has seen 27 finer coins, NGC only five (3/16). NGC ID# 255E, PCGS# 7200

5194 1890-O MS65+ PCGS. VAM-31. The top of the 9 is repunched. Light honey-gold patina adorns this lustrous and clean-cheeked Gem. The eagle's breast and the hair above the ear display unimportant incompleteness. Minor grazes near AMERICA determine the grade. Despite a generous mintage, the 1890-O is a challenging issue to locate any finer. NGC ID# 255E, PCGS# 7200

5195 1890-O MS65+ PCGS. CAC. The 1890-O Morgan dollar can be found surviving in generous quantities up to the Gem grade, but finer coins appear seldom. This softly frosted, untuned example approaches Premium Gem through excellent preservation on Liberty's profile and equally in the fields, which show only an occasional shallow scrape. The sharp strike is a plus. Population: 29 in 65+, 27 finer. CAC: 55 in 65, 5 finer (2/16). NGC ID# 255E, PCGS# 7200

5196 1890-O MS65+ PCGS. CAC. Light silver and pale apricot share space on this O-mint Gem. Ample lustrous with minor strike softness at the center obverse but solid detail elsewhere. PCGS has graded 27 numerically finer pieces (2/16).
Ex: FUN Signature (Heritage, 1/2012), lot 7122.
From The Paul H. Gerrie Collection. NGC ID# 255E, PCGS# 7200

5197 1890-S MS65 PCGS. A well-struck Gem 1890-S Morgan, showing satiny luster and champagne toning. Scattered bronze-gold obverse overtones give a distinctive look. A small reed mark near Liberty's ear is all that precludes an even finer grade. NGC ID# 255E, PCGS# 7202

**1890-S Morgan, MS66
Radiant Mint Luster**

- 5198 1890-S MS66 PCGS.** A light sheen of reddish-gold patina covers the obverse fields, while Liberty's portrait is virtually untoned and silver-white. The reverse shows a narrow vignette of complementary gold around the margin and through the legends. A boldly struck and attractive Premium Gem, with just eight coins certified numerically finer by PCGS and NGC combined (3/16). NGC ID# 255F, PCGS# 7202

**1890-S Dollar, MS66
Inherently Rare Any Finer**

- 5199 1890-S MS66 PCGS. CAC.** Superb frosted luster rolls around this mostly white Morgan as it is tilted in the light. Sharply struck, the obverse displays a light gold toning streak, while the reverse has some light gray toning spots. A nice coin that falls into the "must see" category, with only seven coins graded finer by PCGS (2/16). (The number of finer PCGS coins has only increased by two in nearly 15 years.)
Ex: Long Beach Signature (Heritage, 10/2001), lot 7493.
From The Paul H. Gerrie Collection. NGC ID# 255F, PCGS# 7202

1891 Morgan Dollar, Pastel-Toned MS65

- 5200 1891 MS65 PCGS.** Although the 1891 Philadelphia Morgan dollar issue is available up to the Gem level of the present example, higher-graded coins are virtually nonexistent; both NGC and PCGS report precisely three submissions each in MS66 or higher (2/16). The finest is a lone MS67 at PCGS. This piece boasts superior luster and strike on pastel-toned surfaces with top-notch eye appeal. One single nick on the side of the eagle's breast is consistent with the grade. NGC ID# 255G, PCGS# 7204

1891 Morgan Dollar, Lightly-Toned Gem

- 5201 1891 MS65 PCGS.** The Gem grade is "as good as it gets" for this Morgan dollar issue unless one wants to pursue one of the über-rare Premium Gem or finer certified examples, which currently number precisely three each at PCGS (two MS66, one MS67) and NGC (three MS66) (3/16). Pastel patina on the obverse of this Gem PCGS coin features pale steel-blue and cinnamon-gold hues. The reverse is mostly untoned save for a touch of rim color. What both sides share, however, are brilliant luster and relatively mark-free preservation. NGC ID# 255G, PCGS# 7204

**1891 Dollar, Toned MS65
Among the Finest at CAC**

- 5202 1891 MS65 PCGS. CAC.** The 1891 Morgan dollar is scarce in MS65 and rare as such with a CAC endorsement. Finer coins are extremely rare. This piece displays well-struck design elements and satiny luster. The obverse shows rich aquamarine, amber-gold, and deep violet toning, while the reverse has similar hues around the border but is brilliant in the center. There are six finer examples certified, three at each service; CAC: 20 in 65, 0 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255G, PCGS# 7204

**1891-CC Morgan Dollar, MS65
Seldom Seen in Higher Grades**

- 5203 1891-CC MS65 PCGS.** The 1891-CC Morgan dollar was a well-produced issue and examples are always in demand. This impressive Gem displays vivid shades of greenish-gold, lavender, and gray toning, with most of the color on the obverse. The design elements are sharply detailed and the well-preserved surfaces exhibit vibrant mint luster. PCGS has graded 34 numerically finer examples (3/16). NGC ID# 255H, PCGS# 7206

1891-CC Dollar, MS65
Scarce With CAC Endorsement

- 5204 1891-CC MS65 PCGS. CAC.** The 1891-CC is better date in the context of the Morgan dollar series, but brilliant, lustrous Gem examples, with intense eye appeal, such as the present coin, do turn up occasionally. What sets this specimen apart is its sharp strike, a feature often missing on this issue. The high quality of this coin is attested by the CAC sticker. PCGS lists 34 finer representatives (2/16).

Ex: FUN Signature (Heritage, 1/2010), lot 2981.

From The Paul H. Gerrie Collection. NGC ID# 255H, PCGS# 7206

- 5205 1891-CC Spitting Eagle, VAM-3, MS64 PCGS.** A Top 100 Variety. This lustrous Choice Carson City dollar is mostly white, though the peripheries display hints of tan patina. The strike is sharp and the fields are well preserved. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

- 5206 1891-CC Spitting Eagle, VAM-3, Top 100, MS64+ PCGS. CAC.** The popular "Spitting Eagle" variety, perhaps of greater numismatic interest for its lightly repunched mintmark and minor die doubling on Liberty's profile. The VAM-3 variety also shows a near date (near the bust underside) and a small die line near the eagle's right (facing) ankle that is absent on the rare far-date VAM-7 Spitting Eagle, which displays a later state of the reverse die. The present near-Gem is lustrous with light gold toning and minor facial grazes. For the VAM-3 variety, Population: 84 in 64 (6 in 64+), 16 finer. (2/16).

Ex: FUN Signature (Heritage, 1/2013), lot 6206. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

- 5207 1891-O MS64+ PCGS.** The elusiveness of the 1891-O Morgan in MS65 puts added demand on high-end Choice examples. This Plus-graded near-Gem shows frosty, untuned luster and minimal abrasions. Strike weakness occurs on the eagle's breast and the hair above Liberty's ear. NGC ID# 255J, PCGS# 7208

- 5208 1891-O MS64+ PCGS. CAC.** The 1891-O Morgan dollar is a plentiful issue in grades up to the MS64 level, but it becomes scarce in finer grades. This high-end Choice example is well-struck and lustrous, displaying lightly toned surfaces with few signs of contact. Gem examples of the 1891-O can be pricey, so this MS64+ coin with CAC endorsement could prove to be a good alternative. *Ex: Summer FUN Signature (Heritage, 9/2015), lot 4275. NGC ID# 255J, PCGS# 7208*

- 5209 1891-O MS64+ PCGS. CAC.** This New Orleans issue is seldom seen at the Gem level, as the typical piece exhibits moderate abrasions and uninspiring luster. This Plus-graded Choice example is unusually well-preserved and showcases radiant cartwheel luster. A halo of golden peripheral toning surrounds brilliant interiors. The strike is only a trifle soft above Liberty's ear. NGC ID# 255J, PCGS# 7208

1891-O Silver Dollar, MS65
Lovely Surface Preservation

- 5210 1891-O MS65 PCGS.** Although slightly soft on the central high points as usual, this Gem 1891-O Morgan dollar delivers outstanding eye appeal. The surfaces have a hint of pale gold toning and display softly frosted luster. No more than a few faint grazes on Liberty's cheek preclude an even finer grade. PCGS has not certified a single piece numerically finer (3/16). NGC ID# 255J, PCGS# 7208

1891-O Dollar, MS65
Rare CAC-Endorsed Gem

- 5211 1891-O MS65 PCGS. CAC.** The 1891-O Morgan dollar is scarce at the Gem level and is almost impossible to obtain finer, even if the cost is not a hindrance. Luster is typically "satiny to grainy or dull, not deep and frosty," in the words of Dave Bowers. This example is one of just 14 Gems with CAC green labels, ranking it among the finest obtainable in a PCGS holder. The strike is above average, and the surfaces are unusually well-preserved. A radiant cartwheel effects seems to belie this issue's reputation for poor eye appeal. Hints of golden toning emerge from the peripheries. *From The Paul H. Gerrie Collection. NGC ID# 255J, PCGS# 7208*

- 5212 1891-S MS65 PCGS.** An impressive Gem example, with razor-sharp definition on all design elements and vibrant mint luster throughout. The brilliant surfaces show no mentionable distractions and eye appeal is outstanding. NGC ID# 255K, PCGS# 7210

- 5213 1891-S MS65 PCGS.** Brilliant aside from small areas of deeper toning on each rim at 3 o'clock. A highly lustrous Gem that boasts an intricate strike and well-preserved fields. Light marks on the portrait correspond to the grade. Certified in a green label holder. NGC ID# 255K, PCGS# 7210

- 5214 1891-S MS65 PCGS.** Whispers of maroon, electric-blue, and gold visit the highly lustrous surfaces of this sharply struck Gem. A few minor grazes may prevent an even finer grade. NGC ID# 255K, PCGS# 7210

**1891-S Silver Dollar, MS66+
Elusive in High Grade**

- 5215 1891-S MS66+ PCGS. CAC.** A scarce Premium Gem example, this piece also boasting a Plus designation and a CAC endorsement. The strike is bold, and the radiant, frosty surfaces display untuned, unabraded cartwheel luster. The 1891-S is plentiful through MS65 due to many bags being dispersed from Treasury holdings periodically throughout the first half of the 20th century, but few high-grade coins escaped without bagmarks. PCGS lists eight finer coins; CAC: 26 in 66, 4 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255K, PCGS# 7210

- 5216 1892 MS64+ PCGS.** A better date with a mintage that just tops 1 million coins. This high-end Choice 1892 Morgan dollar displays frosty, vibrant luster with amber, gold, and ocean-blue toning in irregular patterns around the borders. Lightly struck at the centers, as normal. NGC ID# 255L, PCGS# 7212

1892 Silver Dollar, Vividly Toned MS65

- 5217 1892 MS65 PCGS.** Waves of intense blue-green and burgundy color subsume the obverse while the reverse retains a silver center bounded by russet and more blue-green. A few stray marks on Liberty's lower chin detract neither from the grade nor the strong eye appeal. The 1892 Morgan dollar issue becomes conditionally elusive in Gem grade, and finer examples are all but unobtainable.
Ex: Boston ANA Signature (Heritage, 8/2010), lot 10428, as MS64 PCGS, which brought \$920. NGC ID# 255L, PCGS# 7212

**1892 Morgan Dollar, MS65
Impressively Toned**

- 5218 1892 MS65 PCGS.** A prize for toning aficionados, this Gem 1892 Morgan dollar offers pastel toning with orange-red hues prevailing against gold, jade, and blue tints with lighter silver on the device high points. Field and device alike share pristine preservation with no mentionable distractions. An elusive issue in finer grades: PCGS reports only five Premium Gems and none certified better (3/16). NGC ID# 255L, PCGS# 7212

- 5219 1892 MS65 ANACS.** A frosty Gem, this 1892 Morgan dollar has brilliant silver surfaces with exceptional luster, showing splendid peripheral gold, blue, and lilac toning on both sides. Plentiful at this grade level, but nearly impossible to find in finer grades. NGC ID# 255L, PCGS# 7212

**1892 Morgan Dollar, MS65
Rare in Higher Grades**

- 5220 1892 MS65 PCGS. CAC.** The 1892 Morgan dollar is a scarce issue at the Gem level, and finer grades are almost unobtainable. This well-detailed Gem exhibits the slightest softness on the hair strands above Liberty's ear. The pale pink surfaces show few signs of contact and display vibrant cartwheel luster. PCGS reports five numerically finer representatives (2/16).
*Ex: ANA Signature (Heritage, 10/2012), lot 4891.
From The Paul H. Gerrie Collection. NGC ID# 255L, PCGS# 7212*

- 5221 1892-CC MS62 NGC.** Although not rare overall, the 1892-CC Morgan is a better Carson City issue when compared to dates from the early 1880s. This example is brilliant and frosty with a bold strike. Scattered abrasions on the obverse limit the grade. NGC ID# 255M, PCGS# 7214

- 5222 1892-CC MS62 PCGS. CAC.** This well-detailed, lustrous MS62 Morgan dollar from the famous Carson City Mint shows the minimum number of minor contact marks for the grade. Housed in a gem label holder. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, Attractive MS64
Great Cartwheel Luster**

- 5223 1892-CC MS64 PCGS. CAC.** This penultimate Carson City Morgan dollar issue was one of three almost unrepresented in the GSA sales (the others being the famous 1889-CC and 1893-CC issues). This attractive near-Gem likely dates to an earlier Treasury release. The sharply struck devices show few marks for the grade, and the surfaces display great cartwheel luster with little toning, aside from a touch of reddish-orange on the eagle's breast. Only about 10% of the PCGS-certified population at this grade level has received the CAC green endorsement.
Ex: ANA Signature (Heritage, 3/2008), lot 1106, which realized \$2,300. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64+
High-End Example**

5224 1892-CC MS64+ PCGS. Always in demand, this Carson City issue often displays high-quality, attractive surfaces and a bold strike. This borderline Gem coin is a sharp example, with nice frosted detail on the motifs and clear, unabraded fields. A couple of small marks above the eagle's head do not detract significantly from the appeal. A glint of champagne-gold toning appears overall. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS65
Elusive in Finer Grades**

5225 1892-CC MS65 PCGS. The Carson City Morgans are arguably the most heavily collected subset within the entire series, drawing strong demand in high grades. This Gem 1892-CC has few superiors. Frosty, brilliant luster rolls over largely unabraded surfaces, illuminating sharp design elements. Eye appeal is outstanding. PCGS lists 32 higher-grade submissions (3/16). NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS65+
Few Known Finer**

5226 1892-CC MS65+ PCGS. CAC. One of the more elusive issues in the Carson City short set, the 1892-CC Morgan is seldom seen without heavy abrasions. This high-end Gem is particularly pleasing, and finer coins are rare. This piece displays frosty, radiant brilliance and bold design definition. There are 32 finer submissions at PCGS (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS65+
Lightly Toned, Lustrous Example**

5227 1892-CC MS65+ PCGS. CAC. The 1892-CC Morgan dollar is seldom encountered in grades above the MS65 level, making this Plus-graded Gem a good balance of quality and value. This well-detailed example displays vibrant mint luster on both sides and the well-preserved surfaces radiate vibrant mint luster. A few hints of golden-tan toning show at selected angles. PCGS has graded 32 numerically finer examples (3/16). NGC ID# 255M, PCGS# 7214

5228 1892-O MS64+ PCGS. CAC. VAM-2. The 2 is lightly repunched north. Deep forest-green, golden-brown, and lavender toning embraces this well preserved near-Gem. Smooth and satiny with good eye appeal. The centers show softness, usual for New Orleans issues of the era. NGC ID# 255N, PCGS# 7216

**1892-O Morgan Dollar, MS65
Scarce This Nice**

5229 1892-O MS65 PCGS Secure. A marvelous Gem with a slight tinge of gold rim toning on the obverse. The reverse is fully brilliant over its frosty luster. The strike is typical for the New Orleans dollars from the 1890s, mostly sharp but with some weakness over the ear, and at the center of the reverse. The lustrous surfaces are free of all but the most inconsequential marks. PCGS and NGC combined have certified just 11 pieces numerically finer (3/16).
Ex: Long Beach Signature (Heritage, 6/2010), lot 1150. NGC ID# 255N, PCGS# 7216

**1892-O Morgan, Well-Struck MS65
High-End for the Issue**

- 5230 1892-O MS65 PCGS Secure. CAC.** The 1892-O is among the worst issues in the Morgan dollar series for eye appeal, often flatly struck with uninspiring luster. Bagmarks also affect numerous coins. This CAC-endorsed Gem is remarkable in all respects, from its clean surfaces to its vibrant, satiny luster and finally the well-defined motifs. PCGS lists six finer coins; CAC: 19 in 65, 1 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255N, PCGS# 7216

- 5231 1892-S AU53 NGC.** From a smallish mintage of 1.2 million pieces, the 1892-S Morgan dollar was not well-represented in the Treasury releases of the 1960s. This well-detailed AU53 specimen shows just a touch of wear and the still-lustrous surfaces show a scattering of minor abrasions on both sides. NGC ID# 255P, PCGS# 7218
- 5232 1892-S AU53 PCGS.** A pleasing AU53 example of this better date Morgan dollar, with light wear on the well-detailed design elements and lightly abraded surfaces that retain much of their original mint luster. NGC ID# 255P, PCGS# 7218

**1892-S Dollar, AU53
Elusive in High Grades**

- 5233 1892-S AU53 PCGS. CAC.** The 1892-S failed to turn up in any large quantity during the Treasury release of the early 1960s, alerting collectors to its elusive nature, especially in high grades. This pleasing AU53 dollar enjoys CAC approval for quality within the grade and eye appeal. Splashes of gold and crimson coloration complement even, steel-gray surfaces. A trace of friction over the high points is expected, but design detail remains bold.
From The Paul H. Gerrie Collection. NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, AU55
Elusive Issue in High Grade**

- 5234 1892-S AU55 PCGS.** After the Treasury releases of the 1960s, collectors began to recognize the rarity of the 1892-S Morgan dollar in high grade. While mid-grade circulated examples are not difficult to locate, the 1892-S is one of the keys to the series in Mint State. This Choice AU specimen shows just a trace of actual wear on the high points of the design elements, and the lightly abraded surfaces retain much original mint luster. NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, AU55
Challenging Issue When Choice**

- 5235 1892-S AU55 PCGS.** It was not until the late 1960s that collectors came to realize the rarity of the 1892-S Morgan dollars in About Uncirculated and finer grades. The Treasury releases did not add appreciably to the issue's availability, nor were there any hoards or bags released into collector's hands after the 1930s. Advent of the grading services confirmed the rarity of Mint State examples, adding pressure on any About Uncirculated coins. This Choice AU representative shows only lightly abrasions with generous mint luster remaining throughout both sides. Sharp definition remains on the devices aside from minor blending over the ear. Glimpses of gold and powder-gray toning appear sparingly at the rims and margins. NGC ID# 255P, PCGS# 7218

**1892-S Silver Dollar, AU55
Reflective Fields**

- 5236 1892-S AU55 PCGS.** This bright steel-gray 1892-S Morgan dollar shows a touch of high-point wear that keeps it at an affordable grade level. Significant reflectivity appears in the fields despite light friction in the open regions. A Prooflike designation would have been awarded this piece if it were Mint State. The strike is well-executed, and the eye appeal is pleasing. NGC ID# 255P, PCGS# 7218

**1892-S Dollar, Lustrous AU55
Seldom Seen Finer**

- 5237 1892-S AU55 NGC.** Substantial luster rolls around in the fields of this Choice AU 1892-S dollar, while both sides display warm gold toning. A brush of friction is seen over the central high points, and chatter appears on Liberty's cheek. After the 1893-S, the '92-S is the rarest date in the series in Mint State, making attractive AU coins such as this highly sought-after. NGC ID# 255P, PCGS# 7218

**1892-S Dollar, AU55
Obverse Border Toning**

- 5238 1892-S AU55 NGC.** This attractive Choice AU 1892-S Morgan will appeal to a range of collectors who appreciate old-time eye appeal. The obverse is satiny and steel-gray with a crescent of vivid blue and violet toning along the upper border. The reverse is light golden in color with semiprooflike fields. Light surface chatter accompanies a brief stint in circulation. This issue is rarely seen in Mint State. NGC ID# 255P, PCGS# 7218

- 5239 1893 MS63 PCGS.** An attractive Select example of this low-mintage Philadelphia issue, with well-detailed design elements and lustrous surfaces that show a scattering of minor contact marks on both sides. NGC ID# 255R, PCGS# 7220

- 5240 1893 MS64 PCGS.** Lustrous and mostly untoned, this Choice 1893 Morgan dollar displays minimal abrasions and a vibrant cartwheel effect. Lightness of strike on the central high points is typical of the issue, which had a small mintage of 378,000 pieces. NGC ID# 255R, PCGS# 7220

- 5241 1893 MS64 NGC. VAM-2.** The 3 in the date is lightly repunched north. A narrow but rich band of orange-red toning visits the obverse margin. A lustrous and well preserved near-Gem of this low mintage Philadelphia issue. The centers display moderate inexactness of strike. NGC ID# 255R, PCGS# 7220

**1893 Dollar, MS64+
Elusive Philadelphia Issue**

- 5242 1893 MS64+ PCGS.** With a small mintage of 378,000 pieces, the 1893 is among the scarcer Philadelphia issues in the series. This high-end near-Gem boasts satiny, untuned luster and bold relief elements. A few minor grazes on Liberty's cheek are all that preclude Gem classification. Although available in MS64, the 1893 Morgan is scarce in finer condition. NGC ID# 255R, PCGS# 7220

**1893 Dollar, Lustrous MS65
Extremely Rare Any Finer**

- 5243 1893 MS65 PCGS. CAC.** A scarce Philadelphia issue in high grade, rarely seen above MS65. This Gem 1893 Morgan dollar displays pleasing, brilliant luster rolling over faintly marked surfaces. The CAC label denotes excellent eye appeal for the issue and grade, and the strike is well-executed. There are only six finer coins at PCGS, four at NGC (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255R, PCGS# 7220

**1893 Morgan, MS62 Prooflike
Rare With Reflective Fields**

- 5244 1893 MS62 Prooflike PCGS.** The 1893 is one of the lowest-mintage Philadelphia issues (378,000 coins), and unlike the 1899, it is scarce in Mint State. What few people realize is the rarity of the 1893 with prooflike surfaces. PCGS has only certified 10 examples of this date as Prooflike and Deep Mirror Prooflike combined. At first glance, this brilliant and sharply struck example appears to merit a higher grade, but a loupe and careful rotation reveals a few faint slide marks on the cheek. In no way do these minor flaws detract from the coin's exceptionally deep mirrors. Population: 2 in 62 Prooflike, 0 finer (3/16).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 9776; ANA Signature (Heritage, 8/2007), lot 2386. NGC ID# 255R, PCGS# 7221

5245 1893-CC XF40 NGC. A collector-grade example of this final-year Carson City Morgan, showing natural golden-gray toning over lightly worn surfaces with glimpses of brightness in the fields. The surfaces are generally smooth, and eye appeal is pleasing for the grade. NGC ID# 255S, PCGS# 7222

5246 1893-CC XF45 PCGS. This final-year Carson City example retains prooflike surface at the obverse margins and throughout the reverse fields. Small abrasions are scattered across the surfaces, but none are severe. Traces of golden luster remain in protected areas. The central motifs are slightly soft from a combination of strike and light wear. Relatively few Choice XF coins are listed in the certified population reports, far fewer than the number required to fill the wantlists for circulated sets. NGC ID# 255S, PCGS# 7222

5247 1893-CC — Obverse Improperly Cleaned — NGC Details. Unc. A few stray hairlines on the obverse of this 1893-CC dollar appear to be what NGC denotes as cleaning, although the eye appeal is that of a lower-end Mint State coin with sharply struck devices. The fields showcase radiant mint luster, and neither side is notably toned. The obverse has scattered small abrasions.

5248 1893-CC — Cleaned — ANACS. MS60 Details. VAM-3. A trace of gold toning on the obverse margin denies full brilliance. The luster is mildly subdued and the centers are lightly brought up, but the coin is pleasing given its designations. On VAM-3, the 3 in the date is lightly repunched north, and the front of Liberty's eye is die doubled. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63 Reflective Fields

5249 1893-CC MS63 PCGS. Semiprooflike fields give this brilliant 1893-CC dollar distinctive eye appeal, while the frosty devices show light abrasions consistent with the grade. Lightness of strike on the eagle's breast and the hair above Liberty's ear is consistent with the grade. The '93-CC is the final Carson City issue in the series, and high-grade coins are elusive. This piece balances affordability with pleasing eye appeal. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63+ Final Carson City Issue

5250 1893-CC MS63+ PCGS. CAC. Only 677,000 Morgan dollars were struck at the Carson City Mint in 1893, the final year of coinage operations at the famous Western mint. This Plus-graded Select example offers well-detailed design elements, with just a touch of the usual softness on the centers. The lustrous surfaces are lightly marked and show hints of prooflike reflectivity at certain angles. NGC ID# 255S, PCGS# 7222

5251 1893-O AU58 ANACS. An attractive near-Mint example of this low-mintage branch mint issue, with just a trace of wear on the design elements and lightly abraded surfaces that retain traces of original mint luster.
From The Pellegrini Collection, Part II. NGC ID# 255T, PCGS# 7224

5252 1893-O AU58 NGC. An attractive near-Mint representative of this low-mintage New Orleans issue, with just a trace of wear and a scattering of minor abrasions on the lustrous surfaces. Delicate shades of lavender and greenish-gold toning are evident at selected angles. NGC ID# 255T, PCGS# 7224

5253 1893-O AU58 PCGS. CAC. An eye-catching near-Gem with fully prooflike fields and well-struck, satiny design elements. Light friction marks in the open regions and on Liberty's cheek preclude a Mint State designation. Tinges of golden toning appear around the periphery.
From The Paul H. Gerrie Collection. NGC ID# 255T, PCGS# 7224

5254 1893-O AU58 PCGS. CAC. Moderate luster remains in the fields of this near-Mint 1893-O dollar, and trivial high-point friction masks slight strike softness on the eagle's breast and the hair above Liberty's ear. Traces of champagne luster attest to the originality of the surfaces.
Ex: FUN Signature (Heritage, 1/2016), lot 6031, realized \$2,468. NGC ID# 255T, PCGS# 7224

1893-O Dollar, MS62 Scarce in Mint State

5255 1893-O MS62 PCGS. An elusive branch mint issue with a small 300,000-coin mintage, the 1893-O Morgan commands a premium in all grades. This is a seldom seen Mint State coin with pleasing eye appeal and luster. The obverse shows deep olive toning, and the reverse had lighter gold with blue peripheral accents. NGC ID# 255T, PCGS# 7224

5256 1893-S Good 4 PCGS. An uncommonly pleasing example for the grade, showing natural, uniform tan-gray surfaces that are perfectly smooth and evenly worn. The portrait and eagle are boldly outlined and retain some of the major details. The rims are weak but complete. A problem-free collector coin that many budget-restricted enthusiasts would be excited to own. NGC ID# 255U, PCGS# 7226

5257 1893-S VG8 NGC. Bold rims frame evenly worn devices on this attractive collector-grade 1893-S Morgan, showing steel-gray color beneath light golden overtones. Eye appeal is outstanding for the grade, and the surfaces are undeniably original. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Pleasing Fine 12

5258 1893-S Fine 12 NGC. Given the number of “details” coins that swell the ranks of circulated specimens for this key San Francisco issue, the current Fine 12 example is refreshingly original and pleasing. The reddish-brown toning with blue accents is pervasive — but natural — while the rims and motifs are sharp for the grade. Only tiny marks are seen with a lens. NGC ID# 255U, PCGS# 7226

5259 1893-S — Repaired, Cleaned — ANACS. VF20 Details. This piece is boldly detailed with gunmetal-gray toning that lightens over the interiors. The surfaces show light cleaning with faint tool marks in the fields. To the naked eye, this coin is quite pleasing. Suitable for the budget-conscious collector. NGC ID# 255U, PCGS# 7226

5260 1893-S — Rim Damage — PCGS Genuine Secure. VF Details. This budget-friendly 1893-S Morgan dollar exhibits pleasing original color that consists of deep gunmetal-gray in the fields and lighter shades of the same over the relief elements. Small, intermittent dings and bumps around the rims preclude a numeric grade from PCGS, but do little to harm the eye appeal. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, XF40 Better-Than-Average Condition

5261 1893-S XF40 PCGS. The 1893-S is an important key date, usually found in VF condition. This attractive XF40 specimen is a step up from the typical example seen, with light wear on the design elements and nearly brilliant surfaces. Only minor abrasions are evident and the surfaces retain much of their original mint luster. Ex: FUN Signature (Heritage, 1/2013), lot 6259. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, XF45 Pleasing Color and Sharpness

5262 1893-S XF45 ANACS. This Choice XF 1893-S dollar is mostly steel-gray, but tinges of tan-gold and bluish toning appear in the peripheral fields amid the stars and legends. Rotation beneath a light reveals faint remnants of luster. This well-detailed key-date Morgan will appeal to a range of collectors seeking to climb above the common VF grade level while still maintaining some semblance of affordability. Housed in an old, small size white ANACS holder. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU Sharpness

5263 1893-S — Wire Brushed — ANACS. AU50 Details. A pearl-gray key date silver dollar with blushes of golden-brown and jade-green toning on the upper obverse border. Hairlined from an ill-advised cleaning, but without any obtrusive abrasions. Design recesses retain ample bright luster. Sharper than usual for the issue, since a majority of survivors are in Fine or lower grades. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU Details

5264 1893-S — Cleaning — PCGS Genuine. AU Details. Unnaturally bright due to a heavy cleaning, this AU-level 1893-S Morgan nonetheless has some gold toning around the borders. Hairlines are scattered over each side, but there are no significant abrasions. Due to its key-date status and scarcity in the upper circulated grades, this 1893-S dollar will appeal to many budget-conscious collectors. NGC ID# 255U, PCGS# 7226

5265 1894 AU53 PCGS. This bright AU 1894 Morgan shows some luster in the fields and displays well-detailed devices. There is little in the way of bothersome abrasions, mostly just slight friction on the cheek and in the open portions of the fields. This is a semikey date from Philadelphia, boasting a small mintage of 110,000 coins. NGC ID# 255V, PCGS# 7228

5266 1894 AU55 PCGS. An attractive Choice AU specimen, with just a touch of high-point wear, and lightly abraded, lustrous surfaces that display a few hints of lavender and pale gold toning. The 1894 Morgan dollar is always in demand because of its low mintage of 110,000 pieces. NGC ID# 255V, PCGS# 7228

**1894 Morgan, MS62
Challenging Philadelphia Issue**

5267 1894 MS62 NGC. The low mintage of 110,000 pieces never fails to attract legions of Morgan dollar specialists who believe the issue is underrated — especially when compared to the prior-year 1893-S, which has a nearly the same mintage (100,000 coins), yet carries a much higher market value. This originally toned 1894 displays pale-rose and powder-gray toning that deepens on the reverse to include forest-green shades. The strike is consistently sharp on both sides. NGC ID# 255V, PCGS# 7228

**1894 Morgan, MS63
Low-Mintage Philadelphia Issue**

5268 1894 MS63 PCGS. Gold peripheral toning frames satiny silver interiors on this Select 1894 Morgan dollar. Grade-limiting abrasions are light and scattered, and the strike is well-executed. The 1894 Morgan boasts a small 110,000-coin mintage and is scarce in finer Uncirculated grades. The key to the Philadelphia circulation-strike series. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS64
Low-Mintage Philadelphia Issue**

5269 1894 MS64 PCGS. The 1894 Morgan dollar claims a mintage of 110,000 pieces, making the date one of the most elusive Philadelphia Mint issues of the series. This impressive Choice example displays sharp definition on all design elements and vibrant mint luster on both sides. The surfaces are lightly marked, with attractive hints of pale gold toning. PCGS has graded 27 numerically finer examples (3/16). NGC ID# 255V, PCGS# 7228

**1894 Dollar, Frosty MS64
Few Known Finer**

5270 1894 MS64 PCGS. Among circulation-strike Philadelphia issues, none are as conditionally elusive as the 1894. This Morgan dollar issue is seldom seen in MS64, and finer pieces rare. This Choice example displays well-struck motifs and frosty, untuned cartwheel luster. A few trivial grazes on Liberty's cheek are all that preclude a Gem designation. From a mintage of 110,000 coins. PCGS lists 27 finer representatives, NGC only five (3/16). NGC ID# 255V, PCGS# 7228

**1894 Silver Dollar, MS64
Key Philadelphia Issue**

5271 1894 MS64 PCGS. CAC. The 1894 is the scarcest circulation strike from the Philadelphia Mint, boasting a low 110,000-coin mintage. Gems are rare, which places this CAC-endorsed MS64 coin at the top of budget-conscious collectors' want lists. The strike is bold, and the surfaces display softly frosted, brilliant luster. PCGS lists 27 finer coins (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar
Rare, Plus-Graded Near-Gem**

5272 1894 MS64+ PCGS. CAC. With the second-lowest mintage of the circulation strike Morgan dollar series — just 110,000 pieces — the 1894 is a powerful attraction in any grade. In high-end near-Gem condition, it is nothing short of rare. This brilliant, frost-white coin shows a mere glimpse of golden toning on the rims while it radiates silver mint luster and displays a razor-sharp strike. The dual awards of the PCGS Plus designation and CAC endorsement confirm the technical and visual quality. Population: 15 in 64+, 27 finer (2/16). NGC ID# 255V, PCGS# 7228

- 5273 1894-O MS62 PCGS. CAC.** Rich aquamarine, orange-red, and stone-gray toning encompasses this satiny and nicely struck better date New Orleans dollar. The reverse is well preserved, and the small marks on the portrait do not distract. NGC ID# 255W, PCGS# 7230

**1894-O Silver Dollar, MS64
Dazzling Luster**

- 5274 1894-O MS64 PCGS Secure.** The marginal availability of the 1894-O Morgan drops off sharply above MS64, where the date is genuinely rare. This near-Gem is uncommonly lustrous and vibrant, showing well-preserved, frosty luster. Some minor weakness on the central high points of the devices is typical of this mid-1890s New Orleans issue. The '94-O is a semikey in the context of the series and among the most sought-after from this Southern mint. PCGS lists a dozen finer examples (3/16). NGC ID# 255W, PCGS# 7230

- 5275 1894-S MS63 PCGS.** The 1894-S is a slightly better date in the Morgan dollar series, boasting a small mintage 1.26 million coins. This Select Mint State example displays satiny luster with a hint of champagne toning. The strike is sharp, and abrasions are minimal. Scattered lines in the fields are the chief grade-limiting factor. NGC ID# 255X, PCGS# 7232

- 5276 1894-S MS63 PCGS.** A conditionally elusive semikey, the 1894-S Morgan dollar commands a premium even in low circulated grades. This Select Mint State representative displays champagne-toned, satiny luster with pleasing strike definition. A linear mark on Liberty's chin is the only mentionable flaw. NGC ID# 255X, PCGS# 7232

- 5277 1894-S MS63 NGC.** On close inspection, the surfaces of this attractive Select specimen show a few minor contact marks and hairlines, but the fields exhibit much prooflike reflectivity on both sides. The design elements are sharply detailed and the overall presentation is quite pleasing. The 1894-S is a better date in all grades. NGC ID# 255X, PCGS# 7232

- 5278 1894-S MS63 PCGS.** Glimpses of golden-brown toning are limited to the margins of this lustrous and crisply struck better date dollar. The reverse is beautifully preserved, and the cheek has only light luster grazes. Housed in a green label holder.
Ex: Long Beach Signature (Heritage, 2/2006), lot 2236. NGC ID# 255X, PCGS# 7232

- 5279 1894-S MS64 PCGS.** Most Mint State 1894-S dollars grade in the MS62-MS64 range, and finer coins are scarce. This frosty near-Gem balances technical quality with affordability. Both sides are essentially untoned, and only a few faint grazes on the obverse preclude Gem classification. Well-struck but with trivial remnants of roller marks on Liberty's cheek. NGC ID# 255X, PCGS# 7232

**1894-S Dollar, MS65
Multicolor Toning**

- 5280 1894-S MS65 PCGS.** Lavish apple-green, gunmetal-blue, orange-gold, and fire-red patina embraces this lustrous and intricately struck Gem. Examination beneath a loupe reveals only inconspicuous contact beneath the rich palette of colors. Although the 1894-S will always be in the shadow of its rare 1893-S predecessor, it is nonetheless surprisingly elusive in MS65 and higher grades. PCGS has only certified 15 finer pieces (3/16).
Ex: FUN Signature (Heritage, 1/2011), lot 6114; Central States Signature (Heritage, 4/2011), lot 5854. NGC ID# 255X, PCGS# 7232

**1894-S Silver Dollar, MS65+
Rare Any Finer, Semiprooflike Fields**

- 5281 1894-S MS65+ PCGS.** Moderately available through MS64, the 1894-S Morgan dollar becomes scarce at the Gem level and is rare any finer. This Plus-designated representative displays sharp, satiny devices set against semiprooflike fields. A light champagne glow warms each side, and grade-limiting abrasions are scant. PCGS has seen only 15 superior representatives (3/16). NGC ID# 255X, PCGS# 7232

**1894-S Dollar, Vibrantly Lustrous MS65+
Better Date, Conditionally Scarce**

- 5282 1894-S MS65+ PCGS. CAC.** The 1894-S is a better date in all grades, although Gem examples are genuinely scarce. This Plus-graded CAC coin displays intense cartwheel luster and frosty, untuned surfaces. The central devices are sharp, and the surfaces are far less abraded than is typically seen on this issue. Anything finer will prove to be out of reach for most collectors. PCGS has seen only 15 numerically superior examples, including possible resubmissions. CAC: 30 in 65, 4 finer (2/16). NGC ID# 255X, PCGS# 7232

**1894-S Morgan Dollar, MS65+
Semikey, Conditionally Elusive**

5283 1894-S MS65+ PCGS. CAC. The 1894-S Morgan dollar claims a smallish mintage of 1.2 million pieces, and the issue was generally well-produced. The date is challenging at the Gem level, however, and finer representatives are very rare. This high-end Gem exhibits well-detailed design elements and lightly marked, lustrous surfaces that are blanketed in attractive champagne-gold toning. PCGS has graded 15 finer examples (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255X, PCGS# 7232

5284 1895-O AU53 PCGS. CAC. Partially lustrous fields add to the eye appeal of this originally toned 1895-O Morgan dollar, which shows light wear over well-struck design elements. The interiors are bone-white, the peripheries have deeper amber toning.
From The Paul H. Gerrie Collection. NGC ID# 255Y, PCGS# 7236

5285 1895-O AU55 ANACS. After the Panic of 1893 diminished the demand for silver coinage, far fewer silver dollars were minted in 1895. Only 450,000 were struck in New Orleans and almost all those entered the channels of commerce. This is a bright AU example with an unusual characteristic for an 1895-O, strong semiprooflike fields. Light abrasions are scattered across each side, commensurate with the grade.
From The Pellegrini Collection, Part II. NGC ID# 255Y, PCGS# 7236

5286 1895-O AU55 PCGS. From a low branch mint production total of 450,000 pieces, this Choice AU specimen shows just the lightest touch of actual wear, and the lightly abraded surfaces retain significant amounts of original mint luster. NGC ID# 255Y, PCGS# 7236

5287 1895-O AU55 NGC. A lightly worn, lightly abraded Choice AU specimen of this low-mintage branch mint issue, with much original mint luster and a few hints of greenish-gold toning. Only 450,000 Morgan dollars were struck at the New Orleans Mint in 1895. NGC ID# 255Y, PCGS# 7236

5288 1895-O AU55 PCGS. An impressive Choice AU specimen of this low-mintage New Orleans issue, with just a touch of wear on the well-detailed design elements and lightly toned, lustrous surfaces that show only minor abrasions. NGC ID# 255Y, PCGS# 7236

**1895-O Morgan Dollar, Semiprooflike AU58
Scarce O-Mint Issue**

5289 1895-O AU58 PCGS. An undeniable rarity in Uncirculated condition, this near-Mint State example offers the dual attractions of an unusually sharp New Orleans strike and two-sided semiprooflike fields. Modestly contrasted with a smooth cheek on Liberty, the reflective fields show minor chatter that accounts for the AU58 grade, but there are no heavy marks or abrasions and the eye appeal is substantial. NGC ID# 255Y, PCGS# 7236

5290 1895-S XF40 PCGS. The pleasing lavender-gray surfaces of this lightly worn XF Morgan dollar show few distractions, with a couple of minor digs on Liberty's cheek the only marks of note. The 1895-S claims a low mintage of 400,000 pieces. NGC ID# 255Z, PCGS# 7238

5291 1895-S AU50 PCGS. Just a touch of high-point wear shows on the well-detailed design elements of this pleasing AU specimen and the lightly abraded surfaces exhibit hints of lavender-gray and sea-green toning, with traces of original mint luster. NGC ID# 255Z, PCGS# 7238

5292 1895-S AU55 NGC. The dove-gray surfaces of this better-date Morgan dollar issue display a nice clean look for the grade, with minimal overt abrasions and excellent eye appeal. A rim bump shows above the star next to O(NE). NGC ID# 255Z, PCGS# 7238

5293 1895-S — Cleaning — PCGS Genuine. Unc. Details. Light almond-gold toning visits this sharply struck better date dollar. Hairlines are minimal and marks are relatively inconsequential, but the surfaces are somewhat subdued. The 1895-S is key to a year collection of Morgan dollars. NGC ID# 255Z, PCGS# 7238

**1895-S Dollar, Semiprooflike MS64
Seldom Seen Finer**

5294 1895-S MS64 PCGS. The 1895-S Morgan dollar's low mintage of 400,000 coins fuels much of its semikey-date status, although a certain amount of actual scarcity also affects the issue's value and demand. In MS64, examples are only occasionally seen, and in MS65 the date is rare. This near-Gem boasts semiprooflike fields with hints of light golden toning near the borders. The central devices show high-point weakness, as is sometimes seen on this issue. There are 39 finer submissions recorded at PCGS (3/16). NGC ID# 255Z, PCGS# 7238

**1895-S Dollar, MS64+
Seldom Seen So Fine**

- 5295 1895-S MS64+ PCGS. CAC.** The 1895-S Morgan dollar seldom appears finer than MS63, although circulated examples are legion. Even most 400,000 coins struck that did *not* circulate show extensive bagmarks that remove them from consideration for the higher Mint State levels. This frosty, silver-white near-Gem is a pleasing exception, showing only two small nicks — one on the cheek and one on the chin; but otherwise Liberty's cheek is free of all but the smallest ticks. The eagle's breast is also relatively unabraded. A loupe reveals roller marks on the cheek that are undistracting. The PCGS *Population Report* lists 39 finer submissions (2/16).
From The Paul H. Gerrie Collection. NGC ID# 255Z, PCGS# 7238

- 5296 1896 MS67 PCGS.** A lack of surface distractions and a wealth of radiant, satiny luster confirm the lofty grade of this Philadelphia type coin. A hint of light golden toning graces the extreme outer peripheries, but leaves the well-struck interiors brilliant. Only two MS68 coins are finer at PCGS (3/16). NGC ID# 2562, PCGS# 7240

- 5297 1896-O MS60 NGC.** The 1896-O is accessible through MS62, but the date becomes exceedingly challenging in MS63 or finer, about on par with the 1901. This Uncirculated New Orleans dollar has softly frosted, mostly brilliant surfaces with evidence of color around the margins. Typically struck with scattered bagmarks. NGC ID# 27ZU, PCGS# 7242

- 5298 1896-O MS61 PCGS.** This Uncirculated 1896-O Morgan has frosty champagne-toned luster that shimmers when rotated beneath a light. Scattered light grazes limit the grade, but there surprisingly no singular distractions. Slight weakness of strike is seen on the central high points, as is consistent with the New Orleans reputation in the 1890s. NGC ID# 27ZU, PCGS# 7242

**1896-O Dollar, MS62
Collectible Mint State Example**

- 5299 1896-O MS62 PCGS. CAC.** The 1896-O is a better date in Uncirculated condition; it is scarce in MS64 and prohibitively rare in Gem or higher grades. This MS62 piece remains within the grasp of budget-restricted collectors. Satiny luster shows light champagne toning, with deeper amber seen around the outer peripheries. Light, scattered abrasions define the grade.
From The Paul H. Gerrie Collection. NGC ID# 27ZU, PCGS# 7242

1896-O Morgan Dollar, MS62

- 5300 1896-O MS62 PCGS Secure. CAC.** The 1896-O is a noted conditional rarity within the Morgan dollar series, one that becomes extremely elusive at the near-Gem or MS64 level and all but impossible in Gem — MS65 — or finer grades. This is a handsome MS62 example of the issue, showing a large dose of attractive satiny luster on surfaces that are silver-gray and mostly untuned, save for a slight rose-golden cast and a few small, unobtrusive dark toning flecks. A few stray contact marks comprise the grade, along with the typical strike from New Orleans, but this coin offers much eye appeal. Despite the hundreds of examples of the 1896-O certified in MS62 at PCGS and NGC combined, CAC has endorsed only 28 and 18 finer (2/16). NGC ID# 27ZU, PCGS# 7242

**1896-S Silver Dollar, MS63
Brilliant and Lustrous**

- 5301 1896-S MS63 PCGS.** A better date in Uncirculated condition and rarely seen at the Gem level. This Select 1896-S Morgan dollar remains within the grasp of budget-conscious collectors and yet displays pleasant eye appeal and brilliant, frosty luster. Some minor weakness is seen on the hair above Liberty's ear, and a few small abrasions on the cheek limit the grade. NGC ID# 2564, PCGS# 7244

1896-S Morgan Dollar, Brilliant MS64

- 5302 1896-S MS64 PCGS.** Like the 1896-O dollar, the 1896-S is a condition rarity that is generally easy to locate in circulated grades, but elusive in mint condition. This Choice piece is fully brilliant with frosted silver luster on each side. PCGS has graded just 84 finer pieces in three decades of certification.
Ex: Central States Signature (Heritage, 4/2008), lot 2943. NGC ID# 2564, PCGS# 7244

- 5303 1897 VAM 6A, Pitted Reverse MS66+ PCGS. CAC.** A Top 100 Variety, showing significant die rust pitting below the eagle's tailfeathers. As as a date, the 1897 Morgan is rare finer than MS66, making this Plus-graded Premium Gem highly appealing. The strike is bold, and the beautifully preserved surfaces display untuned, frosty luster. PCGS lists 31 Superb Gems finer (3/16). NGC ID# 2565, PCGS# 133946 Base PCGS# 7246

**1897 Dollar, MS65 Deep Mirror Prooflike
Elusive So Fine**

- 5304 1897 MS65 Deep Mirror Prooflike PCGS.** Although the 1897 Morgan dollar issue is plentiful even in the higher Mint State grades, its availability in Deep Mirror Prooflike is quite the opposite. This example is well-struck with deeply reflective fields. A few contact marks appear, primarily on the obverse. Population: 26 in 65 Deep Mirror Prooflike, 2 finer (3/16).
Ex: FUN Signature (Heritage, 1/2013), lot 6294. NGC ID# 2565, PCGS# 97247

- 5305 1897-O MS62 PCGS.** Soft luster glows beneath the light-gray toning on the obverse, with richer shades of blue and dove-gray on the reverse. This is a technically sharper example than the assigned grade in many ways — the coin is virtually mark-free and it is sharply struck for the issue, yet a bit reserved in terms of the Mint luster. NGC ID# 2565, PCGS# 7248

- 5306 1897-O MS62 PCGS. CAC.** An affordable Mint State example of this slightly better O-mint issue. Both sides display steel-gray luster with overtones of deep olive, violet, and teal in the peripheral recesses. No major abrasions are observed. NGC ID# 2565, PCGS# 7248

**1897-O Morgan Dollar, Untoned MS63
Conditionally Elusive**

- 5307 1897-O MS63 PCGS.** An untuned and highly lustrous example of this condition rarity, scarce even in the Select grade of this piece and downright elusive in MS64 or finer, where PCGS reports only 57 submissions (2/16). The strike is tack-sharp even in the centers, and none of the small marks that together constitute the grade are individually significant.
Ex: Chicago ANA Auction (Stack's Bowers, 8/2011), lot 10843, brought \$3,163. NGC ID# 2565, PCGS# 7248

**1897-O Silver Dollar, MS63
Better Date in Mint State**

- 5308 1897-O MS63 PCGS.** This slightly more challenging New Orleans issue is seldom seen above the MS63 grade level. The present coin shows areas of ocean-blue toning over a blanket of satiny golden-gray luster. The extreme centers exhibit some of the usual striking weakness, though grade-limiting surface abrasions are minimal. PCGS has seen 57 finer submissions (3/16). NGC ID# 2565, PCGS# 7248

**1897-O Morgan Dollar, MS63+
High-End, CAC-Approved Example**

- 5309 1897-O MS63+ PCGS. CAC.** This 1897-O dollar has the crisp strike definition and vibrant luster not usually found among products from the New Orleans Mint. A hint of incompleteness over the ear and breast is entirely acceptable for the issue, and does nothing to diminish the appeal for which CAC has provided a green approval sticker. All-brilliant with a couple of small marks on the cheek and lights scattered in the fields. High-end for the Select assessment.
From The Paul H. Gerrie Collection. NGC ID# 2565, PCGS# 7248

- 5310 1897-S MS66 PCGS.** Rich rose-gold and cloud-gray patina drapes both sides of this strongly lustrous, faintly iridescent Premium Gem. Well-defined for the issue with solid eye appeal. A few light marks are evident, but Liberty's cheek and neck are clear of all but the most minor disturbances. PCGS has graded just 30 finer examples (3/16).

Ex: Long Beach Signature (Heritage, 2/2008), lot 1454. NGC ID# 2567, PCGS# 7250

- 5311 1897-S MS66 PCGS. CAC.** Sharp design elements yield frosty luster, while the fields are partially prooflike. This Premium Gem 1897-S Morgan dollar is devoid of major abrasions and shows brilliant eye appeal. PCGS has seen 30 Superb Gems finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 2567, PCGS# 7250

**1898 Morgan, Champagne-Toned MS67
Among the Finest Certified**

- 5312 1898 MS67 PCGS.** This exactly struck Superb Gem possesses vibrant cartwheel luster, and the delicate chestnut-gold toning confirms the originality. Gorgeously preserved aside from a solitary green speck on the first L in DOLLAR. None are numerically finer at PCGS or NGC (3/16).
Ex: ANA Signature (Heritage, 3/2007), lot 1372. NGC ID# 2568, PCGS# 7252

**1898 Silver Dollar, MS67
None Finer at PCGS or NGC**

- 5313 1898 MS67 PCGS.** The Mint set high standards of production in the late 1890s, and the 1898 issue was particularly well-made. This Superb Gem representative is virtually unmarked by coin-to-coin contact, frosty, and distinctively embellished with orange and blue toning accents that emphasize the brilliant, silver-white surfaces. The technical quality and dramatic eye appeal of this coin are amazing. None are finer at either service (3/16). NGC ID# 2568, PCGS# 7252

**1898 Dollar, Beautifully Toned MS67
Impressively Well-Preserved**

- 5314 1898 MS67 PCGS. CAC.** The 1898 Morgan is a less often seen issue in Superb Gem condition, and rarely is such a coin encountered with a CAC endorsement. This delightful piece exhibits frosty, radiant luster and bold design elements. Liberty's cheek is flawlessly preserved. The obverse is warm golden overall with a rainbow crescent along the upper-right border, while the reverse displays blended aquamarine and lemon-gold toning. CAC: 11 in 67, 0 finer (2/16). NGC ID# 2568, PCGS# 7252

- 5315 1898-O MS67 PCGS. CAC.** Although MS67 coins are occasionally, seen the 1898-O silver dollar is almost unknown finer. This Registry-grade CAC coin displays frosty, brilliant luster and unabraded surfaces. The eagle's breast and the hair above Liberty's ear are slightly weak, as expected for the issue.
From The Paul H. Gerrie Collection. NGC ID# 2569, PCGS# 7254

- 5316 1898-O MS66 Deep Mirror Prooflike PCGS.** A blush of light golden toning warms the cameo contrast on each side of this Deep Mirror Prooflike 1898-O Morgan dollar. This New Orleans issue is rare in this grade, and finer DMPL coins are exceedingly so. This piece is boldly struck and free of distractions. Population: 46 in 66 (1 in 66+) Deep Mirror Prooflike, 3 finer (3/16). NGC ID# 2569, PCGS# 97255

**1898-O Morgan, MS66 Deep Mirror Prooflike
Enamoring Radiance and Contrast**

- 5317 1898-O MS66 Deep Mirror Prooflike NGC.** As is expected for a Deep Mirror Prooflike Morgan in Premium Gem condition, this 1898-O is absolutely beautiful, and technically impressive. Gleaming fields provide modest cameo contrast against the uncommonly sharp, frosty relief elements. Brilliant centers cede to lovely violet and plum peripheral hues, which attractively frame the unabraded interiors. Census: 13 in 66 (1 in 66 ★) Deep Mirror Prooflike, 1 finer (3/16). NGC ID# 2569, PCGS# 97255

- 5318 1898-S MS65 PCGS.** Attractive, light turquoise and rose toning surrounds pale orange-gold shades that visit the fields of this Gem 1898-S dollar. Only feather-light abrasions and a few, high point nicks are visible on the smooth, lustrous surfaces. Only minor incompleteness above the ear and on the eagle's breast prevent a full strike. The mintmark is slightly repunched. PCGS reports only 88 finer coins (2/16). NGC ID# 256A, PCGS# 7256

- 5319 1898-S MS65 PCGS.** This impressive Gem is brilliant and lustrous. Well-struck design features and minimally abraded surfaces add to the coin's appeal. PCGS has graded 89 numerically finer examples (3/16). NGC ID# 256A, PCGS# 7256

- 5320 1898-S MS65 PCGS.** A delightful Gem representative, with sharply detailed design elements and lustrous, well-preserved surfaces that show only the most insignificant signs of contact. A few hints of lavender and golden-tan toning show at selected angles. NGC ID# 256A, PCGS# 7256

**1898-S Morgan Dollar, MS66
Well-Preserved, Lustrous Surfaces**

- 5321 1898-S MS66 PCGS.** From a mintage of 4.1 million pieces, the 1898-S Morgan dollar is often seen with a soft strike. This delightful Premium Gem is sharply detailed in most areas, with just the slightest trace of the usual softness on the hair above the ear. The well-preserved surfaces radiate vibrant mint luster, with outstanding eye appeal. Population: 85 in 66 (5 in 66+), 3 finer (2/16). NGC ID# 256A, PCGS# 7256

**1898-S Dollar, Semiprooflike MS66
Seldom Seen This Fine**

- 5322 1898-S MS66 PCGS. CAC.** Beautifully preserved and semiprooflike with brilliant luster and bold relief detail. This Premium Gem 1898-S Morgan dollar displays excellent eye appeal. The issue is scarce in such fine condition, and higher-grade pieces are extremely rare. The CAC endorsement only heightens the appeal of the present coin. Population: 85 in 66 (5 in 66+), 3 finer; CAC: 14 in 66, 1 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 256A, PCGS# 7256

- 5323 1899 MS66 PCGS. CAC.** A frosty, untoned Premium Gem example of this semikey Philadelphia issue, coming from a small 330,000-coin mintage. Bold detail characterizes the motifs, while outstanding preservation adorns the fields. CAC-endorsed with only 20 finer coins at PCGS (2/16). NGC ID# 256C, PCGS# 7258

**1899 Morgan Dollar, MS66+
Low-Mintage Semikey**

- 5324 1899 MS66+ PCGS. CAC.** This semikey had a low mintage of 330,000 coins but remains available in most grades. Nonetheless, this high-end Premium Gem is conditionally elusive, and finer pieces are rare. Radiant luster and semiprooflike mirroring in the fields highlight excellent preservation. Multicolor toning appears over each side in attractive concentric hues. PCGS lists 20 finer representatives; CAC: 59 in 66, 3 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 256C, PCGS# 7258

**1899 Dollar, Top-Grade MS67
Conditionally Rare**

- 5325 1899 MS67 PCGS.** The 1899 Morgan dollar is semikey issue, boasting a small 330,000-coin mintage. A number of Mint State pieces nonetheless survive. This Superb Gem is significant as a condition rarity and one of the finest certified. The strike is bold, and the surfaces display essentially brilliant, satiny luster. A loupe reveals only a few insignificant grazes on the cheek. Population: 21 in 67 (1 in 67+), 0 finer (3/16). NGC ID# 256C, PCGS# 7258

- 5326 1899-O MS66 Prooflike PCGS.** A sensational Premium Gem with fully mirrored fields and satiny devices, this 1899-O is remarkably well struck and exhibits brilliant silver surfaces that are essentially untuned and fully lustrous. Population: 20 in 66 (1 in 66+) Prooflike, 0 finer (3/16). NGC ID# 256C, PCGS# 7261

**1899-S Dollar, Brilliant MS66
S-Mint Condition Rarity**

- 5327 1899-S MS66 PCGS.** The 1899-S is actually far more elusive in high grades than its lower-mintage Philadelphia counterpart. Premium Gems very scarcely appear in today's marketplace, and finer coins turn up once every few years or so. Radiantly brilliant and thickly frosted surfaces are remarkably clean even under close study. The design detail is bold. PCGS reports 10 submissions finer (3/16). NGC ID# 256D, PCGS# 7262

**1899-S Dollar, MS66
Underrated in High Grade**

- 5328 1899-S MS66 PCGS. CAC.** Interestingly, the 1899-S Morgan dollar is significantly scarcer in Mint State than its lower-mintage Philadelphia counterpart. This is a boldly struck, softly frosted Premium Gem with deep original toning. Internal lavender-gray hues yield to amber-rose in the margins and aquamarine near the borders. PCGS lists 10 finer representatives; CAC: 25 in 66, 3 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 256D, PCGS# 7262

- 5329 1900 MS66+ PCGS. CAC.** This Philadelphia Morgan dollar issue is popular among type collectors because of its availability through upper Mint State grade levels, including Premium Gem. This MS66+ dollar is exceptionally preserved without a mark worth mentioning. Fully brilliant with radiant luster, though somewhat incompletely defined at the centers. NGC ID# 256F, PCGS# 7264

**1900 Morgan Dollar, Frosty MS67
Top Grade at Both Services**

- 5330 1900 MS67 PCGS.** Frosty, roiling cartwheel luster enlivens both sides of this untuned Superb Gem 1900 Morgan dollar, the top grade for this issue at both leading services. Liberty's apple-cheek is unusually free of all but the most picayune stray ticks. The reverse shows similarly impeccable preservation. Population: 43 in 67 (3 in 67+), 0 finer (2/16). NGC ID# 256F, PCGS# 7264

- 5331 1900-O/CC VAM-11 MS65+ PCGS. CAC.** A Top 100 Variety. Several left over Carson City reverse dies were repunched with the New Orleans mintmark for coinage in 1900, resulting in the varieties that are collectively known as the 1900-O/CC Morgan. This high-end Gem example of VAM-11 shows a bold strike and satiny luster with warm champagne toning. A few faint grazes on the cheek are all that limit the grade. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

- 5332 1900-S MS65 PCGS.** A crisply struck silver-white Gem of this late-series S-mint Morgan dollar issue. Liberty's cheek is relatively unabraded, but a higher grade is precluded by minor luster grazes. The eye appeal is nonetheless high, particularly for those preferring untuned coins. NGC ID# 256H, PCGS# 7270

- 5333 1900-S MS65 PCGS.** Brilliant and radiantly lustrous, this Gem 1900-S Morgan dollar displays sharp motifs and strong eye appeal. A few light grazes on Liberty's jaw limit the grade. Finer pieces are scarce. NGC ID# 256H, PCGS# 7270

- 5334 1900-S MS65 PCGS.** This attractive turn-of-the-century Morgan dollar exhibits well-detailed design elements and lightly marked surfaces with uninterrupted cart wheel mint luster. The 1900-S becomes very scarce above the MS65 grade level. NGC ID# 256H, PCGS# 7270

- 5335 1900-S MS65+ NGC.** Blushes of cobalt-blue, plum, and golden-amber patina adorn the rims, while the interior portions of this well-detailed high-end Gem remain largely brilliant. Light marks are not overly distracting, and the only noteworthy flaw is a linear depression below PL(URIBUS). NGC reports just 28 pieces finer (3/16). NGC ID# 256H, PCGS# 7270

**1900-S Morgan Dollar, MS66
Only Two Finer Coins at PCGS**

- 5336 1900-S MS66 PCGS. CAC.** A sharply detailed Premium Gem from the end of the 19th century, this lovely Morgan dollar displays vibrant cartwheel mint luster and peripheral accents of champagne-gold toning. Close inspection reveals no mentionable distractions, and eye appeal is terrific. PCGS reports two Superb Gems finer (2/16). Ex: Central States Signature (Heritage, 4/2013), lot 4994. From The Paul H. Gerrie Collection. NGC ID# 256H, PCGS# 7270

- 5337 1901 AU58 PCGS.** The bulk of the nearly 7 million silver dollars coined in 1901 at Philadelphia was produced during the summer months. Many coins were distributed into circulation, but large quantities were retained in storage, only to be melted under the 1918 Pittman Act. This is a near-Mint survivor with lustrous fields and brilliant surfaces. The strike is sharp, and there are no major abrasions. In a popular grade due to the scarcity of attractive Uncirculated coins. NGC ID# 256J, PCGS# 7272

- 5338 1901 AU58 PCGS.** A small mark appears behind Liberty's mouth on this lightly worn Philadelphia Mint key silver dollar. Both sides have brilliant luster with untuned silver surfaces and the design elements are sharply rendered. NGC ID# 256J, PCGS# 7272

- 5339 1901 AU58 PCGS.** The mintage of the 1901 silver dollar is almost 30 times that of the 1899, yet the former is scarce in Uncirculated grades, while the latter is much more plentiful. The difference comes down to when and where the bags were released, and whether the issue participated in the Pittman Act melts. This lustrous but momentarily circulated example is bathed in aquamarine and rose-red toning. The cheek and chin are somewhat abraded. NGC ID# 256J, PCGS# 7272

**1901 Silver Dollar, MS61
Vibrant Mint State Example**

- 5340 1901 MS61 PCGS.** A glimpse of reddish-gold toning at the rims is overwhelmed by the brilliant silver luster that rolls across both sides of this unquestionably Mint State 1901 dollar. Light abrasions account for the assigned grade, but the strike is extra-sharp for the issue and the Mint-fresh flash is an eyeful. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS62
Scarcely Found Finer**

- 5341 1901 MS62 NGC.** A few minor contact marks are scattered about the lustrous surfaces of this attractive MS62 specimen, with a few hints of golden-tan toning and well-detailed design elements. The 1901 is a famous condition rarity, common in VF but increasingly rare with incremental Mint State grades. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, Untoned AU55
VAM-3 'Shifted Eagle' Variety, Top 100**

- 5342 1901 Doubled Die Reverse, VAM-3, AU55 PCGS.** A Top 100 Variety. The famous Shifted Eagle, showing doubling on the reverse most perceptible at the bottom of the wing and tail feathers, although the arrowheads and eagle's beak also show the phenomenon. This widely doubled variety merits its own *Guide Book* listing. This silver-white example is untoned and still retains considerable mint luster, although some heavy marks appear on Liberty's neck and cheek. For the VAM-3, Population: 11 in 55, 4 finer (3/16). NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

- 5343 1901-O MS66+ PCGS. CAC.** The inaugural New Orleans issue of the 20th century is a rarity in Superb Gem condition and exceedingly so in a PCGS holder. This is a Plus-graded Premium Gem PCGS coin with a CAC endorsement, making it among the finest the average collector can acquire. The strike is sharp, and the brilliant, frosty surfaces deliver excellent eye appeal. PCGS lists six finer representatives (3/16). NGC ID# 256K, PCGS# 7274

- 5344 1901-S MS64 PCGS. CAC.** The silvery centers of this near-Gem show excellent overall preservation for the grade, appropriately endorsed by CAC, with a light touch of honey-gold patina near the rims, still basically presenting as untoned and frosty. Ticks are minimal, but not absent, on the focal points. This is an issue that CAC is quite hard on; of the 1,600-plus examples in this grade at PCGS and NGC combined, CAC has endorsed 77 with 28 finer (2/16). Housed in a green label holder.
Ex: Janet Nakushian Collection / Baltimore Auction (Stack's Bowers, 3/2013), lot 7800. NGC ID# 256L, PCGS# 7276

- 5345 1901-S MS64+ PCGS. CAC.** This is a scarcer issue in the Morgan dollar series and the most elusive San Francisco date since 1896. The brilliant surfaces gleam with shimmering mint luster and show well-struck design motifs. An attractive example that is certainly high-end for the grade. NGC ID# 256L, PCGS# 7276

**1901-S Silver Dollar, MS65
Elusive in Finer Grades**

- 5346 1901-S MS65 PCGS. CAC.** Due to the extreme rarity of the Philadelphia 1901 dollar in Gem grade, the 1901-S is a scarce but suitable alternative for collectors seeking a type coin from the inaugural 20th century year. This CAC-endorsed representative is devoid of major abrasions, showing only a few faint grazes on the cheek that limit the grade. Weakness of strike appears as usual on the central high points. PCGS lists 40 finer examples; CAC: 23 in 65, 5 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 256L, PCGS# 7276

- 5347 1902 MS66+ PCGS. CAC.** The silver-gray surfaces of this high-end Premium Gem Morgan yield pleasing luster and well-struck design elements, including ample definition in the hair above Liberty's ear. Both sides have been well-cared for. The 1902 becomes elusive any finer, evidenced by PCGS having graded just 31 such examples (3/16). NGC ID# 256M, PCGS# 7278

- 5348 1902-O MS66+ PCGS. CAC.** A slightly better date in high grade, the 1902-O Morgan dollar is rarely seen in Superb Gem condition. This is an accessible but eye-catching, Plus-graded Premium Gem that shows beautiful surface preservation and satiny, untoned luster. The strike is above average for the issue. PCGS lists 20 finer representatives (2/16).
From The Paul H. Gerrie Collection. NGC ID# 256N, PCGS# 7280

- 5349 1902-S MS65 ANACS.** The 1902-S Morgan dollar is scarce in MS65 condition, and finer examples are quite elusive. This attractive Gem offers well-detailed design elements and well-preserved, lustrous surfaces that show highlights of golden-tan, lavender-gray, and turquoise toning. NGC ID# 256P, PCGS# 7282

**1902-S Morgan Dollar, MS65
Vivid Obverse Toning**

- 5350 1902-S MS65 PCGS.** The obverse of this Gem 1902-S Morgan displays attractive forest-green, crimson, sun-gold, and iridescent ebony toning around the periphery, yielding to lighter golden-gray in the center. The reverse shows a light champagne hue over the interior, with pale pastel shadings around the borders. The strike is a trifle soft on the eagle's breast. This issue is scarcely seen finer than MS65. NGC ID# 256P, PCGS# 7282

1902-S Silver Dollar, MS65
Elusive in Finer Condition

- 5351 1902-S MS65 PCGS. CAC.** Were this Gem 1902-S Morgan dollar better struck over the central high points, an even finer grade might have been achieved. Liberty's cheek shows faint roller marks not completely struck out of the planchet by the dies, but there are no significant abrasions. Iridescent champagne toning graces vibrant luster on each side. PCGS lists 46 finer representatives (2/16). From *The Paul H. Gerrie Collection*. NGC ID# 256P, PCGS# 7282

1902-S Dollar, MS66
Condition Rarity

- 5352 1902-S MS66 PCGS.** The 1902-S dollar was paid out in substantial quantities from the San Francisco Mint from the 1920s through the early 1950s. As a result, the issue is relatively available up to Gem condition. At the Premium Gem level, examples are rare. This representative exhibits satiny luster over near-brilliant, wonderfully preserved surfaces. The strike is sharp overall with slight incompleteness at the centers on each side, and light roller marks occur over the eagle's breast. Population: 43 in 66 (5 in 66+), 4 finer (3/16). NGC ID# 256P, PCGS# 7282

- 5353 1903-O MS66+ PCGS. CAC.** Frosty, vibrant luster engulfs each side of this high-end Premium Gem representative, with subtle traces of champagne toning discernible when turned in-hand. A trifle soft on the eagle's breast but far above-average for the date. This New Orleans issue is seldom seen finer. NGC ID# 256S, PCGS# 7286

1903-O Dollar, MS67
Among the Finest Known

- 5354 1903-O MS67 PCGS. CAC.** Ex: *The Shrike Set*. This Superb Gem exhibits bright silver luster with frosty, pristine surfaces, and sharp design motifs. Slight weakness over the ear is all that separates this piece from a full strike. This important piece is tied for the finest available. Population: 76 in 67 (1 in 67+), 0 finer (2/16). Ex: *The Shrike Set - The Karschner Collection of Morgan Dollars / FUN Signature (Heritage, 1/2011)*, lot 6183. From *The Paul H. Gerrie Collection*. NGC ID# 256S, PCGS# 7286

-
- 5355 1903-S AU50 PCGS.** Luster remains in the protected regions of the fields on this 20th century semikey Morgan, accentuating tinges of golden toning around the peripheries. The interiors remain mostly brilliant. Light friction over the high points of the devices and in the exposed areas of the fields precludes Mint State classification. NGC ID# 256T, PCGS# 7288

- 5356 1903-S AU53 NGC.** Just a touch of wear shows on the high points of the design, like the hair above the ear, on this attractive AU53 example. The lustrous surfaces show many scattered minor signs of contact, but no large or distracting abrasions are evident. NGC ID# 256T, PCGS# 7288

- 5357 1903-S AU53 PCGS.** Partially lustrous fields and golden toning give this AU 1903-S Morgan pleasing eye appeal. Wear is light, and scattered surface chatter is consistent with the grade. The '03-S is a better date overall and notably scarce above the AU grade range. NGC ID# 256T, PCGS# 7288

1903-S Dollar, MS64
Better 20th Century Issue

- 5358 1903-S MS64 PCGS.** The 1903-S is a key date among 20th century Morgan dollars, particularly elusive above MS64. This Choice example remains within the grasp of many budget-conscious enthusiasts but possesses eye appeal nearly as strong as that of a finer grade. The strike is bold, and tinges of rose-gold toning appear around the peripheries. A few small grazes on Liberty's jaw and in the adjacent field preclude Gem classification. NGC ID# 256T, PCGS# 7288
-

1903-S Dollar, MS64
Excellent Preservation

5359 1903-S MS64 PCGS. Ex: Diamond Head. Satiny and well-preserved, this Choice 1903-S dollar is far finer than most collectors encounter when seeking this semikey issue. Higher-grade coins are particularly scarce. This piece displays average strike definition and brilliant luster. Eye appeal is pleasing for the issue. NGC ID# 256T, PCGS# 7288

5360 1904 MS65 PCGS. The 1904 Morgan dollar is seldom seen in grades above MS65. This attractive Gem displays sharply detailed design elements throughout, and the well-preserved surfaces display vibrant mint luster on both sides. PCGS has graded 24 numerically finer examples (3/16). NGC ID# 256U, PCGS# 7290

5361 1904 MS65 PCGS. The 1904 is elusive in Gem condition and rarely seen finer. This piece displays satiny luster with tinges of sun-gold and ocean-blue toning near the borders. The hair above Liberty's ear is a trifle soft. PCGS has seen 24 finer submissions (3/16). NGC ID# 256U, PCGS# 7290

1904 Dollar, Toned MS65
Better Date in High Grade

5362 1904 MS65 PCGS Secure. CAC. Despite a mintage exceeding 2.7 million coins, the 1904 Morgan dollar is elusive in MS65 and rare finer. This CAC coin displays satiny luster and average strike sharpness. Both sides are lightly toned, the obverse showing lavender-gray, sea-green, and lemon-gold with the reverse being most champagne-gray. There are 24 finer coins at PCGS; CAC: 40 in 65, 6 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 256U, PCGS# 7290

5363 1904-O MS66+ PCGS. A lustrous and nearly brilliant representative of the final New Orleans issue. The reverse field appears pristine, and the obverse shows only trivial contact. The strike is good save for some blending at the centers. NGC ID# 256V, PCGS# 7292

1904-S Dollar, MS63
Semireflective Fields

5364 1904-S MS63 PCGS. Hazy light gold toning appears over luster on both sides of this scarce date and mint representative, while the motifs display a decent strike. The surfaces show scattered ticks and bagmarks when examined with a loupe, but the coin retains enough eye appeal to satisfy most collectors who are seeking an Uncirculated example of this date. Identifiable by a couple of nicks above and below Liberty's eye.
Ex: Long Beach Signature (Heritage, 2/2006), lot 2376. NGC ID# 256W, PCGS# 7294

1904-S Morgan Dollar, MS64+
Elusive Late-Series Issue

5365 1904-S MS64+ PCGS. The 1904-S Morgan dollar was produced in large numbers, but the great majority of the mintage was released into circulation over the years, and few examples were saved for numismatic purposes. High-grade examples are rare and expensive coins today. This high-end Choice example offers much the same quality as a Gem specimen, with brilliant surfaces and vibrant mint luster. The devices are sharply detailed in most areas, with just the slightest touch of softness on the hair above the ear and the eagle's breast.
Ex: Long Beach Signature (Heritage, 2/2011), lot 4016. NGC ID# 256W, PCGS# 7294

1904-S Silver Dollar, Satiny MS64+

5366 1904-S MS64+ PCGS. CAC. The 1904-S is one of the most challenging Morgan dollar issues from the 20th century, notably scarce in Gem or better grades. This Plus-designated near-Gem is devoid of major distractions and exhibits satiny luster beneath mottled amber and gold toning on the obverse and a light champagne hue on the reverse. Some of the usual strike weakness is mentioned on the eagle's breast and the hair above Liberty's ear. NGC ID# 256W, PCGS# 7294

1904-S Silver Dollar, MS65
Attractive Surfaces, Better Date

- 5367 1904-S MS65 PCGS.** The availability of this better 20th century issue declines significantly above MS64, and the date becomes rare in MS66. This Gem example comfortably resides in the middle. The surfaces are well-preserved and nearly brilliant, save for a hint of golden toning around the outer periphery. Slight strike softness is seen on the extreme central high points. PCGS lists 16 finer representatives (3/16). NGC ID# 256W, PCGS# 7294

1904-S Dollar, Well-Struck MS65
20th Century Key Date

- 5368 1904-S MS65 PCGS. CAC.** Ex: M. L. Moser Collection. The marginal Mint State availability of the 1904-S Morgan dollar plummets at the Gem grade level, and finer coins are genuine rarities. This CAC-endorsed coin is well-struck and satiny with some reflectivity in the fields. A pleasing example in Dave Bowers' "Optimal Collecting Grade" of MS65. PCGS reports 16 finer representatives; CAC: 19 in 65, 4 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 256W, PCGS# 7294

1921-D Silver Dollar, MS67
Myriad Toning Hues

- 5369 1921-D MS67 NGC.** A sliver of brilliance on each side is nearly engulfed by teal, russet, and forest-green toning, while frosty mint luster illuminates the patina. The eagle's breast is lacking complete definition, as usual, though the coin is otherwise well-struck. The certified population in this grade is remarkably thin, and only a single coin is known finer. Census: 10 in 67 (3 in 67 ★), 1 finer (3/16).
Ex: Long Beach Signature (Heritage, 9/2006), lot 5580. NGC ID# 256Y, PCGS# 7298

- 5370 1921-D MS64 Prooflike NGC.** More than 20 million examples of this Denver Mint issue were struck, yet remarkably few exist in Prooflike condition. This appealing coin exhibits razor-sharp strike definition on surfaces draped in mottled olive and pastel rose patina. A few wispy abrasions on Liberty's chin and neck seemingly prevent a Gem grade. Census: 64 in 64 Prooflike, 15 finer (2/16).
Ex: McNelly Collection / FUN Signature (Heritage, 1/2015), lot 6166, brought \$1,880. NGC ID# 256Y, PCGS# 7299

- 5371 1921-S MS65+ PCGS.** Radiant luster and untuned, softly frosted surfaces deliver an excellent first impression of this high-end Gem 1921-S Morgan dollar. A few trivial grazes on Liberty's cheek are not bothersome. This piece shows considerable strike weakness on the eagle's breast and the lower wreath, as is typical of the issue. Finer coins are scarce. NGC ID# 256Z, PCGS# 7300

- 5372 1921-S MS65+ PCGS. CAC.** This high-end Gem exhibits sharply detailed design elements and well-preserved surfaces with attractive accents of golden-brown toning. Vibrant mint luster is evident on both sides. Seldom seen finer.
From The Paul H. Gerrie Collection. NGC ID# 256Z, PCGS# 7300

1921-S Morgan Dollar, MS66
Intense Mint Frost, Deeply Lustrous

- 5373 1921-S MS66 PCGS Secure. CAC.** Ex: Bella. The San Francisco Mint struck more than 21 million Morgan dollars in 1921, yet the issue is essentially unavailable any finer than MS66. Examples of the 1921-S are rarest of the three 1921 issues in Premium Gem condition. This brilliant, deeply frosted example is lustrous and sharply struck. A cluster of tiny luster grazes at the neck truncation are the only marks to mention. PCGS has yet to grade a numerically finer coin. Population: 81 in 66 (5 in 66+), 0 finer (2/16). NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

- 5374 1879 PR61 NGC.** The 1879 is the first available proof in the Morgan dollar series, boasting a mintage 1,100 pieces. This is a pleasing lower-end example with largely brilliant surfaces and considerable cameo contrast. Moderate hairlines limit the grade. NGC ID# 272Z, PCGS# 7314

**1879 Morgan Dollar, PR65 Cameo
Attractively Toned**

- 5375 1879 PR65 Cameo PCGS.** With Deep Cameos virtually uncollectible, this Gem Cameo proof 1879 Morgan dollar is among the finer pieces typically available to enthusiasts. Forest-green, crimson, and russet hues accent the obverse periphery around a lavender-gray interior, while the reverse shows uniform sun-gold toning. Field-device contrast is pleasing and the design elements are well struck. Population: 14 in 65 Cameo, 24 finer (2/16). NGC ID# 27Z2, PCGS# 87314

**1879 Morgan Dollar, PR66 Cameo
Pronounced Reflectivity, Contrast**

- 5376 1879 PR66 Cameo PCGS Secure.** Pronounced field-device contrast is the undisputed hallmark of this visually impressive, entirely brilliant Premium Gem proof. Jet-black mirrors surround thickly frosted motifs throughout, delivering seemingly unimprovable eye appeal. A couple of thin wisps on the cheek and two tiny marks behind Liberty's nose define the grade. The Philadelphia Mint manufactured a large production of 1,100 Morgan dollar proofs in 1879. That total is among the highest in the series, yet specimens of this quality are rare. Population: 17 in 66 (2 in 66+) Cameo, 7 finer (2/16).
From The Pellegrini Collection, Part II. NGC ID# 27Z2, PCGS# 87314

**1880 Dollar, Marvelous PR65 ★
Untoned, Outstanding Eye Appeal**

- 5377 1880 PR65 ★ NGC.** This amazingly contrasted Gem displays full details on all design elements, as expected of a proof strike, with brilliant surfaces that show only a few minor wisps in the fields. Although undesignated as a Cameo, the field-device contrast is dramatic, particularly on the obverse. The Star designation attests to the outstanding eye appeal that is readily apparent at first glance.
Ex: Central States Signature (Heritage, 4/2011), lot 5913.
From The Pellegrini Collection, Part II. NGC ID# 27Z4, PCGS# 7315

**1880 Dollar, PR65 Cameo
Collectible, Early-Date Example**

- 5378 1880 PR65 Cameo PCGS.** Blushes of champagne-gold patina adorn the rims and appear interspersed over the interior areas, giving this otherwise silvery PR65 Cameo proof a distinct air of originality. Expectedly razor-sharp and frosty motifs stand out against glassy, well-preserved fields to produce eye-catching cameo contrast. This is one of 1,355 Morgan dollar proofs minted in 1880.
From The Pellegrini Collection, Part II. NGC ID# 27Z4, PCGS# 87315

**1882 Morgan Dollar, PR66 Cameo
All-Brilliant, Glassy Fields**

- 5379 1882 PR66 Cameo NGC.** The surfaces of this Premium Gem Cameo proof dollar exhibit uninhibited brilliance with each side void of toning. Deeply mirrored fields and frosted design elements provide bold contrast and a corresponding degree of aesthetic appeal. The 1882 was struck to the extent of 1,100 proofs. Although it is a more-available date overall, the low certified population total in PR66 Cameo and higher underscores the issue's conditional rarity. Census: 15 in 66 Cameo, 11 finer (2/16).
From The Pellegrini Collection, Part II. NGC ID# 27Z6, PCGS# 87317

**1883 Morgan Dollar, PR66 Cameo
Flashy White-on-Black Surfaces**

- 5380 1883 PR66 Cameo PCGS.** A substantial mintage of 1,039 proof Morgan dollars was accomplished in 1883, a high-quality production with few striking problems. The typical 1883 proof exhibits moderate contrast, though less pronounced than in previous years. This delightful Premium Gem offers predictable pinpoint definition and distinct cameo contrast between the frosty devices and the reflective fields. The dramatic white-on-black flash becomes most apparent when the coin is angled in the light. Population: 13 in 66 (3 in 66+) Cameo, 2 finer (2/16).
Ex: Paul Taylor Collection of Proof Morgan Dollars / Chicago Signature (Heritage, 8/2011), lot 7358.
From The Pellegrini Collection, Part II. NGC ID# 27YV, PCGS# 87318

1885 Morgan Dollar, PR66 Cameo
Beautifully Toned, Frosty Motifs

- 5381 1885 PR66 Cameo PCGS. CAC.** Richly toned yet distinctly contrasted, this Premium Gem proof 1885 Morgan dollar strikes the perfect balance as a moderately patinated yet undeniably Cameo specimen. Deep blue-green and violet hues grace the borders, lightening to peach and golden-gray at the centers. Both sides remain strongly mirrored, even flashy on the reverse, and the persistent frost over the devices accounts for the bold contrast throughout. Strongly defined with a hint of softness on the hair over Liberty's ear. Well-preserved under the eye-appealing patina. Population: 19 in 66 (2 in 66+) Cameo, 2 finer (2/16).
Ex: New York Signature (Heritage, 11/2003), lot 8750; Paul Taylor Collection of Proof Morgan Dollars / Chicago Signature (Heritage, 8/2011), lot 7360.
From The Pellegrini Collection, Part II. NGC ID# 27ZE, PCGS# 87320

1886 Dollar, Brilliant PR66 Cameo
Repunched Date Variety

- 5382 1886 PR66 Cameo NGC.** *Ex: South Beach Collection.* The obverse, from one of two dies used to strike 886 proofs in 1886, features light repunching on 18 in the date, and the second 8 has a small dash below. This brilliant Premium Gem proof dollar showcases blatant white-on-black contrast and flashy, unperturbed fields. Wholly devoid of color. Census: 6 in 66 Cameo, 10 finer (2/16).
Ex: FUN Signature (Heritage, 1/2005), lot 11958; FUN Signature (Heritage, 1/2013), lot 6368.
From The Pellegrini Collection, Part II. NGC ID# 27ZF, PCGS# 87321

1887 Morgan Dollar, PR65 Cameo
Only 710 Proofs Minted

- 5383 1887 PR65 Cameo NGC.** This impressive Gem Cameo proof has deeply mirrored fields and frosty devices without evidence of toning on either side. The surfaces are nearly flawless, showing only a few faint hairlines. An impressive example and rarely seen finer. Census: 10 in 65 Cameo, 18 finer (2/16).
Ex: Long Beach Signature (Heritage, 2/2012), lot 4347.
From The Pellegrini Collection, Part II. NGC ID# 27ZG, PCGS# 87322

1888 Morgan Dollar, PR65 Cameo
Impressive Contrast and Preservation

- 5384 1888 PR65 Cameo PCGS.** The date is repunched with the remnants of the initial date most visible at the peak of the 1 and the base of the first 8. This virtually untuned example would surely grade even higher were it not for faint slide marks on Liberty's cheek. Only 832 proofs were manufactured in 1888, and just a small portion of survivors can match the contrast and preservation of this impressive Gem.
Ex: ANA (Heritage, 7/2005), lot 7003; ANA Signature (Heritage, 8/2010), lot 5403; Long Beach Signature (Heritage, 9/2011), lot 3804.
From The Pellegrini Collection, Part II. NGC ID# 27ZH, PCGS# 87323

1889 Morgan Dollar, PR65 Cameo
Colorful Border Toning

- 5385 1889 PR65 Cameo NGC.** Well-contrasted interiors show no traces of interior toning and the mirrors of this gorgeous PR65 Cameo specimen, while the margins have narrow bands of mainly golden-orange, ice-blue, and violet-rose patina. Trivial hairlines appear near Liberty's lips and chin and in field below. Census: 8 in 65 Cameo, 19 finer (2/16).
Ex: Philadelphia Signature (Heritage, 8/2012), lot 4211.
From The Pellegrini Collection, Part II. NGC ID# 27ZJ, PCGS# 87324

1891 Dollar, PR66 Cameo
An Elegant, Eye-Catching Example

- 5386 1891 PR66 Cameo PCGS.** This PR66 Cameo survivor offers a powerful rebuttal to Q. David Bowers' unflattering comments in his *Guide Book of Morgan Silver Dollars*, where he writes: "Striking can be weak at the centers. Medium cameo contrast. Low mintage, the possibility of a weak strike, and so many cleaned and dipped coins on the market add up to a challenge." Each side of this thickly frosted Premium Gem has compelling field-device contrast, and definition is strong over the centers. Brilliant with glimpses of golden-violet and powder-blue patina. An elegant and eye-catching specimen. Population: 11 in 66 (1 in 66+) Cameo, 3 finer (2/16).
Ex: Paul Taylor Collection of Proof Morgan Dollars / Chicago Signature (Heritage, 8/2011), lot 7366.
From The Pellegrini Collection, Part II. NGC ID# 27ZL, PCGS# 87326

1892 Dollar, Frosty PR66 Cameo
Antique Golden-Gray Accents

- 5387 1892 PR66 Cameo PCGS.** A pale layer of antique golden-gray patina lightly accents the brilliant surfaces of this Premium Gem Cameo proof dollar. Reflective mirrors are undimmed by the toning, while the frosted devices generate abundant contrast. Interest in the then-novel Barber designs resulted in increased proof Morgan dollar production, bringing the total struck that year to 1,245 pieces. Population: 10 in 66 Cameo, 6 finer (2/16).
Ex: Paul Taylor Collection of Proof Morgan Dollars / Chicago Signature (Heritage, 8/2011), lot 7367.
From The Pellegrini Collection, Part II. NGC ID# 27ZM, PCGS# 87327

1893 Morgan Dollar, PR67
Deep Original Proof Set Toning

- 5388 1893 PR67 NGC.** Like the quarter and half dollar from this year, the silver dollar also had a mintage of only 792 proofs. On the obverse, this Superb Gem displays a centrally located untoned area that extends upward in a U shape, taking on a pale reddish hue. Elsewhere the obverse is deep blue, violet, and sea-green. The reverse also has a central area of brilliance about the size of a nickel and the remainder of that side is similarly toned as the obverse. The surfaces are seemingly flawless and moderate contrast occurs between the fields and devices on each side. Central strike softness is present, as seen on most 1893 dollars. Census: 18 in 67 (1 in 67+), 8 finer (2/16). NGC ID# 27ZN, PCGS# 7328

- 5389 1894 PR58 PCGS. CAC.** Wisps of lavender color grace the peripheries of this barely circulated 1894 proof Morgan, and cameo contrast is immediately apparent. A tiny mark or two on Liberty's cheek and neck are not bothersome. CAC-endorsed in a green label holder.
Ex: FUN Signature (Heritage, 1/2005), lot 11984. NGC ID# 2577, PCGS# 7329

1894 Silver Dollar, Toned PR66
Conditionally Rare Proof Issue

- 5390 1894 PR66 PCGS. CAC.** Although not particularly noteworthy in an absolute sense, the proof 1894 Morgan dollar is something of a rarity in Premium Gem condition. This CAC coin displays a bold strike and reflective fields. Cameo contrast is prohibited by lavender-gray and aquamarine toning on the obverse, and teal, amber, and violet-blue on the reverse. Population: 9 in 66 (1 in 66+), 5 finer; CAC: 3 in 66, 1 finer (3/16). NGC ID# 2577, PCGS# 7329

1898 Dollar, PR64 Cameo
Best-Produced Date in the Series

- 5391 1898 PR64 Cameo PCGS.** Dave Bowers explains in his *Guide Book of Morgan Silver Dollars* that the 1898 is a well-produced issue, and cites Mike Fuljenz: "This date was probably the best made in the entire series." Dramatically contrasted surfaces are mostly brilliant with the faintest blush of color. Each side is remarkably clean. From a mintage of 735 proofs. Population: 13 in 64 Cameo, 15 finer (3/16). NGC ID# 27ZW, PCGS# 87333

1898 Dollar, PR65 Ultra Cameo
Brilliant With Hints of Golden Patina

- 5392 1898 PR65 Ultra Cameo NGC.** Only 735 proof Morgan dollars were struck in 1898, but the issue is known for the high quality of its survivors. This spectacular Gem exhibits richly frosted design elements that stand out dramatically against the deeply reflective fields. The unmarked surfaces show a few hints of champagne-gold toning, with exceptional eye appeal. Census: 14 in 65 Ultra Cameo (1 in 65 ★ Ultra Cameo), 32 finer (2/16).
Ex: FUN Signature (Heritage, 1/2013), lot 6387.
From The Pellegrini Collection, Part II. NGC ID# 27ZW, PCGS# 97333

- 5393 1899 PR62 PCGS.** A pleasing lower-end proof with deeply mirrored fields and bold motifs. The interiors are steel-gray, the peripheries show deep gunmetal-blue toning. Subtle contrast is apparent at certain angles. NGC ID# 27ZX, PCGS# 7334

1899 Dollar, PR66 Cameo
Lightly Toned, Deeply Reflective

- 5394 1899 PR66 Cameo PCGS.** The Philadelphia Mint struck a meager quantity of 330,000 business-strike Morgan dollars plus 846 proofs in 1899. Both production formats are generally available, but specimens with cameo contrast prove challenging, and they are rare at the Premium Gem grade level. Traces of golden-orange patina fail to diminish the gleaming brilliance of this amazingly contrasted representative, showing frosty motifs that stand starkly against watery mirrors. Population: 9 in 66 (2 in 66+) Cameo, 7 finer (2/16).
From The Pellegrini Collection, Part II. NGC ID# 27ZX, PCGS# 87334

1901 Dollar, PR66 Cameo
Ideal Circulation-Strike Alternative

- 5395 1901 PR66 Cameo PCGS.** The 1901 Morgan dollar claims a mintage of nearly 7 million business strikes, but few examples were saved. Many coins were likely melted under the provisions of the Pittman Act in 1918. Thus, high-grade circulation strikes are exceedingly rare, and proofs often take their place in collectors' sets. The increased demand puts significant pressure on the small supply of proofs (813 specimens minted). This impressive Premium Gem displays deeply mirrored fields that contrast starkly against frosty devices. A few wisps of champagne-gold toning add to the tremendous visual appeal. Population: 9 in 66 Cameo, 2 finer (2/16).
Ex: FUN Signature (Heritage, 1/2013), lot 6393.
From The Pellegrini Collection, Part II. NGC ID# 27ZZ, PCGS# 87336

1901 Morgan Dollar, PR66 Cameo
Brilliant Fields and Frosty Devices

- 5396 1901 PR66 Cameo NGC.** This spectacular Premium Gem exhibits razor-sharp definition on all design elements, and the frosty devices contrast boldly with the deeply mirrored fields. The brilliant surfaces show no mentionable distractions, and eye appeal is tremendous. From a nominal proof mintage of 813 pieces. Census: 6 in 66 Cameo, 4 finer (3/16). NGC ID# 27ZZ, PCGS# 87336

1902 Dollar, PR64 Cameo
Boldly Contrasted Late-Date Rarity

- 5397 1902 PR64 Cameo PCGS.** Morgan dollar proofs struck from 1902 through 1904 are rarely found with cameo contrast, as an all-brilliant finish was used during that period. Consequently, the 1902 (777 specimens minted) is tied with the 1904 for the most challenging issue to locate with a Cameo designation in the entire Morgan dollar series. PCGS reports merely four 1902 Cameo submissions: one in PR64 Cameo, two in PR65 Cameo, and one in PR66 Cameo (2/16). This essentially untuned near-Gem proof exhibits blushes of gold color near the rims. Bold contrast between the mirrored fields and frosted devices makes this a prime rarity among late-date Morgan dollar proofs.
From The Pellegrini Collection, Part II. NGC ID# 2822, PCGS# 87337

1903 Dollar, PR66
Profoundly Mirrored

- 5398 1903 PR66 PCGS. CAC.** The final three issues of the regular proof Morgan dollar series come from the "brilliant era" of proof coinage. Low-contrast specimens are the rule rather than the exception. While the contrast of this Premium Gem proof dollar falls short of a Cameo designation, each side remains profoundly mirrored with pale golden overtones over brilliant surfaces and just a few specks of milky patina. From a mintage of 755 proofs. Population: 32 in 66 (3 in 66+), 11 finer (2/16).
Ex: Paul Taylor Collection of Proof Morgan Dollars / Chicago Signature (Heritage, 8/2011), lot 7378.
From The Pellegrini Collection, Part II. NGC ID# 2823, PCGS# 7338

1904 Morgan Dollar, PR66+
Subtle Contrast and Color

- 5399 1904 PR66+ PCGS. CAC.** Save for the rare Chapman proofs and the controversial Zerbe proofs of 1921, the 1904 is the final proof in the Morgan dollar series. This issue was struck during a period when low-contrast proof coinage was the rule of the day; Cameo examples are almost uncollectible — just a single piece is so-designated by PCGS. Instead, most collectors seek to acquire this issue in as high of a numeric grade as possible. This Plus-graded Premium Gem is near the top tier. Despite a bluish of deep lavender-gray and sea-green toning in portions of the margins, this gleaming, deeply mirrored proof offers a hint of field-device contrast, most obvious around the eagle but also discernable at Liberty's profile. There are no contact marks or bothersome hairlines. As is sometimes seen on this issue, there is a touch of softness on the eagle's breast and the hair above Liberty's ear. Population: 36 in 66 (2 in 66+), 5 finer (2/16). NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

- 5400 1921 MS64+ PCGS. CAC.** Original golden toning warms each side of this high-end Choice 1921 Peace dollar. Liberty's cheek is well-preserved, and the satiny fields deliver pleasing luminance. The obverse is well-defined for the High Relief type, although the central eagle's feathers on the reverse exhibit the usual high-point softness. A pleasing example of this one-year type. NGC ID# 2U4E, PCGS# 7356
- 5401 1921 MS65 PCGS.** Satiny champagne luster appears on each side of this Gem 1921 High Relief Peace dollar. There are no significant abrasions, although a few specks of russet toning are present. The eagle's wing is slightly weak above the leg, but the obverse portrait shows above-average central definition. NGC ID# 2U4E, PCGS# 7356
- 5402 1921 MS65 PCGS. CAC.** Frosty luster dominates both sides of this extremely attractive untuned Gem 1921 Peace silver dollar. Not only are the high points of both sides better-struck than normally seen on this strike-challenged issue, but the devices overall are largely free of bothersome contact points. NGC ID# 2U4E, PCGS# 7356
- 5403 1921 MS65 PCGS. CAC.** Finding a well-struck, attractive 1921 is one of the challenges of assembling a Peace dollar collection. This Gem example is aglow with golden-tinged luster and is free of distracting abrasions. The central strike is bold. Eye appeal is outstanding. Elusive with a CAC endorsement.
From The Paul H. Gerrie Collection. NGC ID# 2U4E, PCGS# 7356
- 5404 1921 MS65 PCGS. CAC.** The high relief of the design caused some softness to show on the central devices in almost all examples of this issue. This attractive Gem is typical in this regard, but it display especially vibrant mint luster and a few hints of golden-tan toning, with outstanding eye appeal. NGC ID# 2U4E, PCGS# 7356

5405 1921 MS65+ NGC. Satiny luster illuminates light golden toning over both sides of this high-end Gem High Relief Peace dollar. The extreme centers show the usual strike weakness, but the overall eye appeal is outstanding. This coin is devoid of significant abrasions. Finer examples are infrequently seen. NGC ID# 2U4E, PCGS# 7356

5406 1921 MS65+ PCGS. CAC. A high-end Gem example of this one-year High Relief type, showing frosty silver luster with olive and russet overtones speckled over the central regions. The central strike definition is above average, and there are no distracting abrasions. NGC ID# 2U4E, PCGS# 7356

5407 1922-D MS66 PCGS. CAC. The 1922-D is only the second silver dollar issue coined at the Denver Mint, and it is the first of the Peace series. This CAC-endorsed Premium Gem is among the finer-known examples, as PCGS has seen only three finer coins (2/16). The strike is pleasing, and the surfaces display satiny, brilliant luster. CAC: 62 in 66, 0 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 257D, PCGS# 7358

5408 1922-S MS65 PCGS. CAC. Well-struck and frosty with untuned luster and pleasing eye appeal. This Gem 1922-S Peace dollar is available in this grade, but finer pieces are rare. The budget-conscious collector will find this coin highly appealing. PCGS lists 10 finer examples (2/16).
From The Paul H. Gerrie Collection. NGC ID# 257E, PCGS# 7359

5409 1923 MS67 NGC. This highly lustrous Superb Gem exhibits frosty surfaces with dappled champagne and gold toning. An impressive piece that is tied for the finest certified. Census: 99 in 67, 0 finer (3/16). NGC ID# AMPA, PCGS# 7360

**1923 Peace Dollar, MS67 ★
Captivating Luster
Arguably the Finest at NGC**

5410 1923 MS67 ★ NGC. Potent, frost-white luster adorns the mint-fresh surfaces of this Superb Gem 1923 Peace dollar. This magnificent, never-dipped type coin is fully deserving of the Star designation. The strike is sharp, and the eye appeal is superb. In MS67, this available Philadelphia issue is among the most plentiful in the series, but finer coins are unknown. This piece is the only Star- or Plus-designated Superb Gem at NGC, arguably the finest at that service. Census: 101 in 67 (1 in 67 ★), 0 finer (3/16). NGC ID# AMPA, PCGS# 7360

5411 1923 Whisker Jaw, VAM-1A2, MS66+ PCGS. CAC. A Top 50 Variety. The late die state with a curious field displacement near the radial die crack between the LI in LIBERTY. Still, the "Whisker Jaw" feature is the most important. The slender diagonal break connects Liberty's jaw and upper neck. Lustrous and nicely struck with virtually immaculate preservation. The light golden-brown toning is more prevalent on the reverse. NGC ID# 76DS, PCGS# 133752 Base PCGS# 7360

**1923-D Peace Dollar, MS66
Only One Coin Finer**

5412 1923-D MS66 PCGS. CAC. A conditionally scarce Premium Gem example of this otherwise plentiful Denver Peace dollar issue. The strike is sharp, and the satiny surfaces display champagne-tinted luster. There are no major abrasions. Finer representatives are almost uncollectible. Population: 94 in 66 (3 in 66+), 1 finer; CAC: 23 in 66, 0 finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 257G, PCGS# 7361

**1923-S Peace Dollar, MS65
Conditionally Rare in Finer Grades**

5413 1923-S MS65 PCGS. 30th Anniversary Green Label Holder. This delicately toned Gem has frosty silver surfaces with brilliant luster. Splashes of gold and iridescent toning are mostly evident near the borders. The 1923-S is an important condition rarity that is scarce at this grade level and extremely rare any finer. According to the PCGS Price Guide, an MS66 will cost five times the price of an MS65. PCGS has only certified three finer examples (3/16). NGC ID# 257H, PCGS# 7362

5414 1924 MS66+ PCGS. CAC. Struck in large numbers, the 1924 Peace dollar becomes very scarce in grades above MS66. This high-end Premium Gem is sharply detailed throughout, with vibrant mint luster and well-preserved surfaces. PCGS has graded 33 numerically finer examples (2/16). NGC ID# 257J, PCGS# 7363

5415 1924 MS66+ PCGS. CAC. Hints of lavender-gray, sea-green, and amber toning visit the well-preserved surfaces of this high-end Premium Gem, with well-detailed design elements and vibrant mint luster underneath. PCGS has graded 32 numerically finer examples (3/16). NGC ID# 257J, PCGS# 7363

5416 1924 MS66+ PCGS. CAC. This Plus-graded Premium Gem displays well-preserved lustrous surfaces, with vibrant mint luster, under delicate shades of pale gold toning. The well-detailed design elements show just a touch of softness on Liberty's hair and the eagle's wing. PCGS has graded 32 numerically finer examples (3/16). NGC ID# 257J, PCGS# 7363

5417 1924 MS66+ PCGS. CAC. 30th Anniversary Green Label Holder. This high-end Premium Gem displays sharply detailed design elements and well-preserved surfaces, with vibrant mint luster and shades of attractive pale gold toning. PCGS has graded 32 numerically finer examples (3/16). NGC ID# 257J, PCGS# 7363

- 5418 1924-S MS64+ PCGS. CAC.** The 1924-S is a famously scarce issue in Gem condition. This high-end Choice example displays satiny, champagne-tinged luster with well-struck motifs. There are no individually mentionable abrasions.
From The Paul H. Gerrie Collection. NGC ID# 257K, PCGS# 7364

**1925 Peace Dollar, MS67
Only One Numerically Finer at PCGS**

- 5419 1925 MS67 PCGS.** A magnificent Superb Gem specimen of this popular type issue, with sharply detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces are mostly brilliant, with a few hints of golden-tan toning. Overall visual appeal is tremendous. PCGS has graded one numerically finer example (3/16). NGC ID# 257L, PCGS# 7365

- 5420 1925-S MS64+ PCGS.** Vibrant luster rolls over exceptional near-Gem surfaces on this pleasing 1925-S Peace dollar, illuminating faintly speckled russet and amber toning near the borders. Trivial softness is seen on the high points of the central devices. PCGS lists 41 finer examples (2/16). NGC ID# 257M, PCGS# 7366

- 5421 1925-S MS64+ PCGS. CAC.** The scarcity of the 1925-S Peace dollar in Gem condition gives this high-end Choice example ample appeal among budget-restricted collectors. Satiny luster shows subtle champagne color, while a few small marks on the high points of the devices limit the grade. PCGS lists 41 Gems finer (2/16). NGC ID# 257M, PCGS# 7366

- 5422 1926 MS66 PCGS.** This otherwise common date is elusive in MS66 and almost unknown finer. This Premium Gem displays well-struck design elements and softly frosted luster. Each side has a hint of pale champagne toning. None are numerically finer at PCGS (3/16). NGC ID# 257N, PCGS# 7367

- 5423 1926 MS66 PCGS. CAC.** Although only marginally scarce in MS66, this 1926 Peace dollar is nonetheless among the finest at PCGS (2/16). The strike is sharp, and radiant, frosty surfaces display light golden toning. A few tiny grazes on Liberty's portrait are all that limit the grade.
From The Paul H. Gerrie Collection. NGC ID# 257N, PCGS# 7367

- 5424 1926 MS66 PCGS. CAC.** An impressive Premium Gem, with sharply detailed design elements and well-preserved lustrous surfaces, under delicate shades of pale gold toning. PCGS has graded no coins in higher numeric grades (2/16). NGC ID# 257N, PCGS# 7367

- 5425 1926-D MS65+ PCGS. CAC.** A true high-end Gem example of this slightly better Denver issue, showing bold relief detail and incredibly vibrant, frosty mint luster that is devoid of toning. The obverse may have garnered a full Premium Gem grade were it not for a few minuscule ticks on the reverse eagle. Eye appeal is superb.
From The Paul H. Gerrie Collection. NGC ID# 257P, PCGS# 7368

- 5426 1926-D MS66 PCGS.** The 1926-D Peace dollar is scarce at the MS66 grade level, and the issue is a condition rarity any finer. This sharply detailed Premium Gem exhibits immaculate, lustrous surfaces with a few hints of golden-tan toning. PCGS has graded eight numerically finer examples (3/16). NGC ID# 257P, PCGS# 7368

- 5427 1926-S MS65 PCGS. CAC.** The 1926-S is scarce above MS65, out of reach for many collectors. This accessible Gem is boldly struck and displays beautifully radiant, frosty luster with a hint of champagne toning. Fewer than 100 MS65 coins have received the coveted CAC endorsement (2/16).
From The Paul H. Gerrie Collection. NGC ID# 257R, PCGS# 7369

- 5428 1927-D MS64 PCGS. CAC.** A better date, particularly scarce in Gem condition. This Choice 1927-D Peace dollar shows well-struck design elements and satiny luster. Both sides have medium golden toning and are free of significant abrasions.
From The Paul H. Gerrie Collection. NGC ID# 257T, PCGS# 7371

- 5429 1927-S MS64 PCGS.** A melange of pastel colors occupies the obverse of this near-Gem Peace dollar, intermingling cinnamon, silver, blue, and gold tints, while the reverse is silver-white with gold rim accents. Plentiful luster runs over both sides, although a few small marks show underneath the obverse patina, on Liberty's chin and nestled in her hair. NGC ID# 26J6, PCGS# 7372

- 5430 1927-S MS64 PCGS. CAC.** The 1927-S Peace dollar is a low-mintage issue that is seldom encountered in grades above the MS64 level. This attractive Choice example offers well-detailed design elements and lightly marked, lustrous surfaces. Housed in a green label holder. NGC ID# 26J6, PCGS# 7372

- 5431 1927-S MS64 PCGS. CAC.** A low-mintage date, struck to the extent of just 866,000 pieces. Only three other issues have mintage of less than 1 million coins, and all are scarce or conditionally scarce. This 1927-S Peace dollar displays bright, satiny luster and sharp design elements. Finer coins are infrequently seen.
From The Paul H. Gerrie Collection. NGC ID# 26J6, PCGS# 7372

**1927-S Peace Dollar, MS65
Popular Low-Mintage Issue**

- 5432 1927-S MS65 PCGS. CAC.** The 1927-S Peace dollar claims a low mintage of 866,000 pieces, making the issue very scarce at the MS65 grade level, and almost unobtainable any finer. This attractive Gem exhibits well-detailed design elements and vibrant mint luster, under shades of golden-tan toning, with a few hints of purple and russet. Population: 81 in 65 (3 in 65+), 2 finer (2/16). NGC ID# 26J6, PCGS# 7372

- 5433 1928 MS64 PCGS.** This Choice 1928 Peace dollar is frostier and more appealing than is typical of the issue, although the usual golden patina is still present. The strike is sharp, and only a few minor grazes are present. Elusive in finer grades. NGC ID# 257V, PCGS# 7373

- 5434 1928 MS64 PCGS. 30th Anniversary Green Label Holder.** An attractive Choice example of this low-mintage issue, with sharply detailed design elements and well-preserved surfaces throughout. Vibrant mint luster shines through delicate shades of golden-tan toning. NGC ID# 257V, PCGS# 7373

- 5435 1928 MS64+ PCGS.** Far finer than most 1928 Peace dollars, this MS64+ PCGS example boasts satin luster on well-struck surfaces showing no more than a glint of other color besides silver-white. Only a couple of out-of-the-way contact marks of little import appear to preclude a Gem grade. Note how sharp the high points of each side are. NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65
Uncommonly Appealing**

- 5436 1928 MS65 PCGS Secure. CAC.** A lustrous Gem example of the key Peace dollar issue, which boasts a small mintage of 360,649 pieces. This coin is well-struck and essentially brilliant — far more eye-appealing than the typical gold-toned example. There are no significant abrasions. PCGS has seen 17 finer submissions; CAC: 59 in 65, 4 finer (2/16).
From *The Paul H. Gerrie Collection*. NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65+
Classic Key-Date Peace Dollar**

- 5437 1928 MS65+ PCGS. CAC.** Although a few other Peace dollar issues are rarer in Gem condition, the 1928 is the classic key-date in the series, and enjoys great demand in all grades. This lovely Gem has satiny silver luster beneath delicate champagne toning. PCGS has only certified 18 finer examples (3/16). NGC ID# 257V, PCGS# 7373

- 5438 1928-S MS64+ PCGS. CAC.** The 1928-S is among the keys to the Peace dollar series in Gem condition. This CAC-endorsed, high-end MS64 example will appeal to a range of enthusiasts. Untoned surfaces yield well-preserved, satiny luster. The central high points are slightly soft in strike.
From *The Paul H. Gerrie Collection*. NGC ID# 257W, PCGS# 7374

- 5439 1928-S MS64+ PCGS. CAC.** Powder-blue, caramel-gold, and stone-gray endow the fields and devices. The borders exhibit glimpses of aquamarine. A lustrous and crisply struck near-Gem that boasts smooth surfaces and good eye appeal. NGC ID# 257W, PCGS# 7374

- 5440 1928-S MS64+ PCGS. CAC.** The 1928-S is a famous conditional rarity in the Peace dollar series. Gems are highly elusive, yet the present coin comes very close to that level. The cheek is unabraded, and thorough examination is required to locate the few unimportant marks. The satiny surfaces display rich stone-gray toning with glimpses of tan-brown near the rims. NGC ID# 257W, PCGS# 7374

- 5441 1934 MS66 PCGS.** A low-mintage issue, falling short of 1 million pieces. This Premium Gem example is finer than most survivors and is conditionally scarce so fine. Higher-grade pieces are extremely rare. PCGS lists only three Superb Gems finer (3/16). NGC ID# 257Y, PCGS# 7375

- 5442 1934 MS66 PCGS.** The 1934 is scarce in Premium Gem and virtually impossible to locate in a higher grade. Creamy surfaces are accented by pale gold toning in the fields, which complements the sharp strike and delightful cartwheel luster. PCGS has certified just three examples finer (3/16).
Ex: *FUN Signature Auction (Heritage, 1/2010)*, lot 3133. NGC ID# 257Y, PCGS# 7375

**1934 Peace Dollar, MS66+
Seemingly Flawless**

- 5443 1934 MS66+ PCGS. CAC.** This Plus-designated and CAC-endorsed Premium Gem is on the cusp of a higher technical assessment that would put it among an elite few. To the unaided eye, each side is seemingly flawless. Specks of golden patina near the borders enhance otherwise brilliant surfaces. Boldly struck design elements and the absence of even the tiniest flaw on Liberty's cheek make this MS66+ Peace dollar all the more compelling. PCGS reports three finer submissions (2/16). NGC ID# 257Y, PCGS# 7375

**1934-D Peace Dollar, MS65+
Mint-Fresh, Frosty Luster
Captivating Eye Appeal**

- 5444 1934-D MS65+ PCGS. CAC.** Luster on this brilliant, unabraded 1934-D Peace dollar is unbelievably radiant and frosty, showing a mint-fresh cartwheel effect that dazzles the eye. The strike is sharp, and grade-limiting imperfections are hardly noticeable. The eye appeal surpasses that of almost every other Gem-graded example we have seen. The 1934-D is only marginally scarce in MS65, but this piece is clearly high-end. Finer examples are scarce.
From *The Paul H. Gerrie Collection*. NGC ID# 257Y, PCGS# 7376

**1934-S Peace Dollar, MS64
Frosty Cartwheel Luster**

5445 1934-S MS64 PCGS. CAC. The 1934-S is the scarcest issue in the Peace dollar series in Mint State. Its mintage of a trifle more than 1 million coins is also among the lower production totals of the date and mintmark set. This Choice CAC-endorsed example displays frosty luster with a hint of light golden toning. Some minor strike softness on the central high points is not bothersome. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS64+
Series Key in Mint State**

5446 1934-S MS64+ PCGS. CAC. In Mint State, the 1934-S Peace dollar is the scarcest issue in the series and is often touted as a major key. This high-end near-Gem displays vibrant luster and essentially untuned surfaces. A few trivial grazes are all that prevent Gem classification. Slight strike weakness affects the central high points. Elusive in finer grades.
From The Paul H. Gerrie Collection. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS65
Few Known Finer**

5447 1934-S MS65 PCGS. An elusive Gem example of this Mint State key, showing champagne toning and softly frosted luster. A few trivial grazes are not out of line for the grade. The 1934-S is the scarcest issue in the series in Uncirculated condition, and coins grading finer than MS65 are rarely seen. PCGS lists 30 higher-grade submissions (3/16). NGC ID# 257Z, PCGS# 7377

**1934-S Dollar, Brilliant MS65
Elusive S-Mint Key Date**

5448 1934-S MS65 PCGS. While the 1928 is well-known for its low mintage, the 1934-S is widely regarded as a key to the series in high circulated condition through the upper levels of Mint State. A few middle-date issues prove somewhat more challenging in MS65 and higher, but that should not diminish the importance of this offering. Each side boasts bold design detail and frosty mint luster. Brilliant surfaces show minor marks peppered throughout. Rarely encountered finer. NGC ID# 257Z, PCGS# 7377

**1935 Peace Dollar, MS66
None Finer at PCGS**

5449 1935 MS66 PCGS. CAC. This Premium Gem 1935 Peace dollar is among the finest at PCGS (2/16). The strike is well-executed, and the frosty surfaces display light golden toning. This is the final Philadelphia issue in the series, and pieces grading finer than MS66 are extremely rare. Only 49 Premium Gems have been endorsed by CAC and none finer (2/16).
From The Paul H. Gerrie Collection. NGC ID# 2582, PCGS# 7378

5450 1935 MS66 PCGS. CAC. Razor-sharp definition is apparent in the usual trouble spots (like Liberty's hair and the leading edge of the eagle's wing) on this impressive Premium Gem. The well-preserved surfaces display vibrant mint luster, shining through attractive shades of pale gold toning. PCGS has graded no coins in higher numeric grades (3/16). NGC ID# 2582, PCGS# 7378

**1935 Peace Dollar, MS66+
Attractive Toning, Strong Detail**

5451 1935 MS66+ PCGS. The Peace dollar series concluded in 1935 with a P-mint production of 1.5 million coins. Examples typically come strongly struck with frosty luster, as seen here, but seldom do they appear as well-preserved as this Premium Gem. The obverse showcases largely brilliant interiors surrounded by crimson and gold shadings, while the reverse is completely toned in similar hues. There are 18 MS66+ submissions at PCGS and none finer (3/16). NGC ID# 2582, PCGS# 7378

5452 1935-S MS65 NGC. Four Rays below ONE. Sharply struck and lustrous with occasional blushes of delicate wheat-gold toning. Incidental marks are scattered. The rays near ONE are slightly die doubled, but the VAMworld.com photos are insufficient to confirm the present coin as VAM-5. NGC ID# 2583, PCGS# 7379

5453 1935-S MS65 NGC. Three rays below ONE. The design elements of this impressive Gem are sharply detailed throughout and the well-preserved surfaces radiate vibrant mint luster, under delicate shades of pale gold toning. NGC ID# 2583, PCGS# 7379

5454 1935-S MS65 PCGS. CAC. Shades of golden-brown and amber toning visit the well-preserved surfaces of this impressive Gem Peace dollar, with well-detailed design elements and satiny mint luster underneath. NGC ID# 2583, PCGS# 7379

5455 1935-S MS65 PCGS. CAC. This frosty Gem 1935-S Peace dollar delivers rich eye appeal with dusky champagne toning. The reverse has additional amber overtones in the margins. A sharp strike and impressively clean surfaces complete the visual impact. Finer coins are infrequently seen. NGC ID# 2583, PCGS# 7379

5456 1935-S MS65+ PCGS. CAC. Beguiling luster radiates from the near-pristine surfaces of this high-end Gem 1935-S Peace dollar, the final issue in the series and conditionally scarce any finer. This coin is well-struck, and a few trivial grazes are almost unnoticed by the mint-fresh, frost-white luster.
From The Paul H. Gerrie Collection. NGC ID# 2583, PCGS# 7379

**1935-S Peace Dollar, MS66
Conditionally Very Rare in Finer Grades**

5457 1935-S MS66 PCGS. Four Rays below ONE. The design elements of this delightful Premium Gem are sharply detailed and the well-preserved surfaces radiate vibrant mint luster, with a few highlights of golden-tan toning. Overall visual appeal is outstanding. The 1935-S Peace dollar is a prime condition rarity above MS66. PCGS has graded two numerically finer examples (3/16). NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

**1971 Ike Dollar, Patinated MS66+
Top-Grade Registry Coin**

5458 1971 MS66+ PCGS. Nearly 48 million Eisenhower dollars were manufactured in the series' introductory year. Only a small contingent, however, survive in this remarkable state of preservation. Blended blue, violet, rose, and golden patina blankets the surfaces, accounting for the excellent aesthetic quality. A strongly defined Premium Gem and a top-of-the-line Registry coin. Population: 67 in 66 (6 in 66+), 0 finer (3/16). NGC ID# 2584, PCGS# 7406

**1971-S Silver Ike Dollar, MS67+
Dazzling Registry Coin**

5459 1971-S Silver MS67+ PCGS. CAC. A Registry-grade example of this silver Eisenhower dollar issue. Only four other MS67 examples are Plus-graded at PCGS, and that service lists three MS68 coins finer (3/16). This piece displays a razor-sharp strike, showing feather definition on the eagle that clad coins seldom achieve. The silver-white surfaces are virtually flawless, and the corresponding eye appeal is superb. NGC ID# 2586, PCGS# 7408

**1972 Type One Dollar, MS66
Extremely Rare So Fine**

5460 1972 Type One MS66 PCGS. CAC. This MS66 Type One Ike dollar, the PCGS CoinFacts plate coin, represents merely the sixth time we have offered a comparable example since 1993, according to our Permanent Auction Archives. PCGS shows five Premium Gem grading events, likely including one or two resubmissions. Either way, the issue is extremely rare this fine. Each side features golden-orange color centrally with shades of pale blue around the edges. Minor marks on the portrait prevent an even higher grade. Population: 5 in 66, 0 finer (3/16). NGC ID# 2587, PCGS# 87409

5461 1972 Type Two, FS-901, MS65 PCGS. Indistinct and low relief Caribbean Islands on planet Earth confirm the rare Type Two reverse, one of three different hubs found on 1972 Ike dollars. This powder-blue and straw-gold Gem offers sweeping luster and is exceptionally free from post-strike contact. PCGS# 510592 Base PCGS# 97409

5462 1972 Type Three MS66 PCGS. This delightful Premium Gem exhibits sharply detailed design elements and vibrant mint luster under attractive shades of golden-brown and lavender toning. Eye appeal is outstanding. Population: 23 in 66, 0 finer (3/16). NGC ID# 2587, PCGS# 7409

1973 Dollar, MS66+ None Finer at PCGS

5463 1973 MS66+ PCGS. CAC. Jaime Hernandez of CoinFacts writes: "Despite its low mintage, the 1973 Eisenhower Dollar compares to other coins like the 1971-P, 1972-P and 1974-P in MS66 grade. There are probably less than 250 examples which survive in MS66 grade or higher for the 1973-P Eisenhower Dollar." Gold, lilac, and powder-blue tones give this high-end Premium Gem dollar tremendous eye appeal. Fully struck and void of major flaws. One of four MS66+ coins at PCGS with none finer (3/16). NGC ID# 258A, PCGS# 7412

5464 1973-D MS67 NGC. Dazzling, brilliant luster cartwheels around this high-end Registry coin, tied with two others as the finest at NGC (3/16). The strike is bold, and the surfaces are beautifully preserved. This issue was primarily released in Mint Sets, although the number of high-grade coins is nonetheless small. NGC ID# 258B, PCGS# 7413

1974 Eisenhower Dollar, MS66+ One Piece Finer at PCGS

5465 1974 MS66+ PCGS. CAC. 30th Anniversary Green Label Holder. One of fewer than a dozen pieces at PCGS with the Plus designation at the MS66 level, this Premium Gem 1974 Eisenhower dollar is sure to command the attention of Registry Set enthusiasts. Only minuscule marks (as always) on the cheek are revealed with a glass, while faded bronze hues appear amid strong satiny luster. CAC endorsed with excellent eye appeal. Population: 168 in 66 (8 in 66+), 1 finer (3/16). NGC ID# 258D, PCGS# 7415

1976 Bicentennial Ike Dollar Thin Letters, Type Two Superb Gem

5466 1976 Type Two MS67 PCGS. CAC. 30th Anniversary Green Label Holder. Slimmer lettering on the reverse legend identifies the Type Two design. The astronomical mintage of 113,318,000 reduces to a meager population of fewer than a dozen PCGS pieces at this Superb Gem grade, creating a modern-era rarity among Eisenhower dollars. Lovely lemon-gold shades blend with light-olive and peach-gold hues for outstanding eye appeal with CAC endorsement. Population: 11 in 67, 0 finer (3/16). NGC ID# B76M, PCGS# 7419

5467 1978 MS66+ PCGS. 30th Anniversary Green Label Holder. The impeccably preserved surfaces of this Plus-graded Premium Gem display subtle highlights of pale gold toning, with vibrant mint luster and sharply detailed design elements underneath. PCGS has graded five numerically finer examples (3/16). NGC ID# 258P, PCGS# 7425

5468 1978-D MS66+ PCGS. Light golden-brown fields and devices are framed by narrow peripheral bands of powder-blue and lavender. The portrait retains traces of the planchet surface, but actual marks are nearly undetectable. A beautiful and virtually unsurpassable final-year Denver Ike dollar. NGC ID# 258R, PCGS# 7426

PROOF EISENHOWER DOLLARS

5469 1971-S Silver PR70 Deep Cameo PCGS. Type Two Reverse, as usual. This Registry Set essential is one of only 52 Deep Cameo proofs in the finest possible grade at PCGS; none are so designated at NGC (2/16). This white-on-black eye-catcher boasts full detail and flawless mirroring. Eye appeal is superb. NGC ID# 258S, PCGS# 97428 Base PCGS# 999138

5470 1974-S Silver PR70 Deep Cameo PCGS. An eye-catching Registry coin, this 1974-S silver Eisenhower dollar is conditionally scarce in this perfect grade level. The strike is full, and the untuned surfaces display stark white-on-black contrast. Population: 53 in 70 Deep Cameo (3/16). NGC ID# 258V, PCGS# 97433 Base PCGS# 999138

SACAGAWEA DOLLAR

2000-P Sacagawea Dollar, MS67
Famous 'Cheerios' Prototype

- 5471** 2000-P Cheerios, FS-902, MS67 PCGS. Special "prototype reverse" Sacagawea dollars were distributed in boxes of cereal to promote the coin's circulation. Accompanying the dollar was a specially packaged 2000 Lincoln cent billed as "One of the 10,000,000 First-Minted Year 2000 Coins." That total might seem substantial, but it represents about three hours of combined production at the Philadelphia and Denver Mints. The two facilities struck 28 billion coins throughout the year. Both pieces are fully brilliant with lovely golden luster on the Superb Gem dollar and brilliant orange luster on the cent. (Total: 2 coins) NGC ID# 282J, PCGS# 147231 Base PCGS# 411990

MODERN ISSUES

- 5472** 1983-D Olympic Silver Dollar MS70 PCGS. This magnificent modern commemorative possesses terrific eye appeal to complement its perfect technical quality. The design elements are fully detailed and the lustrous surfaces show just the slightest trace of pale gold toning. Population: 9 in 70 (3/16). NGC ID# 28P6, PCGS# 9606
- 5473** 1984-D Olympic Silver Dollar MS70 PCGS. The 1983-PDS and 1984-PDS Olympic silver dollars are popular as the coins that helped — along with the 1982-DS George Washington commemorative silver half dollars — usher in a "modern era" for collectors. The 1984-D and -S circulation strike issues have the smallest mintage of the six (at 116,000 coins each) and they seldom appear in the perfect grade of this silvery, pristine example. It helps that the reverse design is strikingly beautiful. Population: 16 in 70 (3/16). NGC ID# 3348, PCGS# 9610

Cancelled Proof Olympic Die for
1996-D Rowing Silver Dollar

- 5474** 1996-P Rowing Silver Dollar Cancelled Proof Die. An obverse die used to strike the proof 1996-P Rowing silver dollar, part of the mammoth 1996 Atlanta Olympics commemorative program. Above the base of the die is serial number, P6-6644062. The die was "X" cancelled after 428 strikes on July 11, 1995, per the certificate of authenticity.

1997-W Jackie Robinson Gold Five Dollar
Scarce PCGS-Graded MS70

- 5475** 1997-W Jackie Robinson Gold Five Dollar MS70 PCGS. With a low distribution of 5,174 pieces, the Jackie Robinson gold five dollar is one of the biggest keys to the modern commemorative series. The issue ranks at the number five spot in Schechter and Garrett's *100 Greatest U.S. Modern Coins*, with only the 1995-W Silver Eagle, 1968 No S proof dime, 2000 Washington quarter/Sacagawea dollar mule, and 1969-S doubled die cent surpassing it in importance. This piece is perfectly preserved and comparably well-struck. Population: 62 in 70 (2/16). NGC ID# 28UG, PCGS# 9759 Base PCGS# 9759

- 5476** 2000-W Library of Congress Bimetallic Ten Dollar MS70 PCGS. A West Point Mint issue commemorating the Library of Congress. The business strike variant had a small 7,261-coin distribution. This perfectly preserved example displays full detail and rich luster. NGC ID# 26U9, PCGS# 9784

- 5477** 2014-W Baseball Hall of Fame Gold Five Dollar, Class of '36, Early Releases, PR70 Ultra Cameo NGC. This quintet of gold five dollar pieces honors an amazing line-up: Ty Cobb, Walter Johnson, Christy Mathewson, Babe Ruth, and J. Honus Wagner. It doesn't get much better than that for the collector who enjoys baseball and numismatics. Each piece is a perfect yellow-gold example with impressive contrast. (Total: 5 coins) NGC ID# AXP2, PCGS# 525860 Base PCGS# 525644

MODERN BULLION COINS

- 5478** 1986 Quarter-Ounce Gold Eagle MS70 NGC. This piece represents the first year of the American Eagle bullion program, taking its design from the early 20th century Saint-Gaudens double eagle. This satiny Superb Gem exhibits perfect surfaces and brilliant light yellow luster. NGC ID# 26M2, PCGS# 9804
- 5479** 1986 Half-Ounce Gold Eagle MS70 NGC. This first-year American Eagle half-ounce gold piece is a flawless and perfect beauty. Both sides are sharply defined with brilliant yellow surfaces and satin luster. NGC ID# 28Y8, PCGS# 9805
- 5480** 1986 Half-Ounce Gold Eagle MS70 PCGS. A technically perfect example of this popular modern bullion issue, modeled after Saint-Gaudens iconic design. The design elements are fully struck and the impeccably preserved orange-gold surfaces radiate satiny mint luster. Population: 63 in 70 (3/16). NGC ID# 28Y8, PCGS# 9805
- 5481** 1987 Tenth-Ounce Gold Eagle MS70 PCGS. A mere 20 perfect Mint State examples of this issue are certified by PCGS (3/16). This brilliant Superb Gem combines soft, frosty mint luster with lovely lemon-yellow surfaces. NGC ID# 26KW, PCGS# 9810
- 5482** 1989 Tenth-Ounce Gold Eagle MS70 NGC. This diminutive American Eagle gold piece defines perfection with its brilliant light yellow surfaces and satin luster. A hint of lemon-yellow toning appears on the reverse. NGC ID# 26KY, PCGS# 9828

**1990 Silver Eagle, MS70
Infrequently Seen So Fine**

- 5483 1990 Silver Eagle MS70 NGC.** Few 1990 Silver Eagles are certified in perfect MS70 at NGC, and PCGS has seen only one coin in this grade (3/16). This piece is fully struck and flawlessly preserved with brilliant, frosty mint luster. Registry collectors have tremendous need for top-grade Silver eagles, although many investors also seek to put away such coins. NGC ID# 26JC, PCGS# 9836

- 5484 1990 Tenth-Ounce Gold Eagle MS70 NGC.** Compared to most other issues, the 1990 tenth-ounce American Eagle gold piece has a low NGC population with just 71 coins reaching perfection (3/16). Only the 1998 tenth-ounce has a lower population total. This perfectly brilliant example displays gorgeous yellow-gold surfaces and satin luster. NGC ID# 26KZ, PCGS# 9838

- 5485 1991 Tenth-Ounce Gold Eagle MS70 PCGS.** The 1991 tenth-ounce Gold Eagle was the final issue with a Roman Numeral date. This remarkable piece is one of just 53 examples that have achieved the perfect MS70 grade at PCGS (3/16). The strike is tack-sharp, and the surfaces display bright yellow-gold luster. Outstanding eye appeal. NGC ID# 26L2, PCGS# 9848

- 5486 1991 Tenth-Ounce Gold Eagle MS70 PCGS.** A satiny Superb Gem, this perfect tenth-ounce American Eagle gold piece features brilliant light yellow surfaces with outstanding eye appeal. Population: 53 in 70 (3/16). NGC ID# 26L2, PCGS# 9848

- 5487 1991 Tenth-Ounce Gold Eagle MS70 NGC.** The final appearance of the Roman Numeral date on these pieces occurred in 1991. This superlative piece earned a perfect MS70 grade from NGC. The flawless surfaces feature satiny yellow luster. NGC ID# 26L2, PCGS# 9848

1992 Half-Ounce Gold Eagle, MS70

- 5488 1992 Half-Ounce Gold Eagle MS70 NGC.** A half-ounce of pure golden perfection, this MS70 NGC-certified American Gold Eagle is among 92 such at that service (2/16). The caramel-gold surfaces offer intense eye appeal. This low-mintage date saw a production of only 54,404 pieces, according to the *Guide Book* figure. NGC ID# 26ND, PCGS# 9862

1992 Half-Ounce Gold Eagle, MS70

- 5489 1992 Half-Ounce Gold Eagle MS70 NGC.** The 1992 American Gold Eagles in their varying denominations were the first to carry traditional dating rather than Roman numerals, and the quarter-ounce and half-ounce gold pieces are also among the lower-mintage issues from near the series' inception. This half-ounce piece boasts the expectedly desired pristine appearance. The mintage was 54,404 coins. Census: 92 in 70 (2/16). NGC ID# 26ND, PCGS# 9862

**1993 Quarter-Ounce Gold Eagle, MS70
Only 12 So Fine at PCGS**

- 5490 1993 Quarter-Ounce Gold Eagle MS70 PCGS.** The 1993 quarter-ounce gold eagle is something of a condition rarity for the Registry Set collector. Coins are abundant in MS69 but rarely seen in MS70. PCGS has certified only 12 pieces in this finest-possible grade. The present example displays a sharp strike and vibrant yellow-gold luster. NGC ID# 26M9, PCGS# 9870

**1993-P Half-Ounce Gold Eagle
PR70 Ultra Cameo**

- 5491 1993-P Half-Ounce Gold Eagle PR70 Ultra Cameo NGC.** The proof 1993-P half-ounce gold eagle is the final proof issue from the Philadelphia Mint before the West Point facility took over proof bullion coinage in 1994. This is an elusive piece in perfect PR70 Ultra Cameo condition. The strike is full, and the field-device contrast is eye-catching. NGC ID# 28YF, PCGS# 9873

**1995-W Silver Eagle, PR69 Deep Cameo
Few Finer at PCGS**

- 5492 1995-W Silver Eagle PR69 Deep Cameo PCGS.** The 1995-W proof silver one-ounce American Eagle did not sell heavily on release, but it has emerged as the key to its series and now enjoys high demand. This gleaming specimen, one of just 30,125 pieces sold, is practically perfect with absolute contrast and virtually no evidence of spotting.
Ex: *New York Signature* (Heritage, 3/2012), lot 3870. NGC ID# CFWX, PCGS# 9887

- 5493 1995 Tenth-Ounce Gold Eagle MS70 PCGS.** Only a few 1995 tenth-ounce gold eagles have reached perfection according to the PCGS definition. This amazing piece has brilliant light yellow surfaces and satin luster. Population: 14 in 70 (3/16). NGC ID# 26L6, PCGS# 9888

**1995-W 10th Anniversary Set Proof Bullion Coins
Includes the Key 1995-W Silver Eagle**

- 5494 1995-W 10th Anniversary Set Proof Bullion Coins, Uncertified.** The five-coin set includes the 1995-W one-ounce, half-ounce, quarter-ounce, and tenth-ounce Gold Eagle bullion coins, and the 1995-W Silver Eagle, which was only available with the set. Only 30,125 sets were sold, making the 1995-W the low-mintage key to the Silver Eagle series. The official box, case, and certificate of authenticity are included with the lot. PCGS# 100109 Base PCGS# 9894

- 5495 Four-Piece 1995-W Gold Eagle Proof Set PR70 Ultra Cameo NGC.** The set includes the tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50. Each coin is separately yet identically certified as the highest obtainable grade. The four pieces are intricately struck and pristine with outstanding contrast between the glassy fields and radiant motifs. (Total: 4 coins) NGC ID# 28Z7, PCGS# 9895

**1996 Silver Eagle, MS70
Key Bullion-Strike Issue**

- 5496 1996 Silver Eagle MS70 NGC.** The 1996 Philadelphia bullion-strike American Silver Eagles had the lowest mintage of the entire series — a tad more than 3.6 million coins — and top-graded examples such as this piece are in demand among the many collectors of this popular series. The surfaces are virtually pristine throughout both sides and show no trace of toning. NGC ID# 26JR, PCGS# 9900

- 5497 1997 Half-Ounce Platinum Eagle MS70 NGC.** The Mint struck 20,500 half-ounce Platinum Eagles in 1997, but pieces in perfect MS70 condition are rare. This example displays sharp detail and bold contrast. Eye appeal is superb. Census: 36 in 70 (2/16). NGC ID# 26TC, PCGS# 99752

- 5498 1999-W Tenth-Ounce Gold Eagle, FS-401, Unfinished Proof Dies, MS70 NGC.** Struck from a die pair intended for use in producing proofs at the West Point Mint, this regular issue 1999-W tenth-ounce gold eagle is a sought-after variety in the series. Perfectly preserved examples such as this are elusive. NGC ID# 26LB, PCGS# 99940

- 5499 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, MS70 NGC.** This popular variety was struck from a pair of dies intended for proof strikes. Perfectly preserved with brilliant yellow surfaces that exhibit satin luster. NGC ID# 26LB, PCGS# 99940

**1999-W Tenth-Ounce Gold Eagle, MS70
FS-401, Unfinished Proof Dies**

- 5500 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, MS70 PCGS. FS-401.** The West Point Mintmark typically denotes a proof issue of the 1999 tenth-ounce Gold Eagle, although the present piece is of a variety that was struck with unfinished dies in the regular format. The strike is razor-sharp, and the satiny surfaces display lovely golden luster. PCGS has seen only 44 submissions in this perfect MS70 grade (3/16). NGC ID# 26LB, PCGS# 99940

- 5501 1999 Quarter-Ounce Gold Eagle MS70 PCGS.** Only 24 1999 quarter-ounce Gold Eagles have achieved the perfect MS70 grade at PCGS (2/16). This magnificent piece is fully struck and has mint-fresh eye appeal. The Registry Set enthusiast will want to bid appropriately. NGC ID# 26MG, PCGS# 9941

- 5502 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS68 PCGS.** Deep yellow-gold surfaces display satiny luster and gold detail on this near-perfect 1999-W quarter-ounce Gold Eagle, struck from unfinished West Point proof dies. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

5503 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS68 PCGS. Satiny surfaces yield mint-fresh yellow-gold luster over bold relief detail. The 1999-W quarter-ounce Gold Eagle struck from unfinished proof dies is highly sought-after. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

5504 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS68 PCGS. Intricately detailed with glowing yellow-gold luster and nearly pristine surfaces. This FS-401 1999-W Gold Eagle is among a small number of pieces struck with unfinished proof dies. Examples are widely collected in high grade. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

5505 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS68 PCGS. This *Cherry-pickers'* variety is a regular-issue 1999 quarter-ounce Gold Eagle struck with unfinished West Point proof dies. The W mintmark and satin surfaces are the obvious characteristics. This piece is well-preserved and boldly struck. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

5506 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS68 PCGS. An unfinished West Point proof die pair was used to strike a number of regular-issue quarter-ounce Gold Eagles in 1999, these pieces bearing the W mintmark. The present coin is well-preserved with mint-fresh luster. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

2000 Silver Eagle, MS70 Perfectly Preserved

5507 2000 Silver Eagle MS70 NGC. A hint of light golden toning warms the extreme outer periphery of this perfectly preserved 2000 Silver Eagle, although the interiors are brilliant and frosty. Full design definition completes the eye appeal. Proof Silver Eagles of this year were struck in Philadelphia and the regular issue, here represented, was produced at West Point. In 2001, the New York branch mint would assume responsibility for both issues. Ex: FUN Signature (Heritage, 1/2016), lot 3472, brought \$3,525. NGC ID# 26JZ, PCGS# 9949

5508 2001 Half-Ounce Gold Eagle MS70 PCGS. A brightly lustrous, fully struck, and impeccably preserved example of this better date, from an Uncirculated mintage of 48,047 pieces. The fantastic eye appeal matches the technical perfection. Population: 42 in 70 (3/16). NGC ID# 26SV, PCGS# 9957

5509 2002 Half-Ounce Gold Eagle MS70 PCGS. This example is one of only 28 submissions that PCGS has graded MS70 (3/16). A flawless beauty, this piece exhibits satiny yellow surfaces with brilliant mint luster. NGC ID# 26NN, PCGS# 9962

5510 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 PCGS. A magnificent, perfectly preserved example of this popular 20th Anniversary reverse proof 2006-W one-ounce Gold Eagle. There is a tinge of amber toning in the right obverse margin, but the remainder of each side displays lovely golden luster. NGC ID# 28ZH, PCGS# 89994

5511 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 PCGS. The 2006-W Reverse Proof one-ounce Gold Eagle celebrated the 20th anniversary of the bullion coin program. This piece is beautifully rendered and perfectly preserved. Eye appeal is outstanding. NGC ID# 28ZH, PCGS# 89994

5512 2006-W One-Ounce Gold Reverse Proof, 20th Anniversary, First Strike, PR70 PCGS. The 20th Anniversary Reverse Proof 2006-W Gold Eagle had a limited mintage of 9,996 pieces. This is a First Strike example in perfect PR70 condition. The design is fully impressed, and the mirrorlike devices show stark contrast with the frosty golden fields. NGC ID# 28ZH, PCGS# 89995 Base PCGS# 89994

2008-W One-Ounce Buffalo, MS70 Burnished Format

5513 2008-W One-Ounce Gold Buffalo, Fraser Signature, MS70 PCGS. One ounce of pure golden — and pure gold — perfection, this is an example of the burnished variety of 2008-W Buffalo fifty dollar coin, struck at West Point. The 2008-W fifty dollar gold coins are doubly popular as the capstones to the set of fractional five, ten, and twenty-five dollar gold coins also struck during the year. PCGS# 91019 Base PCGS# 400037

5514 2008-W Four-Piece Denomination Gold Buffalo Proof Set, Early Releases, PR70 Ultra Cameo NGC. The set includes: the tenth-ounce, quarter-ounce, half-ounce, and one-ounce proof Gold Buffalos. Housed in individual Early Releases holders. An eye-catching presentation. (Total: 4 coins)

5515 2008-W Half-Ounce Platinum Eagle PR70 Deep Cameo PCGS. The 2008-W is the final issue in the half-ounce Platinum Eagle proof series. Only 4,020 pieces were struck. This coin is perfectly preserved and displays flawless white-on-black contrast. NGC ID# 26TX, PCGS# 393090

2009 One-Ounce Ultra High Relief Twenty, MS70

5516 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. The United States Mint has produced a number of beautiful and interesting issues as part of its bullion coin program, although the 2009 Ultra High Relief twenty dollar piece is arguably the most impressive. This example is fully struck and semiprooflike with flawless preservation. A loupe reveals some faint die polishing lines in the fields. NGC ID# 26S4, PCGS# 407404

**2009 Ultra High Relief Twenty Dollar
One-Ounce Gold, MS69 Deep Prooflike**

- 5517** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Deep Prooflike NGC. Tens of thousands of MMIX Ultra High Relief double eagles have been submitted to the leading grading services, but only 32 examples have been awarded a Deep Prooflike designation from NGC. This practically flawless one-ounce double eagle boasts rich yellow-gold surfaces that display marked contrast between the reflective fields and Ultra High Relief motifs. A great example of Augustus Saint-Gaudens' masterful design as it was originally intended. NGC ID# 26S4, PCGS# 506602

**2009 Twenty, MS70 Deep Prooflike
One-Ounce Gold, Ultra High Relief**

- 5518** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Deep Prooflike NGC. A technically perfect example of this popular modern issue. Struck on a 27 mm planchet, with twice the thickness of a standard one-ounce American Gold Eagle, the issue was modeled after the extremely rare gold patterns, Judd-1917, in the Smithsonian Institution. The design elements are fully struck and the impeccably preserved surfaces are deeply reflective throughout. NGC ID# 26S4, PCGS# 506602

**2009 One-Ounce Gold Twenty Dollar
Ultra High Relief, MS70 Prooflike**

- 5519** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. It took more than 100 years, but Augustus Saint-Gaudens' Ultra High Relief double eagle design was finally implemented for mass production in 2009. The one-ounce gold coins' design differs only in that four stars were added to represent all 50 states, and IN GOD WE TRUST was added above the sun. The date, of course, is also different. This pristine example is fully struck with attractive, rich yellow-gold surfaces. Boldly contrasted with universal appeal. NGC ID# 26S4, PCGS# 506602

**2009 Ultra High Relief Twenty
One-Ounce, MS70 Prooflike**

- 5520** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC. The prooflike mirroring of the fields on this 2009 Ultra High Relief bullion-issue double eagle adds to the immense eye appeal that the magnificent design delivers. The strike is full, and the preservation is flawless, as the MS70 Prooflike grade indicates. Top-grade examples of this popular issue are always in demand. NGC ID# 26S4, PCGS# 506602

**2009 One-Ounce Ultra High Relief Twenty
MS70 Prooflike**

- 5521** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. The 2009 one-ounce gold Ultra High Relief bullion coin was something of bragging-rights issue for the Mint, showcasing the ability of modern presses to coin the Ultra High Relief version of Saint-Gaudens original 1907 double eagle design that was impossible for the early 20th century Mint to efficiently mass-produce. The 2009 issue was immediately popular, and examples remain high on many collectors' want lists. This piece is among the finest known and showcases prooflike mirroring in the fields. NGC ID# 26S4, PCGS# 506602

**2009 One-Ounce Double Eagle
Modern Ultra High Relief Relic
MS70 Prooflike**

- 5522** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. This in-demand modern bullion issue had a recorded mintage of nearly 115,000 pieces, although finding a coin on the secondary market after they were sold out by the Mint was almost impossible. Even today, examples are in high demand. This piece displays prooflike fields and flawless preservation. Prior to the production of this issue, only a handful of extremely wealthy collectors would ever have been able to own a coin showcasing the Ultra High Relief version of Saint-Gaudens double eagle design. NGC ID# 26S4, PCGS# 506602

2009 One-Ounce Ultra High Relief Twenty MS70 Prooflike

5523 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. The 2009 Ultra High Relief one-ounce double eagle was modeled after the Judd-1917 1907 pattern, which featured the regular Ultra High Relief double eagle design on a smaller, eagle-diameter planchet that was twice as thick to accommodate the weight of a double eagle. The pattern was struck to test a theory that the Saint-Gaudens design could be more easily produced on a smaller, thicker planchet than the standard flan. This example of the 2009 “reproduction” shows prooflike fields and full design definition. NGC ID# 26S4, PCGS# 506602

5524 2015-W High Relief One-Ounce Gold, First Strike, MS70 PCGS. This modern interpretation of the Liberty design set a new high-water mark for artistry (rather than mimicry) among recent coinage issues, as well as becoming America’s first one hundred dollar gold coin of the modern era, weighing exactly one ounce of .9999 fine gold — essentially pure. This pristine yellow-gold example is certified in a PCGS First Strike holder. PCGS# 545533 Base PCGS# 545532

COINS OF HAWAII

5525 1847 Hawaii Cent MS62 Brown NGC. M. 2CC-5. Plain 4, 13 berries. A sharply struck medium brown example with mahogany-red and olive-green undertones. Satiny and unblemished with pleasing surfaces. Scarce in the present quality. NGC ID# 2C52, PCGS# 10965

5526 1847 Hawaii Cent MS62 Brown NGC. M. 2CC-2. Crosslet 4, 15 berries. Glimmers of the initial Red color linger in protected regions, although this unmarked Hawaiian cent is predominantly olive-brown. The strike is good, although incomplete at the top of the wreath and the bottom of the portrait. NGC ID# 2C52, PCGS# 10965

5527 1847 Hawaii Cent MS62 Red and Brown NGC. M. 2CC-2. Crosslet 4, 7x8 berries. The 1847 Kamehameha copper cents were ordered by the Hawaiian government, with James Jackson Jarves acting as agent, from the Attleboro, Massachusetts firm H. M. & E. I. Richards. The original red surfaces of this attractive MS62 specimen have mellowed to light brown and crimson in most areas, with a scattering of minor contact marks and traces of underlying mint luster. NGC ID# 2C52, PCGS# 10966

5528 1883 Hawaii Ten Cents MS63 PCGS. Peach-gold centers are bounded by peripheral apple-green patina. Fully struck and lustrous with outstanding eye appeal for the conservatively assessed grade. Coined sans mintmark at the San Francisco Mint. Certified in a first generation holder. NGC ID# 2C54, PCGS# 10979

5529 1883 Hawaii Half Dollar MS63 PCGS. Almond-gold patina adorns this lustrous and suitably struck Select representative. No marks are noticeable, and the eye appeal is superior for the MS63 level. Encapsulated in a green label holder. NGC ID# 2C5B, PCGS# 10991

5530 1883 Hawaii Half Dollar MS64 NGC. The 1883 Hawaii half dollars feature the portrait of King Kalakaua I on the obverse and the shield from the Hawaiian coat of arms on the reverse, from a design by Charles Barber. They were struck on regular planchet stock at the San Francisco Mint. This sharply detailed Choice example offers vibrant, satiny mint luster, under vivid shades of lavender-gray and golden-brown toning. Census: 36 in 64 (2 in 64+), 9 finer (2/16). NGC ID# 2C5B, PCGS# 10991

**1883 Hawaii Half Dollar, MS64
Rarely Seen Finer**

5531 1883 Hawaii Half Dollar MS64 PCGS. CAC. An elusive Choice Mint State example of the 1883 Hawaii half dollar, showing sharp detail on the devices and dusky lavender-gray and gold toning over satiny luster. There are no significant abrasions. The half dollar had the highest mintage of the Hawaii issues at 700,000 pieces, but most were melted after Hawaii became a U.S. territory in 1900. Population: 70 in 64 (4 in 64+), 17 finer (3/16). NGC ID# 2C5B, PCGS# 10991

5532 1883 Hawaii Dollar AU53 PCGS. CAC. This scarce single-year crown-sized Hawaiian dollar shows a trace of high-point wear on the well-detailed design elements, and the lightly abraded surfaces display shades of greenish-gold toning. Original and eye-appealing with much luster remaining. NGC ID# 2TGD, PCGS# 10995

5533 1883 Hawaii Dollar AU55 NGC. A lightly circulated example of the sought-after Hawaiian silver dollar, designed by Charles Barber and struck at the San Francisco Mint. Original golden-gray toning blankets each side, with deeper coppery accents in the protected regions of the fields. NGC ID# 2TGD, PCGS# 10995

**1883 Hawaii Dollar, MS62
Attractive for the Grade, Old Holder**

5534 1883 Hawaii Dollar MS62 NGC. The San Francisco Mint struck 500,000 silver dollars for Hawaii in 1883, bearing designs by Charles Barber. Seven years later, Hawaii became a U.S. territory, and most of these coins were eventually melted. Here is a pleasing lower-end Mint State example with satiny luster and light golden toning that deepens to amber-red near the borders. The strike is sharp. Any grade-limiting abrasions are minor and little-noticed beneath the attractive toning. Housed in a prior generation holder. Census: 9 in 62 (1 in 62+), 50 finer (3/16). NGC ID# 2TGD, PCGS# 10995

Circa-1860 Waterhouse Token, XF40
Honolulu, Hawaii, M. 2TE-1

- 5535** (1860) Waterhouse Token XF40 PCGS. M. 2TE-1. Believed to be the first token issued in Hawaii, the John T. Waterhouse Honolulu store card was struck in a soft pewter alloy. Most examples show indistinct details on the face of King Kamehameha, although the eyes and curls are clear on the present piece. The gunmetal-gray surfaces are lightly abraded except near the E in IMPORTER. Listed on page 414 of the 2016 *Guide Book*. Population: 5 in 40, 21 finer (3/16). NGC ID# 2UBK, PCGS# 600500

1871 Wailuku Plantation Token, XF40
12 1/2 Cents, Medcalf 2TE-2

- 5536** 1871 Wailuku Plantation, 12 1/2 Cents, Narrow Starfish, XF40 PCGS. M. 2TE-2. The Wailuku Sugar Company was controlled by American businessmen. Tokens were struck on site by blacksmiths, and paid out to plantation workers. They could be redeemed at local stores. This chocolate-brown example is unabraded and lightly granular. The strike shows softness on the denomination and the stars west of the starfish. Listed on page 414 of the 2016 *Guide Book*. NGC ID# 2UBL, PCGS# 600503

Wailuku Plantation 6 1/4 Cent Token, AU50
Narrow Starfish, Medcalf 2TE-4

- 5537** (1871) Wailuku Plantation 6 1/4 Cent, Narrow Starfish, AU50 PCGS. M. 2TE-4. The 6 1/4 cent or half real Wailuku Plantation token was both a worker chit and a convenience to company officers, since Mexican silver, the de facto coin of the realm, was in short supply. The pieces were made on location by blacksmiths, which explains the uneven strike seen on most examples. The present walnut-brown piece is void of marks and has seen little actual circulation, since the planchet texture is apparent across the high points. Listed on page 414 of the 2016 *Guide Book*. NGC ID# 2UBM, PCGS# 600506

1879 T.H. Hobron 12 1/2 Cents, VF25
Hawaii Railroad Token, Medcalf 2TE-8a
Rare Thick Planchet Variety

- 5538** 1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, 6/2 Stars, Thick Planchet, VF25 PCGS. Medcalf 2TE-8a. In 1879, Captain Thomas H. Hobron completed a narrow gauge railroad line from Kahului to the sugar cane plantations of Maui. An evenly struck and microgranular walnut-brown example. A thin mark is noted on the left reverse border. The rarer 2 mm thick variant of M. 2TE-8. The thick and thin varieties were struck from two pairs of dies. One has a large star 5 (3 o'clock on the date side) while the other has a small star at that location. Other minor differences exist. Listed on page 414 of the 2016 *Guide Book*. PCGS# 515876 Base PCGS# 600515

- 5539** 1882 Haiku Plantation One Rial Token AU55 PCGS. M. TE-15. The aesthetically attractive 1882 Haiku token was distributed to workers, in lieu of a day's wages, by the Haiku Sugar Company. Their plantation was situated east of Wailuku, Maui. This lightly circulated walnut-brown example is unblemished and retains hints of the planchet texture near the date. Listed on page 414 of the 2016 *Guide Book*. NGC ID# 2UBZ, PCGS# 600518

1886 Grove Ranch Plantation Token, AU53
Rare in Any Grade, Medcalf TE-16

- 5540** 1886 Grove Ranch Plantation 12 1/2 Cent Token AU53 PCGS. Medcalf TE-16. Seldom does a Grove Ranch Plantation token appear in so fine a grade. This piece is not only one of the CoinFacts online plate coins, it is also one of only two in this grade at PCGS with four finer (3/16). The surfaces are glossy burgundy-red and show little circulation wear and minimal contact, but a loupe reveals some light verdigris scattered about, not too overt. The Grove Ranch Plantation produced 12-1/2 cent tokens in both 1886 and 1887, of similar style but struck from different dies. The other AU53 example that we know of sold as lot 12171 in the ANA Philadelphia sale (Stack's, 8/2012) for \$8,813. Both examples show the same light die line from the top loop of the large central 2. An overall pleasing example of this rare Hawaii token. Listed on page 414 of the 2016 *Guide Book*. PCGS# 600521

WORLD

1906 Philippines Peso, PR66 U.S.A. Administration Issue

- 5541** 1906 Philippines Peso PR66 PCGS. KM-168. Struck for the Philippines (under U.S. sovereignty) at the Philadelphia Mint, the 1906 peso was a proof-only issue with 500 pieces produced. Circulation strike pesos were minted in San Francisco. The dollar-sized coin in proof format is seldom available in Premium Gem condition, especially with the eye appeal and attractive variegated toning of this nicely mirrored example. Shades of gunmetal-blue, amber-gold, and rose-red gleam across the reflective fields that surround razor-sharp, lightly frosted raised motifs. Housed in a green label holder. Listed on page 418 of the 2016 *Guide Book*. Population: 8 in 66, 15 finer (3/16).

Saudi Arabia 4 Pounds, KM-34, MS61 Struck at Philadelphia Mint

- 5542** (1945-1946) Saudi Arabia, Abd al-Aziz bin Sa'ud, Gold 4 Pounds MS61 NGC. KM-34. Struck at the Philadelphia Mint to exchange for Saudi oil rights. Per the reverse inscription, contains a net gold weight of 452 grains, equivalent to four British sovereigns. One of the few gold coin issues struck by the U.S. Mint during the era when private gold ownership was illegal. The broad open fields exhibit moderate marks.

INGOTS

1956 San Francisco Silver Ingot 20.91 Ounces, Dated Round Hallmark

- 5543** 1956 San Francisco Silver Ingot. 20.91 Ounces. This larger-size San Francisco ingot bears the 1956 Dated Round Hallmark. The 20-ounce ingots were one of the default sizes produced by the mint, along with 5-ounce and 100-ounce sizes. The dated hallmark ingots were produced at the same time as undated ones, but no serial numbers have been found that conflict between the two types. The hallmark is well-placed in the top center of the top side of the ingot, followed by the ingot number: 1007 / 20.91 OZS / 999.75 FINE. Lot numbers 164 and 249 (seen here on the short bottom side) account for most of the known 20-ounce ingots from this year. Only 37 of the 20-ounce class ingots have been traced in auction appearances beginning in 1980. The surfaces show original, medium gray patina, definitely uncleaned. The top side has a number of production irregularities. The back side is much smoother, but there are several shallow indents. The ingot measures 58 x 89 x 10 mm.

San Francisco Sheared Plate Silver Ingot
Larger-Size, 26.00 Ounces

5544 San Francisco Sheared Plate Silver Ingot. 26.00 ounces. Sheared plate ingots were produced by the Mint from the early to mid-1950s. The complete story has yet to be told about this special class of ingots. What we do know is they were cut from a larger plate of silver to the final size. The earliest ingot number that we know for certain is #1 and it is dated to 1952 (from our Alan Bingel Collection in September 2005). Our guesstimate places the production of this ingot (#1633) around late-1954 or early-1955. These large plates were struck with a Type II oval hallmark on the top side, and an oversized Type II hallmark on the back. The hallmark on the back was punched into the silver prior to being sheared into smaller finished ingots. Some sheared plate ingots have no reverse hallmark, most have a partial one (as seen here), and only two are known with a complete large-size hallmark.

Specialist Ken Conaway has only seen 30 sheared plate ingots in person and listed in various auctions, dating back to 1980. This is the only one with a precise, even weight — undoubtedly a one-in-a-hundred chance rather than anything intentional on the Mint's part.

The squareness of the four sides is more true than usually seen. The obverse hallmark, serial number, secondary number 63, weight, and fineness are exceptionally well-struck. The reverse hallmark is also solidly struck. The surfaces are uncleaned and show light gray patina. The top side reads: 63 / SF Mint oval logo / 1633 / 26.00 OZS / 999.75 FINE. The ingot measures 70 x 97 x 12 mm. NGC ID# BY5M, PCGS# 661060

GSA DOLLARS

- 5545 1878-CC GSA MS64 NGC.** A semiprooflike Choice Carson City Morgan. The brilliant and flashy surfaces are sharply struck. The obverse is impressively free from marks, although the reverse field displays scattered contact. A GSA box and certificate are included.
From The Lenny Reimer Collection, Part IV. NGC ID# 253M, PCGS# 518845 Base PCGS# 407080
- 5546 1878-CC GSA MS64 NGC. CAC.** A better-grade example of the introductory Carson City Morgan issue. Well struck except on the claws, which are always indistinct on the present die pair. Brilliant and lustrous with minor roller marks (as made) on the chin. Included with the lot is the GSA box and certificate.
From The Lenny Reimer Collection, Part IV. NGC ID# 253M, PCGS# 518845 Base PCGS# 407080
- 5547 1878-CC GSA MS64 NGC. CAC. VAM-2A.** This first-year Carson City Morgan dollar offers dynamic luster and a precise strike. Delicate straw-gold patina adorns lightly marked surfaces. The obverse field is particularly smooth. A GSA box and certificate is included.
From The Lenny Reimer Collection, Part IV. NGC ID# 253M, PCGS# 518845 Base PCGS# 407080
- 5548 1878-CC GSA MS64 NGC. CAC. VAM-2A.** The “Die Chip on Nostril” variety. A lightly toned and lustrous near-Gem with a good strike and unblemished fields. A mark on the right (facing) wing merits passing mention. A box and certificate are included.
From The Lenny Reimer Collection, Part IV. NGC ID# 253M, PCGS# 518845 Base PCGS# 407080

1878-CC Dollar, Gem Uncirculated
Top 100, Lines in Wing, VAM-11
GSA Soft Pack

- 5549 1878-CC Lines in Wing, VAM-11, GSA Soft Pack, MS65 Uncertified.** A Top 100 Variety. The Treasury employees that sorted GSA dollars for the auctions were not numismatists. They often assigned toned Carson City Morgans to the soft packs, even if the coins were Gem Uncirculated, as in the case of the present lot. This fully struck and well preserved example has a narrow band of orange toning on the reverse exergue. The upper reverse displays light silver-gray patina. Accompanied by two informational cards and blue envelope of GSA issue.

**1879-CC GSA Dollar, MS63
Capped Die, VAM-3**

- 5550 1879-CC Capped Die, VAM-3, GSA, MS63 NGC.** A Top 100 Variety. The date shows doubling on 18, and die chips around the mintmark are believed to be the remnants of a Large CC punched over a Small CC. This Select GSA Carson City dollar displays frosty silver-gray surfaces with a blush of golden color over the bridge of the nose. Well-struck with minor central softness and scattered grazes. Housed in its original GSA holder. Census: 54 in 63 (1 in 63+, 1 in 63 ★), 26 finer (2/16). NGC ID# 253U, PCGS# 533225 Base PCGS# 518848

- 5551 1880-CC 8 Over High 7, VAM-5, GSA, MS65 NGC.** A Top 100 Variety. The variety is undesignated on the NGC band, but the underdigit 7 is all too obvious. Lustrous and nicely struck with uncommonly pleasing surfaces. The "sweet spot" of the cheek is unabraded. The centers display minor roller marks, as made. A box and certificate accompanies the lot.
From The Lenny Reiner Collection, Part IV. NGC ID# 2542, PCGS# 518854 Base PCGS# 407100

- 5552 1880-CC 8 Over High 7, VAM-5, GSA, MS65+ NGC.** A Top 100 Variety. A whisper of gold toning visits this lustrous and sharply struck Carson City Gem. Most of the underdigit 7 is apparent on this impressive and well preserved example. A GSA box (but no certificate) is included. NGC ID# 2542, PCGS# 518854 Base PCGS# 407100

- 5553 1880-CC GSA MS65 NGC. CAC. VAM-8.** Faint honey-gold toning graces this lustrous and exceptionally preserved silver dollar. The centers show softness but the remainder of the strike is good. A die line within the M in AMERICA provides an identifier for VAM-8. A box and certificate of GSA issue are included.
From The Lenny Reiner Collection, Part IV. NGC ID# 2542, PCGS# 518851 Base PCGS# 407100

**1881-CC GSA Morgan, MS66
Delightful Obverse Toning**

- 5554 1881-CC GSA MS66 NGC.** A particularly pleasing 1881-CC GSA dollar, this coin displays uniquely blended rainbow hues over the obverse and near-brilliance on the reverse. The more vivid colors hug the upper margin, while the remainder of the obverse color palette has interesting lavender, peach, and greenish ice-blue toning. Boldly struck and well-preserved with vibrant luster. Seldom seen finer in original GSA plastic. NGC ID# 2547, PCGS# 518863 Base PCGS# 407126

- 5555 1881-CC GSA MS66 NGC.** A boldly struck representative of this low mintage Carson City issue. The virtually brilliant surfaces are remarkably free from abrasions. An exceptional souvenir from the GSA auctions. Included with the lot is the box and certificate of GSA issue.

From The Lenny Reiner Collection, Part IV. NGC ID# 2547, PCGS# 518863 Base PCGS# 407126

- 5556 1881-CC GSA MS66 NGC. CAC.** A hint of tan toning graces this lustrous and well struck high-grade silver dollar. The fields are nearly pristine and the cheek shows only delicate contact. The 1881-CC was a low mintage issue but nevertheless emerged in quantity in the GSA auctions. A box and certificate of GSA issue accompany the lot.

From The Lenny Reiner Collection, Part IV. NGC ID# 2547, PCGS# 518863 Base PCGS# 407126

- 5557 1882-CC GSA MS65 Prooflike NGC.** Although more than 600,000 1882-CC dollars were part of the GSA Hoard dispersal, prooflike examples were in the minority and only a few have achieved Gem certification. This brilliant, nicely contrasted coin is band-certified in its original GSA holder with its black box, but no certificate is present. A sharply struck, minimally abraded Gem. NGC ID# 254B, PCGS# 518867 Base PCGS# 407135

**1884-CC GSA Dollar, MS67
Brilliant and Beautiful**

- 5558 1884-CC GSA MS67 NGC. VAM-4B.** The 1884-CC was a prevalent issue in the GSA holdings, but relatively few examples compare with the quality of the present Superb Gem. The strike is sharp and the fields are well preserved, as is the sweet spot of the cheek. VAM-4B has various interesting characteristics, such as clashed lips, a "spiked date," a "pinned wing gouge," and a small die break on the E in AMERICA. NGC ID# 254L, PCGS# 518872 Base PCGS# 407152

- 5559 1885-CC GSA MS65 NGC. VAM-3.** A hint of golden patina visits the upper obverse margin, but the remainder of this lustrous Carson City Gem is brilliant. Sharply struck and attractive with minor marks on the cheek and fields. A GSA box (but no certificate) accompanies the lot. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

- 5560 1885-CC GSA MS65+ NGC.** A Plus-graded Gem, band-certified by NGC in the original GSA holder, this coin exhibits razor-sharp definition on all design elements, with vibrant mint luster and no mentionable distractions. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

1890-CC Morgan Dollar, MS61
Less-Available GSA Issue

- 5561 1890-CC GSA MS61 NGC. CAC. VAM-7.** A number of 1890-CC Morgan dollars surfaced in the GSA sales of the 1970s, but the issue was not nearly as well-represented as some of the dates from the early 1880s. High-grade examples are difficult to locate in today's market. This sharply detailed, lustrous example is attractively toned in shades of greenish-gold and lavender-gray. The surfaces show the minimum number of minor contact marks for the grade. Band certified by NGC in the original GSA holder. Lot includes original black box and unnumbered certificate of authenticity. *From The Lenny Reiner Collection, Part IV.* NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1890-CC Morgan Dollar, MS61
Popular GSA Better Date

- 5562 1890-CC GSA MS61 NGC. CAC. VAM-6.** An attractive Mint State example of this better GSA date, with well-detailed design elements and lustrous surfaces that show the expected number of scattered, minor contact marks for the grade. A few delicate hints of greenish-gold toning enhance the considerable eye appeal. Band certified by NGC in the original GSA holder. Lot includes original black box and unnumbered certificate of authenticity. *From The Lenny Reiner Collection, Part IV.* NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1890-CC GSA Dollar, MS61

- 5563 1890-CC GSA MS61 NGC. CAC. VAM-7.** Lustrous, nicely struck, and essentially brilliant. This scarcer date Carson City GSA dollar is pleasing for the MS61 level, since the reverse is well preserved and obverse lacks any singularly mentionable marks. A strike-through (as coined) is near the first U in UNUM. A GSA box and unnumbered certificate are included. *From The Lenny Reiner Collection, Part IV.* NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1890-CC GSA Dollar, MS61

- 5564 1890-CC GSA MS61 NGC. CAC.** Dynamic luster illuminates this nearly brilliant better-date GSA dollar. The left obverse is typically marked, but the remainder of the coin is smooth. The eagle's breast and the hair above the ear are incompletely brought up. A GSA box and unnumbered certificate are included in the lot. *From The Lenny Reiner Collection, Part IV.* NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1890-CC Silver Dollar, MS61
Scarce Carson City GSA Issue

- 5565 1890-CC GSA MS61 NGC. CAC.** Sweeping luster illuminates this lightly toned and typically struck GSA dollar. The 1890-CC is much rarer in a GSA holder than the 1880 to 1885 issues from the historic Old West facility. The reverse is well preserved, but the portrait displays the expected number of small scuffs. A box and unnumbered certificate accompany the lot. *From The Lenny Reiner Collection, Part IV.* NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1890-CC GSA Dollar, MS62
VAM-7, Repunched Mintmark

- 5566 1890-CC GSA MS62 NGC. CAC. VAM-7.** The first C in the mintmark is repunched within the loop. Light wheat-gold toning visits this vibrantly lustrous Carson City Morgan dollar. The strike is good and the fields are smooth. The cheek displays marks commensurate with the grade. A GSA box and certificate accompany the lot. *From The Lenny Reiner Collection, Part IV.* NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1890-CC GSA Dollar, MS62

5567 1890-CC GSA MS62 NGC. CAC. VAM-7. A lightly toned and crisply struck better date Carson City dollar. The left obverse displays distributed minor marks, but the remainder of the lustrous surfaces are surprisingly smooth. Most of the '92-CC mintage went into circulation, unlike the facility's issues from the 1880s. The lot includes a GSA box and certificate.

From The Lenny Reiner Collection, Part IV. NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1890-CC GSA Dollar, MS62
VAM-6, Repunched Date

5568 1890-CC GSA MS62 NGC. CAC. VAM-6. The 6 in the date is repunched north. This lustrous and nicely struck example is only lightly abraded for the MS62 level. Close to brilliant, although traces of tan patina are present. The 1890-CC is elusive in a GSA holder, scarcer as such than the 1879-CC. A GSA box and certificate accompany the lot.

From The Lenny Reiner Collection, Part IV. NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1890-CC GSA Dollar, MS62
VAM-7, RPM Variety

5569 1890-CC GSA MS62 NGC. CAC. VAM-7. A hint of golden toning graces this sharply struck and coruscating representative. The fields are minimally blemished, although the cheek displays grazes. A scarce GSA issue. VAM-7 has a repunched left C mintmark, but its easiest die marker to locate is a die line inside the D in DOLLAR. The box and certificate of GSA issue are included.

From The Lenny Reiner Collection, Part IV. NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1890-CC GSA Dollar, MS62
Rare VAM-9A Variety

5570 1890-CC GSA MS62 NGC. CAC. VAM-9A. Per VAMworld.com, "VAM-9A is the key variety of the 1890-CC date, far rarer than the Top 100 popular VAM-4 Tail Bar." A linear die break between the lowest left-side stars confirms the variety. Light gold patina adorns lustrous and moderately marked surfaces. The centers are lightly brought up. The GSA box and certificate are included.

From The Lenny Reiner Collection, Part IV. NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

5571 1891-CC GSA MS62 NGC. CAC. Light wheat-gold toning visits the margins of this lustrous and nicely struck Carson City dollar. The fields are unabraded and the cheek exhibits no more than the expected number of wispy marks. A GSA box (but no certificate) accompanies the lot.

From The Lenny Reiner Collection, Part IV. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5572 1891-CC Spitting Eagle, VAM-3, GSA MS60 NGC. CAC. A Top 100 Variety. Delicate gold toning visits this lustrous and suitably struck silver dollar. Small marks throughout the portrait confirm the grade. A box and unnumbered certificate accompany the lot.

From The Lenny Reiner Collection, Part IV. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5573 1891-CC Spitting Eagle, VAM-3, GSA, MS61 NGC. CAC. A Top 100 Variety. Lustrous, brilliant, and nicely struck. Toning is minimal and the fields are well preserved. The cheek displays distributed wispy grazes. The lot is accompanied by a GSA box and two unnumbered certificates.

From The Lenny Reiner Collection, Part IV. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5574 1891-CC Spitting Eagle, GSA, VAM-3, MS61 NGC. CAC. A Top 100 Variety. The die lump beneath the beak identifies the specialist-familiar "Spitting Eagle" variety. A brilliant and lustrous representative of this scarcer Carson City GSA issue. Small marks are scattered, with the most apparent on Liberty's jaw. A GSA box and unnumbered certificate accompanies the lot.

From The Lenny Reiner Collection, Part IV. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5575 1891-CC Spitting Eagle, VAM-3, GSA MS61 NGC. CAC. A Top 100 Variety. The mintmark is repunched on VAM-3, an often-forgotten feature of the "Spitting Eagle" variety. A brilliant and lustrous scarcer-date Carson City GSA Morgan with the expected number of small to moderate facial marks. A box and unnumbered certificate are included.

From The Lenny Reiner Collection, Part IV. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5576 1891-CC Spitting Eagle, VAM-3, GSA, MS61 NGC. CAC. A Top 100 Variety. A trace of honey-gold toning graces this lustrous Carson City representative. Numerous individually delicate marks on the portrait determine the grade. A box and unnumbered certificate are included.

From The Lenny Reiner Collection, Part IV. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5577 1891-CC Spitting Eagle, VAM-3, GSA, MS61 NGC. CAC. A Top 100 Variety. A minimally toned and thoroughly lustrous better date CC-mint GSA dollar. The distributed small obverse marks correlate to the grade. A box and unnumbered certificate are included.

From The Lenny Reiner Collection, Part IV. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5578 1891-CC Spitting Eagle, VAM-3, GSA MS62 NGC. CAC. A Top 100 Variety. A mere wisp of golden patina visits well struck and lustrous surfaces. Smooth fields and a clean cheek ensure this example exhibits superior eye appeal for the MS62 grade. A better Carson City GSA issue. A box and certificate accompany the lot. *From The Lenny Reiner Collection, Part IV.* NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5579 1891-CC Spitting Eagle, VAM-3, GSA MS62 NGC. CAC. A Top 100 Variety. The die line over the 1 in the date confirms the Near Date variant of the Spitting Eagle VAM. A brilliant and lustrous Carson City dollar with less abraded surfaces than is usual for the MS62 grade. A box and certificate of GSA issue are included. *From The Lenny Reiner Collection, Part IV.* NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5580 1891-CC Spitting Eagle, VAM-3, GSA MS62 NGC. CAC. A Top 100 Variety. Sharply struck and lustrous with delicate tan toning. The obverse shows distributed minor marks appropriate for the grade. The certificate and box of GSA issue are included. *From The Lenny Reiner Collection, Part IV.* NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5581 1891-CC Spitting Eagle, VAM-3, GSA MS62 NGC. CAC. A Top 100 Variety. An untoned and lustrous Carson City silver dollar with a nice strike and refreshingly few marks for the third-party grade. A majority of 1891-CC GSA dollars are VAM-3. A GSA box is included, without a certificate. *From The Lenny Reiner Collection, Part IV.* NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

5582 1901-S GSA Soft Pack AU53 NGC. The better-date 1901-S seldom appears in a GSA soft pack. This silver-gray representative displays light wear at the centers, but the margins are lustrous and marks are minimal given its brief stint in Western commerce. NGC ID# 256L, PCGS# 7276

ERRORS

1958 Cent Overstruck on a Cuba Centavo, MS65 NGC

5583 1958 Lincoln Cent — Overstruck on a Cuba Centavo — MS65 NGC. 2.5 gm. In 1958, the U.S. Mint struck copper-nickel centavos for Cuba (KM-30). An example of that issue (the present lot) found its way between 1958 Lincoln cent dies. The centavo date is faint but apparent above LIBERTY. The cent date is bold. The undertype devices emerge throughout the fields, with the outline of José Martí's head on the right obverse field of the cent. Struck aligned with the collar at 3 o'clock, with the right-side rim absent and the LI in LIBERTY off the flan.

1866 Shield Nickel, MS62 Large Obverse Cud

5584 1866 Rays Shield Nickel — Obverse Die Break — MS62 NGC. A large cud affects the obverse border between 3 and 4 o'clock. The variety is unlisted on the cuds-on-coins.com website. Diagnostic for the error, the strike is soft on the reverse margin between 2 and 3 o'clock, due to metal flow into the obverse die break. The almond-gold and steel-gray surfaces are satiny and unmarked with minor granularity noted near CENTS. *Ex: New York Signature (Heritage, 11/2013), lot 8934, which realized \$1,057.50.*

1877 Shield Nickel, Gem Proof Shifted Double Strike, Key Date

5585 1877 Shield Nickel — Double Struck in Collar with Rotation — PR65 NGC. The 1877 is a proof-only date, and a key to the series. The present Gem was struck twice, usual for a proof. But the reverse die shifted east several degrees between strikes. The large 5, STATES, OF AMERICA, and the right-side stars all show wide strike doubling, though the first impression is faint due to the subsequent strike. On the obverse, evidence of the shifted double strike is apparent on the date and the lower right portion of the shield.

5586 1886 Liberty Nickel — Struck-Through Obverse and Reverse — MS62 PCGS. The obverse border has a series of conspicuous shallow strike-throughs between 3 and 6 o'clock. The central and upper-right reverse display a number of similar strike-throughs. Lustrous and unmarked with peripheral sun-gold and lime-green toning. The 1886 is a key date of the Liberty nickel series, and one of only three issues (along with the 1912-S and 1885) with a mintage of less than 5,000,000 pieces.

**1945 Dime, MS65 Full Bands
Broadstruck, Rare With Full Bands**

- 5587 1945 Mercury Dime — Broadstruck — MS65 Full Bands NGC.** The 1945 dime is famous for its rarity with fully split bands, presumably because the issue was coined with the dies slightly too far apart, to extend die life during wartime. When the present piece was struck, the collar die was either blocked or absent, which allowed the dies to come close together for a deep, full central impression. The very broad rims, oversized diameter, and slight distortion of the peripheral legends are all characteristics of broadstrikes. Lustrous and unabraded with medium lavender and caramel-gold toning. NGC ID# 5A98, PCGS# 5057

**1964-D Kennedy Half, MS65
Struck on a Quarter Planchet**

- 5588 1964-D Kennedy Half Dollar — Struck on a Quarter Planchet — MS65 NGC.** 6.24 grams. Type Two Reverse. The centering favors the portrait and eagle, which are complete, at the expense of the date and STATES OF. Although the date is absent, we know the coin is a 1964-D, since it is the sole issue with a Denver mintmark near the branch stem. Lustrous and well-preserved with light peripheral golden patina. Characteristic of an undersized flan, the letters near the rim have a stretched and distorted appearance, as made.

**Kennedy Half Dollar, MS64
on a Clad Quarter Flan**

- 5589 Undated Kennedy Half — Struck on a Clad Quarter Planchet — MS64 NGC.** 5.75 grams. No mintmark is present, and the date is off the flan. Struck aligned with the collar die at 6 o'clock on the reverse, with nearly all of HALF DOLLAR intact. The portrait and eagle are also complete. Lustrous and untoned. A majority of wrong planchet U.S. coins are cents on clad dime planchets. The present combination is very scarce.

**1973-D Kennedy Half, MS67
Overstruck on a 1972-D Quarter**

- 5590 1973-D Kennedy Half Dollar — Struck Over a 1972-D Quarter — MS67 NGC.** A dramatic “75 cent” double denomination error. The head and wings of the eagle from the half dollar overlap Washington’s portrait. Similarly, the head and wings of the eagle from the quarter emerge near Kennedy’s ear. The half dollar mintmark is bold. The half dollar date is partial, but the upper curl of the 3 is present. The quarter date is readable near 6 o'clock on the half dollar reverse, and the quarter mintmark is apparent near the reverse rim at 4:30. Lustrous, unabraded, and brilliant.

1979-P Anthony Dollar, MS64 Red
Struck Over a Lincoln Cent

- 5591** 1979-P Narrow Rim Anthony Dollar — Struck Over a Lincoln Cent — MS64 Red NGC. Our consignor states that this is the only known Anthony dollar struck over a cent. Honest Abe's beard is apparent on the eagle's breast, and several columns of the Lincoln Memorial overlap Anthony's cheek. PLURIBUS from the cent emerges from Anthony's hair, and the cent's LIBERTY is readable on the left reverse field. The dollar mintmark is bold. The dollar date is partial but includes the crossbar of the 7, sufficient for confirmation. A lustrous peach-gold near-Gem with full Red color and only a trace of carbon.

1979-P Anthony Dollar, MS66
Overstruck on a 1978 Quarter

- 5592** 1979-P Narrow Rim Anthony Dollar — Struck on a 1978 Quarter — MS66 NGC. Both sides exhibit generous portions of the undertype. The eagle's wings and belly overlap the Anthony portrait, and Washington's profile is at the bottom of the Apollo 11 eagle. The Anthony date and mintmark is clear, and the quarter date is readable, near 3 o'clock on the reverse. Lustrous, brilliant, and well preserved. Our consignor states that this is one of only two known 1979-P dollars overstruck on a quarter, and the only one with a different dated undertype. Our online auction archives show a number of Anthony dollars struck on wrong planchets, but only one prior appearance of an Anthony double denomination error: a 1999-P dollar on a Georgia state quarter.

(1979)-D Anthony Dollar, MS66
Struck Over a 1978-D Dime

- 5593** (1979)-D Anthony Dollar — Overstruck on a 1978-D Dime — MS66 NGC. An uncommon double denomination combination. Roosevelt faces south relative to the portrait of the feminist. The sprigs of the dime overlap the eagle's breast and claws. Traces of the dime date and mintmark are apparent near the ER in LIBERTY. The dollar date is off the flan, and the mintmark area is covered by one of the NGC holder tabs.

MINT SETS

- 5594** Uncertified 1949 Double Mint Set. This 1949 PDS double mint set remains housed in the original cardboard holders. The outer manila mailing envelope is postmarked Jan. 23, 1950, and displays cancelled 19 and 30 cent stamps. The cents are mostly red, and the remainder of the coins are lightly to moderately toned, except for deeper shadings on the Philadelphia Mint pieces. and The typical example grades MS63 to MS64. This set has 28 coins, since no 1949-S quarters were minted. (Total: 28 coins)
- 5595** A Lot of Three Sealed Double Mint Sets. Each of the three sets is housed in a sealed (unopened) mailing envelope, bearing a cancelled 18 cent stamp and the mailing address of the recipient. The first set is postmarked April 3, 1953, indicating it contains a 1952 Double Mint Set. The second set is postmarked March 5, 1954, which confirms it contains a 1953 Double Mint Set. The third set lacks a postal cancellation, thus we cannot confirm the year for the set, though it could not have been later than 1955, since the 1956 Double Mint Set mailing envelopes bore 20 cent stamps. (Total: 3 sets)

U.S. MINT MEDAL

- 5596** (1845-1860) "1789" Captain John Paul Jones, Paris Mint Restrike, MS64 Brown NGC. Betts-568, Julian NA-1. Bronzed copper, 56 mm. The edge exhibits CUIVRE and a pointing hand hallmark, in use at the Paris Mint between June 23, 1845 and Oct. 31, 1860. A satiny tan-brown example that boasts an intricate strike and only minor obverse field contact. A handsome Augustin Dupré design depicting Revolutionary War naval hero John Paul Jones, famous for his retort "I have not yet begun to fight!"
Ex: Eric P. Newman Numismatic Education Society.

CIVIL WAR MERCHANTS

- 5597** 1864 City Fruit Store, Providence, Rhode Island, MS64 NGC. Fuld-RI700G-2d, R.9. Issued by fruit grocer Charles F. Phillips, and struck in copper-nickel. The die marriage is plentiful in copper, but off-metal examples are rare. The high relief of the portrait of the officer causes minor incompleteness of strike on the obverse legends, usual for the variety. The lustrous and unabraded straw-gold and lime-green surfaces display minor carbon.

CIVIL WAR PATRIOTICS

- 5598** 1863 Washington — Mirror Brockage Reverse — XF40 NGC. Fuld-107/107a, R.7. Incorrectly designated as Fuld-108/108a by NGC. Fuld-107 is usually paired with Fuld-432, the Baker-490 variety issued in copper. Presumably, during the production of Baker-490, the present piece was struck between the Fuld-108 die and the obverse of a previously struck example. Circular lathe lines (as made) are evident in the fields, which suggests that the designated XF40 grade is very conservative, and based on the indistinct hair definition characteristic of Fuld-107.
- 5599** 1863 First in War, First in Peace — Mirror Brockage Obverse — XF40 NGC. Fuld-177/177a, R.8. The First in War, First in Peace Patriotic Civil War token series was based on Henry Kirke Brown's 1856 equestrian statue of George Washington, exhibited in Union Square Park, Manhattan. Fuld-177 is the only die which shows the President facing. Fuld-177 is usually paired with either Fuld-127 (in German silver) or Fuld-271 (in copper). The present copper example was struck between the Fuld-177 die and a previously struck token from that same die, due to an ejection error. The tan-brown surfaces display moderate wear and no doubt elicited curiously from several owners during its year or two in commerce.

MISCELLANEOUS MEDALS AND TOKENS

- 5600** A Three-Piece Lot of New York City Communion Tokens. All three tokens were issued by the Third Reformed Presbyterian Congregation. The tokens are oval and have a plain edge. The lot includes: MS61 NGC, white metal, Bason-5346; MS63 Red and Brown NGC, bronze, Bason-5346; MS62 NGC, pewter, double thick flan, Bason-5347.
The first piece is ex: John Sherman, 2/1961; John J. Ford, Jr. Collection, Part 23 (Stack's, 8/2013), lot 22696.
The second piece is ex: Max Justus, 8/1958; John J. Ford, Jr. Collection, Part 23 (Stack's, 8/2013), lot 22694.
The third piece is ex: F.C.C. Boyd; John J. Ford, Jr. Collection, Part 23 (Stack's, 8/2013), lot 22695. (Total: 3 tokens)

End of Session Four

SESSION FIVE

PATTERNS

1853 Cent in German Silver
Judd-149, PR64

- 5601** 1853 One Cent, Judd-149, Pollock-178, High R.6 PR64 PCGS. CAC. Ex: New Millennium Collection. The obverse is the same as that used to coin regular issue 1853 quarter eagles. The reverse shows the denomination ONE CENT within a laurel wreath. Struck in a German silver alloy with a reeded edge. A metallurgical analysis is necessary to determine the Judd variety for this type, since the copper-nickel and German silver alloys cannot be distinguished by color. The boldly defined specimen offered here has a thin veil of milky patina and a few trivial flyspecks on the obverse. Ex: FUN Signature (Heritage, 1/2004), lot 8377; Long Beach Signature (Heritage, 1/2004), lot 6000; ANA Signature (Heritage, 8/2004), lot 7877. From The Indian Rocks Collection. NGC ID# 32C2, PCGS# 11622

1855 Original Flying Eagle Cent Pattern
Judd-168, Unc Details, Struck in Bronze

- 5602** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4 — Cleaning — PCGS Genuine. Unc Details. A Flying Eagle cent pattern in a large format, featuring a hooked-neck eagle, slanting 5s on the obverse, and ONE CENT in the center of the reverse surrounded by a thick laurel wreath similar its counterpart on the large cent. Struck in bronze with a plain edge. The cleaning has left bright orange-red surfaces on each side. Struck on a granular planchet. NGC ID# 29AG, PCGS# 11720

1855 Bronze Flying Eagle Cent
Judd-168 Original, PR63 Brown

- 5603** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4 PR63 Brown PCGS. The crook-necked flying eagle on the obverse is similar to the design for the regular-issue Flying Eagle cent. The 5s in the date are slanted. ONE CENT is in the center of the reverse, inside a floral wreath similar to the large cent. The diameter is quarter-sized, nearly midway between the large and small cents. Struck in bronze with a plain edge. The surfaces are pleasing and light glossy brown, evenly matched on each side. A short strike-through on the bottom of the reverse most likely limits the grade as it appears like a post-striking defect. NGC ID# 29AG, PCGS# 11720

1855 Flying Eagle Cent in German Silver
Judd-171a, PR63

- 5604** 1855 Cent, Judd-171a, Pollock-196, R.7, PR63 PCGS. An eagle flying left dominates the obverse, 13 stars surround, and the date is below. On the reverse, the denomination ONE CENT is centered within a laurel wreath, UNITED STATES OF AMERICA is at the border. Struck in German silver alloy with a plain edge. The specific alloy of this piece has been metallurgically tested and the results are: 67% copper, 13% zinc, and 20% nickel. The strike shows the usual softness on the extremities of the eagle and portions of the wreath, but is sharper than sometimes seen. The silver-gray surfaces are clashed and free from abrasions. A tiny spot is located beneath the beak. From The Tom & Jean Fore Collection. NGC ID# 29AN, PCGS# 11737

1855 Flying Eagle Cent in Copper
Judd-172, Unc Details

- 5605** 1855 Flying Eagle Cent, Judd-172, Pollock-198, Low R.6 — Questionable Color — PCGS Genuine. Unc Details. Flying Eagle cent pattern with hook-necked eagle on the obverse, paired with a reverse that has a smaller wreath than seen on the Judd-167 to 171 variants. Also, two leaves are located beneath the E in STATES. Struck in copper with a plain edge. Obviously cleaned at one time, the obverse has retoned a deep olive-green. The reverse, however, is unnaturally bright red. Well struck. NGC ID# 29AR, PCGS# 11740

1855 Hooked-Neck Flying Eagle Cent
Judd-173, Struck in Bronze, PR63 Brown

- 5606** 1855 Flying Eagle Cent, Judd-173, Pollock-198, Low R.7, PR63 Brown PCGS. The Flying Eagle cent pattern in large format, featuring a hooked-neck eagle on the obverse and ONE CENT in the center of the reverse surrounded by a small laurel wreath. Struck in bronze with a plain edge. The brown surfaces are lightly streaked with faint red across each side, suggestive of improper mixture of the bronze alloy (thus confirming it is bronze rather than a copper striking). Sharply defined, except on the highest portions of the wreath. A small carbon spot can be seen on the lower portion of the wreath. NGC ID# 27MB, PCGS# 11748

1859 Indian Cent With Reverse of 1860
Judd-228, MS64

- 5607** 1859 Indian Cent, Judd-228, Pollock-272, R.1, MS64 PCGS. This transitional pattern combines the as-issued 1859 Indian Head cent obverse with the Shield Reverse introduced for commerce in 1860. Struck in copper-nickel with a plain edge. This is a lovely reddish-toned near-Gem with mottled brownish flecks, quite attractive and decently well-struck. A great complement to an Indian cent Registry Set. NGC ID# 29C8, PCGS# 11932

1863 Indian Cent in Bronze, PR63 Brown
Judd-299, Medalllic Alignment, Thin Planchet

- 5608** 1863 One Cent, Judd-299, Pollock-359, R.3, PR63 Brown PCGS. This transitional striking of the Indian cent has the regular design of 1863, but it is struck in bronze with a plain edge and a medalllic alignment. Specimens are known struck on both thick and thin planchets. This is the thin-planchet variety. Fully struck and satiny with golden-brown and gunmetal-blue toning. A lamination is noted near the bust tip, as made, and the obverse rim is moderately abraded. NGC ID# 29ED, PCGS# 60454

1863 Indian Cent in Bronze
Judd-299, No L, Thin Planchet, PR65 Brown

- 5609** 1863 One Cent, Judd-299, Pollock-359, R.3, PR65 Brown PCGS. Snow-PT1. Medalllic alignment. Struck from regular issue, plain edge dies, but in bronze instead of copper-nickel. No L on the ribbon. The Indian cent alloy switched from copper-nickel to bronze during 1864. The dies exhibit medalllic alignment, as usual for Judd-299, and this is a thin planchet variant. This pattern was the Mint's first experiment with bronze. The mahogany-brown surfaces show just the faintest traces of red beneath the patina, but the mirrored flash is still abundantly evident in the fields. Fully defined. NGC ID# 29ED, PCGS# 60454

1863 No L Indian Cent in Bronze
Judd-299, PR64 Red and Brown

- 5610** 1863 One Cent, Judd-299, Pollock-359, R.3, PR64 Red and Brown NGC. Snow-PT1. Medalllic alignment. From regular issue dies, but struck in bronze with a plain edge. A transitional pattern for the 1864 bronze No L regular issue with plain edge. It appears this is the more frequently seen thin planchet variant. USPatterns.com estimates approximately 200 examples are known of this transitional pattern. These pieces are rarely seen with mint red, but this one displays significant (30-40%) original red on the obverse surrounding the devices and in the fields. The reverse not so much. Both sides, however, shine brightly with mirrored reflectivity in the proof fields. A couple of spots in the center of the obverse prevent an even higher grade. NGC ID# 29ED, PCGS# 70454

1863 Transitional Indian Cent in Bronze
Judd-299, PR65 Red and Brown
Thin Planchet

- 5611** 1863 One Cent, Judd-299, Pollock-359, R.3, PR65 Red and Brown PCGS. Snow-PT1. Medallion alignment. Struck from regular issue cent dies, but with a bronze alloy used instead of the then-current copper-nickel composition. This bronze alloy, of course, was implemented in 1864, which makes this pattern a transitional issue. Pollock lists four variants, all from the same dies, based upon the thickness of the planchet and the die alignment. This appears to be a thin planchet variant. Mellowed red luster is present in the fields on each side, giving the coin a well-balanced appearance. Slight streakiness is also noted on each side, most likely from improper mixture of the bronze alloy. The surfaces are problem-free, and the devices have a "thicker" patina, suggestive of a cameo effect.
Ex: FUN Signature (Heritage, 1/2004), lot 8407. NGC ID# 29ED, PCGS# 70454

1863 'Transitional' Half Dollar, Judd-344, PR65
Struck in Aluminum, With Motto
Extremely Rare, Perhaps Five Known

- 5612** 1863 Half Dollar, Judd-344, Pollock-416, High R.7, PR65 NGC. *Ex: Bass/ANA Museum Display.* The obverse is that of the regular-issue Seated quarter of 1863. The reverse is also similar in design, but a scroll with IN GOD WE TRUST appears above the eagle, as adopted officially in 1866. Struck in aluminum with a reeded edge. These With Motto pieces and their counterparts in other metals are actually fantasy pieces or restrikes made several years after 1866, perhaps into the 1870s. At least four examples are known of the aluminum strikes, per USPatterns.com — far rarer than either the copper or silver counterparts to this issue. The Queller-Lemus Collection (Heritage, 1/2009) had both the "transitional" half dollar in copper (Judd-343) and the "transitional" dollar in silver (Judd-345), but it lacked an example of the Judd-344 aluminum half.
Ex: Douglas Weaver, 12/21/1973; Harry W. Bass Research Foundation.
From The Indian Rocks Collection. NGC ID# 29FY, PCGS# 60506

1865 Gold Dollar in Copper
Judd-438, PR64 Red
The Sole Piece Certified as Red

- 5613** 1865 Gold Dollar, Judd-438, Pollock-511, R.7, PR64 Red PCGS. CAC. Regular dies trial for the 1865 gold dollar. Struck in copper with a reeded edge. According to the USPatterns.com website: "Although these are described as regular die trial pieces in the standard references, it is more likely that the off-metal 'trials' of this year were deliberately struck for sale to collectors as part of complete gold and copper sets of this year containing the With Motto half eagle, eagle, and double eagle." Of the dozen or so pieces known, this is the only piece that retains full red color. The fields display die striations, which have imparted the reflectivity seen on each side. The surfaces are bright red with a smattering of small specks of carbon and the trace of a fingerprint on the reverse. NGC ID# 29JN, PCGS# 80623

1866 Washington Five Cents in Nickel
Judd-470, Proof Details

- 5614** 1866 Five Cents, Judd-470, Pollock-562, Low R.6 — Obverse Damage — NGC Details. Proof Details. A bust of George Washington faces right on the obverse, the legend IN GOD WE TRUST above and the date below. A wreath of laurel on the reverse encloses a large broad numeral 5 with the legend UNITED STATES OF AMERICA around. Struck in nickel with a plain edge. There is a scrape on the lower right of the obverse of unknown origin, that is mostly in the field but also laps onto the lower bust of Washington. Otherwise, the surfaces are pleasing and the strike is complete in all areas. The strike details show us that this would have been an acceptable coin for circulation. Nickel is such a hard metal and difficult to fully strike up, but the die opposition of this design was such that here there is no duplication of relief on the obverse and reverse. NGC ID# 29KD, PCGS# 60666

1867 Aluminum Five Cent Pattern
Judd-561, PR63

- 5615** 1867 Five Cents, Judd-561, Pollock-622, R.5, PR63 PCGS. The central obverse device is a head of Liberty facing left, wearing a headdress of four large feathers and a ribbon with the inscription UNION AND LIBERTY. Resting in the hair in front of the ribbon are four large stars. The chief engraver's name LONGACRE F. is stylishly displayed at the truncation of the neck. The legend UNITED STATES OF AMERICA around, with the date in the exergue. The reverse features a Roman numeral V over an ornate shield, with IN GOD WE TRUST at the top. Struck in aluminum with a plain edge. The fields show the usual depth of mirroring and there is slight contrast evident with the devices. Faint evidence of oxidation adds a layer of golden-gray patina to each side. NGC ID# 29M4, PCGS# 60771

1867 Longacre-Designed Nickel in Aluminum
Judd-561, PR65 Cameo

- 5616** 1867 Five Cents, Judd-561, Pollock-622, R.5, PR65 Cameo PCGS. CAC. The central obverse device is a head of Liberty facing left, wearing a headdress of four large feathers and a ribbon with the inscription UNION AND LIBERTY. Resting on the hair in front of the ribbon are four large stars. The chief engraver's name LONGACRE F. is stylishly displayed at the truncation of the neck. The legend UNITED STATES OF AMERICA around, with the date in the exergue. The reverse features a Roman numeral V over an ornate shield, with IN GOD WE TRUST at the top. Struck in aluminum with a plain edge. Streaks of light tan toning cross well struck, reflective, and minimally marked surfaces. Cameo frost is readily apparent. From *The Indian Rocks Collection*. PCGS# 860771 Base PCGS# 60771

1869 Copper Ten Cent Pattern
Judd-715, PR66 Brown
SIL. / NIC. Reverse Design

- 5617** 1869 Ten Cents, Judd-715, Pollock-794, Low R.7, PR66 Brown NGC. 2.4 grams. The obverse is similar to the regular issue, but without the date in the exergue area. The reverse has SIL. 9 / NIC. 1 / 1869 in large letters and digits. This reverse design pattern was struck in copper with a reeded edge. Of the six known examples of this copper striking, this is the finest certified. SEM-EDX testing by Ledoux & Company Certificate number 919577-011 proved it to be almost pure copper: 99.7% copper and 0.2% nickel. Curiously, the silver / nickel alloy stamped on the reverse of this piece does not appear to exist on any coins of this design. The production of this almost pure copper piece makes one wonder what was intended by Mint officials. Since we last handled this piece, testing has yielded slightly different results. NGC has now determined the piece to be 100% copper. The weight is the same. Formerly it was expressed as 37 grains, now it is 2.4 grams. When converted to grains, 2.4 grams is 37.03 grains. Each side displays variegated "autumn leaves" toning that is quite deep in hue, yet the surfaces show strong underlying brightness. Pronounced die striations are easily seen in the upper-right of the obverse as well as the long diagonal die scratch in the lower obverse field that passes under the foot of Liberty. Ex: *Goldberg Auctions* (5/2003), lot 593; *David Cassel*; *David Cassel Collection / ANA Signature* (Heritage, 8/2015), lot 5959. NGC ID# 29RW, PCGS# 60940

1869 Ten Cent 'Koulz's Alloy'
Judd-717A, PR64
Alloyed With Traces of Iron and Silicon

- 5618** 1869 Ten Cents, Judd-717A, Pollock-798, High R.7, PR64 PCGS Secure. 44.13 grains. 75% copper, 25% nickel. The obverse is similar to the regular issue, but without the date in exergue. The reverse has SIL. / NIC. / COP. in the center with the date slightly curved below and in a smaller font. This second reverse design pattern has a reeded edge. The reverse states it was struck in the unworkable alloy of silver, nickel, and copper: Koulz's alloy. However, this example proved to be composed of a most interesting alloy when SEM-EDX testing was conducted by QC Metallurgical on certificate number 60944.64/21873031: 76.07% copper, 23.42% nickel, 0.27% iron, and 0.24% silicon. This piece was originally attributed as a Judd-716 (Koulz's alloy), but after metallurgical testing was done it was reholdered as a Judd-717A (mostly nickel) striking. The difference between the two cannot be discerned by appearance, weight, or specific gravity; only SEM-EDX testing can differentiate between the two alloys. Since we last saw this piece it has been retested and it now shows a slightly lower percentage of copper and slightly higher percentage of nickel, no other trace elements are mentioned on the PCGS insert. The weight is also different. Formerly it was 44.3 grains, now it is 44.13 grains. The piece looks like other nickel patterns we have seen with subdued mint luster. The strike is surprisingly strong for a composition as hard as this one. Moderate reflectivity is seen in the fields and the devices are notably frosted, yielding significant contrast. Light gray-rose toning is seen over each side. An irregular planchet flaw in the right field serves as a useful pedigree identifier.
Ex: eBay offering #391360575 (2004) by Blue Moon Coin; David Cassel; David Cassel Collection / ANA Signature (Heritage, 8/2015), lot 5964. NGC ID# 29S2, PCGS# 60944

1869 Standard Silver Quarter in Copper
Judd-735, PR64 Red and Brown

- 5619** 1869 Standard Silver Quarter Dollar, Judd-735, Pollock-816, R.7, PR64 Red and Brown NGC. On the obverse a right-facing Liberty wears a headband displaying LIBERTY in raised letters and a single star at the front. UNITED STATES OF AMERICA borders the upper rim, with IN GOD WE TRUST in a curved ribbon below. The Standard Silver reverse has date 1869 below. Struck in copper with a reeded edge. Certified as Red and Brown, but this piece displays a significant presence of original mint red that is only interrupted by occasional brown. Obviously original surfaces and scarce with this much mint luster present. NGC ID# 29SK, PCGS# 70962

1871 Dies Trial Half Dollar in Copper
Judd-1117, PR65 Brown

- 5620** 1871 Half Dollar, Judd-1117, Pollock-1253, High R.7, PR65 Brown NGC. Ex: Samuel Berngard Collection. The obverse and reverse designs are the same as those of the regular issue 1871 half dollar. Struck in copper with a reeded edge. The so-called regular dies trial piece. These are believed to have been deliberately struck for sale to collectors as part of complete off-metal sets, as opposed to being true dies trial pieces. Fewer than a half dozen are known. This Gem displays fully struck, smooth, sea-green surfaces, which are entirely free of contact or handling marks. There are only a few tiny traces of carbon. A lovely and very rare pattern piece.
Ex: Baltimore Signature (Heritage, 7/2003), lot 10029; November Signature (Heritage, 11/2003), lot 11183. NGC ID# 2A4K, PCGS# 61376

1871 Copper Half Eagle
Judd-1170, Bright PR65 Red and Brown

- 5621 1871 Five Dollar, Judd-1170, Pollock-1312, R.6-7, PR65 Red and Brown PCGS.** The regular dies for the 1871 Liberty half eagle. Struck in copper with a reeded edge. It is Saul Teichman's opinion, as expressed on the USPatterns.com website, that "it is more than likely that the off-metal 'trials' of this year were deliberately struck for sale to collectors." Still, only half a dozen are believed to exist today. Before we offered this piece in 2012, the last auction appearance was in the Queller/Lemus Collection in April 2009. The two sides present different degrees of red, the deeply mirrored obverse field displays iridescent blue and cherry-red, contrasting with a brighter red-gold on the bust of Liberty, while the reverse presents a deeper overall red with partial blue sheen. Ex: *Summer FUN Signature* (Heritage, 7/2012), lot 4641. From *The Indian Rocks Collection*. NGC ID# 2A5P, PCGS# 71433

1878 Barber-Designed Dollar in Silver
Judd-1554, Pollock-1733, PR63

- 5622 1878 Dollar, Judd-1554, Pollock-1733, R.5, PR63 NGC. CAC.** Liberty wears a beaded coronet and faces left. The stars are arranged 7 x 6, separated by IN GOD WE TRUST with the date below. The reverse features a standing eagle with spread wings, clutching an olive branch and arrows. E PLURIBUS UNUM is above in gothic letters. The border displays UNITED STATES OF AMERICA and ONE DOLLAR with the legends separated by two stars. This is the Pollock variety with star 13 distant from the curl and the upright of the B in PLURIBUS centered under the second T in STATES. The fields are brightly reflective and each side shows light, scattered reddish-golden toning with a trace of blue around the margins. From *The Indian Rocks Collection*. NGC ID# 2AF5, PCGS# 61915

1882 Judd-1690 Liberty Nickel, PR64
Scarce Transitional Pattern

- 5623 1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR64 PCGS.** A popular precursor to the Liberty nickel. Dated 1882 instead of 1883, and the stars are arranged differently relative to the portrait, particularly star 10. The reverse is identical to the issued 1883 No Cents nickel. Struck in nickel with a plain edge. An intricately struck and mark-free cream-gray specimen. A few tiny flecks are noted near star 1 and the date. NGC ID# 2AKC, PCGS# 62095

1882 Liberty Nickel, Judd-1691
PR63 Red and Brown

- 5624 1882 Liberty Head Five Cents, Judd-1691, Pollock-1893, R.6, PR63 Red and Brown PCGS.** Known as the "Exact Type of 1883," but in reality this pattern differs slightly with a different arrangement of the obverse stars. Still, it is a popular precursor to the adopted Liberty nickel of 1883. Struck in copper with a plain edge. This exceptional Gem has deep shadings of blue and original copper-red over each side. Quite an attractive coin despite numerous speckles of carbon, particularly over the obverse. Ex: *John L. Harris Collection* (Stack's, 11/1950), lot 74. NGC ID# 2AKD, PCGS# 72096

**1884 Eastman Johnson Five Cent in Nickel
Judd-1724, Thick Planchet, PR66**

- 5625** 1884 Five Cents, Judd-1724, Pollock-1934, Low R.6, PR66 PCGS. The Eastman Johnson “holey five cent” design. The obverse shows FIVE above and CENTS below a roughly octagonal opening (probably handcut) in the planchet, with shields on either side. The reverse shows UNITED STATES OF AMERICA at the outer rim, with an inner circle of 13 stars and date 1884 below. Struck in nickel with a plain edge. The nickel strikings were produced on thick and thin planchets. This appears to be a thick-planchet variant. About two dozen pieces are believed known in total of the nickel strikings. About a dozen aluminum pieces are also known as is a single white metal piece. The strike details on this piece are remarkably strong, but as often seen on nickel patterns, the fields are only moderately reflective. Remarkably clean and attractive surfaces.
From The Indian Rocks Collection. NGC ID# 2ALB, PCGS# 62154

GOLD DOLLARS

- 5626** 1849 No L, D-1, Normal Stars, MS63 PCGS. CAC. The star at the point of the neck truncation is boldly repunched. This Select first-year gold dollar type coin displays sharp detail and vibrant luster. A threadlike strike-through in Liberty's hair should not be mistaken for a scratch. CAC-approved in a first generation holder. PCGS# 521670 Base PCGS# 7501
- 5627** 1849 No L, D-1, Normal Stars, MS64+ PCGS. CAC. The two widely repunched stars below the bust characterize this sole Dannreuther-1 1849 No L, Open Wreath gold dollar die pair. Generous luster and a paucity of mentionable abrasions put this piece a couple of notches above most survivors of the issue. For the 1849 No L, PCGS reports only 5 in MS64+ with 42 finer. CAC: 9 in 64, 6 finer (2/16). PCGS# 521670 Base PCGS# 7501
- 5628** 1849 Open Wreath, D-4, Close Stars, MS64 PCGS. A gleaming near-Gem example of this first-year gold dollar issue, showing excellent preservation atop caramel-gold surfaces blazing with luster and few mentionable marks. A great type coin. This smallest gold denomination, and its counterpart largest, the double eagle also introduced in 1849, were both aided and abetted by vast gold influxes from California that spread throughout the nation. PCGS# 521671 Base PCGS# 7502
- 5629** 1849-C Closed Wreath AU50 NGC. Variety 1. A pleasing example of this debut Charlotte gold dollar, showing moderate detail and problem-free surfaces. Much of each side is yellow-gold, although areas of deeper copper-red appear around the obverse portrait and to the left of the 1 on the reverse. NGC ID# 25BC, PCGS# 7505

**1849-D Gold Dollar, AU55
Excellent Color and Surfaces**

- 5630** 1849-D AU55 NGC. Variety 1-B. The 1849-D gold dollar is the most frequently seen Dahlonega gold dollar, ideal for the collector seeking a single piece from this mint. The present Choice AU coin displays a bold strike with coppery-orange overtones among olive-gold patina. A few hints of luster remain in the fields. Eye appeal is pleasing. NGC ID# 25BD, PCGS# 7507

**1849-O Open Wreath Gold Dollar, MS63
Extensively Die-Cracked Obverse**

- 5631** 1849-O Open Wreath MS63 NGC. Variety 3, showing extensive die lapping that has effaced some of the sharpness in the mintmark and many details of the bow, knot, ribbons, olive leaves, and the lower date. The R in DOLLAR is not doubled (that would be Variety 1, which lacks evidence of lapping). Most examples of the 1849-O gold dollars, despite the mintage of 215,000 coins, circulated to some degree. This Select example sports abundant evidence of late-state die fatigue. The obverse shows, according to our count, 11 different die cracks (your results may vary); practically every star shows die cracks through at least one point. The reverse shows only a single die crack but it's a doozy, long and straight down from the rim right of the M in AMERICA and through the trio of leaves below. Wheat-gold surfaces show scattered, grade-consistent marks, but this is a coin that specialists will admire and covet. Census: 47 in 63 (1 in 63+), 45 finer (3/16). NGC ID# 25BE, PCGS# 7508

**1850-C Gold Dollar, AU53
Scarce in All Grades, Original Coloration**

- 5632** 1850-C AU53 NGC. Variety 1. Fewer than 250 1850-C gold dollars are extant, making this among the more elusive dates in the Charlotte series in high grade. This AU coin displays outstanding olive-gold color with coppery overtones in the fields. Wear is minimal, although a few small abrasions are seen with a loupe. Census: 11 in 53, 52 finer (3/16). NGC ID# 25BG, PCGS# 7510

- 5633 1850-D — Scratches — NGC Details. AU. Variety 2-C.** This lightly marked 1850-D gold dollar has a few short, thin scratches that preclude a numeric grade, but bright yellow-gold fields and well-defined motifs increase the eye appeal. The 1850-D is elusive in high grade, coming from a mintage of 8,382 coins. NGC ID# 25BH, PCGS# 7511

**1850-D Gold Dollar, AU53
Pleasing Color and Surfaces**

- 5634 1850-D AU53 NGC. Variety 2-C.** With a mintage of 8,382 pieces, the 1850-D gold dollar is significantly scarcer than the previous issue from this mint. Fewer than 125 pieces are thought to survive. This AU coin displays light wear over well-struck motifs with deep olive-gold coloration overall. There are no singular abrasions noticed. Census: 13 in 53, 63 finer (3/16). NGC ID# 25BH, PCGS# 7511

- 5635 1851-D — Obverse Scratched — NGC Details. AU. Variety 3-E.** In the context of Dahlonega gold, the 1851-D gold dollar is among the most plentiful issues in the series, although high-end coins are still scarce. This piece shows a bold strike from clashed dies with rich orange-gold surfaces. A thin, barely visible scratch above Liberty's head precludes a numeric grade from NGC. NGC ID# 25BM, PCGS# 7515

- 5636 1852-O MS62 NGC. Variety 1.** Attractive orange-gold luster appears on each side of this 1852-O gold dollar, a far-above-average survivor of the mintage of 140,000 coins. Some die clashing and a few scattered marks are evident in concert with the grade, and LA in DOLLAR and the 5 in the date are somewhat softly struck as expected, but this piece offers much remaining eye appeal. Census: 52 in 62, 32 finer (2/16). NGC ID# 25BT, PCGS# 7520

1853 Gold Dollar, Well-Preserved MS66

- 5637 1853 MS66 PCGS.** The 1853 gold dollar is available even at the Premium Gem grade level of the present coin, making it perfect for a high-grade type set to represent the Type One variant. Finer-graded examples of this date are elusive. The large mintage exceeding 4 million coins is largely explainable by the dearth in minor silver coinage, a drought that would end with the Arrows type coins of 1853-54. This piece displays glittering golden surfaces with no marks of any import, a couple of tiny ticks on the reverse are unbothersome. Population: 43 in 66 (3 in 66+), 12 finer (3/16). NGC ID# 25BU, PCGS# 7521

**1853-C Gold Dollar, AU58
Charlotte Type Coin**

- 5638 1853-C AU58 NGC. Variety 1.** The 1853-C gold dollar is moderately available in the context of Charlotte gold issues, suitable for the collector seeking a single example from this mint. The present near-Mint coin is conditionally scarce. The strike is well-executed, and the naturally toned surfaces display olive-gold patina. A few tinges of luster emerge from the reverse peripheries. In all grades, fewer than 300 examples of this issue are believed extant. Census: 38 in 58, 48 finer (3/16). NGC ID# 25BV, PCGS# 7522

**1854 Type Two Gold Dollar, MS64
Fully Struck and Semiprooflike**

- 5639 1854 Type Two MS64 PCGS.** The redesigned gold dollar that was introduced in 1854 resembled Longacre's three dollar gold piece. The design change only lasted two years (except in the San Francisco Mint), and was changed again in 1856. One trait often seen on Type Twos is seen on this piece: heavily clashed dies. However, two attributes not usually seen on this type: full strike definition and bright semiprooflike fields. Each side is also covered with rich reddish patina. An exceptional coin for this limited type. NGC ID# 32EH, PCGS# 7531

- 5640 1855 Type 2 MS61 NGC. CAC.** An attractive Mint State specimen of this popular, short-lived design type, with well-detailed design elements and slightly subdued mint luster. The pleasing orange-gold surfaces are minimally abraded for the grade. NGC ID# 25C4, PCGS# 7532

- 5641 1855 Type 2 MS62 PCGS.** This well-detailed MS62 gold dollar represents the short-lived Type Two design type. The pleasing orange-gold surfaces display vibrant mint luster on both sides with the expected number of minor contact marks for the grade. NGC ID# 25C4, PCGS# 7532

- 5642 1856 Upright 5 MS64 PCGS.** The scarcer Upright 5 variety, seldom seen in any Mint State grade. This Choice example displays well-struck design elements and frosty palomino-gold luster. Only a few faint grazes are detectable beneath a loupe. Eye appeal is particularly pleasing. Population: 24 in 64 (2 in 64+), 6 finer (3/16). NGC ID# 25CB, PCGS# 7541

**1856-D Gold Dollar, AU53
Dahlonge Rarity**

5643 1856-D AU53 NGC. Variety 8-K. The rarity of the 1856-D gold dollar stems mostly from its paltry mintage of 1,460 coins and the typically high attrition rate of Dahlonge gold. Doug Winter calls this issue one of the rarest gold dollars from this mint with fewer than 100 coins extant. This is in agreement with the certified population total, which records 87 grading events at NGC and PCGS combined. The present AU coin displays lightly clashed dies and pleasing honey-gold surfaces. Mild strike weakness on the wreath bow is typical of the issue. Census: 3 in 53, 25 finer (3/16). NGC ID# 25CC, PCGS# 7543

5644 1859 MS64 PCGS. Some strike softness (or is it die crumbling?) shows on the O in DOLLAR but the strike is elsewhere fairly sharp. Attractive luster endows the wheat-gold surfaces with vivacious appeal. This early Type Three mintage exceeded 168,000 circulation strikes. A couple of marks show on Liberty's chin. Population: 28 in 64 (2 in 64+), 33 finer (3/16). NGC ID# 25CL, PCGS# 7551

**1859-S Gold Dollar, Frosty MS61+
"One of the Rarest Gold Dollars in Mint State"**

5645 1859-S MS61+ NGC. Four mints struck gold dollars in 1859. Philadelphia manufactured the most coins by far, followed by San Francisco (15,000 coins). Southern branch mint output was characteristically low. The 1859-S is scarce in circulated condition and downright rare in Uncirculated grades, where only 10 to 20 pieces are believed extant. Bowers calls this "one of the rarest gold dollars in Mint State..." Liberty's curls and headdress are well-detailed, and the wreath elements are uniformly bold. Frosty luster emanates from minimally marked yellow-gold surfaces. Struck from slightly rotated dies. Census: 10 in 61 (1 in 61+), 1 finer (3/16). NGC ID# 25CP, PCGS# 7554

5646 1876 MS64+ PCGS. CAC. This is a glittering golden jewel overall, exhibiting generous luster and a single small area of dark toning on the obverse rim above the U in UNITED. Small ticks rather than mentionable contact appear. The reverse on its own merits a Gem grade. This issue was struck in the meager amount of 3,200 circulation strikes, and these low-mintage coins in high grades as a whole seem underrated to us. Population: 2 in 64+, 14 finer. CAC: 4 in 64, 8 finer (2/16). NGC ID# 25DE, PCGS# 7577

**1877 Gold Dollar, MS67
Highly Eye-Appealing**

5647 1877 MS67 PCGS. The 1877 gold dollar boasts a small 3,900-coin mintage, and Mint State examples become increasingly elusive in succeeding grades. This Superb Gem representative is rare, and finer coins are exceedingly so. The delightful fields are semiprooflike, and the frosty motifs display sharp definition. Delicate peach and cream-gold coloration adorns each side. Population: 13 in 67 (1 in 67+), 3 finer (3/16). NGC ID# 25DE, PCGS# 7578

**1879 Gold Dollar, MS66
Mirrored Obverse, Frosty Reverse
Ex: Duckor**

5648 1879 MS66 PCGS. CAC. Ex: Duckor. This hybrid Premium Gem exhibits a prooflike obverse with fully mirrored fields around frosty and lustrous devices. The reverse shows frosty luster against slightly reflective fields. Brilliant yellow surfaces exhibit delicate rose and pale blue overtones. Both dies are lightly clashed. The prooflike obverse is likely the result of a resurfaced or lapped die that earlier showed much heavier clash marks. That obverse die was placed in the press with a reverse die that had been used for many strikes, creating the hybrid appearance seen on this example. Several similar pieces have appeared in our past auctions.

The 3,000 circulation-strike and 30 proof gold dollars produced in 1879 marked the start of the "late era" of gold dollar coinage. The continued growth of the numismatic hobby in 1879 and beyond was characterized in part by hoarding activities of collectors and dealers. Among them was the Chicago brewer, Virgil M. Brand. Dave Bowers reports in *A Guide Book of Gold Dollars* that an unidentified Baltimore investor (possibly T. Harrison Garrett) acquired large quantities of 1879, 1880, and 1881 gold dollars. As a result, those issues remain plentiful today, despite the low mintage figures. Population: 39 in 66 (2 in 66+), 8 finer (3/16).

Ex: *Long Beach Signature* (Heritage, 6/2013), lot 5546; *The Duckor Family Collection of Gold Dollars / ANA Signature* (Heritage, 8/2015), lot 4280. NGC ID# 25DH, PCGS# 7580

**1879 Gold Dollar, MS66+ ★
Few Are Finer**

- 5649 1879 MS66+ ★ NGC.** Distinctly prooflike on the obverse yet more frosty on the reverse, this lustrous and vibrantly attractive Premium Gem gold dollar is a mere whisker from the Superb category. The strike is quite sharp but not entirely full, easily overlooked based on the undeniably exceptional eye appeal. Light die clashing visits both sides, creating the few interruptions on the otherwise smooth fields. Sun-gold coloration blazes from both sides. Census: 26 in 66 (1 in 66+, 2 in 66 ★, 1 in 66+ ★), 17 finer (3/16). NGC ID# 25DH, PCGS# 7580

**1880 Gold Dollar, MS66+
Sharply Detailed Example**

- 5650 1880 MS66+ NGC. CAC.** Only 1,600 business-strike gold dollars were struck at the Philadelphia Mint in 1880. This high-end Premium Gem offers razor-sharp definition on all design elements and the well-preserved orange-gold surfaces are brightly lustrous, with much prooflike reflectivity. Census: 54 in 66+, 91 finer (3/16). NGC ID# 25DJ, PCGS# 7581

**1880 Gold Dollar, Glittering MS67+
Just 1,636 Pieces Struck**

- 5651 1880 MS67+ PCGS. CAC.** The low mintage is a fooler, because many 1880 gold dollars were saved by enterprising speculators and sharp-eyed jewelers. Even so, few surviving coins can exceed the visual appeal of this dazzling example, which displays rose highlights on the central motifs surrounded by deeply lustrous, lemon-gold fields. Sharply struck and CAC endorsed, only a few trivial marks separate this high-end Superb Gem from an even higher numeric grade. NGC ID# 25DJ, PCGS# 7581

**1880 Gold Dollar, MS67 ★ + Prooflike
One Numerically Finer at NGC**

- 5652 1880 MS67 ★ + Prooflike NGC.** The 1880 gold dollar boasts a low-mintage of 1,600 pieces, but the issue is more available than that tiny production total would suggest. This magnificent Superb Gem is sharply detailed and impeccably preserved, with deep prooflike reflectivity in the fields. Eye appeal is simply terrific, as attested by the Star designation. Census: 16 in 67 (5 in 67 ★ Prooflike, 1 in 67+★), 1 finer. NGC ID# 25DJ, PCGS# 77581

- 5653 1882 MS66 PCGS. CAC.** Despite a mintage of only 5,000 pieces, the 1882 gold dollar was heavily saved in Mint State, making it collectible today. This Premium Gem CAC coin displays frosty golden luster and well-defined motifs. Only a few stray lines on the obverse limit the grade. Population: 33 in 66, 41 finer; CAC: 3 in 66, 21 finer (3/16). NGC ID# 25DL, PCGS# 7583

- 5654 1882 MS66 PCGS. CAC.** A razor-sharp sun-gold and jade-green Premium Gem. Lustrous and pristine with outstanding eye appeal. A number were saved from the mintage of 5,000 pieces, but relatively few survivors are comparable in quality. NGC ID# 25DL, PCGS# 7583

- 5655 1885 MS66 NGC.** Frosty luster complements the bold strike on this Premium Gem 1885 gold dollar, showcasing blended honey, rose, and mint-gold hues. There are no significant abrasions on this Type Three gold dollar. Census: 54 in 66 (1 in 66 ★), 35 finer (2/16). NGC ID# 25DP, PCGS# 7586

- 5656 1888 MS66 PCGS.** This collectible late-series issue is usually available for type purposes. The present example is boldly struck with frosty wheat-gold luster and beautifully preserved surfaces. Finer coins are occasionally seen, but this piece will appeal far more to budget-conscious collectors. NGC ID# 25DT, PCGS# 7589

- 5657 1889 MS66 NGC.** A pleasing final-year type coin, this Premium Gem 1889 gold dollar displays frosty rose-gold luster over unabraded surfaces. The strike is sharp, and eye appeal is correspondingly high. NGC ID# 25DU, PCGS# 7590

- 5658 1889 MS66+ PCGS. CAC.** The 1889 is an ideal type-coin issue, being readily available in most grades. This high-end Premium Gem displays a bold strike and frosted prairie-gold luster. There are no bothersome abrasions, and eye appeal is correspondingly high. NGC ID# 25DU, PCGS# 7590

**1889 Gold Dollar, MS67
Outstanding Final-Year Type Coin**

- 5659 1889 MS67 PCGS.** A nominal mintage of 29,000 gold dollars was accomplished at the Philadelphia Mint in 1889, the final year of the denomination. This delightful Superb Gem exhibits sharply detailed design elements throughout, and the impeccably preserved orange-gold surfaces radiate vibrant mint luster. Eye appeal is terrific. PCGS has graded nine numerically finer examples (2/16). NGC ID# 25DU, PCGS# 7590

EARLY QUARTER EAGLE

**1798 Quarter Eagle, VF25
Rare BD-2 Die Marriage**

- 5660 1798 Five Berries, BD-2, R.5, VF25 PCGS.** Bass-Dannreuther Die State a. BD-2 is rare with only 45-55 pieces believed known in all grades. This is a problem-free midgrade coin with original wheat-gold surfaces and significant detail remaining. The surfaces are smooth, and the strike is even. This is a rare opportunity to acquire a problem-free early quarter eagle in an affordable grade. NGC ID# 25F5, PCGS# 45505 Base PCGS# 7649

CLASSIC QUARTER EAGLES

- 5661 1836 Block 8 AU55 NGC. Breen-6142, Variety 8, R.3.** Large Head of 1834. This is a Choice AU Classic Head type coin, displaying bright yellow-gold surfaces and sharp detail. A tiny copper spot appears between stars 5 and 6. The 1836 had the highest mintage of the series (nearly 550,000 pieces), making it ideal for type purposes. NGC ID# 25FU, PCGS# 97694
- 5662 1836 Block 8 AU55 PCGS. CAC. Breen-6144, Variety 15, R.2.** A Block 8, short first curl, and the presence of a berry on the branch confirm the attribution. All stars show full centers, and abundant luster glistens from each side. A hint of friction over the strongly struck devices is essentially invisible. Original khaki and straw-gold coloration adds to the appeal. NGC ID# 25FU, PCGS# 97694

**1836 Quarter Eagle, MS63
Variety 15, Block 8**

- 5663 1836 Block 8 MS63 PCGS. Breen-6144, Variety 15, R.2.** Second Head of 1837. The Block 8 1836 quarter eagle variety is scarcer in Mint State than its Script 8 counterpart. This Select example displays attractive surfaces with softly frosted yellow-gold luster. Some strike weakness is seen on the high points of the portrait and on the left side of the reverse shield, but the eye appeal remains pleasing. Population: 12 in 63, 15 finer (3/16). NGC ID# 25FU, PCGS# 97694

**1839 Two and a Half, AU55
Choice Original Surfaces**

- 5664 1839 AU55 PCGS. CAC. Breen-6148, Variety 21, R.3.** As the final year of the Classic Head quarter eagles, conventional wisdom would expect many pieces to be numismatically preserved, but apparently that is not the case with this underappreciated Philadelphia issue. The mintage of 27,021 pieces shows surprisingly few grading events. This About Uncirculated example is a Choice representative of the date, earning CAC endorsement. Lovely greenish-gold surfaces retain pleasing mint luster in protected areas, and abrasions are few, tiny, and far between. The coin displays a sharp strike with no mentionable distractions whatsoever. Population: 19 in 55, 18 finer (2/16). NGC ID# 25G3, PCGS# 7698

LIBERTY QUARTER EAGLES

- 5665 1843-C Large Date, Plain 4 VF35 ANACS. Variety 1.** Dusky apricot-gold, olive-green, and rose-red toning confirms the originality of this Choice VF Charlotte quarter eagle. Traces of dirt reside in design crevices, a look preferred by Southern gold specialists. Without relevant marks or flan issues. NGC ID# 7HLG, PCGS# 7728

**1844 Liberty Quarter Eagle, MS60
Low-Mintage Condition Rarity**

5666 1844 MS60 PCGS. Only 6,784 Liberty quarter eagles were struck at the Philadelphia Mint in 1844, and few Mint State examples have survived. This attractive MS60 specimen exhibits well-detailed design elements and vivid orange-gold surfaces that show the minimum number of minor contact marks for the grade. Population: 2 in 60, 1 finer (3/16). NGC ID# 25GT, PCGS# 7734

5667 1846-C — Scratch — PCGS Genuine. XF Details. Variety 1. A meager mintage of 4,808 pieces ensures the rarity of this Charlotte two and a half. The original peach and lemon surfaces are attractive despite three pinscratches on the field near the hairbun. The stars and curls are sharp, though the eagle's neck and leg plumage is incompletely brought up. NGC ID# 25H2, PCGS# 7741

5668 1846-O AU55 PCGS. Variety 1. This is the reverse usually seen of the three known for the issue, the mintmark virtually touching the eagle's claw. The honey-gold surfaces show attractive eye appeal with scattered, trivial ticks consistent with the Choice AU grade. Only 62,000 pieces were made for this issue. Population: 12 in 55, 40 finer (2/16). NGC ID# 25H4, PCGS# 7743

5669 1846-O AU58 PCGS. Variety 1. A butter-gold example with occasional glimpses of rose-red in protected areas of the reverse. Lightly abraded and partly lustrous with moderate inexactness of strike on LIBERTY and the eagle's legs. A relatively scarce New Orleans issue with a scant production of 62,000 pieces. Population: 25 in 58, 16 finer (3/16). NGC ID# 25H4, PCGS# 7743

5670 1847-O AU55 PCGS. Variety 7. The first example we can recall for the present die marriage, noteworthy for its high and left mintmark placement. This lemon-gold example has a typical strike but is refreshingly unabraded. Luster illuminates the borders and motifs. NGC ID# 25H8, PCGS# 7747

5671 1848-C — Cleaning — PCGS Genuine. XF Details. Variety 1. Luster fills the reverse legends, and the eagle's plumage is generally sharp. The straw-gold obverse displays horizontal hairlines and has a cloudy appearance. The lemon-gold reverse is minimally hairlined and attractive. An elusive Charlotte issue with a mintage of 16,788 pieces. NGC ID# 25HB, PCGS# 7750

5672 1848-D VF35 PCGS. Variety 10-N. The obverse appears sharper than the designated Choice VF grade, while the reverse shows considerable wear on the eagle. The luminous honey-gold surfaces lack any relevant abrasions. From a low mintage of 13,771 pieces. NGC ID# 25HC, PCGS# 7751

5673 1849-D VF35 PCGS. CAC. Variety 11-N. The present lot is the sole VF35 example with a CAC seal. It is a green-gold and orange piece with partial curl and plumage definition. No marks are of any interest, and hints of luster fill the legends and outline the motifs. A challenging Dahlonega issue with a mintage of just 10,945 pieces. NGC ID# 25HF, PCGS# 7754

**1850-D Quarter Eagle, AU50
Smooth Surfaces, Problem-Free**

5674 1850-D AU50 PCGS. Variety 13-N. The 1850-D quarter eagle is elusive in all grades with fewer than 225 pieces believed extant. This AU example is delightfully original with honey and amber-gold patina over smooth, problem-free surfaces. Small hints of original luster remain in the protected peripheral regions. Eye appeal for surpasses expectations. This old-time Dahlonega quarter eagle should see spirited bidding among knowledgeable specialists. NGC ID# 25HJ, PCGS# 7757

5675 1852 MS64 NGC. The large mintage of more than 1.1 million quarter eagles in 1859 was accomplished partly with dies such as this one, showing numerous peripheral die cracks connecting several of the obverse stars. The blond-gold surfaces are lustrous and well-struck. Despite the large mintage, few examples of this date survive finer. Census: 55 in 64 (1 in 64+, 1 in 64 ★), 8 finer (3/16). NGC ID# 25HR, PCGS# 7763

**1855-C Quarter Eagle, XF45
Outstanding Color and Surfaces**

5676 1855-C XF45 PCGS. CAC. Variety 1. The number of surviving 1855-C quarter eagles resides around the 100-coin mark or even a little less. This date is among the scarcest Charlotte issues in the quarter eagle series, with a mintage 3,677 pieces. The present coin displays remarkably smooth, problem-free surfaces with hints of luster and rich coppery-gold and orange patina. Light wear is seen over the well-struck motifs. Population: 10 in 45, 53 finer (3/16). NGC ID# 25J5, PCGS# 7775

5677 1856 MS64 PCGS. The 1856 Liberty quarter eagle claims a substantial mintage of 384,240 pieces, but few high-quality examples have survived. This attractive Choice example is well-detailed, with a touch of the usual softness on the eagle's leg. The lustrous, well-preserved surfaces display orange and rose-gold patina. Population: 26 in 64, 10 finer (2/16). NGC ID# 25J7, PCGS# 7777

5678 1856-S AU55 PCGS. CAC. The 1856-S quarter eagles all show the italic or slanted 5 style in the date with other digits upright, a quaint and piquant vagary of the issue. Struck in the amount of 72,120 coins, the issue is the first collectible quarter eagle from the San Francisco Mint — none were struck in 1855, and the 1854-S is a great rarity with a dozen or so surviving today. This Choice AU piece shows great color and luster despite scattered abrasions, light wear, and light buildup in some of the reverse devices. Population: 26 in 55, 39 finer. CAC: 4 in 55, 16 finer (2/16). NGC ID# 25KL, PCGS# 7781

5679 1861 Old Reverse, Type One, AU55 ANACS. Breen-6256. Partially lustrous, smooth fields deliver pleasing eye appeal on this Choice AU Old Reverse 1861 quarter eagle. The central eagle is slightly soft, but the obverse portrait is bold. Eye appeal is excellent. There are no bothersome abrasions. Housed in an old white, small-size ANACS holder. NGC ID# 25JX, PCGS# 97794

5680 1862 AU58 PCGS. The strongly impressed design elements of this attractive near-Mint specimen show just a trace of wear on the high points, and the lightly abraded orange-gold surfaces retain much of their original mint luster. Population: 20 in 58, 32 finer (3/16). NGC ID# 25JZ, PCGS# 7796

5681 1866 XF40 ANACS. This lightly circulated 1866 quarter eagle survives from a small mintage of 3,080 pieces. Perhaps 60 to 75 additional examples are known in all grades, almost none in Mint State. This piece displays smooth, problem-free surfaces with olive-gold color. Obviously original surfaces. NGC ID# 7FRZ, PCGS# 7803

5682 1866-S AU55 NGC. Dusky peach, lavender, and violet elements mingle on the still-luminous surfaces of this lightly worn Choice AU coin. Devices and fields alike are minimally abraded for the grade. The mintage of 38,900 pieces was hard-used in Western commerce. Census: 29 in 55 (1 in 55+★), 34 finer (2/16). Ex: *Houston Signature (Heritage, 11/2012), lot 4787.* NGC ID# 25K8, PCGS# 7804

5683 1869-S AU58 PCGS. This Reconstruction-era San Francisco quarter eagle is scarce in all grades and rare in Mint State. Here is a collectible near-Mint example that retains sharp detail and modest luster. Both sides are deep orange-gold and highly appealing without heavy abrasions. Population: 42 in 58, 17 finer (3/16). NGC ID# 25KE, PCGS# 7810

5684 1870 AU58 PCGS. Trivial high-point friction and scattered abrasions define the grade on this near-Mint 1870 quarter eagle, although none of this hinders the prooflike mirroring in the fields. Each side displays yellow-gold luster and plentiful eye appeal. The 1870 had a small mintage of 4,520 coins and is scarce in all grades. Population: 16 in 58, 9 finer (3/16). NGC ID# 25KE, PCGS# 7811

5685 1873 Closed 3 MS64 PCGS. A frosty green-gold example of the Closed 3 1873 quarter eagle, showing minimal abrasions. The eagle's left (facing) leg is slightly weak, but the obverse is well-defined. Finer examples are rare, Closed 3 and Open 3 coins combined. Population: 53 in 64 (2 in 64+), 12 finer (3/16). NGC ID# 25KN, PCGS# 7818

5686 1876-S AU58 PCGS. A low-mintage branch mint issue with a production of just 5,000 coins. Uncirculated survivors are rare. This near-Mint piece displays little high-point wear and has satiny straw-gold surfaces. The eagle's left (facing) leg shows minor strike weakness. Population: 18 in 58, 19 finer (3/16). NGC ID# 7JS6, PCGS# 7825

5687 1887 MS63 PCGS. Some crumbling appears in the dentilation on the left side of the reverse. A curving, U-shaped strike-through appears at Liberty's jawline, with some light marks nearby. Aside from those flaws, the reverse is fairly well-preserved, and both sides show an adequate strike. The 1887 quarter eagle saw an extremely low mintage of 6,160 circulation strikes at a time when few gold coins of any denomination were struck in Philadelphia. Population: 34 in 63, 21 finer (3/16). NGC ID# 25LB, PCGS# 7839

5688 1887 MS63 PCGS. A few scattered, minor contact marks are all that separate this attractive Select specimen from an even higher grade. The design elements are well-detailed and the orange-gold surfaces radiate vibrant mint luster. Population: 34 in 63, 21 finer (3/16). NGC ID# 25LB, PCGS# 7839

5689 1888 MS64 NGC. A mere 16,001 circulation strike quarter eagles were minted in Philadelphia in 1888, and high-grade survivors are seldom encountered. This Choice Mint State piece has frosty yellow luster and bold design features with delicate orange overtones. NGC has only certified 33 finer examples (3/16). NGC ID# 25LC, PCGS# 7840

5690 1888 MS64 PCGS. A crisply struck near-Gem with vibrant luster and clean surfaces. The mintage of 16,000 pieces ensures the scarcity of this issue. Population: 56 in 64 (2 in 64+), 32 finer (3/16). Ex: *Dan Brown (10/1966); Harry W. Bass, Jr. Collection, Part IV (Bowers and Merena, 11/2000), lot 250; Long Beach Signature (Heritage, 9/2003), lot 7727; FUN Signature (Heritage, 1/2013), lot 12781, which realized \$1,762.50.* NGC ID# 25LC, PCGS# 7840

1888 Quarter Eagle, MS65+ Only One Coin Finer at PCGS

5691 1888 MS65+ PCGS. CAC. A scarce Gem example of this low-mintage Philadelphia issue (16,001 coins), this piece also awarded a Plus designation and boasting comparable eye appeal. Frosty luster displays minimal disturbed orange-gold surfaces and mostly well-struck design elements — only the central shield lines on the reverse are slightly weak. Bold clash marks on the reverse attest to a late die state. Finer coins are rare. Population: 31 in 65 (3 in 65+), 1 finer (3/16). NGC ID# 25LC, PCGS# 7840

5692 1889 MS64 PCGS. The coin exhibits minor softness on the eagle's left (facing) leg and the BE in LIBERTY, but otherwise displays strong detail. The shimmering surfaces reveal subtle tones of copper and red. Population: 58 in 64 (1 in 64+), 11 finer (3/16). Ex: *Dallas Signature (Heritage, 4/2007), lot 1613.* NGC ID# 25LD, PCGS# 7841

1890 Quarter Eagle, MS64 Low-Mintage Issue

5693 1890 MS64 PCGS. Just 8,720 business strike quarter eagles were minted in 1890, all at the Philadelphia Mint. Survivors are generally in AU or lower Mint State grades, with an average certified grade of just MS60. This Choice Mint State example has a bold strike with splashes of orange toning on its yellow-gold surfaces. Population: 24 in 64, 5 finer (3/16). NGC ID# 25LE, PCGS# 7842

5694 1891 MS63 PCGS. Flashy fields give this honey-gold and apricot Select coin eye appeal well beyond what its MS63 designation might suggest. Crisply struck and housed in a green label holder. Population: 34 in 63, 42 finer (3/16). Ex: *Houston Signature (Heritage, 12/2013), lot 4913, which realized \$1,292.50.* NGC ID# BLFZ, PCGS# 7843

5695 1892 MS62 PCGS. The 1892 is part of a long run of low-mintage Liberty quarter eagles minted only in Philadelphia from 1880 to 1901. Just 2,440 circulation strikes were coined in 1892, and most survivors exhibit prooflike tendencies as seen on this piece. Sharply struck in brilliant yellow-gold, this example has trivial grade-consistent marks. Population: 21 in 62, 54 finer (3/16). NGC ID# 25LG, PCGS# 7844

**1892 Quarter Eagle, MS64
Low-Mintage Liberty Issue**

5696 1892 MS64 NGC. The 1892 quarter eagle had a mintage of 2,440 coins, and that was the lowest production total of any issue during the last two decades of the Liberty design. This Choice Mint State piece ranks high among those that are known, and it is only a few trivial marks shy of the Gem grade level. Both sides are highly lustrous with satiny, slightly reflective fields. Bold design elements are evident. Census: 9 in 64, 10 finer (3/16). NGC ID# 25LG, PCGS# 7844

5697 1894 MS63 NGC. The gorgeous, prooflike orange-gold surfaces are in concert with the low mintage of 4,000 circulation strikes. A loupe reveals only scattered, trivial abrasions amid a bold strike and some smoke-gray accents. Census: 37 in 63 (1 in 63+, 1 in 63 ★), 56 finer (3/16). NGC ID# 25LJ, PCGS# 7846

5698 1895 MS64 PCGS. Beautiful orange-gold toning endows this lustrous and intricately struck near-Gem. Thorough evaluation reveals only trivial contact. A scant 6,000 pieces were struck, and examples with comparable eye appeal are very scarce. Population: 34 in 64, 25 finer (3/16). NGC ID# 25LK, PCGS# 7847

5699 1896 MS65 NGC. Sharply struck with meticulous preservation, this outstanding Gem displays frosty wheat-gold coloration with dramatic eye appeal. The strike is razor-sharp, and a single tiny nick on the eyebrow is the only mark on Liberty's portrait. A great coin for the grade. Census: 61 in 65 (1 in 65+, 1 in 65 ★), 34 finer (3/16). NGC ID# 25LL, PCGS# 7848

5700 1897 MS65 PCGS. This sharp, frosty 19th century type coin might have garnered an even higher grade were it not for a few faint grazes in the left obverse field. The original surfaces yield pleasant green-gold coloration, and eye appeal is outstanding. PCGS records 43 finer examples (3/16). NGC ID# 25LM, PCGS# 7849

5701 1897 MS66 PCGS. A magnificent Premium Gem example of this underrated date, from a mintage of just 29,768 pieces. This attractive specimen exhibits needle-sharp devices, vibrant satiny mint luster, and light orange-gold surfaces. Eye appeal is outstanding. Population: 29 in 66, 14 finer (3/16). NGC ID# 25LM, PCGS# 7849

5702 1898 MS65+ NGC. Frosty yellow-gold luster illuminates bold design elements on this high-end Gem 1898 quarter eagle. A few minor grazes on the portrait are all that limit the grade. Despite a mintage of only 24,000 coins, this issue is usually available for type purposes. NGC ID# 25LN, PCGS# 7850

**1898 Quarter Eagle, MS65 Prooflike
Only 24,000 Coins Minted**

5703 1898 MS65 Prooflike NGC. NGC has certified 822 of the 24,000 quarter eagles minted at Philadelphia in 1898. However, Prooflike representatives make up only eight of those submissions. The Census shows one each in AU58, MS61, MS62, and MS63 plus two each in MS64 and MS65. This Gem, then, is tied with one other coin for finest with the Prooflike designation (3/16). Rich orange-gold color and reflective fields define this pleasing two and a half dollar gold piece. The devices show full detail. A small struck-in grease mark occurs between stars 5 and 6. NGC ID# 25LN, PCGS# 77850

5704 1901 MS65 PCGS. CAC. 30th Anniversary Green Label Holder. This CAC-endorsed Gem 1901 quarter eagle has obvious appeal as a 20th century type coin. The strike is bold, and the frosty luster displays original wheat-gold color. A lack of distracting abrasions heightens the visual merit. NGC ID# 25LS, PCGS# 7853

5705 1903 MS66 PCGS. CAC. The design elements of this spectacular Liberty quarter eagle exhibit razor-sharp definition in all areas and the impeccably preserved orange-gold surfaces offer radiant satiny mint luster. Eye appeal is terrific. NGC ID# 2688, PCGS# 7855

**1904 Quarter Eagle, MS67+
Only One Finer at PCGS**

5706 1904 MS67+ PCGS. CAC. 30th Anniversary Green Label Holder. Wisps of greenish color appear on this Superb Gem 1904 quarter eagle, a boldly defined, frosty, and highly lustrous yellow-gold example. Delicate orange overtones enhance the eye appeal. Population: 52 in 67 (2 in 67+), 1 finer (3/16). NGC ID# 25LV, PCGS# 7856

5707 1905 MS66 PCGS. Sharp at the borders and nearly free of the bothersome copper stains that plague the 1905 issue, this smooth and lustrous quarter eagle is clearly deserving of its Premium Gem grade. There are no marks to mention aside from a trace of copper alloy at Liberty's top hairline. Lovely greenish-gold surfaces radiate satin-smooth mint luster. NGC ID# 267S, PCGS# 7857

**1905 Two and a Half, MS67
High-End Type Coin**

5708 1905 MS67 PCGS. Frosty yellow-gold luster yields hints of peach, rose, and mint-green when rotated beneath a light. The preservation is outstanding, and the strike is sharp. This Superb Gem 1905 Liberty quarter eagle is an ideal type coin, conditionally scarce this fine. Higher-grade pieces are rare. Population: 82 in 67 (4 in 67+), 4 finer (2/16). NGC ID# 267S, PCGS# 7857

5709 1906 MS66 NGC. A wonderful Premium Gem and seldom found nicer, this quarter eagle is boldly defined with fully brilliant mint frost and pristine surfaces. NGC has only certified 88 finer examples (3/16). NGC ID# 7JW8, PCGS# 7858

5710 1907 MS66 PCGS. The 1907 is the final issue in the Liberty quarter eagle series, popular for type representation. This Premium Gem example displays sharp detail and frosty luster that shows hints of mint-green, peach, and rose. Housed in a green label holder. NGC ID# 2688, PCGS# 7859

PROOF LIBERTY QUARTER EAGLES

**Proof 1864 Quarter Eagle, Unc Details
Stark Contrast and Pleasing Eye Appeal**

5711 1864 — Altered Surfaces — PCGS Genuine. Proof, Unc Details. Proof quarter eagle coinage in 1864 amounted to just 50 pieces, and it is believed that only 25-30 survive today. For the collector desiring an example without breaking the bank, this deeply mirrored and starkly contrasted representative offers significant eye appeal. The strike is needle-sharp, and each side displays bright yellow-gold color. PCGS recognizes slightly altered surfaces, although a lack of severe hairlines in the fields balances the visual appeal. To the naked eye, this piece is reminiscent of an ordinary Deep Cameo proof. NGC ID# 287J, PCGS# 97890

**Proof 1894 Two and a Half
Uncirculated Sharpness**

5712 1894 — Residue — PCGS Genuine. Proof, Unc. Details. The full strike and field reflectivity confirm status as a proof. The radiant motifs demonstrate contrast with the fields. The fields have been coated with a translucent substance, and have a dimpled appearance from minute trapped air bubbles. Only 122 proofs were produced. NGC ID# 288H, PCGS# 7920

5713 1907 — Altered Surfaces — PCGS Genuine. Proof, Unc. Details. The yellow-gold fields retain substantial reflectivity despite distributed tiny marks. Lightly lacquered long ago, but no other impairments are apparent. A meager proof production of 154 pieces ensures the rarity. NGC ID# 7KG7, PCGS# 7933

INDIAN QUARTER EAGLES

5714 1908 MS64 PCGS. First year of the distinctive Bela Lyon Pratt design, illustrated here through a Choice Mint State piece that has frosty luster and sharp details. This piece exhibits a small orange toning spot below the Indian's chin. NGC ID# 288Y, PCGS# 7939

5715 1909 MS64 PCGS. CAC. Strong yellow-gold color with hints of peripheral orange characterize the satiny surfaces of this Choice Mint State example. The design elements offer slightly above-average definition for the issue.
Ex: Baltimore Signature (Heritage, 3/2009), lot 2694. NGC ID# 288Z, PCGS# 7940

**1909 Two and a Half, MS65
Lustrous Type Coin**

5716 1909 MS65 PCGS. The 1909 is one of the few Indian quarter eagles that are moderately available in Gem condition, ideal for type purposes. This piece displays a bold strike and satiny wheat-gold luster. There are a few faint grazes in the reverse fields but nothing out of line for the MS65 grade. PCGS lists only 19 finer representatives (3/16). NGC ID# 288Z, PCGS# 7940

1909 Quarter Eagle, MS65
Deep Coloration, Rare Any Finer

5717 1909 MS65 PCGS. A pleasing Indian Head type coin, this conditionally scarce 1909 quarter eagle displays satiny surfaces with rich orange-gold and coppery-red luster. The strike is bold, and there are no bothersome abrasions. Although collectible in MS65, this issue is significantly scarcer than the later dates from the 1920s. PCGS lists only 19 Premium Gems finer than the present coin (2/16). NGC ID# 288Z, PCGS# 7940

5718 1910 MS65 PCGS. Beautiful pumpkin-gold toning is seamless throughout both sides. A lustrous and pleasing Indian type coin. The strike is good despite minor merging on the lower headdress feathers. Certified in a green label holder. NGC ID# 2892, PCGS# 7941

1910 Quarter Eagle, Gorgeous MS65
Difficult at This Level of Preservation
Ex: Gardner

5719 1910 MS65 PCGS. CAC. Ex: Big Sky Collection. The 1910 is obtainable with minimum difficulty through near-Gem. The population declines significantly at the Gem level, however, and higher-grade pieces are elusive. Deep orange-gold, apricot, and yellow-gold patination envelops the lustrous surfaces of this stunning Gem, and sharply struck design elements further enhance its gorgeous eye appeal. Close examination reveals no significant marks. Moreover, Mint-made spotting and planchet defects, sometimes seen on this date, are absent on the present coin. In this regard, David Akers wrote of the 1910: "Examples that are smooth enough to grade at least MS65 are few and far between on the market." PCGS lists 11 finer representatives (3/16).

Ex: Purchased by Eugene Gardner from Legend Numismatics (4/2012); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98806. NGC ID# 2892, PCGS# 7941

5720 1911 MS64 NGC. Satiny yellow-gold luster illuminates well-struck design elements on this Choice 1911 Indian quarter eagle. Light, scattered ticks and grazes limit the grade but pose little distraction. Elusive in finer condition. NGC ID# 7KR6, PCGS# 7942

5721 1911 MS64 NGC. CAC. Recently encased in one of NGC's new-style slabs, this near-Gem example of the available 1911 quarter eagle date displays much merit via strong luster and sparse signs of contact. Attractive caramel-gold coloration prevails throughout. NGC ID# 7KR6, PCGS# 7942

1911 Two and a Half, MS65+
Only One Coin Finer at PCGS

5722 1911 MS65+ PCGS. Unlike its key-date Denver counterpart, the 1911 Philadelphia quarter eagle is only marginally scarce in Gem condition. But the extreme rarity of finer pieces puts tremendous collector focus on high-end MS65 coins. This Plus-designated piece displays crisp detail and frosty green-gold luster. There are no bothersome abrasions. PCGS reports a single MS66 coin finer (2/16). NGC ID# 7KR6, PCGS# 7942

1911-D Quarter Eagle, AU55
Keystone Issue, Strong D

5723 1911-D AU55 PCGS. Strong D. A tiny production of 55,600 coins ensures the 1911-D quarter eagle's status as the hands-down keystone issue in the Bela Lyon Pratt series. The Denver mintmark is plainly visible on this collectible Choice AU example with light yellow-gold color and partial remaining luster. The devices display strong detail despite a trace of friction, and there are no mentionable abrasions. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, AU58
Strong D, Key Date

5724 1911-D AU58 PCGS. From a series-low mintage of 55,680 pieces, the 1911-D Indian quarter eagle is the recognized key to the series. This impressive near-Mint example shows just a trace of wear on the high points of the well-detailed design elements and the mintmark is quite bold. The lightly abraded orange-gold surfaces retain much of their original mint luster. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU58
Strong D Mintmark**

- 5725** 1911-D AU58 NGC. Strong D. The mintmark is plain on this near-Mint 1911-D quarter eagle, despite light high-point friction. The sharp knife rim along the upper-right obverse border is diagnostic of genuine examples. This piece is partially lustrous in the recesses and has smooth yellow-gold surfaces. A pleasing collector-grade example of this sought-after series key. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, Unc Details
Strong D**

- 5726** 1911-D — Improperly Cleaned — NGC Details. Unc. Strong D. A razor-sharp example of this key Denver issue, coming from a low mintage of 55,680 coins. This piece has been lightly cleaned in the past but has since acquired deep olive-gold patina over each side. There are no significantly bothersome abrasions on either side. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, Unc Details
Bold D Mintmark**

- 5727** 1911-D Strong D — Cleaning — PCGS Genuine. Unc Details. The yellow-gold surfaces of this piece are somewhat matte-like from cleaning, although with no evidence of wear. The bold D mintmark is sharper than we can recall on any other piece that we have examined. This is an important opportunity for the budget-conscious collector. NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half
Uncirculated Details**

- 5728** 1911-D — Improperly Cleaned — NCS. Unc Details. The 1911-D Indian quarter eagle is an important 20th century key. This attractive specimen features sharply detailed design elements and lightly marked orange-gold surfaces that show signs of a light cleaning at some point in the past. NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half, MS63
Strong D, Green Label Holder**

- 5729** 1911-D MS63 PCGS. Rich orange-gold luster adorns each side of this Select 1911-D quarter eagle, embracing minimally abraded surfaces and well-struck design elements. The mintmark is bold. This key-date issue is in high demand in Mint State, although coins grading finer than the present MS63 coin are out of reach for many collectors. Housed in a green label holder. NGC ID# 7KR7, PCGS# 7943

- 5730** 1912 MS63 PCGS. Despite the high mintage, the 1912 Indian quarter eagle is rather elusive, and surprisingly difficult to find when one is wanted. We have offered more 1911-D quarter eagles than 1912 examples over the last 23 years since we started our Permanent Auction Archives. This Select Mint State piece has brilliant yellow luster and frosty surfaces with trivial, grade consistent marks. NGC ID# 7KR8, PCGS# 7944

- 5731** 1912 MS64 NGC. The 1912 quarter eagle is available in MS64 but is scarce any finer. This near-Gem displays sharp detail and satiny wheat-gold coloration. A few minor grazes prevent Gem classification. NGC ID# 7KR8, PCGS# 7944

- 5732** 1912 MS64 NGC. CAC. Satiny bronze-gold luster gives this CAC-approved Choice 1912 Indian quarter eagle pleasing eye appeal. The strike is sharp, and the only singular abrasions are hidden within the upper portion of the headdress. Finer examples are scarce and out of reach for many collectors. NGC ID# 7KR8, PCGS# 7944

- 5733** 1913 MS64 PCGS. A pleasing type-coin issue, although Gem examples are scarce. This Choice 1913 quarter eagle displays well-struck design elements and original rose-gold and pale olive coloration over satiny luster. There are no mentionable abrasions. NGC ID# 7KR9, PCGS# 7945

- 5734** 1913 MS64 PCGS. CAC. The obverse of this near-Gem is remarkably well-preserved despite a couple of tiny ticks, with the majority of minor marks relegated to the reverse and determining the grade. A nicely struck example of this relatively available date, one that nonetheless becomes fairly scarce in MS64 and very scarce in MS65. NGC ID# 7KR9, PCGS# 7945

5735 1914 MS62 NGC. The 1914 is the secondmost elusive issue after the 1911-D. Olive-green overtones accent rich, golden-orange color overall. The motifs exhibit a typically sharp impression. A thin linear mark extends from star 3 to the necklace, and flecks of darker patina appear over each side. NGC ID# 7KRA, PCGS# 7946

5736 1914 MS62 PCGS. A collector-grade Mint State example of this better-date Philadelphia issue, the 1914 Indian quarter eagle. Satiny surfaces submit to original olive-gold patina, which partially masks many of the grade-limiting abrasions. Well-struck, with pleasing appeal for the grade. NGC ID# 7KRA, PCGS# 7946

5737 1914 MS62 PCGS. Some scattered, minor contact marks define the grade of this attractive MS62 Indian quarter eagle. The design elements are well-detailed and the orange-gold surfaces retain almost all of their original mint luster. NGC ID# 7KRA, PCGS# 7946

5738 1914 MS62+ NGC. CAC. A few small copper alloy spots scattered around, and a couple of tiny dark flecks, fail to defeat the broad eye appeal created by relatively clean surfaces free of major abrasions. The surfaces sport bounteous luster on this somewhat better-date issue. NGC ID# 7KRA, PCGS# 7946

5739 1914 MS63 NGC. Emphasis is on the word "select" for this Select Uncirculated quarter eagle, which is exceptionally toned in blaze-orange hues with rich, underlying luster and violet overtones. A bold strike provides sharp detail for the sunken design elements. Some isolated, delicate hairlines and a few light abrasions on the high fields limit the technical grade, but this low-mintage Philadelphia issue has eye appeal suggestive of an even higher grade. NGC ID# 7KRA, PCGS# 7946

5740 1914 MS63 PCGS. The 1914 had a mintage of 240,000 coins, second only to the 1911-D, and it is an important issue in the Indian quarter eagle series. This Select Mint State beauty features a bold strike and soft, frosty yellow-gold luster. NGC ID# 7KRA, PCGS# 7946

5741 1914 MS63 PCGS. The 1914 quarter eagle ranks third in overall rarity within the 15-coin Indian Head series, although it is second in Mint State rarity. This Select example shows a few light marks but smooth surfaces and nice mint luster over the wheat-gold surfaces. The strike is sharp throughout. NGC ID# 7KRA, PCGS# 7946

5742 1914 MS63 PCGS. An attractive Select example of this low-mintage issue, with well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. One of the series condition keys in higher grades. NGC ID# 7KRA, PCGS# 7946

1914 Indian Quarter Eagle, MS64 Second-Lowest Mintage of the Series

5743 1914 MS64 NGC. This satiny almond-gold Indian quarter eagle is refreshingly free from abrasions, and the strike is consistent throughout the devices. The 1914 is a semi-key issue, primarily because it has the second-lowest mintage of the type. It is also generally found in grades between AU58 and MS63, according to the grading events at both services combined. Just 48 coins are numerically finer at NGC (3/16). NGC ID# 7KRA, PCGS# 7946

5744 1914-D MS64 NGC. A semikey date, rarely seen in Gem condition. This Choice 1914-D quarter eagle displays bright rose-gold luster and sharp design elements. Luster is notably bright and satiny. NGC lists 44 finer coins, including resubmissions (3/16). NGC ID# 2899, PCGS# 7947

1914-D Quarter Eagle, MS64+ Elusive Any Finer

5745 1914-D MS64+ PCGS. CAC. A solitary, shallow line through 914 of the date is seemingly the sole drawback from an even finer grade for this conditionally scarce Indian Head quarter eagle. The lustrous, wheat-gold fields and devices show only minor abrasions over the sharply struck incuse design. Overall, the 1914-D quarter eagle is the third-rarest issue of the widely-collected series according to Mike Fuljenz. This example is Plus-graded with CAC endorsement. Just 50 pieces are numerically finer at PCGS (3/16). NGC ID# 2899, PCGS# 7947

1914-D Two and a Half Dollar, MS64+ Better Date, Excellent Eye Appeal

5746 1914-D MS64+ PCGS. CAC. A 1914-D quarter eagle is often one of the final pieces necessary to complete the 15-issue Bela Lyon Pratt set. High-end near-Gems like this are moderately elusive, and finer coins are generally out of reach for most collectors. Rich yellow-gold color and vibrant mint luster deliver excellent eye appeal. Strike definition is above-average, and the mintmark is bold. NGC ID# 2899, PCGS# 7947

5747 1915 MS64 NGC. An available date, suitable for type purposes. This Choice 1915 Indian quarter eagle displays glistening honey-gold luster and sharp relief detail. A few stray grazes in the upper-right reverse field are all that limit the grade. NGC ID# 7KRC, PCGS# 7948

5748 1915 MS64 PCGS. CAC. The 1915 Philadelphia quarter eagle is a slightly better P-mint issue in the series, ranked the same as the 1909, 1911, 1913, and 1929 issues according to the PCGS Set Composition, making it a tad more difficult than the 1908, 1925-D, and 1926-28 dates. This auburn-blond near-Gem boasts ample luster and excellent preservation for the grade over no-problem surfaces. NGC ID# 7KRC, PCGS# 7948

5749 1915 MS64+ PCGS. CAC. This 1915 Indian quarter eagle shows original green-gold luster without any bothersome abrasions. The strike is well-executed and the overall eye appeal is suitable for inclusion in a budget-friendly type set. NGC ID# 7KRC, PCGS# 7948

5750 1915 MS64+ PCGS. CAC. Only one tiny, straight tick appears on the Indian's cheek, consistent with the near-Gem grade of this appealing type coin. The exposed fields on both sides are relatively well-preserved, and ample luster complements attractive orange-gold patina. Population: 49 in 64+ (3/16). NGC ID# 7KRC, PCGS# 7948

1915 Two and a Half, MS65 Rare Any Finer

5751 1915 MS65 NGC. A softly frosted Gem type coin, this 1915 Indian quarter eagle shows luminous wheat-gold surfaces and pleasantly sharp devices. Examples are infrequently seen in this grade, and just eight coins are numerically finer at NGC (3/16). The Indian quarter eagle series is a popular and challenging set to assemble in Gem grade. NGC ID# 7KRC, PCGS# 7948

5752 1925-D MS65 PCGS. A vibrant and attractively toned quarter eagle, with variegated shades of mint-green, lilac, and olive-gold flashing across the Gem orange-gold surfaces. A sharp strike covers all of the incuse motifs, while abrasions are scarcely seen on the raised fields. The eye appeal is terrific. Housed in a green label holder. NGC ID# 7KRD, PCGS# 7949

5753 1925-D MS65 NGC. This is an interesting 1925-D quarter eagle. The surfaces show expectedly vibrant luster and unabraded fields for the Gem grade level, but the central portions of the Indian's headdress and the eagle's wing are unusually weak. Frosty yellow-gold surfaces are nonetheless pleasing on the eyes, and numerically finer representatives are seldom seen. NGC ID# 7KRD, PCGS# 7949

5754 1925-D MS65 PCGS. Sharply detailed and brightly lustrous, this attractive Gem offers well-preserved orange-gold surfaces and outstanding eye appeal. The 1925-D Indian quarter eagle is seldom encountered in grades above MS65, as PCGS has graded 35 numerically finer examples (3/16). NGC ID# 7KRD, PCGS# 7949

5755 1925-D MS65 PCGS. The well-preserved orange-gold surfaces of this popular Indian quarter eagle are lustrous and appealing, with sharply detailed design elements and outstanding eye appeal. PCGS has graded 35 numerically finer examples (3/16). NGC ID# 7KRD, PCGS# 7949

5756 1925-D MS65+ NGC. The 1925-D is a favorite type-coin issue. This high-end Gem is far finer than most MS65-graded examples. Frosty yellow-gold luster is devoid of abrasions save for a few tiny marks in the left obverse field. Eye appeal is superb. Finer coins are scarce. NGC ID# 7KRD, PCGS# 7949

5757 1926 MS65 PCGS. 30th Anniversary Green Label Holder. Gem-quality Indian quarter eagles experience strong demand from both type collectors and ambitious date-and-mintmark enthusiasts. This MS65 1926 quarter eagle displays a bold strike and unabraded wheat-gold surfaces. Glowing, frosty luster is the epitome of eye appeal. PCGS lists 43 finer coins (3/16). NGC ID# 7KRE, PCGS# 7950

5758 1926 MS65 PCGS. The 1926 Indian quarter eagle is an elusive issue in grades above MS65. This handsome Gem exhibits well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and excellent eye appeal. PCGS has graded 43 numerically finer examples (3/16). NGC ID# 7KRE, PCGS# 7950

5759 1928 MS65 PCGS. The 1928 Indian quarter eagle is plentiful in MS65, unlike so many other dates in the series, but finer coins are rare. This piece displays well-struck design elements with frosty orange-gold luster that shows lilac highlights. Eye appeal is pleasing. PCGS lists 11 finer representatives (3/16). NGC ID# 289E, PCGS# 7952

5760 1928 MS65 PCGS. 30th Anniversary Green Label Holder. Even on close inspection, the vivid orange-gold surfaces of this delightful Gem show no mentionable distractions, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is quite strong. PCGS has graded 11 numerically finer examples (3/16). NGC ID# 289E, PCGS# 7952

THREE DOLLAR GOLD PIECES

5761 1854 AU58 PCGS. Light high-point wear accompanies surfaces that still retain most of their mint luster on this first-year-of-type coin. A few stray scrapes on Liberty and in the obverse fields are consistent with a modicum of circulation. The reverse is a bit better-preserved overall. A nice coin for the type and grade. NGC ID# 25M3, PCGS# 7969

5762 1854 AU58 NGC. Struck from multiply clashed dies. Nevertheless, the motifs retain sharp definition and moderate mint luster remains across the near-Mint, wheat-gold surfaces. Some old, deep colored build-up and minor abrasions are visible with a glass. The 1854 is always in demand as the first issue of the three dollar series and as a one-year type with DOLLARS in small letters. NGC ID# 25M3, PCGS# 7969

5763 1854 MS62 PCGS. The 1854 three dollar gold piece is always popular as the first year of the design. This attractive MS62 example is well-detailed and lustrous, with a scattering of minor contact marks on both sides. NGC ID# 25M3, PCGS# 7969

1854 Three Dollar Gold, MS64 Popular First-Year Type Coin

5764 1854 MS64 PCGS. It is curious that a coin struck 163 years ago could be one of the most available (and popular) in the entire series. Apparently people who encountered three dollar gold pieces in 1854 also thought they were curious, and a substantial number were set aside as mementoes. This piece has a remarkably strong strike — an attribute that can be said of few three dollar gold pieces. The surfaces are softly frosted and show remarkably few abrasions. NGC ID# 25M3, PCGS# 7969

**1854 Three Dollar Gold, MS64
Sharp, Shimmering Example**

- 5765 1854 MS64 PCGS. CAC.** Shimmering yellow-gold luster encompasses each side of this sharply struck near-Gem type representative. Surface abrasions are at a minimum, with the overall eye appeal being unusually high for the grade level. The 1854 had the highest mintage of the three dollar gold series at more than 138,000 coins, but PCGS reports only 35 survivors in Gem or finer grades. CAC: 28 in 64, 10 finer (1/16).
Ex: *Long Beach Signature* (Heritage, 9/2014), lot 3376. NGC ID# 25M3, PCGS# 7969

**1854-O Three Dollar Gold, XF45
Sole O-Mint Issue for the Series**

- 5766 1854-O XF45 PCGS. Variety 2.** Planchet Lamination Reverse. Struck on a dodgy planchet with a lamination streak beneath 3 in the denomination, this challenging three dollar gold retains considerable eye appeal despite numerous small marks and a so-so New Orleans strike from lapped dies. After the 1854-O three dollar gold pieces were struck, the New Orleans Mint avoided the denomination altogether and no more O-Mint three dollar pieces were issued. Traces of mint luster remain on this example, earning the PCGS XF45 grade despite the planchet problem. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar Gold, XF45
Well-Detailed and Attractive**

- 5767 1854-O XF45 ANACS. Variety 2.** Boasting a small mintage of 24,000 coins, the 1854-O three dollar gold piece is the only New Orleans issue in the series. This piece displays problem-free green-gold surfaces with hints of luster in the protected regions of the fields and significant detail remaining on the devices. Housed in an old, small size white ANACS holder. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar Gold, AU50
Low New Orleans Mintage**

- 5768 1854-O AU50 NGC. Variety 2.** The availability of the 1854-O begins to decline at the AU50 grade level, and it is a major rarity in Mint State. This piece shows bright yellow-gold surfaces with a touch of high-point wear over the well-struck design elements. As the only New Orleans issue in the series, the 1854-O three dollar gold (24,000 pieces struck) appeals to a wide range of 19th century gold enthusiasts. NGC ID# 25M5, PCGS# 7971

- 5769 1855 AU58 NGC.** This is a boldly struck, problem-free type coin with original honey-gold surfaces that retain bits of luster in the protected regions of the fields. Eye appeal is excellent for the grade. The 1855 is an available date, although not quite to the extent of the 1854. NGC ID# 25M6, PCGS# 7972

- 5770 1855 AU58 NGC.** Considerable luster remains on the yellow-gold surfaces of this near-Mint State three dollar gold, whose surfaces are sharply struck and reveal no significant marks.
Ex: *FUN Signature* (Heritage, 1/2010), lot 3902. NGC ID# 25M6, PCGS# 7972

**1856 Three Dollar Gold, MS64
Pleasing for the Grade**

- 5771 1856 MS64 PCGS. CAC.** Although not as scarce as the San Francisco issue of this year, the 1856 three dollar gold is scarce in Choice Mint State, and finer pieces are rarely seen. This example displays satiny, yellow-gold luster with hints of rose in the protected areas. No major abrasions are present, only light chatter on the cheek and in the adjacent field. The bowknot shows the only mentionable strike weakness. Population: 33 in 64, 5 finer (2/16). NGC ID# 25M8, PCGS# 7974

- 5772 1857 AU55 NGC.** A lightly circulated butter-gold Choice AU representative. Pockets of luster are plentiful, and the sole mentionable marks are on the obverse field near the E in UNITED and the first T in STATES. NGC ID# 7K5G, PCGS# 7976

- 5773 1859 AU55 PCGS.** The rich yellow-gold surfaces of this Choice AU 1859 three exhibit distinct orange toning though the obverse legend. The fields are faintly reflective with minimal surface marks. NGC ID# 7K5K, PCGS# 7979

1859 Three Dollar, MS64
Lustrous and Semireflective

- 5774 1859 MS64 PCGS.** The 1859 three dollar gold, struck to the extent of 15,558 pieces, would be considered a low-mintage issue in most U.S. coin series, but in the context of three dollar issues it is a moderate total — especially given the minuscule productions that would occur toward the end of the series. This 1859 three is better-defined than usually seen. The characteristic “swirl” of luster is present but softer than typical, offset by semireflectivity in the fields. Yellow-gold surfaces show touches of orange at certain angles and glimpses of lilac at others. An eye-appealing near-Gem. Population: 17 in 64 (2 in 64+), 9 finer (3/16). NGC ID# 7K5K, PCGS# 7979

1859 Gold Three Dollar, MS62 Prooflike
Seldom Seen Reflectivity

- 5775 1859 MS62 Prooflike NGC.** This razor-sharp Mint State 1859 three dollar gold piece displays lovely wheat-gold surfaces with frosty motifs. Prooflike fields deliver modest cameo contrast, accentuating the eye appeal. There are no singular abrasions, only light chatter here and there that limits the grade. NGC has designated three coins Prooflike, including one MS60 and two MS62 (3/16). NGC ID# 25MD, PCGS# 77979

- 5776 1861 VF35 PCGS.** The 1861 is a better date with a meager mintage of 5,959 pieces. This Choice VF Civil War example offers glimpses of luster although the curls and forehead display wear. Marks are relatively few and inconsequential. NGC ID# 7K5N, PCGS# 7982

- 5777 1866 AU55 NGC.** Semiprooflike fields add to the eye appeal of this honey-gold Choice AU 1866 three dollar gold piece. The strike is sharp, and there is little wear. Finer representatives are scarce, and Mint State examples are rare with pleasing eye appeal. Housed in a prior generation holder. NGC ID# 25MM, PCGS# 7987

- 5778 1868 AU55 PCGS.** An olive-green and sun-gold example of this lower mintage Reconstruction-era date. Marks are minimal and high-point wear is slight. Although available in Mint State grades, the present briefly circulated piece would satisfy most collectors of the challenging series. NGC ID# 25MP, PCGS# 7989

1872 Three Dollar Gold, AU58
Low 2,000-Coin Mintage

- 5779 1872 AU58 NGC. CAC.** With a mintage of just 2,000 coins and struck before widespread hoarding of Mint State coins began, the 1872 three dollar gold piece is a rarity in Uncirculated condition. This near-Mint example is boldly struck and well-detailed with bright yellow-gold fields that show semiprooflike mirroring. Light surface chatter is consistent with the grade, but there are no singular abrasions. Housed in a prior generation holder. NGC lists 34 Uncirculated coins finer (2/16). NGC ID# 25MV, PCGS# 7994

- 5780 1874 MS61 NGC.** An excellent type candidate from the third highest mintage in the three dollar series, this piece exhibits brilliant light yellow-gold luster and trivial grade-consistent marks. NGC ID# 7KDE, PCGS# 7998

- 5781 1878 AU58 NGC.** Always a date of choice for three dollar type, the 1878 is readily available in all grades thanks to its outsized mintage of 82,304 pieces. The large production anticipated redemption of paper money in gold at par, but the public saw no need and preferred the paper currency. This medium-gold example shows a few minor abrasions and well-struck motifs. Ample mint luster remains. NGC ID# 25MZ, PCGS# 8000

- 5782 1878 AU58 NGC.** Significant luster remains in the fields of this shimmering near-Mint type coin. The wreath bow is weak, but the strike is otherwise bold, and there are no detracting abrasions. Warm prairie-gold color blankets each side. NGC ID# 25MZ, PCGS# 8000

1878 Gold Three Dollar, MS62
Rich Luster, Green Label Holder

- 5783 1878 MS62 PCGS.** Shimmering orange-gold luster glows on each side of this Mint State 1878 three dollar gold piece. The wreath bow is weak, as usual, but the obverse portrait is well-defined. Light surface grazes are all that limit the grade. An outstanding type coin, housed in a green label holder. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS64
Die Doubled Reverse**

- 5784 1878 MS64 PCGS.** The obverse is predominantly apple-green, while the reverse is peach-gold. Lustrous, well preserved, and nicely struck. As often encountered on Uncirculated 1878 threes, the reverse is lightly die doubled, apparent on the upper right border of the wreath, and to a lesser extent on the ARS in DOLLARS. The 8s in the date are lightly repunched within their upper loops. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64
Excellent Type Coin**

- 5785 1878 MS64 PCGS.** From a mintage of 82,304 pieces, the 1878 three dollar gold piece is one of the more available issues in the series and a popular choice with type collectors. This impressive Choice example exhibits well-detailed design elements and vibrant mint luster throughout. The lightly marked orange gold surfaces show a few highlights of rose, with outstanding eye appeal. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, Iridescent-Toned MS64+
Ideal Type Coin**

- 5786 1878 MS64+ PCGS. CAC.** Iridescent lime-green and rose-red toning visits the portrait and obverse field, unusual color for a Federal gold coin. The remainder of the coin is apricot-gold. The surfaces are lustrous and carefully preserved, exhibiting a good strike and pleasing eye appeal. The reverse shows a wire rim between 11 and 3 o'clock. The reverse is lightly die doubled, apparent on the right border of the wreath near 1:30. An ideal type coin. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold Piece
Shimmering MS64+**

- 5787 1878 MS64+ PCGS. CAC.** Shimmering, frosty luster illuminates the Plus-graded near-Gem surfaces of this attractive three dollar gold type coin, an appealing characteristic of the 1878 that makes it so popular among collectors. The wreath bowknot is slightly soft, but the remainder of the coin shows sharp detail. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64+
Stellar Luster and Surfaces**

- 5788 1878 MS64+ PCGS. CAC.** This high-end near-Gem is boldly struck and devoid of obvious abrasions. The frosty yellow-gold surfaces display shimmering luster and rich eye appeal. The 1878 three dollar gold piece is the most plentiful issue in the series in high grade, ideal for type purposes. Nonetheless, Gem and finer coins are elusive. NGC ID# 25MZ, PCGS# 8000

1879 Three Dollar, Bright MS63

- 5789 1879 MS63 PCGS.** The mintage of 1878 three dollar gold pieces for circulation was a series high at 82,304 coins, save for the debut-year 1854 production exceeding 138,000 examples. The following year, in 1879, the production plummeted to 3,000 coins. (It is no accident that late 1878 saw the achievement of parity between gold and silver coins and paper currency for the first time since the Civil War.) The three dollar gold series entered its waning years, and yearly emissions would remain uniformly small through the series' end in 1889. This Select coin offers bright luster on wheat-gold surfaces that show a bold strike and good eye appeal, despite the presence of a few scattered ticks and light scrapes — fewer than usually seen on Mint State survivors. A great "better-date" type coin. NGC ID# 25N2, PCGS# 8001

**1881 Three Dollar Gold, AU58
Just 500 Pieces Struck for Circulation**

- 5790 1881 AU58 NGC.** With the lowest circulating mintage of any three dollar gold, the 1881 stands alone in a series replete with low mintages and sub 2000-piece production. Just 500 coins were struck for circulation (plus 54 proofs) and, indeed, most coins did circulate. Struck before the dies clashed, this attractive near-Mint State example will be hard to equal in terms of its surface quality and eye appeal. Only light abrasions visit the fields, and Liberty's cheek and neck show only a pair of tiny marks. The strike is sharp aside for minor lack of definition on the bowknot. Lovely orange-gold patina covers the semiprooflike fields and lightly frosted devices. Census: 33 in 58, 41 finer (3/16). NGC ID# 25N4, PCGS# 8003

**1882 Three Dollar, Repunched Date, MS62
FS-301 Cherrypickers' Variety, Sole Finest**

- 5791 1882 Repunched Date, FS-301, MS62 PCGS.** The lower crossbar of the original 2 appears amidst the subsequent punch, with the rest of the first digit protruding out the top. This is an original example of this low-mintage issue of only 1,500 circulation strikes, showing thick, rich, frosty luster on peach-gold surfaces that deepen to lavish orange-red in the protected peripheral device interiors. Light contact marks are largely confined to the fields, save for one thin mark on Liberty's cheek. This is currently the sole finest example certified of this variety at PCGS (2/16). NGC ID# 4DXC, PCGS# 145710 Base PCGS# 8004
- 5792 1884 — Polished — PCGS Genuine. AU Details.** A lightly circulated apricot-gold representative. The surfaces are somewhat bright, but acceptable to many collectors. The 1884 has a commercial mintage of 1,000 pieces, and unlike the 1888, a relatively low percentage of the production survived in better grades. NGC ID# 25N7, PCGS# 8006
- 5793 1886 XF40 PCGS.** The curls and wreath display wear, but luster outlines the letters and motifs. Field marks are trivial for the XF level. A better three-dollar issue with a scant commercial mintage of 1,000 pieces. NGC ID# 25N9, PCGS# 8008

**1889 Three Dollar, MS62
Well-Preserved With Vibrant Luster**

- 5794 1889 MS62 NGC.** Elusive but obtainable, the final-year 1889 three dollar gold pieces were saved as souvenirs of the long-running series, which seldom found favor from the public but always caught the eye of investors and speculators. This example is lustrous and attractive. Straw-gold surfaces show a mere handful of tiny marks with a sharp strike despite minor blending at the hair above Liberty's forehead. The eye appeal is excellent. NGC ID# 7KDU, PCGS# 8011

EARLY HALF EAGLES

**1795 Half Eagle, BD-3, Fine Details
Collectible Small Eagle Type Coin**

- 5795 1795 Small Eagle, BD-3, High R.3 — Improperly Cleaned — NGC Details. Fine.** Bass-Dannreuther Die State c/b. An evenly worn, circulated Small Eagle type coin, this collectible 1795 half eagle had well-defined motifs and mostly strong rims. The surfaces are smooth with wheat-gold coloration. Scattered faint hairlines are unseen without a loupe but nonetheless prevent a numeric grade from NGC. BD-3 is moderately available in the context of early half eagles with 175-225 pieces known in all grades. NGC ID# 25ND, PCGS# 519852 Base PCGS# 8066

**1798 Capped Bust Right Half Eagle, AU Details
Large 8, 14 Stars Reverse, BD-3**

- 5796** 1798 Large Eagle, Large 8, 14 Stars Reverse, BD-3, R.5 — Mount Removed — PCGS Genuine. AU Details. This interesting specimen is clearly from the terminal state of the dies, as the reverse exhibits an extensive network of die cracks and the obverse shows a few cracks not listed in the Bass-Dannreuther reference in the stars on the left. The antique-gold surfaces show a number of minor abrasions and the 1 in the date shows some faint planchet adjustment marks, in addition to the damage noted on the holder. The BD-3 is the only use of the unusual 14 stars reverse, with a surviving population of just 35-50 examples in all grades. NGC ID# BFX8, PCGS# 507323 Base PCGS# 8080

**1802/1 Capped Bust Right Half Eagle, AU53
Scarce BD-2 Variety**

- 5797** 1802/1 BD-2, High R.4, AU53 PCGS. Bass-Dannreuther Die State c/c. A substantial mintage of 53,176 Capped Bust Left half eagles was accomplished in 1802, all using overdated obverse dies from 1801. Eight die varieties are known for the date. This coin represents the very scarce BD-2 variety with a surviving population of 75-100 examples in all grades. Just a touch of wear shows on the well-detailed design elements and the pleasing orange-gold surfaces show only scattered, minor abrasions, with no trace of adjustment marks. Traces of original mint luster add to the considerable visual appeal. PCGS# 519885 Base PCGS# 8083

**1806 Half Eagle, Partially Lustrous AU53
BD-1, 8x5 Stars, Pointed 6**

- 5798** 1806 Pointed 6, 8x5 Stars, BD-1, R.4, AU53 PCGS. CAC. Bass-Dannreuther Die State c/f. This piece is in an early stage of this terminal die state, as the arcing reverse crack across the eagle's beak is thin. BD-1 is fairly plentiful in the context of early half eagles with 100-150 pieces known, but attractive AU coins are nonetheless rare. This piece displays original wheat-gold surfaces with areas of luster in the protected regions of the fields. The strike is bold and even, and wear is light. A very appealing CAC-endorsed early type coin. NGC ID# 25P7, PCGS# 45621 Base PCGS# 8090

**1806 Half Eagle, AU Details
BD-6, Knobbed 6 Variety**

- 5799** 1806 Knob 6, 7x6 Stars, BD-6, R.2 — Obverse Scratched — NGC Details. AU. Bass-Dannreuther Die State c/d. BD-6 is far and away the most plentiful variety of the issue (600 to 900 examples are believed extant), ideal for type or date purposes. This is the only use of the Knobbed 6 obverse, though this reverse die was previously used for the BD-5 variety. This coin displays medium green-gold color with tinges of luster remaining in the recesses. Some minor strike weakness is seen on the arrowheads and upper-left portion of the shield, not uncommon for BD-6. NGC draws attention to a faint hairline scratch in the left obverse field near the stars, though it is barely discernable to the unaided eye. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

**1818 Half Eagle, AU Details
Rare BD-1 Die Pairing**

- 5800** 1818 BD-1, R.5 — Damage — PCGS Genuine. AU Details. Bass-Dannreuther Die State b, reverse cracked. BD-1 is one of the rarer 1818 half eagle varieties with just 50-65 pieces extant. The reduced-diameter Capped Head Left type is scarce in general, and examples are always in demand. This piece is little-worn and boldly struck with tinges of luster in the protected regions. Scattered specks of verdigris appear on each side, although it is a number of small, faint scratches in the fields on both sides that precludes a numeric grade from PCGS. Linear depressions on Liberty's cheek are mint-made adjustment marks. NGC ID# BFXV, PCGS# 519911 Base PCGS# 8119

CLASSIC HALF EAGLES

- 5801** 1834 Plain 4 AU53 NGC. Second Head, Breen-6502, McCloskey 4-C, R.2. Always popular with collectors as a first-year type coin, large numbers of 1834 Classic fives were struck and set aside as mementoes. This variety is distinguished by triple punching on the 4 in the date (magnification is required). The surfaces are a bit choppy from handling in the channels of commerce, and the high points of the design show even wear. NGC ID# 25RR, PCGS# 8171

**1834 Classic Half Eagle, AU50
McCloskey 5-D, Crosslet 4**

- 5802** 1834 Crosslet 4 AU50 PCGS. CAC. Breen-6503, McCloskey 5-D, R.4. A distinctive die variety, identified by the Crosslet 4 in the date. While only scarce, the 1834 Crosslet 4 half eagle is in demand due to its listing in the *Guide Book*. This piece has satiny honey-gold with hints of orange toning at the borders. Population: 6 in 50, 38 finer (3/16). NGC ID# 25RU, PCGS# 8172
- 5803** 1835 — Improperly Cleaned — NGC Details. Unc. Breen-6506, McCloskey 2-D, R.6. This is an example of the very rare so-called Third Head obverse, showing a block 8 in the date and the star pointing to the lower hair ribbon. Two reverses were paired with this obverse, the present McCloskey 2-D reverse showing an arrow nearly touching the last A, while the even rarer (R.7) McCloskey 2-C shows those bits well-separated. This coin, despite being light hairlined from a past cleaning, offers much to admire, including appealing color and overall good preservation. A few scattered ticks are small and of no import; two small nicks appear on the reverse rim around 3 o'clock. NGC ID# 25RV, PCGS# 8173

- 5804** 1838 AU53 NGC. Breen-6515, McCloskey 2-B, R.1, AU53 Small Arrows, Large 5. A pleasing orange-gold example with traces of mint luster at the borders. The motifs retain sharp detail despite the minimal circulation. An available issue, but less-common than often believed and the final year of the design. NGC ID# 25S4, PCGS# 8176

**1838-D Half Eagle, AU Details
First Dahlonega Issue**

- 5805** 1838-D — Improperly Cleaned — NGC Details. AU. McCloskey 1-A, R.3. The 1838-D half eagle is the first issue from the Dahlonega Mint, and is the only D-mint Classic five issue. Given its low mintage of 20,583 pieces, survivors are insufficient to meet the demand from Southern gold specialists. The present yellow-gold five dollar is well struck and exhibits minimal evidence of wear. The fields are mildly bright and display distributed tiny marks. NGC ID# 25S6, PCGS# 8178

LIBERTY HALF EAGLES

- 5806** 1840-D — Improperly Cleaned — NGC Details. AU. Variety 3-B, Tall Mintmark. The noted cleaning brightens the fields on both sides and actually makes the scattered but extensive small ticks that pepper each side more prominent; nonetheless, this piece still offers much to commend itself to viewers. A decent strike creates only light strike weakness in the center obverse, but the rest of the devices throughout are well brought up. Some amber-gold color provides contrast against the overbright areas. The mintage of this early Dahlonega issue was a meager 22,896 coins, with Choice XF to AU being an average grade for certified survivors. NGC ID# 25SG, PCGS# 8198
- 5807** 1840-O Narrow Mill AU55 NGC. Variety 3. 1840 was a transitional year for half eagle diameters. The 1839 issues measured 21.6 mm and the 1841 and later issues were 22.5 mm. 1840-O is known with both a small and large diameter, traditionally respectively referred to as the Narrow Mill and Broad Mill. This Small O, Narrow Mill example offers minimally marked and microgranular sun-gold surfaces. The centers and a few stars are incompletely impressed. NGC ID# 25SK, PCGS# 8200
- 5808** 1842-C Large Date XF45 PCGS. 30th Anniversary Green Label Holder. The legends display bright luster, and the eagle is well detailed. This scarce honey-gold Charlotte five exhibits the expected number of unobtrusive marks, but only a small hit on the beak merits mention. NGC ID# 25SW, PCGS# 8209
- 5809** 1843 MS61 PCGS. Among early Liberty half eagles, the 1843 is fairly plentiful, although Mint State coins are nonetheless scarce in an absolute sense. This MS61 example displays a bold strike and bright yellow-gold luster. Light surface chatter defines the grade. Population: 15 in 61, 19 finer (3/16). NGC ID# 94FD, PCGS# 8213

1843-C Half Eagle, AU55
Attractive Charlotte Type Coin

- 5810 1843-C AU55 NGC. Variety 2.** The 1843-C half eagle is significantly scarcer than its Dahlonega counterpart, but with 225 to 250 pieces extant it is still a collectible issue. The present Choice AU coin is conditionally rare and represents an important opportunity for the Southern gold specialist. Some minor weakness appears on the eagle's neck and talons, and on the hair curls around Liberty's face. The surfaces are partially lustrous and have attractive olive-gold coloration. A few small marks are not particularly bothersome. Census: 12 in 55, 30 finer (3/16). NGC ID# 429H, PCGS# 8214

- 5811 1843-D Medium D — Rim Ding — PCGS Genuine. AU Details. Variety 10-G.** An available issue in the context of Dahlonega half eagles, although the issue becomes scarce at the About Uncirculated level or finer. Many examples — like the present coin — are impaired or damaged. This example is net-graded by PCGS for a "rim ding," although the rim disturbance may be a test cut for fineness of the gold. Other smaller cuts appear on the obverse rim, hidden by the holder. The coin is bright (unnaturally so) and partially prooflike, with a sharp strike and vivid medium-gold coloration. NGC ID# 25T4, PCGS# 8215

1843-D Five Dollar, AU53
Pleasing Color and Surfaces

- 5812 1843-D Medium D AU53 NGC. Variety 10-G.** For the collector seeking a single Dahlonega five, the 1843-D is a suitable candidate, as possibly 450 to 550 examples survive. However, the present AU coin stands out due to its exceptional original color and bold strike. Light surface chatter appears on each side, but there are no singular abrasions. Eye appeal is outstanding for the grade and issue. Census: 19 in 53, 73 finer (3/16). NGC ID# 25T4, PCGS# 8215

1844 Half Eagle, Reflective MS63

- 5813 1844 MS63 PCGS.** The Mint produced 340,330 half eagles in 1844, making the issue significantly more challenging than 1843- and 1847-dated coins with much higher production figures. The issue is scarce across all grade levels but becomes rare in MS63. This piece displays luminous yellow-gold surfaces with impressive prooflike reflectivity and contrast. Full stars, hair detail, and feather definition further enhance the appeal of this Select piece. Population: 7 in 63 (2 in 63+), 6 finer (1/16).
Ex: Long Beach Signature (Heritage, 9/2014), lot 3415, which brought \$8,813. NGC ID# 25T7, PCGS# 8219

- 5814 1844-D VF25 NGC. Variety 11-G.** This variety is easily attributed by repunching at the top of the 1 in the date, and it is by far the most frequently seen of the three varieties known. This is definitely an untampered, original coin. The surfaces have a ruddy tint and significant deep russet patina encircles the margins. Softly struck in the center of the obverse. A few small, inoffensive abrasions are scattered about each side. NGC ID# 25T9, PCGS# 8221

- 5815 1844-O AU55 NGC. Variety 1,** with the date placed far left under the bust and showing light repunching on the first 4 in the date. Minimally worn, subtle green-gold surfaces display light abrasions in the fields and considerable underlying luster still evident. The 1844-O half eagle is not a particularly scarce issue but is most often seen well-circulated, more so than the present Choice AU coin.
Ex: Palm Beach Signature (Heritage, 3/2006), lot 1858. NGC ID# 25TA, PCGS# 8222

- 5816 1845 MS61 PCGS.** The 1845 half eagle had a moderate mintage in excess of 417,000 coins, but most examples circulated extensively. Nonetheless, there are a number of notable Mint State survivors of the issue, although they are elusive in an absolute sense; but enough survive to fill the demand. Harry W. Bass, Jr. managed to amass a small hoard of Mint State examples of this date, 10 in all of which three were MS65, according to Garrett and Guth. This golden-orange MS61 PCGS piece shows a nicely bold strike on lustrous surfaces. A couple of thin scrapes show, one left and under the date, another on Liberty's jawline, and a long, thin scrape appears above the eagle's left (facing) wing. Many moons have waxed and waned since we offered a PCGS-graded example in this grade; astute buyers may want to be on the alert for this piece at auction. Population: 7 in 61, 38 finer (2/16). NGC ID# 25TB, PCGS# 8223

- 5817 1845-D XF40 PCGS. CAC. Variety 13-H.** Blended orange and lemon toning confirms the originality of this inoffensively abraded Dahlonega type coin. The stars are sharp but the strike is somewhat soft on the curls, typical for the issue. One of only two examples confirmed as XF40 by CAC (3/16). NGC ID# 25TC, PCGS# 8224

- 5818 1846 Large Date MS61 PCGS.** The nearness of the 4 and 6 in the date as well as the noticeably larger digits diagnose the 1846 Large Date, a scarcer variant than its Small Date counterpart of the year. Scattered extensive (but mostly small) ticks and pecks account for the grade on this Mint State coin, boasting full luster remaining on surfaces that alternate orange-gold with lighter wheat-gold on the devices. Population: 8 in 61, 13 finer (3/16). NGC ID# 25TE, PCGS# 8226

**1846-D/D Half Eagle, AU58
Boldly Repunched Mintmark**

5819 1846-D/D AU58 PCGS. Variety 17-J. Two major varieties of 1846-D half eagle are known: a Normal Mintmark variant, and the presently represented D/D Mintmark version. The secondary D is widely spaced north, imbedded in the branch stem and fletchings. This example is boldly detailed with hints of luster in the fields. Attractive olive-gold patina blankets each side. Fewer than 250 examples are known with this blundered mintmark. Population: 13 in 58, 15 finer (2/16). NGC ID# 25TH, PCGS# 8229

5820 1848-D XF40 PCGS. CAC. Variety 22-O. From the same dies as the FS-501 repunched mintmark variety, but a late die state without any traces of the initial errant mintmark placement. Original peach-gold toning encompasses this unblemished and moderately circulated Dahlonega type coin. Rare with a CAC seal. NGC ID# C5XA, PCGS# 8238

5821 1852-C VF35 ANACS. Variety 2. The 1852-C half eagle is fairly plentiful in the context of Charlotte gold, with perhaps as many as 300 to 350 pieces extant. This Choice VF example displays medium green-gold color with well-detailed design elements. Light surface chatter is consistent with the grade. NGC ID# 25UB, PCGS# 8251

5822 1852-D XF40 PCGS. Variety 33-V. The rare high date, high mintmark variant of this Dahlonega type issue. About 85% of 1852-D fives are Variety 32-V, and only a single example of Variety 33-W has been confirmed. This inoffensively abraded half eagle has lime-green fields with plentiful peach-tinged luster. NGC ID# 25UC, PCGS# 8252

5823 1854-D Large D XF45 PCGS. Variety 36-AA. An apricot-gold and sea-green Dahlonega half eagle. A curious wire-shaped strike-through wanders along the upper left obverse border. Relatively unabraded, and the stars and wings are well defined. NGC ID# 25UK, PCGS# 8258

5824 1857-D VF30 PCGS. Variety 42-HH. A midgrade representative with mildly bright and inoffensively abraded sun-gold surfaces. Some luster remains, and the strike is crisp on the wings and right-side stars, although the curls and fletchings are lightly impressed. A lower mintage Dahlonega issue. Just 17,046 pieces were struck. NGC ID# 25V4, PCGS# 8273

5825 1857-S AU55 NGC. This Choice AU coin is an impressive example of this scarce branch mint No Motto half eagle issue. A mere 87,000 pieces were struck of the 1857-S, most of which circulated extensively in the West before and during the Civil War. Luster illuminates the borders and devices, and although the fields and cheek have their share of small marks, no heavy abrasions are present. The apricot-gold surfaces appear original. Certified in an older generation NGC holder. Census: 21 in 55 (1 in 55+★), 26 finer (3/16).
Ex: FUN Signature (Heritage, 1/2006), lot 5220. NGC ID# CBE7, PCGS# 8275

**1858-C Half Eagle, MS61
Original Green-Gold Patina**

5826 1858-C MS61 PCGS. Variety 1. Rich apricot and green-gold toning confirms the originality of this refreshingly unabraded Charlotte Mint half eagle. The strike is exceptionally crisp for the branch facility, and the eye appeal is superior. Minor strike-throughs (as coined) are apparent on the field near the eagle's left (facing) wing. Population: 8 in 61, 6 finer (3/16). NGC ID# 4GUH, PCGS# 8277

5827 1858-D XF45 PCGS. Variety 43-HH. A well-defined green-gold representative. Marks are minimal, and the strike is above average despite the usual blending on the curls. The Georgian gold fields were mostly played out by 1858, and half eagle production at Dahlonega dwindled to only 15,362 pieces. NGC ID# CBBT, PCGS# 8278

**1858-D Half Eagle, AU50
Strong Eye Appeal**

5828 1858-D AU50 PCGS. CAC. Variety 43-II. As usual, the strike is somewhat soft at Liberty's curls and at the eagle's legs and arrow feathers. Nearly all examples of the issue share some weakness of strike. On the plus side, the current coin displays lovely orange-gold color that others lack. Abrasions are frequent but minuscule, and overall the eye appeal is far above the norm for the 1858-D. Population (all varieties): 17 in 50, 67 finer (3/16). NGC ID# CBBT, PCGS# 8278

5829 1859-C XF45 NGC. Variety 2. The 8 in the date shows large openings, and the 1 and knob of the 9 are centered between dentils. The issue-ubiquitous weakness on the eagle is the result of incorrect annealing of the reverse die. This Choice XF coin shows scattered contact marks more prominent in the obverse fields, while the reverse displays some curious burnt-cinnamon patina peppered about. The mintage was 31,847 coins, and examples are readily available up to the higher AU grades. Mint State survivors appear seldom. NGC ID# 25VC, PCGS# 8281

**1859-D Half Eagle, AU58
Medium D, CAC-Endorsed**

5830 1859-D Medium D AU58 PCGS. CAC. Variety 44-HH. The 10,366 half eagles struck at the Georgia facility in 1859 represent the second-lowest D-mint production in the series after the famed 1861-D. Few examples survive, probably 175 to 225 coins, and even fewer display original orange and green-gold color, as on this CAC-endorsed near-Mint example. The strike shows typical incompleteness over Liberty's portrait and the first couple of stars, while the eagle is surprisingly sharp. Lightly abraded, but nonetheless appealing. Note that CAC has awarded green stickers to merely six AU58 coins plus a single MS63. Population: 29 in 58 (2 in 58+), 12 finer (3/16). NGC ID# 25VD, PCGS# 8282

5831 1860 AU55 NGC. This undipped sun-gold Choice AU half eagle displays unblemished surfaces and ample luster near the rims. Unlike the 1861, the mintage is low since a mere 19,763 pieces were coined. Census: 35 in 55 (2 in 55+★), 33 finer (3/16).
Ex: Houston Signature (Heritage, 12/2009), lot 1658. NGC ID# 25VF, PCGS# 8284

5832 1868 XF45 PCGS. Yellow-gold surfaces imbued with traces of light green exhibit well-defined design elements. Distributed small marks are in concert with a coin having seen some circulation. A better-date issue, coming from a mintage of just 5,700 coins. Population: 9 in 45, 35 finer (2/16).
Ex: Long Beach Signature (Heritage, 2/2010), lot 1597. NGC ID# 25W5, PCGS# 8315

5833 1871-S XF45 NGC. Bright, yellow-gold surfaces are lightly abraded and show a few small marks, yet this Choice XF example reveals only slight blending at the usual points of wear and no heavy hits. A rare San Francisco date — just 25,000 pieces were struck, and most survive in low grades. Census: 16 in 45, 57 finer (3/16). NGC ID# 25WE, PCGS# 8324

**1872-CC Half Eagle, AU Details
Pleasing Color, Rare Issue**

5834 1872-CC — Damage — PCGS Genuine. AU Details. Variety 1-B. A satiny prairie-gold example of this elusive Carson City five, showing a sharp strike and little wear. Scattered tiny nicks and numerous hairline scratches preclude a numeric designation from PCGS, although these are not overly obtrusive to the naked eye. The 1872-CC is scarce in all grades and rare in AU or better condition. Only 16,980 coins were struck and fewer than 100 are believed extant — none are known in Mint State. NGC ID# 25WG, PCGS# 8326

**1874-S Five Dollar, AU53
Scarce and Underappreciated**

5835 1874-S AU53 PCGS. The 1874-S half eagle is scarce and underrated, coming from a mintage just 16,000 pieces. None are known in Mint State, making the present AU coin near the top of the population charts. The strike is bold, and there is little wear. Luster remains in the fields, while each side displays warm honey-gold color. A few small abrasions are not out of line for the grade. Population: 8 in 53, 9 finer (2/16). NGC ID# 25WR, PCGS# 8335

5836 1877-S AU55 NGC. The 1877-S is a very scarce With Motto half eagle that is difficult in all grades and usually only seen in lower grades. There are few survivors in AU, and only five submissions are in Mint State at both services combined. This bright, partially lustrous example shows some softness of detail in the centers but pinpoint definition on the peripheral stars. A number of small- and medium-sized abrasions in the fields on both sides are grade-consistent. Census: 22 in 55, 12 finer (3/16).
Ex: FUN Signature (Heritage, 1/2008), lot 4295. NGC ID# 25X3, PCGS# 8344

**1880-CC Half Eagle, AU58
Conditionally Elusive**

5837 1880-CC AU58 PCGS. Variety 1-A. A small die lump shows on the forehead, and the second C in the mintmark is left-aligned with the tip of the fletchings. This near-Mint State coin is a far nicer example than most survivors of this issue exceeding 50,000 coins. (Carson City expert Rusty Goe estimates, however, that only 1% of that coinage survives today, due to exports and mass meltings.) Most of the mint luster remains on caramel-gold surfaces that show a bold strike and only scattered, minor ticks in concert with the grade. A conditionally elusive coin, and an issue seldom seen finer. Population: 35 in 58 (2 in 58+), 8 finer (3/16). NGC ID# 25XB, PCGS# 8352

5838 1881-S MS64 PCGS. CAC. Unlike the silver dollar of this year, the 1881-S half eagle is scarce in MS64 and decidedly rare any finer. This piece displays a bold strike and frosty luster. Peach and rose overtones accent the green-gold surfaces. A faint grease streak (as struck) resides beneath the eagle's left (facing) wing, and a small reed mark in the same vicinity is the only abrasion of note. PCGS lists six finer representatives (3/16). NGC ID# 25XF, PCGS# 8357

1881-S Half Eagle, MS65
Rare So Well-Preserved

- 5839 1881-S MS65 PCGS.** This Gem 1881-S half eagle is a major condition rarity, although its value in this grade would hardly suggest that. The strike is sharp, and frosty yellow-gold luster rolls over unabraded surfaces. Just under 1 million examples were struck, and this piece is tied with five others as the finest at PCGS (2/16). NGC ID# 25XF, PCGS# 8357

1882-CC Half Eagle, Choice AU

- 5840 1882-CC AU55 PCGS. Variety 1-A.** A lightly circulated pumpkin-gold Carson City representative with pleasing definition and moderately glossy surfaces. Luster fills design recesses. One small flan flaw below star 8, but no abrasions merit singular mention. Although rare in Mint State, the 1882-CC is more available than one might expect in XF and AU grades. NGC ID# 25XH, PCGS# 8359
- 5841 1883-S MS63 NGC.** After several years of high half eagle production in San Francisco, the coinage in 1883 dropped to a mere 83,200 circulation strikes. Typical survivors are circulated, or low Mint State at the best. This Select Mint State example is fully lustrous with brilliant yellow surfaces, minimal marks, and a single copper toning spot. Only four NGC or PCGS examples are certified in finer grades. Census: 29 in 63, 1 finer (3/16). NGC ID# 25XM, PCGS# 8363
- 5842 1886 MS64 PCGS. CAC.** Boldly struck with prominent apricot-to-peach luster that displays the occasional greenish accent. Excellent central detail leaves Liberty's hair only a trifle blended. Great quality for an issue seldom offered so fine and still underappreciated. Population: 15 in 64, 3 finer (2/16). Ex: *Central States Signature* (Heritage, 4/2005), lot 8660; *ANA Signature* (Heritage, 10/2012), lot 5944. NGC ID# 25XU, PCGS# 8369
- 5843 1886-S MS64+ NGC. CAC.** The strike is full on this only slightly abraded orange-gold near-Gem, sporting copious luster and abundant eye appeal. This piece is considerably finer than most survivors of this high-mintage issue of more than 3.2 million coins. Census: 23 in 64+, 1 in 64 ★, 52 finer. CAC: 42 in 64, 0 finer (2/16). NGC ID# 25XV, PCGS# 8370

1890 Half Eagle, Rare MS62
Seldom Offered, Low-Mintage Issue

- 5844 1890 MS62 PCGS.** The small mintage of just 4,240 coins confirms the Mint's preoccupation with other denominations in 1890, and the average grade of 53.4 suggests most coins saw at least some circulation — a theory supported by the population reports. Auction appearances are equally scarce. As might be expected, this survivor was struck with fresh dies with a sharp strike and prooflike tendencies in the fields. Light chatter and bagmarks in the field determine the grade, although even at this MS62 level few coins are finer. Population: 5 in 62, 4 finer (3/16). NGC ID# 25Y2, PCGS# 8375
- 5845 1890-CC AU58 NGC. Variety 1-A.** The 1890-CC is a slightly better date in the upper AU grades and is widely pursued by branch mint gold enthusiasts. This near-Mint example displays sharp detail with active luster in the protected regions of the fields. Slight rub over the exposed areas is the only trace of wear. A few minor marks accompany the grade. NGC ID# C5XF, PCGS# 8376
- 5846 1892 MS64 NGC. CAC.** An outstanding example of this important issue, and seldom found finer. This Choice Mint State piece is fully lustrous with frosty yellow-gold surfaces and sharp design motifs. NGC has certified 62 finer examples (3/16). NGC ID# C5XG, PCGS# 8379
- 5847 1892-CC MS61 PCGS. Variety 1-A.** The only known dies. Carson City gold ranks among the most popular numismatic subsets among American collectors. This pleasing Mint State half eagle exhibits brilliant yellow luster and strong design definition. The surfaces have a few minor marks as expected at this grade level. Population: 35 in 61, 51 finer (3/16). NGC ID# 25Y7, PCGS# 8380
- 5848 1893-CC AU58 NGC. Variety 1-A.** A dusky apricot-gold Borderline Uncirculated Carson City representative that has pleasing surfaces and a good strike. Traces of gray residue are noted near the coronet tip and the U in UNITED. NGC ID# 25YB, PCGS# 8384
- 5849 1896 MS64 NGC.** Typical tiny abrasions appear on the surfaces of this Choice Mint State piece, consistent with the grade. The surfaces are fully lustrous and the design motifs are sharp. Trivial rim nicks appear at 3 o'clock on the reverse. Wisps of pinkish overtones appear on both sides. Census: 34 in 64 (1 in 64+), 6 finer (3/16). NGC ID# 25YK, PCGS# 8392
- 5850 1897 MS65 NGC.** Frosty, mint-fresh luster adorns the Gem-quality surfaces of this sharp 1897 Liberty half eagle. The interiors are radiant yellow-gold, while the peripheries deepen a smidgen to prairie hues. Scarce in this fine of a grade and rarely seen better. Census: 74 in 65 (1 in 65 ★), 9 finer (2/16). NGC ID# 25YM, PCGS# 8394

**1898 Five Dollar, MS65
Conditionally Elusive**

5851 1898 MS65 PCGS. The 1898 half eagle is plentiful in most grades, but Gem examples are seldom seen. This piece displays a bold strike and frosty orange-gold luster with a few tiny ticks that define the grade. Suitable for the type collector seeking to stray from the obvious availability of other, more traditional type-coin issues. Finer examples of this date are rarely seen. Population: 9 in 65 (1 in 65+), 3 finer (3/16). NGC ID# 25YP, PCGS# 8396

5852 1900-S MS64 PCGS. CAC. This impressive Choice specimen exhibits sharply detailed design elements and especially vibrant mint luster on both sides. The vivid orange-gold surfaces show only minor signs of contact, with outstanding eye appeal. PCGS has graded 13 numerically finer examples (3/16). NGC ID# 25YV, PCGS# 8401

**1901-S/S Half Eagle, MS66
Unlisted Repunched Mintmark Variety**

5853 1901-S/S MS66 NGC. Unlisted in *Cherrypickers'*, this Premium Gem 1901-S half eagle shows the mintmark repunched with the secondary image visible to the southwest within the loops of the primary S. Die lines and a raised area left of the mintmark suggests an effort by the Mint to efface the early impression. This is different from the FS-501 RPM. The strike is sharp, and the frosty surfaces yield radiant yellow-gold luster. Census: 65 in 66 (6 in 66+), 11 finer (2/16). NGC ID# 25YX, PCGS# 8404

5854 1908 Liberty MS65 PCGS. An attractive Gem from the final year of the Liberty design, this coin exhibits well-detailed design elements and lustrous peach-gold surfaces with few signs of contact. PCGS has graded 44 numerically finer examples (2/16). NGC ID# 25ZE, PCGS# 8418

**1908 Liberty Half Eagle, MS65
Highly Lustrous, Final Year of the Design**

5855 1908 Liberty MS65 PCGS. CAC. Always a popular issue for type because of its ready availability as well as its status as the final year of the Liberty Head fives. This Gem example displays lovely medium-gold surfaces with lilac, olive-green, and reddish accents that float across the sharply struck, frosty surfaces. Cartwheel luster intensifies the coloration. CAC endorsed, with a few tiny ticks on the portrait but no serious marks whatsoever and great eye appeal. PCGS reports just 44 finer coins (3/16). NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

5856 1908 MS63 PCGS. An attractive Select representative of this popular first-year issue, with well-detailed design elements and vivid orange-gold surfaces that show a scattering of minor contact marks. Housed in a green label holder. NGC ID# 28DE, PCGS# 8510

**1908 Half Eagle, MS64+
Well-Preserved Type Coin**

5857 1908 MS64+ PCGS. CAC. As it was well-saved because of its first-year-of-issue status, the 1908 Indian Head half eagle is a go-to type-coin issue. This high-end MS64 example glows with softly frosted yellow-gold luster and has sharply struck design elements. There are no major abrasions, only some light lines in the reverse fields that preclude Gem classification. Eye appeal is excellent, as the CAC endorsement confirms. NGC ID# 28DE, PCGS# 8510

**1909 Five Dollar, Frosty MS65
Attractive High-End Type Coin**

5858 1909 MS65 PCGS. The 1909 is only a fraction as plentiful as its Denver counterpart, although a number of Gems are known to supply the needs of collectors. Above this level, however, the 1909 Indian half eagle becomes rare. This piece is razor-sharp and displays original, frosty wheat-gold luster. Close examination of the surfaces fails to reveal any mentionable abrasions. PCGS lists nine finer representatives, which are out of reach for most collectors (3/16). NGC ID# 28DH, PCGS# 8513

5859 1909-D MS64 PCGS. A combination of variegated lilac and orange-gold color plus exceptionally bold mint luster make this 1909-D a great type coin. At the Choice Mint State grade, abrasions and bagmarks are far fewer than normally seen for the issue, and the strike is sharp except at the high point eagle's shoulder. Scarce any finer. NGC ID# 28DJ, PCGS# 8514

5860 1909-D MS64 NGC. Sharp detail and satiny straw-gold luster deliver pleasing eye appeal on this Choice 1909-D half eagle. This Denver issue is readily available through MS64 and popular in this condition for type purposes. Finer coins are elusive. NGC ID# 28DJ, PCGS# 8514

5861 1909-D MS64 NGC. CAC. The 1909-D is a go-to type-coin issue, boasting a high mintage of more than 3.4 million pieces and proportionate availability in Choice condition. This CAC-endorsed representative displays satiny bronze-gold luster with glistening peach and honey hues in the recesses. Minor strike weakness is seen on the lowest headdress feather. NGC ID# 28DJ, PCGS# 8514

5862 1909-D MS64 PCGS. CAC. The auburn-gold surfaces boast a bolder strike than normal for this issue, and most of the minor abrasions are away from the prime focal points of the Indian's portrait and the eagle's midsection. CAC has endorsed only 10 pieces at the next-higher Gem level (2/16). NGC ID# 28DJ, PCGS# 8514

5863 1909-D MS64+ PCGS. The 1909-D is famously popular as a type-coin issue, although pieces grading finer than MS64 are elusive. This is a frosty high-end near-Gem with bold design elements and unabraded green-gold surfaces. The obverse is fully Gem quality, the reverse has stray lines in the fields that reduce the PCGS designation. NGC ID# 28DJ, PCGS# 8514

**1909-O Indian Half Eagle, VF35
Only New Orleans Indian Gold Piece**

5864 1909-O VF35 PCGS. CAC. This important Indian half eagle is the only gold piece of the Indian design across all three denominations struck at New Orleans, and it represents the closing year of coinage activities at that Louisiana facility. The mintmark is weak, but clear enough for positive identification. While this piece has seen moderate circulation, the honey-gold surfaces are pleasing for the grade. NGC ID# 25ZK, PCGS# 8515

**1909-S Half Eagle, MS61
Elusive in Mint State**

5865 1909-S MS61 NGC. The 1909-S Indian five is a better date in Uncirculated condition. Most such coins reside in MS62 or lower levels, and anything finer is genuinely rare. This collectible MS61 coin displays light handling marks but is mostly free of singular abrasions. The strike is well-executed, and the straw-gold surfaces deliver pleasing eye appeal. NGC ID# 25ZL, PCGS# 8516

5866 1910 MS64 PCGS. The 1910 half eagle's status as a plentiful issue holds true through the MS63 grade level, but the issue's availability declines in MS64, and finer pieces are seldom seen. This example, housed in a green label holder, is beautifully preserved, with a tiny mark behind the eagle's head being the only flaw of note. The strike is sharp, while rich honey and green-gold hues blanket each side. PCGS has encapsulated only 26 numerically finer representatives (3/16). NGC ID# 28DK, PCGS# 8517

5867 1911-D AU55 NGC. A semikey of the series, the 1911-D half eagle has a mintage of only 72,500 coins. This Choice About Uncirculated representative displays smooth olive-gold fields and has satiny yellow-gold luster in the recesses of the sunken relief design. The mintmark is clear, and there are no bothersome abrasions. NGC ID# 28DR, PCGS# 8521

**1911-D Indian Five, AU55
Deep Coloration**

5868 1911-D AU55 PCGS. CAC. A better date, boasting a mintage of only 72,500 coins. The 1911-D half eagle is especially scarce in Mint State, making the present Choice AU coin highly appealing to the budget-conscious collector. This piece displays rich orange-gold color and satiny surfaces. The design elements are sharply detailed, despite light high-point friction. The mintmark is worn but clear. NGC ID# 28DR, PCGS# 8521

5869 1911-S MS62 PCGS. CAC. The 1911-S had the second highest mintage of the Indian half eagle series but it is surprisingly elusive in better Mint State grades. This example has trivial grade-consistent marks with brilliant yellow luster. NGC ID# 25ZM, PCGS# 8522

**1911-S Indian Half Eagle, MS63
Underrated San Francisco Mint Issue**

5870 1911-S MS63 PCGS. The 1911-S Indian half eagle is much more difficult to locate than its substantial mintage of 1.4 million pieces would suggest. This attractive Select example exhibits well-detailed design elements and lustrous orange-gold surfaces with a few minor, scattered contact marks on both sides. PCGS has graded 32 numerically finer examples (3/16). NGC ID# 25ZM, PCGS# 8522

**1912-S Half Eagle, MS62+
Outstanding Eye Appeal for the Grade**

5871 1912-S MS62+ PCGS. This 1912-S Indian five dollar displays frosty yellow-gold luster that emits a lovely mint-fresh glow. Grade-limiting abrasions are surprisingly insignificant, and the overall eye appeal is suggestive of the quality one typically sees in an MS63 holder. Thus, the Plus designation is well-suited to this piece. PCGS lists only 36 finer representatives (3/16). NGC ID# 65KD, PCGS# 8524

5872 1913 MS64 PCGS. CAC. The 1913 is collectible through MS64, but the certified population drops off markedly in MS65. This Choice example strikes a perfect balance between technical quality and affordability. Medium yellow-gold color combines with frosty luster and boldly struck devices on each side. Highly appealing. NGC ID# 28DT, PCGS# 8525

**1913 Five Dollar, MS64+
Pleasing Surfaces**

5873 1913 MS64+ PCGS. CAC. This boldly struck 1913 Indian half eagle might have garnered a full Gem grade were it not for a few faint lines in the reverse fields. The obverse appears virtually pristine, warranting the Plus designation. The 1913 is available through MS64 but becomes conditionally scarce in MS65. This CAC-endorsed MS64+ coin should appeal to a range of collectors who pursue this popular series. NGC ID# 28DT, PCGS# 8525

1913 Half Eagle, High-End MS64+

5874 1913 MS64+ PCGS. CAC. The ruddy antique-gold surfaces are exceptionally clean and well-preserved on this near-Gem 1913 half eagle. While the 1913 issue occupies type-coin territory, examples with such bold eye appeal and lack of mentionable distractions are in a distinct minority. One thin mark appears below star 6. Population: 45 in 64+, 54 finer. CAC: 71 in 64, 11 finer (3/16). NGC ID# 28DT, PCGS# 8525

5875 1914 MS63 PCGS. This sharply struck Select type coin displays rich, orange-gold color while void of relevant abrasions. Bright mint luster rolls unencumbered across the surfaces. A few small, grade-consistent abrasions are noted. Housed in a green label holder. Ex: Long Beach Signature (Heritage, 6/2010), lot 1702. NGC ID# 28DU, PCGS# 8527

5876 1914-D MS63 PCGS. Ex: Bass. Although Harry W. Bass, Jr. was not a big fan of the Indian gold series, the pieces that emerged from his collection were of typical Bass high quality. This sharply struck Select half eagle displays smooth rather than granular surfaces, with lovely variegated toning that includes lilac and rose highlights over orange-gold base toning with olive undertones. A few light marks — particularly in the reverse fields — determine the grade. NGC ID# 28DV, PCGS# 8528

**1914-S Five Dollar, MS61
Conditionally Elusive**

- 5877 1914-S MS61 NGC.** The 1914-S is another Indian Head half eagle that is available in circulation condition but scarce in Mint State. This MS61 coin remains accessible by many collectors. The strike is well-executed, and light chatter in the fields is all that limits the grade. The satiny surfaces yield original olive-gold coloration. NGC ID# 28DW, PCGS# 8529

**1914-S Indian Five, MS62
Seldom Encountered in Finer Grades**

- 5878 1914-S MS62 PCGS. CAC.** Both sides of this Select Mint State Indian half eagle exhibit hazel patina on the yellow-gold surfaces, with frosty mint luster and only trivial surface marks. The specialist will recognize the 1914-S as an important issue that is seldom found in finer grades. In fact, the average certified grade is less than 58. Ex: FUN Signature (Heritage, 7/2012), lot 4969; ANA Signature (Heritage, 10/2012), lot 6006. NGC ID# 28DW, PCGS# 8529

**1914-S Half Eagle, MS63
Seldom Seen This Fine**

- 5879 1914-S MS63 PCGS. CAC.** The 1914-S is a better date in Uncirculated condition, although a number of MS61 and MS62 coins are known. For the more ambitious specialist, this Select example is conditionally scarce, and anything finer is a major rarity. The surfaces glow with orange-gold luster and reveal only trivial marks in the fields. The lower headdress feathers are slightly soft, but the strike is otherwise well-executed. An important opportunity for the Indian gold specialist. Population: 51 in 63, 9 finer; CAC: 10 in 63, 4 finer (3/16). NGC ID# 28DW, PCGS# 8529

**1915 Half Eagle, Pinpoint-Sharp MS64
Radiant Yellow-Gold Surfaces**

- 5880 1915 MS64 PCGS.** The Garrett-Guth *Gold Encyclopedia* notes that the 1915 Indian Head five dollar is among “the more attractive issues from the series ... [and] tends to be sharply struck and lustrous, with minimal granularity.” This near-Gem embodies all of those virtues, displaying radiant yellow-gold surfaces featuring pinpoint definition throughout. Scant marks in the upper-right reverse field behind the eagle’s head account for the grade. Rarely seen finer. NGC ID# 28DX, PCGS# 8530

EARLY EAGLES

**1799 Ten Dollar, AU Details
Small Obverse Stars, BD-2**

- 5881 1799 Small Obverse Stars, BD-2, High R.5 — Obverse Damage — NGC Details. AU.** Bass-Dannreuther Die State d/c. A richly detailed example with hints of orange-red toning in protected areas. The open fields and high points are yellow-gold. The obverse is moderately hairlined and has a few small roundish digs on the portrait. The obverse field has brief, faded scratches near the I in LIBERTY and stars 4, 8, and 12. Cursive initials, perhaps JEG, are pinscratched on the upper reverse field. Among 1799 eagles, BD-2 is a rare variety relative to the usually encountered BD-7 and BD-10 marriages.

**1799 Eagle, BD-7, AU50 Details
Bold, Even Strike**

- 5882 1799 Small Obverse Stars, BD-7, R.3 — Repaired, Whizzed — ANACS. AU50 Details.** Bass-Dannreuther Die State d/d, heavily cracked obverse. BD-7 is among the more plentiful 1799 eagle varieties, although demand from type collectors maintains the elusiveness of examples in any grade. This piece is boldly and evenly struck. Extensive tooling is seen in the obverse fields and on the portrait, and both sides are brushed with hairlines. Subdued yellow-gold color blankets each side. NGC ID# 2624, PCGS# 45730 Base PCGS# 98562

LIBERTY EAGLES

5883 1842 Large Date AU53 PCGS. Luster fills the legends and individually outlines each star. A sun-gold representative with pleasing sharpness and interesting reverse die cracks, which pass through the eagle's wings and left leg. Tiny marks are scattered, and we note a bright area above the UN in UNITED. NGC ID# 262M, PCGS# 8584

5884 1842-O XF40 PCGS. Variety 3. A yellow-gold New Orleans No Motto eagle with noticeable luster and only moderate wear on the wings and curls. There are no distracting marks, but a pair of cherry-red alloy spots (as made) are near the M in AMERICA. From a low mintage of 27,400 pieces. NGC ID# 262N, PCGS# 8587

5885 1847-O AU53 NGC. Variety 2. An available variety, showing the mintmark far left and the base of the 1 in the date repunched. This example shows light high-point wear over medium olive-gold surfaces that retain hints of luster in the fields. There are no mentionable abrasions. NGC ID# 2632, PCGS# 8598

5886 1852-O VF35 PCGS. CAC. Variety 2. The scarcer of the two known marriages. The mintmark is closer to the feather tip than is Variety 1. Both varieties have a "shield ring" atop the second vertical stripe. Any 1852-O tens is very scarce, since just 18,000 pieces were struck. Some luster remains on this orange-gold New Orleans No Motto ten. Neither side exhibits any mentionable marks. NGC ID# 263D, PCGS# 8609

5887 1854 AU58 NGC. The honey-gold surfaces show traces of light circulation wear on the high point and minor ticks scattered about. Most of the obverse stars lack definition, but otherwise this coin possesses strong luster remaining and good overall eye appeal. Some prooflike reflectivity lurks in protected areas of the reverse. Only 54,250 examples were struck of this issue. Census: 51 in 58 (1 in 58+), 11 finer (3/16). NGC ID# 263G, PCGS# 8613

5888 1854 AU58 PCGS. CAC. Garrett and Guth write that the 1854 "is a relatively scarce date, comparable to the 1842-O, 1848, and 1851 issues." Probably between 200 and 250 pieces survive from a mintage of 54,250 coins. This near-Mint example with CAC approval features attractive reddish-gold coloration. The centers are strongly defined and considerable luster remains. Population: 16 in 58, 8 finer (2/16). NGC ID# 263J, PCGS# 8613

5889 1854-O Large Date AU53 NGC. Variety 1. With an oversized date punch intended for silver dollars, the Large Date type is eagerly sought by collectors even though it is about equally available compared to its Small Date counterpart. This About Uncirculated example displays natural green-gold color with light abrasions but no heavy marks and traces of remaining mint luster. A small, triangular planchet flaw is noted near Liberty's mouth. Struck from the Variety 1 die pair, with the date lower than all other Large Date varieties. NGC ID# 263J, PCGS# 98614

5890 1854-S XF45 PCGS. From the first year of operations at the branch Mint in San Francisco, the 1854-S ten is one of just three collectible gold issues representing that historic occasion. Both sides exhibit scattered marks, non of consequence, with traces of luster on the light yellow surfaces. NGC ID# 263K, PCGS# 8615

1855 Liberty Eagle, MS60 Elusive Issue in High Grade

5891 1855 MS60 NGC. From a nominal mintage of 121,701 pieces, the 1855 Liberty eagle is scarce-to-rare in all Mint State grades. This impressive MS60 example offers well-detailed design elements and vivid orange-gold surfaces with vibrant mint luster throughout. The pleasing surfaces show the minimum number of minor contact marks for the grade. Census: 12 in 60, 30 finer (2/16). NGC ID# 263L, PCGS# 8616

5892 1857-S VF20 PCGS. Mintage figures for the San Francisco eagles bounced around quite a bit in the first couple decades of operations. In 1857, that facility produced 26,000 eagles. One of those is the present circulated specimen that exhibits smooth wheat-color surfaces. NGC ID# 263V, PCGS# 8624

5893 1861 AU55 PCGS. CAC. The 1861 Liberty eagle is seldom encountered in high grade. This pleasing Choice AU specimen shows a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces show traces of original mint luster. Population: 51 in 55, 71 finer (3/16). NGC ID# 2647, PCGS# 8633

1863 Ten Dollar, XF Details Rare in Any Condition

5894 1863 — Cleaning — PCGS Genuine. XF Details. With its famously low mintage of 1,218 pieces, the 1863 Liberty eagle is a rarity in all grades. Only 30-45 coins are thought to survive, per the PCGS estimate, and with only 15 offerings of this date in our auctions in more than two decades, this figure seems accurate. The present coin displays slightly dulled surfaces from cleaning, but has decent bronze-gold color. Scattered abrasions and a few darker alloy spots are seen. The strike is sharp. NGC ID# 264B, PCGS# 8637

5895 1865 — Ex-Jewelry — PCGS Genuine. XF Details. The 1865 has a scant business production of 3,980 pieces. Few if any were set aside by numismatists until decades later, and only 50 to 100 examples have survived. This affordable representative is polished and moderately bright. The surfaces display distributed moderate marks, and the reverse dentils are scratched. The reverse has a wire rim and the left obverse rim is irregular. NGC ID# 264F, PCGS# 8641

1869 Liberty Eagle, AU55
Underrated, Low-Mintage Issue

5896 1869 AU55 PCGS. From a meager mintage of 1,830 pieces, the 1869 Liberty eagle is scarce-to-rare in all grades today. This attractive Choice AU specimen shows just a touch of wear on the design elements and the lightly abraded surfaces show much prooflike reflectivity in sheltered areas. Population: 6 in 55, 2 finer (3/16). NGC ID# 264R, PCGS# 8655

1870-S Ten Dollar, AU53
Seldom Encountered Finer

5897 1870-S AU53 PCGS. The 1870-S ten dollar is predictably rare, both in the absolute as well as conditional sense. Only 8,000 pieces were struck, and most circulated heavily in the West. Only one Mint State piece has been certified to date (3/16), and any coin in AU is scarce and worthwhile. This piece still retains noticeable portions of mint luster surrounding the devices. The reddish-gold surfaces are lightly marked and problem-free. Population: 4 in 53, 7 finer (3/16). NGC ID# 53FU, PCGS# 8659

5898 1871-S VF25 PCGS. CAC. The San Francisco Mint struck 928,000 double eagles during 1871, but coined just 16,500 ten dollar pieces. None were saved by collectors until decades later, and none are certified as Mint State by either leading service. In fact, the 1871-S is about as rare as the 1871-CC, but trades at a much lower value. An apricot-gold example with traces of luster but no relevant abrasions. Housed in a green label holder.
Ex: Orlando FUN Signature (Heritage, 7/2011), lot 4859, which realized \$1,380. NGC ID# 264Y, PCGS# 8662

5899 1871-S XF40 NGC. CAC. The 1871-S ten dollar mintage of 16,500 coins produced fewer than 100 pieces that are believed to survive today, and none of these are in Mint State. This is a pleasing XF example with original honey and orange-gold coloration. The motifs are well-detailed, and the surfaces are free of unsightly abrasions. Census: 11 in 40, 59 finer (3/16). NGC ID# 264Y, PCGS# 8662

1873-S Ten Dollar, XF45
Fewer Than 100 Pieces Known

5900 1873-S XF45 PCGS. CAC. The 1873-S eagle had a small mintage of 12,000 coins. Fewer than 100 pieces are thought to survive, and almost none are in Mint State. This Choice XF example displays pleasing detail with rich honey and orange-gold coloration. Hints of luster remain in the peripheral fields. An attractive, problem-free example. Population: 10 in 45, 21 finer (3/16). NGC ID# 53M7, PCGS# 8668

1877-CC Ten Dollar, AU Details
Sharp and Lustrous, Rare in All Grades

5901 1877-CC — Tooled — PCGS Genuine. AU Details. Variety 1-A. With a mintage of only 3,332 pieces, the 1877-CC eagle is scarce in all grades; only 60 to 75 pieces are believed extant, and none are known in Mint condition. This coin is sharply detailed and possesses nearly full luster on the reverse. The obverse is somewhat more subdued by faint tool marks in the fields, which appear under a loupe as hairline scratches. There are no severe abrasions, and the eye appeal is quite pleasing for a Details-graded coin. NGC ID# 265G, PCGS# 8678

1877-S Ten Dollar, AU53
Partially Lustrous, Original Surfaces

5902 1877-S AU53 PCGS. CAC. A scarce date, from a mintage of just 17,000 pieces. Only three Uncirculated coins are known, all MS61 or lower and at NGC. This lightly circulated example is among the finest PCGS representatives and displays a few minor abrasions in the left obverse field. Some luster remains in the fields amid original honey-gold patina. Population: 4 in 53, 10 finer (3/16).
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4366. NGC ID# 265H, PCGS# 8679

**1881 Eagle, Elusive MS64+
One Gem Finer at PCGS**

5903 1881 MS64+ PCGS. Much prooflike reflectivity sparkles throughout both sides, an enormous plus on this high-grade Liberty eagle. This mass-produced Philadelphia issue is widely available through the Select grade level, but it becomes deceptively rare in MS64. Plus-designated near-Gems are extremely rare but often the only option for those looking to assemble the finest set possible, as there are merely three submissions finer, one at PCGS and two at NGC. Understandably, Gems are tightly held, and our records show a single auction appearance 20 years ago. This Condition Census coin displays light rose-gold surfaces with coruscating mint frost. A bold strike and minimal field chatter add to the top-notch appeal. Population: 4 in 64+, 1 finer (3/16). NGC ID# 265W, PCGS# 8691

5904 1881-S MS63 NGC. Scattered ticks are minor but the strike and luster are strong on this Select Mint State 1881-S eagle, one of the higher-mintage issues from the San Francisco Mint. One patch of larger abrasions appears in the reverse right field under the eagle's wing. Census: 28 in 63 (1 in 63 ★), 2 finer (3/16). NGC ID# 265Z, PCGS# 8694

5905 1882 MS62 Prooflike NGC. Deep reflectivity in the fields of this Mint State 1882 gold eagle produces significant cameo contrast on each side. The strike is razor-sharp, but moderate abrasions limit the grade. Still, the number of Prooflike coins certified by NGC is small. Census: 12 in 62 Prooflike, 1 finer (2/16). NGC ID# 2662, PCGS# 78695

**1883-CC Ten Dollar, AU55
Prooflike Fields, Rarely Seen Finer**

5906 1883-CC AU55 PCGS. Variety 2-C. With a mintage of only 12,000 pieces, the 1883-CC ten is scarce in all grades and extremely rare in Mint State, with most such pieces showing heavy abrasions. This Choice AU representative is a more affordable alternative. The fields have light chatter but are nonetheless deeply reflective, and the design elements show trivial wear. Bright yellow-gold color blankets each side. Population: 12 in 55, 13 finer (3/16). NGC ID# 2667, PCGS# 8700

**1884-S Ten Dollar, MS63
Among the Finest Certified**

5907 1884-S MS63 NGC. Both sides offer undeniably flashy luster through pale straw-gold centers, though the butter-yellow rim areas have a more subdued appearance. The obverse fields show numerous light abrasions, though the portrait alone has a better-than-Select appearance. Easily one of the finest-known survivors from this underrated S-mint eagle issues. Census: 4 in 63, 0 finer (3/16). Ex: FUN Signature (Heritage, 1/2011), lot 7114. NGC ID# 554U, PCGS# 8705

**1884-S Ten Dollar, MS63
Rare, Tied for Finest Certified**

5908 1884-S MS63 PCGS. Most Uncirculated 1884-S tens grade MS62 or lower. This Select example is a rarity, and none are known finer. The strike is bold, and the frosty surfaces display attractive wheat-gold margins with rose and peach interiors. Light abrasions on each side limit the grade but do not significantly reduce the eye appeal. An underrated condition rarity. Population: 13 in 63, 0 finer (3/16). NGC ID# 554U, PCGS# 8705

5909 1885 MS63 NGC. The 1885 Liberty eagle is very scarce in MS63 condition, and finer coins are very rare. This attractive Select example displays well-detailed design elements and lightly marked, yellow-gold surfaces, with a few hints of reddish patina. Census: 25 in 63, 6 finer (3/16). NGC ID# 266D, PCGS# 8706

5910 1887 MS62 PCGS. Glowing golden-orange luster appears on surfaces that show an adequate if not bold strike. Numerous small-to medium-sized abrasions appear on both sides, the largest a straight nick at Liberty's temple, but others show on the cheek and neck. The reverse is in a similar condition, showing numerous abrasions on each side of the eagle. This is a low-mintage issue, struck to the extent of only 53,600 circulation strikes and 80 proofs. Population: 38 in 62, 6 finer (3/16). NGC ID# 266H, PCGS# 8710

5911 1887 MS62 PCGS. From a mintage of 53,680 pieces, the 1887 Liberty eagle is seldom found in Mint State grades. This well-detailed MS62 example displays lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. Population: 36 in 62, 6 finer (2/16). NGC ID# 266H, PCGS# 8710

5912 1888 MS62 PCGS. The 1888 Liberty eagle is a better date in Uncirculated condition. This MS62 coin displays a bold strike and radiant yellow-gold luster. Scattered abrasions define the grade, although such are almost unavoidable on this issue. Population: 44 in 62, 8 finer (3/16). NGC ID# 266V, PCGS# 8712

1888-O Ten Dollar, MS63
Attractive Luster, Rare This Fine

5913 1888-O MS63 PCGS. Variety 1. The 1888-O ten is a slightly better date, coming from a low five-figure mintage of 21,335 coins. In MS63, the New Orleans issue emerges as a rarity, and finer coins are almost unknown. This Select representative displays sharp design elements and frosty wheat-gold luster that shimmers when rotated beneath the light. Small, grade-defining surface grazes hardly impact the eye appeal. Population: 24 in 63, 1 finer (2/16). NGC ID# 266L, PCGS# 8713

5914 1888-S MS63+ PCGS. CAC. The 1888-S is available by the hundreds in MS61 and MS62, but Select pieces are considerably scarcer. This CAC-endorsed MS63+ eagle is on the precipice of matching the finest certified examples at both services. Frosty peach-gold surfaces show scattered marks and minor incompleteness on the stars, but the overall impression is crisp. NGC ID# 266M, PCGS# 8714

1889 Liberty Eagle, MS61
Rare in Mint State

5915 1889 MS61 PCGS. CAC. Between 1884 and the series end, the honor of lowest mintage issue falls to the 1889. A scant 4,440 business strikes were coined along with 45 proofs. The minimal production may have been due to the need to strike silver dollars, since the 1889 Philadelphia Morgan mintage exceeded 21 million pieces, the highest of the pre-1921 type. As one might expect, the 1889 ten is rare in Mint State. This well-struck sun-gold example has good luster and the expected smattering of small marks. Population: 24 in 61, 6 finer (3/16).
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4379. NGC ID# 266N, PCGS# 8715

5916 1890-CC AU55 NGC. Variety 1-A. The only known die pair, showing light doubling on IN GOD WE TRUST. This 1890 Carson City eagle shows orange-gold surfaces with light high-point wear. Moderate reflectivity adds eye appeal to the fields. There are no severe abrasions. NGC ID# 266S, PCGS# 8718

1890-CC Eagle, MS62
Semiprooflike Surfaces

5917 1890-CC MS62 PCGS. Variety 1-A. A frosted portrait of Liberty and semireflective fields give the obverse a decidedly prooflike appearance. The reverse shows a similar effect. These qualities are characteristic of a low-mintage issue like the 1890-CC ten dollar, struck to the extent of merely 17,500 pieces. Luster swirls over orange-gold surfaces tinged with elements of violet. A pinpoint-sharp strike and minimal abrasions add to the allure of this Uncirculated Carson City eagle. Population: 53 in 62 (1 in 62+), 7 finer (2/16). NGC ID# 266S, PCGS# 8718

5918 1891 MS63 NGC. The 1891 eagle becomes scarce in MS63, and finer coins are extremely rare. This piece displays a bold strike and frosty wheat-gold luster with greenish hues near the borders. Light, scattered abrasions define the grade. Census: 49 in 63, 2 finer (3/16). NGC ID# 266T, PCGS# 8719

5919 1891-CC XF45 NGC. Variety 2-B. The typically seen early die state without cracks around the date. This Choice XF example displays bold detail for the grade with pleasing straw-gold surfaces. Moderate luster remains in the protected regions of the fields. NGC ID# 266U, PCGS# 8720

5920 1891-CC/CC FS-501 AU58 PCGS. Variety 4-C. The bottom curve of a misguided C is sharply visible to the right of the second C in the mintmark, while the remnants of repunching also appear within the first C. A down-curved spike below Liberty's jaw confirms the 4-C die pair. The fields and devices retain a large amount of reflectivity and mint luster, with remarkably few marks on either side of this attractive near-Mint, butter-gold eagle. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

1892-CC Eagle, MS61
Popular Carson City Type Coin

5921 1892-CC Triple Die Reverse, FS-801, MS61 PCGS. Variety 1-A. PCGS calls this variety a Doubled Reverse Die (although the present piece has no designation or attribution on the holder), while NGC and the Cherrypickers' Guide suggest it is a Triple Reverse Die. The feature is best viewed at the motto, IN GOD WE TRUST, where certain features are clearly tripled.

From a mintage of 40,000 pieces, the 1892-CC eagle is an available date and enjoys great popularity with mintmark type collectors. The present coin is an attractive MS61 specimen, with brilliant luster, attractive color, and a crisp strike. Under a loupe, a scattering of small abrasions can be seen on the orange-gold surfaces, along with a single straight scrape across the cheek of Liberty. Clash marks are seen in the center reverse. Population: 11 in 61, 36 finer (3/16). NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

1892-CC FS-801 Eagle, MS62
Conditionally Scarce Carson City Issue

5922 1892-CC Tripled Die Reverse, FS-801, MS62 PCGS. Variety 1-A. A pleasing olive-green and apricot-gold representative. Lustrous and boldly struck with scattered and inoffensive field contact. The penultimate Carson City issue with a mintage of just 40,000 pieces. The '92-CC was coined using two obverse dies and one reverse die. All examples exhibit die tripling on IN GOD WE TRUST. Population: 34 in 62 (2 in 62+), 2 finer (3/16). NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

5923 1892-O MS62 PCGS. Variety 1. An olive-green and apricot-gold better date New Orleans ten. Luster dominates the borders, and the strike is sharp except on the lowest stars. Small marks are scattered but the portrait is relatively unabraded. NGC ID# 266X, PCGS# 8723

5924 1893 MS61 Prooflike NGC. Prooflike examples of this otherwise available issue (1.8 million coins minted) are very scarce in any grade. Deep orange-gold color, reflective mirrors, and captivating field-device contrast characterize this pleasing MS61 Liberty Head eagle. Sharply struck with an expected number of abrasions. NGC ID# 266Z, PCGS# 78725

5925 1893 MS62 Prooflike NGC. The design elements of this remarkable MS62 example are sharply detailed and much prooflike reflectivity is evident in the fields. A number of minor grazes and contact marks on both sides explain the grade. NGC ID# 266Z, PCGS# 78725

1893-CC Ten Dollar, AU55
Better Branch Mint Issue

5926 1893-CC AU55 PCGS. Variety 1. The 1893-CC ten stands out among its peers with a low mintage 14,000 pieces. Survivors are elusive in all grades and rare in Mint State. This Choice AU representative displays lightly abraded honey-gold surfaces with partially reflective fields and sharp design elements. Pleasing for the grade and issue. Population: 37 in 55, 39 finer (3/16). NGC ID# 2672, PCGS# 8726

5927 1894 MS64 PCGS. A lovely and lustrous near-Gem of this high-mintage date, showing flashy and well-struck orange-gold surfaces. A few trivial contact marks are consistent with the grade and largely relegated to the reverse field. An interesting die crack runs around much of the reverse periphery. NGC ID# 2675, PCGS# 8729

5928 1894 MS64 NGC. Despite nearly 2.5 million coins minted, the 1894 is an important condition rarity in the Liberty eagle series, plentiful at this grade level but rarely seen finer, with just 16 higher grade pieces certified at NGC and PCGS (3/16). An impressive Choice Mint State example, this 1894 eagle has highly lustrous orange-gold surfaces with delicate blue overtones. NGC ID# 2675, PCGS# 8729

1894 Ten Dollar Liberty, MS64+
Superior Type Coin

5929 1894 MS64+ PCGS. CAC. Ex: Simpson-Hall. The 1894 is widely recognized as an available ten dollar Liberty in mint condition, making it a logical choice for a type coin since so many are available to choose from. However, only 16 coins have been certified finer by PCGS (3/16). This Plus-certified piece has rich, glowing mint luster and equally rich reddish color. The strike is complete in all areas and there are no noticeable abrasions. NGC ID# 2675, PCGS# 8729

5930 1897 MS64 PCGS. This fully struck near-Gem 1897 eagle glistens with strong mint luster on honey-gold surfaces. Most of the vertical shield lines are weak, due to die lapping, and one small luster graze near the date perhaps precludes an even finer grade. PCGS reports 14 submissions in Gem and finer grades of this well-made issue (3/16). NGC ID# 26CH, PCGS# 8737

1899-O Liberty Eagle, MS63+
Elusive, Low-Mintage Issue

5931 1899-O MS63+ PCGS. Variety 1. From a mintage of 37,047 pieces, the 1899-O Liberty ten is the scarcest New Orleans eagle struck after 1883. This high-end Select example exhibits sharply detailed design elements and lightly marked orange and rose-gold surfaces, with vibrant mint luster and a few areas of prooflike reflectivity. Population: 14 in 63 (1 in 63+), 5 finer (3/16). NGC ID# 267K, PCGS# 8743

5932 1901 MS64 NGC. Frosty wheat-gold luster delivers a soft glow on each side of this Choice 1901 Liberty eagle, an ideal 20th century type-coin candidate. The strike is sharply rendered, and there are no mentionable abrasions. NGC ID# 7LHF, PCGS# 8747

5933 1901 MS64+ PCGS. A high-end Choice example of this popular date, with sharply detailed design elements and lightly marked peach-gold surfaces that radiate vibrant mint luster. Overall eye appeal is terrific. NGC ID# 7LHF, PCGS# 8747

5934 1901 MS64+ PCGS. CAC. An orange-gold near-Gem that offers a sharp strike and potent cartwheel sheen. None of the scattered incidental marks require singular description. Among the more available issues, but always in demand as a representative of the type. NGC ID# 7LHF, PCGS# 8747

- 5935 1901-S MS64+ NGC. Breen-7075.** The base of the first 1 in the date is clearly repunched south. UNITED STATES OF is strike doubled, which Breen (or his source) misinterpreted as die doubling (Breen-7074, debunked). A well struck and lustrous near-Gem with rich peach toning and the expected number of incidental field marks. NGC ID# 267S, PCGS# 8749

**1901-S Eagle, MS65
Hands-Down Choice for Type**

- 5936 1901-S MS65 NGC.** The high mintage and careful production by the San Francisco Mint makes the 1901-S the single most available Liberty ten in the entire series in Gem and finer grades. Even so, MS65 pieces outnumber the numerically finer examples by about five-to-one, making 1901-S coins the most highly sought of the series for Gem type. This lustrous and razor-sharp example displays frosty, honey-gold luster across smooth and minimally marked surfaces. Eye appeal is considerable. NGC ID# 267S, PCGS# 8749

**1901-S Liberty Eagle, MS65
Well-Preserved, Lustrous Example**

- 5937 1901-S MS65 PCGS.** This spectacular Gem exhibits sharply detailed design elements, with a number of peripheral die cracks on both sides. The well-preserved orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. This piece will be a welcome addition to an outstanding collection of Liberty eagles. NGC ID# 267S, PCGS# 8749
- 5938 1902-S MS64 PCGS.** The vivid orange-gold surfaces of this attractive Choice specimen show just a few scattered, minor contact marks, and both sides radiate vibrant mint luster. The design elements are razor-sharp and overall eye appeal is terrific. NGC ID# 267U, PCGS# 8751

**1902-S Eagle, MS65+
Admirable Example of a Well-Produced Issue**

- 5939 1902-S MS65+ NGC.** The 1902-S eagle is a great choice for type-set purposes, quite well-produced, as this MS65+ coin admirably demonstrates, and available, for a price, even up to the stratospheric reaches far above Gem. This example shows the issue's virtues, including a bold strike, excellent preservation, and ample luster on orange-gold surfaces throughout. A few small ticks on the reverse account for the grade. The sole finest available is the Eliasberg-Clapp-High Desert Collection coin in the PCGS Set Registry, an incredible MS68+ depicted on PCGS CoinFacts. Census: 2 in 65+, 1 in 65 ★, 12 finer (2/16). NGC ID# 267U, PCGS# 8751
- 5940 1905-S MS62 PCGS.** Scattered small- and medium-sized abrasions are consistent with the grade, the largest on the obverse a straight scrape past star 7. The reverse also shows numerous abrasions, but both sides boast attractive orange-gold luster and an ample strike. Population: 48 in 62, 13 finer (3/16). NGC ID# 2683, PCGS# 8758
- 5941 1905-S MS62 PCGS.** From a respectable mintage of 369,250 pieces, the 1905-S Liberty eagle is very scarce in MS62 condition, and finer pieces are rare. This attractive MS62 example is sharply detailed, with lightly marked orange-gold surfaces that radiate vibrant mint luster. Population: 46 in 62, 13 finer (2/16). NGC ID# 2683, PCGS# 8758
- 5942 1905-S MS62 NGC.** Shining sun-gold at the margins with gradual paling to canary-yellow near the centers. Well-defined with only wispy abrasions on each side, though these combine to preclude Select status. Census: 24 in 62, 4 finer (2/16).
Ex: *Central States Signature (Heritage, 4-5/2009)*, lot 3882. NGC ID# 2683, PCGS# 8758
- 5943 1907 MS64 NGC.** The final Liberty Head eagle from the Philadelphia Mint is scarce above MS64. This Choice type coin displays a bold strike with frosty green-gold luster. A few small, scattered ticks preclude Gem classification but pose little visual detractor. NGC ID# 2688, PCGS# 8763
- 5944 1907 MS64+ PCGS. CAC.** The Plus designation on this near-Gem Liberty eagle is not surprising, as it is mighty close to MS65, despite a couple of milling marks on the neck and a few faint lines on the portrait. Lovely luster complements blond-gold surfaces free of other significant contact. Although PCGS has certified several hundred examples of this issue in MS64, the MS64+ population is only 26 submissions with 28 finer. CAC: 85 in 64, 6 finer (3/16). NGC ID# 2688, PCGS# 8763

PROOF LIBERTY EAGLE

Rare Proof 1886 Ten Dollar Uncirculated Sharpness

- 5945 1886 — Altered Surfaces — PCGS Genuine. Proof, Unc. Details.** The razor-sharp strike throughout confirms the proof status of this sun-gold specimen. The surfaces are moderately bright, and subtle blushes of peach patina accompany the fields near the profile and left (facing) wing. An opportunity to acquire an affordable example of this rare proof date. Only 60 proofs were issued. NGC ID# 28FR, PCGS# 8826

INDIAN EAGLES

- 5946 1907 No Motto MS62 PCGS.** Saved by the thousands, the challenge of the first-year No Motto Indian ten is to find a sharp and attractive example for the grade — characteristics that this appealing eagle displays in spades. Strong satiny luster shines from both sides, with mint-green highlights at the borders. Only a few tiny ticks appear anywhere on the coin, while a few scattered, delicate lines account for the assigned grade. NGC ID# 28GF, PCGS# 8852

- 5947 1907 No Motto MS63 PCGS.** Following the initial production of Indian eagles that included triangular “periods” among the lettering, full scale production began with a modified hub that lacked those small elements. This Select Mint State piece represents the modified design, usually collected as the “first type” of Indian eagles. Both sides display dazzling satin-yellow luster with excellent eye appeal. Ex: *Central States Signature* (Heritage, 4/2012), lot 6772. NGC ID# 28GF, PCGS# 8852

1907 No Periods Ten Dollar, MS65+ Incredible Visual Appeal

- 5948 1907 No Motto MS65+ PCGS.** Mint Engraver Charles Barber, besides lowering the relief of Saint-Gaudens’ majestic double eagle designs, also tinkered with the ten dollar piece, minutely modifying each side, with the most noticeable change being the removal of the triangular stops (or periods) on either side of the denomination. Nearly 240,000 examples of this variety were struck, and it remains one of the more obtainable Indian gold eagles in Gem condition, though demand is strong among specialists.

The eye appeal of this piece is simply immense, as each side is awash in frosty, iridescent yellow-gold luster, with virtually no signs of surface contact observed upon close examination. Liberty’s hair strands are weakly defined over the ear, though this is due to inadequate engraving and not poor striking pressure, and the design elements are otherwise needle-sharp.

From *The Indian Rocks Collection*. NGC ID# 28GF, PCGS# 8852

1907 Indian Eagle, MS66 First-Year No Motto Design

- 5949 1907 No Motto MS66 PCGS.** This delightful Premium Gem represents the first year of the Indian design and the short-lived No Motto type, an important consideration for type purposes. The design elements are well-detailed and the impeccably preserved orange-gold surfaces radiate vibrant mint luster on both sides. Eye appeal is terrific. PCGS has graded 11 numerically finer examples (2/16). NGC ID# 28GF, PCGS# 8852

1908 Ten Dollar, MS64+ Eye-Appealing No Motto Coin

- 5950 1908 No Motto MS64+ PCGS.** This is an outstanding example of this better No Motto issue, showcasing razor-sharp relief detail amid frosty orange-gold luster that has hues of mint-green and rose throughout. A few small marks on Liberty’s cheek limit the grade but hardly impact the eye appeal. Many collectors will appreciate the old-time patina. The 1908 No Motto Indian eagle is seldom seen finer.

From *The Indian Rocks Collection*. NGC ID# 28GG, PCGS# 8853

- 5951 1908 Motto MS63 NGC.** A pleasing first-year With Motto type coin, showing well-struck devices, satiny luster, and orange-gold color. Light abrasions on Liberty’s cheek limit the grade, but they are not overly detracting. The With Motto issue accounts for most of the Philadelphia eagle production in 1908 (341,300 pieces). NGC ID# 28GJ, PCGS# 8859

**1908-S Eagle, Sharp MS62
Low-Mintage Issue**

- 5952 1908-S MS62 PCGS.** The 1908-S ten dollar comes from a low mintage of 59,850 pieces. Mint State coins can be difficult to acquire, especially in near-Gem and higher. The peach-gold lustrous surfaces of this MS62 specimen display a fine-grained appearance, as often seen. The design elements are well-struck. Minor handling marks, especially on the reverse, limit an even finer grade. *Ex: Long Beach Signature (Heritage, 2/2015), lot 3306, which realized \$8,225.*
From The Indian Rocks Collection. NGC ID# 28GL, PCGS# 8861

- 5953 1909 MS63 PCGS.** This attractive Select Indian eagle displays vibrant mint luster and sharply detailed design elements throughout. The pleasing orange-gold surfaces show a few grade-defining contact marks on both sides. NGC ID# 28GM, PCGS# 8862

- 5954 1909 MS63 PCGS.** A better date in high grade, the 1909 Indian eagle is scarce above MS63. This accessible Select example offers sharp detail and rich, original color that shows mint-gold, rose, and honey hues. A few faint grazes limit the grade but hardly inhibit the eye appeal.
From The Indian Rocks Collection. NGC ID# 28GM, PCGS# 8862

**1909 Indian Ten, MS64
Scarce So Fine**

- 5955 1909 MS64 PCGS Secure.** The availability of the 1909 Indian eagle drops off sharply in MS64, and finer coins are rare. This Choice example displays keen eye appeal with glowing yellow-gold luster over surprisingly smooth, satiny surfaces. The strike is bold. A finer coin may not be obtainable below the financially challenging Gem grade level. PCGS lists only 29 pieces finer than the current offering (2/16). NGC ID# 28GM, PCGS# 8862

- 5956 1909-D MS62 PCGS.** A nicely struck caramel-gold coin displaying sweeping luster and the expected number of minor to moderate marks. The 1909-D eagle is a conditionally challenging Denver issue that saw a significantly lower mintage than its 1908-D predecessor —121,540 pieces versus 836,500. The certified populations start to thin out significantly at the Select grade level. NGC ID# 28GN, PCGS# 8863

- 5957 1909-D MS62 NGC. CAC.** A well-detailed MS62 example of this popular, early series issue, with lustrous orange-gold surfaces that show the minimum number of minor contact marks for the grade. From a mintage of 121,540 pieces. NGC ID# 28GN, PCGS# 8863

**Challenging 1909-D Eagle, MS63
Well-Struck, Satiny Surfaces**

- 5958 1909-D MS63 NGC.** The 1909-D Indian eagle is a challenging date in Mint State, and most such pieces are only in MS62 and lower grades. Select examples are scarce, and finer pieces are exceedingly so. This representative is well-struck and shows satiny wheat-gold surfaces. A small tick on Liberty's cheek below the eye is the only abrasion of note. Census: 62 in 63 (1 in 63+), 32 finer (3/16). *Ex: Long Beach Signature (Heritage, 1-2/2015), lot 3307, brought \$3,760; New York Signature (Heritage, 10-11/2015), lot 5201, realized \$3,290. NGC ID# 28GN, PCGS# 8863*

**1909-D Indian Ten, MS63
Vibrant Luster**

- 5959 1909-D MS63 PCGS.** Bright yellow-gold luster delivers a powerful cartwheel effect on this Select 1909-D Indian eagle, illuminating bold design elements and remarkably few abrasions for the grade. The 1909-D is a better date in Uncirculated condition, seldom seen finer than MS63. Gem examples are rare. This piece trails 43 finer coins at PCGS (3/16). NGC ID# 28GN, PCGS# 8863

**1909-D Ten Dollar, MS63
Well-Preserved, Textured Luster**

- 5960 1909-D MS63 NGC.** The 1909-D Indian eagle is a better date, elusive in MS63 and scarcely seen finer. This Select example balances quality and affordability. Sharp design elements are illuminated by soft honey-gold luster that has a distinctively mattelike texture. No significant abrasions are observed. Eye appeal is outstanding for the grade. Census: 62 in 63 (1 in 63+), 32 finer (3/16).
From The Indian Rocks Collection. NGC ID# 28GN, PCGS# 8863

1909-S Ten Dollar, MS64
Rich Color, Better S-Mint Issue

5961 1909-S MS64 PCGS. Ex: Harbor View. A better date in Uncirculated condition, the 1909-S Indian eagle is one of the underrated condition rarities in the series. This Choice example displays a bold strike and vivid orange-gold luster that reveals few abrasions. Eye appeal is outstanding. Finer coins are rare and out of reach for most collectors. Population: 59 in 64 (6 in 64+), 31 finer (2/16).
From The Indian Rocks Collection. NGC ID# 28GP, PCGS# 8864

5962 1910 MS64 PCGS. The 1910 Indian eagle can be found in MS64 condition with a little patience, but finer examples are quite scarce. This attractive Choice specimen is well-detailed, with vibrant mint luster and lightly marked orange-gold surfaces. NGC ID# 28GR, PCGS# 8865

5963 1910 MS64 NGC. The lightly granular surfaces have a thick layer of mint frost across each side. The appearance and general availability of the 1910 Philadelphia ten dollar make it a popular choice for type purposes. Sharply struck and minimally abraded. NGC ID# 28GR, PCGS# 8865

5964 1910 MS64 PCGS. This lemon-gold near-Gem offers booming luster and is refreshingly free from detrimental marks. An interesting radial die crack passes through the T in TEN. An exceptionally nice example for the designated grade. NGC ID# 28GR, PCGS# 8865

5965 1910 MS64 PCGS. CAC. An impressive Choice example of this early Indian Head eagle issue, showing nicely detailed design elements on well-preserved orange-gold surfaces with only minor signs of contact. Vibrant mint luster adds to the considerable eye appeal. Although PCGS has certified several hundred examples in this grade, CAC has awarded its green bean to only 42 in MS64 and 36 finer (3/16). NGC ID# 28GR, PCGS# 8865

5966 1910-D MS64 PCGS. This impressive Choice specimen exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. Overall visual appeal is outstanding. NGC ID# 28GS, PCGS# 8866

5967 1910-D MS64 PCGS. CAC. The finely granular surfaces serve a dual function of capturing light and returning it as cartwheel mint luster on this minimally marked, near-Gem Indian ten. As the most-available branch mint gold ten, the 1910-D is a perennial favorite for type enthusiasts. This piece is CAC-endorsed with a bold date and sharply defined feathers on the headdress and the eagle. NGC ID# 28GS, PCGS# 8866

5968 1910-D MS64+ PCGS. CAC. The 1910-D is one of the premier type coin issues in the Indian eagle series, due to its plentiful survival from the large emission exceeding 2.3 million pieces. Gem examples nonetheless number far fewer than lower-grade coins, making this piece a compelling potential acquisition. Strong eye appeal emanates from surfaces offering brilliant apricot-gold luster, a nice strong strike, and no marks of any consequence. CAC: 55 in 64, 49 finer (3/16). NGC ID# 28GS, PCGS# 8866

5969 1910-S MS62 PCGS. Breen-7114. The mintmark is repunched northwest. A lustrous peach-gold representative. The nicely struck surfaces are inoffensively abraded overall, though a reed impression on the jaw merits passing mention. A conditionally scarce issue. NGC ID# 268D, PCGS# 8867

1910-S Indian Eagle, MS64
Lustrous and Conditionally Rare

5970 1910-S MS64 NGC. The availability of the 1910-S Indian ten plummets in MS63, and the issue becomes genuinely rare as soon as the Choice level; Gems are extremely rare. This coin is not only well-preserved but is also highly eye-appealing for the grade. Radiant yellow-gold luster adorns each side, and the design elements are boldly rendered. Were it not for a few trivial lines on Liberty's cheek, a full Gem designation might have been achieved. Census: 20 in 64, 6 finer (2/16).
From The Indian Rocks Collection. NGC ID# 268D, PCGS# 8867

5971 1911 MS63 NGC. CAC. Vibrant yellow-gold luster gives this Select 1911 Indian eagle excellent eye appeal, while a few scattered abrasions limit the grade. The strike is sharp, and the CAC endorsement heightens the overall appeal. NGC ID# 28GT, PCGS# 8868

5972 1911-D XF45 NGC. The premier condition rarity of the Indian Head eagle series, the low mintage of 30,100 pieces is a contributing factor to its Mint State scarcity although circulated pieces are moderately available. This Choice XF example is softly lustrous with pleasing orange-gold color and a touch of remaining mint luster. A tick on the cheekbone plus a few light field marks are noted. NGC ID# 28GU, PCGS# 8869

5973 1911-D XF45 PCGS. CAC. A briefly circulated Choice XF example of this semikey Indian eagle, showing olive-gold surfaces with hints of luster in the fields. A thin mark on the eagle's shoulder is the only mentionable abrasion. Pleasing and original. NGC ID# 28GU, PCGS# 8869

1911-D Eagle, Lustrous AU58
Better Branch Mint Issue

5974 1911-D AU58 PCGS. The 1911-D ten dollar is a recognized semikey, scarce in all Mint State grades. This is a collectible near-Mint example with much luster remaining. Barely a brush of friction appears over the well-struck motifs, and there are no singular abrasions of note. Trivial chatter in the fields is consistent with the grade. This piece will please many collectors.
From The Indian Rocks Collection. NGC ID# 28GU, PCGS# 8869

**1911-D Ten Dollar, MS61
Scarce in Uncirculated Condition**

- 5975 1911-D MS61 NGC.** With a mintage of only 30,100 pieces, the 1911-D Indian eagle is a semikey in all grades. Mint State coins are scarce. This example displays bold detail and satiny yellow-gold luster. Light chatter limits the grade, although singularly obvious abrasions are not present. Finer coins are occasionally seen but are far out of reach for many collectors. NGC ID# 28GU, PCGS# 8869

- 5976 1912 MS64 NGC.** Smoky-gold surfaces sport generous luster amid a few light luster grazes that preclude a Gem grade. The largest contact marks are confined to the reverse, both on the eagle's upper wings and the fields around. NGC ID# 28GW, PCGS# 8871

**1912-S Ten Dollar, MS64
Underrated in High Grade**

- 5977 1912-S MS64 PCGS.** The scarcity of the 1912-S ten in Mint State is often overlooked in favor of more traditional keys such as the 1911-D and 1913-S. But the '12-S is undeniably scarce in MS64, and Gems are rarely seen. This Choice representative boasts satiny luster with rich honey and wheat-gold hues. A loupe reveals trivial strike softness on the interior high points, and a few scattered marks define the grade. Population: 77 in 64 (23 in 64+), 14 finer (2/16). From *The Indian Rocks Collection*. NGC ID# 269G, PCGS# 8872

- 5978 1914 MS63 NGC.** A few light marks exist on the finely textured surfaces, but mint luster provides strong eye appeal for this well-defined eagle. A pleasing Select Uncirculated example of an underrated Philadelphia issue.
Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 7520; *Long Beach Signature* (Heritage, 6/2010), lot 1802. NGC ID# 28H2, PCGS# 8875

- 5979 1914 MS63 PCGS Secure.** A lovely Indian eagle with frosty lemon-yellow surfaces and brilliant luster. This piece shows the usual design weakness at the center of the obverse that seems to be a hallmark of the Charles Barber redesign of Saint-Gaudens' work. NGC ID# 28H2, PCGS# 8875

- 5980 1914-D MS63 PCGS Secure.** The Select Uncirculated level is an optimal collector grade for this Denver Indian ten, since the issue becomes scarce in near-Gem or finer grades. Quality examples such as the present coin require a diligent search. This example is sharply struck and nearly unabraded except for a small mark beneath the motto on the reverse. Slight blending at the eagle's shoulder is noted. Mint luster flows over the frosty, finely textured yellow-gold surfaces. NGC ID# 28H3, PCGS# 8876

- 5981 1914-D MS63+ PCGS.** One appreciable nick on the Indian's rear jaw accompanies smaller ticks and luster grazes that define the grade on this highly lustrous coin, which retains broad eye appeal on honey-gold surfaces. A couple of other marks show on the eagle's upper wing and neck on the reverse. NGC ID# 28H3, PCGS# 8876

- 5982 1914-S AU58 NGC.** The pleasing orange-gold surfaces of this impressive near-Mint specimen are lightly abraded and brightly lustrous throughout. The well-detailed design elements show just a trace of high-point wear and the overall presentation is quite attractive. NGC ID# 28H4, PCGS# 8877

- 5983 1914-S MS61 PCGS.** The 1914-S Indian ten is an important, lower mintage issue with a business strike production of just 208,000 coins. Examples are plentiful in higher circulated grades, but scarce in all Mint State grades. This piece displays beautiful sun-gold color with vibrant, frosty-textured luster. The strike lacks completeness only at the top shoulder of the eagle's wing. Seemingly conservatively graded and an excellent opportunity for the astute ten dollar gold collector.
Ex: *FUN Signature* (Heritage, 7/2010), lot 4810. NGC ID# 28H4, PCGS# 8877

**1914-S Indian Eagle, MS63
Seldom Seen Finer**

- 5984 1914-S MS63 PCGS.** The availability of the 1914-S Indian ten drops significantly in Mint State, and the issue is scarce in MS63. Finer coins are exceedingly so. This piece displays lovely orange-gold luster with hints of rose and mint-green in the fields. The design elements are well-defined, and grade-limiting abrasions are minor. From a mintage of 208,000 coins.
From *The Indian Rocks Collection*. NGC ID# 28H4, PCGS# 8877

**1915 Ten Dollar, MS64+
Elusive in Finer Condition**

- 5985 1915 MS64+ PCGS.** In MS64, the 1915 Indian eagle is modestly plentiful, but finer coins are scarce. The budget-conscious enthusiast will find significant appeal in this Plus-designated piece, which shows bold relief detail and bright yellow-gold luster. Grade-limiting abrasions are trivial, and eye appeal is high. PCGS has seen 65 finer representatives, including likely resubmissions (2/16). NGC ID# 28H5, PCGS# 8878

- 5986 1915-S AU53 NGC.** With a mintage of only 59,000 pieces, the 1915-S Indian ten is scarce in any Mint State grade. This accessible AU coin displays satiny yellow-gold luster in the fields with slight wear over the well-struck relief elements. A few small marks do not detract. NGC ID# 28H6, PCGS# 8879

1915-S Indian Ten, MS62
Low-Mintage Issue

- 5987 1915-S MS62 PCGS.** All San Francisco Indian ten issues are scarce in Mint State, but the 1915-S ranks among the semikeys, since only 59,000 pieces were struck. The present lustrous lemon-gold example has no obvious abrasions and the designs are sharp despite minor incompleteness on the forehead curl and the left wing border.
Ex: FUN Signature (Heritage, 7/2011), lot 4964. NGC ID# 28H6, PCGS# 8879

1916-S Ten Dollar, MS63
Attractive Luster

- 5988 1916-S MS63 PCGS.** This conditional semikey had a small mintage of 138,500 coins and is elusive in any Mint State grade. The present coin is boldly struck with vibrant honey-gold luster and minimal abrasions. The San Francisco Mint was the only facility to strike gold in 1916, making an example of this issue essential for a complete date set.
From The Indian Rocks Collection. NGC ID# 28H7, PCGS# 8880

1916-S Eagle, Satiny MS63

- 5989 1916-S MS63 PCGS.** A number of this issue survived the melting pot via European bank vaults, but most Mint State representatives exhibit light to moderate bagmarks, with the result that Choice examples are scarce and Gems rare. This satiny Select coin displays warm honey-gold color overall, with minimal surface abrasions. Some minor strike softness shows on the eagle's shoulder, but the design elements are otherwise well-defined.
Ex: Summer FUN Signature (Heritage, 7/2014), lot 3990. From The Indian Rocks Collection. NGC ID# 28H7, PCGS# 8880

- 5990 1926 MS65 NGC.** Frosty original luster shows wisps of rose and peach throughout primarily green-gold surfaces on this Gem 1926 Indian eagle type coin. The strike is sharp, and only a few trivial grazes limit the grade. NGC lists 52 finer submissions (3/16). NGC ID# 28H9, PCGS# 8882

- 5991 1932 MS64 NGC.** Frosty original luster glows on each side of this Choice 1932 Indian eagle type coin, revealing minimal abrasions and boldly rendered design elements. Eye appeal is above average for the grade. The budget-conscious collector should give this piece ample consideration over a more costly and minutely better-preserved Gem. NGC ID# 28HB, PCGS# 8884

- 5992 1932 MS64+ NGC.** A Plus-graded Choice specimen of this popular type issue, with well-detailed design elements that show just a touch of the usual softness on the eagle's shoulder. The lustrous orange-gold surfaces display only minor signs of contact and overall eye appeal is outstanding. NGC ID# 28HB, PCGS# 8884

1932 Indian Eagle, MS65+
Lovely Color and Luster

- 5993 1932 MS65+ PCGS. CAC.** This famous type-coin issue is available in MS65 but scarce finer. The present Plus-graded Gem is an ideal type collection addition. The strike is bold, and the frosty, radiant luster reveals rose, mint-green, and sun-gold hues. A few trivial grazes defend the grade assignment, and the CAC endorsement confirms the high quality of eye appeal. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Double Eagle, Appealing XF45

- 5994 1850 XF45 PCGS. CAC.** A few scattered ticks and pecks appear on each side — more so the obverse — of this Choice XF first-year double eagle, but there are scant marks for the grade; we have seen AU58 examples with far more abraded surfaces. Attractive apricot-gold color enlivens the eye appeal further. CAC: 23 in 45, 91 finer (3/16). NGC ID# 268F, PCGS# 8902

- 5995 1850 — Saltwater Damage — PCGS Genuine. AU Details.** Finely granular surfaces show few marks or abrasions and Liberty's cheek is smooth. A glass reveals microscopic pitting and effects of seawater, yet pleasing medium-gold color remains on both sides. Popular as the first regular-issue double eagle, just 26 pieces were recovered from the S.S. Central America during initial salvage operations. NGC ID# 268F, PCGS# 8902

**1850 Double Eagle, AU50
Original Patina**

- 5996 1850 AU50 PCGS.** This debut Philadelphia double eagle is blatantly original in color, showing green-gold surfaces with hints of luster and grease streaks (as struck) on the reverse. Each side exhibits heavy abrasions, characteristic of double eagles from the Gold Rush period. A pleasing coin for the collector seeking an old-time look. NGC ID# 268F, PCGS# 8902

**1850 Double Eagle, AU53
First-Year Type Coin**

- 5997 1850 AU53 NGC.** The inaugural double eagle coinage at Philadelphia absorbed significant quantities of freshly mined California gold, although private San Francisco assayers still offered a faster and more convenient coining option for prospectors. Only in 1854, with the opening of the San Francisco branch mint, did private coinage enterprises in that region fade away. Examples of the 1850 Philadelphia issue are popular today as Gold Rush-era type coins. This AU piece displays lightly abraded, yellow-gold surfaces with pleasing detail on the devices. NGC ID# 268F, PCGS# 8902

- 5998 1850-O VG8 PCGS. Variety 2.** Double eagle coinage began in 1850, utilizing the New Orleans and Philadelphia Mints. The O-mint issue is by far the scarcer coin today. This unusually low-grade example will appeal to a range of collectors. Wear is even, and the surfaces are smooth. Medium wheat-gold color appears over each side. NGC ID# 268G, PCGS# 8903

**1850-O Twenty Dollar, XF Details
Debut New Orleans Issue**

- 5999 1850-O — Cleaning — PCGS Genuine. XF Details. Variety 3.** Although authorized for 1849 production, the double eagle was not coined until 1850 due to delays in the execution of dies. This first-year New Orleans coin is well-detailed, but the surfaces are unnaturally bright and smooth from cleaning. Nonetheless, the elusiveness of problem-free coins will give this piece plenty of appeal. NGC ID# 268G, PCGS# 8903

**1851-O Double Eagle, XF45
Pleasing O-Mint Twenty**

- 6000 1851-O XF45 NGC. Variety 1.** One of the few affordable examples of New Orleans twenty dollar type, this Choice XF representative flashes occasional glimpses of mint luster across the natural, brassy-gold surfaces. Numerous small abrasions occupy the fields and devices, but none are noticeably onerous, and the eye appeal is considerable. Only faint wear visits the high points. NGC ID# 268J, PCGS# 8905

**1851-O Twenty, Choice XF
Collectible New Orleans Twenty**

- 6001 1851-O XF45 NGC. Variety 1.** Despite structural concerns within the mint building, the New Orleans Mint contributed significantly to double eagle coinage prior to the opening of the San Francisco branch, striking 315,000 pieces in 1851. This Choice XF representative is ideal for the collector seeking a single piece from this mint. The coin is well-detailed with bright yellow-gold surfaces. Scattered abrasions are not unusual for the grade and issue. NGC ID# 268J, PCGS# 8905

**1851-O Twenty Dollar, AU Details
Popular Southern Gold Issue**

- 6002 1851-O — Improperly Cleaned — NGC Details. AU. Variety 1.** A straw-gold example with subdued and evenly microgranular fields. Luster emerges from design elements. There are no mentionable abrasions, but minor laminations are noted on obverse star 8, on the field near obverse star 1, and on the base of the eagle's right (facing) wing. New Orleans double eagles are scarce and in demand from Southern gold specialists. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, AU55
Rich Color, Appealing Surfaces

- 6003 1851-O AU55 NGC. Variety 1.** The 1851-O is the most plentiful New Orleans double eagle, ideal for collectors seeking an affordable type coin from this mint. This Choice AU coin is boldly struck with deep tangerine-gold color. The interior regions of the peripheral legends harbor glimpses of prooflike mirroring. The surfaces are smooth and appealing. Finer examples are elusive and may prove to be out of reach for many collectors. NGC ID# 268J, PCGS# 8905

1852 Twenty Dollar, AU53
Early Type One Example

- 6004 1852 AU53 PCGS.** Tinges of luster remain in the fields on each side despite light friction and scattered surface chatter overall. The strike is bold, and the surfaces show pleasing straw-gold patina. The 1852 double eagle had a more than 2 million-coin mintage and remains popular as a Gold Rush-era type coin. NGC ID# 268K, PCGS# 8906

1852 Twenty Dollar, AU55
Lustrous and Appealing

- 6005 1852 AU55 PCGS.** This Gold Rush-era Philadelphia double eagle is popular among type collectors. The present Choice AU coin displays original green-gold surfaces with remnants of luster in the fields. Light, scattered abrasions accompany the grade, none of which are particularly bothersome. Eye appeal is excellent. NGC ID# 268K, PCGS# 8906

1852/1852 Double Eagle, AU55
Cherry-pickers' RPD FS-301

- 6006 1852/1852 FS-301 AU55 NGC.** Here is a Choice AU example of one of the most dramatic doubled dates of the 1850s, with the tops of the entire four-digit date logotype visible north of the primary digits. The initial impression of the date runs slightly uphill, gaining prominence with each digit until widest at the 2. Although the 1852 double eagles are readily available in About Uncirculated grades, the overdate is not, and it is highly sought by specialists. This sharp, straw-gold example shows only light marks with glimpses of orange and rose that glow from the frosted surfaces. NGC ID# 268K, PCGS# 145729 Base PCGS# 8906

1852-O Twenty Dollar, XF45
Pleasing Detail and Color

- 6007 1852-O XF45 NGC. Variety 1.** One of the few New Orleans double eagle issues that is usually available, the 1852-O had a fairly substantial mintage of 190,000 pieces. This Choice XF representative has pleasing detail and smooth straw-gold surfaces. Faint chatter on Liberty's cheek is not particularly bothersome. Double eagle coinage in New Orleans would decline the following year and nearly disappear after the opening of the San Francisco Mint in 1854. NGC ID# 268L, PCGS# 8907

- 6008 1853 VF35 PCGS.** Smooth surfaces and rich honey-gold color characterize this Choice VF 1853 double eagle. With a mintage of more than 1.2 million pieces, this Gold Rush-period Philadelphia issue is available for type purposes. This piece has a few minor marks on Liberty's neck. NGC ID# 268M, PCGS# 8908

**1853/2' Double Eagle, AU50
Partially Lustrous Fields**

- 6009** 1853/2' FS-301 AU50 PCGS. Traditionally considered an overdate, though modern research expresses skepticism about the nature of the feature hidden within the 3. The *Cherrypickers' Guide* nonetheless records this variety, and collectors show no reservations about acquiring examples. Yellow-gold surfaces remain remarkably bright on this AU coin, and while light abrasions and a few digs affect each side, the overall eye appeal is solid.
Ex: *Summer FUN Signature* (Heritage, 7/2010), lot 4823. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

**1853-O Twenty Dollar, XF45 Details
Lower Mintage New Orleans Issue**

- 6010** 1853-O — Cleaned — ANACS. XF45 Details. Variety 1. Luster fills the legends and plumage of this moderately circulated lemon-gold example. Both sides are hairlined, but the sole noticeable mark is a thin line near the profile. Any New Orleans double eagle is desirable, since a majority of the 13 issues from that facility are very rare, while the remaining dates are scarce to rare. The '53-O has less than one-fourth the mintage of the 1851-O. NGC ID# 268N, PCGS# 8910

**1854 Small Date Twenty, AU58
Repunched Date**

- 6011** 1854 Small Date AU58 NGC. Breen-7167, Repunched Date. The 1 is repunched north, the 5 and 4 are repunched south. The Small Date 1854 double eagle is the more often seen of the two varieties, although Uncirculated examples are nonetheless scarce and often come heavily abraded. This near-Mint coin displays naturally colored green-gold surfaces with light abrasions and bold design elements. Hints of luster remain in the fields. NGC lists 33 Mint State coins finer (3/16). NGC ID# 268R, PCGS# 8911

- 6012** 1854-S — Scratched, Cleaned — ANACS. AU50 Details. Thin scratches on the field near the profile confirm the ANACS designation. Minimally glossy from a minor cleaning. An apricot-gold twenty from the first year of West Coast coinage. Among San Francisco issues, the 1854-S has the third-lowest production, trailing only the 1861-S Paquet Reverse and the 1866-S No Motto. NGC ID# 268U, PCGS# 8913

**1854-S Twenty Dollar, Unc Details
Sharp and Unabraded**

- 6013** 1854-S — Saltwater Damage — PCGS Genuine. Unc Details. This sharp, unworn 1854-S double eagle originated in a shipwreck discovery, exhibiting etched surfaces due to prolonged exposure to seawater, which had an erosive effect on the copper in the coin's alloy. Nonetheless, both sides display a pleasant glow and are free of bothersome abrasions. The 1854-S double eagle is scarce in Mint State, making this budget-friendly example somewhat appealing. NGC ID# 268U, PCGS# 8913

- 6014** 1855-S XF45 NGC. Medium S. A butter-gold example with a few specks of russet patina near the left-side obverse stars. The reverse rim has minor bumps at 2 and 7 o'clock. This appears to be from the same die pair as Variety 14D, among the marriages recovered from the S.S. *Central America*, although the pedigree of the present coin is unknown. NGC ID# 268X, PCGS# 8916

**1855-S Double Eagle, AU55
Early San Francisco Issue**

- 6015** 1855-S AU55 PCGS. The 1855-S is much more plentiful overall than the previous double eagle from this mint, although Uncirculated coins are similarly scarce. This Choice AU collector coin displays remnants of luster in the fields amid wheat-gold patina that shows a few minor abrasions. The strike is sharp, and high-point wear is trivial. NGC ID# 268X, PCGS# 8916

1856 Double Eagle, AU53
Some Luster Remains

6016 1856 AU53 NGC. A surprisingly elusive Philadelphia issue, the 1856 is scarce in AU grades and rare in Mint State. This piece displays partially lustrous fields and lightly abraded, yellow-gold surfaces. The design elements are well-defined, and eye appeal is pleasing for the grade. Infrequently seen finer. NGC ID# 268Y, PCGS# 8917

6017 1856-S XF45 NGC. Variety 17J. A nicely defined straw-gold representative. Marks are relatively few for the Choice XF level. The present die marriage was among those recovered from the S.S. *Central America* shipwreck, designated "Split Serif" due to Mint reworking of the left serif of the U in UNITED. But we do not know if this coin emerged from that famous shipwreck. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, AU53
Popular Type One Issue

6018 1856-S AU53 PCGS. The 1856-S was one of the chief beneficiaries of the S.S. *Central America* treasure recovery, making the issue forever famous and sought-after. More than 1,000 pieces were salvaged from the wreck. This AU coin is not pedigreed to the ship's cargo, although it may have originated from that source. Hints of luster remain in the fields amid rich orange-gold patina. The strike is bold. Light chatter over each side is consistent with the grade. NGC ID# 2692, PCGS# 8919

6019 1856-S AU53 NGC. Variety 17C. Full Serif, Bold S. Many pieces were recovered from the various shipwreck salvages. This lightly abraded, briefly circulated example shows some shallow lines in the obverse fields, but bright and still-lustrous sun-gold surfaces enhance the eye appeal. Light wear does not diminish the Mint-fresh look. NGC ID# 2692, PCGS# 8919

1856-S Twenty Dollar, AU58

6020 1856-S AU58 PCGS. Variety 17C. Although the pedigree of the present Type One twenty is unknown to us, the die variety matches 17C, among those recovered from the S.S. *Central America* shipwreck. The sun-gold surfaces display substantial luster despite slight wear on the wingtips and shoulder curl. Unimportant abrasions are distributed. NGC ID# 2692, PCGS# 8919

1857 Twenty Dollar, Sharp AU58
Scarce in Higher Grades

6021 1857 AU58 PCGS. The 1857 double eagle is occasionally seen in AU grades, but the scarcity of Mint State pieces heightens demand for AU58 coins, such as the present example. This representative shows a bold strike and lustrous fields with original olive-gold patina. A trio of linear scratches in the left obverse field are among the scattered abrasions that accompany the grade. NGC ID# 2693, PCGS# 8920

6022 1857-S AU53 NGC. Variety 20C. Medium S mintmark. The top left serif of U in UNITED is repaired and narrow. The most famous shipwreck discovery coin, formerly rare but now common, thanks to the thousands of pieces recovered from the S.S. *Central America*. This yellow-gold example is lightly abraded with luster remaining at the margins. NGC ID# 2696, PCGS# 8922

1857-S Liberty Twenty, AU58
Outstanding Type One Representative

6023 1857-S AU58 PCGS. Like most Type One Liberty double eagles, the 1857-S was once very rare in high grade. Fortunately, the recovery of the treasure from the S.S. *Central America* yielded a large number of attractive specimens, making the 1857-S a favorite choice of type collectors. This lightly worn and lightly abraded near-Mint example offers pleasing orange-gold surfaces that retain much original mint luster. NGC ID# 2696, PCGS# 8922

1857-S Liberty Double Eagle, MS64
Ex: S.S. Central America

- 6024 1857-S MS64 PCGS. CAC. Variety 20C. Ex: S.S. Central America. SSCA 1873. The Narrow Serif variety, with characteristic die lines at Liberty's neck. This attractive Choice example exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster and terrific visual appeal. Population: 75 in 64 (4 in 64+), 55 finer (3/16). NGC ID# 2696, PCGS# 8922

1858 Liberty Twenty, XF45
Attractive Type One Representative

- 6025 1858 XF45 PCGS. From a mintage of 211,714 pieces, the 1858 Liberty double eagle is seldom encountered in high grade, despite the recovery of a few nice specimens from the S.S. Republic. This lightly worn and lightly abraded Choice XF example offers surprisingly lustrous orange-gold surfaces with a few hints of rose. NGC ID# 2697, PCGS# 8923
- 6026 1858 AU50 NGC. A better date among the Type One Liberty Head double eagles, the 1858 seldom exceeds the About Uncirculated level of preservation. This bright, yellow-gold example retains considerable mint luster on both sides, with numerous light abrasions that define the AU50 grade. A bit of high-point wear on Liberty's curls suggests brief circulation, although the accompanying motifs remain sharp. NGC ID# 2697, PCGS# 8923
- 6027 1858-S AU53 NGC. Unlike the San Francisco issue of the previous year, which was abundant among the coins recovered from the S.S. Central America, the 1858-S double eagle is a rarity in Mint State. This more collectible AU coin displays a bold strike with little wear. Moderate luster remains in the fields, and a few trivial marks on Liberty's cheek and above the date are the only mentionable abrasions. NGC ID# 2699, PCGS# 8925

1858-S Double Eagle, MS60
Scarce in Mint State

- 6028 1858-S MS60 NGC. The S.S. Republic yielded a few seawater salvage coins, but none were recovered from the S.S. Central America, and this San Francisco issue remains a Mint State rarity. The present coin shows strong mint luster and a relatively sharp strike, with numerous small abrasions across the frosty surfaces. Attractive, rich-gold color enhances the appeal. Census: 2 in 60, 17 finer (3/16). NGC ID# 2699, PCGS# 8925

- 6029 1859-S VF30 PCGS. Among San Francisco issues of this period, the 1859-S is a slightly less often seen date. This is a midgrade circulated piece that would be ideal for the budget-conscious collector. The surfaces are lightly abraded but show excellent detail for the VF level. Hints of yellow-gold luster remain in the fields. NGC ID# 269C, PCGS# 8928

- 6030 1859-S XF45 NGC. A surprisingly lustrous example for the grade. The straw-gold surfaces display well-defined motifs and moderate abrasions. The 1859-S is a less often seen issue from this period, elusive in AU and Mint State. NGC ID# 269C, PCGS# 8928

1859-S Double Eagle, Appealing AU50

- 6031 1859-S AU50 NGC. Medium S. The last S-mint double eagle issue of the 1850s consisted of a moderate mintage exceeding 630,000 coins, but as usual most survivors are well-circulated. This is an appealing example with gold and orange hues predominating against some likely copper-alloy spots. The light abrasions and expected circulation wear are unremarkable. NGC ID# 269C, PCGS# 8928

1859-S Double Eagle, AU53
Soft, Lustrous Surfaces

6032 1859-S AU53 NGC. The rarity of this pre-Civil War San Francisco issue in Mint State encourages demand for attractive AU coins. This piece has lovely surfaces with original orange-gold color and hints of luster in the fields. There are no severe abrasions, and the design elements are well-defined. NGC ID# 269C, PCGS# 8928

6033 1860 AU53 NGC. Slightly less available than the high-mintage 1861 issue, the 1860 Philadelphia production of 577,670 pieces still yields an adequate supply of circulated survivors. Mint luster remains at the obverse margins of this yellow-gold example, and to an even greater extent on the reverse. Minor loss of definition from wear and a scattering of small marks account for the AU53 grade. NGC ID# 269D, PCGS# 8929

1860 Twenty Dollar, AU55
Lustrous Fields

6034 1860 AU55 NGC. Although less often seen than the 1861, the 1860 Liberty double eagle is nonetheless available enough to be considered for type purposes. This Choice AU coin displays natural green-gold patina with remnants of luster in the protected regions of the fields. Light chatter over each side is consistent with the grade and issue. NGC ID# 269D, PCGS# 8929

1860 Double Eagle, Appealing MS61
Relatively Unabraded

6035 1860 MS61 PCGS. The antique-gold surfaces of this early P-mint double eagle show a few scattered marks and ticks, but we have seen MS62 examples of this type that were far more abraded. A great deal of essential appeal — eye and collector — remains on this coin. Population: 32 in 61, 22 finer (3/16). NGC ID# 269D, PCGS# 8929

1860-S Double Eagle, AU53
Elusive in High Grade

6036 1860-S AU53 PCGS. Although forever in the shadow of the 1860-O, the 1860-S is a slightly better Type One issue in high grade, being noticeably scarcer than its Philadelphia counterpart. This AU representative is boldly detailed with moderate straw-gold luster remaining in the protected areas of the fields. Lightly abraded surfaces are as expected for the issue and grade. A long planchet lamination extends from the center of shield on the reverse to the rim at 4 o'clock. NGC ID# 269F, PCGS# 8931

1860-S Liberty Twenty, AU58
Pleasing Type One Double Eagle

6037 1860-S AU58 NGC. CAC. Like most Type One Liberty double eagles, the 1860-S is seldom encountered in Mint State condition, unless it was recovered from a recent shipwreck find. This pleasing near-Mint example displays well-detailed design elements and lightly abraded orange-gold surfaces with traces of original mint luster. NGC has graded 22 numerically finer examples (3/16). NGC ID# 269F, PCGS# 8931

1860-S Liberty Twenty, AU58
Elusive Issue in Higher Grades

6038 1860-S AU58 PCGS. CAC. From a mintage of 544,950 pieces, this lustrous near-Mint specimen will be a welcome addition to a fine collection of Liberty double eagles. Only the slightest trace of wear shows on the high points of the design elements and the vivid orange-gold surfaces are lightly abraded, with a few hints of green patina. Population: 45 in 58, 39 finer (3/16). NGC ID# 269F, PCGS# 8931

6039 1861 VF35 PCGS. Pleasing orange accents gather around the stars and within the raised devices of this smoothly worn, apricot-gold twenty. Perfect for midgrade type, the Choice VF surfaces show only tiny imperfections since most marks have long since been subdued by wear. NGC ID# 269G, PCGS# 8932

- 6040 1861 XF40 PCGS.** This is a deeply patinated olive-gold Type One double eagle with rich coppery-orange overtones in the protected regions of the fields. Light wear defines the grade, but the surfaces of this XF 1861 Liberty Head type coin are unusually smooth. Only a few trivial abrasions are noticed with a loupe. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, AU55
Attractive Type One Representative

- 6041 1861 AU55 NGC.** The 1861 double eagle has the highest mintage of any 19th century issue of that denomination, and type collectors often choose it for that reason. This still-lustrous yellow-orange representative is well struck and has only minor wear across the high points. Minimally marked and appealing.

Ex: ANA Signature (Heritage, 8/2007), lot 3297. NGC ID# 269G, PCGS# 8932

- 6042 1861 AU55 ANACS.** Nearly 3 million pieces were struck of the 1861 twenty, an important issue with the Civil War looming and hard money in demand. This About Uncirculated piece saw minimal circulation before being put aside. Mint luster remains across the attractive, lightly abraded surfaces, which retain sharp definition and Choice appeal throughout. NGC ID# 269G, PCGS# 8932

- 6043 1861 AU55 NGC.** Unknown to many collectors, nearly 500 examples of the 1861 double eagle were discovered on the S.S. Republic shipwreck, stapling its status as one of the most ideal type-coin issues of the period. This is a Choice AU example with yellow-gold luster in the protected portions of the fields. Light chatter accompanies minor friction on Liberty's cheek and in the adjacent field. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, Well-Struck MS62
Great Eye Appeal

- 6044 1861 MS62 PCGS.** The golden-orange surfaces of this 1861 double eagle are surprisingly well-preserved for the grade, showing no marks of any consequence on the obverse and great luster throughout. Some small abrasions appear on the reverse both above the eagle in the halo of stars and below the shield, but this is a well-struck coin with a great deal of eye appeal. The 1861 double eagles, struck to the extent of nearly 3 million coins, would hold the high mintage record for Liberty twenties for many years, until the 1904 and 1904-S issue shattered the mark. Population: 83 in 62 (3 in 62+), 50 finer (3/16).

Ex: Internet Auction #802 (David Lawrence Rare Coins, 5/2014). NGC ID# 269G, PCGS# 8932

- 6045 1861-S XF45 NGC.** Uncirculated survivors of the 1861-S are rare, and comparatively few shipwreck coins were recovered, making circulated examples the staple of double eagle date-and-mint collectors. This Choice XF coin offers traces of mint luster and pleasing orange accents at the borders surrounding lightly abraded, yellow-gold surfaces. Numerous small bagmarks and abrasions dot the surfaces on both sides, but no deep or objectionable marks exist. NGC ID# 269K, PCGS# 8935

1862-S Twenty Dollar, AU53
Partially Lustrous Fields

- 6046 1862-S AU53 NGC.** During the Civil War, the San Francisco Mint issued the bulk of the double eagles struck. The 1862-S had a mintage of more than 850,000 pieces and is collectible in AU grades. This coin displays yellow-gold surfaces with luster in the fields. Light, scattered abrasions are consistent with the grade. The design elements are well-detailed. NGC ID# 269N, PCGS# 8938

- 6047 1863-S XF45 ANACS. Breen-7217.** Small S. A caramel-gold Civil War twenty with plentiful pockets of bright luster, particularly on the reverse. Marks on the face and shield merit passing mention. Most survivors are in XF to AU grades, although several dozen have been certified as Mint State. NGC ID# 269R, PCGS# 8940

1864-S Double Eagle, AU53
Luminous Surfaces

- 6048 1864-S AU53 NGC.** Although the 1864-S twenty had a mintage of nearly 800,000 pieces, AU and Mint State coins are elusive. This piece displays olive-gold surfaces with light abrasions as is typical of the grade. Luster remains in the protected regions of the fields. The design elements show light wear. NGC ID# 269T, PCGS# 8942

- 6049 1865-S AU50 NGC.** Small S, like most (but not all) 1865-S double eagles. A caramel-gold representative that displays the expected number of minor to moderate field abrasions. A mint-made strike-through (as issued) affects obverse star 10. NGC ID# 269V, PCGS# 8944

- 6050 1866-S Motto XF40 NGC.** Tall S. The portrait and eagle exhibit wear commensurate with the XF level, but the reverse legends show luster, and there are no distracting abrasions. The strike is good save for blending near the upper right shield corner. NGC ID# 26B2, PCGS# 8950

**1866-S Twenty Dollar, XF45
With Motto**

- 6051 1866-S Motto XF45 NGC.** Although it appeared on the two cent piece in 1864, the motto IN GOD WE TRUST was officially placed on all large-size denominations in 1866. The San Francisco Mint struck double eagles in 1866 of both varieties, although the later With Motto variant is the more plentiful for date representation. This Choice XF coin displays yellow-gold surfaces with light chatter. The design elements are well-detailed. NGC ID# 26B2, PCGS# 8950

**1868 Double Eagle, Unc Details
Rare in High Grade**

- 6052 1868 — Cleaning — PCGS Genuine. Unc Details.** Boasting a small mintage of 98,575 pieces, the 1868 Liberty double eagle is rare in Mint State. Most Uncirculated coins are bagmarked and less than attractive. This piece has scattered hairlines that preclude a numeric grade but is otherwise fairly pleasing. The yellow-gold surfaces display a bold strike, and there are no singularly obvious abrasions. Much luster remains in the fields. NGC ID# 26A3, PCGS# 8953

**1868-S Type Two Twenty, AU58
Seldom Seen in Finer Grades**

- 6053 1868-S AU58 PCGS.** The 1868-S Liberty double eagle claims a substantial mintage of 837,500 pieces, making the issue reasonably available in mid-circulated grades, but few examples were saved for numismatic purposes and high-grade specimens are elusive. This pleasing near-Mint piece shows just a trace of high-point wear and the lustrous orange-gold surfaces show a scattering of minor abrasions on both sides. Population: 83 in 58 (1 in 58+), 30 finer (2/16). NGC ID# 26A4, PCGS# 8954

- 6054 1869-S AU53 PCGS.** This About Uncirculated 1869-S double eagle displays unusually smooth surfaces with partially lustrous honey-gold patina. Eye appeal is pleasing for the grade. Mint State coins are seldom seen and typically come with heavy abrasions. NGC ID# 26A6, PCGS# 8956

**1869-S Double Eagle, AU58
Elusive Type Two Issue**

- 6055 1869-S AU58 NGC.** Double eagles struck at the California facility in 1869 typically exhibit strike softness over the highest points of the obverse. On this piece, the stars lack radial lines, but the hair curls are relatively well-detailed with slight friction. This near-Mint survivor has abundant remaining luster over light rose and green-gold surfaces that show an unsurprising number of abrasions. All higher-graded coins are rare, despite a mintage of 686,740 pieces. NGC ID# 26A6, PCGS# 8956

**1869-S Double Eagle, MS61
Very Scarce Any Finer**

- 6056 1869-S MS61 NGC.** Despite an adequate mintage of 686,750 pieces, the 1869-S Liberty double eagle is seldom encountered in Mint State grades today. This attractive MS61 example exhibits well-detailed design elements and lustrous orange-gold surfaces that show a moderate number of minor contact marks for the grade. Census: 38 in 61, 52 finer (3/16). NGC ID# 26A6, PCGS# 8956

- 6057 1870-S AU55 NGC.** This Choice AU Type Two S-mint double eagle features the Small Squat S mintmark usually seen on this type. The surfaces retain most of their original mint luster and show only occasional light marks, with the sole exception of a heavy rim nick at 9 o'clock on the obverse. This issue is seldom seen in Mint State. NGC ID# 26A9, PCGS# 8959

- 6058 1872-S AU53 NGC.** Much original luster remains in the fields of this AU 1872-S double eagle, lying beneath rich orange-gold and honey patina. The coin is well struck and has little true wear. But scattered abrasions affect the visual appeal. NGC ID# 26AF, PCGS# 8965

- 6059 1873 Open 3 MS62 NGC.** Frosty wheat-gold luster glows with sharp design elements on this Mint State Open 3 twenty. Light surface chatter limits the grade, but no singular abrasions are observed. Finer examples are infrequently available. NGC ID# 26AL, PCGS# 8967

**1873 Open 3 Twenty Dollar, MS62
FS-101 Doubled Die Obverse Variety**

- 6060 1873 Open 3, Doubled Die Obverse, FS-101, MS62 PCGS.** The die doubling on the obverse is most perceptible as a “notched” effect on the letters of LIBERTY in the coronet and a slight shift on the beads above. Ample luster proceeds from both sides of this golden-orange coin, which shows a handful of thin scrapes consistent with the grade, but overall decent preservation and good eye appeal. Population: 8 in 62, 4 finer (2/16). PCGS# 148749 Base PCGS# 8967

**1873-CC Double Eagle, XF45
Original Surfaces, Low Mintage**

- 6061 1873-CC XF45 PCGS. CAC. Variety 2-A.** A misplaced date digit appears in the dentils below 73. The Carson City Mint opened in 1870 and struck small quantities of double eagles until 1874, when production expanded. In 1873, the Nevada facility minted 22,410 Type Two twenty dollar gold coins. All examples from that year have a Closed 3 in the date. Original yellow-gold coloration and partial luster define this Choice XF survivor. The stars display full radials. Myriad abrasions are expected. A great example of this sought-after CC issue. NGC ID# 26AJ, PCGS# 8968
- 6062 1873-S Closed 3 AU58 NGC. CAC. Small S.** A radiant apricot-gold example that shows nearly unbroken cartwheel luster. The obverse is bagmarked but the reverse displays comparatively few marks. The Closed 3 1873-S is more available than its Open 3 predecessor, due to the geographical distance between San Francisco and Philadelphia, where the dies were made. Scarce with a CAC seal. NGC ID# 26AL, PCGS# 8969
- 6063 1873-S Open 3 AU55 PCGS.** Pleasing rich-gold color with apricot-gold accents glow with remnant mint luster despite a brief time in circulation. The Open 3 variety makes up part of the 1,040,600-piece mintage for 1873, which includes both Open and Closed 3 varieties. The Open 3 is scarcer based on grading service populations. This example is lightly abraded but vibrant coloration earns the Choice AU designation. NGC ID# 26AM, PCGS# 8979

**1873-S Open 3 Twenty, AU58
Lustrous and Appealing**

- 6064 1873-S Open 3 AU58 NGC.** The slightest brush of friction accompanies light chatter on this near-Mint 1873-S Open 3 double eagle, denying an Uncirculated designation. Significant frosty luster glows in the fields, and the orange-gold surfaces exhibit original coloration. This issue is occasionally seen in AU grades but seldom in Mint State. NGC ID# 26AM, PCGS# 8979

**1873-S Liberty Double Eagle, AU58
Scarcer Open 3 Variety**

- 6065 1873-S Open 3 AU58 PCGS. CAC. Small Squat S.** The 1873-S Liberty double eagle with the Open 3 in the date is more difficult to locate than its Closed 3 counterpart. This attractive near-Mint example offers vivid, lightly abraded orange-gold surfaces that retain much of their original mint luster. Population: 80 in 58, 80 finer (3/16). NGC ID# 26AM, PCGS# 8979
- 6066 1874 AU58 PCGS. CAC.** Blatantly original tangerine and rose-gold luster adorns the luminous surfaces of this near-Mint 1874 double eagle. The strike is bold, and high-point friction is trivial. CAC-approved in a green label holder. NGC ID# 26AN, PCGS# 8970
- 6067 1874 — Improperly Cleaned — NGC Details. Unc.** NGC notes light cleaning, although a loupe reveals only a few stray hairlines on the obverse that suggest such. Ample, frosty luster glows in the fields on each side, and the design elements are bold. Chatter in the fields and on Liberty’s cheek is not overly bothersome. A pleasing, unworn Type Two double eagle. NGC ID# 26AN, PCGS# 8970
- 6068 1874 MS60 NGC.** A smattering of abrasions on the obverse of this 1874 Liberty double eagle defines the grade, although there is no evidence of wear. Vibrant yellow-gold luster illuminates the fields and delivers a pleasing cartwheel effect. NGC ID# 26AN, PCGS# 8970

**1874-CC Twenty Dollar, XF45
Choice Carson City Type**

6069 1874-CC XF45 NGC. Variety 4-A. Moderately available for a Carson City twenty, the 1874-CC had a substantial mintage of 115,085 pieces, but the coins were roughly handled and prone to bagmarks. This Choice XF example survived with only minor abrasions and a relatively smooth cheek on Liberty. A bit softly struck on Liberty's curls, yet generous mint luster remains for the grade and the pleasing yellow-gold surfaces show olive-gold overtones. NGC ID# 26AP, PCGS# 8971

6070 1874-S MS60 NGC. The wheat-gold surfaces of this Mint State double eagle show scattered small contact marks and luster grazes, but the strike is nicely delivered. An indented planchet flaw appears on the obverse above Liberty's head, likely precluding a finer grade. The reverse is lustrous but shows some larger abrasions. Still, this Type Two piece offers considerable eye appeal for the grade. NGC ID# 26AR, PCGS# 8972

**1874-S Twenty, Lustrous MS61
Popular Type Two Issue**

6071 1874-S MS61 PCGS. Scattered marks and grazes on both sides of this Mint State 1874-S twenty determine the grade but do not defeat the eye appeal occasioned by great luster and no trace of high-point wear. These Type Two twenties, particularly from the Carson City and San Francisco branch mints, are extremely popular among collectors. NGC ID# 26AR, PCGS# 8972

**1875 Double Eagle, MS62
Surprisingly Smooth Surfaces**

6072 1875 MS62 PCGS. Most Uncirculated 1875 double eagles grade MS62 or lower, and finer pieces are scarce. This MS62 coin is unusually attractive for the grade. There are no singular abrasions, only some faint slide marks that dull the luster on the high points of the devices. A few trivial grazes appear in the fields. This frosty, yellow-gold coin will appeal to a range of collectors. NGC ID# 2547, PCGS# 8973

6073 1875-CC — Improperly Cleaned — NGC Details. AU. Variety 4-A. This Type Two Carson City double eagle shows obvious cleaning, although some luster remains in the protected regions of the fields. Much of each side is bright yellow-gold. Moderate detail remains on the devices. NGC ID# 26AT, PCGS# 8974

**Lustrous 1875-CC Twenty Dollar
Uncirculated Details**

6074 1875-CC — Cleaned — ANACS. MS60 Details. Variety 1-B. Rotation beneath a light reveals hairlines, but this lustrous sun-gold Carson City type coin is well struck and relatively free from bagmarks. Both sides display interesting clash marks. 13 different die marriages are known for the '75-CC despite a mintage of only 111,151 pieces. NGC ID# 26AT, PCGS# 8974

6075 1875-S MS61 PCGS. The 1875-S double eagle is usually available overall, but the population declines significantly in grades above MS61. This collectible example displays softly frosted yellow-gold luster and bold design elements. Light grazes on the obverse limit the grade, but there are no singular abrasions. NGC ID# 26AU, PCGS# 8975

6076 1876-CC — Obverse Scratched, Cleaned — NGC Details. AU. Variety 5-B. Bold detail and semiprooflike fields are the hallmarks of this Carson City double eagle, and the surfaces display pleasing yellow-gold color. A light cleaning and several pinscratches on Liberty's portrait prevent a numeric grade. NGC ID# 26AW, PCGS# 8977

**1876-CC Liberty Twenty, AU50
Popular Carson City Type Coin**

6077 1876-CC AU50 NGC. Variety 4-A. Smooth wear coupled with mint luster around the stars and legends give this About Uncirculated Carson City twenty nice appeal for the grade. Light, greenish-gold patina covers both sides and crisp definition on the devices suggests the coin saw only brief circulation. Struck from a die pair that shows a possible misplaced 8 in the dentils beneath the primary 8. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, Lustrous AU53

- 6078 1876-CC AU53 ANACS. Variety 2-C.** An available Carson City double eagle, ideal for the collector seeking a single representative from this mint. The present AU coin displays bright yellow-gold surfaces with significant luster remaining in the fields. The devices are bold, and there are no bothersome abrasions. Housed in an old, small size white ANACS holder. NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, AU53
Partially Reflective Fields**

- 6079 1876-CC AU53 ANACS. Variety 1-A.** This bright, partially lustrous Carson City type coin displays unusually smooth surfaces for the grade and issue, with well-defined motifs and pleasing eye appeal. Areas of semiprooflike mirroring are seen in the protected regions of the fields on each side. Housed in an old, small size white ANACS holder. NGC ID# 26AW, PCGS# 8977

**1876-S Double Eagle, MS62+
Attractive Type Two S-Mint Twenty**

- 6080 1876-S MS62+ PCGS. CAC.** The 1876-S double eagle production of nearly 1.6 million coins was the Centennial issue from the historic San Francisco Mint, and its status as one of the desired (and short-lived) Type two series, it is treble popular among collectors. This piece displays scattered ticks and grazes on well-struck surfaces that are highly lustrous. Attractive blond-gold color is a plus. CAC: 52 in 62, 21 finer (3/16). NGC ID# 26AX, PCGS# 8978

**1876-S Double Eagle, MS63
Eye-Catching Luster**

- 6081 1876-S MS63 PCGS.** A few Saddle Ridge Hoard coins coming on the mark over the past couple of years barely affected the high-grade availability of the 1876-S double eagle. This Select Mint State example is conditionally scarce, and finer pieces are rarely seen. The strike is boldly rendered, and the frosty orange-gold surfaces display vibrant luster. Only a few minor slide marks on the obverse limit the grade. PCGS lists 18 finer representatives (3/16). NGC ID# 26AX, PCGS# 8978

- 6082 1877-CC — Polished — PCGS Genuine. XF Details. Variety 3-A.** Like other Carson City gold issues from 1877, the double eagle had a small mintage — in this case 42,565 pieces. High-grade examples are scarce and are rare in Mint State. This lightly circulated coin displays pleasing detail and bright yellow-gold surfaces. Obvious polishing precludes a numeric designation. NGC ID# 26AZ, PCGS# 8983

- 6083 1878 Doubled Die Obverse, Doubled Die Reverse, Repunched Date, MS61 PCGS.** Two different 1878 doubled die reverse varieties are known. The stronger of the two is Breen-7270, and shows relatively bold doubling on DOLLAR. The present lot is the other 1878 DDR, which shows moderate doubling on STATES OF. Also, the date is repunched, evident within the loop of the second 8, and the obverse is lightly die doubled, apparent on the LI in LIBERTY. An original and lustrous peach-gold example with a good strike and the expected number of obverse marks. NGC ID# 26B3, PCGS# 8985

**1878 Double Eagle, MS62+
Top-Quality for the Grade**

- 6084 1878 MS62+ PCGS. CAC.** This is the most available of the three double eagle issues put out by the Philadelphia, Carson City, and San Francisco mints in 1878. Examples are accessible though MS62 but become rare in higher grades, making this CAC-approved MS62+ twenty dollar gold piece a perfect blend of quality and affordability. Green and rose-gold surfaces are, for the most part, free of deep and detracting abrasions that typically plague the issue. Vibrant mint frost cartwheels over each side. Strongly struck. NGC ID# 26B3, PCGS# 8985

- 6085 1878-CC — Improperly Cleaned — NGC Details. XF. Variety 2-B.** A slightly better-date Type Three Carson City issue, coming from a mintage of just 13,180 pieces. This example is well-detailed and has smooth olive-gold surfaces. Slightly dull in appearance due to an old, light cleaning. NGC ID# 26B4, PCGS# 8986

6086 1880 AU53 PCGS. CAC. At one time the fields on this low-mintage twenty were prooflike or partially so, but field chatter and small abrasions now temper the reflectivity. The original, orange-gold surfaces retain their eye appeal despite numerous small marks. Just 51,456 pieces were struck, with the Smithsonian Institution's collection missing an example of the issue. CAC endorsed for quality. NGC ID# 26BA, PCGS# 8992

6087 1880-S MS60 NGC. An Uncirculated Type Three Liberty double eagle with sharp motifs and semiprooflike fields. Rich yellow-gold color blankets each side. As the grade suggests, scattered abrasions are present. Eye appeal is nonetheless pleasing. NGC ID# 26BB, PCGS# 8993

**1882-S Double Eagle, MS62
Rose-Tinted Luster**

6088 1882-S MS62 PCGS. Frosty original luster yields primarily green-gold hues but is occasionally enlivened by tinges of rose-red in the protected regions. Bold design elements are illuminated by a vibrant cartwheel effect, and grade-limiting abrasions are light and evenly distributed over each side. Finer examples are rarely seen. NGC ID# 26BG, PCGS# 8998

**1882-S Liberty Twenty, MS62+
Seldom Seen Finer**

6089 1882-S MS62+ PCGS. CAC. Small Squat S (Breen-7283). Reddish-gold highlights visit the lustrous, medium-gold surfaces of this conditionally challenged San Francisco twenty. MS62 is the optimum collecting grade, since the issue is very scarce in MS63 and flat-out rare any finer. This Plus-graded example is particularly well-struck with razor-sharp hair definition and fully brought-up stars. Light chatter accounts for the grade, but the eye appeal is exceptional. Population: 8 in 62+, 46 finer (3/16). NGC ID# 26BG, PCGS# 8998

**1883-CC Double Eagle, XF45
Attractive and Lustrous**

6090 1883-CC XF45 PCGS. Variety 2-A, one of two monogamous die pairings for the date (Variety 1-B is rarer), the present one showing a small die chip on star 9 on the obverse and a small die line at the rim above the E in STATES. Nearly 60,000 examples were struck of this Carson City issue, and most certified survivors are Choice XF to Choice AU. This XF45 example shows the expected wear and distributed signs of contact on attractively lustrous orange-gold surfaces. No contact marks are particularly bothersome, despite a couple of larger ticks on Liberty's chin, jaw, and neck. NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, XF45
Attractively Toned**

6091 1883-CC XF45 NGC. Variety 2-A. Two separate die pairs were used for coinage of double eagles in Carson City in 1883, producing 59,962 coins. This variety shows the mintmark positioned slightly right of center between the Y and D in the denomination. The coin is well-detailed and shows original orange-gold color with luminous luster in the fields. There are no detracting abrasions. NGC ID# 26BH, PCGS# 8999

6092 1883-CC — Improperly Cleaned — NGC Details. AU. Variety 2-A. The 1883-CC has a mintage of less than 60,000 pieces, approximately 5% of the production of the 1883-S. This green-gold representative retains substantial luster and is only lightly abraded given its short stint in Old West commerce. Mildly glossy but acceptable to many collectors. NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, Sharp AU58
Vibrant Mint Luster Remains**

- 6093 1883-CC AU58 PCGS. Variety 2-A.** A visually mint-fresh twenty, with nearly full luster over the sun-gold surfaces and some orange-gold accents at the rims and central portrait. Numerous light abrasions dot the frosty surfaces, yet areas of reflectivity exist at the margins. The strike is sharp on both sides, with vibrant eye appeal — far above average for this challenging Carson City double eagle. Just 59,962 pieces were struck. NGC ID# 26BH, PCGS# 8999

- 6094 1884-CC — Edge Repaired — PCGS Genuine. XF Details. Variety 1-A.** Minor repair work is detectable at a few places around the edge, but this hardly affects the eye appeal. Each side of this collectible 1884-CC double eagle displays pleasing detail and green-gold patina. There are a few scattered abrasions, and the glossy overall appearance suggests an old cleaning. NGC ID# 26BK, PCGS# 9001

**1884-S Twenty Dollar, MS63+
Out of Reach in Finer Grades**

- 6095 1884-S MS63+ PCGS. CAC.** Although still available in MS63, the 1884-S double eagle is rarely seen finer. This Plus-graded piece is sharply struck and boasts a seldom seen CAC endorsement. Frosty green-gold luster displays warmer rose-gold hues in the centers, and grade-limiting abrasions are minimal. Despite a mintage nearly 1 million pieces, only two dozen coins are certified finer at PCGS (2/16). NGC ID# 26BL, PCGS# 9002

**1885-CC Double Eagle, XF Details
Low-Mintage Issue of 9,450 Pieces**

- 6096 1885-CC — Reverse Scratched — NGC Details. XF. Variety 1-A.** Only one die pairing was needed for the small mintage of 9,450 double eagles at Carson City in 1885. This piece displays numerous heavy pin scratches, undoubtedly unintentional, thin but long on the reverse. The coin is otherwise unremarkable but attractive for a circulated example, showing some muted luster remaining on orange-gold surfaces that deepen in color at the date and show a decent strike. NGC ID# 26BN, PCGS# 9004

- 6097 1885-S MS63 ★ NGC.** The fields are flashy and approach a Prooflike designation, likely the reason for the Star designation. This lemon-gold Select example has a good strike and displays the expected number of minor marks. NGC ID# 26BP, PCGS# 9005

**1887-S Twenty Dollar, MS62
Semiprooflike Fields, Attractive Color**

- 6098 1887-S MS62 PCGS.** Lovely rose-gold and peach interiors cede to traditionally green-gold peripheries on this Mint State 1887-S double eagle. The strike is sharp, and the fields are semiprooflike. Scattered abrasions define the grade. This San Francisco issue is available in MS62 but scarce any finer. NGC ID# 26BS, PCGS# 9007

**1888-S Twenty Dollar, MS63+
Elusive in Finer Grades**

- 6099 1888-S MS63+ NGC.** Available in MS61 and MS62, the 1888-S double eagle is less often seen in Select Uncirculated, and finer coins are genuinely scarce. This Plus-graded piece balances quality with affordability, and delivers pleasing eye appeal. The strike is sharp, and lustrous green-gold surfaces yield warmer rose hues in the central regions. Light chatter on Liberty's cheek accounts for the grade. NGC has seen 36 finer submissions (3/16). NGC ID# 26BU, PCGS# 9009

6100 1889-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A. Only a sole die pair was employed to strike the 30,945 double eagles at Carson City in 1889. This AU Details example is a typical grade for circulated survivors. The lightly hairlined fields are indicative of cleaning, but the effect is not overly harsh. Despite that and a patch of abrasions on Liberty's cheek, this coin is a historic issue that retains a great deal of eye appeal. NGC ID# 26BV, PCGS# 9011

**1889-S Double Eagle, MS63
Eye-Appealing Original Patina**

6101 1889-S MS63 PCGS. CAC. A number of Uncirculated 1889-S double eagles were recovered from the Saddle Ridge Hoard, although many collectors still prefer the old-time look that many of the Saddle Ridge coins just do not have. Regardless of its place of origin, this CAC-endorsed Select example displays old-time honey and green-gold coloration with frosty luster and sharp motifs. Light chatter on the obverse determines the grade. NGC ID# 26BW, PCGS# 9012

6102 1890-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A, showing the CC mintmark mostly left of the D(OLLAR). This is the usually seen variety. The 1890-CC double eagles were struck in a fairly large quantity for Carson City — 91,209 coins — due to increased gold deposits. Many thousands were certainly melted later, however, and the rest circulated extensively for the most part. Despite the noted caveat, this is a lightly circulated example with much eye appeal. Considerable luster remains, and the strike is adequate. One mentionable scratch runs through the lower reverse. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU58
Reflective Fields**

6103 1890-CC AU58 PCGS. Variety 1-A. This popular CC-mint issue features partially prooflike fields over golden-yellow surfaces, with little contact and light wear for the grade. The strike is well-executed but the dies are late-state, with a die crack connecting the upper ends of UNITED STATES OF AMERICA and noticeable lapping in the rays and the eagle's right tail feathers. An excellent type coin candidate.

Ex: Baltimore Collection, Dallas Signature (Heritage, 10/2008), lot 3111, which realized \$2,990. NGC ID# 26BY, PCGS# 9014

6104 1891-S MS63 PCGS. The 1891-S double eagle poses a challenge in grades above MS63, making this Select example appealing among budget-conscious collectors. The strike is sharp, and the frosty surfaces display original yellow-gold luster. A few minor marks on the cheek limit the grade. NGC ID# 26C4, PCGS# 9018

6105 1891-S MS63+ PCGS. CAC. The orange-gold surfaces host copious luster and display an adequate strike, but the grade is held back by a few grazes both in the fields and on Liberty's profile, as well as a pair of parallel scrapes below star 8. The reverse shows similar traits. NGC ID# 26C4, PCGS# 9018

1892-CC Double Eagle, XF45

6106 1892-CC XF45 NGC. Variety 1-A. Light wear shows on the well-detailed design elements of this pleasing Choice XF specimen, with pleasing orange-gold surfaces that show a moderate number of minor abrasions on both sides. Traces of original mint luster cling to sheltered areas. The 1892-CC Liberty double eagle claims a smallish mintage of 27,265 pieces. NGC ID# 26C6, PCGS# 9020

6107 1894-S MS63 NGC. The pleasing original orange-gold surfaces of this impressive Select example are lightly marked and display ample mint luster on both sides. The design elements are well-detailed and overall visual appeal is quite strong. NGC ID# 26CC, PCGS# 9026

**1895-S Double Eagle, MS63
Extremely Rare Prooflike Example**

6108 1895-S MS63 Prooflike NGC. Liberty double eagles with prooflike surfaces are quite attractive and popular with collectors. They are also quite rare compared to non-prooflike pieces. NGC has certified 7,200 examples of the 1895-S, but only 44 Prooflike pieces. This example has rich yellow-gold surfaces and dark patina on the devices, attesting to its originality. Both sides have grade-consistent marks. A highly appealing Liberty twenty. Census: 2 in 63 Prooflike, 0 finer (3/16). NGC ID# 26CE, PCGS# 79028

**1896 Twenty Dollar, MS64
Luminous and Attractive**

6109 1896 MS64 PCGS. This popular 19th century type-coin issue becomes marginally scarce in MS64 and is genuinely rare any finer. The present piece is especially attractive for the grade. Razor-sharp detail characterizes the devices, and frosty, vibrant luster glows in the fields, transitioning from yellow-gold to honey to mint-green as it rolls over unabraded surfaces. Only a few faint grazes on Liberty's cheek preclude Gem classification. PCGS reports six finer examples (2/16). NGC ID# 26CF, PCGS# 9029

6110 1896 Repunched Date, FS-301, MS63 PCGS. The initial date digits appear north, resulting in one of the most dramatic repunched date varieties in the series. Booming luster combines with rose and orange-gold color throughout this sharply struck Select double eagle. A thin pinscratch occurs in the field above 18. Population: 20 in 63, 4 finer (2/16). NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

**1896 Twenty Dollar, MS64
Repunched Date**

6111 1896 Repunched Date, FS-301, MS64 PCGS. The date is boldly repunched on this interesting *Cherrypickers'* variety, showing the secondary numerals shifted upward from the primary. This Choice example is tied with three others as the finest FS-301 attributions at PCGS (3/16). The strike is sharp, and the frosty yellow-gold surfaces exhibit only a few trivial grazes on the obverse that define the grade. NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

**1896-S Double Eagle, MS64+
Only One Finer NGC Coin**

6112 1896-S MS64+ NGC. With a mintage of 1.4 million pieces, the 1896-S double eagle is rather easily located, unless a Gem quality example is the expectation. NGC and PCGS have only graded three pieces in MS65 or better. The next best choice is one of the four Plus-designated MS64s that NGC has certified (3/16). This lovely example combines delicate pink and green overtones with frosty yellow-gold luster and original, pristine surfaces. NGC ID# 26CG, PCGS# 9030

**1896-S Twenty, MS64+
Important Condition Rarity**

6113 1896-S MS64+ NGC. This splendid 1896-S double eagle is fully original with pale orange and emerald toning over its frosty and fully lustrous yellow-gold surfaces. This is an important condition rarity that is seldom encountered in grades above MS64. Census: 4 in 64+, 1 finer (3/16). NGC ID# 26CG, PCGS# 9030

**1896-S Liberty Twenty, MS64+
Only Three Finer Certified**

6114 1896-S MS64+ NGC. CAC. NGC has certified four of these in MS64+, with only one numerically finer example, while PCGS has graded two in MS64+, and only two finer (3/16). That combined population of six MS64+ and three MS65 or finer examples rarely provides an opportunity for the collector to obtain this date finer than ordinary MS64. This splendid piece has dusky patina on the high points with brilliant and frosty yellow-gold luster. An impressive example for the advanced collector. NGC ID# 26CG, PCGS# 9030

6115 1896-S MS61 Prooflike NGC. Deeply reflective, bright yellow-gold fields achieve a Prooflike designation from NGC, setting this 1896-S double eagle apart from most numerically equal examples. The strike is bold, and light, scattered abrasions define the grade. Census: 30 in 61 (1 in 61 ★) Prooflike, 15 finer (2/16). NGC ID# 26CG, PCGS# 79030

6116 1897 MS63+ PCGS. The Plus designation makes this Select 1897 double eagle appealing among budget-restricted collectors. The luster is vibrant and frosty, displaying original tangerine-gold color. The reverse is well-preserved, but the obverse has a few minor grazes that preclude a full MS64 grade. NGC ID# 26CH, PCGS# 9031

6117 1897-S MS63+ NGC. The wheat-gold surfaces of this Type Three S-mint double eagle display copious luster amid a scattering of marks, none of them terribly overt save for a sole nick on Liberty's chin and a small rim dig on the obverse near 3 o'clock. The strike is bold. NGC ID# 26CJ, PCGS# 9032

1897-S Double Eagle, MS64+ Sharply Struck, Well-Preserved

6118 1897-S MS64+ PCGS. CAC. This nicely toned orange-gold 1897-S double eagle boasts glorious luster and is virtually indistinguishable from an example in Gem grade. All obverse stars are fully struck; luster grazes and abrasions are minuscule and relegated to unimportant areas of the design, save for a few light scrapes at the horizontal shield lines. Population: 31 in 64+, 11 finer. CAC: 55 in 64, 2 finer (2/16). NGC ID# 26CJ, PCGS# 9032

6119 1898 MS62 PCGS. The 1898 Liberty double eagle is a slightly better date above MS62. This piece is collectible and unusually appealing for the grade. The strike is sharp, and the yellow-gold surfaces display satiny luster. Light chatter on the obverse defines the numeric level. NGC ID# 26CK, PCGS# 9033

1898 Twenty Dollar, Sharp MS63 Frosty Cartwheel Luster

6120 1898 MS63 NGC. This late 19th century double eagle issue is readily accessible through the MS62 level, though Select pieces are elusive, and anything finer is a condition rarity. This MS63 example has characteristically bold design definition on Liberty's head. Frosty luster cartwheels over the yellow-gold surfaces, contributing to the understated, yet undeniable eye appeal. NGC has graded just 23 finer pieces (3/16).
Ex: *Houston Signature* (Heritage, 12/2010), lot 4674; *FUN Signature* (Heritage, 1/2015), lot 7668. NGC ID# 26CK, PCGS# 9033

1898 Twenty Dollar, MS63 Rarely Encountered Finer

6121 1898 MS63 PCGS. Intensely frosted mint bloom is the initial draw on the viewer's eye for this Select Mint State 1898 double eagle, showing original rose-gold centers that transition to green-gold at the margins. The strike is sharp, while grade-consistent abrasions are noted on Liberty's cheek. PCGS has certified only 18 finer representatives (3/16).
Ex: *FUN Signature* (Heritage, 1/2015), lot 7667. NGC ID# 26CK, PCGS# 9033

6122 1898-S MS64+ PCGS. CAC. The 1898-S is a well-made issue that generally comes with full or nearly full strike detail. Such is the case with this top-notch near-Gem. The hair strands are completely delineated, and the stars show full radials. Effulgent luster issues from each side. NGC ID# 26CL, PCGS# 9034

1898-S Twenty Dollar, MS64+ Eye-Catching Type Candidate

6123 1898-S MS64+ PCGS. CAC. Rich peach-gold coloration and thickly frosted mint luster grace the surfaces of this eye-catching Liberty Head double eagle, an ideal type candidate with typically pinpoint definition. Minor chatter is all that prevents a full Gem assessment. Although the 1898-S is among the most accessible issues in the series, representatives are very scarcely found in higher grades. NGC ID# 26CL, PCGS# 9034

1899 Double Eagle, MS65 Only One Coin Finer at PCGS

6124 1899 MS65 PCGS. This late 19th-century type-coin issue becomes scarce in MS65 and is extremely rare any finer. The present Gem example displays razor-sharp details and frosty yellow-gold luster. A loupe reveals only a few trivial grazes in the fields. An important acquisition for the type coin enthusiast. Population: 25 in 65, 1 finer (3/16). NGC ID# 26CM, PCGS# 9035

6125 1900 MS64 PCGS. Eye-catching originality produces beautifully blended rose, honey, and mint-gold hues over the frosty surfaces of this Choice 1900 double eagle. The strike is sharp, and the surfaces are remarkably clean. Housed in a green label holder. NGC ID# 26CP, PCGS# 9037

6126 1900 MS64 NGC. Frosty yellow-gold luster on this Choice Mint State double eagle exhibits traces of pink overtones. The devices are boldly rendered. Great eye appeal is presented with only a few trivial marks. NGC ID# 26CP, PCGS# 9037

6127 1900 MS64 PCGS. A pleasing Mint State type coin with frosty yellow-gold luster and sharp design elements. A few minor marks on the cheek limit the grade, but the fields are mostly clean. Although elusive in Gem condition, the 1900 double eagle is readily available in lower levels for the budget-conscious collector. NGC ID# 26CP, PCGS# 9037

6128 1900 MS64 NGC. CAC. Each side displays fully rendered design elements and a layer of frosty luster over rich yellow-gold surfaces, attesting to the overt originality of this near-Gem twenty dollar. The issue is available through MS64, but anything finer will pose a significant challenge. A great coin for type purposes. NGC ID# 26CP, PCGS# 9037

1900 Double Eagle, MS65+ Only Three Numerically Finer at NGC

6129 1900 MS65+ NGC. CAC. Although NGC has certified nearly 300 Gem 1900 double eagles, just two of those carry a premium designation, and only three finer pieces have been examined (3/16). This Plus-designated specimen has pristine surfaces and frosty yellow-gold luster. This is an excellent opportunity for the advanced collector and connoisseur to obtain a conditionally rare issue. NGC ID# 26CP, PCGS# 9037

6130 1901 MS64 PCGS. A sharp, radiantly lustrous 20th century type coin, showing yellow-gold luster rolling over frosty surfaces. Light, scattered marks on Liberty's cheek preclude a Gem grade assignment. Eye appeal is pleasing. NGC ID# 26CS, PCGS# 9039

1901-S Double Eagle, Vibrant MS63

6131 1901-S MS63 PCGS. The 1901-S Liberty double eagle has often surfaced in European holdings in recent years, making the issue reasonably available in lower Mint State grades, but high-grade specimens remain elusive. This attractive Select example displays well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster. NGC ID# 26CT, PCGS# 9040

6132 1903 MS64 PCGS. A lustrous 1903 double eagle with sharp devices and minimal abrasions. Scattered alloy spots appear over honey-gold patina on each side, attesting to the originality of the surfaces. The availability of this issue in MS64 makes it popular among type set assemblers and collector-coin investors. NGC ID# 26CW, PCGS# 9043

1903 Double Eagle, MS65 Orange and Lavender-Gold Color

6133 1903 MS65 PCGS. A blend of orange and lavender-gold hues colors each side under a layer of swirling luster that gives this Gem Liberty double eagle excellent visual appeal. The strike is needle-sharp with the faintest trace of incompleteness on the date and lower stars. Carefully preserved fields are free of overt imperfections. The 1903 is obtainable through Gem condition but is very rare in higher grades. PCGS reports merely three finer submissions (3/16). NGC ID# 26CW, PCGS# 9043

1903 Double Eagle, MS65 Rare in Better Grades

6134 1903 MS65 NGC. Before the famously high-mintage 1904 double eagle issue came the 1903 with a mintage of fewer than 300,000 pieces. Gem examples like this piece with warm yellow-gold luster and scattered coppery accents are available for a price, but NGC has graded just 10 coins finer (2/16), a testament to better pieces' conditional rarity. NGC ID# 26CW, PCGS# 9043

1903 Twenty, Frosty MS65+ Outstanding Type Candidate

6135 1903 MS65+ NGC. Most issues in the Liberty double eagle series are either rare or scarce in Gem condition. The 1903 is marginally available in MS65 and thus widely appreciated as a type coin by those seeking something other than the common 1904, but finer examples are genuine rarities. This Plus-graded Gem is boldly struck and displays shimmering yellow-gold luster. A few insignificant grazes on Liberty's cheek appear to be all that limit the grade. NGC lists 10 finer pieces, PCGS only three (2/16). NGC ID# 26CW, PCGS# 9043

- 6136 1903-S MS64 PCGS.** A lustrous orange-gold Choice Liberty type coin. Smooth save for minor marks on the left obverse field. A small strike-through (as made) is below obverse star 2, and the reverse legends are strike doubled. Certified in a green label holder. NGC ID# 26CX, PCGS# 9044

**1903-S Twenty Dollar, MS64+
Rare This Nice**

- 6137 1903-S MS64+ PCGS. CAC.** The fact that PCGS reports a trifling number of numerically finer pieces makes the Plus designation with CAC endorsement extra-meaningful for this near-Gem 1903-S twenty. Vibrant mint luster and rich, frosty surfaces flash rose-red and lilac highlights for exceptional eye appeal. Only a few widely scattered ticks prevent an even finer grade. Die doubled at the denomination, most visible at the base of NTY in TWENTY. Population: 17 in 64+, 15 finer (3/16). NGC ID# 26CX, PCGS# 9044

- 6138 1904 MS64+ PCGS.** Readily available at the MS64 grade level and finer, the 1904 double eagle is the quintessential Type Three Liberty Head twenty for type. This Plus-graded example exudes frosty, sun-gold mint luster with occasional peach-orange and red highlights. Sharply struck with only a few faint, non-distracting abrasions. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65
CAC-Approved Liberty Head Type Coin**

- 6139 1904 MS65 PCGS Secure. CAC.** Ex: Coll. Champagne Lanson. The ready availability of the 1904 double eagle in MS65 makes it a go-to type-coin issue. This CAC-endorsed PCGS example displays sharp detail and satiny lemon-gold luster. Eye appeal is enlivened by a radiant cartwheel effect, and there are no severe abrasions. NGC ID# 26CY, PCGS# 9045

**1904 Liberty Twenty, MS65 +
Ideal Type Representative**

- 6140 1904 MS65+ NGC.** The 1904 double eagle is a frequent target of type collectors, as attractive, sharply struck coins are readily available through MS65. Premium Gems are scarce, and this example approaches the quality of that grade level. The fields are largely undisturbed, and a couple of trivial marks on Liberty's cheek define the grade. Each side has frosty yellow-gold surfaces and fully defined motifs, accounting for the top-notch aesthetic appeal. NGC ID# 26CY, PCGS# 9045

- 6141 1904 MS63 Prooflike NGC.** Mirrored fields and surprisingly few bagmarks separates the present 1904 double eagle from its many peers. The strike is good, since on the S in TRUST shows softness. NGC ID# 26CY, PCGS# 79045

- 6142 1904-S MS64 NGC.** A lustrous sun-gold Choice double eagle. Sharply struck and carefully preserved. The portrait is uncommonly free from abrasions. This handsome Type Three representative is encased in a prior generation holder. NGC ID# 26CZ, PCGS# 9046

- 6143 1906 MS60 NGC.** A sharply struck and generally lustrous Mint State example of this low-mintage issue of 69,500 coins. This piece shows heavy abrasions and some scrapes in the luster that account for the grade, but there is no trace of wear on the amber-gold surfaces. NGC ID# 26D4, PCGS# 9049

- 6144 1906 MS61 NGC.** A better 20th century issue, boasting a low mintage 69,500 coins. This Mint State 1906 double eagle displays a sharp strike and partially reflective fields. The surfaces are only lightly marked and have bright yellow-gold color. NGC ID# 26D4, PCGS# 9049

**1906 Liberty Twenty, MS62
Scarce, Sharp Appeal**

- 6145 1906 MS62 NGC.** The 1902, 1905, and 1906 issues form a scarce, often-overlooked trio in the Liberty Head double eagle series. This 1906 is a particularly appealing example for the MS62 grade. Medium green-gold surfaces display frosty mint luster and only scattered minor abrasions. A small double reeding mark on the chin is the sole abrasion of any consequence. The strike is bold for the issue — one of just 69,500 pieces minted. NGC ID# 26D4, PCGS# 9049

- 6146 1906-S MS63+ PCGS Secure.** Vibrant, frosty mint luster cartwheels over each side of this Plus-designated MS63 example, illuminating hues of honey and yellow-gold. There are a few minor abrasions on Liberty's cheek but none of singular importance. The strike is a trifle soft on the high points of the devices. NGC ID# 26F6, PCGS# 9051

- 6147 1907 MS64+ PCGS.** The 1907 Liberty Head double eagle issue is broadly overshadowed by its more-illustrious successors of the Saint-Gaudens design, with which there is simply no comparison — save for the 1907 Arabic Numerals issue, and even that saw a mintage about one-quarter that of the Liberty Head. This near-Gem is a great, lustrous example for a last-year-of-type set, well-struck and free of mentionable distractions. Population: 26 in 64+, 18 finer (2/16). NGC ID# 26D7, PCGS# 9052

**1907 Liberty Twenty, Well-Preserved MS64+
Last Year of the Design**

- 6148 1907 MS64+ PCGS. CAC.** The 1907 double eagle is among the many "split-design years" of American numismatics, as well term them, where an older design was superseded by a new motif of the same date, in this case the long-running James B. Longacre design meeting that of Augustus Saint-Gaudens. Great color and luster amid minimal marks separate this piece from most of its ilk. Population: 26 in 64+, 18 finer. CAC: 71 in 64, 3 finer (2/16). NGC ID# 26D7, PCGS# 9052

- 6149 1907-D MS63 NGC.** An attractive example of the final-year Liberty Head twenty, one of 842,250 pieces struck at the Denver Mint. Vibrant, sun-glow gold luster reveals olive and gold highlights when the coin is viewed from different angles. Only a few small bagmarks exist on the sharply struck obverse, while the reverse is exceptionally well-preserved. A splendid representative of the Select Uncirculated level. NGC ID# 26D8, PCGS# 9053

**1907-D Twenty Dollar, MS64
Frosty Mint Luster**

- 6150 1907-D MS64 PCGS.** Sharp design elements and frosty luster deliver outstanding eye appeal on this Choice 1907-D Liberty double eagle. The surfaces display original orange-gold color, and the fields are clean — only a few minor grazes on Liberty's cheek limit the grade. Housed in a green label holder. NGC ID# 26D8, PCGS# 9053

**1907-D Twenty Dollar, MS64+
Attractive Cartwheel Luster**

- 6151 1907-D MS64+ PCGS.** A collectible Choice Mint State example of this final-year Denver issue, showing exceptional near-Gem surface quality and awarded the appropriate Plus designation. The strike is sharp, and the surfaces yield frosty yellow-gold luster. The 1907-D Liberty double eagle is infrequently seen in Gem and finer grades. NGC ID# 26D8, PCGS# 9053

**1907-D Double Eagle, MS65
Well-Preserved and Attractive**

- 6152 1907-D MS65 PCGS.** The 1907-D is a somewhat more available issue in finer grades, perhaps saved as the final year of the type, but it is still a scarce coin above MS65. This is a glistening Gem with pleasing honey-gold toning and well-preserved surfaces. The strike definition is uniformly sharp on both sides. PCGS lists 18 finer representatives (2/16). NGC ID# 26D8, PCGS# 9053

**1907-S Twenty Dollar, MS64+
Few Known Finer**

- 6153 1907-S MS64+ PCGS.** Although plentiful through MS64, the 1907-S Liberty double eagle is a rarity in Gem condition. This Plus-graded Choice example should appeal to many collectors. The strike is bold, and the frosty surfaces display original rose-gold luster. A few trivial grazes on Liberty's cheek limit the grade but pose little distraction. PCGS reports 13 Gems finer (3/16). NGC ID# 26D9, PCGS# 9054

PROOF LIBERTY DOUBLE EAGLE

1896 Liberty Twenty, PR58 Entry-Level Proof Double Eagle

- 6154** 1896 PR58 NGC. This is a pleasing lower-end 19th century proof double eagle, showing razor-sharp devices and gleaming reflectivity in the fields. The rich yellow-gold surfaces exhibit faint rub over the high points with scattered hairlines in the mirrors. Eye appeal is nonetheless attractive. The Mint struck 128 proof double eagles in 1896, although fewer than half are likely to survive in all grades. NGC ID# 26EH, PCGS# 9112

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Double Eagle Wire Rim, Unc Sharpness

- 6155** 1907 High Relief, Wire Rim — Improperly Cleaned — NGC Details. Unc. Were it not for some faint hairlines that suggest a light cleaning, this unworn Wire Rim High Relief would have garnered a numeric grade and achieved an auction result beyond what many collectors could reach. This boldly struck, satiny coin is pleasantly appealing for a Details-graded Saint and remains within the grasp of budget-conscious enthusiasts. There are no severe abrasions. Widely considered the most beautiful coin design ever issued for circulation by the United States Mint. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Twenty, Unc Details High Relief, Wire Rim

- 6156** 1907 High Relief, Wire Rim — Cleaning — PCGS Genuine. Unc Details. From a limited mintage of 12,367 pieces, this attractive specimen of Augustus Saint-Gaudens' iconic design exhibits the sharply detailed design elements expected of this issue. The pleasing orange-gold surfaces show only a few scattered, minor signs of contact, but the luster is muted by the noted cleaning. The 1907 High Relief twenty has often been called "America's most beautiful coinage design." NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

- 6157** 1907 Arabic Numerals MS64 PCGS. The Arabic Numerals variant of the inaugural Saint-Gaudens double eagle issue. This 1907 twenty displays sharp design rendering and rich orange-gold luster. A few small marks hardly affect the eye appeal. NGC ID# 26F5, PCGS# 9141

- 6158** 1907 Arabic Numerals MS64+ PCGS. The first-year Arabic numerals Saint is a favorite selection for type — readily available, with high production quality and nearly always with exceptional eye appeal. This Plus-graded example excels with radiant sun-gold color and vibrant mint luster. The strike is razor-sharp, while marks are limited to a few minor nicks and abrasions in the obverse rays. NGC ID# 26F5, PCGS# 9141

- 6159** 1907 Arabic Numerals MS64+ PCGS. CAC. A total of 361,667 Arabic numerals Saint-Gaudens twenty dollar gold pieces were minted in 1907, inaugurating what would become one of the most popular series in American numismatics. This well-defined and Plus-designated near-Gem showcases frosty, yellow-gold surfaces and tremendous eye appeal. NGC ID# 26F5, PCGS# 9141

- 6160** 1907 Arabic Numerals MS64+ PCGS. CAC. The Capitol building boasts strong detail on this high-end Choice double eagle from the first regular issue in the Saint-Gaudens series. Coruscating luster rolls over yellow-gold surfaces. Unimportant marks are lightly peppered throughout, barely preventing a Gem assessment. Ideal type coin. NGC ID# 26F5, PCGS# 9141

- 6161** 1907 Arabic Numerals MS64+ PCGS. CAC. Brilliant luster appears on apricot-gold surfaces with strong eye appeal, although there are a few too many abrasions for a Gem grade, including one hit on Liberty's nose. This is still an attractive example of this first-year type. NGC ID# 26F5, PCGS# 9141

- 6162** 1907 Arabic Numerals MS64+ PCGS. CAC. An excellent type coin candidate, this near-Gem first-year Saint boasts strong luster on orange-yellow surfaces that are well-struck overall but show scattered marks and scrapes, none overly distracting. The reverse is better-preserved overall, not an unusual occurrence on this issue due to its design traits. NGC ID# 26F5, PCGS# 9141

- 6163** 1907 Arabic Numerals MS64+ PCGS. CAC. This first-year Saint-Gaudens twenty dollar gold piece is an ideal target for type purposes with vibrant mint frost over yellow-gold surfaces. The devices are characteristically strong for the issue, particularly the columns of the Capitol building. NGC ID# 26F5, PCGS# 9141

1907 Saint-Gaudens Twenty, MS65 Frosty Arabic Numerals Example

- 6164** 1907 Arabic Numerals MS65 PCGS. Original, frosty luster illuminates the yellow-gold surfaces of this Gem 1907 Saint-Gaudens double eagle. The strike is bold, and eye appeal is outstanding. The Roman numeral date on Saint-Gaudens' original design was replaced on this low relief issue with Arabic numerals. More than 360,000 pieces were struck, making this date suitable for type purposes. NGC ID# 26F5, PCGS# 9141

**1907 Saint-Gaudens Twenty, MS65
Arabic Numerals**

- 6165 1907 Arabic Numerals MS65 PCGS.** The High Relief experiment for Saint-Gaudens' double eagle in 1907 culminated in the adoption of this easily struck low relief version, which was coined for the remainder of the series. This Gem Arabic numerals 1907 displays a bold strike and frosty orange-gold luster. Housed in a green label holder. NGC ID# 26F5, PCGS# 9141

**1907 Arabic Numerals Saint, MS65+
Lustrous First-Year Type Coin**

- 6166 1907 Arabic Numerals MS65+ PCGS.** Although art enthusiasts of the period and most collectors of today overwhelmingly prefer the High Relief version of Saint-Gaudens' double eagle design, the coining presses of the early 20th century could not produce it efficiently. This high-end Gem 1907 Arabic numerals coin represents the final rendition of the design in a low relief that would strike up with a single die impression. Liberty's figure and the eagle are well-detailed, and each side displays vibrant yellow-gold luster. NGC ID# 26F5, PCGS# 9141

**1907 First-Year Saint, MS65+
Lustrous Arabic Numerals Type Coin**

- 6167 1907 Arabic Numerals MS65+ PCGS.** Lovely saffron-gold color pulses with frosty mint luster on both sides of this attractive, first-year Saint-Gaudens twenty. The fields are remarkably free of any abrasions and a sharp strike exists throughout. A few tiny marks on the raised devices — visible with a lens — are of technical note only. A high-end Gem double eagle that projects exceptional in-hand visual appeal. NGC ID# 26F5, PCGS# 9141

- 6168 1908 No Motto MS65 NGC.** Long Rays Obverse. A lustrous Gem with lime-green margins and apricot-gold centers. The strike shows minor blending on the eagle's leg plumage. No abrasions are remotely consequential save for a unobtrusive thin mark on the eagle's neck. Housed in a former generation holder. NGC ID# 26F6, PCGS# 9142

- 6169 1908 No Motto MS66 PCGS.** 30th Anniversary Green Label Holder. Many of the high-grade examples of this issue originated in the Wells Fargo Hoard. This Premium Gem is not pedigreed to that source but may well be one of those coins. The strike is bold, and the yellow-gold surfaces display characteristically satin luster. NGC ID# 26F6, PCGS# 9142

**1908 No Motto Twenty, MS67
Ex: Wells Fargo Hoard**

- 6170 1908 No Motto, Wells Fargo Nevada, MS67 PCGS.** Ex: Wells Fargo. For type purposes, few No Motto double eagles would serve better than the present 1908 Wells Fargo coin. The Wells Fargo Hoard yielded thousands of this issue in Mint State, and a huge portion of the high-end coins known today originated from that source. The present piece displays rich satin luster and yellow-gold coloration. The strike is well-executed, and there are no abrasions. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

- 6171 1908-D Motto MS64+ PCGS.** Rich apricot-gold centers are framed by apple-green margins. Lustrous and precisely struck with smooth fields and a few concealed marks on the wings. Liberty's chest shows a strike-through, as coined. NGC ID# 26F9, PCGS# 9148

**1908-S Double Eagle, AU55
Low 22,000-Coin Mintage**

- 6172 1908-S AU55 PCGS. CAC.** A popular date due to its small 22,000-coin mintage and scarcity in Mint State. This example displays a bold strike and minor high-point wear. Luster remains in the fields, and there are no individually bothersome abrasions. The CAC endorsement adds to the appeal of this piece. The 1908-S is the first San Francisco issue of the series. Beginning the following year, San Francisco double eagle coinage would climb dramatically. NGC ID# 26FA, PCGS# 9149

**1908-S Twenty Dollar, AU58
Low Mintage, Scarce Any Finer**

6173 1908-S AU58 NGC. The 1908-S is famous for its paltry 22,000-coin mintage, the lowest in the With Motto portion of the series, and for being the first issuance of the Saint-Gaudens design from the San Francisco Mint. This near-Mint example displays substantial honey-gold luster in the fields and trivial friction over well-struck design elements. Pleasantly eye-appealing with no bothersome abrasions. NGC ID# 26FA, PCGS# 9149

6174 1909/8 FS-301 AU55 NGC. The sole undisputed overdate of the double eagle denomination. The second 9 is clearly hubbed over an 8. Liberty's raised knee and the eagle's breast display slight wear, but cartwheel luster sweeps both sides of this olive-gold Choice AU example. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

6175 1909/8 FS-301 AU58 ANACS. This clear overdate is the only major variety in the Saint-Gaudens double eagle series. The present near-Mint example is well struck and displays satiny yellow-gold luster. Light, scattered abrasions are as expected for the grade. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**1909-S Twenty Dollar, MS65
Rarely Seen Finer**

6176 1909-S MS65 PCGS. This Gem 1909-S Saint-Gaudens double eagle is among the finest budget-conscious collectors will be able to acquire. Higher-grade pieces are rarely seen. This piece displays sharp motifs and satiny straw-gold luster. A few trivial surface grazes preclude an even finer grade. PCGS lists 14 coins in MS66 or better (3/16). NGC ID# 26FE, PCGS# 9153

**1909-S Saint-Gaudens Twenty, MS65+
Conditionally Rare in Finer Grades**

6177 1909-S MS65+ PCGS. From a mintage of nearly 2.8 million pieces, the 1909-S Saint-Gaudens double eagle is seldom encountered in grades above the MS65 level. This Plus-graded Gem displays well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and outstanding visual appeal. PCGS has graded 14 numerically finer examples (2/16). NGC ID# 26FE, PCGS# 9153

6178 1909-S/S Repunched Mintmark, FS-501, MS64 PCGS. The first S mintmark is below and to the right of the subsequent mintmark, with noticeable separation between them. The 1909-S/S is among the few *Cherry-pickers'* varieties in the Saint-Gaudens double eagle series and among two RPM varieties along with its more famous cousin, the 1911-D/D. This near-Gem boasts bounteous luster over well-struck orange-gold surfaces that show scattered light ticks on the obverse. A few larger ticks show on the eagle's midsection on the reverse. Population for the variety: 19 in 64 (2 in 64+), 6 finer (2/16). NGC ID# 26FE, PCGS# 145741

6179 1910 MS64+ PCGS. Ample luster emanates from the blond-gold surfaces on each side of this near-Gem 1910 twenty, a well-struck coin with a few minor ticks and luster grazes that seem to barely preclude Gem status. NGC ID# 26FE, PCGS# 9154

6180 1910-D MS65 PCGS. Peach-gold centers and lime-green margins add to the attraction of this lustrous and nicely struck Gem. Marks are trivial aside from scattered contact on the eagle. A good value relative to the MS66 level.

Ex: Dallas Signature (Heritage, 10/2009), lot 1856, which realized \$2,530. NGC ID# 26FG, PCGS# 9155

**1910-D Twenty Dollar, MS65+
Excellent Color**

6181 1910-D MS65+ PCGS. The 1910-D Saint-Gaudens double eagle is among the most plentiful of the period in Gem condition, although finer coins are elusive. This Plus-designated coin displays sharp motifs and satiny luster. Lovely violet and silver-blue hues appear in the central regions with rich orange-gold elsewhere. NGC ID# 26FG, PCGS# 9155

**1910-D Twenty Dollar, MS66
Seldom Seen This Fine**

6182 1910-D MS66 NGC. The 1910-D is a Saint-Gaudens double eagle that is seldom seen in MS66, and finer examples are extreme rarities. This piece boasts sharp definition and particularly well-preserved fields. Only a few minor ticks on the figure of Liberty limit the grade. This coin showcases radiant luster and has warm honey-gold color. Eye appeal is outstanding. Census: 47 in 66, 2 finer (2/16). NGC ID# 26FG, PCGS# 9155

6183 1910-S MS64+ PCGS. CAC. A smattering of small ticks appears on Liberty's lower gown and in the sun's rays of the right field, barely precluding a Gem grade. A few tiny marks on the reverse largely disappear into the eagle's plumage. Intense luster and appealing orange-golden color complement the nice, sharp strike. NGC ID# 26FH, PCGS# 9156

6184 1910-S MS64+ PCGS. CAC. The peach-gold surfaces emanate bold luster throughout both sides, complementing a bold strike on the date, mintmark, Capitol building, and Liberty's sandal. A couple of small ticks on Liberty's torso and right knee account for the grade, but the eye appeal is uniformly high. NGC ID# 26FH, PCGS# 9156

6185 1911 MS63 PCGS. CAC. Bright mint luster is quite strong on this Select Mint State twenty, which further offers appealing blond-gold color. The fields show extensive but minuscule ticks that we would characterize as merely chatter, but a few larger marks, while still not overt, dot Liberty's torso and legs. The eagle on the reverse shows a similar effect but the fields show less chatter. NGC ID# 26FK, PCGS# 9157

**1911 Twenty Dollar, MS64+
Lustrous, Original Surfaces**

6186 1911 MS64+ NGC. The 1911 Saint is a plentiful issue through MS64, but finer coins are elusive. This Plus-designated Choice representative displays frosty green-gold luster and well-defined relief elements. Light contact on the high points of Liberty's figure accounts for the grade, as the fields are mostly clean. NGC ID# 26FK, PCGS# 9157

**1911 Twenty Dollar, MS64+
Bold Strike Definition**

6187 1911 MS64+ PCGS. Frosty, textured fields are carefully preserved and devoid of apparent distractions. Liberty's torch hand, visage, and the Capitol show strong detail that add to the allure of this Choice Saint-Gaudens twenty dollar gold piece. The 1911 enjoys one of the smaller mintages in this popularly collected series (197,200 coins), and examples prove exceedingly challenging in finer grades. NGC ID# 26FK, PCGS# 9157

6188 1911-D MS65 NGC. A popular date, being the same date and mintmark combination as key issues from the lesser gold denominations. The 1911-D double eagle is available in MS65, but becomes increasingly scarce in finer grades. This piece displays bold detail and satiny orange-gold luster. There are only minor surface grazes observed. NGC ID# 26FK, PCGS# 9158

6189 1911-D MS65 NGC. An impressive Gem, this piece is an excellent early Saint-Gaudens type issue. Both sides exhibit rich yellow luster, tending toward orange, with bold design elements. NGC ID# 26FK, PCGS# 9158

6190 1911-D/D FS-501 MS65 PCGS. The mintmark is boldly doubled outside the right curve on this scarce variety. The 1911-D/D is not currently listed in the popular price books such as the *Guide Book*, but it should be in our opinion. Such a listing would dramatically influence the valuation. This piece has muted mint frost with brilliant orange-gold luster and exceptional eye appeal. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

**1911-S Double Eagle, MS65
Seldom Seen Finer**

6191 1911-S MS65 NGC. Available through MS65, the 1911-S Saint-Gaudens double eagle becomes rare any finer. This Gem example displays satiny honey-gold luster with well-struck design elements and only a few trivial marks that define the grade. NGC has seen 32 finer representatives (3/16), which are out of reach for most collectors. NGC ID# 26FL, PCGS# 9159

**1912 Twenty Dollar, MS64
Pleasing Mint Luster and Color**

- 6192 1912 MS64 PCGS.** The 1912 has a relatively low mintage of only 149,700 pieces, and few are available in Gem or finer grades. This piece shows an early stage die crack from the I through the torch and into the B of LIBERTY. Only one cracked die is known for this year, and approximately 20 percent of all 1912 twenties show this crack. Otherwise the surfaces display pleasing, soft mint luster and even reddish patina over each side. A few small abrasions are scattered about, none of which are worthy of individual mention. NGC ID# 26FM, PCGS# 9160

**1913-D Saint-Gaudens Double Eagle, MS64+
Better Early Branch Mint Issue**

- 6193 1913-D MS64+ PCGS. CAC.** With a reported mintage of 393,500 pieces, the 1913-D Saint-Gaudens double eagle is one of the scarcest Denver Mint issues of the decade. This Plus-Graded Choice specimen displays well-preserved orange-gold surfaces, with vibrant mint luster and sharply detailed design elements. Eye appeal is outstanding. NGC ID# 26FP, PCGS# 9162

**1913-S Double Eagle, MS62
Low-Mintage Issue**

- 6194 1913-S MS62 NGC.** With a small 34,000-coin mintage, the 1913-S Saint-Gaudens double eagle is a popular issue in all grades. This collectible Mint State example displays frosty green-gold luster and sharply rendered design elements. There are no significant abrasions, although light surface chatter limits the grade. NGC ID# 26FR, PCGS# 9163

- 6195 1914 MS62 NGC.** A slightly better date with a mintage of only 95,250 pieces. This Uncirculated 1914 double eagle displays pleasing sharpness of strike with satiny wheat-gold luster. Scattered abrasions limit the grade. NGC ID# 26FS, PCGS# 9164

- 6196 1914 MS63 PCGS.** The total production of the 1914 double eagle was a meager 95,250 coins but, unlike some later issues, many appear to have survived in Mint State. PCGS has graded more than a thousand coins in the range from MS63 to MS66. This Select example displays a few scattered ticks on the Liberty's torso account for the grade, while the reverse is comparatively clean. Frosty, orange-gold surfaces with thick mint luster complete the considerable eye appeal.
Ex: Dallas Signature (Heritage, 10/2009), lot 1885. NGC ID# 26FS, PCGS# 9164

- 6197 1914 MS63 PCGS. CAC.** Double eagle production amounted to 95,250 coins at the Philadelphia Mint in 1914, placing this issue among a select few in the series with mintages below six figures. Lightly textured khaki-gold surfaces feature an overlay of softly frosted mint luster. Typically struck and clean for the grade. NGC ID# 26FS, PCGS# 9164

**1914 Double Eagle, MS63+
Low-Mintage Philadelphia Issue**

- 6198 1914 MS63+ PCGS.** A mintage of 95,250 coins helps the 1914 stand apart from most other Philadelphia Saints, save for the late dates that round out the series. The issue's strong strike characteristics are on full display throughout this MS63+ example. Luminous rose-gold surfaces glisten with frosty luster. Scattered marks are generally well-hidden and fail to detract from the terrific eye appeal. NGC ID# 26FS, PCGS# 9164

**1914 Double Eagle, MS64
CAC-Approved in a Green Label Holder**

- 6199 1914 MS64 PCGS. CAC.** An attractive issue among key date collectors due to its low mintage of 95,250 coins, the 1914 Saint-Gaudens twenty is a condition rarity above MS64. This Choice example remains within the grasp of budget-restricted enthusiasts, boasting the coveted combination of a green label holder and a CAC endorsement. The motifs are bold, and the frosty surfaces yield rich straw-gold luster. PCGS lists 43 finer submissions (2/16). NGC ID# 26FS, PCGS# 9164

**1914 Double Eagle, MS64+
Lustrous, Scarce Any Finer**

- 6200 1914 MS64+ PCGS.** The small five-figure mintage of the 1914 double eagle (95,250 coins) produces few high-end survivors. This Plus-graded Choice example is unusually appealing with honey-gold satin luster and bold relief elements. Only a few minor abrasions preclude Gem classification. PCGS lists 43 finer representatives (3/16). NGC ID# 26FS, PCGS# 9164

**1914 Double Eagle, MS64+
Conditionally Scarce**

- 6201 1914 MS64+ PCGS. CAC.** Rich, flowing luster runs over orange-gold surfaces on both sides of this near-Gem better-date Saint. The 1914 was struck to the meager extent of only 95,200 pieces, and certified survivors usually run from MS61 to MS63. This piece is kept from the Gem level by a few small marks on Liberty's torso and in the right obverse field; even so, the strike is sharply brought up, and the eye appeal is extremely high. Population: 38 in 64+, 43 finer. CAC: 46 in 64, 7 finer (2/16). NGC ID# 26FS, PCGS# 9164

**1914 Double Eagle, MS64+
Seldom Encountered Finer**

- 6202 1914 MS64+ PCGS. CAC.** The 1914 is a lower-mintage Philadelphia issue with only 95,200 pieces struck, of which 127 were available to the Cashier plus another 74 coins after the meeting of the Assay Commission in February 1915. Examples are rarely encountered above the MS64 level, making this Plus-designated piece an especially good value. The reddish-tinted surfaces display soft mint frost. A few grade-limiting abrasions are seen in the obverse fields. NGC ID# 26FS, PCGS# 9164

- 6203 1915-S MS63 PCGS.** Well struck with radiant luster. This Select 1915-S twenty displays warm honey-gold surfaces with occasional patches of deeper amber color. Minimally abraded for the grade and housed in a first generation holder. NGC ID# 26FW, PCGS# 9168

- 6204 1915-S MS65 NGC.** A lovely Gem of this important pre-World War I Saint-Gaudens double eagle. The pristine surfaces are lustrous and fully brilliant with impressive eye appeal. NGC ID# 26FW, PCGS# 9168

**1916-S Twenty Dollar, MS66
None Finer at PCGS**

- 6205 1916-S MS66 PCGS.** The 1916-S is the only double eagle issue produced that year, making an example essential for a complete date set. This Premium Gem representative is among the finest at PCGS (2/16) and resides in a green label holder. The strike is bold, and impressive honey-gold luster illuminates each side. NGC ID# 34NJ, PCGS# 9169

- 6206 1920 MS63+ PCGS.** This high-end Select Saint-Gaudens double eagle exhibits well-detailed design elements and lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides. Reasonably available in lower Mint State grades, the 1920 is an elusive issue in Gem condition. NGC ID# 26FY, PCGS# 9170

**1920 Double Eagle, MS64
Only One Finer Coin at PCGS**

- 6207 1920 MS64 PCGS.** The 1920 is one of the most peculiar issues in the Saint-Gaudens double eagle series. It is usually available in MS64, but Gems are virtually impossible to locate, even if their near-six-figure value were not an obstacle. This collectible Choice example offers a pleasing strike and frosty prairie-gold luster that is slightly deeper on the reverse. Light, scattered abrasions define the grade. A single Gem is finer at PCGS (3/16). NGC ID# 26FY, PCGS# 9170

1920 Twenty, Well-Preserved MS64

- 6208 1920 MS64 NGC.** An impressively sharp, largely unabraded example of this conditional key-date double eagle. The fields are impressively clean, and only a few minor grazes on the devices limit the grade. The 1920 double eagle is available in MS64 but a great rarity in Gem condition. NGC has seen only seven pieces finer than the present coin, PCGS one (3/16). NGC ID# 26FY, PCGS# 9170

1920 Double Eagle, MS64 Extremely Rare Finer

- 6209 1920 MS64 PCGS.** The 1920 Saint remains plentiful in MS64, but finer coins are extremely rare: PCGS lists only one, NGC seven (3/16). This Choice example is appealing for the grade, showing frosty wheat-gold luster and bold design elements. Close examination fails to reveal any mentionable abrasions. NGC ID# 26FY, PCGS# 9170

1920 Saint-Gaudens Twenty, MS64+ Only One Coin Finer at PCGS

- 6210 1920 MS64+ PCGS. CAC.** A scarce Plus-graded MS64 example of the 1920 double eagle, this coin also endorsed by CAC. Series specialists will pounce on this piece, as PCGS has seen only a single finer representative (3/16). The frosty surfaces yield vibrant yellow-gold luster and bold design elements. A few faint grazes are not out of line for the grade. NGC ID# 26FY, PCGS# 9170

- 6211 1922 MS64+ NGC.** This a plentiful issue, although the present piece is distinctive for its Plus designation. The strike is above average for the issue, and the frosty surfaces yield original honey-gold luster. A few minor abrasions do not detract. NGC ID# 26G3, PCGS# 9173

1922 Twenty Dollar, MS65 Finer Coins are Rare

- 6212 1922 MS65 PCGS.** Plentiful in MS65 but distinctly rare any finer. The 1922 Saint-Gaudens double eagle is a common date with a mintage exceeding 1.3 million coins, but high-end examples always seem to be in short supply. This PCGS coin displays bold detail and satiny orange-gold luster. No major abrasions are observed. PCGS lists eight Premium Gems finer (2/16). NGC ID# 26G3, PCGS# 9173

1922 Saint-Gaudens Twenty, MS65+ Conditionally Rare At This Level

- 6213 1922 MS65+ NGC.** While the 1922 twenty is readily available, both PCGS and NGC top out at the Gem level and the services only rarely see any coins worthy of a finer grade. Plus- and/or Star-graded coins at MS65 are equally rare. This Plus-graded example earns high marks for the smooth and frosty surfaces with exceptional honey-gold luster and rose-red highlights. Sharply struck, the coin shows only a few nicks and tiny marks. Census: 5 in 65+, 2 in 65 ★, 9 finer (3/16). NGC ID# 26G3, PCGS# 9173

-
- 6214 1923-D MS65+ PCGS.** Type collectors need not break the bank to acquire this eye-catching 1923-D Saint. The strike is bold, and the frosty tangerine and prairie-gold luster rolls over each side in a vibrant array. There are a few small marks around the upper figure of Liberty that preclude a full MS66 designation. NGC ID# 26G6, PCGS# 9176

- 6215 1923-D MS66 NGC.** A minimally marked Premium Gem type coin with sharp details and frosted honey-gold luster. This 1923-D Saint-Gaudens double eagle displays the rich eye appeal for which the issue is widely appreciated.
Ex: Long Beach Signature (Heritage, 2/2001), lot 7409; Long Beach Signature (Heritage, 6/2001), lot 9384. NGC ID# 26G6, PCGS# 9176

- 6216 1923-D MS66 PCGS.** The combination of eye appeal and affordability of this 1923-D Saint-Gaudens double eagle inspire significant merit, but the scarcity of finer examples further heightens the appeal. The strike is bold, and frosty orange-gold luster rolls over each side. NGC ID# 26G6, PCGS# 9176

- 6217 1923-D MS66 PCGS.** This is a simply beautiful coin for the Gem quality collector. The surfaces are overlaid in rich, satiny luster that provides appreciable cartwheel effects. Orange-gold in shade, the surfaces are free of all but one or two well concealed bagmarks.
Ex: Long Beach Signature (Heritage, 9/2003), lot 8541. NGC ID# 26G6, PCGS# 9176

**1923-D Double Eagle, Richly Lustrous MS66+
Well-Produced and Popular Issue**

- 6218 1923-D MS66+ PCGS. CAC.** The 1923-D Saint-Gaudens issue is extremely popular as one of the best-produced and most available mintmarked issues in the entire series in high grades, found in some number even up to the MS67 level. This MS66+ example with CAC provides a coin that is virtually indistinguishable from those pricier pieces. Glorious, rich luster flows throughout the apricot-gold surfaces on both sides, complementing a bold strike and top-notch eye appeal. Only a stray tick or two precludes the higher grade — and price. Population: 64 in 66+, 68 finer. CAC has stickered only 12 examples in MS67 (2/16). NGC ID# 26G6, PCGS# 9176

- 6219 1924 MS66 PCGS.** A famous type-coin issue, the 1924 double eagle is available through MS66, but finer coins become elusive. This Premium Gem displays a bold strike and frosty green-gold luster. The fields are especially clean. NGC ID# 26G7, PCGS# 9177

- 6220 1924 MS66+ PCGS.** A high-end Premium Gem example of this popular Saint-Gaudens type issue, with sharply detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster. No mentionable distractions are evident. NGC ID# 26G7, PCGS# 9177

- 6221 1924 MS66+ PCGS.** Type enthusiasts seeking a high-end Saint-Gaudens double eagle need look no further. This high-end Premium Gem 1924 showcases luminous, satiny luster that is devoid of any noticeable abrasions. Putting a loupe to the figure of Liberty and the fields confirms the immense technical quality of both the strike and preservation. Each side displays blended orange and tangerine-gold hues. NGC ID# 26G7, PCGS# 9177

**1924-S Double Eagle, MS63
In an Old Green Label Holder**

- 6222 1924-S MS63 PCGS.** The 1924-S is a better date in Uncirculated grades, heavily melted under Roosevelt's 1933 executive order confiscating all gold coins remaining in banks or circulation. This example shows a bold strike and vibrant original luster in rich orange and yellow-gold hues. A few trivial marks seem minimal for the grade. Housed in an old green label holder. NGC ID# 26G9, PCGS# 9179

**1924-S Double Eagle, MS63
Heavily Melted Issue**

- 6223 1924-S MS63 PCGS.** Bright satin luster illuminates the minimally abraded surfaces of this Choice 1924-S Saint-Gaudens double eagle. The fields are primarily yellow-gold, although deeper tangerine hues appear over the relief elements. The 1924-S is a better date in Mint State, heavily melted in the mid-1930s under the dictates of Roosevelt's gold confiscation. Most Uncirculated survivors came to light in European bank hoards. NGC ID# 26G9, PCGS# 9179

**1925-D Double Eagle, MS63
Nice Color and Luster**

- 6224 1925-D MS63 PCGS.** Despite the substantial mintage of almost 3 million pieces, the 1925-D Saint-Gaudens double eagle is a scarce issue in all grades, due to the heavy melting of U.S. gold coins in the 1930s. This attractive Select example offers well-detailed design elements and lustrous orange-gold surfaces with a few scattered minor contact marks. NGC ID# 26GB, PCGS# 9181

**1926 Saint-Gaudens Twenty, MS65
Tripled Die Obverse, FS-101**

- 6225 1926 Tripled Die Obverse, FS-101, MS65 NGC.** The tripling is most obvious in the date/monogram area, also affecting the rays, stars, and oak leaves on the lower right of the design. Roger W. Burdette estimates the tripled die is seen on 10% of all 1926 Philadelphia double eagles. This delightful Gem exhibits sharply detailed design elements and well-preserved yellow and orange-gold surfaces, with vibrant mint luster on both sides. Census (for the variety): 6 in 65, 4 finer (3/16). NGC ID# 26GD, PCGS# 145744

**1926-S Twenty Dollar, MS62
Better Date in Uncirculated Condition**

- 6226 1926-S MS62 NGC.** A victim of melting, the 1926-S Saint-Gaudens double eagle is far scarcer in Mint State than its mintage of more than 2 million coins would suggest. This satiny MS62 coin is ideal for the budget-conscious collector seeking a Mint State representative. Honey-gold luster illuminates clean fields, while the devices show grade-limiting contact. NGC ID# 26GF, PCGS# 9185

**1926-S Twenty Dollar, MS64+
San Francisco Semikey**

- 6227 1926-S MS64+ PCGS.** New research by Roger Burdette shows that more than 99.7% of the 2 million double eagles minted at San Francisco in 1926 were melted. Probably 69 coins at most were available for purchase directly through the Philadelphia and San Francisco mints, and a couple thousand coins were sent to Europe. Coins that trade among collectors today almost certainly come from European holdings that were repatriated in the 1950s and 1960s. This orange and rose-gold 1926-S twenty is typically well-struck with good detail on the Capitol. Frosty luster rolls over minimally marked surfaces. Minute ticks within the lower part of the gown barely preclude an MS65 assessment. NGC ID# 26GF, PCGS# 9185

- 6228 1927 MS65 PCGS.** An impressively well-preserved Gem type coin, showing bold design elements and only a few minor contact marks on the high points of the devices. Frosty green-gold luster illuminates the fields. NGC ID# 26GG, PCGS# 9186

- 6229 1927 MS66 PCGS.** This plentiful type-coin issue becomes scarce above MS66. The present Premium Gem is satiny and yellow-gold with remarkably well-preserved surfaces. The strike is bold, and even Liberty's figure and the eagle show limited contact. PCGS has seen only 18 finer representatives (3/16). NGC ID# 26GG, PCGS# 9186

- 6230 1927 MS66+ PCGS.** A high-end Premium Gem representative of this popular Saint-Gaudens type issue, with well-preserved orange-gold surfaces that show a few hints of rose patina and vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is extraordinary. PCGS has graded 18 numerically finer examples (3/16). NGC ID# 26GG, PCGS# 9186

COMMEMORATIVE SILVER

- 6231 1893 Isabella Quarter MS65 PCGS.** Beautiful lilac-red and forest-green toning endows the peripheries of this lustrous and sharply struck Gem. The reverse field is golden-brown, and the devices are stone-gray. Ideal quality for the designated grade. NGC ID# BYJ9, PCGS# 9220

**1893 Isabella Quarter, MS66
Early Classic Commemorative**

- 6232 1893 Isabella Quarter MS66 PCGS.** Sharp and satiny with champagne-gray and mint-green toning on the obverse and amber-gold and aquamarine on the reverse; the deeper colors cling to the border regions. This Premium Gem Isabella quarter is free of distracting abrasions. Finer coins are scarce. The issue had a small distribution of 24,214 pieces, and high-end survivors are elusive. NGC ID# BYJ9, PCGS# 9220

**1893 Isabella Quarter, Toned MS66
Infrequently Seen Finer**

- 6233 1893 Isabella Quarter MS66 PCGS.** At a purchase price of \$1, the 1893 Isabella quarter had a distribution of only 24,214 pieces. The remaining 15,809 coins from the 40,023-piece mintage were melted. This Premium Gem survivor displays satiny luster and a sharp strike. Lavender-gray, champagne, and sea-green hues are blended over each side. PCGS lists 54 finer submissions (3/16). NGC ID# BYJ9, PCGS# 9220

- 6234 1900 Lafayette Dollar MS64 NGC. DuVall 3-D.** The AT in STATES on the obverse is boldly recut, a diagnostic of this scarce die variety. A precisely struck and coruscating Choice commemorative with dusky golden-brown and silver-gray toning. The fields are smooth, and Washington's cheek shows only incidental contact. NGC ID# BYKW, PCGS# 9222

- 6235 1900 Lafayette Dollar MS64 NGC. DuVall 2-C.** An available variety that shows the second S in STATES recut. This piece is devoid of major abrasions and boasts original, satiny luster. Much of each side is cast in soft champagne and ice-blue hues, while the peripheries have deeper olive and russet toning. Sharply struck throughout the devices. NGC ID# BYKW, PCGS# 9222

- 6236 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B.** A softly lustrous, near-Gem example of the only silver dollar in the classic commemorative series. A faint gray-gold patina restrains the underlying silver luster, yet the surfaces are free of all but a few tiny marks. A bold strike except at Lafayette's outstretched arm and boot. NGC ID# BYKW, PCGS# 9222

**1900 Lafayette Dollar, MS65
Outstanding Surface Preservation**

- 6237** 1900 Lafayette Dollar MS65 NGC. DuVall 1-B. An available variety, ideal for type purposes. This Gem Lafayette dollar displays clean surfaces and vibrant luster with warm champagne toning over each side. The strike is sharp, and eye appeal is outstanding. The Lafayette dollar is the only silver dollar in the classic commemorative series. Examples are collected by type and die variety. NGC ID# BYKW, PCGS# 9222

**1900 Lafayette Dollar, MS65
Attractively Toned and Lustrous**

- 6238** 1900 Lafayette Dollar MS65 NGC. DuVall 1-B. A Gem-graded type coin with satiny luster and bold design elements. The interiors show light golden toning, while the peripheries display deep sea-green, amber, and violet coloration. Lafayette dollars are in high demand as type coins but are also collected by die variety. This piece would serve well for both purposes. Finer examples are scarce. NGC ID# BYKW, PCGS# 9222

**1900 Lafayette Dollar, MS65
A Visually Impressive Type Coin**

- 6239** 1900 Lafayette Dollar MS65 PCGS. DuVall 2-C. The second S in STATES is broadly repunched on this variety. Delicate cream-silver surfaces exude dazzling luster, and an attentive strike emboldens the design elements. A few minuscule marks and faint reddish-gold hues are mentioned for accuracy, but the visual impression is that of a frosty and brilliant Gem. Overall, quite a pleasing commemorative dollar.
Ex: *The Silver Fox Collection* (Heritage, 7/2007), lot 1936. NGC ID# BYKW, PCGS# 9222

**1900 Lafayette Dollar, MS65+
Virtually Untoned**

- 6240** 1900 Lafayette Dollar MS65+ NGC. DuVall 2-C. Ex: Highland Collection. This MS65+ NGC-graded Lafayette dollar would form the capstone to a fine commemorative silver set along with the other outlier denomination, the Isabella quarter. Both sides show thoroughgoing satiny luster on surfaces that show no more than a touch of color at the rims. Census: 8 in 65+, 74 finer (2/16). NGC ID# BYKW, PCGS# 9222

- 6241** 1921 Alabama MS66 NGC. The conjoined portraits of Bibb and Kilby are relatively free of the tiny marks that plague the issue, and the strike on the eagle is particularly bold on the high-point upper leg. A speckling of soft, olive-gray patina confirms the original surfaces of this Premium Gem example, with vibrant silver luster providing plenty of eye appeal. NGC reports just eight numerically finer coins (2/16). NGC ID# BYF2, PCGS# 9224

- 6242** 1921 Alabama MS66 PCGS. CAC. Scarce in MS66, the 1921 Alabama Centennial half dollar is rare any finer. This CAC-endorsed example boasts well-struck motifs and luminous surfaces with hints of champagne toning and ice-blue color. PCGS records four Superb Gems finer (2/16). NGC ID# BYF2, PCGS# 9224

**1921 Alabama Half, Frosty MS66+
Few Known Finer**

- 6243** 1921 Alabama MS66+ PCGS. CAC. The Alabama Centennial half dollar is known both with and without a small 2x2 notation in the right obverse field. Both varieties are scarce in MS66 and are rare any finer. This example of the Plain variant boasts the coveted Plus designation for its exceptional Premium Gem quality — nearly fine enough to be considered for a Superb Gem assessment. The surfaces are frosty with a hint of ice-blue toning. Minor strike weakness occurs on the central reverse. PCGS lists four MS67 coins finer (3/16). NGC ID# BYF2, PCGS# 9224

- 6244** 1921 Alabama 2X2 MS66 NGC. This well-detailed Premium Gem displays impeccably preserved surfaces, with vibrant mint luster under shades of pale gold and lavender toning. Census: 95 in 66 (8 in 66+, 9 in 66 ★), 5 finer (3/16). NGC ID# BYEZ, PCGS# 9225

- 6245** 1937 Antietam MS67 PCGS. A collectible Superb Gem example of the Antietam Anniversary half dollar, showing satiny luster, sharp motifs, and light golden toning. PCGS lists 20 finer grading events, coins which are out of reach for many collectors (3/16). NGC ID# BYF4, PCGS# 9229

- 6246 1937 Antietam MS67 PCGS. CAC.** 30th Anniversary Green Label Holder. Beautiful cherry-red, lemon-gold, and apple-green toning endows the peripheries of this lustrous and nicely struck Civil War commemorative. A lens is required to locate the few unimportant signs of contact. NGC ID# BYF4, PCGS# 9229

**1937 Arkansas Half Dollar, MS67
None Finer at PCGS or NGC**

- 6247 1937 Arkansas MS67 PCGS.** 30th Anniversary Green Label Holder. Narrow crescents of dramatic iridescent toning frame the upper and lower borders on the obverse and complete encircle the reverse in deep shades of purple, red, and amber gold. Satiny luster glows from pearlescent-silver centers. A sharply struck Superb Gem with problem-free, attractive surfaces. Population: 14 in 67 (1 in 67+), 0 finer (3/16). NGC ID# BYFB, PCGS# 9241

- 6248 1936-S Bay Bridge MS67 PCGS. CAC.** Subtly frosted luster swirls on each side. The obverse remains largely silver-gray with gold, steel-blue, and claret border toning, but those hues embrace the entire reverse, providing strong visual appeal. Examples are conditionally rare any finer, with PCGS having awarded higher numeric grades to only 11 coins. CAC: 75 in 67, 3 finer (2/16). Ex: *New York Signature* (Heritage, 11/2013), lot 4816. NGC ID# BYFM, PCGS# 9254

- 6249 1938-D Boone MS67 PCGS. CAC.** The 1938-D Boone Bicentennial half dollar is scarce in MS67 and rarely seen finer. This CAC coin displays satiny luster and sharp design elements. Both sides have light champagne color. Population: 76 in 67 (7 in 67+), 5 finer; CAC: 36 in 67, 1 finer (3/16). NGC ID# BYG7, PCGS# 9275

- 6250 1938 Boone PDS Set MS67 PCGS. CAC.** The three coins are separately housed in identically graded and consecutively numbered PCGS holders, each bearing a green CAC seal. The lot includes: **1938**, lustrous and essentially immaculate with obverse peripheral orange-gold and rose-red toning; **1938-D**, well preserved and satiny with predominant ice-blue patina; and a **1938-S**, the coruscating almond-gold and pearl-white surfaces are uncommonly free from marks. (Total: 3 coins) NGC ID# BYG6, PCGS# 9277

- 6251 1925-S California MS67 PCGS. CAC.** One of the most recognizable and popular designs of the classic commemorative series. The obverse motif of a Forty-Niner panning for gold paired with a formidable grizzly bear on the reverse are fully struck and razor-sharp. Coruscating mint luster embellishes both sides, revealing vibrant blue, amber-gold, and ruby-red shades at the margins surrounding the vibrant silver centers. CAC endorsed. PCGS lists just six numerically finer examples (2/16). NGC ID# BYGA, PCGS# 9281

**1936-D Cincinnati Half, MS67
Subtly Toned, Strong Mint Luster**

- 6252 1936-D Cincinnati MS67 PCGS. CAC.** Ex: Scher-Young. Stephen Foster's idealized portrait was placed on the obverse of the Cincinnati, even though his association with the city was limited to being a bookkeeper at his brother's firm for three years in the 1840s. Nevertheless, the Cincinnati is among the classic series of commemorative halves, and this example is among the finest preserved. Each side displays light golden-rose and lilac shades with bright underlying mint luster. The surfaces are virtually abrasion-free. Population: 51 in 67 (8 in 67+), 2 finer (3/16). NGC ID# BYCK, PCGS# 9284

**1936-D Columbia Half Dollar, MS68
Incredible Patina and Surface Preservation**

- 6253 1936-D Columbia MS68 PCGS. CAC.** Ex: Scher-Young. Only 8,000 pieces were struck of this branch-mint issue, commemorating the state of South Carolina. None are certified finer at either service. The mint luster on this piece glows with frosted radiance, and each side has silver-aqua centers with light golden-rose accents around the margins. NGC ID# BYGD, PCGS# 9292

- 6254 1893 Columbian MS66 PCGS.** Vibrant lavender-red, apple-green, and golden-brown shades occupy a majority of this lustrous high-grade commemorative. The central reverse remains brilliant. Lustrous and well struck with a smooth reverse and scattered inoffensive obverse marks. NGC ID# BYGG, PCGS# 9297

**1893 Columbian Half Dollar, MS67
Lightly Toned and Attractive**

- 6255 1893 Columbian MS67 NGC.** A conditionally rare Superb Gem example of this debut commemorative half dollar type. The Columbian Exposition half dollars were struck dated 1892 and '93, and were distributed in 1893 for twice face value. This piece is a later strike, showing frosty luster instead of prooflike fields. The motifs are bold, and there are no obtrusive abrasions. Warm golden toning is seen over much of each side. Census: 36 in 67 (1 in 67+, 6 in 67 ★), 2 finer (2/16). NGC ID# BYGG, PCGS# 9297

**1893 Columbian Half, MS67
Attractive Multicolor Toning**

- 6256 1893 Columbian MS67 PCGS.** This beautifully toned Superb Gem 1893 Columbian half dollar is sharply struck and conditionally rare at this grade level. No finer coins are seen by PCGS. Blended rainbow hues adorn the border regions, leaving the interiors with light golden toning. Eye appeal is superb. Population: 27 in 67 (3 in 67+), 0 finer (3/16). NGC ID# BYGG, PCGS# 9297
- 6257 1935 Connecticut MS67 NGC.** A spectacular Superb Gem specimen of this popular silver commemorative, with well-detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces show delicate hints of champagne-gold toning. Census: 98 in 67 (4 in 67+, 12 in 67 ★), 1 finer (3/16). NGC ID# BYGH, PCGS# 9299
- 6258 1936 Elgin MS67+ PCGS.** 30th Anniversary Green Label Holder. This Plus-graded Superb Gem displays well-detailed design elements and intense satiny mint luster, under shades of lavender-gray and golden-brown toning. PCGS has graded seven numerically finer examples (3/16). NGC ID# BYGL, PCGS# 9303
- 6259 1922 Grant With Star MS64 NGC.** The scarcer With Star variant of the Grant Memorial half dollar. This Choice example displays satiny yellow-gold surfaces with iridescence in the toning. The high point of Grant's hair is ill-defined, as usual. No major abrasions are present. NGC ID# BYPP, PCGS# 9307

**1922 Grant With Star Half Dollar
High-End Gem Example**

- 6260 1922 Grant With Star MS65+ NGC.** The NGC Census reports more than 220 Grant With Star half dollars at the MS65 level, yet a mere two coins have received the Plus designation and two others display the NGC Star, while 67 pieces are awarded a numerically finer grade (2/16). This Plus-graded example is sharply defined with lustrous, silver surfaces and a faint glimpse of golden toning on the high points. Die polish lines capture and project the bold mint luster throughout both sides. NGC ID# BYPP, PCGS# 9307
- 6261 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** Lightly cleaned, as are many examples of this better classic commemorative half dollar. The strike is well executed, and there are no detracting abrasions. A hint of olive toning appears on each side at certain angles. NGC ID# BYGR, PCGS# 9309
- 6262 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** Boldly struck and free of obtrusive abrasions, this Hawaiian Sesquicentennial half dollar displays unnaturally bright surfaces from light cleaning, although a hint of champagne toning has since emerged onto each side. A budget-friendly type coin. NGC ID# BYGR, PCGS# 9309
- 6263 1928 Hawaiian MS62 ANACS.** Certified in an old-style ANACS white holder, this appealing rose-gray Hawaiian half dollar may provide just the entree some collector needs to fill the hole in a set with the key to the commemorative half series in a relatively affordable grade. Minimal silver areas appear along with some dark-brown tiny toning flecks. There are few signs of contact, but the grade is likely explained by the rather drab luster. NGC ID# BYGR, PCGS# 9309
- 6264 1928 Hawaiian MS62 PCGS.** An impressive MS62 example of the most sought-after issue in the classic silver commemorative series, this piece offers well-detailed design elements and lustrous, lightly toned surfaces that show the minimum number of minor contact marks for the grade. NGC ID# BYGR, PCGS# 9309
- 6265 1928 Hawaiian MS64 PCGS.** A spattering of russet and olive toning blankets both sides of this Choice Hawaiian half dollar, overlying pearl-gray undertones. The strike is bold, and any grade-limiting abrasions are hidden in the patina. One of the scarcer issues in the classic commemorative series. NGC ID# BYGR, PCGS# 9309
- 6266 1921 Missouri MS65 NGC.** A boldly struck Gem Missouri Centennial half dollar, displaying thick, original mint luster that glows on the surfaces. There are no bothersome abrasions. Gold and russet hues appear around the border, contrasting with frost-white interiors. NGC lists 38 finer representatives (2/16). NGC ID# BYH2, PCGS# 9330
- 6267 1923-S Monroe MS66 PCGS. CAC.** Dappled shades of sea-green, lavender-gray, and jade toning visit the well-preserved surfaces of this impressive Premium Gem, with intense satiny mint luster underneath. Population: 94 in 66 (11 in 66+), 6 finer (3/16). NGC ID# BYH4, PCGS# 9333

- 6268 1938 New Rochelle MS67+ PCGS.** Glistening luster illuminates the satiny surfaces of this high-end New Rochelle commemorative half dollar. The strike is bold, and the fields are beautifully preserved. The obverse showcases a smattering of lilac, lavender, and mint-gold peripheral toning around a silver-gray center, while the reverse has a brilliant interior with tab-toned borders in olive-gold, ice-blue, and mint-green. PCGS lists six finer representatives (3/16). NGC ID# BYDX, PCGS# 9335

**1925 Thick Planchet Norse Medal, MS66+
One of Two at PCGS, Impeccable Preservation**

- 6269 1925 Norse Silver Medal, Thick Planchet MS66+ PCGS. CAC.** The Norse silver medals of the Thick Planchet variant were struck in an amount nearly six times larger than the Thin Planchet silver pieces — although Anthony Swiatek has written that 2,000 may have been later melted at the Mint. Even if true, that would leave 31,750 pieces for the Thick compared to the much-rarer Thin medals at 6,000 struck. In any case, this Thick Planchet medal is one of only two such at PCGS, an example of stunning quality. Most of each side is rose-gray, impeccably preserved, and shows a crescent of amber-honey rim patina. For the many collectors who would like to obtain a single Norse silver medal for type purposes, this would make an excellent choice. Population: 43 in 66 (2 in 66+), 1 finer. CAC: 23 in 66, 1 finer (3/16).
From The Paul Denby Collection. NGC ID# 2WHM, PCGS# 9450

**1925 Norse Silver Medal, Thin Planchet
Colorfully Toned MS66
Elusive in High Grades**

- 6270 1925 Norse Medal, Thin Planchet MS66 PCGS. CAC.** Although they are technically medals, the Norse pieces with their Thin and Thick Planchet variants have been actively collected alongside their coin counterparts for many years. Many numismatic purists do not cover them in their standard references, however, although such a stance seems a bit prim and proper for our taste.

To commemorate the 1825 arrival of 53 Norwegian immigrants aboard the ship *Restaurationen*, the Philadelphia Mint struck 33,750 of the Thick Planchet silver medals; 6,000 of the Thin Planchet silvers; and 100 medals in gold. Note that the Thin Planchet medals had a mintage about one-sixth as large as the Thick Planchets and are *far more elusive in high grades*.

The present Thin Planchet Premium Gem boasts the most attractive colorful toning we have ever seen on this issue. It is also a plate coin on PCGS' CoinFacts site. A rainbow of deep pastel colors is more prominent at the rims, with limited areas of central silver-white. The surfaces appear essentially free of mentionable defects. Marvelous eye appeal. Population: 8 in 66, 0 finer. CAC: 5 in 66, 0 finer (2/16).

From The Paul Denby Collection. NGC ID# 2WHM, PCGS# 9451

**1936 Oregon Trail Half, MS68
Lightly Toned and Impeccably Preserved**

- 6271 1936 Oregon MS68 NGC. CAC.** Silver, amber-gold, and rose hues dominate the obverse more heavily than the reverse, but both sides are impeccably preserved, even the high points of the Indian and the covered wagon admirably distraction-free. Only a small handful at each service will reach this MS68 grade level. Census: 6 in 68 (1 in 68 ★), 0 finer. CAC: 11 in 68, 0 finer (2/16). NGC ID# BYHB, PCGS# 9345

- 6272 1915-S Panama-Pacific MS65+ PCGS.** This high-end Gem Pan-Pac half dollar displays lovely original toning. The obverse has an oblong area of brilliance in the center with bronze-gold, olive-green, lavender, and amber toning above and below. The reverse is mostly toned champagne but with border colors that match those of the obverse. The strike is bold, and there are no significant abrasions. NGC ID# BYHP, PCGS# 9357

- 6273 1915-S/S Panama-Pacific, FS-501, MS64 PCGS.** The mintmark is repunched east, apparent near the upper serif. A satiny pearl-gray example with unabraded surfaces and slight incompleteness of strike on the eagle's neck. NGC ID# BYHP, PCGS# 145748 Base PCGS# 9357

- 6274 1935 Spanish Trail MS65 PCGS. CAC.** Seldom does one find an example of this conditionally difficult commemorative issue that displays such pristine preservation in the broad, exposed fields. This lustrous, well-struck Gem shows only a few trivial ticks concealed in the upper obverse and an unobtrusive mark in the southeastern corner of Alabama. Glints of light gold appear at the margins. A great coin for the grade and CAC-endorsed, to boot. NGC ID# BYJ5, PCGS# 9376

**1936 Texas Centennial Half, MS68
Magnificent Surface Quality**

- 6275 1936 Texas MS68 NGC.** A magnificently preserved example of this third-year Texas commemorative issue, one of 8,911 pieces distributed (including assay coins). Dappled amber-gold and silver-gray toning covers the obverse, while on the reverse, the former color appears mostly at the upper rim, along with olive. Well-struck with lustrous and exquisitely preserved surfaces. Census: 8 in 68 (2 in 68 ★, 1 in 68+★), 1 finer (3/16).
Ex: Houston Signature (Heritage, 12/2010), lot 4106. NGC ID# BYJE, PCGS# 9386

- 6276 1937-S Texas MS67 PCGS. CAC.** Dusky shades of sea-green, magenta, and amber toning visit the well-preserved surfaces of this impressive Superb Gem, with well-detailed design elements and satiny mint luster underneath. PCGS has graded only one numerically finer example (3/16). NGC ID# BYJK, PCGS# 9392

**1927 Vermont Half Dollar, MS67
Only One Finer Coin at PCGS**

6277 1927 Vermont MS67 PCGS. Champagne toning accents the satiny surfaces of this Superb Gem Vermont Sesquicentennial half dollar, although deeper olive hues emerge along the left obverse border. The strike is bold, and there are only a few faint grazes seen beneath a loupe. Scarce this fine and almost uncollectible finer. Population: 44 in 67 (2 in 67+), 1 finer (3/16). NGC ID# BYJR, PCGS# 9401

6278 1949 Booker T. Washington MS67 PCGS. The 1949 Booker T. Washington half dollar claims a small net distribution of just 6,004 pieces, and this magnificent Superb Gem is one of the finest survivors. The design elements are sharply detailed and the well-preserved, lustrous surfaces display attractive hints of pale gold toning. Population: 27 in 67, 0 finer (2/16). NGC ID# BYK3, PCGS# 9416

**1952-S Washington-Carver Half, MS67
Low-Distribution Issue in Top Grade**

6279 1952-S Washington-Carver MS67 PCGS. CAC. A peripheral ring of deep russet-jade patina frames untuned silvery centers on the obverse of this remarkably well-preserved Superb Gem Washington-Carver half dollar, the effect somewhat less on the reverse. Mentionable high-point abrasions are notably lacking. The net distribution for the 1952-S series issue was among the lowest. Population: 9 in 67, 0 finer. CAC: 14 in 67, 0 finer (2/16). NGC ID# BYL5, PCGS# 9436

**1952-S Washington-Carver Half Dollar
Splashes of Orange-Gold Color, MS67**

6280 1952-S Washington-Carver MS67 NGC. CAC. Even while available in lower grades, the 1952-S Washington-Carver half dollar is a significant condition rarity in Superb Gem condition. This piece is well-struck and free of distractions. A pale golden-gray hue encompasses much of each side, with deeper orange-gold splashes of color near the margins. Census: 16 in 67 (2 in 67+, 3 in 67 ★), 1 finer (3/16). NGC ID# BYL5, PCGS# 9436

COMMEMORATIVE GOLD

6281 1903 Louisiana Purchase Jefferson Gold Dollar MS66 PCGS. CAC. 30th Anniversary Green Label Holder. A spectacular Premium Gem example of this early gold commemorative issue, with sharply detailed design elements and vibrant mint luster. The peach-gold surfaces show no mentionable distractions, even on close inspection. NGC ID# BYLD, PCGS# 7443

6282 1903 Louisiana Purchase Jefferson Gold Dollar MS66+ PCGS. CAC. A beautiful high-grade gold commemorative bathed in rich lime-green and orange toning. Cartwheel luster dominates essentially flawless surfaces. The strike is good save for blending on a few reverse dentils and the HA in PURCHASE. NGC ID# BYLD, PCGS# 7443

**1903 Louisiana Purchase Gold Dollar, MS67
Jefferson Obverse**

6283 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 NGC. The first official United States commemoratives in gold were the 1903 Louisiana Purchase gold dollars featuring portraits of Jefferson and McKinley on two separate issues. This Superb Gem Jefferson coin displays a bold strike and rich orange-gold luster with outstanding eye appeal. Census: 92 in 67 (2 in 67+, 2 in 67 ★), 1 finer (3/16). NGC ID# BYLD, PCGS# 7443

**1903 Louisiana Purchase Gold Dollar, MS67
Jefferson Portrait**

6284 1903 Louisiana Purchase Jefferson Gold Dollar MS67 PCGS. This bright wheat-gold Louisiana Purchase-Jefferson gold dollar is in the highest grade for the issue obtainable at PCGS (and virtually so at NGC as well), a highly lustrous and problem-free example with great eye appeal. The 1903 gold dollars marked the first commemoratives of the new denomination. Only two pieces in MS67+ are marginally finer at PCGS (3/16). Ex: Long Beach Signature (Heritage, 9/2015), lot 5446. NGC ID# BYLD, PCGS# 7443

**1903 Louisiana Purchase Gold Dollar, MS67
Jefferson Obverse, Scarce So Fine**

- 6285** 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 NGC. A beautifully preserved Superb Gem example of this debut classic commemorative gold issue. Many examples from the 17,500-coin distribution were mishandled by their owners, acquiring small marks and hairlines. In pristine condition, this piece is highly sought-after. The strike is sharp, and the surfaces show radiant yellow-gold luster. Census: 92 in 67 (2 in 67+, 2 in 67 ★), 1 finer (2/16). NGC ID# BYLD, PCGS# 7443

- 6286** 1903 Louisiana Purchase McKinley Gold Dollar MS66 PCGS. CAC. The brightly lustrous orange-gold surfaces of this delightful Premium Gem show no mentionable distractions and the design elements are sharply detailed throughout. Overall eye appeal is terrific. NGC ID# BYLE, PCGS# 7444

- 6287** 1903 Louisiana Purchase McKinley Gold Dollar MS66+ PCGS. 30th Anniversary Green Label Holder. A Plus-graded Premium Gem, with sharply defined design elements and impeccably preserved orange-gold surfaces that show vibrant mint luster and a few hints of rose patina. NGC ID# BYLE, PCGS# 7444

**1903 McKinley Gold Dollar, MS67+
Louisiana Purchase issue**

- 6288** 1903 Louisiana Purchase McKinley Gold Dollar MS67+ PCGS. CAC. A virtually unimprovable example, showing flawless fields, lovely rose-gold luster, and razor-sharp design elements. Both McKinley and Jefferson were portrayed on the 1903 Louisiana Purchase Exposition gold dollars. Neither variety is particularly more elusive than the other, although both are scarce in Superb Gem condition. PCGS has seen two finer examples of the McKinley issue. CAC: 55 in 67, 0 finer (3/16). NGC ID# BYLE, PCGS# 7444

- 6289** 1903 Louisiana Purchase, McKinley, MS64 Prooflike NGC. The 1903 McKinley gold dollar is seldom seen with the Prooflike designation. This attractive Choice example exhibits sharply detailed design elements, with well-preserved lemon-yellow surfaces and deeply reflective fields. Census: 2 in 64 Prooflike, 3 finer (3/16). NGC ID# BYLE, PCGS# 77444

- 6290** 1904 Lewis and Clark Gold Dollar MS64 NGC. An affordable type-coin example of the Lewis and Clark Centennial Exposition gold dollar, dated 1904. The central devices are well-defined, and the yellow-gold fields show partial reflectivity. Faint hairlines are the only grade-limiting factor, although a small, curved strike-through is noted on William Clark's cheek. NGC ID# BYLE, PCGS# 7447

**1904 Lewis and Clark Gold Dollar, MS65
Attractive Luster**

- 6291** 1904 Lewis and Clark Gold Dollar MS65 PCGS. For type purposes, the 1904 Lewis and Clark gold dollar is slightly more plentiful in high grade than its 1905 counterpart. This Gem representative displays excellent detail and softly frosted luster. A few faint lines in the yellow-gold fields are all that preclude an even finer grade. Distributed in 1905 to the limited extent of 10,025 coins, including assay pieces. NGC ID# BYLE, PCGS# 7447

- 6292** 1905 Lewis and Clark Gold Dollar MS64 PCGS. An attractive Choice example of this early gold commemorative, with sharply detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster. Eye appeal is outstanding. NGC ID# BYLG, PCGS# 7448

- 6293** 1905 Lewis and Clark Gold Dollar MS64 PCGS. Lustrous and satiny, this 1905 Lewis and Clark Centennial Exposition gold dollar displays bright yellow-gold luster with a few minor hairlines that limit the grade. The strike is slightly soft on the top of Lewis' head, but the eye appeal is hardly affected. NGC ID# BYLG, PCGS# 7448

- 6294** 1905 Lewis and Clark Gold Dollar MS64 NGC. The Charles E. Barber design was inspired by the works of Charles Willson Peale, featuring the profiles of frontier explorers Meriwether Lewis and William Clark. Struck in both 1904 and 1905, this deeply lustrous and frosty example of the 1905 issue is scarce in Gem or finer condition, making high-quality near-Gem coins such as the present example in high demand. Sharply struck on a decent planchet with only minor roughness at the legends. NGC ID# BYLG, PCGS# 7448

1905 Lewis and Clark Dollar, MS64+

- 6295** 1905 Lewis and Clark Gold Dollar MS64+ PCGS. CAC. A high-end Choice example of this popular gold commemorative, from a distribution of 10,000 pieces, this coin displays sharply detailed design elements and lightly marked orange-gold surfaces that show a mix of vibrant mint luster and prooflike reflectivity in selected areas. Eye appeal is outstanding. NGC ID# BYLG, PCGS# 7448

1905 Lewis and Clark Gold Dollar, MS65

- 6296** 1905 Lewis and Clark Gold Dollar MS65 NGC. From a distribution of 10,000 pieces, the 1905 Lewis and Clark gold dollar is more elusive than the 1904-dated issue. This attractive Gem offers well-detailed design elements, with just a touch of softness on Lewis' hair, and well-preserved orange-gold surfaces with vibrant mint luster throughout. NGC has graded 57 numerically finer examples (3/16). NGC ID# BYLG, PCGS# 7448

1905 Lewis and Clark Gold Dollar
Satin Gem

- 6297** 1905 Lewis and Clark Gold Dollar MS65 PCGS. The 1905 Lewis and Clark Centennial Exposition held in Portland, Oregon celebrated the 100th anniversary of the famous explorers' journey into the West. Souvenir gold dollars were specially produced for the event, dated 1904 and 1905. This is a Gem example of the latter date, showing bold detail and satiny orange-gold luster. Elusive any finer. NGC ID# BYLG, PCGS# 7448

- 6298** 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. An attractive CAC-endorsed Gem with satiny yellow-gold luster and outstanding eye appeal. The strike is bold, and only a few stray lines on the obverse limit the grade. An accessible type coin. NGC ID# BYLH, PCGS# 7449

- 6299** 1915-S Panama-Pacific Gold Dollar MS65+ PCGS. The smallest — and most affordable — of four gold commemoratives issued in conjunction with the Panama-Pacific International Exposition held in San Francisco in 1915. This high-end Gem gold dollar displays a bold strike and satiny yellow-gold luster. NGC ID# BYLH, PCGS# 7449

- 6300** 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Eye appeal is only part of the attraction for this Panama-Pacific gold dollar, since the strike is first-rate and both sides display attractive, golden-wheat luster. The surfaces are remarkably pristine even for the Premium Gem level. Just 67 pieces are numerically finer at PCGS (2/16). NGC ID# BYLH, PCGS# 7449

- 6301** 1915-S Panama-Pacific Gold Dollar MS66+ PCGS. A sharp, Plus-graded Premium Gem example of this popular Panama-Pacific International Exposition souvenir dollar. Rich honey-gold luster blankets each side, and the eye appeal is outstanding. Scarcely seen finer. NGC ID# BYLH, PCGS# 7449

1915-S Panama-Pacific Quarter Eagle
Collectible MS64 Example

- 6302** 1915-S Panama-Pacific Quarter Eagle MS64 NGC. Light handling marks on the high points of the devices deny a Gem grade for this Panama-Pacific quarter eagle, but the eye appeal is hardly affected. Satiny golden luster emerges from the fields, and the strike is sharp. A budget-friendly example from a distribution of 6,749 pieces. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle
Pleasing, Near-Gem Example

- 6303** 1915-S Panama-Pacific Quarter Eagle MS64 NGC. This attractive, near-Gem example is deeply frosty and Choice, with glowing wheat-gold color that exudes mint luster. The distribution of the Pan-Pac quarter eagle was just 6,749 pieces. Many survive, but relatively few will match the eye appeal of the present coin, which shows a few light abrasions at the upper left obverse (visible with a lens) that define the grade. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle
Satin MS65

- 6304** 1915-S Panama-Pacific Quarter Eagle MS65 NGC. The first of only two quarter eagle issues in the classic commemorative series, issued in conjunction with the Panama-Pacific International Exposition held in San Francisco in 1915. This Gem example displays satiny yellow-gold luster and bold design elements. Swirling die polishing lines — a characteristic of this issue — reside in the fields. NGC ID# BYLP, PCGS# 7450

**1915-S Two and a Half, MS65
Panama-Pacific International Exposition**

- 6305 1915-S Panama-Pacific Quarter Eagle MS65 PCGS.** Fully struck and coruscating with exemplary preservation and excellent eye appeal. The peach-gold toning is comprehensive aside from a glimpse of struck-in grease on the reverse margin at 4:30. The fanciful obverse design, designed by Chief Engraver Charles Barber, shows Columbia holding a caduceus and riding sidesaddle on a hippocampus. NGC ID# BYLK, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS66

- 6306 1915-S Panama-Pacific Quarter Eagle MS66 PCGS.** The 1915-S Panama-Pacific quarter eagle claims a modest distribution of 6,749 pieces, struck to commemorate the opening of the Panama Canal and the recovery of San Francisco, after the 1906 earthquake. This attractive Premium Gem displays well-detailed design elements and well-preserved, lustrous orange-gold surfaces. PCGS has graded 40 numerically finer examples (2/16). NGC ID# BYLK, PCGS# 7450

**1915-S Pan-Pac Quarter Eagle, Two-Toned MS67
Popular Commemorative Gold Type**

- 6307 1915-S Panama-Pacific Quarter Eagle MS67 NGC.** The 1915-S Pan-Pac quarter eagle is popular as the largest commemorative gold coin of the famed exposition that is actually affordable by most collectors (and it helps that the design is an attractive one). The excellent preservation on this Superb Gem complements two-toned honey-gold and amber-gold patina, an extremely nice coin. Minimal strike weakness on a couple of central details is little more than a quibble. NGC ID# BYLK, PCGS# 7450

- 6308 1916 McKinley Gold Dollar MS66+ NGC.** Freshly encapsulated in one of the new-style NGC holders, this high-end Premium Gem McKinley gold dollar offers splendid eye appeal via well-struck orange-gold surfaces that show a notable paucity of abrasions. Census: 5 in 66+, 1 in 66 ★, 81 finer (3/16). NGC ID# BYLK, PCGS# 7454

- 6309 1916 McKinley Gold Dollar MS67 NGC.** This magnificent Superb Gem exhibits well-detailed design elements and impeccably preserved orange-gold surfaces with vibrant mint luster on both sides. Overall eye appeal is terrific. Census: 80 in 67 (3 in 67+, 2 in 67 ★), 1 finer (3/16). NGC ID# BYLK, PCGS# 7454

- 6310 1916 McKinley Gold Dollar MS67 PCGS.** Subtle peach-gold and lime-green shades ensure the originality of this needle-sharp and immaculate Superb Gem. The McKinley Memorial gold dollar was the second commemorative type to feature the martyred President. Population: 95 in 67 (2 in 67+), 0 finer (3/16). NGC ID# BYLK, PCGS# 7454

- 6311 1916 McKinley Gold Dollar MS67 PCGS.** This satiny wheat-gold McKinley gold dollar is among the finest at PCGS and is conditionally scarce as such. The Superb Gem-quality surfaces yield rich luster and color without interruption. The strike is bold. Population: 95 in 67 (2 in 67+), 0 finer (3/16). NGC ID# BYLK, PCGS# 7454

- 6312 1917 McKinley Gold Dollar MS65 PCGS.** A glittering Gem, this superbly lustrous McKinley gold dollar exudes eye appeal with a razor-sharp strike over exceptional frosty, yellow-gold surfaces. The bareheaded profile of McKinley is sharp at the temple and above the ear, while the flagpole and steps are equally bold. NGC ID# BYLL, PCGS# 7455

- 6313 1917 McKinley Gold Dollar MS66 PCGS.** Splendid orange-gold patina complements surfaces bursting with brilliant luster on this attractive 1917 McKinley dollar, an issue markedly more elusive, grade for grade, than its 1916 counterpart. This piece is both well-struck and well-preserved. NGC ID# BYLL, PCGS# 7455

- 6314 1922 Grant Gold Dollar, No Star, MS66 NGC.** The bareheaded portrait of Ulysses S. Grant shows sharp definition on this lustrous and attractive Grant Memorial gold dollar. It is the No Star variety, struck in the same quantity (5,016 pieces) as its With Star counterpart, although the No Star is slightly scarcer across the board. The vibrant Premium Gem surfaces reveal no significant marks to mention and the eye appeal is excellent. NGC ID# BYLN, PCGS# 7458

- 6315 1922 Grant Gold Dollar, No Star, MS66 PCGS. CAC.** A sharp No Star Grant gold dollar with unabraded, lemon-gold luster that glows beneath a light. The Grant Memorial series consists of four issues, including the half dollar in No Star and With Star formats, and the gold dollar in the same. A popular and easily collectible subset of the classic commemorative series. NGC ID# BYLN, PCGS# 7458

- 6316 1922 Grant Gold Dollar, With Star, MS65+ NGC.** The birthplace of Ulysses S. Grant — a simple frame house located in Point Pleasant, Ohio — provides the reverse motif for the Grant Memorial gold dollars, as well as for the identically designed commemorative half dollars. The tree-framed home is not to be confused with Grant's Cabin (nicknamed "Hardscrabble"), built with Grant's own hands near St. Louis, Missouri and now located at nearby Grant's Farm. This Plus-graded Gem gold dollar displays the Star insignia with plentiful eye appeal and well-struck elements throughout, a high-end example of the type. NGC ID# BYPS, PCGS# 7459

- 6317 1922 Grant Gold Dollar, With Star, MS66 PCGS.** Intricate detail emerges from the frosty, mint-fresh surfaces of this Premium Gem Grant Memorial gold dollar. Luminous yellow-gold hues encompass much of each side but yield to rose and honey coloration in the central reverse. An eye-appealing type coin. NGC ID# BYPS, PCGS# 7459

- 6318 1922 Grant Gold Dollar, With Star, MS66 PCGS. CAC.** This Premium Gem With Star Grant Memorial gold dollar is impressively sharp and well-preserved. The yellow-gold surfaces display rich original luster. Finer examples become increasingly elusive in succeeding grades. NGC ID# BYPS, PCGS# 7459

6319 1922 Grant Gold Dollar, With Star, MS66 PCGS. CAC. A lovely green-gold representative of Laura Gardin Fraser's multi-denominational design. A loupe reveals only minuscule imperfections. As always, the strike is incomplete on the tree trunk near the frame house window. NGC ID# BYPS, PCGS# 7459

6320 1922 Grant Gold Dollar, With Star, MS66 PCGS. CAC. A luminous yellow-gold example of the With Star Grant Memorial gold dollar, displaying sharp design elements and unabraded surfaces. The CAC-endorsed, Premium Gem-quality surfaces are especially pleasing. Finer coins are infrequently offered. NGC ID# BYPS, PCGS# 7459

6321 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Finer examples of this final classic commemorative gold issue are elusive. This Gem is well-struck and displays frosty yellow-gold luster over unabraded surfaces. The Sesquicentennial quarter eagle is one of two issues celebrating the 150th anniversary of American independence, the other being a half dollar. NGC ID# 2FE9, PCGS# 7466

6322 1926 Sesquicentennial Quarter Eagle MS65 PCGS. More Sinnock-designed 1926 Sesquicentennial quarter eagles were distributed than any other classic gold commemorative (46,019 coins). This frosty Gem is boldly defined and devoid of distracting impairments. Straw-gold color dominates each side with complementary accents of rose and orange-gold on the obverse and reverse, respectively. NGC ID# 2FE9, PCGS# 7466

6323 1926 Sesquicentennial Quarter Eagle MS65 NGC. This Sesquicentennial quarter eagle is well-struck for the issue, as the design elements were produced in low relief to begin with. Warm yellow-gold luster graces each side with just a few faint grazes, primarily on the obverse, limiting the grade. NGC ID# 2FE9, PCGS# 7466

6324 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Elusive in Gem or finer grades, the Sesquicentennial quarter eagles typically show impaired luster and signs of handling. This Gem example bucks the trend, with vibrant and frosty luster over sharply struck, greenish-gold surfaces. There are no distracting marks, alloy stains, or similar problems that plague the issue. The eye appeal is terrific. NGC ID# 2FE9, PCGS# 7466

6325 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Glowing orange-gold and lilac hues adorn the centers of this Gem Sesquicentennial quarter eagle, while the peripheries exhibit lighter yellow-gold color. Luster is frosty and the strike is sharp. Eye appeal exceeds expectations for the grade. NGC ID# 2FE9, PCGS# 7466

6326 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Though most Sesquicentennial quarter eagles fall shy of the Gem designation, this butter-yellow coin hits the mark. Impressively lustrous surfaces are suitably well-preserved, as are the crisply detailed central devices. A great example of one of the most famous conditionally elusive commemoratives.

Ex: Long Beach Signature (Heritage, 5/2008), lot 1621; Houston Signature (Heritage, 12/2008), lot 1709. NGC ID# 2FE9, PCGS# 7466

TERRITORIAL GOLD

6327 1831-34 C. Bechtler Dollar, 30G. — Repaired — PCGS Genuine. AU Details. K-1, R.4. Significant as the first and the heaviest of the Bechtler gold dollars, the K-1 at 30 grains was struck from North Carolina gold at the equivalent of 100.98% of the federal standard. A noticeable area of smoothing exists beneath ONE on the reverse of this slightly bulged example, with a few additional planchet irregularities and lines. Otherwise, the coin is well-centered with sharp motifs. Orange accents at the margins accompany the bright, yellow-gold coloration. Listed on page 380 of the 2016 *Guide Book*.

6328 (1837-42) C. Bechtler Dollar, N Reversed — Bent — PCGS Genuine. AU Details. K-4, R.4. A bright and lustrous sun-gold representative of the private Southern gold coiner. The surfaces are wavy but virtually unworn. A vertical crack passes through the I in CAROLINA. The reversed N in ONE is the most prominent engraving blunder in the Bechtler series. Listed on page 381 of the 2016 *Guide Book*. NGC ID# 2B98, PCGS# 10055

(1837-42) C. Bechtler Five, AU Details Rare K-23 Variant

6329 (1837-42) C. Bechtler Five Dollar, RUTHERF. — Obverse Planchet Flaw — NCS. AU Details. K-23, R.5. GEORGIA GOLD obverse, RUTHERF reverse. The K-23 Bechtler five is a rare variety in all grades and conditions. This impressive specimen shows little actual wear, but a bisecting planchet flaw on the obverse (as struck) prevents the coin from receiving a grade. The orange-gold surfaces are lightly abraded and retain traces of original mint luster. A rim bruise is evident at 11 o'clock on the obverse. Listed on page 382 of the 2016 *Guide Book*. NGC ID# 2B9W, PCGS# 10109

1849 Moffat & Co. Ten Dollar, VF Details Rare K-5 Variant

6330 1849 Moffat & Co. Ten Dollar, "Ten D." — Repaired — PCGS Genuine. VF Details. K-5, R.6. Moffat & Co. issued ten dollar gold pieces in two varieties in 1849, one with the denomination expressed as TEN DOL. and the other as TEN D. This well-worn example represents the more elusive K-5 variety, with the TEN D. inscription. The design elements remain intact in outline and all lettering is legible. A shallow gouge below the date constitutes the noted damage. Listed on page 384 of the 2016 *Guide Book*. NGC ID# ANJ7, PCGS# 10249

**1853 Assay Office Twenty, AU53
900 Thous., K-18, Natural Appeal**

- 6331** 1853 Assay Office Twenty Dollar, 900 Thous. AU53 PCGS K-18, R.2. Mint luster shines from the margins and within the eagle's wing feathers, while abrasions are relatively minor across the surfaces of this lightly circulated Assay Office twenty. The greenish-gold color of California Gold Rush bullion gives the coin natural appeal. Bagmarks are few and widely distributed across the surfaces, with a few tiny rim hits noted but no major cuts or dings. Listed on page 388 of the 2016 *Guide Book*. NGC ID# ANHD, PCGS# 10013

**1853 Assay Office Twenty, AU55
900 Thous., Kagin-18 Variety**

- 6332** 1853 Assay Office Twenty Dollar, 900 Thous. K-18, R.2, AU55 PCGS. CAC. The early California private minter Moffat & Company had fully morphed into the U.S. Assay Office of Gold in 1852, or at least so it seemed, although ongoing disputes with the Treasury Department made the relationship a tenuous one. Although new equipment received by the Assay Office provided the capacity to mint 36,000 twenty dollar gold pieces per day, shortages of parting acids made conforming to the legal .900 THOUS fineness mandate difficult.

Coin shortages were so severe that in the middle of 1853, Augustus Humbert prepared to strike 880 THOUS gold eagles and double eagles in defiance of the law. Before many were issued, supplies arrived and most of the illegal coins were recoined at the correct fineness, and the dies modified to 900 THOUS. The current example shows the overdigits 9 and 0 replacing the two underdigit 8s. This Choice About Uncirculated piece displays apricot-gold color with orange accents. The surfaces are smooth and unmarked except for three tiny "test cuts" at the rim — one on the obverse, the others on the reverse. Ample luster remains.

From *The Indian Rocks Collection*. NGC ID# ANHD, PCGS# 10013

**1850 Mormon Five Dollar, XF Details
K-5, Significant Territorial Issue**

- 6333** 1850 Mormon Five Dollar — Mount Removed — NGC Details. XF K-5, High R.5. The Mormon gold coinage was struck at the Deseret Mint set up in the home of dentist Dr. William Sharp in Salt Lake City. Donald Kagin explains that it is uncertain when the 1850 five dollar gold coins were minted, but production probably occurred shortly after March 15. This bright orange-gold example retains bold detail on each side. The reverse legends are clear, while evidence of soldering obscures THE, (L)OR(D), and (H)OL(INESS) on the obverse. Listed on page 397 of the 2016 *Guide Book*.

- 6334** 1861 Clark, Gruber & Co. Quarter Eagle — Device Engraved — PCGS Genuine. XF Details. K-5, R.4. The boom years for the Colorado Gold Rush occurred almost a decade after the California Gold Rush. This quarter eagle by the Denver private minter Clark, Gruber & Co. displays Pikes Peak on the coronet. As usual, the piece was softly impressed at the centers, where the reverse eagle shows undisguised re-engraving — more like a piece of folk art than any kind of deception or subterfuge. The yellow-gold surfaces are lightly pitted and cleaned. Listed on page 399 of the 2016 *Guide Book*.

**1861 Clark, Gruber & Co. Five, VF35
Copper Die Trial, K-10c**

- 6335** 1861 Clark, Gruber \$5 Copper Die Trial VF35 PCGS. K-10c, R.7. Struck in copper with a reeded edge. This coin is a die trial struck from the regular-issue dies for the 1861 five dollar gold piece of Clark, Gruber & Company. It is most unusual to find a worn specimen, since the copper composition would make it impossible for such a piece to mistakenly circulate as a gold example. This Choice VF specimen retains three quarters of its interior design detail and the olive-brown surfaces show only minor abrasions, suggesting this coin was carried as a pocket piece. Population: 1 in 35, 8 finer (3/16). NGC ID# ANLV, PCGS# 10151

CALIFORNIA FRACTIONAL GOLD

- 6336** 1853 Liberty Octagonal Dollar, BG-514, High R.5, MS63 NGC. A sharply struck, smooth, and semiprooflike canary-gold example. M. Deriberpie is listed as an engraver in an 1853 San Francisco business directory. He signed many of his dies as DERI or DERIB, and later partnered with Antoine Louis Nouzillet to make further varieties with DN initials. NGC ID# 2BLC, PCGS# 10491

**1868 Liberty Octagonal 25 Cents, MS67
BG-710, Tied for Finest**

6337 1868 Liberty Octagonal 25 Cents, BG-710, R.6, MS67 PCGS. CoinFacts estimates that 35 examples of BG-710 survive in all grades, this MS67 being among the finest representatives. Another Superb Gem certified by NGC recently appeared in our January 2015 FUN Signature sale, lot 7871, which realized \$3,995. This example has light yellow-gold coloration and good detail with similar central incompleteness. Population: 1 in 67, 0 finer (3/16). NGC ID# 2BML, PCGS# 10537

6338 1875 Indian Octagonal 25 Cents, BG-798, Low R.5, MS65 PCGS. An exquisite Gem that boasts mirrored butter-gold fields and excellent eye appeal. No marks are apparent, though identifiers exist as minute strike-throughs (as made) between the first two stars and below the R in DOLLAR. The dies are rotated 90 degrees from either coin or medal turn. A scarce Christopher Ferdinand Mohrig variety. Population: 6 in 65, 0 finer (3/16). NGC ID# 2BRJ, PCGS# 10625

**1859 Liberty Octagonal Half, BG-902
MS67, Single Highest Graded**

6339 1859 Liberty Octagonal 50 Cents, BG-902, Low R.4, MS67 NGC. Orange-red toning endows flashy and pristine fields. Evenly struck and highly attractive. The 9 in the date is repunched, and lathe lines (as made) are visible on both sides. A Frontier, Deviercy & Co. variety. As of (3/16), the single highest graded example of BG-902 from either leading grading service. NGC ID# 2BVW, PCGS# 10760

6340 1865 Liberty Round 50 Cents, BG-1005, Low R.5, MS65 PCGS. A pleasing Gem. The apricot-gold fields are smooth and semiprooflike. The portrait displays lime-green toning. As of (3/16), the single finest certified among the 51 examples graded by PCGS over the past 30 years. NGC has graded a total of 15 pieces, including one as MS65 and another as MS65 Prooflike, with none finer. NGC ID# 2BYE, PCGS# 10834

**1872 Indian Round Dollar, MS63
BG-1208, Token Reverse**

6341 1872 Indian Round Dollar, BG-1208, Low R.6, MS63 PCGS. A lovely apricot-gold prooflike example with an even strike and only minor field hairlines. The final Period Two variety listed in the Breen-Gillio reference, and the only variety with TOKEN as part of the legend. Issuer Christopher Ferdinand Mohrig undoubtedly sought to avoid interference with his business, but was nonetheless arrested by the Secret Service in 1876. Population: 6 in 63, 1 finer (2/16). NGC ID# 2C47, PCGS# 10953

WESTERN SOUVENIR GOLD

6342 Three-Piece 1909 Alaska-Yukon-Pacific Exposition Set NGC. The 1909 Miner tokens were issued by Jules Charbneau at the A.Y.P.E. During the 1915 Panama-Pacific International Exposition, they were promoted by Farran Zerbe as part of the M.E. Hart Coins of the West set. The lot includes: 1/4 DWT MS64 NGC; 1/2 DWT MS62 NGC; and a 1 DWT MS63 NGC, HK-360. An original box bearing the A.Y.P.E. logo accompanies the lot, and is in Good condition with tape, creases, writing, and wear.(Total: 3 tokens)

7383 1885 VG10 PCGS. PCGS Population (75/788). NGC Census: (37/406). Mintage: 1,476,490. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$562. NGC ID# 2773, PCGS# 3846

7384 1885 Fine 15 PCGS. PCGS Population (44/678). NGC Census: (14/365). Mintage: 1,476,490. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$697. NGC ID# 2773, PCGS# 3846

7385 1886 XF40 PCGS. PCGS Population (41/534). NGC Census: (16/297). Mintage: 3,330,290. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$600. NGC ID# 277U, PCGS# 3847

7386 1886 AU58 PCGS. PCGS Population (81/322). NGC Census: (42/212). Mintage: 3,330,290. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$950. NGC ID# 277U, PCGS# 3847

7387 1891 MS65 PCGS. CAC. PCGS Population (95/33). NGC Census: (59/13). Mintage: 16,834,350. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$835. NGC ID# 2776, PCGS# 3852

7388 1898 MS65 NGC. NGC Census: (88/21). PCGS Population (97/37). Mintage: 12,532,087. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$590. NGC ID# 22PP, PCGS# 3859

7389 1898 MS66 PCGS. PCGS Population (36/1). NGC Census: (19/2). Mintage: 12,532,087. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$1,050. NGC ID# 22PP, PCGS# 3859

7390 1899 MS66 PCGS. CAC. PCGS Population (71/4). NGC Census: (43/6). Mintage: 26,029,032. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$975. NGC ID# 22PR, PCGS# 3860

7391 1900 MS66 PCGS. CAC. PCGS Population (56/9). NGC Census: (47/4). Mintage: 27,255,996. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$825. NGC ID# 22PS, PCGS# 3861

7392 1901 MS65+ PCGS. CAC. PCGS Population (173/58 and 4/12+). NGC Census: (163/36 and 1/1+). Mintage: 26,480,212. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$340. NGC ID# 277C, PCGS# 3862

7393 1907 MS65 PCGS. CAC. PCGS Population (88/36). NGC Census: (79/12). Mintage: 39,214,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$500. NGC ID# 277J, PCGS# 3868

7394 1907 MS65 PCGS. CAC. PCGS Population (88/35). NGC Census: (79/12). Mintage: 39,214,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$500. NGC ID# 277J, PCGS# 3868

7395 1908 MS65 PCGS. PCGS Population (97/29). NGC Census: (60/14). Mintage: 22,686,176. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$575. NGC ID# 24FR, PCGS# 3869

7396 1911 MS66 PCGS. PCGS Population (47/4). NGC Census: (24/1). Mintage: 39,559,372. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$875. NGC ID# 277M, PCGS# 3872

7397 1912-D MS64+ PCGS. CAC. PCGS Population (313/215 and 6/17+). NGC Census: (311/118 and 2/6+). Mintage: 8,474,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$535. NGC ID# 277P, PCGS# 3874

PROOF LIBERTY NICKELS

7398 1883 No Cents PR66 PCGS. This coin is incorrectly holdered by PCGS as a Proof Shield Nickel. We have fixed the description and PCGS number and are offering as is. Please see images before bidding. PCGS Population (95/6). NGC Census: (97/18). Mintage: 5,219. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$775. NGC ID# 22PU, PCGS# 3878

7399 1883 With Cents PR66 Cameo PCGS. PCGS Population (36/5). NGC Census: (34/3). NGC ID# 277S, PCGS# 83881

7400 1883 With Cents PR66 Cameo PCGS. PCGS Population (36/5). NGC Census: (34/3). NGC ID# 277S, PCGS# 83881

7401 1885 PR61 PCGS. PCGS Population (7/908). NGC Census: (8/652). Mintage: 3,790. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR61: \$665. NGC ID# 277T, PCGS# 3883

7402 1888 PR66+ PCGS. PCGS Population (90/6 and 8/0+). NGC Census: (97/13 and 3/0+). Mintage: 4,582. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$650. NGC ID# 277W, PCGS# 3886

7403 1891 PR65 Cameo NGC. NGC Census: (39/35). PCGS Population (36/26). NGC ID# 277Z, PCGS# 83889

7404 1891 PR66 Cameo PCGS. PCGS Population (25/1). NGC Census: (31/4). NGC ID# 277Z, PCGS# 83889

7405 1902 PR66 PCGS. PCGS Population (68/17). NGC Census: (88/17). Mintage: 2,018. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$565. NGC ID# 278C, PCGS# 3900

7406 1902 PR66+ PCGS. CAC. PCGS Population (68/17 and 6/0+). NGC Census: (88/17 and 0/0+). Mintage: 2,018. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$565. NGC ID# 278C, PCGS# 3900

7407 1905 PR66+ PCGS. CAC. PCGS Population (45/16 and 3/0+). NGC Census: (63/26 and 1/0+). Mintage: 2,152. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$625. NGC ID# 278F, PCGS# 3903

7408 1907 PR65 PCGS. CAC. PCGS Population (98/67). NGC Census: (90/75). Mintage: 1,475. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$425. NGC ID# 278H, PCGS# 3905

7409 1909 PR66 PCGS. PCGS Population (216/47). NGC Census: (265/91). Mintage: 4,763. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$580. NGC ID# 278K, PCGS# 3907

7410 1909 PR66 Cameo PCGS. CAC. PCGS Population (67/26). NGC Census: (46/30). NGC ID# 278K, PCGS# 83907

8386 1886 MS67 NGC. NGC Census: (888/25). PCGS Population (381/7). Mintage: 19,963,886. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$1,000. NGC ID# 254V, PCGS# 7166

8387 1886 MS67 NGC. NGC Census: (888/25). PCGS Population (381/7). Mintage: 19,963,886. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$1,000. NGC ID# 254V, PCGS# 7166

8388 1886 MS65 Deep Mirror Prooflike ANACS. NGC Census: (59/18). PCGS Population (137/31). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,050. NGC ID# 254V, PCGS# 97167

8389 1886-O — Altered Surfaces — PCGS Genuine. UNC Details. NGC Census: (190/1473). PCGS Population (178/2067). Mintage: 10,710,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$800.

8390 1886-S MS64 PCGS. PCGS Population (1325/365). NGC Census: (719/139). Mintage: 750,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$800. NGC ID# 254X, PCGS# 7170

8391 1886-S MS64 NGC. NGC Census: (719/139). PCGS Population (1325/365). Mintage: 750,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$800. NGC ID# 254X, PCGS# 7170

8392 1886-S MS64+ PCGS. CAC. PCGS Population (1324/365 and 43/10+). NGC Census: (719/139 and 16/0+). Mintage: 750,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$800. NGC ID# 254X, PCGS# 7170

8393 1887/6 MS62 Prooflike PCGS. PCGS Population (11/108). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$600. NGC ID# 254Z, PCGS# 7175

8394 1887 MS66+ PCGS. CAC. PCGS Population (1562/126 and 91/3+). NGC Census: (3708/332 and 40/7+). Mintage: 20,290,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$265. *From The Paul H. Gerrie Collection.* NGC ID# 27Y3, PCGS# 7172

8395 1887 MS66 Prooflike PCGS. PCGS Population (68/4). NGC Census: (53/6). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$675. NGC ID# 254Y, PCGS# 7173

8396 1887 MS66 Prooflike PCGS. PCGS Population (68/4). NGC Census: (53/6). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$675. NGC ID# 254Y, PCGS# 7173

8397 1887 Partial E Reverse, VAM-1B, Hot-50, AU55 PCGS. PCGS Population (6/5). NGC Census: (3/0). NGC ID# 254Y, PCGS# 134003 Base PCGS# 7172

8398 1887 Donkey Tail, VAM-25A, Top 100, AU55 PCGS. CAC. PCGS Population (17/26). NGC Census: (11/16). NGC ID# 254Y, PCGS# 133907 Base PCGS# 7172

8399 1887-S MS64 PCGS. PCGS Population (1909/420). NGC Census: (946/157). Mintage: 1,771,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$535. NGC ID# 2554, PCGS# 7180

8400 1887-S MS64+ PCGS. CAC. PCGS Population (1916/421 and 57/16+). NGC Census: (946/157 and 19/3+). Mintage: 1,771,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$535. NGC ID# 2554, PCGS# 7180

8401 1887-S MS64+ PCGS. CAC. PCGS Population (1908/420 and 54/16+). NGC Census: (946/157 and 19/3+). Mintage: 1,771,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$535. NGC ID# 2554, PCGS# 7180

8402 1888 MS66 PCGS. PCGS Population (767/38). NGC Census: (946/78). Mintage: 19,183,832. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$540. NGC ID# 26KF, PCGS# 7182

8403 1888 MS66 PCGS. CAC. PCGS Population (762/38). NGC Census: (946/78). Mintage: 19,183,832. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$540. *From The Paul H. Gerrie Collection.* NGC ID# 26KE, PCGS# 7182

8404 1888 MS65 Prooflike PCGS. PCGS Population (53/11). NGC Census: (27/4). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$650. NGC ID# 2555, PCGS# 7183

8405 1888-O MS65+ PCGS. PCGS Population (2044/288 and 75/28+). NGC Census: (1338/49 and 8/1+). Mintage: 12,150,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$440. NGC ID# 2556, PCGS# 7184

8406 1888-S MS64 PCGS. PCGS Population (1558/371). NGC Census: (882/111). Mintage: 657,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$865. NGC ID# 2557, PCGS# 7186

8407 1888-S MS64 PCGS. PCGS Population (1560/375). NGC Census: (882/111). Mintage: 657,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$865. NGC ID# 2557, PCGS# 7186

8408 1888-S MS64 PCGS. CAC. PCGS Population (1559/374). NGC Census: (882/111). Mintage: 657,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$865. NGC ID# 2557, PCGS# 7186

8409 1888-S MS64 PCGS. CAC. PCGS Population (1559/374). NGC Census: (882/111). Mintage: 657,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$865. NGC ID# 2557, PCGS# 7186

8410 1889 MS66 PCGS. PCGS Population (337/4). NGC Census: (199/1). Mintage: 21,726,812. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$1,100. NGC ID# 2558, PCGS# 7188

8411 1889 MS66 NGC. CAC. NGC Census: (199/1). PCGS Population (329/4). Mintage: 21,726,812. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$1,100. NGC ID# 2558, PCGS# 7188

8412 1889 MS66 PCGS. CAC. PCGS Population (329/4). NGC Census: (199/1). Mintage: 21,726,812. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$1,100. *From The Paul H. Gerrie Collection.* NGC ID# 2558, PCGS# 7188

8413 1889-CC VG8 NGC. NGC Census: (244/3766). PCGS Population (377/6151). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : \$550. NGC ID# 2559, PCGS# 7190

8414 1889-CC Fine 12 PCGS. PCGS Population (511/5251). NGC Census: (333/3181). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$775. NGC ID# 2559, PCGS# 7190

8415 1889-CC VF20 PCGS. PCGS Population (470/4174). NGC Census: (291/2617). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,000. NGC ID# 2559, PCGS# 7190

8416 1889-CC VF20 ANACS. NGC Census: (291/2617). PCGS Population (475/4199). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,000. NGC ID# 2559, PCGS# 7190

8417 1889-CC — Improperly Cleaned — NGC Details. XF. NGC Census: (297/1638). PCGS Population (611/2029). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,825. NGC ID# 2559, PCGS# 7190

8418 1889-CC — Improperly Cleaned — NGC Details. XF. NGC Census: (297/1638). PCGS Population (613/2039). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,825.

8419 1889-CC — Cleaned — PCGS Genuine. XF Details. NGC Census: (297/1638). PCGS Population (614/2042). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,825. NGC ID# 2559, PCGS# 7190

8420 1889-O MS64 PCGS. PCGS Population (1681/223). NGC Census: (998/61). Mintage: 11,875,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$925. NGC ID# 255A, PCGS# 7192

8421 1889-O MS64+ PCGS. PCGS Population (1682/223 and 123/13+). NGC Census: (998/61 and 23/1+). Mintage: 11,875,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$925. NGC ID# 255A, PCGS# 7192

8422 1889-O MS64+ PCGS. CAC. PCGS Population (1673/222 and 123/12+). NGC Census: (998/61 and 23/1+). Mintage: 11,875,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$925. NGC ID# 255A, PCGS# 7192

8423 1889-S MS64 PCGS. PCGS Population (2268/767). NGC Census: (1348/269). Mintage: 700,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$560. NGC ID# 255B, PCGS# 7194

8424 1889-S MS64 PCGS. CAC. PCGS Population (2265/767). NGC Census: (1348/269). Mintage: 700,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$560. NGC ID# 255B, PCGS# 7194

8425 1890 MS65 PCGS. PCGS Population (608/5). NGC Census: (291/7). Mintage: 16,802,590. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,300. NGC ID# 255C, PCGS# 7196

8426 1890 MS65 NGC. NGC Census: (291/7). PCGS Population (608/5). Mintage: 16,802,590. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,300. NGC ID# 255C, PCGS# 7196

8427 1890 MS65 PCGS. PCGS Population (623/5). NGC Census: (291/7). Mintage: 16,802,590. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,300. NGC ID# 255C, PCGS# 7196

8428 1890-CC MS61 PCGS. CAC. PCGS Population (660/8673). NGC Census: (552/3971). Mintage: 2,309,041. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$510. NGC ID# 255D, PCGS# 7198

8429 1890-CC MS62 PCGS. Ex: Carson City Collection. PCGS Population (2469/6170). NGC Census: (1377/2594). Mintage: 2,309,041. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$580. NGC ID# 255D, PCGS# 7198

8430 1890-CC MS62 NGC. NGC Census: (1377/2594). PCGS Population (2476/6185). Mintage: 2,309,041. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$580. NGC ID# 255D, PCGS# 7198

9199 1925 Stone Mountain - OKLA AU50 NGC. The state abbreviation OKLA is placed above LIBERTY and the serial number 141 is entered high on the left reverse field. The Stone Mountain Confederate Monumental Association, which helped to distribute the sizeable mintage of this issue, is the source of the counterstamps. Examples are known to represent each of the former Confederate states, with the serial numbers generally unique and independent of an individual state. Many were sold to veterans of the Confederacy and their families/heirs in the late 1920s at \$1 each. This AU example is light, silver-gray with gold highlights. Mintage (quantities counterstamped unknown): 1,314,709. PCGS# 525150 Base PCGS# 9378

HARD TIMES TOKEN

- 9413 1837 Feuchtwanger Cent MS62 NGC.** HT-268, Breen 5-G, R.2. Feuchtwanger Composition.

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$200,000 (minimum \$14), plus twenty percent (20%) of any amount between \$200,000 and \$2,000,000, plus twelve percent (12%) of any amount over \$2,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment
< \$10.....	\$1
\$10 - \$49.....	\$2
\$50 - \$99.....	\$5
\$100 - \$199.....	\$10
\$200 - \$499.....	\$20
\$500 - \$999.....	\$50
\$1,000 - \$1,999.....	\$100
\$2,000 - \$4,999.....	\$200
\$5,000 - \$9,999.....	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999	\$1,000
\$20,000 - \$49,999	\$2,000
\$50,000 - \$99,999	\$5,000
\$100,000 - \$199,999	\$10,000
\$200,000 - \$499,999	\$20,000
\$500,000 - \$999,999	\$50,000
\$1,000,000 - \$4,999,999	\$100,000
\$5,000,000 - \$9,999,999	\$250,000
>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A

REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In

Terms and Conditions of Auction

addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:

a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or

b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), PO. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

Notice as to an Auction in New York City

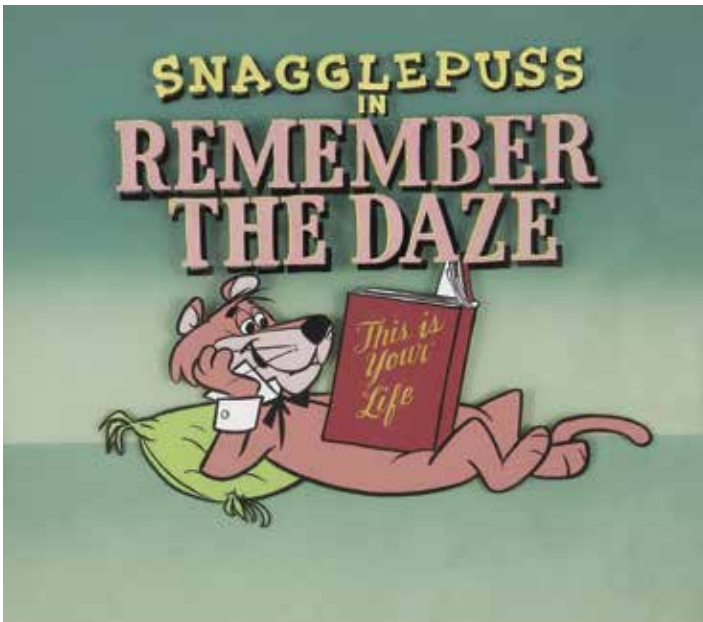

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This is a Public Auction Sale conducted by Auctioneer. The New York City licensed auctioneers are: Samuel Foose – 0952360, Kathleen Guzman – 0762165, Michael J. Sadler – 1304630, Scott Peterson – 1306933, Andrea Voss – 1320558, Ed Beardsley – 1183220, Clinton Swett – 1407750, and Nicholas Dawes – 1304724, who will conduct the sale on behalf of Heritage Auctioneers & Galleries, Inc. NYC #41513036 ("Auctioneer").

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auctioneer may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance, or reserve, or guarantee. Auctioneer has made advances to various consignors in this sale. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates, and its employees may bid on their lots or other lots for their own account in accordance with the laws of New York, and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 3-7-2016
